You will be voting on the following:

- * To elect eight directors;

How do I vote before the meeting?

You have two voting options:

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form PRE 14A

- * By facsimile through the number shown on your proxy card; or
- * By mail by completing, signing and returning the enclosed proxy card.

If you hold your shares in the name of a bank or broker, whether you can vote by facsimile depends on their voting processes. Please follow the directions on your proxy card carefully.

Can I vote at the meeting?

You may vote your shares at the meeting if you attend in person. Even if you plan to attend the meeting, we encourage you to vote your shares by proxy. You may vote by proxy by facsimile or by mail.

Can I change my mind after I vote?

You may change your vote at any time before the polls close at the meeting. You may do this by (1) signing another proxy with a later date and returning it to us by mail or facsimile prior to the meeting, (2) voting again at the meeting.

What if I return my proxy card but do not provide voting instructions?

Proxies that are signed and returned but do not contain instructions will be voted (1) FOR the election of the nominee directors named on page 3 of this proxy statement; (2) FOR the authorization of our Board of Directors in its discretion, to amend our Certificate of Incorporation to effect a reverse stock split in a ratio of between 1-for-10 and 1-for-20, without further approval of our stockholders; and (3) FOR the ratification of Tanner + Co. as the Company's independent auditors.

What does it mean if I receive more than one proxy card?

It means that you have multiple accounts with brokers and/or our transfer agent. Please vote all of these shares. We recommend that you contact your broker and/or our transfer agent to consolidate as many accounts as possible under the same name and address. Our transfer agent is Registrar and Transfer Company, which may be reached at 1-800-866-1340.

Will my shares be voted if I do not provide my proxy?

Your shares may be voted under certain circumstances if they are held in the name of a brokerage firm. Brokerage firms have the authority under the National Association of

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form PRE 14A

Securities Dealers rules to vote customers' un-voted shares, which are referred to as "broker non-votes," on certain "routine" matters, including the election of directors. Shares represented by broker non-votes are counted for purposes of establishing a quorum. At our meeting, shares represented by broker non-votes will be counted as voted by the brokerage firm in the election of directors and the ratification of the auditors, but will not be counted for all other matters to be voted on because these other matters are not considered "routine" under the applicable rules. If you hold your shares directly in your own name, they will not be voted if you do not provide a proxy.

How can I attend the meeting?

The annual meeting is open to all holders of Commodore Applied Technologies common stock. To attend the meeting, you will need to bring evidence of your stock ownership. If your shares are registered in your name, your admission card is attached to your proxy card, and you will need to bring it with you to the meeting. If your shares are in the name of your broker or bank or you received your proxy materials electronically, you will need to bring evidence of your stock ownership, such as your most recent brokerage statement, and valid picture identification. For directions to the annual meeting, please call our Investor Relations department at 212-308-5800. If you do not have either an admission card or proof that you own Commodore Applied Technologies stock, you may not be admitted into the meeting.

May stockholders ask questions at the meeting?

Yes. Representatives of the Company will answer stockholders' questions of general interest at the end of the meeting. In order to give a greater number of stockholders an opportunity to ask questions, individuals or groups will be allowed to ask only one question and no repetitive or follow-up questions will be permitted.

How many votes must be present to hold the meeting?

Your shares are counted as present at the meeting if you attend the meeting and vote in person or if you properly return a proxy by mail, or facsimile. In order for us to conduct our meeting, a majority of our outstanding shares of common stock as of November 10, 2004, must be present in person or by proxy at the meeting. This is referred to as a quorum.

ABOUT THE MEETING

How many votes are needed to elect directors?

The eight nominees receiving the highest number of "Yes" votes will be elected as directors. This number is called a plurality. Shares not voted, whether by marking "Abstain" on

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form PRE 14A

your proxy card, by broker non-vote (which is described above), or otherwise, will have no impact on the election of directors, except that they may be counted for purposes of establishing a quorum. Unless a properly executed proxy card is marked "Withhold Authority," the proxy given will be voted "For" the eight nominees for director.

How many votes are needed to authorize our Board of Directors in its discretion, to amend our Certificate of Incorporation to effect a reverse stock split in a ratio of between 1-for-10 and 1-for-20, without further approval of our stockholders?

