NOTES TO THE CONSOLIDATED FINANCIAL INFORMATION

1. Basis of accounting procedures:

In December 2001, Nomura Holdings Inc. (the Company) filed a registration statement, in accordance with the Securities Exchange Act of 1934, with the United States Securities and Exchange Commission (SEC) in order to list its American Depositary Shares (ADS) on the New York Stock Exchange. Since then, the Company has an obligation to file an annual report, Form 20-F, with the SEC in accordance with Securities Exchange Act of 1934.

Pursuant to the section 81 of Regulations Concerning the Terminology, Forms and Preparation Methods of Semi-Annual Consolidated Financial Statements (Ministry of Finance Ordinance No. 24, 1999), the consolidated financial information for the six months ended September 30, 2002 has been prepared in accordance with the accounting principles which are required in order to issue ADS, i.e., the accounting principles generally accepted in the United States of America (U.S. GAAP). The following paragraphs describe the major differences between U.S. GAAP which Nomura adopts and accounting principles generally accepted in Japan (Japanese GAAP), and where the significant differences exist, the amount of effect to income before income taxes pursuant to Japanese GAAP.

Unrealized gains and losses on investments in equity securities

Under U.S. GAAP for broker-dealers, unrealized gains and losses on investments in equity securities are recognized in the income statements. Under Japanese GAAP, unrealized gains and losses on investments in equity securities, net of applicable income taxes, are reported in a separate component of shareholders' equity. Therefore, under Japanese GAAP, there exist the differences, which have a negative impact of ¥21,675 million on income before income taxes.

Unrealized gains and losses on non-trading debt securities

Under U.S. GAAP for broker-dealers, unrealized gains and losses on non-trading debt securities are recognized in the income statements. Under Japanese GAAP, unrealized gains and losses on non-trading debt securities, net of applicable income taxes, are reported in a separate component of shareholders' equity.

Retirement and severance benefit

Under U.S. GAAP, gain or loss resulting from experience different from that assumed or from a change in an actuarial assumption is amortized over the remaining service period of employees when such balance at beginning of year exceeds the Corridor which is defined as a 10% of larger of projected benefit obligation or fair value of plan assets, while such gain or loss is amortized for a certain period regardless of the Corridor under Japanese GAAP. Under U.S. GAAP, additional minimum pension liabilities are provided when the accumulated benefit obligation exceeds the fair value of plan assets, while such treatment is not provided under Japanese GAAP.

Amortization of goodwill and equity method goodwill

Under U.S. GAAP, goodwill and equity method goodwill shall not be amortized and shall be tested for impairment regularly. Under Japanese GAAP, goodwill and equity method goodwill shall be amortized over certain periods within 20 years. Therefore, under Japanese GAAP, there exist the differences, which have a negative impact of ¥11,274 million on income before income taxes. Under U.S. GAAP, negative goodwill and equity method negative goodwill shall be written off at once when negative goodwill arises. Under Japanese GAAP, negative goodwill shall be amortized over certain periods within 20 years based on the straight-line method.

Appropriations of retained earnings

Under U.S. GAAP, appropriations of retained earnings are reflected and recorded in the consolidated financial statements for the period to which they relate. Also, under U.S. GAAP, bonuses to directors are charged to income. Under Japanese GAAP, a company may select accounting method for appropriations of retained earnings to reflect and record appropriations in the consolidated financial statements for the period to which they relate or in a subsequent period when shareholders' approval for the appropriations have been obtained.

Table of Contents

Changes in the fair value of derivative contracts

Under U.S. GAAP, all derivative contracts, including derivative contracts that have been designated as hedges to specific assets or specific liabilities, are valued at fair value, and changes in the fair value of derivative contracts are recognized in the income statement or other comprehensive income. Under Japanese GAAP, derivative contracts that have been entered into for hedging purpose are valued at fair value and changes in the fair value of derivative contracts are deferred on the balance sheet.

Leveraged leases

Under U.S. GAAP, fixed income and expenses are recognized for each year over the period of the leveraged leases. Under Japanese GAAP, depreciation expenses arising from leased assets are recognized on a declining balance method and income and expenses are not averaged during the period of leveraged leases.

