GLOBAL RESOURCE CORPORATION
Notes to the Financial Statements
June 30, 2006

NOTE 1 - FINANCIAL STATEMENTS

The accompanying financial statements have been prepared by the Company without audit. In the opinion of management, all adjustments (which include only normal

Edgar Filing: Global Resource CORP - Form 10QSB

recurring adjustments) necessary to present fairly the financial position, results of operations and cash flows at June 30, 2006 and for all periods presented have been made.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. It is suggested that these financial statements be read in conjunction with the financial statements and notes thereto included in the Company's March 31, 2006 audited financial statements. The results of operations for the period ended June 30, 2006 are not necessarily indicative of the operating results for the full year.

On December 15, 2005, after a thorough review of the costs and potential regulatory requirements of complying with the Investment Company Act of 1940, the Board of Directors of the Company approved "Notification of Withdrawal" on Form n-54C with the Securities and Exchange Commission to withdraw our election to be subject to sections 55 through 65 of the Investment Company Act of 1940. On December 19, 2005, our "Notification of Withdrawal" on Form n-54C was filed with the Securities and Exchange Commission. As such, and with the transfer of the Well Renewal, LLC interest, the Company has become a Development Stage Company. Although we became a Development Stage Company on December 15, 2005, the from inception disclosures on the Statement of Operations and the Statement of Cash Flows will begin January 1, 2006.

NOTE 2 - GOING CONCERN

The Company's financial statements are prepared using the accounting principles generally accepted in the United States of America applicable to a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. However, the Company has had a change in control and has changed its business plan and it has not generated any revenues. The future of the Company is dependent upon its ability to obtain financing and upon future profitable operations from the development of its new business opportunities. Management plans to research possible acquisitions of various entities and an officer of the Company has agreed to loan the Company funds as needed to sustain business for a period of twelve months. However, the Company is dependent upon its ability to secure equity and/or debt financing and there are no assurances that the Company will be successful, without sufficient financing it would be unlikely for the Company to continue as a going concern.

These conditions raise substantial doubt about the Company's ability to continue as a going concern. These financial statements do not include any adjustments that might arise from this uncertainty.

NOTE 3 - DERIVATIVES

Global Resource evaluated the application of SFAS 133 and EITF 00-19 for the convertible debentures issued in fiscal 2005. Based on the guidance in SFAS 133 and EITF 00-19, Global Resource concluded all of these instruments were required to be accounted for as derivatives. SFAS 133 and EITF 00-19 require Global Resource to bifurcate and separately account for the conversion features of the debentures as embedded derivatives. Pursuant to SFAS 133, Global Resource bifurcated the conversion feature from the debentures because the economic characteristics and risks of the conversion features were determined to not be clearly and closely related to the economic characteristics and risks of the debentures. In addition, because there was no explicit cap on the amount of shares that might be required to be issued pursuant to the conversion features, Global Resource determined that the conversion features met the attributes of a liability and therefore recorded the fair value of the conversion features as current liabilities. Global Resource is required to record the fair value of the conversion features on its balance sheet at fair value with changes in the values of these derivatives reflected in the statement of operations as "Gain

Edgar Filing: Global Resource CORP - Form 10QSB

(loss) on derivative."

6

The impact of the application of SFAS 133 and EITF 00-19 on the balance sheet as of June 30, 2006 and the impact on the statements of operations as of June 30, 2006 and 2005 are as follows:

	MARCH 31, 2006	JUNE 30, 2006	GAIN
	-----	-----	-----
Derivative liability - debentures	\$ 165,166	\$ 157,213	\$ 7,953

	MARCH 31, 2006	JUNE 30, 2006	GAIN
	-----	-----	-----
Derivative liability - debentures	\$ 168,895	\$ 265,989	\$ (97,094)

NOTE 4 - RELATED PARTY TRANSACTIONS

During the quarter ended June 30, 2006, a shareholder of the Company maintained office space and provided services that resulted in rent expense of \$500.

