The exact share prices and effective dates may not be set forth on the tables, in which case:

if the share price is between two share prices in the table or the effective date is between two effective dates in the table, the number of additional shares will be determined by straight-line interpolation between the number of additional shares set forth for the higher and lower share prices and two effective dates, as applicable, based on a 365-day year;

if the share price is in excess of \$500.00 per share, subject to adjustment, no additional shares will be added to the conversion rate; and

if the share price is less than \$127.25 per share, subject to adjustment, no additional shares will be added to the conversion rate.

Notwithstanding the foregoing, in no event will the total number of shares issuable upon conversion of a Note exceed 7.8585 per \$1,000 principal amount of Notes (equivalent to a conversion price of \$127.25), subject to adjustment in the same manner as the conversion rate.