Table of Contents

2. Summary of accounting policies:

Description of business

Nomura Holding, Inc. and its broker-dealers, banking and other financial services subsidiaries provide investment, financing and related services to individual, institutional and government customers on a global basis. Such services include equity and fixed income brokerage, trading, underwriting, distribution and clearance; trading of foreign exchange and futures contracts and other derivatives in a broad range of asset categories, rates and indices; investment banking, real estate, project finance, private equity finance and other corporate finance advisory activities; international merchant banking and other principal investment activities; and asset management, private banking, trust and custody services. The Company began its operations in Japan in 1925.

Basis of presentation

The consolidated financial information includes the accounts of the Company and its majority-owned subsidiaries (collectively, the Company and its majority-owned subsidiaries are referred to as "Nomura"). The Company's principal subsidiaries include Nomura Securities Co., Ltd., Nomura Holding America Inc. and Nomura International plc. All material intercompany transactions and accounts have been eliminated on consolidation. Investments in 20 to 50 percent owned companies, which are not consolidated, are accounted for using the equity method of accounting and are reported in *Investments in and advances to affiliated companies*.

Use of Estimates

In presenting the consolidated financial information, management makes estimates regarding certain financial instrument valuations, the outcome of litigation, the recovery of the carrying value of goodwill, valuation allowances for loan losses and deferred tax assets, and other matters that affect the reported amounts of assets and liabilities as well as disclosures in the financial information. Estimates by their nature are based on judgment and available information. Therefore, actual results may differ from estimates, which could have a material impact on the consolidated financial information, and it is possible that such adjustments could occur in the near term.

Fair Value of Financial Instruments

Financial instruments including derivatives, used in Nomura's trading activities are recorded at fair value with unrealized gains and losses reflected in *Net gain on trading*. Fair values are based on listed market prices, where possible. If listed market prices are not available or if the liquidation of the Nomura's positions would reasonably be expected to impact market prices, fair value is determined based on valuation pricing models which take into consideration time value and volatility factors.

Pricing models and their underlying assumptions impact the amount and timing of unrealized gains and losses, and the use of different valuation models or underlying assumptions could produce different financial results. Changes in the fixed income, equity, foreign exchange and commodity markets will impact Nomura's estimates of fair value in the future, potentially affecting *Net gain on trading*. To the extent financial contracts have extended maturity dates, Nomura's estimates of fair value may involve greater subjectivity due to the lack of transparent market data available upon which to base underlying modeling assumptions.

Private Equity Investments

Nomura has been actively involved in the private equity business. As a result of a review to determine the optimum structure to run this business going forward in Europe, on March 27, 2002, Nomura restructured its Principal Finance Group ("PFG") based on the United Kingdom and, as a result, contributed its investments in certain of its remaining investee companies (the "PFG entities") to Terra Firma Capital Partners I ("TFCP I"), a recently formed limited partnership which is engaged in the private equity business. As a result of Nomura's contribution of its investments in the PFG entities to TFCP I in exchange for a limited partnership interest, Terra Firma Investments (GP) Limited ("Terra Firma"), the general partner of TFCP I, which is independent of Nomura, assumed control of the investments. Accordingly Nomura ceased consolidating the investments on such date. Terra Firma Capital Partners Limited ("TFCPL") has been established by former Nomura employees to advise Terra Firma in relation to the management of TFCP I as well as the raising and investing of additional capital. With effect from March 27, 2002, Nomura accounts for its limited partnership interest in TFCP I at fair value in accordance with

Table of Contents

accounting practice for broker-dealers.

As stated above the limited partnership interest in TFCP I is carried at fair value. Corresponding changes in the fair value of the limited partnership interest in TFCP I are included in *Gain or loss on private equity investments*. The determination of fair value is significant to Nomura’s financial condition and results of operations and requires management to make judgments based on complex factors.

As the underlying investments are in non-publicly listed companies, there are no external quoted prices available. In place of this, Nomura’s Risk Management unit meets with Terra Firma, TFCPL and the management teams of the underlying investments to discuss among other things, Terra Firma’s valuation of the investments, current business performance, actual versus budgeted results, revised full year projections and the status of major initiatives to boost sales, or reduce operating costs. Terra Firma also provides regular performance reports for each investment. The information obtained from these meetings and reports, together with comparisons made to similar quoted businesses and, in the case of any property based investments, input from external advisors allows Nomura to produce its own estimates of the fair value for each underlying investment.

