UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

☒ Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended **June 30, 2014**

or

☐ Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission file number **001-33997**

KANDI TECHNOLOGIES GROUP, INC.

(Exact name of registrant as specified in charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

90-0363723

(I.R.S. Employer Identification No.)

Jinhua City Industrial Zone
Jinhua, Zhejiang Province
People's Republic of China
Post Code 321016

(Address of principal executive offices)

(86 - 579) 82239856

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files)

Yes ☒ No ☐

Edgar Filing: Kandi Technologies Group, Inc. - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☒

Non-accelerated filer ☐ Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ☐ No ☒

As of August 5, 2014, the registrant had issued and outstanding 41,910,287 shares of common stock, par value \$0.001 per share.

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

NOTE 1 - ORGANIZATION AND PRINCIPAL ACTIVITIES

Kandi Technologies Group, Inc. (Kandi Technologies) was incorporated under the laws of the State of Delaware on March 31, 2004. Kandi Technologies changed its name from Stone Mountain Resources, Inc. to Kandi Technologies, Corp. on August 13, 2007. On December 21, 2012, Kandi Technologies changed its name to Kandi Technologies Group, Inc. As used herein, the term the Company means Kandi Technologies and its operating subsidiaries, as described below.

Headquartered in the Jinhua city, Zhejiang Province, China, the Company is one of China's leading producers and manufacturers of electrical vehicles, all-terrain vehicles, go-karts, specialized utility vehicles and a variety of other specialty vehicles for sale in the People's Republic of China (the PRC) and global markets. The Company conducts its primary business operations through its wholly-owned subsidiary, Zhejiang Kandi Vehicles Co., Ltd. (Kandi Vehicles), and the partial and wholly-owned subsidiaries of Kandi Vehicles.

The Company's organizational chart is as follows:

* The box with dotted-line border represents the entity that has ceased operation, pending dissolution.

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

Operating Subsidiaries:

Pursuant to relevant agreements executed in January 2011, Kandi Vehicles is entitled to 100% of the economic benefits, voting rights and residual interests (100% profits and loss absorption rate) of Jinhua Kandi New Energy Vehicles Co., Ltd. (Kandi New Energy), a company in which Kandi Vehicles has a 50% interest. Kandi New Energy was established in accordance with relevant Chinese government regulations on automobile manufacturing enterprises, which prohibit foreign ownership of greater than 50%. Kandi New Energy currently holds vehicle production rights (license) on manufacturing Kandi brand electric utility vehicles (Special-purpose Vehicles) and production rights (license) on manufacturing battery packs used in Kandi brand EVs. Kandi New Energy supplies battery packs for Kandi brand electrical vehicles (EVs).

Jinhua Three Parties New Energy Vehicles Service Co., Ltd. (Jinhua Service) was formed as a joint venture, by and among our wholly-owned subsidiary, Kandi Vehicles, the State Grid Power Corporation and Tianneng Power International. The Company, indirectly through Kandi Vehicles, has a 30% ownership interest in Jinhua Service. As of June 30, 2014, Jinhua Service ceased its operations and will be dissolved. Jinhua Services was established in order to public charging stations for lead-acid batteries for EVs in Jinhua city. Currently, most of EV customers in Jinhua have the ability to charge their EVs by themselves. Since self-charging is more cost-effective for customers and most of its customers have switched to self-charging, Jinhua Service ceased its operations and will be dissolved.

In April 2012, pursuant to a share exchange agreement, the Company acquired 100% of Yongkang Scrou Electric Co, Ltd. (Yongkang Scrou), a manufacturer of automobile and electric vehicle parts. Yongkang Scrou currently manufactures and sells EV drive motors, EV controllers, air conditioners and other electrical products to the JV Company.

In March 2013, pursuant to a joint venture agreement (the JV Agreement) entered into between Kandi Vehicles and Shanghai Maple Guorun Automobile Co., Ltd. (Shanghai Guorun), a 99%-owned subsidiary of Geely Automobile Holdings Ltd. (Geely), the parties established Zhejiang Kandi Electric Vehicles Co., Ltd. (the JV Company) to develop, manufacture and sell EVs and related auto parts. Each of Kandi Vehicles and Shanghai Guorun has a 50% ownership interest in the JV Company. In March 2014, the JV Company changed its name to Kandi Electric Vehicles Group Co., Ltd. At present, the JV Company is a holding company with products that are manufactured by its subsidiaries.

In March 2013, Kandi Vehicles formed Kandi Electric Vehicles (Changxing) Co., Ltd. (Kandi Changxing) in the Changxing (National) Economic and Technological Development Zone. Kandi Changxing is engaged in the production of EVs. In fourth quarter of 2013, Kandi Vehicles entered into an ownership transfer agreement with JV Company pursuant to which Kandi Vehicles transferred 100% of its ownership in Kandi Changxing to the JV Company. The Company, indirectly through its 50% ownership interest in the JV Company, has a 50% economic interest in Kandi Changxing.

In April 2013, Kandi Electric Vehicles (Wanning) Co., Ltd. (Kandi Wanning) was formed in Wanning City of Hainan Province by Kandi Vehicles and Kandi New Energy. Kandi Vehicles has a 90% ownership in Kandi Wanning, and Kandi New Energy has the remaining 10% interest. However, by contract, Kandi Vehicles is, effectively, entitled to 100% of the economic benefits, voting rights and residual interests (100% profits and losses) of Kandi Wanning. Hainan Province is planned as an international tourism island by the Chinese government and there is a high possibility that all non-EV vehicles will be banned from use within the province. Therefore, the Company believes EV business has a great potential for growth in Hainan province. To capture this opportunity, the Company signed an

agreement with Wanning city government and invest a total of RMB 1 billion to develop a factory in Wanning with an annual production of 100,000 EV products. Currently, Kandi Wanning is planning to launch its trial production by 2015. According to the JV Agreement, once it becomes fully operational, the entire equity interests of Kandi Wanning will be transferred to the JV Company.

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

In July 2013, Zhejiang ZuoZhongYou Electric Vehicle Service Co., Ltd. (the Service Company) was formed. The Service Company is engaged in various pure EV leasing business. The JV Company has a 19% ownership interest in the Service Company. The Company, indirectly through its 50% ownership interest in the JV Company, has a 9.5% economic interest in the Service Company.

In November 2013, Zhejiang Kandi Electric Vehicles Jinhua Co., Ltd. (Kandi Jinhua) was formed by the JV Company. The JV Company has 100% ownership interest in Kandi Jinhua, and the Company, indirectly through its 50% ownership interest in the JV Company, has a 50% economic interest in Kandi Jinhua. According to the terms of the JV Agreement, except the JV Company and its subsidiaries, Kandi Vehicle and its subsidiaries are not allowed to manufacture pure EVs. However, Kandi New Energy holds the production rights (license) on manufacturing of Special-purpose Vehicles. Therefore, it is necessary to establish Kandi Jinhua, which is in charge of the Special-purpose vehicle business and entitles to use Kandi New Energy's Special-purpose Vehicle production rights (license).

In November 2013, Zhejiang JiHeKang Electric Vehicle Sales Co., Ltd. (JiHeKang) was formed by the JV Company and is engaged in car sales business. The JV Company has 100% ownership interest in JiHeKang, and the Company, indirectly through its 50% ownership interest in the JV Company, has a 50% economic interest in JiHeKang.

In December 2013, the JV Company entered into an ownership transfer agreement with Shanghai Guorun pursuant to which the JV Company acquired 100% ownership of Kandi Electric Vehicles (Shanghai) Co., Ltd. (Kandi Shanghai). As a result, Kandi Shanghai is a wholly-owned subsidiary of the JV Company, and the Company, indirectly through its 50% ownership interest in the JV Company, has a 50% economic interest in Kandi Shanghai. In January 2014, Zhejiang Kandi Electric Vehicles Jiangsu Co., Ltd. (Kandi Jiangsu) was formed by the JV Company. The JV Company has 100% ownership interest in Kandi Jiangsu, and the Company, indirectly through its 50% ownership interest in the JV Company, has a 50% economic interest in Kandi Jiangsu.

The Company's primary business operations are the design, development, manufacturing and commercialization of EV products, all-terrain vehicles (ATVs), go-karts, and other related specialized automobiles. As part of its strategic objective to become a leader in EV products manufacturing and related services, the Company has increased its focus on fuel efficient, pure EV products with a particular emphasis on expanding its market share in China.

NOTE 2 LIQUIDITY

As of June 30, 2014, the Company's working capital surplus was \$28,708,114.

As of June 30, 2014, the amount of advances to suppliers was \$52,841,904, which included the advance of RMB 323 million or approximately \$52,454,650 for a prepayment by Kandi Wanning to an equipment supplier - Nanjing Shangdong Auto Technologies Co., Ltd. (Nanjing Shangdong) for equipment purchases. The equipment will be purchased and delivered according to the construction schedule and development of Kandi Wanning. This advance will be used to offset the equipment purchase price upon delivery.

As of June 30, 2014, the Company had credit lines from commercial banks of \$53,266,642, of which \$33,778,846 was used as of June 30, 2014.

The Company believes that its cash flows generated internally may not be sufficient to support the growth of future operations and to repay short-term bank loans for the next twelve (12) months, if needed. However, the Company

believes its access to existing financing sources and established relationships with PRC banks will enable it to meet its obligations and fund its ongoing operations.

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

The Company has historically financed its operations through short-term commercial bank loans from PRC banks. The term of these loans is typically for one year, and upon the payment of all outstanding principal and interest in a particular loan, the banks have typically rolled over the loan for an additional one-year terms, with adjustments made to the interest rate to reflect prevailing market rates. The Company believes this situation has not changed and that short-term bank loans will be available on normal trade terms if needed.

On March 24, 2014, the Company raised approximately \$11.05 million from the sale to two institutional investors of an aggregate of 606,000 shares of its common stock at a price of \$18.24 per share. As part of the transaction, the Company also issued to the investors warrants for the purchase of up to 90,900 shares of common stock at an exercise price of \$22.80 per share, which warrants have a term of 18 months from the date of issuance.

NOTE 3 - BASIS OF PRESENTATION

The Company maintains its general ledger and journals with the accrual method accounting for financial reporting purposes. The financial statements and notes are representations of management. Accounting policies adopted by the Company conform to generally accepted accounting principles in the United States and have been consistently applied in the presentation of financial statements.

The financial information included herein for the three-month and six-month periods ended June 30, 2014 and 2013 is unaudited; however, such information reflects all adjustments, consisting of normal recurring adjustments, that are, in the opinion of management, necessary for a fair presentation of the Company's condensed consolidated financial statements for these interim periods.

The results of operations for the three-month and six-month periods ended June 30, 2014 are not necessarily indicative of the results expected for the entire fiscal year ending December 31, 2014.

NOTE 4 PRINCIPLES OF CONSOLIDATION

The consolidated financial statements reflect the accounts of the Company and its ownership interest in following subsidiaries:

- (i) Continental Development Limited. (Continental) (a wholly-owned subsidiary of the Company)
- (ii) Zhejiang Kandi Vehicles Co., Ltd. (Kandi Vehicles) (a wholly-owned subsidiary of Continental)
- (iii) Jinhua Kandi New Energy Vehicles Co., Ltd. (Kandi New Energy) (a 50% owned subsidiary of Kandi Vehicles. Pursuant to relevant agreements executed in January 2011, Kandi Vehicles is entitled to 100% of the economic benefits, voting rights and residual interests of Kandi New Energy)
- (iv) Yongkang Scrou Electric. Co., Ltd (Yongkang Scrou) (a wholly-owned subsidiary of Kandi Vehicles)
- (v) Kandi Electric Vehicles (Wanning) Co., Ltd. (Kandi Wanning) (a subsidiary 10% owned by Kandi New Energy and 90% owned by Kandi Vehicles)

All inter-company accounts and transactions have been eliminated in consolidation.

Equity Method Investees

The consolidated net income also includes the Company's proportionate share of the net income or loss of its equity method investees.

