ITEM 1

Daxor Corporation

August 12, 2013

Dear Fellow Shareholder:

Daxor Corporation is an investment company with medical instrumentation and biotechnology operations. The Company began reporting as an investment company as of January 1, 2012.

We have attached a report of our portfolio holdings and investment activity for the six months ended June 30, 2013. Please review this information carefully.

The Company's investment policy is to maintain a minimum of 80% of its portfolio in electric utilities. The Board of Directors has authorized this minimum to be temporarily lowered to 70% when management deems it to be necessary or advisable. Investments in non-utility stocks will generally not exceed 20% of the value of the portfolio. At June 30, 2013, investments in electric utilities made up 89.1% of the value of the Company's portfolio. Dividends from the Company's investments in electric utilities made up 90.2% of the Company's total dividends received for the six months ended June 30, 2013. The Company is receiving dividend income on 56 of the 70 common and preferred stocks in its investment portfolio at June 30, 2013.

At June 30, 2013, net fair value over cost of the Company's securities portfolio totaled \$26,304,951. This was comprised of net fair value over cost of \$26,822,068 and net cost over fair value of \$(517,117).

The portfolio turnover rate for the six months ended June 30, 2013 was 8.25% which indicates an average holding period in excess of ten years for our investment portfolio. The investment approach of management is to buy stocks which it is prepared to hold for the long term. There are stocks in our portfolio which we have held in excess of 20 years.

The Company maintains a diversified securities portfolio which consists primarily of the common and preferred stocks of electric utility companies. The Company sells covered calls on portions of its portfolio and also sells puts on

stocks it is willing to own. It also sells uncovered calls and may have net short positions in common stock up to 15% of the value of the portfolio. The net short position is the total fair market value of the Company's short positions reduced by the amount due to the Company from the Broker. If the amount due from the Broker is more than the fair market value of the short positions, the Company will have a net receivable from the Broker. At June 30, 2013 the net receivable from the Broker was 0.40% of the value of the Company's portfolio.

The Company engages in the short selling of stock. When this occurs, the short position is marked to market and this adjustment is recorded as an unrealized gain or loss in the statement of operations. The Company uses historical cost to determine all gains and losses. The fair market value is readily obtainable because all of the Company's marketable securities are classified as Level 1.

The Company also uses options as follows in order to increase yearly investment income:

The use of "Call" Options. Covered options can be sold up to a maximum of 20% of the value of the portfolio. This provides extra income in addition to dividends received from the Company's investments. The risk of this strategy is that investments may be called away, which the Company may have preferred to retain. Therefore, a limitation of a) 20% is placed on the amount of stock on which options can be written. The amount of the portfolio on which options are actually written is usually between 3-10% of the portfolio. The historical turnover of the portfolio is such that the average holding period is in excess of five years for our securities.

The use of "Put" options. Put options are written on stocks which the Company is willing to purchase. While the Company does not have a high rate of turnover in its portfolio, there is some turnover; for example, due to preferred stocks being called back by the issuing Company, or stocks being called away because call options have been b) written. If the stock does not go below the put exercise price, the Company records the proceeds from the sale as income. If the put is exercised, the cost basis is reduced by the proceeds received from the sale of the put option. There may be occasions where the cost basis of the stock is lower than the market price at the time the option is exercised.

Speculative Short Sales/Short Options. The Company normally limits its speculative transactions to no more than 15% of the value of the portfolio. The Company may sell uncovered calls on certain stocks. If the stock price does not rise to the price of the call, the option is not exercised and the Company records the proceeds from the sale of the call as income. If the call is exercised, the Company will have a short position in the related stock. The c) Company then has the choice of covering the short position, or selling a put against it. If the put is exercised, then the short position is covered. The Company's current accounting policy is to mark to market at the end of each quarter any short positions, and include it in the income statement. While the Company may have speculative positions equal to 15% of its accounts, in actual practice the net short stock positions usually account for less than 10% of the assets of the Company.