In estimating fair value, Nomura estimates the price that would be obtained between a willing buyer and a willing seller dealing at arm’s length.

Valuations are typically based on projected future cash flows to be generated from the underlying investment, discounted at a weighted average cost of capital. The cost of capital is estimated, where possible, by reference to quoted comparables with a similar risk profile. Cash flows are derived from bottom up, detailed projections prepared by management of each respective investment. These projections will reflect the business drivers specific to each investment.

Examples of the factors affecting the business valuations are set out in the table below:

<u>Sector</u>	<u>Valuation Factors</u>
Hotels	Room rate achieved and occupancy, which in turn are driven by business and leisure travel. Revenue from conference facilities and food and beverage sales. Staff and other costs and central overheads.
Real Estate	Sales values, leaseback and open market rental values achieved, driven by underlying demand for housing in both the homeowner and rental markets. Property holding and refurbishment and head office costs. Availability and cost of finance.
Consumer Finance	Number of rental agreements outstanding, average revenue per rental agreement (taking into account arrears), rental acquisition costs, rental maintenance costs, as well as overheads and head office costs.
Retail	Market share, changes in market size, underlying trends in consumer behavior. Gross margin and operating costs, including outlet overheads and head office costs.
Services	Contract terms negotiated at beginning of contract. Initial contract set up costs and capital expenditure. Ongoing servicing costs, including staff costs and central overheads. Additional contracts and additional non-contracted works. Availability and cost of finance.

Where possible these valuations are compared with price/earnings data for comparable quoted companies or recent market price data for comparable transactions. Any significant differences are analysed and consideration given to whether this analysis indicates an adjustment to the Discounted Cash Flow valuation is required. While it is likely that certain potential purchasers may have special interests in the relevant investments that would allow them to justify a premium price, such as synergy or strategic benefits, no such premium has been included within the valuation models. Conversely, no discounts have been taken for the fact that there may only be a limited number of potential purchasers of the investments. These valuations are then stress tested to assess the impact of particular risk factors. Examples of such stress tests include:

Table of Contents

Stressing exit assumptions, either by altering the timing or the exit multiple used. In particular, using exit multiples in line with 5-year lows of trading multiples for similar companies are considered

Stressing growth assumptions, to assume lower growth. Where possible, the impact of a mild recession is considered

Removing or curtailing any assumptions about increases in operating margins.

An assessment of the results of the fair value exercise and the stress tests allows the final estimated valuation to be established. The fair value of Nomura's investment in TFCP I is then the sum of the fair values of the individual investments less any performance bonuses that may be payable, either to the management team of a particular business or under the TFCPL documentation.

For recently acquired investments (i.e., those acquired within 12 months), fair value is equal to acquisition cost unless there has been a material change to the operating performance of the specific investment or a significant event has occurred in the marketplace.

The use of different valuation models, methodologies or assumptions could produce materially different estimates of fair value, which could materially affect the results of operations or statement of financial condition.

Transfers of Financial Assets

Nomura accounts for the transfer of financial assets in accordance with Statement of Financial Accounting Standards (SFAS) No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities (SFAS 140). This statement requires that Nomura account for the transfer of financial assets, occurring after March 31, 2001, as a sale when Nomura relinquishes control over the asset. SFAS 140 deems control to be relinquished when the following conditions are met: (a) the assets have been isolated from the transferor (even in bankruptcy or either receivership), (b) the transferee has the right to pledge or exchange the assets received and (c) the transferor has not maintained effective control over the transferred assets. In connection with these securitization activities, Nomura utilizes special purposes entities principally for (but not limited to) the securitization of commercial and residential mortgages, home equity loans, government and corporate bonds, and lease and trade receivables. Nomura derecognizes financial assets transferred in securitizations provided that Nomura has relinquished control over such assets.

Nomura has historically used special purpose entity or, SPE vehicles as a conduit and has not retained a financial interest in the asset securitizations. In conduit transactions, Nomura serves as the administrator and provides contingency liquidity support for the commercial paper. Conduits provide clients with a way to access liquidity in the commercial paper markets by allowing clients to sell assets to the conduit, which in return issues commercial paper to fund the purchases. The commercial paper issued by the conduits is supported with sufficient collateral, other credit enhancement, and liquidity support to receive at least an A-1 or P-1 rating. Nomura may retain an interest in the financial assets securities (Retained Interests) in the future, which may include assets in the form of residual interests in the special purpose entities established to facilitate the securitization. Any Retained Interests would be included in *Securities inventory* within the Nomura's balance sheet. Nomura records its *Securities inventory*, including Retained Interests, at fair value with any changes in fair value included in revenues.

