WOODWARD REPORTS THIRD FISCAL QUARTER AND NINE MONTHS RESULTS

Rockford, Ill., July 21, 2003--Woodward Governor Company (Nasdaq: WGOV) today reported financial results for the third fiscal quarter and nine months ended June 30, 2003.

Net sales for the quarter were \$141,637,000, down 18 percent from \$171,888,000 in the third quarter a year ago. Sales levels were lower in both Industrial Controls and Aircraft Engine Systems due to continued adverse market conditions. Woodward incurred a net loss for the quarter of \$165,000, or \$0.01 per share (all per-share amounts are diluted), compared with net earnings of \$14,611,000, or \$1.26 per share in the same quarter last year. The earnings decline is due primarily to the continued reverse leverage effect of the drop in sales volumes compared to fixed costs and development costs necessary to satisfy current and future requirements of our core customers.

On May 30, 2003, we acquired Synchro-Start Products Inc. to expand our position in the small, high-speed diesel engine market. Synchro-Start designs and manufactures actuators, solenoids, and controls for industrial engines and equipment. The acquired business is expected to add approximately \$30,000,000 of

Edgar Filing: WOODWARD GOVERNOR CO - Form 8-K

revenue in fiscal year 2004 and is expected to be accretive to earnings in the first full year of operation.

For the nine months ended June 30, 2003, net sales were down 18 percent to \$432,621,000, compared to \$527,405,000 for the corresponding nine months a year ago. Earnings before the cumulative effect of an accounting change declined 75 percent to \$10,611,000, or \$.94 per share for the nine-month period.

"In sharp contrast to the lower financial results for the quarter and year to date, we continue to make steady strategic progress in new product and business development, and we have solidified our relationships with existing customers," said Chairman and Chief Executive Officer John A. Halbrook.

"Our strategy, based on our competitive advantages and financial strength, is to seize intermediate- and long-term opportunities for winning leading shares in existing and future market niches. We believe that by committing resources now for promising OEM product

development programs and complementary acquisitions, such as Synchro-Start, we will create long-term shareholder value. Transforming our progress into earnings growth will be evident as markets stabilize and improve.

"To preserve our position and implement our strategies, we took a series of previously disclosed actions this year, including aligning capacity with sales volume, integrating various Industrial Controls and Aircraft Engine Systems processes, and consolidating global purchasing. We expect these actions to reduce our 2004 operating costs by at least \$20,000,000 and sharpen our focus on core capabilities," said Mr. Halbrook.

"Given the adverse industry conditions in our largest markets, we anticipated the second half of fiscal 2003 would be challenging," added Mr. Halbrook. "Yet, we are gaining market share through new product introductions, component and system applications, and acquisitions."

Industrial Controls' net sales were \$83,122,000 for the third quarter, down 21 percent from the third quarter a year ago. Industrial Controls incurred a loss of \$4,479,000 compared to earnings of \$12,145,000 for the third quarter last year. Expenses totaling about \$2,900,000 associated with workforce management activity, a write-off of certain advance license fees, and the transfer of an overseas pension to a different plan were recognized in this year's third quarter.

Industrial Controls' performance reflected the continued investment in customer-driven new product development, maintaining the activities and functions necessary to sustain our present and future business, as well as the charges mentioned above.

Aircraft Engine Systems net sales were \$58,515,000 for the third quarter, compared to \$66,117,000 in the third quarter a year ago. This decline of 11 percent reflects fewer aircraft being built and the ongoing industry-wide downturn in air travel, which was exacerbated by the war in Iraq as well as concerns about Severe Acute Respiratory Syndrome (SARS).

Segment earnings were \$8,824,000, compared to earnings of \$15,288,000 for the third quarter last year. Expenses related to the consolidation of Aircraft Engine Systems' servovalve operations into its Rockford facilities totaled approximately \$1,900,000 in this year's third quarter.

Halbrook concluded, "With the outlook for our key target markets and the global economy highly uncertain, forecasting near-term revenues and earnings is

Edgar Filing: WOODWARD GOVERNOR CO - Form 8-K

inherently difficult. We plan to discuss the outlook for fiscal 2004 when we report the full fiscal year 2003 in November. Currently, we continue to believe that earnings for 2004 will exceed those of 2003, attributable to market share gains, cost reductions achieved through actions this year, as well as acquisitions."

Woodward will hold an investor conference call at 7:30 a.m. CT on Tuesday, July 22, 2003, to provide an overview of the third quarter's financial performance, business highlights, and outlook for the remainder of the year. You are invited to listen to the live Webcast of our conference call or a recording on our Web site at www.woodward.com.

ABOUT WOODWARD

Woodward is the world's largest independent designer and manufacturer of energy control solutions for aircraft and industrial engines, turbines and power equipment. The company's innovative controls and fuel delivery systems help manufacturers worldwide operate cleaner and more efficient power equipment. Woodward's products and services are used in the aerospace, power generation, oil and gas processing, and transportation markets, which include rail, marine and many light and heavy industrial applications. Woodward is headquartered in Rockford, Illinois, and serves global markets from locations worldwide. Visit our Web site at www.woodward.com.

The statements in this release concerning the company's future sales, earnings, business performance, prospects, and the economy in general reflect current expectations and are forward-looking statements that involve risks and uncertainties. Such risks include, but are not limited to, further decline in sales levels in one or more of our markets, our ability to reduce expenses, and the continued demand for and progress on our development programs. Actual results could differ materially from projections or any other forward-looking statement and we have no obligation to update our forward-looking statements. Factors that could affect performance and could cause actual results to differ materially from projections and forward-looking statements are described in Woodward's Annual Report and Form 10-K for the year ended September 30, 2002, and Form 10-Q for the quarterly period ended June 30, 2003, expected to be available by early August.