The Company realized a net loss from investments for the six months ended June 30, 2013 of \$(550,630). The most significant items are as follows: Gains of \$603,615 on the sale of 32,174 shares of Exelon and \$697,463 on the sale of 14,000 shares of Entergy. The Company incurred the following losses during the current six month period in order to close short positions: \$(765,411) on 2,500 shares of Intuitive Surgical Group, \$(300,595) on 12,500 shares of Hewlett Packard and \$(282,685) on 500 shares of Apple. The Company also lost \$(767,556) on the sale of 334,900 shares of USEC.

The Company realized a net loss from short sales of \$(6,128,318) for the six months ended June 30, 2013. These losses were mostly due to covering the following short positions: \$(4,053,655) on 28,100 shares of Netflix, Inc., \$(1,355,333) on 9,800 shares of Intuitive Surgical, Inc. and \$(346,712) on 5,500 shares of Apple, Inc.

At June 30, 2013, the Company had net assets of \$30,740,767 or \$7.47 per share versus net assets of \$35,113,819 or \$8.50 per share at December 31, 2012. Net assets decreased by \$(4,373,052) during the six months ended June 30, 2013. The main reason for the decrease in net assets was the realized losses on short positions of \$(6,128,318).

Since we are now reporting as an investment company, we no longer issue an Annual Report on Form 10-K. Any shareholder who is interested in learning more about our medical instrumentation and biotechnology operations should visit our website at [www.daxor.com](http://www.daxor.com) for more detailed information. We periodically issue press releases regarding research reports and placements of the BVA-100 Blood Volume Analyzer in hospitals. Blood volume measurement is a fundamental tool for accurate diagnosis and treatment in a variety of medical and surgical conditions. Among these conditions are congestive heart failure, critical care medicine and intensive care unit medicine, hypertension, syncope, pre-operative blood screening for hidden anemia, anemia in cancer patients, kidney failure, and hyponatremia, as well as additional conditions.

Despite the fact that blood volume derangements are commonly encountered in these conditions, treatment is based on indirect measurements and clinical signs that are, at best, crude guesstimates of what a patient's actual blood volume status is. Dr. David Goldfarb of the NYU Medical Center performed a study on renal dialysis patients involving blood volume measurements just before dialysis and immediately after dialysis which demonstrated how variable the source of the fluid removed during dialysis is. Some patients had their fluid removed from their blood volume primarily while some patients had fluid removed from their extra vascular space. Renal dialysis patients have a 65% chance of being dead within five years after starting dialysis. 25% of the patients have a major "crash" episode each year. A crash episode is essentially a collapse of a patient's blood pressure. It is possible that using blood volume measurement, combined with an inexpensive instrument that enables red cell concentration for patients to be monitored continuously during dialysis, and for physicians to obtain a scientific assessment of what blood volume changes the patient is undergoing during renal dialysis.

The Renal Research Group is a stand-alone dialysis facility in Manhattan. They are conducting another study on dialysis patients involving blood volume measurements. It is our hope that these types of studies will stimulate physicians who operate renal dialysis centers to incorporate such a basic test as blood volume measurement into their

treatment protocols.

Hyponatremia is a condition in which patients have a low sodium concentration. Such conditions are frequently encountered in hospital patients. There are two primary causes of hyponatremia. One cause is inappropriate secretion of a brain hormone called vasopressin which causes water retention and dilution of the sodium. A drug called Tolvaptan, which blocks this hormone, is frequently administered to such patients. Literature enclosed by the manufacturer of Tolvaptan, sold as Samsca, states that the drug should not be used in patients with hypomatremia and low blood volume (hypovolemic). However, we have found, based on informal surveys, that this drug is frequently administered without the patient's blood volume actually being measured. One major study (EVEREST Study) involving 4,133 patients published in JAMA (JAMA, March 28, 2007 – Vol. 297. No. 12) showed that there was no apparent benefit compared to a placebo in comparison to this drug. There were high death rates in both groups of patients.

The other major cause of hyponatremia is what is called renal salt wasting or cerebral salt wasting. These are conditions where the kidneys lose extra salt and such patients typically have a low blood volume. Giving a drug such as Tolvaptan to a patient who has a low blood volume and hyponatremia makes it very likely that the patient may develop kidney failure or have a collapse of the circulation and die. A recent study from Christiana Medical Center in Delaware reported that 40% of the patients diagnosed with cerebral salt wasting had low blood volume. Such patients definitely would not be candidates for a drug such as Tolvaptan. If physicians are treating these extremely critical conditions on the basis of crude guesstimates of a patient's blood volume, it is not too surprising that there are high death rates in these conditions.

