(DEVELOPMENT STAGE COMPANIES)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

MARCH 31, 2003

NOTE 1 BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and rules and regulations of the Securities and Exchange Commission (the "SEC") applicable to interim periods. In the opinion of management, all adjustments (consisting only of normal recurring accruals) considered necessary for a fair presentation have been included. These financial statements should be read in conjunction with the Company's audited financial statements included in the Company's Annual Report on Form 10-KSB filed with the Securities and Exchange Commission for the year ended December 31, 2002. Operating results for three months ended March 31, 2003 are not necessarily indicative of the results that may be expected for the year ending December 31, 2003 or any interim period.

NOTE 2 ORGANIZATION, BUSINESS OF THE COMPANY AND RECENT DEVELOPMENTS

Lithium Technology Corporation ("LTC") closed share exchanges in which LTC acquired ownership of 100% of GAIA Holding B.V. ("GAIA Holding") from Arch Hill Ventures, N.V., a private company limited by shares, incorporated under the laws of the Netherlands ("Arch Hill Ventures"), which is controlled by Arch Hill Capital N.V. ("Arch Hill Capital"), a private company limited by shares, incorporated under the laws of the Netherlands (the "Share Exchanges") (see Note 5).

Subsequent to the Share Exchanges, Arch Hill Capital effectively controls LTC through its 73% beneficial ownership of LTC common stock. As a result, the Share Exchanges have been accounted for as a reverse acquisition, whereby for financial reporting purposes, GAIA Holding is considered the acquiring company. Hence, the historical financial statements of GAIA Holding became the historical financial statements of the Company and include the results of operations of LTC only from the acquisition date of October 4, 2002.

GAIA Holding, a private limited liability company incorporated under the laws of the Netherlands, is the 100% beneficial owner of GAIA Akkumulatorenwerke GmbH ("GAIA"). GAIA Holding (formerly known as Hill Gate Investments B. V.) was incorporated in 1990 and only had limited operations until the acquisition of GAIA on February 12, 1999 (inception of development stage). GAIA is a private limited liability company incorporated under the laws of Germany. GAIA Holding's ownership interest in GAIA is held through certain trust arrangements (see Note 3).

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

The date of inception of the Company's development stage is February 12, 1999. Prior to inception of development stage activities, the Company incurred accumulated losses of \$200,000, and these losses have been segregated from the Company's deficit accumulated during the development stage in the accompanying consolidated financial statements.

The Company considers itself to have one operating segment. The Company is a development and pilot-line production stage company that develops large format lithium-ion rechargeable batteries to be used as a new power source for emerging applications in the automotive, stationary power, and national security markets.

LTC, GAIA Holding, GAIA and all subsidiaries of LTC, GAIA Holding and GAIA are collectively referred to herein as the Company.

Table of Contents

NOTE 3 SIGNIFICANT ACCOUNTING POLICIES

GAIA HOLDING DEEMED ACQUIRER OF LTC

The Share Exchanges between LTC and GAIA Holding have been accounted for as a reverse acquisition (see Notes 2 and 5). As a result, GAIA Holding is considered the acquiring company; hence, the historical consolidated financial statements of GAIA Holding became the historical financial statements of LTC and include the operating results of LTC only from the effective dates of the Share Exchanges.

BASIS OF CONSOLIDATION

The consolidated financial statements include the accounts of the Company, including all subsidiaries. All significant intercompany accounts and transactions have been eliminated.

The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or classification of liabilities that might be necessary should the Company be unable to operate in the normal course of business.

GAIA Holding is the beneficial owner of all of the issued and outstanding shares of GAIA. Legal ownership of the outstanding shares of GAIA are held pursuant to certain Dutch and German trust agreements by two Netherlands entities (the Nominal Stockholders) for the risk and account of GAIA Holding. Based on the Dutch and German trust agreements, the Nominal Stockholders are obligated to transfer the legal ownership of the shares in GAIA without any further payments to GAIA Holding. Pursuant to the trust agreements, GAIA Holding has the right to vote the shares of GAIA held by the Nominal Stockholders. The results of GAIA are included in the results of GAIA Holding as of the date of acquisition.

ESTIMATES AND UNCERTAINTIES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (generally accepted accounting principles) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results, as determined at a later date, could differ from these estimates.

FAIR VALUE OF FINANCIAL INSTRUMENTS

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

Fair value estimates, assumptions and methods used to estimate fair value of the Company's financial instruments are made in accordance with the requirements of SFAS No. 107, Disclosures about Fair Value of Financial Instruments. The Company has used available information to derive its estimates. However, because these estimates are made as of a specific point in time, they are not necessarily indicative of amounts the Company could realize currently. The use of different assumptions or estimating methods may have a material effect on the estimated fair value amounts.

The carrying amounts of cash and cash equivalents, accounts receivable net, accounts payable, accrued expenses and short-term notes payable approximate fair value due to the short-term nature of the instruments.

Long-term liabilities are comprised of loans from financial institutions, related party loans and other long-term loans. The Company's long-term loans from financial institutions and other long-term loans approximate fair value.

CASH AND CASH EQUIVALENTS

The Company considers all highly liquid investment instruments purchased with a remaining maturity of three months or less to be cash equivalents.

Table of Contents**INVENTORIES**

Inventories primarily include raw materials and auxiliary materials required for the production process. Inventories are valued at the lower of cost or net realizable value. The cost of inventories is determined by using the weighted average method. Cost elements included in inventories comprise all costs of purchase and other costs incurred to bring the inventories to their present location and condition.

PROPERTY AND EQUIPMENT

Property and equipment are recorded at cost and primarily consist of buildings, technical and lab equipment, furniture and office equipment and leasehold improvements. In the period assets are retired or otherwise disposed of, the costs and accumulated depreciation are removed from the accounts, and any gain or loss on disposal is included in results of operations. Property and equipment are depreciated using the straight-line method over their estimated useful lives as follows:

Buildings	25 years
Technical and laboratory equipment	7-10 years
Office equipment and other	1-5 years

INTANGIBLES

Intangibles consist of amounts capitalized by GAIA for patents, which are recorded at cost and are amortized using the straight-line method over their estimated useful lives of 13 to 17 years commencing upon final approval by the foreign regulatory body. Intangibles also include amounts relating to the core patented technology of LTC, as determined by an independent valuation, in connection with the allocation of the purchase price resulting from the Share Exchanges (see Note 5). These intangibles are being amortized using the straight-line method over their estimated useful lives of 12 years commencing October 4, 2002.

LONG-LIVED ASSETS

The Company periodically evaluates the carrying value of long-lived assets when events and circumstances indicate the carrying amounts may not be recoverable. The carrying value of a long-lived asset is considered impaired when the anticipated undiscounted cash flows expected to result from the use and eventual disposition from such assets are less than the carrying value. If the sum of the expected cash flows (undiscounted and without finance charges) is less than the carrying amount of the asset, the Company recognizes an impairment loss on the asset. In that event, a loss is recognized for the amount by which the carrying value exceeds the fair value of the long-lived asset. Fair value is determined by quoted market prices in active markets, if available, or by using the anticipated cash flows discounted at a rate commensurate with the risks involved.

GOODWILL

Goodwill represents the difference between the acquisition price and the fair value of the underlying net assets of LTC as determined by an independent valuation as of the dates of the Share Exchanges (see Note 5). Statement of Financial Accounting Standards (SFAS) No. 142,

Goodwill and Other Intangible Assets (SFAS 142), requires the discontinuance of amortization related to goodwill as of January 1, 2002. Goodwill is subject to at least an annual assessment for impairment by applying a fair value-based test. If the carrying amount exceeds the fair value, goodwill is considered to be impaired. The Company will complete its annual impairment review on October 31. We continually evaluate whether events and circumstances have occurred that indicate the remaining balance of goodwill may not be recoverable. In evaluating impairment, we estimate the sum of the expected future cash flows derived from such goodwill. Such evaluations for impairment are significantly impacted by estimates of future revenues, costs and expenses and other factors. If the goodwill is considered to be impaired, the impairment loss to be recognized is measured by the amount by which the carrying amount of the goodwill exceeds the fair value of the expected future cash flows.

Table of Contents

INCOME TAXES

Deferred tax assets and liabilities are computed for temporary differences between the financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the temporary differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized.

REVENUES

The Company performs certain research and development for other companies and sells prototypes to third parties. Revenue is recognized as services are rendered or products are delivered, the price to the buyer is fixed and determinable, and collectibility is reasonably assured.

OTHER INCOME

The Company receives subsidies from foreign governmental agencies to reimburse the Company for certain research and development expenditures. Subsidies are recorded as other income.

FOREIGN CURRENCY TRANSLATION

The functional currency for foreign operations is the local currency. For these foreign entities, the Company translates assets and liabilities at end-of-period exchange rates. The Company records these translation adjustments in cumulative other comprehensive income (loss), a separate component of equity in the consolidated balance sheet. For revenues, expenses, gains and losses, the weighted average exchange rate for the period is used to translate those elements.