The amendment of the Certificate of Incorporation to authorize our Board of Directors in its discretion, to amend our Certificate of Incorporation to effect a reverse stock split in a ratio of between 1-for-10 and 1-for-20, without further approval of our stockholders must receive the "Yes" vote of a majority of our outstanding shares of common stock as of November 10, 2004. Shares not voted, whether by marking "Abstain" on your proxy card, by broker non-vote (which is described above), or otherwise, will have no impact on the ratification of the Company's independent auditor. Unless a properly executed proxy card is marked "Withhold Authority," the proxy given will be voted "For" ratification of the Company's independent auditor.

Can my shares be voted on matters other than those described in this proxy statement?

Yes. The Company has not received proper notice of, and is not aware of, any business to be transacted at the meeting other than as indicated in this proxy statement. PROPOSED AMMENDMENT RELATING TO A REVERSE SPLIT
OF OUR OUTSTANDING COMMON STOCK (Proposal Number 2)

What am I voting on?

Our Board of Directors is seeking approval of an amendment to our certificate of incorporation, as amended, which we refer to as our certificate of incorporation, to effect a proposed reverse split of our issued and outstanding common stock in a ratio between 1-for-10 and 1-for-20 at any time before the 2005 Annual Meeting of Stockholders. Our Board of Directors believes that, because it is not possible to predict market conditions at the time the reverse stock split is to be effected, it would be in the best interests of the stockholders if the Board were able to determine, within specified limits approved in advance by our stockholders, the appropriate reverse stock split ratio. The proposed reverse stock split would combine a whole number of outstanding shares of our common stock into one share of common stock, thus reducing the number of outstanding shares without any corresponding change in our par value or market capitalization. As a result, the number of shares of our common stock owned by each stockholder would be reduced in the same proportion as the reduction in the total number of shares outstanding, so that the percentage of the outstanding shares owned by each stockholder would remain unchanged (subject to any adjustments for fractional shares).

If this proposal is approved by our stockholders, our Board of Directors will subsequently have the authority, in its sole discretion, to determine whether or not to proceed with a reverse stock split. If the Board of Directors determines, based on factors such as prevailing market and other relevant conditions and circumstances and the trading prices of our common stock at that time, that a reverse stock split is in our best interests and in the best interests of our stockholders, it may, at such time as it deems appropriate, determine the exact ratio of the reverse stock split and effect the reverse split approved by our stockholders without further approval or authorization of our stockholders. The text of the proposed amendment to our certificate of incorporation is provided in Appendix A. The text of the proposed amendment is subject to modification to include such changes as may be required by the office of the secretary of state of Delaware or as our Board of Directors deems necessary and advisable to effect the reverse stock split.

Our Board of Directors reserves the right, even after stockholder approval, to forego or postpone the filing of the amendment to our certificate of incorporation if it determines such action is not in our best interests or the best interests of our stockholders. If the reverse stock split adopted by the stockholders is not subsequently implemented by our Board of Directors and effected by the 2005 Annual Meeting of Stockholders, this proposal will be deemed abandoned, without any further effect. In such case, our Board of Directors will again seek stockholder approval at a future date for a reverse stock split if it deems a reverse stock split to be advisable at that time. If the amendment to our certificate of incorporation is adopted and filed with the Delaware secretary

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form PRE 14A

of state, there will be no change in the number of authorized shares of our common stock.

What are the Reasons for the Board's Recommendation

Our Board of Directors has determined that it would be advisable to effect a reverse stock split that would reduce the number of shares of our outstanding common stock. The primary reason for the reverse split stock is to increase the trading price of our common stock on the Over the Counter Bulletin Board on a per share basis, which we believe will have several benefits to our company and our stockholders.

