Protecting Your Privacy Our Pledge to You

THE FUND IS COMMITTED TO YOUR PRIVACY. On this page, you will find the Fund's policies and practices for collecting, disclosing, and safeguarding "nonpublic personal information," which may include financial or other customer information. These policies apply to individuals who purchase Fund shares for personal, family, or household purposes, or have done so in the past. This notification replaces all previous statements of the Fund's consumer privacy policy, and may be amended at any time. We'll keep you informed of changes as required by law.

YOUR ACCOUNT IS PROVIDED IN A SECURE ENVIRONMENT. The Fund maintains physical, electronic and procedural safeguards that comply with federal regulations to guard nonpublic personal information. The Fund's agents and service providers have limited access to customer information based on their role in servicing your account.

THE FUND COLLECTS INFORMATION IN ORDER TO SERVICE AND ADMINISTER YOUR ACCOUNT. The Fund collects a variety of nonpublic personal information, which may include:

- Information we receive from you, such as your name, address, and social security number.
- Information about your transactions with us, such as the purchase or sale of Fund shares.
- Information we receive from agents and service providers, such as proxy voting information.

THE FUND DOES NOT SHARE NONPUBLIC PERSONAL INFORMATION WITH ANYONE, EXCEPT AS PERMITTED BY LAW.

Thank you for this opportunity to serve you.

Dreyfus High Yield Strategies Fund

The Fund

A LETTER FROM THE PRESIDENT OF DREYFUS

Dear Shareholder:

We are pleased to present this semiannual report for Dreyfus High Yield Strategies Fund, covering the six-month period from April 1, 2018 through September 30, 2018. For information about how the fund performed during the reporting period, as well as general market perspectives, we provide a Discussion of Fund Performance on the pages that follow.

Edgar Filing: DREYFUS HIGH YIELD STRATEGIES FUND - Form N-CSRS

The pattern of synchronized growth that had characterized the global economy gave way during the period to a more uneven performance. While the U.S. economy remained strong and Japan rebounded from a weak first quarter, growth in Europe slowed. Overall, global economic activity moderated as the period progressed.

In this environment, returns in global equity markets were mixed. U.S. stocks posted gains, setting new highs along the way despite growing trade tensions and rising interest rates. Earnings remained robust as corporations continued to benefit from the corporate tax cut enacted last year. In addition, stock prices received support from buybacks financed by repatriated profits. Growth stocks outpaced value stocks, and small caps edged out large caps. In contrast to the U.S. market, stocks in other developed markets weakened somewhat, while in emerging markets equities continued to reflect economic fragility, including the currency crises in Turkey and Argentina.

Fixed-income performance was generally muted; a flattening yield curve and rising interest rates led to returns that were largely flat to down in most segments.

We expect robust U.S. growth and healthy earnings to persist over the near term, but with the economic expansion now the second-longest on record, we will continue to monitor the data for any signs of recession. As always, we encourage you to discuss the risks and opportunities of today's investment environment with your financial advisor.

Thank you for your continued confidence and support.

Sincerely,

Renee Laroche-Morris
President
The Dreyfus Corporation
October 15, 2018

2

DISCUSSION OF FUND PERFORMANCE (Unaudited)

For the period from April 1, 2018 through September 30, 2018, as provided by Chris Barris, Kevin Cronk, and Leland Hart, Portfolio Managers

Market and Fund Performance Overview

For the six-month period ended September 30, 2018, Dreyfus High Yield Strategies Fund produced a total return of 4.22% (on a net-asset-value basis) and provided aggregate income dividends of \$0.141 per share.¹ In comparison, the ICE BofA Merrill Lynch U.S. High Yield Master II Constrained Index (the "Index"), the fund's benchmark, achieved a total return of 3.46% for the same period.²

High yield corporate bonds produced moderately positive returns over the reporting period amid solid economic growth and rising corporate earnings. The fund outperformed the Index, primarily due to a relatively short average duration and overweight positioning to CCC and B rated debt.