STOCK OPTIONS

In accordance with Statement of Financial Accounting Standard (SFAS) No. 123, Accounting for Stock-based Compensation (SFAS No. 123), the Company has elected to account for stock option grants to employees using the intrinsic value based method prescribed by APB Opinion No. 25.

In connection with the Share Exchanges (see Note 5), the Company has stock options post acquisition. All such options were fully vested at the acquisition and valued as part of the purchase price. If the Company had applied the fair value recognition provisions of SFAS No. 123, there would be no effect on net income and earnings per share.

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

NET LOSS PER COMMON SHARE

The Company has presented net loss per common share pursuant to SFAS No. 128, Earnings Per Share . Net loss per common share is based upon the weighted average number of outstanding common shares. The Company has determined that the as-if converted common shares related to the preferred shares should be included in the weighted average shares outstanding for purposes of calculating basic earnings per share for the three months ended March 31, 2003 and 2002 was as follows:

	2003	2002
Series A Preferred Stock	\$ 111,340,524	\$ 111,340,524
Common Stock	88,235,392	
	199,575,916	111,340,524

The Company made such determination because: 1) Arch Hill Capital, which controls the Company, has the ability to authorize the necessary shares for conversion; 2) the preferred shares have no significant preferential rights above the common shares; and 3) the preferred shares will automatically convert at a later date upon proper share authorization.

Table of Contents

For the three months ended March 31, 2003 and 2002, the Company's potential common shares have an anti-dilutive effect on earnings per share and, therefore, have not been used in determining the total diluted weighted average number of shares outstanding. Potential common shares resulting from convertible promissory notes payable, stock options and warrants that would be used to determine diluted earnings per share for the years ended March 31, 2003 and 2002 were as follows:

	<u>2003</u>	<u>2002</u>
Convertible promissory notes	\$ 39,490,000	
Stock options	3,175,000	
Warrants	19,886,000	
	<u> </u>	<u> </u>
Total	\$ 62,551,000	
	<u> </u>	<u> </u>

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In July 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 143, Accounting for Asset Retirement Obligations (SFAS 143) which is effective for fiscal years beginning after June 15, 2002. SFAS 143 requires, among other things, that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The associated asset retirement costs are then capitalized as part of the carrying amount of the long-lived asset. SFAS 143 has been adopted by the Company effective January 1, 2003, and did not have a material impact on its consolidated financial statements.

In April 2002, the FASB issued SFAS NO. 145, Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB statement No.13, and Technical Corrections (SFAS 145). This statement eliminates the current requirement that gains and losses on debt extinguishment must be classified as extraordinary items in the income statement. Instead, such gains and losses will be classified as extraordinary items only if they are deemed to be unusual and infrequent, in accordance with the current GAAP criteria for extraordinary classification. In addition, SFAS 145 eliminates an inconsistency in lease accounting by requiring that modifications of capital leases that result in reclassification as operating leases be accounted for consistent with sale-leaseback accounting rules. SFAS 145 is effective for fiscal years beginning after May 15, 2002 and will be adopted effective January 1, 2003. The adoption of SFAS 145 did not have a material impact on the Company's consolidated financial statements.

In June 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities (SFAS 146), which addresses accounting for restructuring and similar costs. SFAS 146 supercedes previous accounting guidance, principally Emerging Issues Task Force (EITF) Issue No. 94-3. SFAS 146 requires that the liability for costs associated with an exit or disposal activity be recognized when the liability is incurred. Under EITF No. 94-3, a liability for an exit cost was recognized at the date of a company's commitment to an exit plan. SFAS 146 also establishes that the liability should initially be measured and recorded at fair value. Accordingly, SFAS 146 may affect the timing of recognizing future restructuring expenses as well as the amount recognized. The Company will adopt the provisions of SFAS 146 for restructuring activities initiated after December 31, 2002.

In November 2002, the FASB issued FASB Interpretation No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. This interpretation expands the disclosures to be made by a guarantor about its obligations under certain guarantees and requires that, at the inception of a guarantee, a guarantor recognize a liability for the fair value of the obligation undertaken in issuing the guarantee. The disclosure requirements are effective immediately. The initial recognition and measurement

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

provisions of this interpretation are effective for guarantees issued or modified after December 31, 2002. The adoption of the initial recognition and measurement provisions of this interpretation did not have a material effect on the Company's financial position, results of operations or cash flows.

In January 2003, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 46, Consolidation of Variable Interest Entities An Interpretation of Accounting Research Bulletin (ARB) No. 51 (FIN 46). This

Table of Contents

interpretation clarifies how to identify variable interest entities and how a company should assess its interests in a variable interest entity to decide whether to consolidate the entity. FIN 46 applies to variable interest entities created after January 31, 2003, in which a company obtains an interest after that date. Also, FIN 46 applies in the first fiscal quarter or interim period beginning after June 15, 2003, to variable interest entities in which a company holds a variable interest that it acquired before February 1, 2003. The Company does not have any ownership in variable interest entities.

NOTE 4 OPERATING AND LIQUIDITY DIFFICULTIES AND MANAGEMENT S PLANS TO OVERCOME

The accompanying consolidated financial statements of the Company have been prepared on a going concern basis, which contemplates the continuation of operations, realization of assets and liquidation of liabilities in the ordinary course of business. Since its inception, the Company has incurred substantial operating losses and expects to incur additional operating losses over the next several years. Operations have been financed primarily through the use of proceeds from loans from Arch Hill Capital and other related parties, loans from silent partners and bank borrowings secured by assets. Continuation of the Company s operations is dependent upon obtaining further financing from either Arch Hill Capital or other related parties, continued bridge financing from Arch Hill Capital and new equity financing. These conditions raise substantial doubt about the Company s ability to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

MANAGEMENT S PLANS

The Company has worked closely with selected portable electronics Original Equipment Manufacturers (OEM) in the past, exploring various notebook computer, PDA and wireless handset applications. Over the past few years the Company has refocused its unique extrusion and assembly technology and market activities to concentrate on large format, high rate battery applications including advanced automotive batteries for 42-volt systems, Hybrid Electric Vehicles (HEVs) and energy storage devices for the stationary power market. The Company is currently working to commercialize a 42-volt automotive battery; one prototype was delivered to the European Astor Program in the third quarter of 2002 and a second prototype was delivered for independent testing in Europe in the fourth quarter of 2002. The Company has not yet delivered a prototype HEV, or stationary power battery for testing by a third party.

Management s operating plan seeks to minimize the Company s capital requirements, but commercialization of the Company s battery technology will require substantial amounts of additional capital. The Company expects that technology development and operating and production expenses will increase significantly as it continues to advance its battery technology and develop products for commercial applications. The Company s working capital and capital requirements will depend upon numerous factors, including, without limitation, the progress of the Company s technology development program, technological advances, and the status of competitors.

Effective April 1, 2003, a 20% salary reduction was implemented for all employees of LTC. The reduced salaries will be repaid by the Company if an equity financing of at least \$8,000,000 in gross proceeds is closed by the Company by September 1, 2003 at which time the base salary level of each employee will be reinstated to 100% of the base salary in effect on March 31, 2003.

The Company does not currently have sufficient cash to achieve all of its development and production objectives. In order to have sufficient resources for its development, production, operating and administration needs, the Company needs to raise approximately \$10,000,000 in a new equity financing to fund the Company for approximately one year. The Company has not entered into any definite agreements relating to a new

financing as of May 20, 2003.

There can be no assurance that funding will continue to be provided by Arch Hill Capital in the amounts necessary to meet all of the Company's obligations until closing of a new equity financing or that the Company will be able to consummate a new financing. If no financing from Arch Hill Capital or external parties is consummated, the Company will access all available alternatives including a sale of its assets, the suspension of operations and possible liquidation, auction, bankruptcy, or other measures.

Table of Contents**NOTE 5 REVERSE ACQUISITION MERGER OF LITHIUM TECHNOLOGY CORPORATION AND GAIA HOLDING**

On October 4, 2002, LTC closed a share exchange (the First Share Exchange) in which LTC acquired a 60% interest in GAIA Holding from Arch Hill Ventures in exchange for LTC's issuance to Arch Hill Ventures of 60,000 shares of LTC's Series A Preferred Stock convertible into 66,804,314 shares of LTC's common stock. On December 13, 2002, LTC closed a second share exchange (the Second Share Exchange) in which Arch Hill Ventures transferred to LTC its remaining 40% of the outstanding shares of GAIA Holding, and LTC issued to Arch Hill Ventures 40,000 shares of its Series A Preferred Stock convertible into 44,536,210 shares of its common stock. GAIA Holding, a private limited liability company incorporated under the laws of the Netherlands, is the 100% beneficial owner of GAIA. GAIA is a private limited liability company incorporated under the laws of Germany.

Subsequent to the Share Exchanges, Arch Hill Capital controls LTC. As a result, the Share Exchanges are accounted for as a reverse acquisition, whereby for financial reporting purposes, GAIA Holding is considered the acquiring company. Hence, the historical financial statements of GAIA Holding became the historical financial statements of the Company and include the results of operations of LTC only from the acquisition date.