Our Board of Directors believes that the current low per share market price of our common stock, which it believes is due in part to the overall weakness in the stock market, has had a negative effect on the marketability of our existing shares. Our Board of Directors believes that there are several reasons for these effects. For example, many institutional investors have internal policies preventing the purchase of low-priced stocks. Additionally, analysts at many brokerage firms are reluctant to recommend lower-priced stocks to their clients or monitor the activity of lower-priced stocks. Similarly, a variety of policies and practices of broker-dealers discourage individual brokers within those firms from dealing in low-priced stocks. Accordingly, some brokers

are reluctant to or will not recommend that their clients purchase low-priced stocks. Also, because the brokers' commissions on low-priced stocks generally represent a higher percentage of the stock price than commissions on higher priced stocks, the current low share price of the our common stock can result in investors paying transaction costs (commissions, markups or markdowns) that are a higher percentage of their total share value than would be the case if the share price of our common stock were substantially higher. We believe that these factors limit the purchase of our common stock by institutional and individual investors.

Our Board of Directors believes that by increasing the per share market price of our common stock as a result of the reverse stock split, we may encourage greater interest in our common stock and enhance the acceptability and marketability of our common stock to the financial community and investing public as well as promote greater liquidity for our stockholders. In addition, we have 128,631,767 outstanding shares of common stock and 1,647 outstanding shares of preferred stock, which are convertible into an aggregate of 187,723,539 shares of common stock, which is more than other engineering and environmental waste treatment companies that are comparable in size to us. A reverse stock split would reduce the number of shares outstanding to a number that is more comparable with those of similar engineering and environmental waste treatment companies and more appropriate to the size and scope of our current business.

What are the Potential Disadvantages to the Reverse Stock Split?

Reduced Market Capitalization. While we expect that the reduction in our outstanding shares of common stock will increase the market price of our common stock, we cannot assure you that the reverse stock split will increase the market price of our common stock by a multiple equal to the number of pre-split shares in the reverse split ratio between 1-for-10 and 1-for-20 authorized by our Board of Directors, or result in any permanent increase in the market price, which can be dependent upon many factors, including our business and financial performance and prospects. Should the market price decline after the reverse stock split, the percentage decline may be greater, due to the smaller number of shares outstanding, than it would have been prior to the reverse stock split. In some cases the stock price of companies that have effected reverse stock splits has subsequently declined back to pre-reverse split levels. Accordingly, we cannot assure you that the market price of our common stock immediately after the effective date of the proposed reverse stock split will be maintained for any period of time or that the ratio of post- and pre-split shares will remain the same after the reverse stock split is effected, or that the reverse stock split will not have an adverse effect on our stock price due to the reduced number of shares outstanding after the reverse stock split. A reverse stock split is often viewed negatively by the market and, consequently, can lead to a decrease in our overall market capitalization. If the per share price does not increase proportionately as a result of the reverse stock split, then our overall market capitalization will be reduced.

Increased Transaction Costs. The number of shares held by each individual stockholder will be reduced if the reverse stock split is implemented. This will increase the number of stockholders who hold less than a "round lot," or 100 shares. Typically, the transaction costs to stockholders selling "odd lots" are higher on a per share basis. Consequently, the reverse stock split could increase the transaction costs to existing stockholders in the event they wish to sell all or a portion of their position.

Liquidity. Although our Board of Directors believes that the decrease in the number of shares of our common stock outstanding as a consequence of the reverse stock split and the anticipated increase in the price of our common stock could encourage interest in our common stock and possibly promote greater liquidity for our stockholders, such liquidity could also be adversely affected by the reduced number of shares outstanding after the reverse stock split.

Authorized Shares; Future Financings. Upon effectiveness of the reverse stock split, the number of authorized shares of common stock that are not issued or outstanding, as of November 11, 2004, would increase from approximately 167,653,947 shares to as many as approximately 286,765,395 shares assuming a 1-for-10 reverse stock split. As a result, we will have an increased number of authorized but unissued shares of common stock. Authorized but unissued shares will be available for issuance, and we may issue such shares in financings or otherwise. If we issue additional shares, the ownership interests of our current stockholders may be diluted.

What is the Effect on Fractional Shares?