- (vi) Zhejiang Kandi Electric Vehicles Co., Ltd. (the "JV Company") (a 50% owned subsidiary of Kandi Vehicles)

All intra-entity profits and losses with the Company's equity method investees have been eliminated.

NOTE 5 USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenue and expenses during the reporting period. Management makes these estimates using the best information available at the time the estimates are made; however actual results when ultimately realized could differ from those estimates.

NOTE 6 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Economic and Political Risks

The Company's operations are conducted in the PRC. As a result, the Company's business, financial condition and results of operations may be influenced by the political, economic and legal environments in the PRC, and by the general state of the PRC economy. In addition, the Company's earnings are subject to movements in foreign currency exchange rates when transactions are denominated in Renminbi (RMB), which is the Company's functional currency. Accordingly, the Company's operating results are affected by changes in the exchange rate between the U.S. dollar and the RMB.

The Company's operations in the PRC are subject to special considerations and significant risks not typically associated with companies in North America and Western Europe. These include risks associated with, among others, the political, economic and legal environment and foreign currency exchange. The Company's performance may be adversely affected by changes in the political and social conditions in the PRC, and by changes in governmental policies with respect to laws and regulations, anti-inflationary measures, currency conversion, remittances abroad, and rates and methods of taxation, among other things.

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

(b) Fair Value of Financial Instruments

ASC 820 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. The hierarchy prioritizes the inputs into three levels based on the extent to which inputs used in measuring fair value are observable in the market.

These tiers include:

- Level 1 defined as observable inputs such as quoted prices in active markets;
- Level 2 defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and
- Level 3 defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

As of June 30, 2014, the Company's assets, measured at fair value, on a recurring basis, subject to the disclosure requirements of ASC 820, were as follows:

	Fair Value Measurements at Reporting Date Using Quoted Prices in Carrying Value as of June 30, 2014	Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Cash and cash equivalents	\$ 11,287,620	\$ 11,287,620	-	-
Warrants	13,749,338	-	-	13,749,338

Cash and cash equivalents consist primarily of highly-rated money market funds at a variety of well-known institutions with original maturities of three months or less. Restricted cash represents time deposits on account, some of which are used to secure short-term bank loans and notes payable. The original cost of these assets approximates fair value due to their short term maturity.

Warrants, which are accounted as liabilities, are treated as derivative instruments, which will be measured at each reporting date for their fair value using Level 3 inputs. Also see Note 6 (t).

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

(c) Cash and Cash Equivalents

The Company considers highly-liquid investments purchased with original maturities of three months or less to be cash equivalents.

Restricted cash, as of June 30, 2014 and December 31, 2013, represented time deposits on account, some of which were used to secure short-term bank loans and notes payable. As of June 30, 2014, the Company's restricted cash was \$0.

(d) Inventories

Inventories are stated at the lower of cost or net realizable value (market value). The cost of raw materials is determined on the basis of weighted average. The cost of finished goods is determined on the weighted average basis and comprises direct materials, direct labor and an appropriate proportion of overhead.

Net realizable value is based on estimated selling prices less any further costs expected to be incurred for completion and selling expense. Adjustments to reduce the cost of inventory to its net realizable value are made, if required, for estimated excess, obsolescence, or impaired balances.

(e) Accounts Receivable

Accounts receivable are recognized and carried at net realizable value. An allowance for doubtful accounts is recorded in periods in which the Company determines a loss is probable, based on its assessment of specific factors, such as troubled collections, historical experience, accounts aging, ongoing business relations and other factors. Accounts are written off after an exhaustive collection effort. If accounts receivable are to be provided for, or written off, they are recognized in the consolidated statement of operations within the operating expenses line item. As of June 30, 2014 and December 31, 2013, the Company had no allowance for doubtful accounts, as per the management's judgment based on their best knowledge.

As of June 30, 2014 and December 31, 2013, the credit terms with the Company's customers were typically 90 to 120 days after delivery.

(f) Note receivable

Notes receivable represent short-term loans to third parties with the maximum term of one year. Interest income will be recognized according to each agreement between a borrower and the Company on an accrual basis. If notes receivable are paid back, or written off, that transaction will be recognized in the relevant year if the loan default is probable, reasonably assured and the loss can be reasonably estimated. The Company will recognize income if the written-off loan is recovered at a future date. In case of any foreclosure proceedings or legal actions being taken, the Company will provide an accrual for the related foreclosure expenses and related litigation expenses.

(g) Prepayments

Prepayments represent cash paid in advance to suppliers. As of June 30, 2014, prepayments included advances to raw material suppliers, mold manufacturers, and suppliers of equipment.

Advances for raw materials purchases typically are settled within two months by the Company's receipt of raw materials. Prepayment will be offset against purchase amount after equipment is delivered.

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

(h) Plant and Equipment

Plant and equipment are carried at cost less accumulated depreciation. Depreciation is provided over the assets estimated useful lives, using the straight-line method. Leasehold improvements are amortized over the life of the asset or the term of the lease, whichever is shorter. Estimated useful lives are as follows:

Buildings	30 years
Machinery and equipment	10 years
Office equipment	5 years
Motor vehicles	5 years
Molds	5 years

The cost and related accumulated depreciation of assets sold or otherwise retired are eliminated from the accounts and any gain or loss is included in the statement of income. The cost of maintenance and repairs is charged to expense as incurred, whereas significant renewals and betterments are capitalized.

(i) Construction in Progress

Construction in progress represents the direct costs of construction, the acquisition cost of buildings or machinery and design fees. Capitalization of these costs ceases, and the construction in progress is transferred to plant and equipment, when substantially all the activities necessary to prepare the assets for their intended use are completed. No depreciation is provided until the assets are completed and ready for their intended use.

(j) Land Use Rights

According to Chinese laws, land in the PRC is owned by the government and land ownership rights cannot be sold to an individual or to a private company. However, the government grants the user a land use right to use the land. The land use rights granted to the Company are being amortized using the straight-line method over the term of fifty years.

(k) Accounting for the Impairment of Long-Lived Assets

The Company periodically evaluates the carrying value of long-lived assets to be held and used, including intangible assets subject to amortization, when events and circumstances warrant such a review, pursuant to the guidelines established in Statement of Financial Accounting Standards (SFAS) No. 144 (now known as ASC 360). The carrying value of a long-lived asset is considered impaired when the anticipated undiscounted cash flow from such asset is separately identifiable and is less than its carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived asset. Fair market value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved. Losses on long-lived assets to be disposed of are determined in a similar manner, except that fair market values are reduced for the cost to dispose.

During the reporting period, no impairment loss was recognized.

(l) Revenue Recognition

Revenue represents the invoiced value of goods sold. Revenue is recognized when the Company ships the goods to its customers and all of the following criteria are met:

- Persuasive evidence of an arrangement exists;
- Delivery has occurred or services have been rendered;
- The seller's price to the buyer is fixed or determinable; and
- Collectability is reasonably assured.

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

When the products are transferred to the other party while the risks are transferred to it, and at that time the Company recognizes revenue.

(m) Research and Development

Expenditures relating to the development of new products and processes, including significant improvements to existing products, are expensed as incurred. Research and development expenses were \$971,673 and \$672,491 for the three months ended June 30, 2014 and 2013, respectively. Research and development expenses were \$2,143,930 and \$1,362,156 for the six months ended June 30, 2014 and 2013, respectively.

(n) Government Grant

Grants and subsidies received from the PRC Government are recognized when the proceeds are received or collectible.

For the three and six months ended June 30, 2014 and 2013, \$153,700 and \$49,807, respectively, was received by Kandi Vehicle from the PRC government.

(o) Income Taxes

The Company accounts for income tax using an asset and liability approach, which allows for the recognition of deferred tax benefits in future years. Under the asset and liability approach, deferred taxes are provided for the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The accounting for deferred tax calculation represents the management's best estimate on the most likely future tax consequences of events that have been recognized in our financial statements or tax returns and related future anticipation. A valuation allowance is provided for deferred tax assets if it is more likely than not these items will either expire before the Company is able to realize their benefits, or that future realization is uncertain.

(p) Foreign Currency Translation

The accompanying consolidated financial statements are presented in United States dollars. The functional currency of the Company is the Renminbi (RMB). Capital accounts of the consolidated financial statements are translated into United States dollars from RMB at their historical exchange rates when the capital transactions occurred.

Assets and liabilities are translated at the exchange rates as of balance sheet date. Income and expenditures are translated at the average exchange rate of the reporting period, which rates are obtained from the website: <http://www.oanda.com>

	June 30, 2014	December 31, 2013	June 30, 2013
Period end RMB : USD exchange rate	6.1577	6.1140	6.1882
Average RMB : USD exchange rate	6.1441	6.1982	6.2479

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

(q) Comprehensive Income

Comprehensive income is defined to include all changes in equity except those resulting from investments by owners and distributions to owners. Among other disclosures, all items that are required to be recognized under current accounting standards as components of comprehensive income are required to be reported in a financial statement that is presented with the same prominence as other financial statements. Comprehensive income includes net income and the foreign currency translation changes.

(r) Segments

In accordance with ASC 280-10, *Segment Reporting* (ASC 280-10), the Company's chief operating decision makers rely upon consolidated results of operations when making decisions about allocating resources and assessing performance of the Company. As a result of the assessment made by the chief operating decision makers, the Company has only one single operating segment. The Company does not distinguish between markets or segments for the purpose of internal reporting.

(s) Stock Option Cost

The Company's stock option cost is recorded in accordance with ASC 718 and ASC 505.

The fair value of stock options is estimated using the Black-Scholes-Merton model. The Company's expected volatility assumption is based on the historical volatility of the Company's common stock. The expected life assumption is primarily based on the expiration date of the option. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

Stock option expense recognized is based on awards expected to vest, and there were no estimated forfeitures. ASC standards require forfeitures to be estimated at the time of grant and revised in subsequent periods, if necessary, if actual forfeitures differ from those estimates.

The stock-based option expense for the three and six months ended June 30, 2014 was \$0. See Note 18.

(t) Warrant Cost

The Company's warrant costs are recorded in liabilities and equities, respectively, in accordance with ASC 480, ASC 505 and ASC 815.

The fair value of a warrant, which is classified as a liability, is estimated using the Black-Scholes-Merton model and the lattice valuation model. The Company's expected volatility assumption is based on the historical volatility of the Company's common stock. The expected life assumption is primarily based on the expiration date of the warrant. The risk-free interest rate for the expected term of the warrant is based on the U.S. Treasury yield curve in effect at the time of measurement. The warrants, which are freestanding derivatives and are classified as liabilities on the balance sheet, will be measured at fair value on each reporting date, with decreases in fair value recognized in earnings and increases in fair values were recognized in expenses.

The fair value of equity-based warrants, which are not considered derivatives under ASC 815, is estimated using the Black-Scholes-Merton model. The Company's expected volatility assumption is based on the historical volatility of the

Company's common stock. The expected life assumption is primarily based on the expiration date of the warrant. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

(u) Goodwill

The Company allocates goodwill to reporting units based on the reporting unit expected to benefit from the business combination. The Company evaluates its reporting units on an annual basis and, if necessary, reassigns goodwill using a relative fair value allocation approach. Goodwill is tested for impairment at the reporting unit level on an annual basis and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. These events or circumstances could include a significant change in the business climate, legal factors, operating performance indicators, competition, or sale or disposition of a significant portion of a reporting unit.

Application of the goodwill impairment test requires judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units, assignment of goodwill to reporting units, and determination of the fair value of each reporting unit. The Company first assesses qualitative factors to determine whether it is more likely than not that goodwill is impaired. If the more likely than not threshold is met, the Company performs a quantitative impairment test. As of June 30, 2014, the Company determined that goodwill was not impaired.

(v) Intangible assets

Intangible assets consist of tradenames and customer relations associated with the purchase price allocation of Yongkang Scrou. Such assets are being amortized over their estimated useful lives of 9.7 years. Intangible assets are amortized as of June 30, 2014.