The Share Exchanges were consummated pursuant to the terms of the Share Exchange Agreement that LTC entered into on June 7, 2002 with Hill Gate Capital N. V. (Hill Gate), which subsequently changed its name to Arch Hill Real Estate N. V. (Arch Hill Real Estate). On September 6, 2002, all of the outstanding shares of GAIA Holding and all of the rights and obligations of Arch Hill Real Estate under the Share Exchange Agreement were transferred to Arch Hill Ventures. Arch Hill Capital controls Arch Hill Ventures and also is now the controlling stockholder of LTC.

The Share Exchanges between LTC and GAIA Holding have been accounted for as a reverse acquisition. The purchase price has been determined as a step acquisition, based on the fair market value of LTC's outstanding shares at the dates of the Share Exchanges, with 84% of the outstanding shares deemed acquired in the First Share Exchange and 16% in the Second Share Exchange. There were 64,303,305 shares outstanding prior to the Share Exchanges. The First Share Exchange was based on the LTC closing price (\$0.11) as of October 4, 2002. The October 4, 2002 date was used because there were significant modifications made to the agreement through the date of closing on October 4, 2002. The value of the shares for the Second Share Exchange (\$0.09) was based on the LTC closing price on December 5, 2002, the date upon which final terms to the Second Share Exchange were agreed to and announced.

The total purchase price of the Share Exchanges has been determined and allocated based upon independent valuation as follows:

Purchase Price:	
First Exchange, 84% of 64,303,305 shares at \$0.11 per share	\$ 5,942,000
Second Exchange, 16% of 64,303,305 shares at \$0.09 per share	926,000
Fair value of LTC options and warrants	133,000
Transaction costs incurred by GAIA Holding	52,000
Total Purchase Price	\$ 7,053,000
Assets acquired:	
Cash	\$ 20,000
Prepaid and other current assets	137,000
Property and equipment	315,000
Intangible assets Patents	8,000,000

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

In-Process R&D (expensed)	3,700,000
Goodwill	1,965,000
Other assets	21,000
Liabilities assumed:	
Accounts payable	475,000
Accrued salaries	201,000
Notes payable	65,000
Promissory notes converted	1,915,000
Convertible securities	4,449,000
Net assets acquired	\$ 7,053,000

Table of Contents

In-process research and development (IPR&D) costs acquired in the acquisition include projects associated with LTC's automotive battery market of \$3,300,000 and projects associated with LTC's defense, medical, industrial and aerospace projects of \$400,000. The Company has determined that the technological feasibility of this in-process technology has not yet been established and that the technology has no alternative future use and as such, the amounts have been expensed.

Also at closing of the First Share Exchange, Arch Hill Capital converted \$1,915,000 of promissory notes into 23,932,087 shares of LTC common stock under original terms of the promissory notes.

The following unaudited pro forma combined results of operations is provided for illustrative purposes only and assumes that the Share Exchanges had occurred as of the beginning of the period presented. The following unaudited pro forma information should not be relied upon as necessarily being indicative of the historical results that would have been obtained if this acquisition had actually occurred during those periods, nor of the results that the Company may experience in the future.

	March 31,	
	2002	
	<u> </u>	
Proforma operating revenues	\$	0
Proforma net (loss)	\$	(22,495,000)
Proforma (loss) per share	\$	(0.20)

NOTE 6 RECEIVABLE FROM RELATED PARTY

The Company has a receivable from Tamarchco GmbH (Tamarchco), a 100% owned subsidiary of Arch Hill Ventures, of \$2,032,000 in principal. The receivable bears interest at 7% per annum. Tamarchco used the proceeds for investing in a silent partnership participation in GAIA for an equal amount (see Note 11) under identical terms. The receivable at March 31, 2003 includes accrued interest of \$705,000. Under the existing agreement, the principal including accumulated interest is due on December 31, 2008.

NOTE 7 PROPERTY AND EQUIPMENT

Property and equipment at March 31, 2003 and December 31, 2002 is summarized as follows:

	March 31,	December 31,
	<u> </u>	<u> </u>
Land and buildings	\$ 2,203,000	\$ 2,115,000
Technical and laboratory equipment	3,986,000	3,816,000
Asset under construction and equipment deposit	446,000	385,000
Office equipment and other	406,000	377,000

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

	<u>7,041,000</u>	<u>6,693,000</u>
Less: Accumulated depreciation and amortization	(2,034,000)	(1,818,000)
	<u>\$ 5,007,000</u>	<u>\$ 4,875,000</u>

Assets under construction at March 31, 2003 includes equipment being constructed that has not yet been placed into service.

Table of Contents**NOTE 8 INTANGIBLES**

Intangibles at March 31, 2003 and December 31, 2002 are summarized as follows:

	March 31,	December 31,
	<u> </u>	<u> </u>
Patents	\$ 8,149,000	\$ 8,125,000
Less: Accumulated amortization	(337,000)	(167,000)
	<u> </u>	<u> </u>
Total	\$ 7,812,000	\$ 7,958,000
	<u> </u>	<u> </u>

Intangibles consist primarily of amounts relating to the core patented technology of LTC, as determined by an independent valuation, in connection with the allocation of the excess purchase price resulting from the Share Exchanges (see Note 2 and Note 5). Intangibles also include patents held by GAIA Holding.

Estimated future amortization expense on intangible assets for the next five years at March 31, 2003 is \$677,000 per year.

NOTE 9 NOTES PAYABLE

As of March 31, 2003, the Company has outstanding a note payable for research and development funding. The principal balance remaining under the note is \$59,000. The note is secured by the intellectual property rights and equipment developed from the funds provided under the funding agreement.

NOTE 10 CONVERTIBLE DEBT SECURITIES

Convertible debt securities are comprised of promissory notes held by Arch Hill Capital. The terms of the securities are such that they have no stated interest rate, no repayment terms and are not intended to be repaid by the Company in cash.

\$3,949,000 of these promissory notes are convertible into 39,490,000 shares of LTC common stock and were acquired by Arch Hill Capital from a third party. The remaining \$3,086,000 of the promissory notes were issued under a Bridge Financing Agreement, as amended, between LTC and Arch Hill Capital.

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

Under the Bridge Financing Agreement, \$1,588,000 of the promissory notes issued to LTC from July 29, 2002 to December 31, 2002 are convertible into equity securities based on the price per share of any new equity financing of the Company entered into after the closing of the First Share Exchange. The Bridge Financing Agreement, as amended, does not contain a maximum of the amount of funding that may be advanced under such agreement. The amount of any additional notes provided will be related to the working capital advances made by Arch Hill Capital to the Company and the length of time required by the Company to obtain new equity financing.

On April 14, 2003, the Company and Arch Hill Capital amended the Bridge Financing Agreement to provide that the entire principal balance and all other sums due and payable under any promissory note issued on or after January 1, 2003 shall be payable upon twelve months written demand by Arch Hill Capital. Notwithstanding the foregoing, at the option of Arch Hill Capital, the principal balance and all other sums due and payable under any promissory note issued on or after January 1, 2003 may be applied against the purchase price of equity securities being sold by the Company in any equity financing after the date of such note.

During the period January 1, 2003 to March 31, 2003, Arch Hill advanced \$1,498,000 to the Company under the Bridge Loan Agreement. On April 14, 2003, the Company and Arch Hill Capital amended the Bridge Loan Agreement (see note 13).

Table of Contents**NOTE 11 LONG-TERM DEBT**

Long-term debt at March 31, 2003 and December 31, 2002 is summarized as follows:

	March 31,	December 31,
	<u> </u>	<u> </u>
Loans from financial institutions	\$ 2,035,000	\$ 1,934,000
Subordinated loans from related party	24,133,000	22,117,000
Silent partnership loans-related party	2,737,000	2,593,000
Silent partnership loans non-related parties	2,199,000	2,131,000
	<u> </u>	<u> </u>
	\$ 31,104,000	\$ 28,775,000
Less: Current maturities	(456,000)	(368,000)
	<u> </u>	<u> </u>
	\$ 30,648,000	\$ 28,407,000
	<u> </u>	<u> </u>

LOANS FROM FINANCIAL INSTITUTIONS

GAIA has two loans from financial institutions that are collateralized by (i) land and buildings in an amount up to \$992,000 and (ii) machinery, equipment and patents in an amount of \$2,119,000 as collateral for the mortgage loan. The loans bear interest between 5.75% and 6.75% per annum and are due to be repaid by December 31, 2014.

SUBORDINATED LOANS FROM RELATED PARTY

GAIA has received subordinated loans from Arch Hill Ventures, a related party. The loans bear cumulative interest at 6% per annum. Under the contract terms, the loans can be called when GAIA does not have any further accumulated deficit. The loans are subordinated to all other creditors of GAIA.