The Fund's Investment Approach

The fund primarily seeks high current income. The fund also seeks capital growth as a secondary objective, to the extent consistent with its objective of seeking high current income. The fund invests primarily in fixed-income securities of below-investment-grade credit quality. Issuers of below-investment-grade securities may include companies in early stages of development and companies with a highly leveraged financial structure. To compensate investors for taking on greater risk, such companies typically must offer higher yields than those offered by more established or conservatively financed companies. The fund may invest up to 10% of its total assets in floating-rate loans.

Corporate Earnings and Demand Drive High Yield Activity

As the period began, U.S. markets were emerging from volatility caused by inflationary pressures, geopolitical tensions, and concerns regarding U.S. trade policy. Despite these difficulties, high yield bonds rebounded and were energized over most of the reporting period by steady corporate earnings growth, tightening U.S. labor markets, and positive economic data within the U.S. Favorable technicals also supported high yield prices. Supply trailed last year's levels and demand remained high. Strong corporate earnings and a healthy economy continued to spur improvement in the fundamentals of low-quality security issuers, making the bonds increasingly attractive to investors and further driving demand.

In this relatively low-rate environment, investors continue to display yield-seeking behavior, emphasizing lower-quality credits while also maintaining sensitivity to longer duration assets.

Lower-Rated Securities Fared Best

Over the reporting period, the fund's performance was bolstered by its short-duration positioning. Shorter-duration positioning dampened the effects of interest-rate volatility during the period and helped returns. In addition, results were boosted by overweights to CCC and B rated debt. This tilt towards lower-rated debt increased returns as lower-quality securities tended to outperform. In terms of industry positioning, health care sector bonds performed well during the period. A relative overweight in this area was beneficial. An underweight to automotive company debt also helped results. Top-performing credits for

3

DISCUSSION OF FUND PERFORMANCE (Unaudited) (continued)

the period were grocery store chain Albertsons, engineering services company Engility, and pharmaceutical product company Bausch and Lomb.

While there were several individual bonds that performed well, security selection was a minor detractor for the period. Among the top detractors were *Digicel Group*, a Jamaica-based wireless company, and energy companies Sanchez Energy and Alta Mesa Holdings. From a credit-rating perspective, BB holdings also detracted. BBs have higher interest-rate sensitivity than B- and CCC bonds, which provided a headwind during the period due to interest-rate increases. In terms of industry positioning, the portfolio was overweight to the packaging industry, which weighed on performance. An underweight to energy was also negative.

Positioned for Strong Fundamentals and Potential Volatility

We remain optimistic regarding the prospects for high yield bonds. Business fundamentals remain strong and default rates have stayed low. Lower-rated securities are outperforming the broader market. We expect these trends to continue. As such, we remain focused on finding appropriate opportunities with the CCC and B spaces of the market

and remain overweight in these areas in addition to select BB. As volatility reenters the market, we believe that a disciplined, research-intensive approach to security selection may become even more important for investment success going forward.

Given recent increases in interest-rate volatility, we are keeping a keen eye on duration and looking to insulate the portfolio from its effects, where possible. As an example, we continue to look for appropriate investments within bank loans and structured products that offer a floating interest rate, which reduces duration.

October 15, 2018

¹ Total return includes reinvestment of dividends and any capital gains paid, based upon net asset value per share. Past performance is no guarantee of future results. Share price, yield, and investment return fluctuate such that upon redemption, fund shares may be worth more or less than their original cost.

² Source: FactSet — The ICE BofA Merrill Lynch U.S. High Yield Master II Constrained Index contains all securities in the ICE BofA Merrill Lynch U.S. High Yield Index but caps issuer exposure at 2%. Index constituents are capitalization-weighted, based on their current amount outstanding, provided the total allocation to an individual issuer does not exceed 2%. Issuers that exceed the limit are reduced to 2% and the face value of each of their bonds is adjusted on a pro-rata basis. Similarly, the face values of bonds of all other issuers that fall below the 2% cap are increased on a pro-rata basis. In the event there are fewer than 50 issuers in the Index, each is equally weighted and the face values of their respective bonds are increased or decreased on a pro-rata basis. Investors cannot invest directly in any index.