NOTE 7 NEW ACCOUNTING PRONOUNCEMENTS

Recent Accounting Pronouncements

The FASB has issued Accounting Standards Update (ASU) No. 2014-07, Applying Variable Interest Entities Guidance to Common Control Leasing Arrangements. The guidance addresses the consolidation of lessors in certain common control leasing arrangements and is based on a consensus reached by the Private Company Council (PCC). Under current U.S. GAAP, a company is required to consolidate an entity in which it has a controlling financial interest. The assessment of controlling financial interest is performed under either: (a) a voting interest model; or (b) a variable interest entity model. In a variable interest entity model, the company has a controlling financial interest when it has: (a) the power to direct the activities that most significantly affect the economic performance of the entity; and (b) the obligation to absorb losses or the right to receive benefits of the entity that could be potentially significant to the entity. To determine which model applies, a company preparing financial statements must first determine whether it has a variable interest in the entity being evaluated for consolidation and whether that entity is a variable interest entity. The new guidance allows a private company to elect (when certain conditions exist) not to apply the variable interest entity guidance to a lessor under common control. Instead, the private company would make certain disclosures about the lessor and the leasing arrangement.

Under the amendments in this ASU, a private company lessee could elect an alternative not to apply variable interest entity guidance to a lessor when: -The private company lessee and the lessor are under common control; -The private company lessee has a leasing arrangement with the lessor; -Substantially all of the activity between the private company lessee and the lessor is related to the leasing activities (including supporting leasing activities) between those two companies, and -If the private company lessee explicitly guarantees or provides collateral for any obligation of the lessor related to the asset leased by the private company, then the principal amount of the obligation at inception does

not exceed the value of the asset leased by the private company from the lessor. If elected, the accounting alternative should be applied to all leasing arrangements meeting the above conditions. The alternative should be applied retrospectively to all periods presented, and is effective for annual periods beginning after December 15, 2014, and interim periods within annual periods beginning after December 15, 2015. Early application is permitted for all financial statements that have not yet been made available for issuance.

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

The FASB has issued Accounting Standards Update (ASU) No. 2014-08, Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity. The amendments in the ASU change the criteria for reporting discontinued operations while enhancing disclosures in this area. It also addresses sources of confusion and inconsistent application related to financial reporting of discontinued operations guidance in U.S. GAAP. Under the new guidance, only disposals representing a strategic shift in operations should be presented as discontinued operations. Those strategic shifts should have a major effect on the organization's operations and financial results. Examples include a disposal of a major geographic area, a major line of business, or a major equity method investment. In addition, the new guidance requires expanded disclosures about discontinued operations that will provide financial statement users with more information about the assets, liabilities, income, and expenses of discontinued operations. The new guidance also requires disclosure of the pre-tax income attributable to a disposal of a significant part of an organization that does not qualify for discontinued operations reporting. This disclosure will provide users with information about the ongoing trends in a reporting organization's results from continuing operations. The amendments in this ASU enhance convergence between U.S. GAAP and International Financial Reporting Standards (IFRS). Part of the new definition of discontinued operation is based on elements of the definition of discontinued operations in IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations. The Company does not expect the adoption of 2014-08 to have a material effect on its operating results or financial position. Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on the Company's financial statements upon adoption.

NOTE 8 CONCENTRATIONS

(a) Customers

For the six-month period ended June 30, 2014, the Company's major customers, each of whom accounted for more than 10% of the Company's consolidated revenue, were as follows:

NOTE 9 EARNINGS (LOSS) PER SHARE

The Company calculates earnings per share in accordance with ASC 260, *Earnings Per Share*, which requires a dual presentation of basic and diluted earnings per share. Basic earnings per share are computed using the weighted average number of shares outstanding during the reporting period. Diluted earnings per share represents basic earnings per share adjusted to include the potentially dilutive effect of outstanding stock options, warrants and convertible notes (using the if-converted method). For the three months ended June 30, 2014 and 2013, the number of potentially dilutive common shares was 112,161 and 0, respectively. For the six months ended June 30, 2014 and 2013, the number of potentially dilutive common shares was 124,898 and 249,164, respectively.

The following is the calculation of earnings per share:

Edgar Filing: Kandi Technologies Group, Inc. - Form 10-Q

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

Interest expense for the three months ended June 30, 2014 and 2013 was \$590,979 and \$572,862, respectively, and for the six months ended June 30, 2014 and 2013 was \$1,169,626, and \$1,125,792, respectively.

As of June 30, 2014, the aggregate amount of short-term loans that was guaranteed by various third parties was \$27,282,914.

- \$12,667,067 was guaranteed by Zhejiang Mengdeli Electric Co Ltd (ZMEC).
- \$8,119,915, was guaranteed by Zhejiang Kangli Metal Manufacturing Company, whose bank loan of \$4,871,949 was guaranteed by the Company. Also see Note 23. \$3,247,966 of the \$8,119,915 was guaranteed by Lv Qingjiang and Lv Qingbo, two major shareholders of Zhejiang Kangli Metal Manufacturing Company. Also see Note 23.
- \$3,247,966 was guaranteed by Zhejiang Shuguang industrial Co., Ltd., whose bank loan of \$4,871, 949 was guaranteed by the Company. Also see Note 23.
- \$17,539,016 was guaranteed by Nanlong Group Co., Ltd., whose bank loans of \$9,743,898 was also guaranteed by the Company. Also see Note 23.
- \$811,991 was guaranteed by Yonnkang Sanli Metal Co., Ltd.

It is a common business practice among companies in the region of the PRC in which the Company is located to exchange guarantees for bank debt with no additional consideration given. It is considered a favor for favor business practice and is commonly required by Chinese lending banks, as in these cases.

NOTE 15 NOTES PAYABLE

By issuing bank note payables rather than paying cash to suppliers, the Company can defer the payments until the date the bank note payable is due. Simultaneously, the Company is required to deposit restricted cash in banks to back up the bank note payable. The restricted cash deposited in banks will generate interest income.

Notes payable are summarized as follows:

	June 30,2014 (Unaudited)	December 31, 2013
Bank acceptance notes:		
Due March 18, 2014	\$ -	\$ 1,962,709

(UNAUDITED)**

All of the bank acceptance notes do not bear interest, but are subject to bank charges of 0.05% of the principal as a commission on each transaction. Bank charges for notes payable were \$6,510 and \$13,765 for the three months ended June 30, 2014 and 2013, and were \$6,510 and \$13,765 for the six months ended June 30, 2014 and 2013.

No restricted cash was held as collateral for the notes payable as of June 30, 2014 and December 31, 2013.

NOTE 16 BOND PAYABLE

Due Date	Face Value	Coupon rate	Interest record date	Interest pay date
December 27, 2016	\$ 12,991,864	11.5%	December 27	December 27

Total face value	\$ 12,991,864
------------------	---------------

On December 27, 2013, the Company issued bonds in the aggregate principal amount of RMB 80,000,000 to China Ever-bright Securities Co. Ltd. and CITIC Securities Company Limited. The bonds mature in 3 years, and the interest rate is 11.5% per annum. Bond interest is payable on December 27 in each of 2014, 2015 and 2016.

NOTE 17 TAX

(a) Corporation Income Tax (CIT)

In accordance with the relevant tax laws and regulations of the PRC, the applicable CIT rate is 25%. However, Kandi Vehicle is qualified as a high technology company in the PRC and is entitled to pay a reduced income tax rate of 15%.

Kandi New Energy is a subsidiary of the Company and its applicable CIT rate is 25%. Yongkang Scrou is a subsidiary of the Company and its applicable CIT rate was 25%. Kandi Wanning is a subsidiary of the Company and its applicable CIT rate is 25%.

The Company has a 50% ownership interest in the JV Company and the JV Company, including each of its subsidiaries applicable CIT rate is 25%.

Kandi Vehicle qualifies as a high technology company in the PRC and is entitled to pay CIT at the reduced rate of 15%. However, as the tax policy in the PRC does not allow double tax benefits, the Company's high technology tax benefit of 10% must be reduced by the research and development tax benefits to which the Company also is entitled, which amount to 25% of an amount equal to 50% of allowable research and development expenses. For the six months ended June 30, 2014, the Company's CIT before reduction for the Company's high technology tax benefit was \$42,822, or 25% of the Company's \$171,287 taxable income for such period which reduced to \$0 after giving effect to the Company's research and development tax credit of \$42,822 was 7.32% of 50% of \$1,169,395 allowable research and development expenses) for such period. To comply with the PRC policy prohibiting double tax benefits, the Company's high technology tax benefit for the six months ended June 30, 2014 was reduced from 10% of the Company's attributed taxable income for such period, of such taxable income. Since the R&D tax credit is not refundable, the maximum R&D tax credit allowance was limited to the maximum tax due, which was \$42,822 for the six months ended June 30, 2014. The un-utilized portion of R&D tax credit will be carried forward to the next period upon fully deducted. As a result, the Company's effective income tax rate for the six months ended June 30, 2014 was 0% after the research and development credit and high technology tax reduction.

According to the PRC CIT reporting system, the CIT sales cut-off base is concurrent with the value-added tax (VAT), which will be reported to the State Administration of Taxation (SAT) on a quarterly basis. Since the VAT and CIT are accounted for on a VAT tax basis that recorded all sales on a State provided official invoices reporting system, the Company is reporting the CIT according to the SAT prescribed tax reporting rules. Under the VAT tax reporting system, sales cut-off is not done on an accrual basis but rather on a VAT taxable reporting basis. Therefore, when the Company adopted U.S. GAAP using an accrual basis, the sales cut-off CIT timing (due to the VAT reporting system) created a temporary sales cut-off timing difference. This difference is reflected in the deferred tax assets or liabilities calculations on the income tax estimate reported in the Company's Annual Report on Form 10-K.

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

Effective January 1, 2007, the Company adopted ASC 740, *Income Taxes*. The interpretation addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements.

Under ASC 740, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement. ASC 740 also provides guidance on de-recognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures.

As of June 30, 2014, the Company did not have a liability for unrecognized tax benefits. The Company files income tax returns to the U.S. Internal Revenue Services (IRS) and to states in which the Company has operations. The Company is subject to U.S. federal or state income tax examinations by the IRS and relevant state tax authorities for years after 2006. During the periods open to examination, the Company had net operating loss carry forwards (NOLs) for U.S. federal and state tax purposes that have attributes from closed periods. Since these NOLs may be utilized in future periods, they remain subject to examination. The Company also files certain tax returns in the PRC. As of June 30, 2014, the Company was not aware of any pending income tax examinations by the PRC tax authorities. The Company's policy is to record interest and penalties on uncertain tax provisions as income tax expense. As of June 30, 2014, the Company had no accrued interest or penalties related to uncertain tax positions. The Company has not recorded a provision for U.S. federal income tax for the six months ended June 30, 2013 due to the net operating loss carry forward in the United States.

Income tax expense (benefit) for the six months ended June 30, 2014 and 2013 is summarized as follows:

	For the Six Months Ended	
	June 30,	
	(Unaudited)	
	2014	2013
Current:		
Provision for CIT	\$ 556,135	\$ 244,901
Provision for Federal Income Tax	-	-
Deferred:		
Provision for CIT	-	-
Income tax expense (benefit)	\$ 556,135	\$ 244,901

The Company's income tax expense (benefit) differs from the expected tax expense for the six months ended June 30, 2014 and 2013 (computed by applying the U.S. Federal Income Tax rate of 34% and PRC CIT rate of 25%, respectively, to income before income taxes) as follows:

NOTE 18 - STOCK OPTIONS, WARRANTS AND CONVERTIBLE NOTES

(a) Stock Options

On February 11, 2009, the Compensation Committee of the Board of Directors of the Company approved the grant of stock options to purchase 2,600,000 shares of common stock at an exercise price of \$0.80 per share to ten of the Company's employees and directors. The stock options vested ratably over three years and expire on the tenth anniversary of the grant date. The Company valued the stock options at \$2,062,964 and amortized the stock compensation expense using the straight-line method over the service period from February 11, 2009 through February 11, 2012. The value of the options was estimated using the Black Scholes Model with an expected volatility of 164%, expected life of 10 years, risk-free interest rate of 2.76% and expected dividend yield of 0.00%. As of June 30, 2014, options for 2,366,672 shares had been exercised and options for 6,668 shares had been forfeited.