SILENT PARTNERSHIP LOANS RELATED PARTY

Tamarchco GmbH (Tamarchco), a 100% owned subsidiary of Arch Hill Ventures, has provided three silent partnership loans to GAIA. The partnership loans consist of a \$1,674,000 loan bearing interest at 7% per annum under the First Tamarchco Partnership Agreement, a \$163,000 loan bearing interest at 6% per annum under the Second Tamarchco Partnership Agreement and a \$195,000 loan bearing interest at 6% under the Third Tamarchco Partnership Agreement. GAIA is not required to pay the interest under the Second and Third Tamarchco Partnership Agreements until GAIA has generated an accumulated profit amounting to \$4,184,000. The total amount payable to Tamarchco under the three Tamarchco Partnership Agreements at March 31, 2003 is \$2,737,000 including accrued interest of \$705,000.

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

Tamarchco is entitled to receive an annual 4% share in profits related to its contributions under the First Tamarchco Agreement and an annual 12% share in profits related to its contribution under the Second and Third Tamarchco Agreements. The 12% share in profits under the Second and Third Tamarchco Agreements are not payable until GAIA has generated an accumulated profit amounting to \$4,184,000.

Each Tamarchco Partnership Agreement terminates in December 2008, unless terminated prior to such time for good cause as defined in the applicable Tamarchco Partnership Agreement. The principal, accrued and unpaid interest, and unpaid profits are due on the termination of the Tamarchco Partnership Agreements.

Management expects to convert the Second and Third Tamarchco Partnership Agreements into ordinary loans during the second quarter of 2003. In addition management expects to enter into an amendment of the First Tamarchco Partnership Agreement pursuant to which the profit sharing provisions will be eliminated.

Table of Contents

SILENT PARTNERSHIP LOANS-NON-RELATED PARTIES

Two other parties have provided silent partnership loans to GAIA which remain outstanding at March 31, 2003. Frankendael Participatiemaatschappij N.V. (Frankendael) has provided a partnership loan of \$457,000, which bears interest at 6% per annum. Technologie-Beteiligungs-Gesellschaft mbH der Deutschen Ausgleichsbank (TBG) has provided a partnership loan of \$1,674,000, which bears interest at 6% per annum. GAIA is not required to pay the interest under the Frankendael Partnership Agreement until GAIA has generated an accumulated profit amounting to \$4,184,000. The total amount payable to Frankendael and TBG under the Partnership Agreements at March 31, 2003 is \$2,199,000, including \$68,000 in accrued interest.

Frankendael and TBG are entitled to receive an annual 12% share in profits related to its contributions under the Frankendael Partnership Agreement and the TBG Partnership Agreement. The 12% share in profits under the Frankendael Partnership Agreement is not payable until GAIA has generated an accumulated profit amounting to \$4,184,000. The TBG Partnership Agreement provides that should GAIA receive additional injections of capital in the course of further financing rounds, TBG shall adjust its profit sharing to the capital ratio applicable at such time. Management believes that based upon subsequent equity received by GAIA that the present profit sharing that TBG is entitled to under the Agreement is approximately 4.4%. Management further believes that it is unlikely that Frankendael or TBG will receive any profit sharing under the Partnership Agreement at any time in the near future.

From the start of the sixth year under the TBG Partnership Agreement, TBG is entitled to demand a non-recurrent remuneration of 30% of the amount invested plus 6% of the amount invested at the end of the period of participation for each year after the expiration of the fifth full year of participation under certain circumstances.

The Frankendael Partnership Agreement and the TBG Partnership Agreement each terminates in December 2008, unless terminated prior to such time for good cause as defined in the applicable partnership agreement.

The principal, accrued and unpaid interest, and unpaid profits are due on the termination of the Frankendael Partnership Agreement and the TBG Partnership Agreement.

NOTE 12 COMMITMENTS AND CONTINGENCIES

BUILDING LEASE

The Company leases a 12,400 square foot research facility and corporate headquarters in a freestanding building at 5115 Campus Drive in Plymouth Meeting, Pennsylvania pursuant to a Lease Agreement dated July 22, 1994, as amended, between PMP Whitemarsh Associates and the Company. The Company is currently leasing the facility under a one-year lease extension that ends on March 31, 2004. The annual rent under the lease is approximately \$143,000 from April 1, 2003 to March 31, 2004.

CAR AND OTHER LEASES

The Company leases cars and other assets under operating leases. The monthly payments amount to \$5,000 for an average remaining period of 2 years.

LITIGATION

The Company is involved in various disputes or claims arising in the normal course of business. In the opinion of management, an unfavorable outcome of the disputes will not have a material effect on the financial position, results of operation or cash flows of the Company. Management intends to defend claims vigorously.

AGREEMENTS WITH EXECUTIVE OFFICERS

The Company has entered into an Employment Agreement with David J. Cade, for a period of three years commencing January 1, 2002 (the Term) pursuant to which Mr. Cade serves

Table of Contents

as the Company's Chairman and Chief Executive Officer at a salary of \$250,000 per year as of October 4, 2002, the closing of the First Share Exchange, subject to increase at the discretion of the Board of Directors. The Agreement also provides that during each fiscal year, Mr. Cade will be eligible to receive a target bonus of up to 40% of his annual salary. Mr. Cade's Employment Agreement provides for certain severance payment benefits in the event his employment is terminated by the Company other than for cause and includes certain confidentiality, non-solicitation and non-competition provisions.

Dr. Franz Kruger was appointed President and Chief Operating Officer of the Company on November 26, 2002. Since September 1, 2002, the Company has paid Dr. Kruger a monthly consulting fee of \$6,136. On April 14, 2003, the Company entered into a three year Employment Agreement with Dr. Kruger (See Note 13). GAIA entered into a Consultancy Agreement with InnoventisConsulting GmbH (Innoventis) with respect to the services of Dr. Franz Kruger as the Chairman of Management of GAIA. Innoventis represent Dr. Kruger. The Consultancy Agreement has a four-year term from September 1, 2002 to August 31, 2006. Innoventis charges a monthly fee of EUR 23,000 for Dr. Kruger's services. The agreement requires that Innoventis and Dr. Kruger maintain secrecy as to the confidential information of GAIA.

Mr. Ralf Tolksdorf was appointed Chief Financial Officer of the Company on November 18, 2002. Since September 1, 2002, the Company has paid Mr. Tolksdorf a monthly consulting fee of \$10,500. On April 14, 2003, the Company entered into a three year Employment Agreement with Mr. Tolksdorf (See Note 13). GAIA has entered into a Consultancy Agreement with Strategische Management und Risikoberatungs GmbH (SMR) with respect to the services of Ralf Tolksdorf as the Managing Director of Finances, Organization and related matters of GAIA. SMR represents Mr. Tolksdorf. The Consultancy Agreement has a four-year term from September 1, 2002 to August 31, 2006. SMR charges a fee of EUR 14,500 for Mr. Tolksdorf services. The agreement requires that SMR and Mr. Tolksdorf maintain secrecy as to the confidential information of GAIA.

The Company has entered into an Employment Agreement with Andrew J. Manning, for a period of three years commencing January 1, 2002 (the Term), pursuant to which Dr. Manning serves as the Company's Executive Vice President and Chief Technical Officer at a salary of \$175,000 as of October 4, 2002, the closing of the First Share Exchange, subject to increase at the discretion of the Board of Directors. The Agreement provides that during each fiscal year, Dr. Manning will be eligible to receive a target bonus of up to 20% of his annual salary. Dr. Manning's employment agreement provides for certain severance payment benefits in the event his employment is terminated by the Company other than for cause and includes certain confidentiality, non-solicitation and non-competition provisions.

NOTE 13 SUBSEQUENT EVENTS

Effective April 1, 2003, a 20% salary reduction was implemented for all employees of LTC. The reduced salary will be repaid by the Company if an equity financing of at least \$8,000,000 in gross proceeds is closed by the Company by September 1, 2003 at which time the base salary level of each employee will be reinstated to 100% of the base salary in effect on March 31, 2003.

Effective April 14, 2003, the monthly fee charged by SMR for Mr. Tolksdorf's services was increased to Euro 18,800 (See Note 12).

On April 14, 2003, the Board of Directors approved an Employment Agreement with Dr. Franz Kruger, effective April 14, 2003, for a period of three years, pursuant to which Dr. Kruger serves as the Company's President and Chief Operating Officer. The agreement provides for a salary of \$97,300 per year to be paid by LTC. The agreement also provides that during each fiscal year, Dr. Kruger will be eligible to receive a target bonus of up to 40% of his annual salary.

On April 14, 2003, the Board of Directors approved an Employment Agreement with Mr. Ralf Tolksdorf, effective April 14, 2003, for a period of three years, pursuant to which Mr. Tolksdorf serves as the Company's Chief Financial Officer. The agreement provides for a salary of \$97,300 per year to be paid by LTC. The agreement also provides that during each fiscal year, Mr. Tolksdorf will be eligible to receive a target bonus of up to 30% of his annual salary.