Septicemia is caused by bacteria in the circulation and is a common occurrence in intensive care units. Death rates vary from 20% to 40% depending on the institution. Dr. Mihae Yu is one of the senior authors of an article published in *Shock* (A Prospective Randomized Trial Using Blood Volume Analysis in Addition to Pulmonary Artery Catheter, Compared with Pulmonary Artery Catheter Alone, to Guide Shock Resuscitation in Critically Ill Surgical Patients, *Shock*, Vol. 35, No. 3, pp. 220-228, 2011), which showed the different survival rates in 100 patients (a death rate of 8% for the patients whose treatment was guided by blood volume measurement versus a 24% death rate in a control group whose treatment was guided by the usual clinical laboratory parameters without blood volume measurement).

At the recent Critical Care Congress, there was a presentation about the dozens of different pharmaceutical agents which have been tested for the treatment of sepsis and ultimately failed. Pharmaceutical companies have spent hundreds of millions of dollars on these various products. It is not surprising that they failed because the fundamental derangement in sepsis is the inability to deliver adequate circulation to all parts of the body. In sepsis there is damage to the capillary walls. Physicians commonly treat patients with sepsis with what is called a water challenge. This is a crude guesstimate which may result in flooding a patient's lungs or inadequately providing circulation to the organs of the body. It is not surprising that death rates from 20% to 40% are common in such situations.

We are diligently pursuing our educational efforts to encourage physicians to treat critically ill patients with blood volume derangements on the basis of evidence based medicine, which means measuring a patient's blood volumes instead of guessing.

With respect to our autologous blood storage program, we are still pursuing our efforts to encourage individuals to store their own blood. As a physician whose father died from a contaminated transfusion, I continue to be astonished at individuals who are happy to spend from \$2,000 to \$3,000 per year insuring their car but consider it extravagant to spend one dollar per day to store their own blood.

We recently received a blood banking contract from Stroock & Stroock & Lavan LLP. Stroock is a national law firm with two offices in Manhattan and one each in Los Angeles, Miami and Washington DC. They have over 750 employees and approximately 600 of them work at their main office in lower Manhattan. The contract provides eligible employees at Stroock with the ability to store their own blood for future use.

The American Medical Association has specifically stated that the safest blood to use is your own. Frozen blood stored at 150 degrees below freezing can be used for up to 10 years after it has been collected. Red blood cells can be used for up to 42 days after collection. However, studies have shown that there is a significant decrease in the effectiveness of the blood cells after only two weeks of refrigerated storage. In contrast, blood frozen at extremely low temperatures has similar characteristics to freshly donated blood once it is thawed and processed.

Some of the benefits of using your own blood during surgery are:

- Improved surgical outcomes
- Reduced costs
- Reduced risk of anemia at the time of surgery
- Greater protection against infection

There are non surgical conditions which can lead to the use of anti-coagulants, analgesics and aspirin. This can cause sudden blood loss which lowers the hematocrit and hemoglobin levels. Individuals who take these medications would benefit from storing their own blood for the following reasons:

- Protect against heart and kidney failure
- Reduce risk of anemia

Strengthening the immune system

We are in the process of creating professional grade videos in order to provide additional educational material to the public about the benefits of this most important form of protection.

**Daxor Corporation**  
**Notes to Financial Statements**

**June 30, 2013 (Unaudited)**

**1. Organization and Investment Objective**

Daxor Corporation (the “Company”) is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. Effective January 1, 2012, the Company began reporting as an Investment Company. The Company also has an Operating Division that is a medical device company which provides biotechnology and cryobanking services (the “Operating Division”).

The Company’s investment goals, objectives and principal strategies are as follows:

The Company’s investment goals and objectives are capital preservation, maintaining returns on capital with a high degree of safety and generating income from dividends and option sales to help offset operating losses from the Company’s Operating Division.