If any reverse split ratio is authorized by our Board of Directors, implementation of a reverse stock split would result in some stockholders owning a fractional share of common stock. For example, if a 1-for-10 reverse stock split were to be implemented, the shares owned by a stockholder with 99 shares would be converted into 9.9 shares. To avoid such a result, stockholders that would otherwise be entitled to receive a fractional share of our common stock as a consequence of the reverse stock split will receive, instead, at the discretion of our Board of Directors, either (i) a cash payment from us in U.S. dollars equal to the value of that fractional share, determined on the basis of the average closing sales price of our common stock on the Over the Counter Bulletin Board for the 20 trading days immediately preceding the effective date of the reverse stock split (as adjusted for that reverse stock split) or (ii) a cash payment from the transfer agent in an amount equal to such stockholder's pro rata share of the total proceeds from the sale, by the transfer agent on behalf of those holders who would otherwise be entitled to receive a fractional share, of an aggregate of all fractional shares in the open market at the then prevailing prices. No transaction costs will be assessed in connection with the sale of the aggregated shares. You will not be entitled to receive interest for the period between the effective time of the reverse stock split and the date you receive your payment for cashed-out shares.

If any stockholder owns, in total, fewer than the number of our shares to be converted into one share as a result of the reverse stock split, that stockholder's shares would be converted into a fractional share of stock and that stockholder would receive only cash in place of the fractional share. For example, if a 1-for-10 reverse stock split is implemented then stockholders with fewer than four shares would receive only cash. As a result, the interest of such stockholders in our company would be terminated and such stockholders would have no right to share in our assets or future growth. Based on this example, each stockholder that owns ten shares or more of our common stock prior to the reverse stock split will continue to own one or more shares after the reverse stock split and would continue to share in our assets and future growth as a stockholder, and any stockholder that owns fewer than ten shares would receive only cash in place of the fractional share resulting from the reverse stock split. Assuming the reverse split under the proposed amendment to our certificate of incorporation is a 1-for-10 reverse stock split, a stockholder could assure his or her continued ownership of shares of our stock after the reverse split by purchasing a number of shares sufficient to increase the total number of shares that he or she owns to ten or more.

What is the Effect of Reverse Stock Split on Options?

The number of shares subject to outstanding options to purchase shares of our common stock also would automatically be reduced in the same ratio as the reduction in the outstanding shares. Correspondingly, the per share exercise price of those options will be increased in direct proportion to the reverse stock split ratio, so that the aggregate dollar amount payable for the purchase of the shares subject to the options will remain unchanged. Assuming that an optionee holds options to purchase 1,000 shares at an exercise price of \$0.07 per share, on the effectiveness of a 1-for-10 reverse stock split, the number of shares subject to that option would be reduced to 100 shares and the exercise price would be proportionately increased to \$0.70 per share.

Why is the Effect of Reverse Stock Split on Warrants?

The agreements governing the outstanding warrants to purchase shares of our common stock include provisions requiring adjustments to both the number of shares issuable upon exercise of such warrants, and the exercise prices of such warrants, in the event of a reverse stock split. Assuming that a warrant holder holds a warrant to purchase 10,000 shares of our common stock at an exercise price of \$0.07 per share, on the effectiveness of a 1-for-10 reverse stock split, the number of shares subject to that warrant would be reduced to 1,000 shares and the exercise price would be proportionately increased to \$0.70 per share.

What is the Effect of Reverse Stock Split on Series E Convertible Preferred Stock?

On November 4, 1999, the Company completed a \$2.5 million private placement financing with The Shaar Fund Ltd. The Company issued to The Shaar Fund 335,000 shares of a newly authorized Series E Convertible Preferred Stock (the "Series E Convertible"), par value \$0.001 per share, each such share of Series E Convertible having a stated value of \$10.00 per share.

The holder of our Series E Convertible may convert into the Company's common stock, at any time after April 30, 2000, for a conversion price equal to the arithmetic mean of the closing prices of the Company's common stock as reported on the Over the Counter Bulletin Board for the ten trading days immediately preceding the date of conversion. The Shaar Fund currently holds 95,500 shares of Series E Convertible. The conversion of the Series E Convertible is unaffected by the Reverse Stock Split.

What is the Effect of Reverse Stock Split on Series F Convertible Preferred Stock?

On March 20, 2000, the Company completed a \$2.0 million private placement financing with The Shaar Fund Ltd. The

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form PRE 14A

Company issued to The Shaar Fund 226,000 shares of Series F Convertible Preferred Stock (the "Series F Convertible"), par value \$0.001 per share, each such share of Series F Convertible having a stated value of \$10.00 per share.