Table of Contents

The Company does not currently have enough shares of common stock authorized to issue shares upon the conversion of all of its outstanding convertible securities or to issue in a new financing. On May 1, 2003, the Board of Directors and holders of a majority of the Company's voting stock approved a reverse stock split in an exchange ratio to be determined by the Company's Board of Directors ranging from one-for-ten to one-for-twenty. The Company believes that the reverse stock split will make its capital structure more attractive to investors. The shares available for issuance after the reverse stock split will be sufficient to make available that number of shares of common stock as will be required for any securities to be issued as part of a new financing, for conversion of all outstanding convertible securities and for future issuance. On May 7, 2003, the Company filed a Preliminary Information Statement with the Securities and Exchange Commission relating to the reverse stock split. The Board may establish the exchange ratio at any time prior to December 31, 2003. The Board may consider a variety of factors in determining the final exchange ratio including, but not limited to, overall trends in the stock market, recent changes and anticipated trends in the market price per share of the Company's common stock, business and transactional developments, and the Company's actual and projected financial performance.

Effective May 9, 2003, the Company and Arch Hill Ventures amended the terms of the Series A Preferred Stock outstanding and reduced the number of authorized shares of Series A Preferred Stock from 100,000 to 1,000 shares with each share convertible into 111,340.524 shares of common stock and holding 111,341 votes per share. As a result of the amendment, Arch Hill Ventures holds 1,000 shares of Series A Preferred Stock with the right to an aggregate of 111,341,000 votes, convertible into 111,340,524 shares of common stock, the same number of votes and conversion shares held prior to the amendment.

During the period April 1, 2003 to May 20, 2003, Arch Hill Capital advanced \$940,000 to the Company under the Bridge Loan Agreement.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

The following discussion and analysis should be read in conjunction with the financial statements and notes thereto appearing elsewhere in this report.

OVERVIEW

The Company is a development and pilot-line production stage company that develops large format lithium-ion rechargeable batteries to be used as a new power source for emerging applications in the national security, stationary power and transportation markets.

In October and December, 2002, LTC entered into Share Exchanges in which LTC acquired a 100% interest in GAIA through LTC's acquisition of 100% of the outstanding shares of GAIA Holding from Arch Hill Ventures in exchange for LTC's issuance to Arch Hill Ventures of 100,000 shares of LTC Series A Preferred Stock convertible into 111,340,524 shares of LTC common stock. GAIA Holding, a private limited liability company incorporated under the laws of the Netherlands, is the 100% beneficial owner of GAIA. Arch Hill Capital, a private company limited by shares, incorporated under the laws of the Netherlands, controls Arch Hill Ventures.

Subsequent to the Share Exchanges, Arch Hill Capital controls LTC. As a result, the Share Exchanges are accounted for as a reverse acquisition, whereby for financial reporting purposes, GAIA Holding is considered the acquiring company. Hence, the historical financial statements of

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

GAIA Holding became the historical financial statements of the Company and include the results of operations of LTC only from the acquisition date.

Arch Hill Capital beneficially owns 174,762,611 shares of LTC common stock constituting approximately 73.10% of the Company common stock on an as-converted basis. Arch Hill Capital has indicated that it intends to convert the convertible notes and a Series A Preferred Stock that it beneficially owns once the Company has enough shares of common stock authorized for issuance to all convertible security holders. Arch Hill Capital is a controlling stockholder and is able to control the outcome of most matters submitted to the Company stockholders for approval, including the election of directors, any amendments to the Certificate of Incorporation or a merger, sale of assets or other significant transaction without the approval of other Company stockholders. In addition, Arch Hill Capital controls a majority of the

Table of Contents

voting power of GAIA Holding and GAIA by virtue of its ownership of a controlling interest in the Company. As a result, Arch Hill Capital has an effective veto power over corporate transactions by LTC, GAIA Holding or GAIA which management or non-control stockholders of such entities might desire.

Since inception, the Company has incurred substantial operating losses and expects to incur substantial additional operating losses over the next several years. As of March 31, 2003, the Company had an accumulated deficit during development stage of \$29.8 million. Operations have been financed primarily through the use of proceeds from loans from shareholders, other related parties, loans from silent parties and bank borrowings secured by assets.

RESULTS OF OPERATIONS

THREE MONTHS ENDED MARCH 31, 2003 COMPARED TO THREE MONTHS ENDED MARCH 31, 2002

During the three months ended March 31, 2003, revenues from development contracts and prototype sales were \$112,000. There were no revenues from development contracts or prototype sales for the three months ended March 31, 2002. The revenues in the three months ended March 31, 2003 resulted from increased technology and marketing activities in large high rate battery applications which resulted in prototype and development contracts.

Engineering, research and development expenses in the three months ended March 31, 2003 increased \$692,000 or 191% to \$1,054,000 from \$362,000 in the three months ended March 31, 2002. These increases resulted primarily from advancement of the Company's technology in large high rate battery applications and the inclusion of the engineering, research and development expenses of LTC. The Company expects engineering, research and development expenses to increase slightly during the remaining quarter throughout 2003 as compared to the first quarter of 2003.

General and administrative expenses in the three months ended March 31, 2003 increased \$694,000 or 284% to \$938,000 from \$244,000 in the three months ended March 31, 2002. This increase was primarily due to the inclusion of the general and administrative expenses of LTC during the period ended March 31, 2003, as well as increased legal, accounting and other expenses related to the preparation of GAIA Holding financial statements in accordance with U.S. GAAP, preparation of the Company's SEC filings and increased travel expenses.

Depreciation and amortization for the three months ended March 31, 2003 increased \$214,000 or 221% to \$311,000 from \$97,000 in the three months ended March 31, 2002. The increase was primarily due to \$167,000 of amortization on intangible assets acquired in the Share Exchanges as well as additional depreciation on LTC fixed assets acquired in the Share Exchanges and other capital expenditures after March 31, 2002.

Income from foreign government subsidies in the three months ended March 31, 2003 decreased \$7,000 or 88% to \$1,000 from \$8,000 in the three months ended March 31, 2002 due to a decrease in the number of contracts.

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

Interest expense, net of interest income, for the three months ended March 31, 2003 increased \$162,000 or 63% to \$421,000 from \$259,000 in the three months ended March 31, 2002. Interest expense increased as a result of increased shareholder loans and bank loans during fiscal 2002.

There was a net loss of \$2,611,000 or \$.01 per share for the three months ended March 31, 2003 as compared to a net loss of \$954,000 or \$.01 per share for the three months ended March 31, 2002. The increase in the net loss was primarily related to costs and expenses related to the Share Exchanges and losses of LTC after the Share Exchanges.

Since inception, the Company has incurred substantial operating losses and expects to incur substantial additional operating losses over the next several years. As of March 31, 2003, the Company's accumulated deficit was \$29,799,000.

LIQUIDITY AND FINANCIAL CONDITION

The Company has financed its operations since inception primarily through equity financings, loans from shareholders and other related parties, loans from silent parties and bank borrowings secured by assets.

Table of Contents

Arch Hill Capital entered into a Bridge Financing Agreement with LTC as of January 8, 2002, as amended from time to time. Effective October 4, 2002, LTC and Arch Hill Capital amended the Bridge Financing Agreement to provide that any promissory notes issued on or after July 29, 2002 would be applied against the purchase price of equity securities being sold by LTC in any equity financing after the closing of the First Share Exchange and that any promissory note issued prior to July 29, 2002 would be converted into common stock as of the closing of the First Share Exchange.

On October 4, 2002, \$1,914,567 in principal of outstanding promissory notes issued by LTC to Arch Hill Capital prior to July 29, 2002 were converted, at \$.08 per share, into 23,932,087 shares of LTC common stock. \$1,588,000 in principal of convertible promissory notes were issued from July 29, 2002 through December 31, 2002 and currently remain outstanding. The amounts due under the notes issued from July 29, 2002 through December 31, 2002 are not repayable in cash but are to be applied against the purchase price of any equity securities sold by the Company in any equity financing after the issuance of the notes.

On April 14, 2003, LTC and Arch Hill Capital amended the Bridge Financing Agreement to provide that the entire principal balance and all other sums due and payable under any promissory note issued on or after January 1, 2003 shall bear interest at 6% per annum and shall be payable upon twelve months written demand by Arch Hill Capital. Notwithstanding the foregoing, at the option of Arch Hill Capital, the principal balance and all other sums due and payable under any promissory note issued on or after January 1, 2003 may be applied against the purchase price of equity securities being sold by the Company in any equity financing after the date of such note.

From January 1, 2003 through March 31, 2003, \$1,498,000 in principal of promissory notes were issued under the Bridge Financing Agreement. From April 1, 2003 through May 20, 2003, an additional \$940,000 in principal of promissory notes were issued under the Bridge Financing Agreement.

The Bridge Financing Agreement, as amended, does not contain a maximum of the amount of funding that may be advanced under such agreement. Accordingly, there is no maximum amount of notes that may be issued to Arch Hill Capital. The amount of notes will be related to the working capital advances made by Arch Hill Capital to the Company and the length of time until new equity financing is completed.

Arch Hill Ventures has entered into a bridge financing agreement with GAIA. As of March 31, 2003, advances from Arch Hill Ventures to GAIA under this agreement were \$24,133,000.