Translation of accounts denominated in foreign currencies and of foreign currency financial statements

The financial statements of the Company's subsidiaries outside Japan are measured using their functional currency. Generally, all assets and liabilities of foreign subsidiaries are translated into Japanese yen at exchange rates in effect at the respective period ends; all revenue and expenses are translated at the average exchange rates for the respective periods and the resulting translation adjustments are accumulated and reported as *Cumulative translation adjustments* in other comprehensive income.

Foreign currency assets and liabilities are translated at exchange rates in effect at the respective period ends and the resulting translation gains or losses are currently credited or charged to income.

Table of Contents

Fee revenue

Commissions charged for executing brokerage transactions are accrued on a trade date basis and are included in current period earnings. Fees from investment banking include securities underwriting fees and other corporate financing services fees. Underwriting fees are recorded when services for underwriting are completed. All other fees are recognized when related services are performed. Asset management fees are accrued as earned.

Securities inventory, non-trading debt securities and securities sold but not yet purchased

Trading assets owned and trading liabilities sold but not yet purchased, including contractual commitments arising pursuant to derivatives transactions, are recorded on the consolidated balance sheet on a trade date basis at market or fair value with the related gains and losses recorded in *Net gain on trading* in the consolidated statement of income. Fair value is generally based on quoted market prices, broker or dealer quotations or an estimation by management of the amounts expected to be realized upon settlement in current market conditions. Where quoted market prices or broker or dealer quotations are not available, prices for similar instruments or valuation pricing models are considered in the determination of fair value. Valuation pricing models consider time value, volatility and other statistical measurements for the relevant instruments or for instruments with similar characteristics. These models also incorporate adjustments relating to the administrative costs of servicing future cash flows and market liquidity adjustments. These adjustments are fundamental components of the fair value calculation process.

Securities inventory and *Securities sold but not yet purchased* include options on securities purchased and written, respectively.

Non-trading debt securities are recorded at market or fair value together with the related hedges and the related gains and losses are recorded in *Revenue Other* in the consolidated statement of income.

Securities financing transactions

Repurchase and reverse repurchase transactions (Repo transactions) principally involve the buying or selling of Government and Government agency securities under agreements with customers to resell or repurchase these securities to or from those customers. The subsidiaries take possession of securities purchased under Repo agreements, value the securities on a daily basis and obtain additional collateral if the value of the securities is not sufficient to protect them in the event of default by the customer. Repo transactions are accounted for as collateralized financing transactions and are recorded on the consolidated balance sheets at the amount at which the securities will be repurchased or resold, as appropriate.

Repo transactions are presented on the consolidated balance sheet net-by-counterparty, where net presentation is consistent with Financial Accounting Standards Board Interpretation (FIN) No. 41, Offsetting of Amounts Related to Certain Repurchase and Reverse Repurchase Agreements .

Securities borrowed and securities loaned are accounted for as financing transactions. Securities borrowed and securities loaned that are cash collateralized are recorded on the consolidated balance sheet as the amount of cash collateral advanced or received. Securities borrowed transactions generally require Nomura to provide the counterparty with collateral in the form of cash or other securities. For securities loaned transactions, Nomura generally receives collateral in the form of cash or other securities. Nomura monitors the market value of the securities borrowed or loaned and requires additional cash or securities, as necessary, to ensure that such transactions are adequately collateralized.

On the consolidated balance sheet, all Nomura-owned securities pledged to counterparties where the counterparty has the right to sell or repledge the securities are classified as *Securities pledged as collateral* in accordance with SFAS 140.

Table of Contents

Derivatives Trading

Nomura uses a variety of derivative financial instruments, including futures, forwards, swaps and options, in its trading activities and in the management of its interest rate, market price and currency exposures.

These derivative financial instruments used in trading activities are valued at market or estimated fair value with the related gains and losses recorded in *Net gain on trading*. Unrealized gains and losses arising from Nomura's dealings in over-the-counter derivative financial instruments are presented in the accompanying consolidated balance sheet on a net-by-counterparty basis where net presentation is consistent with FIN No. 39, *Offsetting of Amounts Related to Certain Contracts*.