In order to achieve these goals, the Company maintains a diversified securities portfolio comprised primarily of electric utility company common and preferred stocks. The Company also sells covered calls on portions of its portfolio and also sells puts on stocks it is willing to own. It also sells uncovered calls and may have net short positions in common stock up to 15% of the value of the portfolio. The net short position is the total fair market value of the Company’s short positions reduced by the amount due to the Company from the Broker. If the amount due from the Broker is more than the fair market value of the short positions, the Company will have a net receivable from the Broker. The Company’s investment policy is to maintain a minimum of 80% of its portfolio in equity securities of utility companies. The Board of Directors has authorized this minimum to be temporarily lowered to 70% when Company management deems it to be necessary. Investments in utilities are primarily in electric companies. Investments in non-utility stocks will generally not exceed 20% of the value of the portfolio.

**2. Significant Accounting Policies**

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America (“GAAP”) required management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the year. Actual results could differ from those estimates.

The following is a summary of significant accounting policies consistently followed by the Company in the preparation of its financial statements.

### *Valuation of Investments*

The Company carried its investments in securities at fair value and utilizes various methods to measure the fair value of its investments on a recurring basis. Fair value is an estimate of the exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants (i.e., the exit price at the measurement date). Fair value measurements are not adjusted for transaction costs. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The three levels of inputs are:

**Level 1** — Unadjusted quoted prices in active markets for identical assets and liabilities that the Company has the ability to access.

**Level 2** — Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

**Level 3** — Unobservable inputs for an asset or liability, to the extent relevant observable inputs are not available; representing the Company's own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement falls in its entirety, is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

Investments in securities traded on a national securities exchange are valued at the last reported sales price on the last business day of the year; securities traded on the over-the-counter market and listed securities for which no sale was reported on that date are valued at the mean between the last reported bid and asked prices.

**Daxor Corporation**  
**Notes to Financial Statements**

**June 30, 2013 (Unaudited)**

**2. Significant Accounting Policies-(continued)**

*Valuation of Derivative Instruments*

The Company accounts for derivative instruments under FASB 815, "Derivatives and Hedging," which establishes accounting and reporting standards requiring that derivative instruments be recorded in the statements of financial condition at estimated fair value. The changes in the fair values of derivatives are included in the statements of operations as a component of net realized and unrealized loss from investments.

*Investment Transactions and Income and Expenses*

Investment transactions are accounted for on the trade date. Realized gains and losses on sales of investments are calculated on the basis of identifying the specific securities delivered. Dividend income is recorded on the ex-dividend date, and interest income is recognized on the accrual basis.

*Distributions*

Net investment and operating income and net realized gains are not distributed, but rather are accumulated within the Company and used to pay expenses, to make additional investments or held in cash as a reserve. The Company may at its discretion pay dividends to shareholders.

*Income Taxes*

The Company accounts for income taxes under the provisions of FASB ASC 740, "Income Taxes." This pronouncement requires recognition of deferred tax assets and liabilities for the estimated future tax consequences of events attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured

using enacted tax rates in effect for the year in which the differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of changes in tax rates is recognized in the statement of operations in the period in which the enactment rate changes. Deferred tax assets and liabilities are reduced through the establishment of a valuation allowance at such time as, based on available evidence, it is more likely than not that the deferred tax assets will not be realized.

The Company accounts for uncertainties in income taxes under the provisions of FASB ASC 740-10-05, "Accounting for Uncertainties in Income Taxes" The ASC clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements. The ASC prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The ASC provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

**Daxor Corporation**  
**Notes to Financial Statements**

**June 30, 2013 (Unaudited)**

**3. Investments and related risks**

The following tables summarize the inputs used as of June 30, 2013 for the Company's assets and liabilities measured at fair value on a recurring basis at June 30, 2013, categorized by the above mentioned fair value hierarchy and also by denomination:

Assets	Level 1	Level 2	Level 3	Total
Common Stocks	\$45,946,432	\$ —	\$—	\$45,946,432
Preferred Stocks	1,897,104	—	—	1,897,104
Investment in Operating Division	—	—	3,314,996	3,314,996
Total	\$47,843,536	\$ —	\$3,314,996	\$51,158,532

Liabilities	Level 1	Level 2	Level 3	Total
Call and Put Options	\$1,212,601	\$ —	\$ —	\$1,212,601

During the six months ended June 30, 2013, the Company realized proceeds of \$6,239,043 from the sale of investment securities and \$4,727,988 from writing call and put options. During the same period, the Company spent \$ 11,732,324 to purchase investment securities and \$4,067,158 to purchase call and put options.