Please note: the position in any security highlighted with italicized typeface was sold during the reporting period.

Bonds are subject generally to interest-rate, credit, liquidity, and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes, and rate increases can cause price declines. High yield bonds are subject to increased credit risk and are considered speculative in terms of the issuer's perceived ability to continue making interest payments on a timely basis and to repay principal upon maturity. The use of leverage may magnify the fund's gains or losses. For derivatives with a leveraging component, adverse changes in the value or level of the underlying asset can result in a loss that is much greater than the original investment in the derivative.

NOTES TO FINANCIAL STATEMENTS (Unaudited)

NOTE 1—Significant Accounting Policies:

Dreyfus High Yield Strategies Fund (the “fund”) is registered under the Investment Company Act of 1940, as amended (the “Act”), as a non-diversified, closed-end management investment company. The fund’s primary investment objective is to seek high current income. Under normal market conditions, the fund invests at least 65% of its total assets in income securities of U.S. issuers rated below investment grade quality or unrated income securities that The Dreyfus Corporation (the “Manager” or “Dreyfus”), a wholly-owned subsidiary of The Bank of New York Mellon Corporation (“BNY Mellon”), serving as the fund’s investment manager and administrator, determines to be of comparable quality. The fund’s Common Stock trades on the New York Stock Exchange (the “NYSE”) under the ticker symbol DHF.

The Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) is the exclusive reference of authoritative U.S. generally accepted accounting principles (“GAAP”) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (“SEC”) under authority of federal laws are also sources of authoritative GAAP for SEC registrants. The fund’s financial statements are prepared in accordance with GAAP, which may require the use of management estimates and assumptions. Actual results could differ from those estimates.

(a) Portfolio valuation: The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price). GAAP establishes a fair value hierarchy that prioritizes the inputs of valuation techniques used to measure fair value. This hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

Additionally, GAAP provides guidance on determining whether the volume and activity in a market has decreased significantly and whether such a decrease in activity results in transactions that are not orderly. GAAP requires enhanced disclosures around valuation inputs and techniques used during annual and interim periods.

Various inputs are used in determining the value of the fund’s investments relating to fair value measurements. These inputs are summarized in the three broad levels listed below:

24

Level 1—unadjusted quoted prices in active markets for identical investments.

Level 2—other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.).

Level 3—significant unobservable inputs (including the fund’s own assumptions in determining the fair value of investments).

Edgar Filing: DREYFUS HIGH YIELD STRATEGIES FUND - Form N-CSRS

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. Valuation techniques used to value the fund's investments are as follows:

Registered investment companies that are not traded on an exchange are valued at their net asset value and are generally categorized within Level 1 of the fair value hierarchy.

Investments in securities, floating rate loan interests and other securities, excluding short-term investments (other than U.S. Treasury Bills), and forward foreign currency exchange contracts ("forward contracts") are valued each business day by an independent pricing service (the "Service") approved by the fund's Board of Trustees (the "Board"). Investments for which quoted bid prices are readily available and are representative of the bid side of the market in the judgment of the Service are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). Other investments (which constitute a majority of the portfolio securities) are valued as determined by the Service, based on methods which include consideration of the following: yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. These securities are generally categorized within Level 2 of the fair value hierarchy.

The Service is engaged under the general supervision of the Board.

When market quotations or official closing prices are not readily available, or are determined not to accurately reflect fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the fund calculates its net asset value, the fund may value these investments at fair value as determined in accordance with the procedures approved by the Board. Certain factors may be considered when fair

25

NOTES TO FINANCIAL STATEMENTS (Unaudited) *(continued)*

valuing investments such as: fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased and sold, and public trading in similar securities of the issuer or comparable issuers. These securities are either categorized within Level 2 or 3 of the fair value hierarchy depending on the relevant inputs used.

For restricted securities where observable inputs are limited, assumptions about market activity and risk are used and such securities are generally categorized within Level 3 of the fair value hierarchy.

