Principal accounting policies

Basis of accounting

The financial statements have been prepared under the historical cost convention and in accordance with United Kingdom applicable accounting standards. The principal accounting policies of the company have remained unchanged from the previous year and are set out below.

Cash flow statement

The director has taken advantage of the exemption in Financial Reporting Standard No 1 (revised) from including a cash flow statement in the financial statements on the grounds that the company is wholly owned and its parent publishes a consolidated cash flow statement.

Turnover

Turnover is the total amount receivable by the company for goods supplied and services provided, excluding VAT and trade discounts. Revenue from installation of equipment is recognised on completion. All other revenue is recognised on delivery.

Research and development

Research and development expenditure is written off in the year in which it is incurred.

Depreciation

Depreciation is calculated so as to write off the cost of an asset, less its estimated residual value by equal annual installments over the useful economic life of that asset as follows:

Fixtures, fittings and equipment	25-33%
Computer equipment	33%

Investments

Investments are included at cost less amounts written off.

Stocks

Stocks are stated at the lower of cost and net realisable value. Short-term work in progress cost includes all costs incurred in bringing the stock to its current location and condition.

CPM FM Limited
Financial statements for the years ended 31 May 2004 and 2003

Operating lease agreements

Rentals applicable to operating leases where substantially all of the benefits and risks of ownership remain with the lessor are charged against profits on a straight line basis over the period of the lease.

Pension costs

The company operates a defined contribution pension scheme for employees. The assets of the scheme are held separately from those of the company. The annual contributions payable are charged to the profit and loss account.

Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more, tax.

Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

Foreign currencies

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are translated into sterling at the rate of exchange ruling at the date of the transaction. Exchange differences are taken into account in arriving at the operating profit.