The following table is a reconciliation of the beginning and ending balances for the Company's assets measured at fair value on a recurring basis using significant unobservable inputs (level 3) during the six months ended June 30, 2013:

	Balance at June 30, 2013
Balance, January 1, 2013	\$ 3,296,182
Investment in/Loan to Operating Division	1,975,122
Unrealized Loss on Operating Division	(1,956,308 )
Balance June 30, 2013	\$ 3,314,996

The Company's Level 3 assets consist of its investment in its Operating Division. Since its inception, the Operating Division has not generated significant revenue and has incurred substantial operating losses. Due to these substantial

losses, the Operating Division has been completely dependent on funding from the Company to sustain its operations.

As such, the Company has determined that the value of the Operating Division approximates the net book value of certain property and equipment reduced by the remaining mortgage balance on such property and equipment. The property and equipment consist of land, buildings and laboratory equipment located in Oak Ridge, Tennessee.

**Daxor Corporation**  
**Notes to Financial Statements**

**June 30, 2013 (Unaudited)**

**4. Derivative Instruments**

The Company writes call and put options in order to generate additional investment income as part of its investment strategy. In the opinion of management, the use of financial derivative instruments in its investment program is appropriate and customary for the investment strategies employed reducing certain investment risks.

The following table summarizes the Company's activity in call and put options for the six months ended June 30, 2013.

Total Proceeds Received on open positions at 01/01/13	Sale of Options from 01/01/12-06/30/13	Expirations, Purchases and Assignments of Options from 01/01/12-06/30/13	Proceeds Received on open positions at 06/30/13	Market Value at 06/30/13	Change in Unrealized Deprecation at 06/30/13
\$ 4,601,754	\$ 4,727,988	\$ 7,726,693	\$ 1,603,049	\$ 1,212,601	\$ 390,448

The derivatives are shown at market value of \$1,212,601 on the Statement of Assets and Liabilities at June 30, 2013 as "Call and Put Options."

The following table summarizes the value of all derivatives as reported on the Statement of Assets and Liabilities at June 30, 2013:

Description	Market Value	Proceeds	Net Gain	Unrealized Gain	Unrealized (Loss)
Call Options	\$ 583,162	\$664,357	\$81,195	\$ 206,120	\$ (124,925 )
Put Options	629,439	938,692	309,253	482,066	(172,813 )
Total Options	\$ 1,212,601	\$1,603,049	\$390,448	\$ 688,186	\$ (297,738 )

For the six months ended June 30, 2013, the Company recorded a net unrealized loss of \$(626,970) on call and put options and a net realized gain of \$3,432,566 on call and put options.

**5. Income Taxes**

The Company accrues income taxes in interim periods based upon its estimated annual effective tax rate.

The net income tax benefit for the six months ended June 30, 2013 is comprised of the following:

Over accrual of prior year federal refund	\$1,290,000
Other	7,224
Total current income tax expense	1,297,224
Deferred income tax benefit	(3,459,474)
Net benefit for income taxes	\$(2,162,250)

Federal tax refund receivable of \$860,000 represents the estimated refund resulting from a carry back of the taxable loss from 2012 to 2010. The Company expects to receive this refund in 2013.

**Daxor Corporation**  
**Notes to Financial Statements**

**June 30, 2013 (Unaudited)**

**6. Deferred Income Taxes**

Deferred income taxes result from differences in the recognition of gains and losses on marketable securities; stock options and mark to market on short positions, as well as carry forwards of the Company's net operating losses of \$1,996,995, net capital losses of \$4,789,249 and tax credits of \$1,104,430 for tax purposes.