Investments denominated in foreign currencies are translated to U.S. dollars at the prevailing rates of exchange.

Forward contracts are valued at the forward rate and are generally categorized within Level 2 of the fair value hierarchy.

The following is a summary of the inputs used as of September 30, 2018 in valuing the fund's investments:

Total

Edgar Filing: DREYFUS HIGH YIELD STRATEGIES FUND - Form N-CSRS

	Level 1– Unadjusted Quoted Prices	Level 2–Other Significant Observable Inputs	Level 3–Significant Unobservable Inputs	
Assets (\$)

[†]See Statement of Investments for additional detailed categorizations.

^{††}Amount shown represents unrealized appreciation (depreciation) at period end.

At September 30, 2018, there were no transfers between levels of the fair value hierarchy. It is the fund's policy to recognize transfers between levels at the end of the reporting period.

26

(b) Foreign currency transactions: The fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in the market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss on investments.

Net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized on securities transactions between trade and settlement date, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities other than investments resulting from changes in exchange rates. Foreign currency gains and losses on foreign currency transactions are also included with net realized and unrealized gain or loss on investments.

(c) Securities transactions and investment income: Securities transactions are recorded on a trade date basis. Realized gains and losses from securities transactions are recorded on the identified cost basis. Dividend income is recognized on the ex-dividend date and interest income, including, where applicable, accretion of discount and amortization of premium on investments, is recognized on the accrual basis.

(d) Affiliated issuers: Investments in other investment companies advised by Dreyfus are considered "affiliated" under the Act.

(e) Risk: The fund invests primarily in debt securities. Failure of an issuer of the debt securities to make timely interest or principal payments, or a decline or the perception of a decline in the credit quality of a debt security, can cause the debt security's price to fall, potentially lowering the fund's share price. High yield ("junk") bonds involve greater credit risk, including the risk of default, than investment grade bonds, and are considered predominantly

speculative with respect to the issuer's continuing ability to make principal and interest payments. In addition, the value of debt securities may decline due to general market conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic conditions, changes in outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment. Such values may also decline because of factors that affect a particular industry.

The fund may invest in collateralized loan obligations ("CLOs"). A CLO is a trust typically collateralized substantially by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior

27

NOTES TO FINANCIAL STATEMENTS (Unaudited) *(continued)*

unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. The cash flows from the trust are split into two or more portions, called tranches, varying in risk and yield. The riskiest portion is the "equity" tranche which is subordinate to the other tranches in the event of defaults from the loans in the trust. Senior tranches typically have higher ratings and lower yields than the CLO's underlying securities and subordinated tranches, and may be rated investment grade. The ratings reflect both the credit quality of underlying collateral as well as how much protection a given tranche is afforded by tranches that are subordinate to it. The fund will not invest in CLO equity tranches.

The risks of an investment in a CLO depend largely on the type of the collateral and the tranche of the CLO in which the fund invests. CLO tranches can experience substantial losses due to actual defaults, increased sensitivity to defaults due to collateral default, market anticipation of defaults, as well as aversion to CLO securities as an asset class. Normally, CLOs are privately offered and sold, and thus, are not registered under the securities laws and may not have an active secondary trading market. As a result, investments in CLOs may be characterized by the fund as illiquid securities. In addition to the normal risks associated with credit-related securities discussed elsewhere in this prospectus (e.g., interest rate risk and default risk), investments in CLOs may be more volatile, less liquid and more difficult to price than other types of investments.

The fund is permitted to invest up to 5% of its assets directly in the common stock of junk bond issuers. This percentage will be in addition to any other common stock holdings acquired as part of warrants or "units", so that the fund's total common stock holdings could exceed 5% at a particular time. However, the fund currently intends to invest directly in common stocks (including those offered in an initial public offering) to gain sector exposure and when suitable junk bonds are not available for sale. The fund expects to sell the common stock promptly when suitable junk bonds are subsequently acquired.