Non-trading

In addition to its trading activities, Nomura, as an end user, uses derivative financial instruments to manage its interest rate and currency exposures or to modify the interest rate characteristics of certain non-trading assets and liabilities.

These derivative financial instruments are linked to specific assets or specific liabilities and are designated as hedges as they are effective in reducing the risk associated with the exposure being hedged, and they are highly correlated with changes in the market or fair value of the underlying hedged item, both at inception and throughout the life of the hedge contract. Nomura applies fair value hedge accounting to these hedging transactions, and the relating unrealized profit and losses are recognized together with those of the hedged assets and liabilities as interest revenue or expenses.

Derivatives that do not meet these criteria are carried at market or fair value and with changes in value included currently in earnings.

Allowance for loan losses

Loans receivable consist primarily of loans receivable from customers and from other than customers. Loans receivable from customers consist of commercial loans and margin transaction loans. Loans receivable from other than customers mainly represent loans receivable from institutional counter parties in the money markets used for short-term financing.

Allowances for loan losses on loans for margin transactions and loans receivable from other than customers are provided for based primarily on historical loss experience.

Allowances for loan losses on commercial loans reflect management's best estimate of probable losses. The evaluation includes an assessment of the ability of borrowers to pay by considering various factors such as changes in the nature of the loan, volume of the loan, deterioration of pledged collateral, delinquencies and current financial situation of the borrower.

Table of Contents**Office buildings, land, equipment and facilities**

Office buildings, land, equipment and, facilities which consist mainly of installations and software are stated at cost. Significant renewals and additions are capitalized at cost. Maintenance, repairs and minor renewals are charged currently to income.

Depreciation is generally computed by the declining-balance method and at rates based on estimated useful lives of the each asset according to general class, type of construction and use. Amortization is generally computed by the straight-line method over the estimated useful lives. The estimated useful lives are generally as follows:

Office buildings	15 to 50 years
Equipment and installations	3 to 6 years
Software	5 years

Depreciation and amortization for the six months ended September 30, 2002 were included in *Information processing and communication* in the amount of ¥12,095 million, and were included in *Occupancy and related depreciation* in the amount of ¥2,825 million.

Investments in equity securities

Nomura's *Investments in equity securities* include marketable and non-marketable equity securities which have been acquired for Nomura's operating purposes. Nomura makes such operating investments and holds them for the long-term in order to promote existing and potential business relationships. In doing so, Nomura is following customary business practices in Japan, which through cross-shareholdings, provide a way for companies to manage their shareholder relationships. Such investments consist mainly of equity securities of various financial institutions such as Japanese commercial banks, regional banks and insurance companies. In accordance with accounting principles generally accepted in the United States of America for broker-dealers, investments in equity securities are recorded at market or fair value and unrealized gains and losses are recognized currently in income.

Investments in equity securities as of September 30, 2002 are comprised of listed equity securities and unlisted equity securities of ¥131,180 million and ¥39,510 million, respectively.

Long-lived assets

As required by SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If the estimated undiscounted cash flow is less than the carrying amount of the assets, a loss is recognized based on the market or fair value.

These charges were incurred as a result of Nomura's updated analysis to determine if there were any impairment of long-lived assets and certain assets, which identified a significant decrease in the market or fair value of the assets. The revised carrying values of these assets were based on the market or fair value of the assets.

Income taxes

In accordance with SFAS No. 109, *Accounting for Income Taxes*, deferred tax assets and liabilities are recorded for the expected future tax consequences of tax loss carryforwards and temporary differences between the carrying amounts and the tax bases of the assets and liabilities based upon enacted tax laws and rates. Nomura recognizes deferred tax assets to the extent it is believed more likely than not that a benefit will be realized. A valuation allowance is provided, as deemed appropriate, for tax benefits available to Nomura but when it is more likely than not that a tax benefit will not be realized.

Nomura has adopted consolidated return system for the payment of Japanese corporate tax effective from the six months ended September 30, 2002.