The deferred income tax liability at June 30, 2013 is computed at the federal statutory rate of 35% and comprised of the following:

Deferred Tax Liabilities:

Fair value adjustment for available-for-sale securities	\$9,206,733
Unrealized losses on short positions	(3,429,222)
Net Operating Loss-carry forward	(698,948 )
Net Capital Loss-carry forward	(1,676,237)
Tax Credits carried forward	(1,104,430)
Others	44,283
	\$2,342,179

The Company is currently undergoing two audits. The Internal Revenue Service is reviewing our return for the year ended December 31, 2011. The audit was initiated as a result of a federal tax refund the Company received of approximately \$2,000,000 for taxes paid in the years ended December 31, 2009 and December 31, 2010. Certain allocation percentages used on the Daxor New York City Income Tax Returns for the years ended December 31, 2010 and 2011 are currently under audit by the New York City Department of Taxation and Finance. Since neither audit has been completed, the Company cannot determine if any additional taxes, interest and penalties will be assessed.

Since the Company does not distribute all of its net investment income, it may be subject to the imposition of the federal accumulated earnings tax. The accumulated earnings tax is imposed on a corporation's accumulated taxable income at a rate of 15% for years commencing after December 31, 2002.

Accumulated taxable income is defined as adjusted taxable income minus the sum of the dividends paid deduction and the accumulated earnings credit. The dividends paid deduction and accumulated earnings credit are available only if

the Company is not held to be a mere holding or investment company.

Provided the Company manages accumulated and annual earnings and profits, in excess of \$250,000, in such a manner that the funds are deemed to be obligated or consumed by capital losses, redemptions and expansion of the operating division, the Company should not be held liable for the accumulated earnings tax by the Internal Revenue Service.

## 7. Related Party Transactions

The Company reported \$109,222 of investment administrative charges on the Statement of Operations for the six months Ended June 30, 2013. These charges represent a portion of the payroll and related expenses of three employees of the Operating Division for services performed for the Company.

## 8. Margin Loans

The Company has total margin loans payable at June 30, 2013 of \$17,986,514. These loans are secured by the Company's investments in marketable securities. The interest expense on the margin loans for the six months ended June 30, 2013 was \$82,256.

The ability of the Company to incur margin debt at any given time is based on the current amount outstanding and the market value of the portfolio of marketable securities. There are no set repayment terms for any of the Company's margin loans.

The following table summarizes the margin loan activity for the six months ended June 30, 2013:

Balance at 06/30/13	Weighted average interest rate at 06/30/13	Maximum amount outstanding during the period	Average amount outstanding during the period	Weighted average interest rate during the period
\$17,986,514	1.03	% \$ 19,391,527	\$ 17,529,318	0.94 %

25

**Daxor Corporation**  
**Notes to Financial Statements**

**June 30, 2013 (Unaudited)**

**9. Capital Stock**

At June 30, 2013, there were 10,000,000 shares of \$0.01 par value capital stock authorized. During the six months ended June 30, 2013, the Company repurchased 17,004 shares at a total cost of \$128,237.

**10. Recently Issued Accounting Pronouncement**

In June 2013, the FASB issued Accounting Standards Update 2013-08 (“ASU 2013-08”) Financial Services – Investment Companies (Topic 946) – Amendments to the Scope, Measurement, and Disclosure Requirements. ASU No. 2013-08 which provides guidance that creates a two-tiered approach to assess whether an entity is an investment company. The guidance will also require an investment company to measure non-controlling ownership interests in other investment companies at fair value and will require additional disclosures relating to investment company status, any changes there to and information about financial support provided or contractually required to be provided to any of the investment company’s investees. The guidance is effective for financial statements with fiscal years beginning on or after December 15, 2013 and interim periods within those fiscal years. Management is evaluating the impact of ASU 2013-08 but does not expect that ASU 2013-08 will have a material impact on the financial position or results of operations of the Company.

On July 18, 2013, the FASB issued Accounting Standards Update No. 2013-11, “Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carry forward, a Similar Tax Loss, or a Tax Credit Carry forward Exists” (“ASU 2013-11”). ASU 2013-11 is expected to reduce diversity in practice by providing guidance on the presentation of unrecognized tax benefits and will better reflect the manner in which an entity would settle at the reporting date any additional income taxes that would result from the disallowance of a tax position when net operating loss carry forwards, similar tax losses, or tax credit carry forwards exist. The amendments in this update should be applied prospectively for annual and interim periods beginning after December 15, 2013. The Company is currently evaluating the impact of its pending adoption of ASU 2013-11 on its consolidated financial statements.

**11. Subsequent Events**

The Company has evaluated subsequent events through the date of the filing.