The fund is permitted to invest up to 10% of the fund's total assets in floating rate loans. Unlike publicly-traded common stocks which trade on national exchanges, there is no central market or exchange for loans to trade. Loans trade in an over-the-counter market, and confirmation and settlement, which are effected through standardized procedures and documentation, may take significantly longer than seven days to complete. The secondary market for floating rate loans also may be subject to irregular trading activity and wide bid/ask spreads. The lack of an active trading market for certain floating rate loans may impair the ability of the

28

fund to realize full value in the event of the need to sell a floating rate loan and may make it difficult to value such loans. There may be less readily available, reliable information about certain floating rate loans than is the case for many other types of securities, and the fund's portfolio managers may be required to rely primarily on their own evaluation of a borrower's credit quality rather than on any available independent sources. The value of collateral, if any, securing a floating rate loan can decline, and may be insufficient to meet the issuer's obligations in the event of non-payment of scheduled interest or principal or may be difficult to readily liquidate. In the event of the bankruptcy of a borrower, the fund could experience delays or limitations imposed by bankruptcy or other insolvency laws with respect to its ability to realize the benefits of the collateral securing a loan. The floating rate loans in which the fund invests typically will be below investment grade quality and, like other below investment grade securities, are inherently speculative. As a result, the risks associated with such floating rate loans are similar to the risks of below investment grade securities, although senior loans are typically senior and secured in contrast to other below investment grade securities, which are often subordinated and unsecured. Floating rate loans may not be considered to be "securities" for purposes of the anti-fraud protections of the federal securities laws, including those with respect to the use of material non-public information, so that purchasers, such as the fund, may not have the benefit of these protections.

(f) Dividends and distributions to shareholders: Dividends and distributions are recorded on the ex-dividend date. Dividends from investment income-net are normally declared and paid monthly. Dividends from net realized capital gains, if any, are normally declared and paid annually, but the fund may make distributions on a more frequent basis to comply with the distribution requirements of the Internal Revenue Code of 1986, as amended (the "Code"). To the extent that net realized capital gains can be offset by capital loss carryovers, it is the policy of the fund not to distribute such gains. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP.

Shareholders will have their distributions reinvested in additional shares of the fund, unless such shareholders elect to receive cash, at the lower of the market price or net asset value per share (but not less than 95% of the market price). If market price is equal to or exceeds net asset value, shares will be issued at net asset value. If net asset value exceeds market price, Computershare Inc., the transfer agent, will buy fund shares in the open market and reinvest those shares accordingly.

29

NOTES TO FINANCIAL STATEMENTS (Unaudited) *(continued)*

On September 25, 2018, the Board declared a cash dividend of \$0.0235 per share from undistributed investment income-net, payable on October 24, 2018 to shareholders of record as of the close of business on October 10, 2018. The ex-dividend date was October 9, 2018.

(g) Federal income taxes: It is the policy of the fund to continue to qualify as a regulated investment company, if such qualification is in the best interests of its shareholders, by complying with the applicable provisions of the Code, and to make distributions of taxable income and net realized capital gain sufficient to relieve it from substantially all federal income and excise taxes.

As of and during the period ended September 30, 2018, the fund did not have any liabilities for any uncertain tax positions. The fund recognizes interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statement of Operations. During the period ended September 30, 2018, the fund did not incur any interest or penalties.

Edgar Filing: DREYFUS HIGH YIELD STRATEGIES FUND - Form N-CSRS

Each tax year in the three-year period ended March 31, 2018 remains subject to examination by the Internal Revenue Service and state taxing authorities.

The fund is permitted to carry forward capital losses for an unlimited period. Furthermore, capital loss carryovers retain their character as either short-term or long-term capital losses.

The fund has an unused capital loss carryover of \$30,382,069 available for federal income tax purposes to be applied against future net realized capital gains, if any, realized subsequent to March 31, 2018. The fund has \$7,138,603 of short-term capital losses and \$23,243,466 of long-term capital losses which can be carried forward for an unlimited period.