NOTE 5 - MATERIAL EVENTS

On June 7, 2006 an unrelated third party purchased the convertible debenture owned by Transnix Corporation. As of the date of purchase, the principal amount due on the debenture was \$102,345 and the accrued but unpaid interest was \$16,274. Subsequent to June 30, 2006, under the terms of the purchase agreement, Transnix used a substantial part of the proceeds received from the debenture purchaser to pay off the liabilities of the Company, other than the principal and interest related to the debenture. The payments were accounted for on the Company's books as a capital contribution. Transnix paid off \$210,000 of wages payable, \$54,004 of accounts payable related party, \$56,025 of accounts payable, and accrued expenses of \$1,500. A gain on the settlement of debt of \$17,747 was recognized by the Company. Accordingly, as of July 11, 2006, the Company has no liabilities other than the debenture. In conjunction with the purchase of the Transnix debenture, a change in control of the Company occurred. The then directors and the then sole officer of the Company resigned, appointing Mary Radomsky as the sole director and the sole officer.

7

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATIONS.

On July 26, 2006 the Company entered into a Plan and Agreement of Reorganization with Carbon Recovery Corporation for the acquisition by the Company of substantially all of the assets of Carbon Recovery Corporation in exchange for:

1. The assumption by the Company of nominal, if any, non-warrant liabilities;
2. The issuance by the Company to Carbon Recovery Corporation for the benefit of the shareholders of Carbon Recovery Corporation, of 50,000,000 shares

Edgar Filing: Global Resource CORP - Form 10QSB

of the Company's Common Stock having a deemed value for purposes of the transaction of \$1.00 per share; and

3. The assumption by the Company of Carbon Recovery Corporation's warrants (contractual commitments) and issuance by the Company, to Carbon Recovery Corporation for the benefit of the holders of Carbon Recovery Corporation's issued and outstanding warrants, of an equal number of the Company's Common Stock Purchase Warrants having identical terms to Carbon Recovery Corporation's issued and outstanding warrants as of the date of Closing.

Carbon Recovery Corporation is a development stage company with a license for proprietary technology and related custom software for the use of microwaves for the breaking down of petroleum-based products, such as used tires, into their component parts, capturing those components for resale. Closing is scheduled for August 31, 2006 and, assuming that Closing occurs, a Form 8-K will be filed providing information on the resulting company.

The transaction is intended to qualify as a so-called "C" Reorganization under Section 368(a)(1)(C) of the Internal Revenue Code. Accordingly, following the transaction Carbon Recovery Corporation will be dissolved. Carbon Recovery Corporation will utilize a liquidating trust to hold the securities being issued, pending the ability to distribute such shares pursuant to the requirements of the securities laws. The Agreement provides for both piggyback and demand registration rights for the securities being issued.

As a condition precedent to the Closing, the Company was required to declare a reverse stock split of 100 to 1, or one share for each one hundred shares currently held. As of the date of this filing the Company has approximately 7,215,034 shares issued and outstanding and after the reverse stock split will have approximately 72,151 shares issued and outstanding. On July 27, 2006 the Board of Directors declared a 100 to 1 reverse stock split, with a record date of the close of trading on August 11, 2006 and an effective date of the opening of trading on August 14, 2006.

The exercise price of the warrants to be issued by the Company on assumption of the warrant liabilities of Carbon Recovery Corporation will likely be higher than the anticipated public market price of the post-split shares and, accordingly, are expected to have little, if any, value.

8

ITEM 3. CONTROLS AND PROCEDURES.

1. As previously reported in both Form 10-KSB for the fiscal year ended March 31, 2006 and a Form 8-K, the Company is restating its financial statements because of the reclassification and changed accounting for convertible debentures. On July 3, 2006, the Company concluded that it was necessary to restate its financial results for the fiscal year ended March 31, 2005 and for the interim periods ended September 30 and December 31, 2004 and 2005 and for the interim period ended June 30, 2005 to reflect additional non-operating gains and losses related to the classification of and accounting for convertible debentures issued in fiscal 2005. The Company had previously determined a beneficial conversion feature, valued the conversion features at the intrinsic value and classified the convertible instruments as equity. After further review, the Company determined that these instruments should have been classified as derivative liabilities and, therefore, the fair value of each instrument should have been recorded as a derivative liability on the Company's balance sheet. Changes in the fair values of these instruments result in adjustments to the amount of the recorded derivative liabilities and the

Edgar Filing: Global Resource CORP - Form 10QSB

corresponding gain or loss is recorded in the Company's statement of operations. At the date of the conversion of each respective instrument or portion thereof, the corresponding derivative liability will be classified as equity.