On October 6, 2009, the Company executed an agreement with Wang Rui and Li Qiwen, third-party consultants, whereby Mr. Wang and Mr. Li were to provide to the Company business development services in China in exchange for options to purchase 350,000 shares of the Company's common stock at an exercise price of \$1.50 per share. Per the agreement, options to purchase 250,000 shares vested and became exercisable on March 6, 2010, and options to purchase 100,000 shares vested and became exercisable on June 6, 2010. The options are issued under and subject to the terms of the Company's 2008 Omnibus Long-Term Incentive Plan. As of June 30, 2014, options for 250,000 shares had been exercised and remaining option to purchase 100,000 shares were forfeited due to the non-performance of services.

The following is a summary of the stock option activities of the Company:

	Number of Shares	Weighted Average Exercise Price
Outstanding as of January 1, 2014	326,660	\$ 1.01
Granted	-	-
Exercised	-	-
Cancelled	(100,000)	1.50
Outstanding as of June 30, 2014	226,660	0.80

The following table summarizes information about stock options outstanding as of June 30, 2014:

Options Outstanding			Options Exercisable	
Number of Shares	Exercise Price	Remaining Contractual life (in years)	Number of Shares	Exercise Price
226,660	\$ 0.80	4.75	226,660	\$ 0.80

The fair value per share of the 2,600,000 options issued to the employees and directors in February 2009 is \$0.7934 per share.

AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

(b) Warrants

On December 21, 2010, the Company sold to certain institutional investors 3,027,272 shares of the Company's common stock and warrants to purchase up to 1,210,912 shares of the Company's common stock in fixed combination, with each combination consisting of one share of common stock and a warrant to purchase 0.40 shares of common stock in a registered direct public offering (the "Second Round Warrants"). The Second Round Warrants became exercisable immediately following the closing date of the offering and initially were exercisable for three years thereafter at an exercise price of \$6.30 per share. The exercise price of the Second Round Warrants was adjusted to \$5.40 on September 9, 2013 as a result of the registered direct offering that closed on July 1, 2013. On December 12, 2013, the expiration date of the Second Round Warrants was extended to June 30, 2014. As of June 30, 2014, all 1,210,912 of the Second Round Warrants had been exercised.

On June 26, 2013, the Company entered into a Securities Purchase Agreement (the "2013 Securities Purchase Agreement") with certain institutional investors (the "Third Round Investors") that closed on July 1, 2013 pursuant to which the Company sold to the Third Round Investors, in a registered direct offering, an aggregate of 4,376,036 shares of the Company's common stock at a negotiated purchase price of \$6.03 per share. Under the 2013 Securities Purchase Agreement, the Third Round Investors also received Series A warrants for the purchase of up to 1,750,415 shares of the Company's common stock at an exercise price of \$7.24 per share and an option to make an additional investment in the form of Series B warrants and Series C warrants: Series B warrants to purchase a maximum aggregate of 728,936 shares of the Company's common stock at an exercise price of \$7.24 per share and the Series C warrants to purchase a maximum aggregate of 291,574 shares of the Company's common stock at an exercise price of \$8.69 (the "Third Round Warrants"). In addition, the placement agent for this transaction also received warrants for the purchase of up to 262,562 shares of the Company's common stock at an exercise price of \$7.24 per share (the "Third Round Placement Agent Warrants"). As of June 30, 2014 all the Third Round Series A, Series B and Series C warrants had been exercised on a cash basis and the Third Round Placement Agent Warrants, which will expire on July 1, 2016, had a fair value of \$8.69 per share.

On January 15, 2014, the Company sold to certain institutional investors warrants to purchase an aggregate of 1,429,393 shares of the Company's common stock at an exercise price of \$15 per share (the "Fourth Round Warrants") for a total purchase price of approximately \$14,294. According to the warrant subscription agreement by and among the Company and the holders, the exercise price shall be reduced by a credit of \$0.01, which reflects the price per warrant share paid in connection with the issuance of the Fourth Round Warrants. Consequently, the effective exercise price per warrant share shall be \$14.99. The Fourth Round Warrants were immediately exercisable and will expire on January 30, 2015. As of June 30, 2014, the fair value of the Fourth Round Warrants was \$7.38.

On March 19, 2014, the Company entered into a Securities Purchase Agreement with certain purchasers (the "Fourth Round Investors") pursuant to which the Company sold to the Fourth Round Investors, in a registered direct offering, an aggregate of 606,000 shares of common stock, at a negotiated purchase price of \$18.24 per share, for aggregate gross proceeds to the Company of approximately \$11,053,440, before deducting fees to the placement agent and other estimated offering expenses payable by the Company. As part of the transaction, the Fourth Round Investors also received warrants for the purchase of up to 90,900 shares of the Company's common stock at an exercise price of \$22.80 per share (the "Fifth Round Warrants"). In addition, the placement agent for this transaction also received warrants for the purchase of up to 36,360 shares of the Company's common stock at an exercise price of \$22.80 per share. The Fifth Round Warrants have a term of eighteen months and are exercisable by the holders at any time after the date of issuance. As of June 30, 2014, the fair value of the Fifth Round Warrants was \$7.26.

NOTE 19 STOCK AWARD

In connection with his appointment to the Board of Directors, and as compensation for serving, the Board of Directors has authorized the issuance by the Company to Mr. Henry Yu of 5,000 shares of Company's restricted common stock every six months from July 2011.

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

As compensation for his services, the Board of Directors has authorized the issuance by the Company to Mr. Jerry Lewin of 5,000 shares of Company's restricted common stock every six months, from August 2011.

As compensation for her services, the Board of Directors authorized the issuance by the Company to Ms. Kewa Luo of 5,000 shares of Company's common stock every six months, beginning in September 2013.

As compensation for his services, the Board of Directors authorized the issuance by the Company to Mr. Wei Chen of 10,000 shares of Company's common stock every year beginning in January 2012 and 2,500 shares of Company's common stock every three months, beginning in January 2014. As of June 1, 2014, Mr. Chen was no longer with the Company.

The fair value of stock awards based on service is determined based on closing price of the common stock on the date the shares are granted. The compensation costs for awards of common stock are recognized over the requisite service period of six months.

On December 30, 2013, the Board of Directors approved a proposal (as submitted by the Compensation Committee) of an award for selected executives and other key employees comprising a total of 335,000 shares of common stock for each fiscal year, beginning with the 2013 fiscal year, under the Company's 2008 Omnibus Long-Term Incentive Plan (the "Plan"), if the Company's determination that the Company's Non-GAAP Net Income for the fiscal year increased by 10% comparing to that of the prior year's. The specific number of shares of common stock to be issued in respect of such award could proportionally increase or decrease if the actual Non-GAAP Net Income increase is more or less than 10%. Non-GAAP Net Income means the Company's net income for a particular year calculated in accordance with GAAP, excluding option-related expenses, stock award expenses, and the effects caused by the change of fair value of financial derivatives. For example, if Non-GAAP Net Income for the 2014 fiscal year increases by 10% compared to the Non-GAAP Net Income for the 2013 fiscal year, the selected executives and other key employees each will be granted his or her target amount of common stock of the Company. If Non-GAAP Net Income in 2014 is less than Non-GAAP Net Income in 2013, then no common stock will be granted. If Non-GAAP Net Income in 2014 increases compared to Non-GAAP Net Income in 2013 but the increase is less than 10%, then the target amount of the common stock grant will be proportionately decreased. If Non-GAAP Net Income in 2014 increases compared to Non-GAAP Net Income in 2013 but the increase is more than 10%, then the target amount of the common stock grant will be proportionately increased up to 200% of the target amount. Any such increase in the grant will be subject to the total number of shares available under the Plan, and the Company's Board of Directors and shareholders will need to approve an increase in the number of shares reserved under the Plan if the number of shares originally reserved is used up.

The fair value of each award granted under the Plan is determined based on the closing price of the Company's stock on the date of grant of the award. To the extent that the performance goal is not met and so no shares become due, no compensation cost is recognized and any recognized compensation cost during the applicable year is reversed. The number of shares of common stock granted under the Plan with respect to fiscal 2014 would be 670,000 shares according to the estimation of Non-GAAP Net Income of the whole year of 2014 based on the Non-GAAP Net Income of the first six months of 2014. The compensation expense is recognized in General and Administrative Expenses.

NOTE 20 INTANGIBLE ASSETS

The following table provides the gross carrying value and accumulated amortization for each major class of intangible assets other than goodwill:

30

**KANDI TECHNOLOGIES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

	Remaining useful life as of June 30, 2014	June 30, 2014 (Unaudited)	December 31, 2013
Gross carrying amount:			
Trade name	7.5 years	\$ 492,235	492,235
Customer relations	7.5 years	304,086	304,086
		796,321	796,321
Less : Accumulated amortization			
Trade name		\$ (109,949)	(84,576)
Customer relations		(67,924)	(52,249)
		(177,873)	(136,825)
Intangible assets, net		\$ 618, 448	659,496

The aggregate amortization expense for those intangible assets that continue to be amortized is reflected in amortization of intangible assets in the consolidated statements of income, and comprehensive income was \$20,524 and \$20,524 for the three months ended June 30, 2014 and 2013, respectively, and \$41,048 and \$41,048 for the six months ended June 30, 2014 and 2013, respectively.

Amortization expense for the next five years and thereafter is as follows:

2014 (six months)	\$ 41,047
2015	82,095
2016	82,095
2017	82,095
2018	82,095
Thereafter	249,021
Total	\$ 618,448

NOTE 21 SUMMARIZED INFORMATION OF EQUITY METHOD INVESTMENT IN THE JV COMPANY

The Company's consolidated net income includes the Company's proportionate share of the net income or loss of the Company's equity method investees. When the Company records its proportionate share of net income, it increases equity income (loss) net in the Company's consolidated statements of income and the Company's carrying value in that investment. Conversely, when the Company records its proportionate share of a net loss, it decreases equity income (loss) net in the Company's consolidated statements of income and the Company's carrying value in that investment. All intra-entity profits and losses with the Company's equity method investees have been eliminated.

Kandi Electric Vehicles Group Co., Ltd. (the JV Company)

In March 2013, pursuant to a joint venture agreement (the JV Agreement) entered into between Kandi Vehicles and Shanghai Maple Guorun Automobile Co., Ltd. (Shanghai Guorun), a 99%-owned subsidiary of Geely Automobile Holdings Ltd. (Geely), the parties established Zhejiang Kandi Electric Vehicles Co., Ltd. (the JV Company) to develop, manufacture and sell electrical vehicles (EVs) and related auto parts. Each of Kandi Vehicles and Shanghai Guorun has a 50% ownership interest in the JV Company. In fourth quarter of 2013, Kandi Vehicles entered into an ownership transfer agreement with the JV Company pursuant to which Kandi Vehicles transferred 100% of its ownership in Kandi Changxing to the JV Company. As a result, the Company indirectly has a 50% economic interest

in Kandi Changxing through its 50% ownership interest in the JV Company after this transfer. In November 2013, Zhejiang Kandi Electric Vehicles Jinhua Co., Ltd. (Kandi Jinhua) was formed by the JV Company. The JV Company has 100% ownership interest in Kandi Jinhua, and the Company, indirectly through its 50% ownership interest in the JV Company, has a 50% economic interest in Kandi Jinhua. In November 2013, Zhejiang JiHeKang Electric Vehicle Sales Co., Ltd. (JiHeKang) was formed by the JV Company. The JV Company has 100% ownership interest in JiHeKang, and the Company, indirectly through its 50% ownership interest in the JV Company, has a 50% economic interest in JiHeKang. In December 2013, the JV Company entered into an ownership transfer agreement with Shanghai Maple pursuant to which the JV Company acquired 100% ownership of Kandi Electric Vehicles (Shanghai) Co., Ltd. (Kandi Shanghai). As a result, Kandi Shanghai is a wholly-owned subsidiary of the JV Company, and the Company, indirectly through its 50% ownership interest in the JV Company, has a 50% economic interest in Kandi Shanghai. In January 2014, Zhejiang Kandi Electric Vehicles Jiangsu Co., Ltd. (Kandi Jiangsu) was formed by the JV Company. The JV Company has 100% ownership interest in Kandi Jiangsu, and the Company, indirectly through its 50% ownership interest in the JV Company, has a 50% economic interest in Kandi Jiangsu. In addition, In July 2013, Zhejiang ZuoZhongYou Electric Vehicle Service Co., Ltd. (the Service Company) was formed. The JV Company has a 19% ownership interest in the Service Company. The Company, indirectly through its 50% ownership interest in the JV Company, has a 9.5% of economic interest in the Service Company. In March 2014, the JV Company changed its name to Kandi Electric Vehicles Group Co., Ltd.

