INCORPORATION BY REFERENCE

Sappi Limited's report for the conformed third a quarter results ended June, furnished by the Registrant under this Form 6 K, is incorporated by reference into (i) the Registration Statements on Form S 8 of the Registrant filed December 23, 1999, December 15, 2004 and February 2, 2010 in connection with The Sappi Limited Share Incentive Scheme, (ii) the Section 10(a) Prospectus relating to the offer and sale of the Registrant's shares to Participants under The Sappi Limited Share Incentive Scheme, (iii) the Registration Statements on Form S 8 of the Registrant filed December 15, 2004 and December 21, 2005 in connection with The Sappi Limited 2004 Performance Share Incentive Plan and (iv) the Section 10(a) Prospectus relating to the offer and sale of the Registrant's shares to Participants under The Sappi Limited 2004 Performance Share Incentive Plan. This Form 6 K includes a conformed version of the earnings announcement sent by the Registrant to its shareholders. This conformed version was prepared solely for purposes of supplementing the documents referred to in clauses (i) (iv) above.

FORWARD-LOOKING STATEMENTS

In order to utilize the "Safe Harbor" provisions of the United States Private Securities Litigation Reform Act of 1995 (the "Reform Act"), Sappi Limited (the "Company") is providing the following cautionary statement. Except for historical information contained herein, statements contained in this Report on Form 6 K may constitute "forward looking statements" within the meaning of the Reform Act. The words "believe", "anticipate", "expect", "intend", "estimate", "plan", "assume", "positioned", "will", "may", "should", "risk" and other similar expressions, which are predictions of or indicate future events and future trends, which do not relate to historical matters, identify forward looking statements. In addition, this Report on Form 6 K may include forward looking statements relating to the Company's potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. Reliance should not be placed on forward looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond the control of the Company, together with its subsidiaries (the "Group"), and may cause the actual results, performance or achievements of the Group to differ materially from anticipated future results, performance or achievements expressed or implied by such forward looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to:

- the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclicity, such as levels of demand, production capacity, production, input costs including raw material, energy and employee costs, and pricing);
- the impact on the business of the global economic downturn;
- unanticipated production disruptions (including as a result of planned or unexpected power outages);
- changes in environmental, tax and other laws and regulations;
- adverse changes in the markets for our products;
- consequences of our leverage, including as a result of adverse changes in credit markets that affect our ability to raise capital when needed;
- adverse changes in the political situation and economy in the countries in which we operate or the effect of governmental efforts to address present or future economic or social problems;
- the impact of investments, acquisitions and dispositions (including related financing), any delays, unexpected costs or other problems experienced in connection with dispositions or with integrating acquisitions and achieving expected savings and synergies; and

- currency fluctuations.

These and other risks, uncertainties and factors are discussed in the Company's Annual Report on Form 20 F and other filings with and submissions to the Securities and Exchange Commission, including this Report on Form 6 K. Shareholders and prospective investors are cautioned not to place undue reliance on these forward looking statements. These forward looking statements are made as of the date of the submission of this Report on Form 6 K and are not intended to give any assurance as to future results. The Company undertakes no obligation to publicly update or revise any of these forward looking statements, whether to reflect new information or future events or circumstances or otherwise.

Sappi works closely with customers, both direct and indirect, in over 100 countries to provide them with relevant and sustainable paper, paper-pulp and chemical cellulose products and related services and innovations.

Our market-leading range of paper products includes: coated fine papers used by printers, publishers and corporate end-users in the production of books, brochures, magazines, catalogues, direct mail and many other print applications; casting release papers used by suppliers to the fashion, textiles, automobile and household industries; and in our Southern African region, newsprint, uncoated graphic and business papers, premium-quality packaging papers, paper-grade pulp and chemical cellulose.

Our chemical cellulose products are used worldwide by converters to create viscose fibre, acetate tow, pharmaceutical products as well as a wide range of consumer products.

The pulp needed for our products is either produced within Sappi or bought from accredited suppliers. Across the group, Sappi is close to 'pulp neutral', meaning that we sell almost as much pulp as we buy.

Operating profit US\$54 million; Q3 2010 US\$154 million

Operating profit excluding special items US\$60 million; Q3 2010 US\$75 million

General economic uncertainty, particularly in Europe

North American and chemical cellulose businesses continue to perform strongly

Planned annual maintenance shuts at major pulp mills

High input costs only partly offset by higher prices

Loss per share 13 US cents; Q3 2010 EPS 12 US cents

Financial summary for the quarter

2

Third Quarter Results

Commentary on the quarter

Operating profit for the quarter was impacted as expected by the planned annual maintenance shuts at a number of our major pulp mills and seasonal factors. In addition, weaker than expected demand for coated woodfree paper in Europe resulting from continuing uncertainty in economic conditions unfavourably affected operating profit. For the nine months, operating profit excluding special items was more than 50% higher than the equivalent period last year.