The tax character of distributions paid to shareholders during the fiscal year ended March 31, 2018 was as follows: ordinary income \$21,376,060. The tax character of current year distributions will be determined at the end of the current fiscal year.

(h) New Accounting Pronouncements: In March 2017, the FASB issued Accounting Standards Update 2017-08, Receivables—Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization On Purchased Callable Debt Securities (“ASU 2017-08”). The update shortens the amortization period for the premium on certain purchased callable debt securities to the earliest call date. ASU 2017-08 will be effective for annual periods beginning after December 15, 2018.

Also in August 2018, the FASB issued Accounting Standards Update 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework—

30

Changes to the Disclosure Requirements for Fair Value Measurement (“ASU 2018-13”). The update provides guidance that eliminates, adds and modifies certain disclosure requirements for fair value measurements. ASU 2018-13 will be effective for annual periods beginning after December 15, 2019. Management is currently assessing the potential impact of these changes to future financial statements.

NOTE 2—Borrowings:

The fund has a \$125,000,000 Revolving Credit and Security Agreement (the “Agreement”), which was renewed until November 20, 2019, subject to certain amendments. Under the terms of the Agreement, the fund may borrow “Advances” (including Eurodollar Rate Advances), on a collateralized basis with certain fund assets used as collateral, which amounted to \$317,204,356 as of September 30, 2018. The interest to be paid by the fund on such Advances is determined with reference to the principal amount of each Advance (and/or Eurodollar Rate Advance) outstanding from time to time. The fund also pays additional fees pursuant to the Agreement. During the period ended September 30, 2018, total expenses pursuant to the Agreement amounted to \$1,662,876.

The average amount of borrowings outstanding under the Agreement during the period ended September 30, 2018 was \$116,000,000 with a related weighted average annualized interest rate of 2.86% and is inclusive of all expenses related to the Agreement.

NOTE 3—Management Fee and Other Transactions with Affiliates:

(a) Pursuant to a management and administration agreement with Dreyfus, the management and administration fee is computed at the annual rate of .75% of the value of the fund’s average weekly total assets minus the sum of accrued

liabilities (other than the aggregate indebtedness constituting financial leverage) (the “Managed Assets”) and is payable monthly.

(b) The fund compensates The Bank of New York Mellon, a subsidiary of BNY Mellon and an affiliate of Dreyfus, under a custody agreement for providing custodial services for the fund. These fees are determined based on net assets and transaction activity. During the period ended September 30, 2018, the fund was charged \$4,437 pursuant to the custody agreement. These fees were partially offset by earnings credits of \$386.

The fund has an arrangement with the custodian whereby the fund may receive earnings credits when positive cash balances are maintained, which are used to offset custody fees. For financial reporting purposes, the fund

31

NOTES TO FINANCIAL STATEMENTS (Unaudited) *(continued)*

includes net earnings credits, if any, as an expense offset in the Statement of Operations.

During the period ended September 30, 2018, the fund was charged \$3,782 for services performed by the Chief Compliance Officer and his staff. These fees are included in Miscellaneous in the Statement of Operations.

The components of “Due to The Dreyfus Corporation and affiliates” in the Statement of Assets and Liabilities consist of: management fees \$223,888, custodian fees \$6,766 and Chief Compliance Officer fees \$1,887.

(c) Each Board member also serves as a Board member of other funds within the Dreyfus complex. Annual retainer fees and attendance fees are allocated to each fund based on net assets.

NOTE 4—Securities Transactions:

The aggregate amount of purchases and sales of investment securities, excluding short-term securities and forward contracts, during the period ended September 30, 2018, amounted to \$107,907,187 and \$109,269,723, respectively.

Derivatives: A derivative is a financial instrument whose performance is derived from the performance of another asset. The fund enters into International Swaps and Derivatives Association, Inc. Master Agreements or similar agreements (collectively, “Master Agreements”) with its over-the-counter (“OTC”) derivative contract counterparties in order to, among other things, reduce its credit risk to counterparties. Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under a Master Agreement, the fund may offset with the counterparty certain derivative financial instrument’s payables and/or receivables with collateral held and/or posted and create one single net payment in the event of default or termination.