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

As of June 30, 2014, the JV Company consolidated the following entities on its financial statements: (1) 100% interest in Kandi Changxing; (2) 100% interest in Kandi Jinhua; (3) 100% interest in JiHeKang; (4) 100% interest in Kandi Shanghai; and (5) 100% interest in Kandi Jiangsu.

The Company accounted for its investments in the JV Company under the equity method of accounting as the Company has a 50% ownership interest in the JV Company. Therefore, the Company's consolidated net income for the six months ended June 30, 2014, included equity income from the JV Company during such periods.

The combined results of operations and financial position of the JV Company are summarized below:

	Three months ended June 30,	
	2014	2013
Condensed income statement information:		
Net sales	\$ 45,135,796	\$ -
Gross income (loss)	2,638,447	-
Net income (loss)	728,994	(20,752)
Company's equity in net income of JV	\$ 364,497	\$ (10,376)

	Six months ended June 30,	
	2014	2013
Condensed income statement information:		
Net sales	\$ 79,995,840	\$ -
Gross income (loss)	6,926,375	-
Net income (loss)	2,385,818	(20,752)
Company's equity in net income of JV	\$ 1,192,909	\$ (10,376)

	June 30, 2014	December 31, 2013
Condensed balance sheet information:		
Current assets	\$ 164,363,860	\$ 108,139,053
Noncurrent assets	157,786,890	146,130,466
Total assets	\$ 322,150,750	\$ 254,269,519
Current liabilities	155,466,409	93,772,816
Noncurrent liabilities	4,946,100	-
Equity	161,738,241	160,496,703
Total liabilities and equity	\$ 322,150,750	\$ 254,269,519

**KANDI TECHNOLOGIES GROUP, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

During the first half of 2014, 99.2% of the JV Company's revenues were derived from the sales of EV products in the PRC with a total of 5,329 units sold during such period. The growth of sales of EV products was mainly driven by the demand by Hangzhou Public EV Sharing System (the "Car-Share" Project) and group long-term lease project. As the Company only has a 50% ownership interest in the JV Company and accounted for its investments in the JV Company under the equity method of accounting, the Company didn't consolidate the JV Company's financial results but included equity income from the JV Company during such periods.

Note: The following table illustrates the captions used in the Company's Income Statements for its equity basis investments in the JV Company.

Changes in the Company's equity method investment in JV Company for the six months ended June 30, 2014 and 2013 are as follows:

	Six Months Ended June 30,	
	2014	2013
Investment in JV Company, beginning of the period,	\$ 79,331,930	\$ -
Investment in JV Company	-	80,798,940
Share of profit (loss)	1,192,909	(10,376)
Intercompany transaction elimination	(386,009)	-
Year 2013 unrealized profit realized	911,930	-
Exchange difference	(566,796)	(100)
Investment in JV Company, end of the period	\$ 80,483,964	\$ 80,788,464

Sales to our customers, the JV Company's subsidiaries, for the three and six months ended June 30, 2014 were \$17,745,909 and \$42,468,191, respectively, and they were primarily the sales of battery packs, body parts, EV drive motors, EV controllers, air conditioning units and other auto parts, of which the majority of sales were to Kandi Changxing amounted to \$12,347,137 and \$29,573,430, respectively, Kandi Shanghai amounted to \$3,884,233 and \$10,786,012, respectively and Kandi Jinhua amounted to \$1,516,886. These EV parts were used in manufacturing of pure products by the JV's Company's subsidiaries to sell entirely to the JV Company's customer or Shanghai Maple Auto Co., Ltd. ("Shanghai Maple"). Shanghai Maple holds the country's vehicle production rights of sedan, equivalent to license, that qualifies it to sell the EV products to the end customers. Shanghai Maple is 90% owned by Geely and 10% owned by Zhejiang Maple Asset Management Co. Ltd. According to the JV agreement, before the JV Company receives vehicle production rights (license), the JV Company and its subsidiaries all may sell their products through the channel of Shanghai Maple's vehicle production rights (license) to the end customers or the Service Company, which purchased and used the cars in Hangzhou Public EV sharing System and group long-term lease project. Of the total sales to the JV Company and its subsidiaries for the six months ended June 30, 2014, approximately 72% of the sales were related to the sales of battery packs because Kandi New Energy holds a production rights (license) to manufacture requisite battery packs used in manufacturing of Kandi brand's EVs. Under the JV agreement, the Company's EV product manufacturing business will be gradually transferred to the JV Company. The Company will be mainly responsible for supplying the JV Company with EV parts in the future and the JV Company will be responsible to produce EV products and to sell finished goods through channel to its end customers.

Accounts receivable, net	\$ 19,218,760	\$ 31,370,862

During the six months ended June 30, 2014 and 2013, the Company sold products to Kandi USA Inc., a company that operates under the trade name of Eliteway Motorsports (Eliteway), amounting to \$2,187,115 and \$3,077,052, respectively. During the three months ended June 30, 2014 and 2013, the Company sold products to Kandi USA Inc., , amounting to \$1,628,096 and \$1,892,872, respectively. As of June 30, 2014 and December 31, 2013, outstanding receivable due from Eliteway was \$1,125,183 and \$ 2,800,958, respectively.

Mr. Hu Wangyuan is the sole shareholder and officer of Eliteway, which serves as a U.S. importer of the Company's products. Mr. Hu Wangyuan is the adult son of the Company's chairman and Chief Executive Officer, Mr. Hu Xiaoming. As of and for the six months ended June 30, 2014, Eliteway and Mr. Hu Wangyuan were financially independent from the Company. The transactions between the Company and Eliteway were carried out at arm's length without preferential terms compared with other customers that placed orders comparable in size or volume.

NOTE 23 COMMITMENTS AND CONTINGENCIES

Guarantees and Pledged collateral for third party bank loans

As of June 30, 2014, the Company provided guarantees for the following third parties:

(1) Guarantees for bank loans

Guarantee provided to	Amount
Zhejiang Kangli Metal Manufacturing Company.	\$ 4,871,949
Zhejiang Shuguang industrial Co., Ltd.	4,871,949
Nanlong Group Co., Ltd.	9,743,898
Total	\$ 19,487,796

On December 27, 2013, the Company entered into a guarantee contract to serve as the guarantor for the bank loan borrowed from Shanghai Bank Hangzhou branch in the amount of \$4,871,949 by Zhejiang Kangli Metal Manufacturing Company (ZKMMC) for the period from December 27, 2013 to December 27, 2014. ZKMMC is not related to the Company. Under this guarantee contract, the Company agrees to perform all obligations of ZKMMC under the loan contract if ZKMMC fails to perform its obligations as set forth therein.

On March 4, 2014, the Company entered into a guarantee contract to serve as the guarantor for the bank loan borrowed from PingAn Bank in the amount of \$4,871,949 by Zhejiang Shuguang industrial Co., Ltd. (ZSICL) for the period from March 4, 2014 to March 4, 2015. ZSICL is not related to the Company. Under this guarantee contract, the Company agrees to perform all obligations of ZSICL under the loan contracts if ZSICL fails to perform its obligations as set forth therein.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This report contains forward-looking statements within the meaning of the federal securities laws that relate to future events or our future financial performance. In some cases, you can identify forward-looking statements by terminology, such as *may*, *will*, *should*, *could*, *expect*, *plan*, *anticipate*, *believe*, *estimate*, *project*, *potential* or *continue* or the negative of such terms or other comparable terminology, although not all forward-looking statements contain such terms.

In addition, these forward-looking statements include, but are not limited to, statements regarding implementing our business strategy; development and marketing of our products; our estimates of future revenue and profitability; our expectations regarding future expenses, including research and development, sales and marketing, manufacturing and general and administrative expenses; difficulty or inability to raise additional financing, if needed, on terms acceptable to us; our estimates regarding our capital requirements and our needs for additional financing; attracting and retaining customers and employees; sources of revenue and anticipated revenue; and competition in our market.

Forward-looking statements are only predictions. Although we believe that the expectations reflected in these forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. All of our forward-looking information is subject to risks and uncertainties that could cause actual results to differ materially from the results expected. Although it is not possible to identify all factors, these risks and uncertainties include the risk factors and the timing of any of those risk factors described in our Annual Report on Form 10-K for the year ended December 31, 2013 and those set forth from time to time in our other filings with the Securities and Exchange Commission (*SEC*). These documents are available on the SEC's Electronic Data Gathering and Analysis Retrieval System at <http://www.sec.gov>.

Critical Accounting Policies and Estimates

This section should be read together with the Summary of Significant Accounting Policies in the attached condensed consolidated financial statements included in this report.

Policy affecting options and warrants

Our stock option cost is recorded in accordance with ASC 718 and ASC 505. The fair value of stock options is estimated using the Black-Scholes-Merton model. Our expected volatility assumption is based on the historical volatility of our common stock. The expected life assumption is primarily based on the expiration date of the option. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of grant. Stock option expense recognition is based on awards expected to vest. There were no estimated forfeitures. ASC standards require forfeitures to be estimated at the time of grant and revised in subsequent periods, if necessary, if actual forfeitures differ from those estimates.

Our warrant costs are recorded in liabilities and equities, respectively, in accordance with ASC 480, ASC 505 and ASC 815. The fair value of a warrant, which is classified as a liability, is estimated using the Black-Scholes-Merton model and the lattice valuation model. Our expected volatility assumption is based on the historical volatility of our common stock. The expected life assumption is primarily based on the expiration date of the warrant. The risk-free interest rate for the expected term of the warrant is based on the U.S. Treasury yield curve in effect at the time of measurement. The warrants, which are freestanding derivatives classified as liabilities on the balance sheet, are measured at fair value on each reporting date, with decreases in fair value recognized in earnings and increases in fair values recognized in expenses.

The fair value of equity-based warrants, which are not considered derivatives under ASC 815, is estimated using the Black-Scholes-Merton model. Our expected volatility assumption is based on the historical volatility of our common stock. The expected life assumption is primarily based on the expiration date of the warrant. The risk-free interest rate

for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

Estimates affecting accounts receivable and inventories

The preparation of our consolidated financial statements requires management to make estimates and assumptions that affect our reporting of assets and liabilities (and contingent assets and liabilities). These estimates are particularly significant where they affect the reported net realizable value of our accounts receivable and inventories.

Accounts receivable are recognized and carried at net realizable value. An allowance for doubtful accounts is recorded in the period when a loss is probable based on an assessment of specific factors, such as troubled collection, historical experience, accounts aging, ongoing business relations and other factors. Accounts are written off after exhaustive efforts at collection. If accounts receivable are to be provided for, or written off, they would be recognized in the consolidated statement of operations within operating expenses. As of June 30, 2014 and December 31, 2013, we recorded no allowance for doubtful accounts. This determination was made per our management's judgment, which was based on their best knowledge.

Inventory is stated at the lower of cost, determined on a weighted average basis, or net realizable value. Net realizable value is the estimated selling price in the ordinary course of business less the estimated cost of completion and the estimated costs necessary to make the sale. Adjustments to reduce the cost of inventory to its net realizable value are made, if required, for estimated excess, obsolescence, or impaired balances. When inventories are sold, their carrying amount is charged to expense in the year in which the revenue is recognized. Write-downs for declines in net realizable value or for losses of inventories are recognized as an expense in the year the impairment or loss occurs.