At March 31, 2003, cash and cash equivalents were \$31,000, total current assets were \$595,000, total current liabilities were \$3,011,000 and long-term liabilities were \$30,648,000. As of March 31, 2003, the Company's working capital deficit was \$2,416,000. The Company expects to incur substantial operating losses as it continues its commercialization efforts.

At March 31, 2003, assets included \$3,506,000 due from related parties, property and equipment, net, of \$5,007,000, net intangibles of \$7,812,000, goodwill of \$1,965,000 and other assets of \$21,000.

The Company does not currently have sufficient cash to achieve all of its development and production objectives. In order to have sufficient capital resources for its development, production, operating and administrative needs, the Company needs to close on an equity financing

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

transaction in the near term. The Company anticipates that such an equity financing could be up to approximately \$10,000,000, although no definitive terms have been established as of this date. The Company believes that if it raises approximately \$10,000,000 in an equity financing it would have sufficient funds to meet the Company's needs for at least twelve months.

The Company has not entered into any definitive agreements relating to a new financing as of May 20, 2003 and no assurance can be given that any financing will be consummated.

The Company expects that Arch Hill Capital will continue to provide bridge financing to LTC as needed until a new equity financing transaction is completed although Arch Hill Capital has not entered into a formal agreement to continue to provide such bridge financing. There can be no assurance that funding will continue to be provided by Arch Hill Capital in the amounts necessary to meet all the Company's obligations until the closing of a new financing or that the Company will be able to consummate a new financing.

Table of Contents

If a new financing is not consummated, the Company will assess all available alternatives including a sale of its assets or merger, the suspension of operations and possibly liquidation, auction, bankruptcy, or other measures.

GOING CONCERN MATTERS

The accompanying consolidated financial statements of the Company have been prepared on a going concern basis, which contemplates the continuation of operations, realization of assets and liquidation of liabilities in the ordinary course of business. Since its inception, the Company has incurred substantial operating losses and expects to incur additional operating losses over the next several years. Operations have been financed primarily through the use of proceeds from loans from Arch Hill Capital and other related parties, loans from silent partners and bank borrowings secured by assets. Continuation of the Company's operations in 2003 is dependent upon obtaining further financing from either Arch Hill Capital or other related parties, continued bridge financing from Arch Hill Capital and the new equity financing described above. These conditions raise substantial doubt about the Company's ability to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

MANAGEMENT'S PLANS TO OVERCOME

OPERATING AND LIQUIDITY DIFFICULTIES

The Company has worked closely with selected portable electronics Original Equipment Manufacturers (OEM) in the past, exploring various notebook computer, PDA and wireless handset applications. Over the past few years the Company has refocused its unique extrusion and assembly technology and market activities to concentrate on large format, high rate battery applications including advanced automotive batteries for 42-volt systems, HEV and energy storage devices for the stationary power market. The Company is currently working to commercialize a 42-volt automotive battery; one prototype was delivered to the European Astor Program in the third quarter of 2002 and a second prototype was delivered for independent testing in Europe in the fourth quarter of 2002. The Company has not yet delivered a prototype HEV, or stationary power battery for testing by a third party.

Management's operating plan seeks to minimize the Company's capital requirements, but commercialization of the Company's battery technology will require substantial amounts of additional capital. The Company expects that technology development and operating and production expenses will increase significantly as it continues to advance its battery technology and develop products for commercial applications. The Company's working capital and capital requirements will depend upon numerous factors, including, without limitation, the progress of the Company's technology development program, technological advances, and the status of competitors.

Effective April 1, 2003, a 20% salary reduction was implemented for all employees of LTC. The reduced salary will be repaid by the Company if an equity financing of at least \$8,000,000 in gross proceeds is closed by the Company by September 1, 2003 at which time the base salary level of each employee will be reinstated to 100% of the base salary in effect on March 31, 2003.

The Company does not currently have sufficient cash to achieve all of its development and production objectives. In order to have sufficient resources for its development, production, operating and administration needs, the Company needs to raise approximately \$10,000,000 in a new equity financing to fund the Company for at least one year. The Company has not entered into any definite agreements relating to a new financing as of May 20, 2003. There can be no assurance that funding will continue to be provided by Arch Hill Capital in the amounts

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

necessary to meet all of the Company's obligations until closing of a new equity financing or that the Company will be able to consummate a new financing. If no financing from Arch Hill Capital or external parties is consummated, the Company will access all available alternatives including a sale of its assets, the suspension of operations and possible liquidation, auction, bankruptcy, or other measures.

Table of Contents

CRITICAL ACCOUNTING POLICIES

The Securities and Exchange Commission (SEC) issued disclosure guidance for critical accounting policies . The SEC defines critical accounting policies as those that require application of management s most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in subsequent periods. The Company s significant accounting policies are described in Note 2 in the Notes to the Consolidated Financial Statements. Not all of these significant accounting policies require management to make difficult, subjective or complex judgments or estimates. However, the following policies could be deemed to be critical within the SEC definition.

REVENUES

The Company performs certain research and development for other companies and sells prototypes to third parties. Revenue is recognized as services are rendered or products are delivered, the price to the buyer is fixed and determinable, and collectibility is reasonably assured.

USEFUL LIVES OF TANGIBLE AND INTANGIBLE ASSETS

Depreciation and amortization of tangible and intangible assets are based on estimates of the useful lives of the assets. We regularly review the useful life estimates established to determine their propriety. Changes in estimated useful lives could result in increased depreciation or amortization expense in the period of the change in estimate and in future periods that could materially impact our financial condition and results of operations.

IMPAIRMENT OF LONG-LIVED ASSETS

Effective January 1, 2002, we adopted Statement of Financial Accounting Standards (SFAS) No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets (SFAS No. 144) SFAS No. 144 requires that long-lived assets and certain identifiable intangibles be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. An impairment charge could materially impact our financial condition and results of operations.

GOODWILL IMPAIRMENT

Effective January 1, 2002, we adopted Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets (SFAS No. 142). SFAS No. 142 requires that goodwill no longer be amortized, but instead be reviewed for recoverability, and that annual tests for

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

impairment of goodwill be performed. SFAS No. 142 also requires interim tests when an event has occurred that more likely than not has reduced the fair value of such assets. We will assess on an annual basis the fair values of the reporting unit housing the goodwill and, if necessary, assess on an annual basis for any impairment. Any write-offs would result in a charge to earnings and a reduction in equity in the period taken. An impairment charge could materially impact our financial condition and results of operations.

PURCHASE ACCOUNTING

Purchase price accounting requires extensive use of accounting estimates and judgments to allocate the purchase price to the fair market value of the assets and liabilities purchased. In our recording of the share exchanges, we engaged a recognized valuation expert to assist us in determining the fair value of these assets and liabilities. Included in the asset valuation for this purchase was the valuation of intangible assets for patents and in-process research and development. The Company determined that the technological feasibility of this in-process technology had not yet been established and that the technology had no alternative future use and as such, the amounts were expensed.

Table of Contents

INCOME TAXES

As part of the process of preparing our consolidated financial statements, we are required to estimate our taxes in each of the jurisdictions of operation. This process involves management estimating the actual current tax expense together with assessing temporary differences resulting from differing treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included within the consolidated balance sheet. We then must assess the likelihood that the deferred tax assets will be recovered from future taxable income and, to the extent recovery is not likely, we must establish a valuation allowance. Future taxable income depends on the ability to generate income in excess of allowable deductions. Significant management judgment is required in determining the provision for income taxes, deferred tax assets and liabilities and any valuation allowance recorded against net deferred tax assets. In the event that actual results differ from these estimates or we adjust these estimates in future periods, we may need to establish a valuation allowance that could materially impact our financial condition and results of operations.

FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value estimates, assumptions and methods used to estimate fair value of the Company's financial instruments are made in accordance with the requirements of SFAS No. 107, Disclosures about Fair Value of Financial Instruments. The Company has used available information to derive its estimates. However, because these estimates are made as of a specific point in time, they are not necessarily indicative of amounts the Company could realize currently. The use of different assumptions or estimating methods may have a material effect on the estimated fair value amounts.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In July 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 143, Accounting for Asset Retirement Obligations (SFAS 143) which is effective for fiscal years beginning after June 15, 2002. SFAS 143 requires, among other things, that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The associated asset retirement costs are then capitalized as part of the carrying amount of the long-lived asset. SFAS 143 has been adopted by the Company effective January 1, 2003, and did not have a material impact on its consolidated financial statements.

In April 2002, the FASB issued SFAS NO. 145, Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB statement No.13, and Technical Corrections (SFAS 145). This statement eliminates the current requirement that gains and losses on debt extinguishment must be classified as extraordinary items in the income statement. Instead, such gains and losses will be classified as extraordinary items only if they are deemed to be unusual and infrequent, in accordance with the current GAAP criteria for extraordinary classification. In addition, SFAS 145 eliminates an inconsistency in lease accounting by requiring that modifications of capital leases that result in reclassification as operating leases be accounted for consistent with sale-leaseback accounting rules. SFAS 145 is effective for fiscal years beginning after May 15, 2002 and will be adopted effective January 1, 2003. The adoption of SFAS 145 did not have a material impact on the Company's consolidated financial statements.