The restated financial statements for the fiscal year ended March 31, 2005 were included in Form 10-KSB for the fiscal year ended March 31, 2006. The restated interim financial statements for the quarters ended September 30 and December 31, 2004 and 2005 and for the quarter ended June 30, 2005 are being filed concurrently with this report by amendment to the original filings..

2. Pursuant to rules adopted by the SEC as directed by Section 302 of the Sarbanes-Oxley Act of 2002, the Company has performed an evaluation of its disclosure controls and procedures (as defined by Exchange Act Rule 13a-15(e)) as of the end of the period covered by this report. The Company's disclosure controls and procedures are designed to ensure (i) that information required to be disclosed by the Company in the reports the Company files or submits under the Exchange Act are recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms; and (ii) that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its principal executive and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

The Company has evaluated, with the participation of our CEO and CFO, the effectiveness of the design and operation of the Company's disclosure controls and procedures as of June 30, 2006, pursuant to Exchange Act Rule 15d-15. Based upon that evaluation, the CEO and CFO identified deficiencies that existed in the design or operation of our internal control over financial reporting that it considered to be "material weaknesses". The Public Company Accounting Oversight Board has defined a material weakness as a "significant deficiency or combination of significant deficiencies that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected."

9

The material weaknesses identified relate to:

- o As of June 30, 2006 there was a lack of accounting personnel with the requisite knowledge of Generally Accepted Accounting Principles in the US ("GAAP") and the financial reporting requirements of the Securities and Exchange Commission.
- o As of June 30, 2006 there were insufficient written policies and procedures to insure the correct application of accounting and financial reporting with respect to the current requirements of GAAP and SEC disclosure requirements.
- o As of June 30, 2006 there was a lack of segregation of duties, in that we only had one person performing all accounting-related duties.

Notwithstanding the existence of these material weaknesses in our internal control over financial reporting, our management believes, including our Chief Executive Officer and Chief Financial Officer that the financial statements included in this report fairly present in all material respects our financial condition, results of operations and cash flows for the periods presented.

The Company will continue to evaluate the effectiveness of internal controls and

Edgar Filing: Global Resource CORP - Form 10QSB

procedures on an on-going basis. We anticipate that in the event of the acquisition of another entity, that entity's management will design and implement improvements in our internal control over financial reporting to address the material weaknesses described above as well as to provide accounting resources with the expertise need to assist us in the preparation of our financial statements.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

There is no litigation pending or threatened by or against us or any of our former or current officers or directors, as such.

However, on June 17, 2005, while we were being regulated as a BDC, the Division of Investment Management at the SEC ("Division") advised us that it was the view of the Division that we could not rely on the exemption afforded by Regulation E for our prior issuances, between September 27, 2004 through December 2, 2004, of shares of our common stock. The Division also advised us that, in the view of the Division, it appeared that our issuance of those shares violated the registration requirements of Section 5 of the Securities Act of 1933, as amended ("Securities Act"). In response, we advised the Division that it was our view that the issuance of the shares was exempt from registration under the Securities Act under various available exemptions, including but not limited to Regulation E and that our issuance of the shares had not violated Section 5 of the Securities Act. At this time, neither the SEC nor any private party has commenced any action against us alleging that we issued the shares in violation of Section 5 of the Securities Act. Further, to the best of our knowledge, the SEC has not commenced any formal or informal inquiry with respect to its contention that the shares were issued in violation of Section 5 of the Securities Act. In the event that any such action or inquiry is commenced, we intend to defend against such allegations vigorously.

10

SIGNATURES

In accordance with the requirements of the Exchange Act, the registrant caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