Although we believe that there is little likelihood that actual results will differ materially from current estimates, if customer demand for our products decreases significantly in the near future, or if the financial condition of our customers deteriorates in the near future, we could realize significant write downs for slow-moving inventories or uncollectible accounts receivable.

Revenue Recognition

Our revenue recognition policy plays a key role in our consolidated financial statements. Revenues represent the invoiced value of goods sold, recognized upon the shipment of goods to customers, and revenues are recognized when all of the following criteria are met:

Persuasive evidence of an arrangement exists;
Delivery has occurred or services have been rendered;
The seller's price to the buyer is fixed or determinable; and
Collectability is reasonably assured.

The revenue recognition policies for our legacy products, including ATVs, go-karts and EV products, are the same: When the products are delivered, the associated risk of loss is deemed transferred, and at that time we recognize revenue.

Warranty Liability

Most of our non-EV products (the "Legacy Products") are exported out of China to foreign countries that have legal and regulatory requirements with which we are not familiar. Development of warranty policies for our Legacy Products in each of these countries would be virtually impossible and prohibitively expensive. Therefore, we provide price incentives and free parts to our customers and in exchange, our customers establish appropriate warranty policies and assume warranty responsibilities. Consequently, warranty issues are taken into consideration during the price negotiation for our products. The free parts are delivered along with the products, and when products are sold, the related parts are recorded as cost of goods sold. Due to the reliable quality of our products, we have been able to maintain this warranty policy and we have not had any product liability attributed to the quality of our products.

For the EV products that we sell in China, there is a three year or 50,000 kilometer manufacturer warranty. This warranty affects us through our participation and investment in the JV Company, which manufactures the EVs.

Results of Operations*Comparison of Six Months Ended June 30, 2014 and 2013*

The following table sets forth the amounts and percentage relationship to revenue of certain items in our condensed consolidated statements of income and comprehensive income

	For Six Months Ended June 30, 2014	% Of Revenue	For Six Months Ended June 30, 2013	% Of Revenue	Change In Amount	Change In %

(a) Revenue

For the six months ended June 30, 2014, we had revenues of \$73,131,359 as compared to revenues of \$26,820,348 for the six months ended June 30, 2013, an increase of \$46,311,011 or 172.7% . For the six months ended June 30, 2014 and 2013, 95% and 88%, respectively, of our revenues were derived from the sales of our products in the PRC.

The following table summarizes our revenues as well as the unit sold by product types for the six months ended June 30, 2014 and 2013:

	Six Months Ended June 30,			
	2014		2013	
	Unit	Sales	Unit	Sales

EV Parts				

During the six months ended June 30, 2014, our revenues from the sale of EV parts were \$42,238,297. We started the EV parts business in the first quarter of 2014, and our revenue for the six months ended June 30, 2014 primarily consisted of the sales of battery packs, body parts, EV drive motors, EV controllers, air conditioning units and other auto parts to the JV Company for manufacturing of EV products. Of the total EV parts sales to the JV Company for the six months ended June 30, 2014, approximately 72% of the sales were related to the sales of battery packs because the auto industry is highly regulated in China and we hold the necessary production license to manufacture the battery packs used in the manufacturing of Kandi brand s EVs. Under the JV agreement, our EV manufacturing business will be gradually transferred to the JV Company. We will be primarily responsible for supplying the JV Company with EV parts in the future and the JV Company will be primarily responsible to produce the EV products.

EV Products

We continued to sell certain EV products during the first half of 2014. Our revenues from the sale of EV products increased by \$17,858,393 or 475.1% from \$3,758,907 for the six months ended June 30, 2013 to \$21,617,300 for the six months ended June 30, 2014, representing a 142.2% of increase in unit sales and a 137.4% increase in the average unit price. Of the total sales of EV products for the six months ended June 30, 2014, approximately \$21,016,349 or approximately 97% was sold to Shanghai Maple Auto Co., Ltd., an unaffiliated company that holds the country s vehicle production rights of sedan that qualifies it to sell the products to the end customer. The increased sales of EV products were mainly driven by the demand by Hangzhou Public EV Sharing System (the Car-Share Project) and group long-term lease project. The group long-term lease project is a lease model that uses enterprise, community or village as a lease unit and each unit leases a minimum of 100 EVs with a group lease term at a minimum of three years.

Go-Karts

During the six months ended June 30, 2014, our revenues from the sale of go-karts declined by \$10,549,990, or 67.5%, primarily as a result of a 69.5% decrease in unit sales as compared to the same period of last year. However, the decline of unit sales was partially offset by a 6.7% increase in the average unit price during the first six months of 2014. The decrease in go-kart sales was primarily due to the realignment of our product mix for more efficient use of resources to capture more sales opportunities in the fast-growing EV market in China.

ATV

During the six months ended June 30, 2014, our revenues from the sale of ATVs decreased by \$290,012, or 6.8%, as a result of a 26.5% decrease in unit sales that was offset in part by a 26.9% increase in the average unit price compared to the same period of 2013. The decrease in revenue was primarily attributable to our continued efforts to optimize our product offering and focus our efforts on the EV market in China. The average unit price increased as more high-end and middle-end products sold during this reporting period.

Auto Generators

During the six months ended June 30, 2014, our sales of auto generators decreased by \$1,125,594, or 95.1%, as a result of a 95.3% decrease in unit sales that was partially offset by a 5.1% increase in the average unit price compared to the same period of last year. The decrease in revenue was primarily due to the realignment of Yongkang Scrou's product offering to focus on manufacturing automobile motors, air-conditioning systems, controllers, and accelerator pedals for EVs.

Motorcycles

During the six months ended June 30, 2014, our revenues from the sale of three-wheeled motorcycles declined by \$232,994 or 99.6%, as a result of a 98.9% decrease in unit sales and a 61.1% decrease in the average unit price compared to the same period of last year. The decrease was primarily because we adjusted our product offering and focused more efforts on increasing EV demand in the China auto market.

OEM EV

During the six months ended June 30, 2014, our revenues from our OEM business were \$155,530. We started our OEM business in the second quarter of 2014, and our sales for the six months ended June 30, 2014 were primarily derived from assembling EV products for Kandi Jinhua, a wholly-owned subsidiary of the JV Company. Indirectly through our 50% ownership interest in the JV Company, we have a 50% economic interest in Kandi Jinhua.

UTV

During the six months ended June 30, 2014, our utility vehicles (UTVs) revenue was nil. This is mainly due to our continued efforts to optimize our product offering and focused our efforts on increasing EV demand in the China auto market. Therefore, we stopped manufacturing UTV products.

Refitted Car

During the six months ended June 30, 2014, we did not record any revenue from this business line as we discontinued manufacturing this product in the third quarter of 2013 to focus our efforts on the China EV auto market.

The following table shows the breakdown of our revenues from our customers during the six months ended June 30, 2014 and 2013 by geographical markets based on the location of the customer:

Six Months Ended June 30,					
2014			2013		
	Sales	Percentage		Sales	Percentage
North America	\$ 2,123,314	3%	\$	2,723,533	10%
China	69,776,363	95%		23,479,387	88%
Europe & other region	1,231,682	2%		617,428	2%
Total	\$ 73,131,359	100%	\$	26,820,348	100%

(b) Cost of goods sold

Cost of goods sold during the six months ended June 30, 2014 was \$61,049,862, representing an increase of \$40,409,166 or 195.8% from \$20,640,696 in the corresponding period of 2013. This increase was primarily due to the corresponding increased sales for the six months ended June 30, 2014. However, the increase in cost of goods sold outpaced the growth of our revenues, which was largely due to relatively less profitable raw material purchases in our newly-added EV parts product line, and the sale of EV parts accounted for 57.8% of total revenue for the six months ended June 30, 2014. As a result, cost of goods sold for our EV parts product line comprised the majority, or 62.8%, of the total cost of goods sold for the six months ended June 30, 2014. The battery sales accounted the majority of our EV parts sales and its corresponding cost of goods sold accounted for 47.6% of total cost of goods sold.

For the six months ended June 30, 2014, excluding the battery business mentioned above, our cost of raw materials had a percentage increase of 0.23% compared to the sales increase in the same period of time year over year.

Excluding the battery business mentioned above, total wages and salaries for the six months ended June 30, 2014, had an increase of 0.34% compared to the sale increase in the same period of time year over year.

Excluding the battery business mentioned above, our other overhead costs for the six months ended June 30, 2014 had a decrease of 4.43% compared to the sales increase in the same period of time year over year.

For the six months ended June 30, 2014, raw material costs comprised approximately 95.4% of total cost of goods sold, labor costs comprised approximately 1.5% of total cost of goods sold, and manufacturing overhead comprised approximately 3.1% of the total cost of goods sold. For the six months ended June 30, 2013, raw material costs comprised approximately 88.8% of total cost of goods sold, labor costs comprised approximately 2.6% of total cost of goods sold, and manufacturing overhead comprised approximately 8.6% of the total cost of goods sold.

(c) Gross profit

Gross profit for the first six months of 2014 was \$12,081,497 as compared to \$6,179,652 for the same period last year, an increase of \$5,901,845 or 95.5%. This increase was primarily attributable to the increase in our revenue. However, our gross margin in the first six months of 2014 decreased to 16.5% compared to 23.0% for the same period of 2013. The decreased gross margin was mainly because the majority of our revenue growth during the first half year came from the relatively less profitable EV parts product lines, which had 9.2% of gross margin compared to 16.5% of gross margin for the company as a whole.

(d) Selling and distribution expenses

Selling and distribution expenses were \$507,151 for the six months ended June 30, 2014, compared to \$161,034 for the same period in 2013, an increase of \$346,117 or 214.9%. This increase was primarily attributable to warranty expenses of \$303,647 for repair and maintenance charged during the second quarter of 2014. We contracted a qualified third party to provide repair and maintenance works for the 1,620 units we sold of Kandi 7001 series EV sedans. The total price of this service is \$3,176,080 and will be amortized over three years. Excluding this charge, our selling and distribution expenses increased \$42,470 or 26.4% as compared to the same period of last year. The

increase was largely due to the increased expenses in trade shows and advertising as we increased our sales and marketing efforts this year.

(e) General and administrative expenses

General and administrative expenses were \$9,643,944 for the first six months ended June 30, 2014, compared to \$2,025,243 for the same period in 2013, an increase of \$7,618,701 or 376.2% . For the six months ended June 30, 2014, general and administrative expenses included \$4,429,247 in expenses for common stock awards to employees and consultants for their services, compared to \$53,042 for the same period in 2013. Excluding stock award costs, our net general and administrative expenses for the six months ended June 30, 2014 were \$5,214,697, an increase of \$3,242,496 or 164.4% over the \$1,972,201 of such expenses for the same period of 2013. This increase was primarily attributable to costs related to the capital raise that occurred in the first quarter of 2014.

(f) Research and development

Research and development expenses were \$2,143,930 for the six months ended June 30, 2014, compared to \$1,362,156 from the same period in 2013, an increase of \$781,774 or 57.4% . This increase was primarily due to our increased costs of materials, testing and inspection related to the development and commercialization of our new EV model - SMA7005BEV, the development of our new auto air conditioning system, and the development of our EV intelligent control system used in our EV products.

(g) Government grants

Government grants totaled \$153,700 for the six months ended June 30, 2014, an increase of \$103,893 or 208.6% from \$49,807 in the corresponding period in 2013. The increases were largely due to the awards from the Chinese government for promoting local business.

(h) Net interest (expense) income

Net interest expense was \$686,175 for the six months ended June 30, 2014, compared to \$1,287,810 for the same period last year, a decrease of \$601,635 or 46.7% . This change was primarily attributable to an increase in interest income earned on loans made to third parties. For the six months ended June 30, 2014, we recorded interest income of \$1,232,135, which included \$1,210,287 earned on loans made to third parties and \$21,848 earned on bank deposits. For the six months ended June 30, 2014, we recorded interest expense of \$1,918,311, which included bank loan interest of \$1,169,626 and bond interest of \$748,685.

