On June 1, 2004, the Registrant issued a press release announcing that certain members of its executive management team have established 10b5-1 plans. The text of the press release is as follows:

Universal Technical Institute, Inc. Executives Establish 10b5-1 Trading Plans

New Trading Plans Allow Limited, Pre-determined Stock Trading

PHOENIX, June 1, 2004 **Universal Technical Institute, Inc. (NYSE: UTI)**, a leading provider of technical education training, announced today that, as previously described in the company's registration statement filed in conjunction with its secondary offering completed in April 2004, several members of its executive management team have established plans authorizing the sale of company securities through approved, pre-determined stock trading plans. These plans comply with Rule 10b5-1 under the Securities Exchange Act of 1934 and will allow the executives to sell a limited portion of their UTI holdings from time to time.

The executives establishing 10b5-1 trading plans are: Robert Hartman, chairman of the board; Kimberly McWaters, president and chief executive officer; Jennifer Haslip, chief financial officer; Roger Speer, senior vice president of operations; and David Miller, senior vice president of admissions.

Under the terms of the plans, as articulated by each participant, a participant may sell between 13% to 18% of that individual's holdings. The UTI executives, who did not sell shares in UTI's public offerings, adopted the plans to gradually diversify their respective holdings and to minimize the market effect of such sales by spreading them over a more extended time period than is possible within the trading window period under the company's stock trading policy for officers and directors.

Certain members of management have adopted pre-arranged stock trading plans to sell a portion of their company stock over time as part of their individual long-term strategies for asset diversification and liquidity. These are programmed selling plans which will result in management retaining between approximately 80% to 85% of their current interest in UTI, reflecting our confidence in the prospects of the company, said Robert Hartman, chairman of the board.

Rule 10b5-1 plans permit directors and corporate officers to adopt written, pre-arranged stock trading plans when they are not in possession of material nonpublic information. In addition to asset diversification, such plans aim to reduce market impact and alleviate concerns about whether the corporate officers were in possession of material, non-public information at the time of their sales.
