PART I

ITEM 1. BUSINESS

Significant Developments in 2004

Challenges. 2004 was a tumultuous year for Gold Banc Corporation, Inc. We faced many challenges that diverted management's attention from our core business and adversely affected our financial performance:

- We continued to deal with the aftermath of the discovery in 2002 that our former CEO had misappropriated funds from our subsidiary bank. Throughout 2004, we continued to strengthen our internal controls, improve the internal audit function, enhance our information technology controls and security and take other actions required by our written agreement, dated August 26, 2003 (the "Written Agreement") with the Federal Reserve Board of Kansas City (the "FRB-KC") and the Kansas Office of the State Bank Commissioner (the "OSBC").
- Our clean-up of the misappropriations included a final agreement with the Securities and Exchange Commission (the "SEC"). On March 5, 2004, we voluntarily submitted to the SEC a settlement offer to consent to the entry of an order providing that we cease and desist from committing violation of Section 13(a) and 13(b)(2) of the Securities Exchange Act of 1934 and Rules 13a-1 and 13a-3 thereunder. On May 4, 2004, the SEC accepted our settlement offer and issued the order. No fines or penalties were levied against us, or any of our current directors, officers or employees.
- We spent extensive time and incurred significant expenses in 2004 exploring and pursuing strategic alternatives. Most of this time and expense was incurred in evaluating a proposed business combination with Silver Acquisition Corp. ("Silver"), gathering information for Silver's due diligence review, and negotiating and seeking to implement the merger agreement with Silver that was executed on February 24, 2004. Under the merger agreement, Silver would have acquired all of our outstanding common stock for \$16.60 per share in cash, plus an additional \$.0023 per share each day after July 23, 2004 that the closing of the merger was delayed. The merger was subject to various conditions, including regulatory approval. On October 11, 2004, we terminated the merger agreement with Silver. Our termination was based in large part upon Silver's statements that it could not obtain regulatory approval of the merger at the purchase price per share set forth in the merger agreement.
- We also recorded a \$10.8 million impairment charge related to the write down on three high-yield, tax-free investments. There are no such remaining high-yield, tax-free investments in our portfolio.

Unforeseen Litigation. During 2004, we had to defend unforeseen litigation, some of which we won, some of which we settled and some of which remains pending:

- On March 10, 2004, we and nine of our directors were sued in a class action case in the District Court of Johnson County, Kansas for alleged breaches of fiduciary duty and conflicts of interest related to our repurchase of 530,000 shares from our former CEO and the proposed merger with Silver. On July 7, 2004, the case was dismissed with prejudice, with no payment to the plaintiff.
- On June 14, 2004, we were notified that a *qui tam* lawsuit was pending against us in United States District Court in Oklahoma City, Oklahoma alleging violations of the False Claims Act relating to payments we received under the Farm Service Agency ("FSA") guaranteed loan program. On November 19, 2004, the court approved a settlement of that case in which we paid \$16 million to the federal government but admitted no wrongdoing.
- On September 10, 2004, a class action case was filed against us in the District Court of Kingfisher County, Oklahoma. On September 23, 2004, a second class action case was filed against us in United States District Court for the Western District of Oklahoma. Both class actions were brought on behalf of farm borrowers under our FSA guaranteed loan program and contained various claims related to our operation of such loan program. The federal case was dismissed on January 26, 2005, but on February 2, 2005, the same plaintiffs refiled their claims in the District Court of Washita County, Oklahoma. Both state cases remain pending.

Refinancings. On the positive side, we completed several significant refinancings that repositioned our balance sheet, lowered the interest rates on our trust-preferred securities and increased our borrowing capacity:

1

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

- On March 15, 2004, we issued to investors through subsidiary trusts \$46.0 million of new trust-preferred securities. On April 22, 2004, we used the proceeds to redeem approximately \$45.0 million of our outstanding higher cost trust-preferred securities.
- On October 1, 2004, we entered into a new \$25.0 million line of credit with Bank One, N.A. This replaced a \$10.0 million line of credit from LaSalle Bank.
- On November 10, 2004, we issued through a subsidiary trust \$38.0 million of new trust-preferred securities. On November 15, 2004 we used the proceeds to redeem \$37.6 million of our outstanding higher cost trust-preferred securities.

Repositioning. We took definitive steps in 2004 to implement our franchise repositioning strategy by consolidating our subsidiary banks, divesting rural branches which were not located in metropolitan statistical area ("MSA") markets and focusing our capital and human resources in high-growth metropolitan markets:

- On April 2, 2004, we merged our Oklahoma bank with and into our Kansas bank.
- On August 31, 2004, we merged our Florida bank with and into our Kansas bank.
- During 2004, we sold 8 rural Kansas branches and 3 rural Oklahoma branches in 3 separate transactions. We recorded gains of approximately \$20.6 million from the sale of these branches.
- We disposed of CompuNet Engineering, Inc. as well as most of our merchant banking investments.
- We negotiated the sale of 5 additional Oklahoma branches in a pending sale, which we announced on January 18, 2005.