In June 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities (SFAS 146), which addresses accounting for restructuring and similar costs. SFAS 146 supercedes previous accounting guidance, principally Emerging Issues Task Force (EITF) Issue No. 94-3. SFAS 146 requires that the liability for costs associated with an exit or disposal activity be recognized when the liability

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

is incurred. Under EITF No. 94-3, a liability for an exit cost was recognized at the date of a company's commitment to an exit plan. SFAS 146 also establishes that the liability should initially be measured and recorded at fair value. Accordingly, SFAS 146 may affect the timing of recognizing future restructuring expenses as well as the amount recognized. The Company will adopt the provisions of SFAS 146 for restructuring activities initiated after December 31, 2002.

In November 2002, the FASB issued FASB Interpretation No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. This interpretation expands the disclosures to be made by a guarantor about its obligations under certain guarantees and requires that, at the inception of a guarantee, a guarantor recognize a liability for the fair value of the obligation undertaken in issuing the guarantee. The disclosure

Table of Contents

requirements are effective immediately. The initial recognition and measurement provisions of this interpretation are effective for guarantees issued or modified after December 31, 2002. The adoption of the initial recognition and measurement provisions of this interpretation did not have a material effect on the Company's financial position, results of operations or cash flows.

In January 2003, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 46, Consolidation of Variable Interest Entities An Interpretation of Accounting Research Bulletin (ARB) No. 51 (FIN 46). This interpretation clarifies how to identify variable interest entities and how a company should assess its interests in a variable interest entity to decide whether to consolidate the entity. FIN 46 applies to variable interest entities created after January 31, 2003, in which a company obtains an interest after that date. Also, FIN 46 applies in the first fiscal quarter or interim period beginning after June 15, 2003, to variable interest entities in which a company holds a variable interest that it acquired before February 1, 2003. The Company does not have any ownership in variable interest entities.

FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. This report contains certain forward-looking statements and information that are based on the beliefs of management as well as assumptions made by and information currently available to management. The statements contained in this report relating to matters that are not historical facts are forward-looking statements that involve risks and uncertainties, including, but not limited to, the successful commercialization of our batteries, future demand for our products, general economic conditions, government and environmental regulation, competition and customer strategies, technological innovations in the battery industries, changes in our business strategy or development plans, capital deployment, business disruptions, our ability to consummate future financings and other risks and uncertainties, certain of which are beyond our control. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may differ materially from those described herein as anticipated, believed, estimated or expected.

Forward-looking statements are based on management's current views and assumptions and involve known and unknown risks that could cause actual results, performance or events to differ materially from those expressed or implied in those statements. These risks include, but are not limited to, the risks set forth in the Company's Form 10-KSB for the year ended December 31, 2002 and the following risks:

FINANCIAL CONDITION RISKS

n THE COMPANY HAS SUBSTANTIAL INDEBTEDNESS AND IS HIGHLY LEVERAGED. At March 31, 2003, the Company had total consolidated long-term indebtedness of approximately \$31.1 million, less current portion of approximately \$456,000, and a stockholders deficiency of approximately \$21.8 million. The Company also had at March 31, 2003 current liabilities of approximately \$3.0 million (including approximately \$1.1 million of accounts payable). The level of the Company's indebtedness and related debt service requirements could negatively impact our ability to obtain any necessary financing in the future for working capital, capital expenditures or other purposes. A substantial portion of our future cash flow from operations, if any, may be dedicated to the payment of our indebtedness. The Company's high leverage may also limit our flexibility to react to changes in business and may place us at a competitive disadvantage to less highly leveraged competitors. In addition, creditors who remain unpaid may initiate collection proceedings, which could hamper our operations due to our short term cash needs or the effect on our assets subject to debt.

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

n THE COMPANY HAS A HISTORY OF OPERATING LOSSES AND HAS BEEN UNPROFITABLE SINCE INCEPTION. We incurred net losses of approximately \$29.8 million from February 12, 1999 (inception of development date) to March 31, 2003, including approximately \$2.6 million of net loss in the three months ended March 31, 2003. We expect to incur substantial additional operating losses in the future. The Company has a total accumulated deficit during development stage of approximately \$29.8 million. During the three months ended March 31, 2003, the Company generated revenues from development contracts in the amounts of \$112,000. We cannot assure you that we will continue to generate revenues from operations or achieve profitability in the near future or at all.

n WE NEED SIGNIFICANT FINANCING TO CONTINUE TO DEVELOP AND COMMERCIALIZE OUR TECHNOLOGY. We may not be able to obtain sufficient funds to continue to operate or implement our new business

Table of Contents

plan. We will need to consummate an equity financing transaction during 2003 in order to implement our new business plan. Financing may not be available on terms favorable to us or at all. Even if we do obtain financing, it may result in dilution to our stockholders.

RISKS RELATED TO OUR OPERATIONS

n WE HAVE NOT PRODUCED COMMERCIAL QUANTITIES OF LITHIUM-ION BATTERIES. Our construction of large batteries for national security systems, automotive and stationary power applications requires customized, tailored solutions for each application by each OEM. At present, we operate a pilot production line that produces limited quantities of advanced rechargeable batteries for OEM sampling and initial product runs. To be successful, we must ultimately produce our lithium-ion batteries (i) in large commercial quantities; (ii) at competitive costs; (iii) with appropriate performance characteristics; and (iv) with low failure rates. We currently have no high volume manufacturing capability or experience in large scale manufacturing of our advanced rechargeable batteries. We have limited experience in automated battery assembly and packaging technology. We cannot assure you that we will be able to produce commercial lithium-ion batteries on a timely basis, at an acceptable cost or in the necessary commercial specifications or quantities.

n COMPETITION IN THE RECHARGEABLE BATTERY INDUSTRY IS INTENSE. The rechargeable battery industry consists of major domestic and international companies, many of which have financial, technical, manufacturing, distribution, marketing, sales and other resources substantially greater than ours. We compete against companies producing lithium batteries as well as other primary and rechargeable battery technologies. Further, our competitors may introduce emerging technologies or refine existing technologies which could compete with our products and have a significant negative impact on our business and financial condition.

n MARKET ACCEPTANCE OF OUR BATTERIES IS UNCERTAIN. We cannot assure you that any commercial lithium-ion batteries we are able to produce will achieve market acceptance. Market acceptance will depend on a number of factors, including:

our ability to keep production costs low. Other advanced battery chemistries may be produced at a reduced cost. As we work to reduce the cost of our batteries, we expect that manufacturers of other advanced battery chemistries will do the same.

lithium-ion battery life in high rate applications. While initial testing is promising, it is difficult to predict the life of lithium-ion batteries in high rate applications. If our batteries do not last long enough when used for high rate applications, it is unlikely that there will be market acceptance of our battery products.

timely introductions of new products. Our introduction of new products will be subject to the inherent risks of unforeseen problems and delays. Delays in product availability may negatively affect their market acceptance.

n OUR BATTERY TECHNOLOGY MAY BECOME OBSOLETE. The market for our rechargeable batteries is characterized by changing technology and evolving industry standards, often resulting in product obsolescence or short product lifecycles. Changes in end-user requirements and new products introductions and enhancements by our competitors may also render our technology obsolete. Our success will depend upon our ability to introduce in a timely manner products whose performance will match or better our competitors' products. There can be no assurance that our competitors will not develop technologies or products that would render our technology and products obsolete or less

marketable.

n OUR BUSINESS STRATEGY DEPENDS ON THE CONTINUED GROWTH OF THE LITHIUM BATTERY INDUSTRY. We would be adversely affected if sales of rechargeable lithium batteries do not continue to grow. The growth in sales of rechargeable lithium batteries may be inhibited for any number of reasons, including:

competition from other battery chemistries;

Table of Contents

the failure of large-scale commercial production of lithium battery powered 42-volt systems or HEVs; or

the failure of the markets to accept the use of lithium batteries in large-scale applications, such as energy storage.

n WE MAY NOT BE ABLE TO ACCOMMODATE INCREASED DEMAND FOR OUR BATTERIES. Rapid growth of our business may significantly strain our management, operations and technical resources. If we are successful in obtaining orders for commercial production of our batteries, we will be required to deliver large volumes of quality products to our customers on a timely basis and at a reasonable cost. We cannot assure you that we will obtain commercial scale orders for our batteries or that we will be able to satisfy commercial scale production requirements on a timely and cost-effective basis. As our business grows, we will also be required to continue to improve our operations, management and financial systems and controls. Our failure to manage our growth effectively could have an adverse effect on our ability to produce products and meet the demands of our customers.

n CERTAIN COMPONENTS OF OUR BATTERIES POSE SAFETY RISKS THAT MAY CAUSE ACCIDENTS IN OUR FACILITIES AND IN THE USE OF OUR PRODUCTS. As with any battery, our lithium-ion batteries can short circuit when not handled properly. Due to the high energy and power density of lithium-ion batteries, a short circuit can cause rapid heat buildup. Under extreme circumstances, this could cause a fire. This is most likely to occur during the formation or testing phase of our process. While we incorporate safety procedures in our battery testing lab to minimize safety risks, we cannot assure you that an accident in any part of our facilities where charged batteries are handled will not occur. Any such accident could result in injury to our employees or damage to our facility and would require an internal investigation by our technical staff. Any such injuries, damages or investigations could lead to liability to our company and cause delays in further development and manufacturing of our product which could adversely affect our operations and financial condition.