Table of Contents

Change in Method of Accounting for Stock Options

Effective April 1, 2002 Nomura changed its method of accounting for stock-based compensation plans. Nomura has adopted the fair-value-based method of accounting for company stock options as outlined in SFAS No. 123, *Accounting for Stock-Based Compensation*. Stock options awarded prior to April 1, 2002 will continue to be accounted for under the intrinsic value method of accounting under Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees*. The effect of this change in accounting was to increase compensation and benefits expense and decrease income before income taxes by ¥87 million for the six months ended September 30, 2002.

Net income per share

The computation of basic net income per share is based on the average number of shares outstanding during the period. Diluted net income per share reflects the potential dilutive effect of convertible bonds, warrants, and stock options.

Cash and cash equivalents

For purposes of reporting cash flows, cash and cash equivalents include cash on hand and demand deposits with banks.

Goodwill and negative goodwill

Nomura has adopted SFAS No. 141, *Business Combinations*, and SFAS No. 142, *Goodwill and Other Intangible Assets* regarding goodwill and negative goodwill. The impairment test shall be performed without amortizing regarding goodwill. Negative goodwill, which is recognized as the excess of acquired net assets at their market or fair value over the acquisition cost, must be written off immediately. In accordance with SFAS No. 141, Nomura has recognized ¥109,799 million in writing off negative goodwill arising from a previous business combination as cumulative accounting change for the six months ended September 30, 2002.

New accounting pronouncements

In June 2001, the FASB issued SFAS No. 143 *Accounting for Asset Retirement Obligations*. This standard is applicable to the financial statements issued for the fiscal years starting after June 16, 2002. This standard requires companies to recognize and report a liability for an asset retirement obligation of a tangible long-lived asset and the associated asset retirement cost. Nomura has to adopt this standard on April 1, 2003.

In May 2002, the FASB issued SFAS No. 145 *Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections*.

In June 2002, the FASB issued SFAS No. 146 *Accounting for Costs Associated with Exit or Disposal Activities*. This standard requires companies to recognize costs associated with the exit or disposal of activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. SFAS No. 146 will replace the existing guidance provided in Emerging Issues Task Force Issue No. 94-3 *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*. SFAS No.146 is to be applied prospectively to exit or disposal activities initiated after December 31, 2002.

In October 2002, the FASB issued SFAS No. 147 *Acquisition of Certain Financial Institutions*. This standard requires the acquisitions of financial institutions to be accounted for under SFAS No. 141 *Business Combinations* and SFAS 142 *Goodwill and Other Intangible Assets* and removes the acquisition of financial institutions from the scope of SFAS No. 72 *Accounting for Certain Acquisitions of Banking or Thrift Institutions* and FASB Interpretation No. 9 *Applying APB Opinion No.16 and 17 When a Savings and Loan Association or a Similar Institution Is Acquired in a Business Combination Accounted for by the Purchase Method*.

Nomura does not believe that the adoption of these four new standards will have a material effect on the Nomura's consolidated financial information.

Table of Contents**3. Securities inventory and securities sold but not yet purchased:**

Securities inventory and *Securities sold but not yet purchased* at September 30, 2002 consist of trading securities at market or fair value classified as follows:

	Millions of yen	
	September 30, 2002	
	Securities inventory	Securities sold but not yet purchased
Stocks	160,409	709,121
Government and government agency bonds	1,738,121	1,539,073
Bank and corporation bonds	1,253,634	240,878
Commercial paper and certificates of deposit	75,956	
Options and warrants	68,872	48,396
Mortgage and mortgage-backed securities	771,295	1,270
Beneficiary certificates and other	726,156	
	<u>4,794,443</u>	<u>2,538,738</u>

4. Derivatives utilized for trading purposes:

The table below discloses breakdown of the fair values at September 30, 2002 of derivative financial instruments for trading purposes held or issued by Nomura. These amounts are not reported net of collateral, which Nomura obtains to reduce credit risk exposure.

	Millions of yen
	September 30, 2002
Assets:	
Foreign exchange forwards	20,771
FRA(1) and other OTC(2) forwards	953
Swap agreements	261,026
Options other than securities options purchased	134,974
Sub-total	<u>417,724</u>
Securities options purchased	64,414
Total	<u>482,138</u>
Liabilities:	
Foreign exchange forwards	18,908
FRA(1) and other OTC(2) forwards	1,392
Swap agreements	235,447
Options other than securities options-written	104,254
Sub-total	<u>360,001</u>
Securities options-written	44,582
Total	<u>404,583</u>

- (1) FRA is Forward Rate Agreements.
- (2) OTC is Over The Counter.