Examinations. Our business and its operations underwent intensive internal and external examination and review during 2004:

- In late 2004, federal and state bank examiners conducted a comprehensive examination of our bank. Based upon such examination, the regulators were satisfied with the condition of our bank and concluded that we were in substantial compliance with the terms of our Written Agreement.
- In 2004 and 2005, we conducted a comprehensive review of our internal control procedures as required by Section 404 of the Sarbanes-Oxley Act.

Notwithstanding the challenges we faced in 2004, the tremendous time and effort of our management and employees during the year has made us a stronger and more focused company. Our repositioning is nearly completed. We are well prepared to execute our business that is designed to achieve our Vision and Mission, which are described below.

Bottom line, 2004 was difficult, but great progress was made repositioning our company for growth in 2005 and beyond.

Renewed, Refined and Intense Focus in 2005

With our repositioning nearly complete and the aforementioned distractions behind us, we have a renewed, refined and intense focus on our direction for the future.

Our Vision. We will be known as a focused and efficient financial services holding company exhibiting superior growth and a strong capital base. Gold Bank will offer Business Banking, Asset Management and Personal Banking through a "Super Community Business Bank," operating in select high-growth markets with superior demographics.

Our Mission and Values. We will become a "Super Community Business Bank" by creating success through the quality of our associates, the quality of the services and products they offer our customers and their businesses, and the return we will achieve for our stockholders.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

We are updating our "More Than Money" trademark with a new credo, "We're Here for You." This credo simply states our philosophy that we are here for our customers, our associates and our stockholders.

We will achieve our mission and demonstrate our values by:

2

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

- operating as a market-driven organization, sensitive to the customers and markets we serve;
- offering profitable, specialized financial products and superior customer service to individuals and small and medium-sized businesses;
- providing our associates an environment of respect, paying a fair wage and providing access to a competitive array of benefits;
- holding all associates to the highest ethical and corporate governance standards;
- trusting each other to perform our duties in a professional and ethical manner;
- working together in a positive and effective manner to attain our common goals;
- making all decisions for the good of our company and its stockholders, as opposed to the benefit of a particular subsidiary, division, location or individual;
- enhancing shareholder value through share appreciation by being the bank of choice throughout the markets we serve and by striving for productivity and operating efficiency at all levels, while maintaining high standards of quality and customer service;
- allocating our capital to those products and markets which will allow us to consistently achieve superior returns while managing risks; and
- encouraging corporate and employee support for the markets we serve.

Strategic Focused Growth. We plan to grow through de novo branching in our high-growth metropolitan markets. Organic growth in existing locations is our primary objective; however, we may consider selected acquisition of established branches or companies, especially in our primary markets. Our criteria for new branch locations are (1) high-growth metropolitan market, (2) attractive demographics, and (3) strong local management.

Excess Regulatory Capital. As a result of the divestiture of our rural branches and the issuance of our new trust-preferred securities, we are comfortably above the "well-capitalized" level for both the bank and holding company. We plan to maintain the bank's regulatory capital in excess of minimum "well-capitalized" regulatory requirements. Overall, we plan to monitor and manage our capital to maximize long-term stockholder value in the manner described in Management's Discussion and Analysis of Financial Condition and Results of Operations.

The Company and Subsidiaries

Gold Banc Corporation, Inc. Our company, Gold Banc Corporation, Inc., is a Kansas corporation, a registered bank holding company under the Bank Holding Company Act and a financial holding company under the Graham-Leach-Bliley Act. We are subject to regulation by the Federal Reserve Board (the "FRB"). Our principal executive offices are located at 11301 Nall Avenue, Leawood, Kansas 66211, and our telephone number is (913) 451-8050.

As a financial holding company, we are eligible to engage in a broad range of financial activities. "Financial activities" include not only banking and securities activities, but also investment advisory and additional activities that the FRB determines to be financial in nature or complementary to such activities.

We own all of the outstanding stock of a commercial bank with 38 branches in 18 communities in Kansas, Missouri, Oklahoma and Florida. At the beginning of the year we operated primarily through three subsidiary banks: Gold Bank-Kansas, Gold Bank-Oklahoma and Gold Bank-Florida. As a result of mergers completed during 2004, we have consolidated our subsidiary banks into a single Kansas-chartered bank operating as "Gold Bank." In addition to our bank, we also own five non-bank financial services subsidiaries. Our financial services subsidiaries provide securities brokerage, investment management and trust services. The remaining two, our insurance agency and investment advisory services businesses, are largely inactive.