Our manufacturing process incorporates the use of solvents, some of which are flammable or toxic in high concentrations. Our manufacturing process also incorporates pulverized solids, which can be toxic to employees when allowed to become airborne in high concentrations. We have incorporated safety controls and procedures into our pilot line manufacturing processes designed to maximize the safety of our employees and neighbors. Any related incident, including fire or personnel exposure to toxic substances, could result in significant production delays or claims for damages resulting from injuries, which could adversely affect our operations and financial condition.

n WE MUST COMPLY WITH EXTENSIVE REGULATIONS GOVERNING SHIPMENT OF OUR BATTERIES AND OPERATION OF OUR FACILITY. We are subject to the U.S. Department of Transportation (USDOT) and the International Transport Association (IATA) regulations regarding shipment of lithium-ion batteries. Due to the size of our prototype HEV batteries, a permit is required to transport our lithium batteries from our manufacturing facility. Although similar batteries with other chemistries are routinely shipped from manufacturing facilities to all parts of the world, we cannot assure you that we will not encounter any difficulties in obtaining shipment permits or in complying with new or amended regulations regarding shipment of our products.

All materials that we use must be registered in accordance with the U.S. Toxic Substance Control Act (TSCA) before they can be imported for use in full-scale manufacturing operations. Although the raw material manufacturer is responsible for obtaining TSCA registration for any products that it ships to the U.S., the time required for our suppliers to obtain TSCA registration could delay the commercialization of our products.

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

n WE COULD INCUR SIGNIFICANT COSTS FOR VIOLATIONS OF OR TO COMPLY WITH APPLICABLE ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY LAWS AND REGULATIONS. National, state, local and foreign laws impose various environmental controls on the manufacture, storage, use and disposal of lithium batteries and of certain chemicals used in the manufacture of lithium batteries. Although we believe that our operations are in substantial compliance with current environmental regulations and that there are no environmental conditions that will require material expenditures for clean-up at our facility or at facilities to which we have sent waste for disposal, we cannot assure you that new laws or regulations or changes in existing laws or regulations will not impose costly compliance requirements on us or otherwise subject us to future liabilities. Moreover, foreign, state and local governments may enact additional restrictions relating to the disposal of lithium batteries used by

Table of Contents

our customers which could require us to respond to those restrictions or could negatively affect the demand for those batteries.

As with all employers in the U.S., we must comply with U.S. Occupational and Safety Administration (OSHA) regulations designed for the protection of employees while at the workplace. We must also comply with U.S. Environmental Protection Agency (USEPA) and Pennsylvania Department of Environmental Protection Agency (PADEP) regulations designed to protect the environment from contaminants that can be discharged from manufacturing facilities. We cannot assure you that we will not incur significant expenses or encounter any difficulties in complying with OSHA, USEPA, and PADEP regulations.

n OUR BUSINESS AND GROWTH WILL SUFFER IF WE ARE UNABLE TO RETAIN KEY PERSONNEL. Our success depends in large part upon the services of a number of key employees and senior management. If we lose the services of one or more of our key employees or senior management, it could have a significant negative impact on our business.

n WE CANNOT GUARANTEE THE PROTECTION OF OUR TECHNOLOGY OR PREVENT THE DEVELOPMENT OF SIMILAR TECHNOLOGY BY OUR COMPETITORS. Our success depends on the knowledge, ability, experience and technological expertise of our employees rather than on the legal protection of our patents and other proprietary rights. We claim proprietary rights in various unpatented technologies, know-how, trade secrets and trademarks relating to our products and manufacturing processes. We cannot guarantee the adequacy of protection these claims afford, or that our competitors will not independently develop or patent technologies that are substantially equivalent or superior to our technology. We protect our proprietary rights in our products and operations through contractual obligations, including nondisclosure agreements, with our employees and consultants. We cannot guarantee the adequacy of protection these contractual measures afford.

We have patents issued and patent applications pending in the U.S., Europe and elsewhere. We cannot assure you (i) that patents will be issued from any pending applications, (ii) that the claims allowed under any patents will be sufficiently broad to protect our technology, (iii) that any patents issued to us will not be challenged, invalidated or circumvented, or (iv) as to the adequacy of protection any patents or patent applications afford. If we are found to be infringing upon third party patents, we cannot assure you that we will be able to obtain licenses with respect to such patents on acceptable terms, if at all. Our failure to obtain necessary licenses could lead to costly attempts to design around such patents or delay or even foreclose the development, manufacture or sale of our products.

n WE MAY FACE LIABILITY IF OUR BATTERIES FAIL TO FUNCTION PROPERLY. We maintain liability insurance coverage that we believe is sufficient to protect us against potential claims. We cannot assure you that our liability insurance will continue to be available to us on its current terms or at all, or that such liability insurance will be sufficient to cover any claim or claims.

RISKS ASSOCIATED WITH OUR COMMON STOCK

n WE DO NOT INTEND TO PAY DIVIDENDS ON OUR COMMON STOCK SO STOCKHOLDERS MUST SELL THEIR SHARES AT A PROFIT TO RECOVER THEIR INVESTMENT. We have never declared or paid any cash dividends on our common stock. We intend to retain any future earnings for use in our business and do not anticipate paying cash dividends on our common stock in the foreseeable future. Because we may not pay dividends, our stockholders' return on investment in our common stock will depend on their ability to sell our shares at a profit.

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

n THE MARKET PRICE OF OUR COMMON STOCK MAY BE VOLATILE, WHICH COULD CAUSE THE VALUE OF AN INVESTMENT IN US TO DECLINE. The market price of shares of our common stock has been and is likely to continue to be highly volatile. Factors that may have a significant effect on the market price of our common stock include the following:

our operating results;

our need for additional financing;

Table of Contents

announcements of technological innovations or new commercial products by us or our competitors;

developments in our patent or other proprietary rights or our competitors' developments;

our relationships with current or future collaborative partners;

governmental regulation; and

other factors and events beyond our control.

In addition, the stock market in general has experienced extreme volatility that often has been unrelated to the operating performance of particular companies. These broad market and industry fluctuations may adversely affect the trading price of our common stock, regardless of our actual operating performance.

As a result of potential stock price volatility, investors may be unable to resell their shares of our common stock at or above the cost of their purchase prices. In addition, companies that have experienced volatility in the market price of their stock have been the object of securities class action litigation. If we were to become the subject of securities class action litigation, this could result in substantial costs, a diversion of our management's attention and resources and harm to our business and financial condition.

THE FUTURE SALES OF CURRENTLY OUTSTANDING SHARES OF OUR COMMON STOCK COULD ADVERSELY AFFECT OUR STOCK PRICE. Except for approximately 36.9 million shares of our common stock subject to restrictions on resale pursuant to Rule 144, the outstanding shares of our common stock are eligible for sale in the public market without restriction. The shares issuable upon exercise or conversion of our outstanding warrants, convertible notes and preferred stock will be restricted securities, however, the holders of these securities have registration rights with respect to the common stock issuable upon exercise or conversion of these securities. The market price of our common stock could drop as a result of sales of a large number of shares of our common stock in the market or in response to the perception that these sales could occur.

ARCH HILL CAPITAL IS A CONTROLLING STOCKHOLDER OF LTC AND IS THEREFORE ABLE TO CONTROL THE MANAGEMENT AND POLICIES OF LTC. Arch Hill Capital can also control the outcome of all matters submitted to our stockholders for approval, without the approval of our other stockholders. In addition, Arch Hill Capital controls a majority of the voting power of GAIA Holding and GAIA by virtue of its ownership of a controlling interest in us. Arch Hill Capital can control the vote with respect to the election of all of the directors, amendments to the Certificates of Incorporation or any merger, sale of assets or other significant transactions by any of us, GAIA Holding or GAIA. Accordingly, Arch Hill Capital has an effective veto power over the management and operations of, and corporate transactions by, us, GAIA Holding or GAIA.

ITEM 3. CONTROLS AND PROCEDURES

Within the 90-day period prior to the filing of this report, an evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of our disclosure controls and procedures. Based on that evaluation, the CEO and CFO have concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. Subsequent to the date of their evaluation, there were no significant changes in our internal controls or in other factors that could significantly affect our disclosure controls, including any corrective actions with regard to significant deficiencies and material weaknesses.

CERTIFICATIONS

I, David J. Cade, certify that:

1. I have reviewed this quarterly report on Form 10-QSB of Lithium Technology Corporation;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act rules 13a-14 and 15d-14) for the registrant and have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
- 6.

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