Table of Contents**5. The balance of receivables and payables under securities financing transactions:**

Nomura enters into secured borrowing and lending transactions mainly to meet customers' needs and finance trading inventory positions. The balance of receivables and payables under resale and repurchase agreements and securities borrowed and loaned transactions at September 30, 2002 are as follows:

	Millions of yen
	September 30, 2002
Receivables under:	
Resale agreements	3,368,744
Securities borrowed transactions	3,548,058
Total	6,916,802
Payables under:	
Repurchase agreements	5,985,258
Securities loaned transactions	3,743,700
Total	9,728,958

6. Assets pledged:

In many cases, Nomura is permitted to sell or repledge the securities held as collateral and use the securities to secure repurchase agreements, enter into securities lending transactions or deliver to counterparties to cover short positions. The related balances at September 30, 2002 are as follows:

	Billions of yen
	September 30, 2002
The fair value of securities received as collateral where Nomura is permitted to sell or repledge the securities	11,251
The portion of the above that has been sold (included in Securities sold but not yet purchased on the consolidated balance sheet) or repledged	9,765

Nomura pledges firm-owned securities to collateralize repurchase agreements and other secured financings. Pledged securities that can be sold or repledged by the secured party are classified as *Securities pledged as collateral* on the consolidated balance sheet respectively.

The securities owned by Nomura which have been pledged as collateral, primarily to stock exchanges and clearing organizations, without allowing the secured party the right to sell or repledge them as at September 30, 2002 are summarized in the table below:

	Millions of yen
	September 30, 2002
Trading assets:	
Stocks	430
Government and government agency bonds	370,152
Bank and corporation bonds	452,111
Warrants	8,645
Mortgage and mortgage-backed securities	701,584

	1,532,922
<hr/>	
Investments:	
Non-trading debt securities	111,218
	<hr/>
	111,218
	<hr/>

Table of Contents

In the normal course of business, certain of Nomura's assets are pledged to collateralize borrowing transactions, securities financing transactions, derivative transactions and other purposes. At September 30, 2002 the carrying value of assets pledged other than presented in the table above are as follows:

	<u>Millions of yen</u>
	<u>September 30, 2002</u>
Trading securities	994,779
Non-trading debt securities	1,030
Land and buildings	8,628
	<u>1,004,437</u>

Assets in the above table were mainly pledged to financial institutions for loans payable and derivative transactions.

In addition, Nomura repledged ¥133,774 million of securities borrowed at September 30, 2002 as collateral for bank loans and other loans.

Table of Contents**7. Earnings per share:**

The reconciliation of the amounts and the numbers used in the basic and diluted earnings per share (EPS) computations is as follows:

	(Yen amounts in millions except per share data presented in yen)
	For the six months Ended September 30, 2002
Basic	
Income before cumulative effect of accounting change applicable to common stock	21,271
Cumulative effect of accounting change applicable to common stock	109,799
Net income applicable to common stock	131,070
Weighted average number of shares outstanding (in thousand)	1,965,537
Basic EPS:	
Income before cumulative effect of accounting change	10.82
Cumulative effect of accounting change	55.86
Net income	66.68
Diluted	
Income before cumulative effect of accounting change applicable to common stock	21,271
Cumulative effect of accounting change applicable to common stock	109,799
Net income applicable to common stock	131,070
Weighted average number of shares outstanding used in diluted EPS computations (in thousand)	1,965,537
Diluted EPS:	
Income before cumulative effect of accounting change	10.82
Cumulative effect of accounting change	55.86
Net income	66.68

Upon the conversion of convertible bonds, 6,647 thousand shares of potential common stock were not included in the computation of diluted EPS due to their antidilutive effect for the six months ended September 30, 2002. Warrants to purchase 1,095 thousand shares of common stock and stock options to purchase 2,227 thousand shares of common stock were not included in the computation of diluted EPS because the warrants and stock options exercise prices were greater than the average market price of common shares during the six months ended September 30, 2002.

Table of Contents**8. Commitments and contingencies:**

Nomura enters into, in the normal course of its subsidiaries' banking/financing activities, contractual commitments to extend credit, standby letters of credit, underwriting commitments and issuance of financial guarantees, which generally have a fixed expiration date.