(i) Change in fair value of financial instruments

For the six months ended June 30, 2014, the expense related to changes in the fair value of the derivative liability relating to the warrants issued to investors and placement agents was \$3,372,602, compared to \$92,339 for the same period of last year, an increase of \$3,280,263 or 3,552.4% . The increase was largely due to the increase of our stock price during this year.

(j) Share of (Loss) of Associated Company

Investment losses were \$92,992 for the first six months ended June 30, 2014, compared to a loss of \$29,540 for the corresponding period in 2013, an increase of \$63,452 or 214.8% . For the six months ended June 30, 2014 and 2013, these losses were attributable to our 30% equity interest investment in Jinhua Service. As of June 30, 2014, Jinhua Service ceased its operations and will be dissolved. As a result, we wrote off the remaining investment in this entity and associated liabilities due to this entity.

(k) Share of Profit (Loss) after Tax of the JV Company

The JV Company recorded net income of \$2,385,818 for the six-month period ended June 30, 2014. We accounted for our investments in the JV Company under the equity method of accounting as we have a 50% ownership interest in the JV Company. As a result, we recorded 50% of the JV Company's profit, or \$1,192,909 for the six-month period ended June 30, 2014. After eliminating intra-entity profits and loss, our share of the after tax profit of the JV Company was \$1,718,830 for the six months ended June 30, 2014, compared to a loss of \$10,376 representing our share of the JV Company's loss for the same period of last year. We expect the JV Company will continue to perform well as the demand for EV products continues to grow in China, as evidenced by the orders from Hangzhou Public EV Sharing System (the "Carshare" Project). Also refer to Note 21.

(l) Other Income, Net

Other income was \$119,827 for the six months ended June 30, 2014, compared to \$176,513 for the same period of last year, a decrease of \$56,686, or 32.1% . This decrease was primarily attributable to the decrease in lease income we received during this reporting period.

(m) Net income (loss)

We incurred a net loss of \$2,929,075 for the six months ended June 30, 2014, compared to net income of \$1,192,573 for the same period in 2013, a change of \$4,121,648 or 345.6% . The net loss was primarily attributable to the change in the fair value of warrant derivatives and the expense incurred for stock awards.

Excluding (i) the effects of stock award expenses, which were \$4,429,247 and \$53,042 for the six months ended June 30, 2014 and 2013, respectively, and (ii) the change of the fair value of financial derivatives, which were expenses of \$3,372,602 and \$92,339 for the six months ended June 30, 2014 and 2013, respectively, our net income was \$4,872,774 (non-GAAP) for the six months ended June 30, 2014 as compared to net income of \$1,337,954 (non-GAAP) for the same period of 2013, an increase of \$3,534,820 or 264.2%. The increase in such net income was primarily attributable to the increase of revenue and gross profits during the first half year of 2014.

The Company makes reference to certain non-GAAP financial measure, i.e., the adjusted net income. Management believes that such adjusted term is useful to investors in evaluating the Company's operating performance because it presents a meaningful measure of corporate performance. See the non-GAAP reconciliation table below. Any non-GAAP measures should not be considered as a substitute for, and should only be read in conjunction with, measures of financial performance prepared in accordance with GAAP.

	Six Months Ended June 30	
	2014	2013
GAAP net (loss) income	\$ (2,929,075)	\$ 1,192,573
Stock award expenses	4,429,247	53,042
Change of the fair value of financial derivatives	3,372,602	92,339
Non-GAAP net income	4,872,774	1,337,954

Comparison of Three Months Ended June 30, 2014 and 2013

The following table sets forth the amounts and percentage relationship to revenue of certain items in our condensed consolidated statements of income and comprehensive income.

	For Three Months Ended June 30, 2014	% Of Revenue	For Three Months Ended June 30, 2013	% Of Revenue	Change In Amount	Change In %

(a) Revenue

For the three months ended June 30, 2014, our revenue was \$32,960,055 compared to \$12,157,827 for the three months ended June 30, 2013, an increase of \$20,802,228 or 171.1% . The increase of revenue was mainly due to the commencement of sales of EV parts in the first quarter of 2014 and increased EV products sales during the second quarter of 2014. The EV products revenue, which was derived primarily from the sale of Kandi 7001 model, increased \$11,217,339 or 552.1% year over year. Of the total revenues during the three months ended June 30, 2014, approximately 52.3% of total revenue resulted from the sales of EV parts and approximately 40.2% of total revenues resulted from the sales of EV products. ATV and Go-Kart revenues for the three months ended June 30, 2014 decreased 62.6% and 76.3%, respectively, year over year due to our realignment of our product mix for more efficient use of our resources to grow our business in the fast-growing EV market in China. The OEM business is a newly-added business line during the second quarter mainly to assemble EV products for the JV Company.

The following table summarizes our revenues as well as the unit sold by product types for the three months ended June 30, 2014 and 2013:

	Three Months Ended June 30,			
	2014		2013	
	Unit	Sales	Unit	Sales
EV parts	29,331	\$ 17,224,231	-	-
EV products	911	13,249,212	330	\$ 2,031,873
Go-Kart	1,774	1,686,355	8,500	7,105,600
ATV	1,002	644,727	3,546	1,722,779
Auto generator	-	-	16,385	549,591
Three wheeled motorcycle	-	-	81	166,349
OEM - EV	320	155,530	-	-
Utility vehicles (UTVs)	-	-	100	285,145
Refitted car	-	-	11	296,490
Total	33,338	\$ 32,960,055	28,953	\$ 12,157,827

The following table shows the breakdown of our revenues from our customers during the three months ended June 30, 2014 and 2013 by geographical markets based on the location of the customer:

	Three Months Ended June 30,			
	2014		2013	
	Sales	Percentage	Sales	Percentage
North America	\$ 1,554,096	5%	\$ 1,095,453	9%
China	30,700,879	93%	10,855,663	89%
Europe & other region	705,080	2%	206,711	2%
Total	\$ 32,960,055	100%	\$ 12,157,827	100%

(b) Cost of goods sold

Cost of goods sold during the three months ended June 30, 2014 was \$25,738,967, representing an increase of \$16,388,761, or 175.3%, compared to \$9,350,206 for three months ended June 30, 2013. This increase was mainly due to the increase in corresponding sales. However, the increase in cost of goods sold outpaced the growth of our revenues, which was largely due to relatively less profitable raw material purchases in our newly-added EV parts product line, and the sale of EV parts accounted for 52.3% of total revenue for the three months ended June 30, 2014. As a result, cost of goods sold for our EV parts product line comprised the majority, or 56.3%, of the total cost of goods sold for the three months ended June 30, 2014. The battery sales corresponding cost of goods sold accounted for 26.4% of total cost of goods sold.

Edgar Filing: Kandi Technologies Group, Inc. - Form 10-Q

For the three months ended June 30, 2014, excluding the battery business mentioned above, our cost of raw materials had a decrease of 0.31% compared to the sales increase in the same period of time year over year.

Excluding the battery business mentioned above, total wages and salaries for the three months ended June 30, 2014, had an increase of 0.63% compared to the sale increase in the same period of time year over year.

Excluding the battery business mentioned above, our other overhead costs for the three months ended June 30, 2014 had a decrease of 5.84% compared to the sales increase in the same period of time year over year.

For the three months ended June 30, 2014, raw material costs comprised approximately 93.7% of total cost of goods sold, labor costs comprised approximately 2.5% of total cost of goods sold, and manufacturing overhead comprised approximately 3.8% of the total cost of goods sold. For the three months ended June 30, 2013, raw material costs comprised approximately 89.2% of total cost of goods sold, labor costs comprised approximately 3.0% of total cost of goods sold, and manufacturing overhead comprised approximately 7.8% of the total cost of goods sold.

(c) Gross profit

Gross profit for the second quarter of 2014 increased 157.2% to \$7,221,088, compared to \$2,807,621 for the same period last year. This was primarily attributable to our significantly increased revenue during the quarter. Our gross margin decreased to 21.9% compared to 23.1% for the same period of 2013. The decreased gross margin was mainly because a large portion of our revenue growth during the second quarter came from the relatively less profitable EV parts product line, which accounted for 52.3% of total revenue for the quarter and had 15.9% of gross margin compared to 21.9% of gross margin for the company as a whole.

(d) Selling and distribution expenses

Selling and distribution expenses were \$435,894 for the three months ended June 30, 2014, compared to \$71,420 for the same period in 2013, an increase of \$364,474 or 510.3% . This increase was primarily attributable to a charge of \$303,647 for repair and maintenance warranty during the second quarter of 2014 as discussed above. Excluding this charge, the selling and distribution expenses for the three months ended June 30, 2014 increased \$60,827 or 85.2% as compared to the same period of last year, which was largely due to the increases of the expenses in trade shows and advertising as we increased sales and marketing efforts during the quarter.

(e) General and administrative expenses

General and administrative expenses were \$3,173,178 for the three months ended June 30, 2014, compared to \$1,332,279 for the same period in 2013, an increase of \$1,840,899 or 138.2% . For the three months ended June 30, 2014, general and administrative expenses included \$1,008,616 in expenses for common stock awards to employees and consultants, compared to \$35,350 for the same period in 2013. Excluding stock award costs, our net general and administrative expenses for the three months ended June 30, 2014 were \$2,164,562, an increase of \$867,633, or 66.9%, from \$1,296,929 for the same period of 2013. The increase was largely due to the increased office expenses during the quarter.

(f) Research and development

Research and development expenses were \$971,673 for the three months ended June 30, 2014, compared to \$672,491 from the same period in 2013, an increase of \$299,182 or 44.5% . This increase was primarily due to our increased costs of material, testing and inspection related to the development and commercialization of our new EV model - SMA7005BEV, the development of our new auto air conditioning system, and the development of our EV intelligent control system used in our EV products.

(g) Government grants

Government grants totaled \$153,700 for the three months ended June 30, 2014, an increase of \$103,893 or 208.6% from \$49,807 in the corresponding period in 2013. The increases were largely due to the awards from the Chinese government for promoting local business.

(h) Net interest (expense) income

Net interest expense was \$214,995 for the three months ended June 30, 2014, compared to \$617,601 for the same period last year, a decrease of \$402,606 or 65.2% . This change was primarily attributable to an increase in interest income earned on loans made to third parties. For the three months ended June 30, 2014, we recorded interest income of \$748,842, which included \$739,145 earned on loans made to third parties and \$9,697 earned on bank deposits. For the three months ended June 30, 2014, we recorded interest expense of \$963,838, which included bank loan interest of \$590,979 and bond interest of \$372,859.

(i) Change in fair value of financial instruments

For the three months ended June 30, 2014, the income related to changes in the fair value of derivative liability relating to the warrants issued to investors and placement agents was \$8,941,569, compared to an expense of \$1,082,735 for the same period of last year, a change of \$10,024,304 or 925.8% .

(j) Share of (Loss) of Associated Company

Investment losses were \$77,187 for the three months ended June 30, 2014, compared to a loss of \$15,517 for the corresponding period in 2013, an increase of \$61,670 or 397.4% primarily due to the write-off of our investment in Jinhua Service as this entity ceased operation and will be dissolved. For the three months ended June 30, 2014 and 2013, these losses were attributable to our 30% equity interest investment in Jinhua Service.

(k) Share of Profit (Loss) after Tax of the JV Company

The JV Company recorded a net income of \$728,994 for the three-month period ended June 30, 2014. As a result, we recorded 50% of its profit, or \$364,497 for the three month period ended June 30, 2014, due to our 50% ownership interest in the JV Company. After eliminating intra-entity profits and losses, our share of the after tax loss of the JV Company was \$9,526 for the three months ended June 30, 2014, compared to \$10,376 for the same period of last year, a decrease in loss of \$850 or 8.2% . Also refer to Note 21.

(l) Other Income, Net

Net other income was \$60,247 for the three months ended June 30, 2014, compared to \$54,148 for the same period of last year, an increase of \$6,099 or 11.3% . The increase was largely due to the sales of scrap.

(m) Net income

Net income was \$11,157,085 for the three months ended June 30, 2014, compared to net loss of \$1,044,300 for the same period in 2013, a change of \$12,201,385 or 1168.4% . The increase in net income was primarily attributable to the change in the fair value of warrants.