The holder of our Series F Convertible may convert into the Company's common stock, at any time after September 31, 2000, for a conversion price equal to the arithmetic mean of the closing prices of the Company's common stock as reported on the Over the Counter Bulletin Board for the ten trading days immediately preceding the date of conversion. The Shaar Fund currently holds 118,200 shares of Series F Convertible. The conversion of the Series F Convertible is unaffected by the Reverse Stock Split.

What is the Effect of Reverse Stock Split on Series H Convertible Preferred Stock?

The Company issued 800,000 shares of Series H Preferred stock (the "Series H Preferred"), par value \$0.001 per share, each such share of Series H Preferred having a stated value of \$1.00 per share, to DRM, Russell and Speciale as part of the DRM Settlement Agreement as of September 30, 2002 for satisfaction of the remaining liabilities relating to the purchase and working capital of DRM.

The certificate of designations governing the rights of our outstanding shares of Series H Preferred provides for adjustments to the conversion amount of the outstanding Series H Preferred stock in the event of a reverse stock split. Assuming that a 1-for-10 reverse stock split is implemented and a stockholder holds one share of our Series H Preferred, with an accreted value of \$1.00 per share and a minimum conversion price of \$0.40 per share, before the effectiveness of the reverse stock split, this share of Series H Preferred would be convertible into 2.5 shares of common stock. On the effectiveness of the reverse stock split, the conversion price of the Series H Preferred would be proportionately increased to \$4.00 per share. As a result, these 800,000 shares of Series H Preferred would be convertible into 200,000 shares of common stock.

Implementation and Effect of the Reverse Stock Split

If approved by our stockholders at the Special Meeting, and if our Board of Directors determines that effecting a reverse stock split is in our best interests and the best interests of our stockholders, the Board will, in its sole discretion, select the reverse stock split in a ratio between 1-for-10 and 1-for-20, based on market and other relevant conditions and circumstances and the trading prices of our common stock at that time, and determine the method of dealing with fractional shares. Following such determinations, our Board of Directors will effect the reverse stock split by directing management to file the amendment to our certificate of incorporation with the secretary of state of Delaware at such time as the Board has determined is appropriate to effect the reverse stock split. The reverse stock split will become effective at the time specified in the amendment to our certificate of incorporation after its filing with the secretary of state of

Delaware, which we refer to as the effective time.

We estimate that, following the reverse stock split, we would have approximately the same number of stockholders and, except for the effect of cash payments for fractional shares as described above, the completion of the reverse stock split would not affect any stockholder's proportionate equity interest in our company. By way of example, a stockholder who owns a number of shares that prior to the reverse stock split represented one-half of a percent of the outstanding shares of the company would continue to own one-half of a percent of our outstanding shares after the reverse stock split. The reverse stock split also will not affect the number of shares of common stock that our Board of Directors is authorized to issue under our certificate of incorporation, which will remain unchanged at 300,000,000 shares. However, it will have the effect of increasing the number of shares available for future issuance because of the reduction in the number of shares that will be outstanding after giving effect to the reverse stock split. Also, because the reverse stock split would result in fewer shares of our common stock outstanding, the per share income/(loss), per share book value and other "per share" calculations would be increased.

Even if the reverse stock split is approved by the Stockholders, our Board of Directors has discretion to decline to carry out the reverse split if it determines for any reason that the reverse split will not be in our best interests. If the reverse split is not implemented on or before the 2005 Annual Meeting of Stockholders, the Board will either resolicit stockholder approval or abandon the reverse stock split.

Exchange of Stock Certificates and Payment for Fractional Shares

Exchange of Stock Certificates. Promptly after the effective time, you will be notified that the reverse stock split has been effected. Our stock transfer agent, Registrar and Transfer Company, whom we refer to as the exchange agent, will implement the exchange of stock certificates representing outstanding shares of common stock. You will be asked to surrender to the exchange agent certificates representing your pre-split shares in exchange for certificates representing your post-split shares in accordance with the procedures to be set forth in a letter of transmittal which we will send to you. You will not receive a new stock certificate representing your post-split shares until you surrender your outstanding certificate(s) representing your pre-split shares, together with the properly completed and executed letter of transmittal to the exchange agent. We will not issue scrip or fractional shares, or certificates for fractional shares, in connection with the reverse stock split. For example, if a ratio of 1-for-10 is authorized by our Board of Directors, should you be entitled to receive fractional shares because you hold a number of shares not evenly divisible by the number four, you will be entitled, upon surrender to the exchange agent of certificates representing such shares, to a cash payment,

without interest, in lieu of such fractional shares. The ownership of a fractional share will not give you any voting, dividend or other rights, except the right to receive payment for the fractional share as described above. PLEASE DO NOT DESTROY ANY STOCK CERTIFICATE OR SUBMIT ANY OF YOUR CERTIFICATES UNTIL YOU ARE REQUESTED TO DO SO.