Contractual amounts of these commitments at September 30, 2002 were as follows:

	<u>Millions of yen</u>
	<u>September 30, 2002</u>
Commitments to extend credit and note issuance facility	135,172
Standby letters of credit and financial guarantees	44,618

9. Segment Information:**Operating segment**

Nomura operates securities businesses, which consist of Domestic Retail and Global Wholesale, and Asset Management businesses as its core businesses. Nomura structures its business segments based upon the nature of products and services as well as main customers base and also the management structure. Nomura reports its operating results in three business segments: Domestic Retail, Global wholesale and Asset Management.

The accounting policies for segment information materially follow U.S.GAAP, except as described below:

The impact of unrealized gains/losses on long-term investments in equity securities held for relationship purposes, which under U.S.GAAP is included in net income, is excluded from segment information.

Management views that investments in private-equity-entities are held for ultimate sale and the realization of a capital gain. Investments in private-equity-entities are treated as only private equity positions for management reporting purposes. They are not viewed as operating subsidiaries. Any changes in management's estimate of fair value of these investments are shown in the non-interest revenue line under Global Wholesale.

Revenues and expenses directly associated with each business segment are included in determining their operating results. Revenues and expenses that are not directly attributable to a particular segment are allocated to each business segment or included in Other based upon Nomura's allocation methodologies as used by the management to assess each segment's performance.

Table of Contents

Business segments results for the six months ended September 30, 2002 are shown in the following table. Business segments information on total assets is not disclosed, because management does not utilize information on total assets for its operating decisions and therefore, it is not reported to management.

	Millions of yen				Total
	Domestic Retail	Global Wholesale	Asset Management	Other (Inc. elimination)	
Six months ended September 30, 2002					
Non-interest revenue	¥ 122,573	¥ 97,645	¥ 20,138	¥ 2,956	¥ 243,312
Net interest revenue	1,204	47,510	(32)	11,393	60,075
Net revenue	123,777	145,155	20,106	14,349	303,387
Non-interest expenses	108,429	99,707	17,677	15,936	241,749
Income (loss) before income taxes	¥ 15,348	¥ 45,448	¥ 2,429	(¥1,587)	¥ 61,638

Transactions between operating segments are recorded within segment results on commercial terms and conditions and are eliminated in the Other column.

The following table presents the major components of income/ (loss) before income taxes in Other .

	Millions of yen
	For the six months ended September 30, 2002
Loss on not designated hedging instruments	(¥1,753)
Gain on investment securities	10,892
Equity in earnings of affiliates	353
Corporate items	(678)
Others	(10,401)
Total	(¥1,587)

Table of Contents

The table below presents a reconciliation of the combined segment information included in the table above to reported net revenue and income before income taxes in the consolidated income statement information.

	Millions of yen	
	For the six months ended September 30, 2002	
Net revenue	¥	303,387
Unrealized loss on investments in equity securities held for relationship purpose		(21,675)
Effect of consolidation of the private equity investee companies		1,703
Consolidated net revenue	¥	283,415
Income before income taxes	¥	61,638
Unrealized loss on investments in equity securities held for relationship purpose		(21,675)
Effect of consolidation of the private equity investee companies		674
Consolidated income before income taxes	¥	40,637

Table of Contents**Geographic Information**

In general, Nomura's identifiable assets, revenues and expenses are allocated based on the country of domicile of the legal entity providing the service. However, because of the integration of the global capital markets and the corresponding globalization of Nomura's activities and services it is not always possible to make a precise separation by location. As a result, various assumptions, which are consistent among years, have been made in presenting the following geographic data.

The table below presents a geographic allocation of net revenue and income (loss) before income taxes from operations by geographic areas, and long-lived assets associated with Nomura's operations. Net revenue in Americas and Europe substantially represents Nomura's operations in the United States and the United Kingdom, respectively.

	Millions of yen
	For the six months ended September 30, 2002
Net revenue:	
Americas	25,338
Europe	14,229
Asia and Oceania	5,824
Sub-total	45,391
Japan	238,024
Consolidated	283,415

	Millions of yen
	For the six months ended September 30, 2002
Income (loss) before income taxes:	
Americas	4,362
Europe	(20,582)
Asia and Oceania	(3,384)
Sub-total	(19,604)
Japan	60,241
Consolidated	40,637

	Millions of yen
	September 30, 2002
Long-lived assets:
