Edgar Filing: GARDNER DENVER INC - Form 10-Q

(dollars in thousands, except per share data)

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES.

Basis of Presentation. The accompanying condensed financial statements include the accounts of Gardner Denver, Inc. ("Gardner Denver" or the "Company") and its subsidiaries. All significant intercompany transactions and accounts have been eliminated. Investments in entities in which the Company has twenty to fifty percent ownership are accounted for by the equity method.

The financial information presented as of any date other than December 31 has been prepared from the books and records without audit. The accompanying condensed consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all of the information and footnotes required by generally accepted accounting principles for complete statements. In the opinion of management, all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of such financial statements, have been included.

These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto incorporated by reference in Gardner Denver's Annual Report on Form 10-K for the year ended December 31, 2000.

The results of operations for the three months ended March 31, 2001 are not necessarily indicative of the results to be expected for the full year.

Certain prior year amounts have been reclassified to conform with current year presentation.

NOTE 2. RECENT ACQUISITIONS.

During 2000, the Company completed three acquisitions. Effective July 1, 2000, the Company acquired 100% of the issued and outstanding stock of CRS Power Flow, Inc. ("CRS"). On April 5, 2000, the Company acquired 100% of the issued and outstanding stock of Jetting Systems & Accessories, Inc. ("JSA"). CRS and JSA are both located in Houston, Texas. On January 1, 2000, the Company acquired substantially all of the assets and assumed certain agreed upon liabilities of Invincible Airflow Systems, Co., located in Baltic, Ohio.

All acquisitions have been accounted for by the purchase method, and accordingly, their results are included in the Company's consolidated financial statements from the respective dates of acquisition. Under the purchase method, the purchase price is allocated based on the fair value of assets received and liabilities assumed as of the acquisition date. The purchase price allocations for CRS and JSA, used in preparation of the March 31, 2001 consolidated balance sheet, are preliminary and subject to adjustment when finalized. Management does not expect the finalization of this allocation to have a significant impact on the Company's financial position or results of operations.

-5-

As a result of the stability of the product technology, markets and customers associated with these acquisitions, the cost in excess of net assets acquired for each acquisition is being amortized over 40 years, using the straight-line method.

Edgar Filing: GARDNER DENVER INC - Form 10-Q

NOTE 3. EARNINGS PER SHARE.

NOTE 5. COMPREHENSIVE INCOME.

For the three months ended March 31, 2001 and 2000, comprehensive income was \$4.3 million and \$3.2 million, respectively. Items impacting the Company's comprehensive income, but not included in net income, consist of translation adjustments including realized and unrealized gains and losses, net of income taxes, on the foreign currency hedge of the Company's investment in a foreign subsidiary.

NOTE 6. CASH FLOW INFORMATION.

In the first three months of 2001 and 2000, the Company paid \$0.7 million and \$0.4 million, respectively, to the various taxing authorities for income taxes. Interest paid for the first three months of 2001 and 2000, was \$2.4 million and \$1.4 million, respectively.

NOTE 7. SEGMENT INFORMATION.

	-----	-----
Income before Income Taxes	\$ 7,617	\$ 6,382
	=====	=====

NOTE 8. NEW ACCOUNTING STANDARDS.

Effective January 1, 2001, the Company adopted Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities," (FAS 133) as amended, which requires that all derivative instruments be reported on the balance sheet at fair value and establishes criteria for designation and effectiveness of hedging relationships. The adoption of FAS 133 did not have a material effect on the Company's operating results or financial condition.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

RESULTS OF OPERATIONS.

Revenues

Revenues increased \$11.7 million (13%) to \$100.9 million for the three months ended March 31, 2001, compared to the same period of 2000. Excluding incremental revenue from acquisitions, revenues increased \$9.9 million (11%) over the same period of 2000. See Note 2 to the Financial Statements for further information on the Company's recent acquisitions.

For the three months ended March 31, 2001, revenues for the Compressed Air Products segment increased \$1.5 million (2%) to \$79.9 million compared to the same period of 2000 due to acquisitions, increased rotary screw compressor volume in Europe partially offset by unfavorable foreign currency exchange rates. Petroleum Products segment revenues increased \$10.2 million (95%) to \$21.0 million for the three months ended March 31, 2001, compared to the same period of 2000. This increase resulted from heightened demand for petroleum products due to the continued high level of oil and natural gas prices.

Costs and Expenses

Gross margin (defined as sales less cost of sales excluding depreciation and amortization) for the three months ended March 31, 2001 increased \$3.2 million (12%) to \$29.4 million compared to the same period of 2000. Gross margin as a percentage of revenues (gross margin percentage) decreased slightly to 29.2% in the three-month period of 2001 from 29.4% in the same period of 2000. This reduction in the gross margin percentage was principally attributable to an overall unfavorable sales mix (in part relating to increased petroleum product sales), and higher warranty expense in the Compressed Air Products segment.

Depreciation and amortization increased 10% to \$4.3 million in the first three months of 2001, compared with \$3.9 million for the same period of 2000. The increase in depreciation and amortization expense was due to ongoing capital expenditures and goodwill amortization associated with acquisitions. For the three-month periods, depreciation and amortization expense as a percentage of revenues decreased to 4.2% in 2001 from 4.4% in 2000. This percentage decrease is due to the effect of higher revenues in 2001.

Selling and administrative expenses increased in the first three months of 2001 by 8% to \$16.6 million from \$15.5 million in the same period of 2000. Excluding incremental expenses from acquisitions, selling and administrative expenses increased \$0.9 million (6%), which was primarily the result of higher commissions and payroll related expenses. Due to the higher revenues, selling and administrative expenses as a percentage of revenues declined to 16.5% in the first quarter of 2001 compared to 17.3% in 2000.

Other income includes approximately \$0.7 million from litigation settlement proceeds for the three months ended March 31, 2001 and a \$0.7 million gain from the sale of the Company's idle facility in Syracuse, New York recorded in the three months ended March 31, 2000. The decrease in other income of \$0.3 million in 2001 compared to 2000 is due to lower foreign

Edgar Filing: GARDNER DENVER INC - Form 10-Q

currency gains generated from U.S. dollar denominated cash and receivable balances of foreign subsidiaries.

The Compressed Air Products segment generated operating margins (defined as revenues, less cost of sales, depreciation and amortization, and selling and administrative expenses) of 6.8% for the three-month period ended March 31, 2001, a decrease from 7.9% for the three-month period of 2000. This decline is due to increased warranty, commission and payroll related expenses.

The Petroleum Products segment generated operating margins of 14.6% for the three-month period ended March 31, 2001, compared to 6.8% for the same period in 2000. This increase is primarily attributable to the positive impact of increased leverage of the segment's fixed and semi-fixed costs over a higher revenue base.

Interest expense remained flat at \$1.8 million, as lower average borrowings were offset by higher average interest rates. The average interest rate for the three-month period of 2001 was 6.3%, compared to 5.9% for the same period of 2000.

Income before income taxes increased \$1.2 million (19%) to \$7.6 million for the three months ended March 31, 2001, compared to the same period of 2000. This increase is primarily the result of increased leverage of fixed costs over a higher revenue base in the Petroleum Products segment as mentioned above.

The provision for income taxes increased by \$0.4 million to \$2.8 million for the first three months of 2001 compared to \$2.4 million in 2000, as a result of the higher income before taxes partially offset by a lower overall effective tax rate. The Company's effective tax rate for the three months ended March 31, 2001 decreased to 37.0%, compared to 38.1% in the prior year period due to increased savings from the Company's foreign sales corporation and the implementation of other tax strategies.

Net income for the three months ended March 31, 2001 increased \$0.8 million (21%) to \$4.8 million (\$0.31 diluted earnings per share), compared to \$4.0 million (\$0.26 diluted earnings per share) for the same period of 2000. This increase in net income is attributable to the same factors that resulted in increased income before taxes noted above.

Outlook

Demand for petroleum products has historically been related to market conditions and expectations for oil and natural gas prices. Orders for petroleum products were \$27.3 million in the first quarter of 2001, an increase of \$13.7 million compared to the same period of 2000. Compared to March 31, 2000, backlog for this business segment increased \$8.9 million to \$18.4 million on March 31, 2001. These increases can primarily be attributed to the continued high level of oil and natural gas prices. Future increases in demand for these products will likely be dependent upon oil and natural gas prices remaining near current levels, which the Company cannot predict. However, the Company believes that if oil and natural gas prices remain near current levels, and day rates and the rig count continue to increase, demand for well servicing pumps and drilling pumps will continue to improve in 2001.

Edgar Filing: GARDNER DENVER INC - Form 10-Q

In general, demand for compressed air products follows the rate of manufacturing capacity utilization and the rate of change of industrial production because compressed air is often used as a fourth utility in the manufacturing process. Over longer time periods, demand also follows the economic growth patterns indicated by the rates of change in the Gross Domestic Product. In the first quarter of 2001, orders for compressed air products were \$82.6 million, including \$1.8 million from acquisitions, compared to \$79.7 million in the same period of 2000. Order backlog for the Compressed Air Products segment was \$51.5 million as of March 31, 2001, compared to \$50.1 million as of March 31, 2000. These increases are primarily the result of acquisitions and growth in European rotary screw compressor and domestic water jetting products order levels, partially offset by unfavorable foreign currency rates, a reduction in manufacturing lead times and increased inventory levels on certain products.

LIQUIDITY AND CAPITAL RESOURCES

Operating Working Capital

During the three months ended March 31, 2001, operating working capital (defined as receivables plus inventories, less accounts payable and accrued liabilities) increased \$6.8 million due to higher inventory and lower accounts payable and accrued liabilities.

Cash Flows

During the three months of 2001, the Company generated cash from operations totaling \$1.8 million, compared to a use of \$5.2 million in the prior year period. This change is due to the higher net income coupled with a more favorable change in operating working capital compared to the prior year period. Net payments on long-term debt totaled \$9.1 million during the three months ended March 31, 2001. Cash used for other financing activities of \$0.7 million for the three months ended March 31, 2001 represents dividends paid to a minority interest of one of the Company's foreign subsidiaries. The cash flows provided by operating activities and used in investing and financing activities resulted in a net cash decrease of \$10.5 million for the three months ended March 31, 2001.

Capital Expenditures and Commitments

Capital projects to increase operating efficiency and flexibility, expand production capacity and product quality resulted in expenditures of \$2.7 million in the first three months of 2001. This was \$1.0 million higher than the level of capital expenditures in the comparable period in 2000 due to the timing of capital projects. Commitments for capital expenditures at March 31, 2001 totaled \$4.0 million. Management expects additional capital authorizations to be committed during the remainder of the year and that capital expenditures for 2001 will approximate \$15 million, primarily due to expenditures for cost reductions and additional machining capacity at certain operations. Capital expenditures related to environmental projects have not been significant in the past and are not expected to be significant in the foreseeable future.

In October 1998, Gardner Denver's Board of Directors authorized the repurchase of up to 1,600,000 shares of the Company's common stock to be used for general corporate purposes. Approximately 200,000 shares remain available for repurchase under this program. The Company has also established a Stock Repurchase Program for its executive officers to provide a means for them to sell Gardner Denver common stock and obtain sufficient funds to meet alternative

minimum tax obligations which arise from the exercise of incentive stock options. As of March 31, 2001, a total of 1,572,542 shares have been repurchased at a cost of \$22.8 million under both repurchase programs. During the first quarter of 2001, the Company accepted shares of its common stock, valued at \$0.1 million, which were tendered for the exercise of stock options.

Liquidity

The Company has a revolving line of credit agreement with an aggregate \$125 million borrowing capacity (the "Credit Line"). On March 31, 2001, the Credit Line had an outstanding balance of approximately \$70 million, leaving \$55 million available for future use. The Credit Line requires no principal payments during the term of the agreement, which expires in January 2003.

The Company's borrowing arrangements are generally unsecured and permit certain investments and dividend payments. There are no material restrictions on the Company as a result of these arrangements, other than customary covenants regarding certain earnings, liquidity, and capital ratios.

Management currently expects that the Company's future cash flows will be sufficient to fund the scheduled debt service under existing credit facilities and provide required resources for working capital and capital investments.

CAUTIONARY STATEMENTS REGARDING FORWARD-LOOKING STATEMENTS

All of the statements in this Management's Discussion and Analysis, other than historical facts, are forward-looking statements made in reliance upon the safe harbor of the Private Securities Litigation Reform Act of 1995, including, without limitation, certain statements made under the caption "Outlook". As a general matter, forward-looking statements are those focused upon anticipated events or trends and expectations and beliefs relating to matters that are not historical in nature. Such forward-looking statements are subject to uncertainties and factors relating to Gardner Denver's operations and business environment, all of which are difficult to predict and many of which are beyond the control of the Company. These uncertainties and factors could cause actual results to differ materially from those matters expressed in or implied by such forward-looking statements. The following uncertainties and factors, among others, could affect future performance and cause actual results to differ materially from those expressed in or implied by forward-looking statements: the ability to identify, negotiate and complete future acquisitions; the speed with which the Company is able to integrate its recent acquisitions and realize the related financial benefit; the domestic and/or worldwide level of oil and natural gas prices and oil and gas drilling and production, which affect demand for the Company's petroleum products; changes in domestic and/or worldwide industrial production and industrial capacity utilization rates, which affect demand for the Company's compressed air products; pricing of Gardner Denver products; the degree to which the Company is able to penetrate niche markets; the ability to maintain and to enter into key purchasing and supply relationships; and the continued successful implementation of cost reduction efforts.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There were no material changes in the Company's exposure to market risk between December 31, 2000 and March 31, 2001.