Effect of Failure to Exchange Stock Certificates. Upon the filing of the amendment to our certificate of incorporation with the Delaware secretary of state, each certificate representing shares of our common stock outstanding prior to the that time will, until surrendered and exchanged as described above, be deemed, for all corporate purposes, to evidence ownership of the whole number of shares of our common stock, and the right to receive, from us or the transfer agent, the amount of cash for any fractional shares, into which the shares of our common stock evidenced by such certificate have been converted by the reverse stock split. However, a holder of such unexchanged certificates will not be entitled to receive any dividends or other distributions payable by us after the effective date, until the old certificates have been surrendered. Such dividends and distributions, if any, will be accumulated, and at the time of surrender of the old certificates, all such unpaid dividends or distributions will be paid without interest.

Are There Appraisal Rights?

Under the Delaware General Corporation Law and our certificate of incorporation and amended bylaws, you are not entitled to appraisal rights with respect to the reverse stock split.

What are the Federal Income Tax Consequences?

The following description of the material federal income tax consequences of the reverse stock split is based on the Internal Revenue Code, applicable Treasury Regulations promulgated under the Code, judicial authority and current administrative rulings and practices as in effect on the date of this proxy statement. Changes to the laws could alter the tax consequences described below, possibly with retroactive effect. We have not sought and will not seek an opinion of counsel or a ruling from the Internal Revenue Service regarding the federal income tax consequences of the proposed reverse stock split. This discussion is for general information only and does not discuss the tax consequences that may apply to special classes of taxpayers (e.g., non-resident aliens, broker/dealers or insurance companies). The state and local tax consequences of the reverse stock split may vary significantly as to each stockholder, depending upon the jurisdiction in which such stockholder resides. We urge stockholders to consult their own tax advisors to determine the particular consequences to them.

In general, the federal income tax consequences of the reverse stock split will vary among stockholders depending upon whether

they receive cash for fractional shares or solely a reduced number of shares of our common stock in exchange for their old shares of our common stock. We believe that because the reverse stock split is not part of a plan to increase periodically a stockholder's proportionate interest in our assets or earnings and profits, the reverse stock split will likely have the following federal income tax effects.

A stockholder who receives solely a reduced number of shares of our common stock will not recognize gain or loss. In the aggregate, such a stockholder's basis in the reduced number of shares of our common stock will equal the stockholder's basis in its old shares of common stock and the holding period of the common stock received after the reverse stock split will include the holding period of the common stock held prior to the reverse stock split exchanged therefore. A stockholder who receives cash in lieu of a fractional share as a result of the reverse stock split will generally be treated as having received the payment as a distribution in redemption of the fractional share, as provided in section 302(a) of the Code, which distribution will be taxed as either a distribution under Section 301 of the Code or an exchange to such stockholder, depending on that stockholder's particular facts and circumstances. Generally, if such distribution is treated as an exchange to a stockholder receiving such a payment, the stockholder should recognize gain or loss equal to the difference, if any, between the amount of cash received and the stockholder's basis in the fractional share. If the fractional share was held by the stockholder as a capital asset then the gain or loss will be taxed as capital gain or loss, and will be long-term capital gain or loss if the stockholder's holding period in the fractional share is greater than one year. In the aggregate, such a stockholder's basis in the reduced number of shares of our common stock will equal the stockholder's basis in its old shares of common stock decreased by the basis allocated to the fractional share for which such stockholder is entitled to receive cash and the holding period of the common stock received after the reverse stock split will include the holding period of the common stock held prior to the reverse stock split exchanged therefore.

We will not recognize any gain or loss as a result of the reverse stock split.