Sales for the quarter were US\$1.8 billion, an increase of 12% in US dollar terms compared to the third quarter last year and at a similar level to the quarter ended March 2011. Average prices realised in US Dollar terms were 16% higher than a year ago. Excluding the effect of translation from Euro and Rand to a relatively weaker US Dollar, average prices in local currencies increased 5%.

High input costs remained a challenge in each of our businesses and are reflected in an increase in variable costs per ton of 18%. In local currency terms, variable costs per ton increased 6% compared to the equivalent quarter last year. In order to reduce the impact of high raw material prices, we continue to seek innovations with regard to the sourcing and the use of raw materials.

Operating profit excluding special items for the quarter was US\$60 million compared to US\$75 million in the equivalent quarter last year. Special items of US\$6 million for the quarter included a plantation fair value adjustment and Black Economic Empowerment charges.

Net finance costs for the quarter include breakage costs and the accelerated amortisation of fees of US\$43 million in connection with the debt restructuring completed during the quarter in order to extend debt maturities and reduce future finance costs. We expect quarterly net finance costs of approximately US\$60 million after the refinancing.

The loss per share for the quarter was 13 US cents (including a loss of 9 US cents in respect of special items and once-off debt restructuring costs) compared to earnings of 12 US cents (including a gain of 10 US cents in respect of special items).

Cash flow and debt

Cash generated from operations for the quarter was US\$148 million, compared to US\$188 million in the equivalent quarter last year.

Working capital increased by US\$46 million during the quarter, largely as a result of reduced accounts payable, compared to an increase of US\$84 million a year ago.

Capital expenditure was US\$69 million for the quarter and US\$161 million year-to-date. We expect the full year capital expenditure to be less than US\$250 million.

Liquidity remained strong with cash on hand of US\$362 million and the undrawn committed revolving credit facility of €350 million (US\$508 million), at quarter end.

Although volumes sold for the nine months ended June 2011 are 4% above the equivalent period last year, volumes sold for the quarter were 3% lower than a year ago. Coated woodfree sales volumes declined in the quarter compared to a year ago, but coated mechanical volumes increased.

Average prices realised for the quarter were 4% higher than the equivalent quarter last year and similar to the quarter ended March 2011.

High pulp and other raw material prices continued to impact margins. Margins on our exports were further impacted by the 11% stronger Euro to US Dollar exchange rate, compared to the equivalent quarter last year.

The business continued to perform strongly. Volumes sold for the quarter increased by 3% compared to the equivalent quarter last year. Demand for coated web was soft in the first two months of the quarter but experienced a significant seasonal rebound in June and into the fourth financial quarter.

Average prices realised were 5% higher than a year ago and slightly higher than the quarter ended March 2011, reflecting higher prices realised for coated paper and speciality casting release paper. Raw material prices, including wood, energy and chemicals, increased sharply during the quarter.

The business' performance was unfavourably impacted by extended planned annual maintenance shuts at Ngodwana and Saiccor mills during the quarter.

Demand and pricing for chemical cellulose was strong in the quarter, resulting in a good performance for the chemical cellulose business.

In the domestic market, sales volumes of paper and packaging paper was lower than a year ago, largely as a result of increased competition from imports, partly due to the relatively strong Rand to the US Dollar. Plans to restructure the paper and packaging business in order to improve the profitability in conjunction with the approximately US\$340 million conversion of the Ngodwana pulp mill to chemical cellulose production are progressing. We expect to announce details of these restructuring plans before the end of the calendar year.

7

Third Quarter Results

Outlook

Market conditions remain challenging and uncertain, particularly in Europe. Nevertheless we are entering the typically busiest period for coated paper. Order inflows in North America remain firm and in Europe we are expecting some improvement from the levels of the previous quarter.

We expect that the realisation of the benefits of our cost and capacity management activities in Europe will commence in the fourth financial quarter. Coated paper production at Biberist Mill in Switzerland ceased during July. Going forward, we expect savings of US\$50 million per annum as a result of the closure. In addition, as previously announced, we will start to benefit from a further US\$50 million per annum in fixed and variable cost saving measures towards the end of the fourth quarter.

Raw material input costs have continued to rise, in line with other commodity prices. Pulp prices remain high but there have been reductions in some regions from the peaks reached during the previous quarter.

High pulp prices are favourable for our North American and Southern African businesses, which are net sellers of pulp, but unfavourable for our European business, which is a net buyer of pulp.

Our Southern African business has a strong order book for chemical cellulose and expects an improvement in demand for packaging paper in the domestic market. The domestic market, particularly for printing and writing paper, remains highly competitive as a result of the strong Rand relative to the US Dollar, which has led to increased competition from imports. The business' performance for the quarter will be significantly impacted by the industry-wide strike of about three weeks in July over wage negotiations.

We expect considerable improvement in operating profit (excluding special items) during our fourth financial quarter compared to the third financial quarter; however, it is likely to be well short of the level achieved in the equivalent quarter last year. Nevertheless, we expect a much-improved operating profit (excluding special items) for the full year, compared to the 2010 financial year. We anticipate strong cash generation in our fourth quarter and positive cash generation for the full year.

Directorate

During the quarter we announced that following the retirement in December 2010 of Mr H C (Helmut) Mamsch and in line with the Sappi Board's succession planning, two independent non-executive directors will join the board later this year. Mr M A (Mike) Fallon will join the board with effect from 01 September 2011 and Mr G P F (Frits) Beurskens with effect from 01 October 2011.

Third Quarter Results

Notes to the condensed group results

1. Basis of preparation

The condensed financial information has been prepared in accordance with the framework concepts and the measurement and recognition requirements of International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board, the AC 500 standards issued by the Accounting Practices Board and the information required by IAS 34 "Interim Financial Reporting". They are based on appropriate accounting policies which have been consistently applied with those applied in the financial statements for the year ended September 2010 and which are supported by reasonable and prudent judgements, including those involving estimations.

The nine months ended June 2011 consists of 40 weeks compared to the prior year's nine months which consisted of 39 weeks.

The results are unaudited.

6. Material balance sheet movements compared to September 2010

Cash and cash equivalents and other current liabilities

The decrease in cash and cash equivalents and in other current liabilities is largely due to the timing of creditor payments as a result of the calendar month-end falling before the fiscal month-end when creditor payments fell due.

Cash and cash equivalents and interest-bearing borrowings

In March 2011, we utilised some of our cash resources to repay US\$150 million principal amount of the outstanding US\$500 million 6.75% Guaranteed Notes due June 2012.

In April 2011, we issued approximately US\$705 million Senior Secured Notes split into a 10-year US\$350 million tranche and a 7-year €250 million tranche that were issued at par and both Notes bear interest at a rate of 6.625% per annum. The net proceeds of the Notes were used to redeem the remaining US\$350 million of our 6.75% Guaranteed Notes due June 2012 and to repay €200 million of our OeKB Term Loan Facility. At the same time, our existing undrawn revolving credit facility maturing 2012 was increased from a €209 million to a €350 million facility and extended to 2016. We repaid the remaining €120 million of our OeKB Term Loan balance from cash resources in June 2011.

Sappi Southern Africa (Pty) Ltd issued a ZAR500 million (US Dollar fixed rate bond 'SSA01' on 28 June 2011 at a 150 basis points spread over the government reference rate and an all in coupon rate of 9.63%. The bond is repayable on 28 June 2016, with coupons payable semi-annually on 28 June and 28 December of each year. The proceeds of the bond will be used to partially refinance the ZAR1 billion maturing SMF2 bond on 14 October 2011 – the balance will be paid from own cash generated.

In addition, there were transfers of US\$191 million from non-current interest-bearing borrowings to current interest-bearing borrowings of loans falling due in the next 12 months.

7. Post balance sheet event

On 03 August 2011, we announced the closure of Adamas Mill in South Africa. The estimated cost of closure is US\$5 million.

Third Quarter Results

Reconciliation of operating profit excluding special items to segment operating profit

(1)
 Special items cover those items which management believe are material by nature or amount to the operating results and require separate disclosure. Such items would generally include profit or loss on disposal of property, investments and businesses, asset impairments, restructuring charges, non-recurring integration costs related to acquisitions, financial impacts of natural disasters, non-cash gains or losses on the price fair value adjustment of plantations and alternative fuel tax credits receivable in cash.

 (1)

In compliance with the U.S. Securities Exchange Commission (“SEC”) rules relating to “Conditions for Use of Non-GAAP Financial Measures”, we have reconciled operating profit (loss) excluding special items to operating profit. Operating profit (loss) excluding special items represents operating profit before special items. Special items cover those items which management believe are material by nature or amount to the operating results and require separate disclosure. Such items would generally include profit of loss on disposal of property, investments and businesses, asset impairments, restructuring charges, non-recurring integration costs related to acquisitions, financial impacts of natural disasters, non-cash gains or losses on the price fair value adjustment or plantations and alternative fuel mixture tax credits receivable in cash. We use operating profit (loss) excluding special items as an internal measure of performance to benchmark and compare performance, both between our own operations and as against other companies. Operating profit (loss)

excluding special items is a measure used by the Group, together with measures of performance under IFRS, to compare the relative performance of operations in planning, budgeting and reviewing the performances of various businesses. We believe operating profit (loss) excluding special items is a useful measure of financial performance in addition to net profit, operating profit and other profitability measures under IFRS because it facilitates operating performance comparisons from period to period and company to company. For these reasons, we believe operating profit (loss) excluding special items and similar measures are regularly used by the investment community as a means of comparison of companies in our industry. Different companies and analysts may calculate operating profit (loss) excluding special items differently, so making comparisons among companies on this basis should be done very carefully.

Operating profit (loss) excluding special items is not a measure of performance under IFRS and should not be considered in isolation or construed as a substitute for operating profit or net profit as an indicator of the company's operations in accordance with IFRS.