Excluding (i) the effects of stock award expenses, which were \$1,008,616 and \$35,350 for the three months ended June 30, 2014 and 2013, respectively, and (ii) the change of the fair value of financial derivatives, which was an income of \$8,941,569 and a expense of \$1,082,735 for the three months ended June 30, 2014 and 2013, respectively, our net income was \$3,224,132 (non-GAAP) for the three months ended June 30, 2014 as compared to a net income

of \$73,785 (non-GAAP) for the same period of 2013, an increase of \$3,150,347 or 4269.6%. This increase in net income was primarily attributable to the increase of revenue and gross profits during the six-month period.

The Company makes reference to certain non-GAAP financial measure, i.e., the adjusted net income. Management believes that such adjusted term is useful to investors in evaluating the Company's operating performance because it presents a meaningful measure of corporate performance. See the non-GAAP reconciliation table below. Any non-GAAP measures should not be considered as a substitute for, and should only be read in conjunction with, measures of financial performance prepared in accordance with GAAP.

	Three Months Ended June 30	
	2014	2013
GAAP net (loss) income	\$ 11,157,085	\$ (1,044,300)
Stock award expenses	1,008,616	35,350
Change of the fair value of financial derivatives	(8,941,569)	1,082,735
Non-GAAP net income	3,224,132	73,785

Financial Condition**Liquidity and Capital Resources****Working Capital**

We had a working capital surplus of \$28,708,114 as of June 30, 2014, compared to a working capital deficit of \$34,705,168 as of June 30, 2013.

As of June 30, 2014, the amount of advances to suppliers was \$52,841,904, which included the advance of RMB 323 million, or approximately \$52,454,650, for a prepayment by Kandi Wanning to an equipment supplier - Nanjing Shangdong Auto Technologies Co., Ltd. (Nanjing Shangdong) for equipment purchases relating to develop Kandi Wanning's manufacturing factory in Wanning. The equipment will be purchased and delivered according to the construction schedule and development of Kandi Wanning. This advance will be used to offset the equipment purchase price upon delivery.

As of June 30, 2014, we had credit lines from commercial banks of \$53,266,642, of which \$33,778,846 was used as of June 30, 2014.

We believe that our cash flows generated internally may not be sufficient to support the future growth in our operations and to repay short-term bank loans for the next twelve (12) months, if needed. However, we believe our access to existing financing sources and established relationships with PRC banks will enable us to meet our obligations and fund our ongoing operations.

We have historically financed our operations through short-term commercial bank loans from PRC banks. The term of these loans is typically for one year, and upon the payment of all outstanding principal and interest on a particular loan, the banks have typically rolled over the loan for additional one-year terms, with adjustments made to the interest rate to reflect prevailing market rates. We believe this situation has not changed and that short-term bank loans will be available on normal trade terms if needed.

On March 24, 2014, we raised approximately \$11.05 million by selling an aggregate of 606,000 shares of our common stock to two institutional investors at a price of \$18.24 per share. As part of the transaction, we also issued to the investors warrants for the purchase of up to 90,900 shares of common stock at an exercise price of 22.80 per share, which warrants have a term of 18 months from the date of issuance.

Capital Requirements and Capital Provided

Capital requirements and capital provided for the six months ended June 30, 2014 were as follows:

	Six Months Ended June 30, 2014 (In thousands)
<u>Capital requirements</u>	

Edgar Filing: Kandi Technologies Group, Inc. - Form 10-Q

Purchase of plant and equipment	\$	309
Purchases of land use rights		1,670
Purchase of construction in progress		23
Issuance of notes receivable		21,468
Repayments of short-term bank loans		16,764
Repayments of notes payable		16,601
Internal cash used in operations		37,184
Total capital requirements	\$	94,019
	48	

Capital provided

Repayments of notes receivable	26,020
Decrease in restricted cash	2
Proceeds from short-term bank loan	16,764
Proceeds from notes payable	13,021
Common stock and warrants issued	11,068
Warrant exercise	22,448
Other financing activities	4,406
Decrease in cash	1,475
Total capital provided	\$ 95,204

For further information, see the Statement of Cash Flows.

The difference between capital provided and capital requirement is the effect of exchange rate changes over the past six months.

Cash Flow

For the six months ended June 30, 2014, cash used in operating activities was \$37,184,388, as compared to cash used in operating activities of \$16,260,637 for the six months ended June 30, 2013. The major operating activities that provided cash for the six months ended June 30, 2014 were an increase in accounts payable of \$31,083,370 and a decrease in accounts receivable of \$11,955,855. The major operating activities that used cash for the six months ended June 30, 2014 were net loss of \$2,929,075, an increase in receivables from JV of \$31,680,191, an increase in prepayment and prepaid expenses of \$44,194,377, and an increase in inventories of \$8,544,033.

Cash provided by investing activities for the six months ended June 30, 2014 was \$2,550,376, as compared to cash used in investing activities of \$36,267,144 for the six months ended June 30, 2013. Cash provided by investing activities for the six months ended June 30, 2014 was primarily the result of the repayment of notes receivable of \$26,020,234. Cash used in investing activities for the six months ended June 30, 2014 was primarily the result of the issuance of notes receivable of \$21,468,326.

Cash provided by financing activities for the six months ended June 30, 2014 was \$34,342,308, as compared to cash provided by financing activities of \$51,261,846 for the six months ended June 30, 2013. Cash provided by financing activities for the six months ended June 30, 2014 was primarily the result of proceeds from short-term loans of \$16,764,023, proceeds from notes payable of \$13,020,600, common stock and warrants issued of \$11,067,734, and warrant exercises of \$22,447,914. Cash used in financing activities for the six months ended June 30, 2014 was primarily the result of repayment of short-term loans of \$16,764,023 and repayments of notes payable of \$16,601,265.

As of June 30, 2014, we had unrestricted cash of \$11,287,620. Our total current assets were \$146,098,513, and our total current liabilities were \$117,390,399, which resulted in a net working capital of \$28,708,114.

Recent Development Activities:

On July 1, 2014, Mr. Zhou Guohui, Head of Science and Technology Department of Zhejiang Province, Mr. Li Shufu, Chairman of the Board of Directors of the JV Company and Mr. Hu Xiaoming, President of the JV Company, made a special visit to Mr. Wan Gang, the Minister of PRC Ministry of Science and Technology, presenting the industrial development of the JV Company, the group long-term lease project, and the business model utilizing pure electric vehicles in Hangzhou Public EV Sharing System (the Car-Share Project), by which Minister Wan provided full support and promised to go to Hangzhou in furtherance of promotion at an appropriate time.

On July 9, 2014, the first supplier conference of the JV Company was successfully held in Hangzhou First World Hotel. The mutual goal was to seize opportunities to achieve win-win outcomes. With an aim to strengthen communication between the JV Company and its suppliers, so as to establish an effective platform and beneficial long-term relationships, the conference attracted more than 160 suppliers across the country. In the conference, the debut of Kandi's "Urban Beauty" EV model was made. This EV model was newly developed by the JV Company. All delegates showed great interest as the level of intelligence in this newly developed pure electrical vehicle largely exceeds previous standard.

At the same time, a research institute aimed at developing small-size electric vehicle was established to meet market demand and fulfill customer's need and Mr. Yu Wei was appointed as the head of the institute.

From April to July 2014, government officials from many pilot cities for new energy vehicle visited the JV Company to learn more about the business model of the Car-Share Project and group long-term lease.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Exchange Rate Risk

Our operations are conducted mainly in The People's Republic of China (the "PRC"). As such, our earnings are subject to movements in foreign currency exchange rates when transactions are denominated in Chinese Renminbi ("RMB"), which is our functional currency. Accordingly, our operating results are affected by changes in the exchange rate between the U.S. dollar and RMB currencies.

Economic and Political Risks

Our operations in the PRC are subject to special considerations and significant risks not typically associated with companies in North America and Western Europe. These include risks associated with, among others, the political, economic and legal environment in the PRC and foreign currency exchange. Our performance may be adversely affected by changes in the political and social conditions in the PRC, and by changes in governmental policies with respect to laws and regulations, anti-inflationary measures, currency conversion, remittances abroad, and rates and methods of taxation, among other things.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

We have evaluated, under the supervision of our Chief Executive Officer and our Chief Financial Officer, the effectiveness of disclosure controls and procedures as of June 30, 2014. This is done in order to ensure that information we are required to disclose in reports that are filed or submitted under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is: (i) recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and (ii) accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding disclosure.

Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures were not effective as of June 30, 2014, due to significant deficiencies in internal controls, which, in the aggregate, lead to a conclusion that a material weakness exists in the control environment as follows:

1. We have a lack of adequate policies and procedures in internal audit function, which may potentially result in: (1) lack of communication between our internal audit department and the Audit Committee and our Board of Directors; (2) insufficient internal audit work to ensure that our policies and procedures have been carried out as planned.

2. There was no self-assessment performed by the Audit Committee to assess the effectiveness of its in oversight of management.
3. We have an inadequate design of internal controls over the approval procedures for related-party transactions.

Changes in Internal Control over Financial Reporting

During the first six months of 2014, we took the initiative to enhance the effective and timely communication between our internal audit department and our Audit Committee. We reorganized our internal audit department so that the head of such department reports directly to the Audit Committee on any reportable issue to enhance the independence and objectivity of the internal audit function. In addition, the internal audit department revisited the policies and procedures of internal audit and made modification to keep internal audit workflow in compliance with SEC requirements. On May 30, 2014, the Audit Committee of the Board of Directors held a special meeting and approved the new Internal Audit Activity Charter.

During the first six months of 2014, the Board of Directors also evaluated the design of internal controls over the approval procedures for related-party transactions, and developed a set of revised approval procedures for related-party transactions. On May 30, 2014, the Audit Committee of the Board of Directors held a special meeting and approved the new Management Policy on Related Party Transactions.

In July 2014, the Chairman of the Audit Committee of the Board of Directors met with our management, our internal audit team and our independent auditor to review the progress of implementation of the remediation measures and spearheaded a comprehensive remediation plan to fully address the deficiencies in our internal controls. We intend to complete the project in a timely fashion and will conduct quarterly assessments of the state of our financial reporting measures and systems, as a whole.

Aside from the remediation measures that we initiated during this reporting period described above, there was no change to our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

On November 21, 2013, the Company received a subpoena from the SEC seeking the production of various categories of documents in an investigation entitled *In the Matter of Kandi Technologies Group, Inc.* The Company has cooperated fully with the SEC's investigation and intends to continue doing so by providing whatever documents and other information requested. The Company has no information at present regarding the duration or outcome of the investigation. The November 21, 2013 subpoena stated that the investigation is a fact-finding inquiry and its existence does not mean that any laws have been violated. While impossible to predict definitively, the Company does not anticipate a negative result.

Item 1A. Risk Factors.

If we fail to maintain an effective system of internal controls, we may not be able to accurately report our financial results or prevent fraud. As a result, current and potential shareholders could lose confidence in our financial reporting, which would harm our business and the trading price of our stock.

Effective internal controls are necessary for us to provide reliable financial reports and effectively prevent fraud. As directed by Section 404 of the Sarbanes-Oxley Act of 2002, or SOX 404, the SEC adopted rules requiring public companies to include a report of management on our internal controls over financial reporting in their annual reports. As of June 30, 2014, our SOX certifying officers concluded that, the Company's disclosure controls and procedures were not effective as of June 30, 2014, due to significant deficiencies in internal controls, which, in the aggregate, lead to a conclusion that a material weakness exists in the control environment.

As a result, we are in the process of improving our internal control procedures. Although we believe that we achieved significant progress in addressing the identified material weaknesses, in our view, such efforts have not yet yielded the results required to fully remediate the material weaknesses. This remediation work is ongoing and we intend to complete it in a timely fashion. If we cannot provide financial reports or prevent fraud, our business reputation and operating results could be harmed. Inferior internal controls also could cause investors to lose confidence in our reported financial information, which could have a negative effect on the trading price of our stock.

Item 6. Exhibits

Exhibit Number	Description