THE BOARD OF DIRECTORS RECOMMENDS A VOTE "FOR" THE PROPOSAL TO AUTHORIZE OUR BOARD OF DIRECTORS TO AMEND OUR CERTIFICATE OF INCORPORATION TO EFFECT A REVERSE SPLIT OF OUR OUTSTANDING COMMON STOCK IN A RATIO BETWEEN 1-FOR-10 AND 1-FOR-20 WITHOUT FURTHER APPROVAL OF OUR STOCKHOLDERS, UPON A DETERMINATION BY OUR BOARD THAT SUCH A REVERSE STOCK SPLIT IS IN OUR BEST INTERESTS AND IN THE BEST INTERESTS OF OUR STOCKHOLDERS.

COMPENSATION COMMITTEE REPORT

Filings made by companies with the Securities and Exchange Commission sometimes "incorporate information by reference." This means the Company is referring you to information that has been previously filed with the SEC and that this information should be considered as part of the filing you are reading. The Compensation Committee Report and Stock Performance Graph in this proxy statement are not incorporated by reference into any other filings with the SEC.

What are the components of executive compensation?

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form PRE 14A

Our compensation program for executives consists of three key elements:

- * Annual base salary
- * Performance based annual bonus
- * Long-term stock incentive compensation

What is the overview and philosophy of executives compensation?

The Company's executive compensation program is designed to be linked to corporate performance and returns to stockholders. Of particular importance to the Company is its ability to grow and enhance its competitiveness for the rest of the decade and beyond. Shorter-term performance, although scrutinized by the CSOB Committee, stands behind the issue of furthering the Company's strategic goals. To this end, the Company has developed an overall compensation strategy and specific compensation plans that tie a significant portion of executive compensation to the Company's success in meeting specified performance goals.

The objectives of the Company's executive compensation program are to:

- * attract, motivate and retain the highest quality executives;
- * motivate them to achieve tactical and strategic objectives in a manner consistent with the Company's corporate values; and
- * link executive and stockholder interests through equity-based plans and provide a compensation package that recognizes individual contributions as well as overall business results.

To achieve these objectives, the Company's executive compensation program is designed to:

- * focus participants on high priority goals to increase stockholder value;
- * encourage behavior that exemplifies to Company's values relating to customers, quality of performance, employees, integrity, teamwork and good citizenship;
- * assess performance based on results and pre-set goals that link the business activities of each individual to the goals of the Company; and
- * increase stock ownership to promote a proprietary interest in the success of the Company.

How are the Chairman of the Board and Chief Executive Officer compensated?

Shelby T. Brewer, the Chairman of the Board and Chief Executive Officer of the Company, received a base salary for 2003 from January through April of \$250,000 per annum, and from May through December was \$285,000 per annum of which \$271,000 was originally deferred until December 31, 2003, and remains unpaid as of November 11, 2004. The members of the CSOB Committee established the amount actually received by Mr. Brewer last year as base salary for services rendered to the Company and its affiliates. In determining Mr. Brewer's salary, the CSOB

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form PRE 14A

Committee considered, without any particular weighting, the salaries paid to chief executive officers of comparable companies, the company's performance in terms of stock price and key financial indices compared to its peers, the performance of Mr. Brewer, and Mr. Brewer's extensive industry knowledge.

Mr. Brewer received no cash bonus for fiscal 2003 under the Officers Bonus Pool Plan. This plan pays total bonuses of up to 25% of a participant's salary. The CSOB Committee determined that no bonus was to be paid in fiscal 2003.

How are other executive officers compensated?

In setting all other executive officers annual salaries, the CSOB Committee reviews an annual salary plan recommended by the Chairman and CEO. The annual salary plan is based on numerous subjective factors that include performance, merit increases and responsibility levels.

All executive officers are eligible to participate in the officer's bonus plans. Under these plans, officers are eligible to receive a bonus up to an established percent of their annual base salary, depending on the Company's performance relative to criteria established by the Compensation Committee. During fiscal 2003, based upon these objective performance assessments, no officer was awarded a bonus as reflected in the Summary Compensation Table contained elsewhere in this proxy statement.