Each type of derivative instrument that was held by the fund during the period ended September 30, 2018 is discussed below.

Forward Foreign Currency Exchange Contracts: The fund enters into forward contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to settle foreign currency transactions or as a part of its investment strategy. When executing forward contracts, the fund is obligated to buy or sell a foreign currency at a specified rate on a certain date in the future. With respect to sales of forward contracts, the fund incurs a loss if the value of the contract increases between the date the forward contract is opened and the date the forward contract is closed. The fund realizes a gain if the value of the contract decreases between those dates. With respect to purchases of

forward contracts, the fund incurs a loss if the value of the contract decreases between the date the forward contract is opened and the date the forward contract is closed. The fund realizes a gain if the value of the contract increases between those dates. Any realized or unrealized gains or losses which occurred during the period are reflected in the Statement of Operations. The fund is exposed to foreign currency risk as a result of changes in value of underlying financial instruments. The fund is also exposed to credit risk associated with counterparty nonperformance on these forward contracts, which is generally limited to the unrealized gain on each open contract. This risk may be mitigated by Master Agreements, if any, between the fund and the counterparty and the posting of collateral, if any, by the counterparty to the fund to cover the fund's exposure to the counterparty. Forward Contracts open at September 30, 2018 are set forth in the Statement of Forward Foreign Currency Exchange Contracts.

The provisions of ASC Topic 210 "Disclosures about Offsetting Assets and Liabilities" require disclosure on the offsetting of financial assets and liabilities. These disclosures are required for certain investments, including derivative financial instruments subject to Master Agreements which are eligible for offsetting in the Statement of Assets and Liabilities and require the fund to disclose both gross and net information with respect to such investments. For financial reporting purposes, the fund does not offset derivative assets and derivative liabilities that are subject to Master Agreements in the Statement of Assets and Liabilities.

At September 30, 2018, derivative assets and liabilities (by type) on a gross basis are as follows:

Derivative Financial Instruments:	Assets (\$)	Liabilities (\$)
Forward contracts	220,685	(9,232)
Total gross amount of derivative assets and liabilities in the Statement of Assets and Liabilities	220,685	(9,232)
Derivatives not subject to Master Agreements	-	-
Total gross amount of assets and liabilities subject to Master Agreements	220,685	(9,232)

NOTES TO FINANCIAL STATEMENTS (Unaudited) (continued)

The following tables present derivative assets and liabilities net of amounts available for offsetting under Master Agreements and net of related collateral received or pledged, if any, as of September 30, 2018:

Counterparty	Gross Amount of Assets (\$)	¹	Financial Instruments and Derivatives Available for Offset (\$)	Collateral Received (\$)	Net Amount of Assets (\$)
Barclays Capital	107,585		-	-	107,585
	46,359		(9,232)	-	37,127

Edgar Filing: DREYFUS HIGH YIELD STRATEGIES FUND - Form N-CSRS

Goldman Sachs International				
Morgan Stanley	66,741	-	-	66,741
Total	220,685	(9,232)	-	211,453

Counterparty	Gross Amount of Liabilities (\$)	¹	Financial Instruments and Derivatives Available for Offset (\$)	Collateral Pledged (\$)	Net Amount of Liabilities (\$)
Goldman Sachs International	(9,232)		9,232	-	-

¹ Absent a default event or early termination, OTC derivative assets and liabilities are presented at gross amounts and are not offset in the Statement of Assets and Liabilities.

The following summarizes the average market value of derivatives outstanding during the period ended September 30, 2018:

	Average Market Value (\$)
Forward contracts	20,605,346

At September 30, 2018, accumulated net unrealized appreciation on investments inclusive of derivative contracts was \$5,218,120, consisting of \$7,666,101 gross unrealized appreciation and \$2,447,981 gross unrealized depreciation.

At September 30, 2018, the cost of investments inclusive of derivative contracts for federal income tax purposes was substantially the same as the cost for financial reporting purposes (see the Statement of Investments).