COMPENSATION, STOCK OPTION AND BENEFITS COMMITTEE

The Report of the Compensation Committee on Executive Compensation shall not be deemed incorporated by reference by any general statement incorporating by reference this Annual Report into any filing under the Securities Act, or under the Exchange Act, except to the extent that the Company specifically incorporates this information by reference, and shall not otherwise be deemed filed under such acts.

Does the Compensation Committee compare Company salaries to other companies?

Salaries are based on the Compensation Committee assessment of each officer's past performance and the expectation for future contributions in leading the Company. In addition, the Compensation Committee reviews compensation data for the industry and other companies similar in size. This review is not done scientifically. The Compensation Committee uses other company compensation data for information purposes only, but also considers subjective factors relating to the differences between companies.

How are limitations on the deductibility of compensation handled?

Section 162(m) of the Internal Revenue Code limits the deductibility of executive compensation paid by publicly held corporations to \$1 million per employee. The \$1 million limitation generally does not apply to compensation based on performance goals if certain requirements are met. The Company believes its Senior Officers' Bonus Pool Plan and Executive Officers' Bonus Plan each satisfy Section 162(m). As a result, the Company believes that the compensation paid under these plans is not subject to limits on deductibility. However, there can be no assurance that the Internal Revenue Service would reach the same conclusion.

AUDIT COMMITTEE REPORT

Filings made by companies with the Securities and Exchange Commission sometimes "incorporate information by reference." This means the Company is referring you to information that has been previously filed with the SEC and that this information should be considered as part of the filing you are reading. The Audit Committee Report in this proxy statement is not incorporated by reference into any other filings with the SEC.

What are the responsibilities of the Audit Committee?

The Audit Committee oversees the Company's financial reporting process on behalf of the Board of Directors and is governed by its Charter as set forth in Exhibit A, hereto, which was adopted in October of 2004. Management has the primary responsibility for the financial statements and the reporting process including the systems of internal controls. In fulfilling its oversight responsibilities, the committee reviewed the audited financial statements in the Annual Report with management, including a discussion of the quality, not just the acceptability, of the accounting principles, the reasonableness of significant judgments, and the clarity of disclosures in the financial statements. The Audit Committee received the written disclosures and the letter from the independent accountants required by Independence Standards Board Standard No. 1 and discussed with the independent accountants the independence of the independent accountants. The Audit Committee also discussed with the independent auditors the matters required to be

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form PRE 14A

discussed by Statement on Auditing Standards No. 61.

What are the areas of focus of the Audit Committee?

The Audit Committee reviews with the independent auditors, who are responsible for expressing an opinion on the conformity of those audited financial statements with generally accepted accounting principles:

- * the overall scope and plans for their respective audits,
- * their judgments as to the quality, not just the acceptability, of the Company's accounting principles,
- * their independence from management and the Company including matters in the written disclosures and the letter from the independent accountants required by the Independence Standards Board No. 1,
- * and such other matters as are required to be discussed with the committee under generally accepted auditing standards.

The Audit Committee also pre-approves all audit and non-audit services performed by the independent auditors. (see Audit Committee Charter - Appendix B, for expanded list of responsibilities)

Who are the independent members of the Audit Committee?

Messrs. Kalleres, Coffman, and Wilson are independent audit committee members in accordance with the listing standards of the American Stock Exchange. Mr. DeAngelis is an Executive Officer of the Company, and as such, is not independent. Having Mr. DeAngelis on the committee is in the best interest of the Company because he can provide day-to-day supervision to the internal audit staff, he is readily available to address issues with management, and provides independent members insight into audit and financial matters.

What financial statements does the Audit Committee review?

The audit committee, as part of its Charter, reviews quarterly with management the Company's financial statements prior to filing with the Securities and Exchange Commission and discusses with the independent auditors matters required to be discussed by Statement on Auditing Standards No. 61. In addition, the committee in reliance on the reviews and discussions referred to above, has recommended to the Board of Directors that the audited financial statements be included in the Company's Annual Report on Form 10-K for the year ended December 31, 2003.

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form PRE 14A

The Board of Directors has determined that VADM Kalleres and Mr. DeAngelis by virtue of their background, education, and experience are audit committee financial experts within the meaning of SEC rules. VADM Kalleres is independent of management under the AMEX listing standards.