We and Gold Bank are headquartered in Johnson County, Kansas. Johnson County is a suburban community near Kansas City, Missouri. Johnson County has a competitive banking environment. Its robust economic growth has enabled Gold Bank to rapidly grow its loans and deposits in the county. Gold Bank has eleven branches in the growing areas of Johnson County and 6 branches in the remainder of the Kansas City metropolitan area. We entered the Kansas City, Missouri market with our acquisition in 2000 of First Business Bank of Kansas City. We promptly merged that bank into Gold Bank-Kansas and then into Gold Bank.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

We entered the Tulsa, Oklahoma market in 1998 with the acquisition of Citizens Bank of Tulsa, which was subsequently merged into Gold Bank-Oklahoma and then merged into Gold Bank. The Tulsa location serves a growing area in southeastern Tulsa, a light-industrial district that is home to more than 5,000 small businesses, and is a mature residential area of Tulsa. A third branch was opened in a developing residential area of south Tulsa during the second quarter of 1999.

We entered the Oklahoma City market and the communities in central and western Oklahoma with the acquisition of CountryBanc Holding Company in March 2000. CountryBanc's two subsidiary banks, People First and American Heritage, were merged along with Citizens Bank of Tulsa to create Gold Bank-Oklahoma. Gold Bank-Oklahoma was then merged into Gold Bank and serves selected markets in central and northeastern Oklahoma.

We entered the Bradenton and Sarasota, Florida market on the highly popular and rapidly growing west coast of the state between Tampa Bay and Naples with the acquisition of American Bank in March 2000. The American Bank acquisition provided us with access to a diversified market that has been one of the fastest growing population areas in the United States for the past ten years. The demographics and per capita income levels are believed to be very promising for the development of our wealth and asset management services. In 2002, we opened a new branch in Tampa Bay and a new branch in downtown Sarasota. In 2002, we changed the bank's name to Gold Bank-Florida, and in 2004 it was merged into Gold Bank.

Financial services, including traditional and on-line banking, brokerage, trust, mortgage and investment management, are offered to customers of Gold Bank, either directly through representatives located in bank offices or through telecommunication links with the non-bank offices.

Our Subsidiary Bank

Gold Bank, which we formerly referred to as Gold Bank-Kansas, is a Kansas state bank that began 2004 with 18 branches located throughout the State of Kansas as well as 5 Missouri branches in the greater Kansas City area. During 2004, we merged our wholly-owned subsidiaries Gold Bank-Oklahoma and Gold Bank-Florida into Gold Bank-Kansas. The resulting entity we now refer to solely as Gold Bank. As a result of the mergers of the bank charters, Gold Bank currently has 13 branches located in the State of Kansas, 6 Missouri branches in the greater Kansas City area, 8 branches in Oklahoma, and 11 branches in the Tampa Bay, Sarasota and Bradenton, and Port Charlotte areas of Florida.

Gold Bank is a full service bank that conducts a general banking and trust business, offering its customers checking and savings accounts, debit cards, certificates of deposit, trust services, safe deposit boxes and a wide range of lending services, including: credit card accounts, commercial and industrial loans, single payment personal loans, installment loans, construction and development loans and commercial and residential real estate loans. The Bank's loan portfolio consists primarily of commercial and industrial and commercial real estate loans.

Our Active Financial Services Subsidiaries

Gold Financial Services, Inc. Gold Financial Services is a wholly-owned subsidiary of Gold Banc Corporation and serves as an intermediate holding company for our financial services subsidiaries engaged in insurance, trust, brokerage, investment advisory services and merchant banking.

Gold Capital Management, Inc. Gold Capital Management is registered with the SEC as a securities broker-dealer and investment advisor, and is a member of the National Association of Securities Dealers (NASD). It is also licensed in Florida, Kansas, Missouri and Oklahoma as an insurance agency. Gold Capital Management's customers consist mostly of financial institutions located throughout the Midwest. Gold Capital Management manages a wide variety of fixed income portfolios for clients that currently include a significant number of commercial banks located primarily in Kansas, Missouri, Oklahoma, Nebraska and Iowa. Gold Capital Management also provides services to trusts, pension plans, insurance companies, commercial businesses, government entities, foundations and high-net-worth individuals. Gold Capital Management is headquartered in Overland Park, Kansas, and is a wholly-owned subsidiary of Gold Financial Services.

Gold Trust Company. Gold Trust Company is a Missouri non-depository trust company that is headquartered in St. Joseph, Missouri. Gold Trust Company provides trust services at Gold Bank branch locations in Missouri,

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

Kansas, Florida and Oklahoma. As of December 31, 2004, Gold Trust Company had approximately \$825 million in discretionary trust assets under management and approximately \$424 million in non-discretionary trust assets under administration. Gold Trust Company is a wholly-owned subsidiary of Gold Financial Services.

Dispositions and Consolidations During 2004 and Early 2005

Pursuant to our strategy to increase our presence in higher growth metropolitan areas, we have sold most of our rural branches and redeployed our capital to acquire deposits in metropolitan areas. We believe that the transactions described below will have a positive impact on our business, capital and liquidity.

Sale of Seven Gold Bank-Kansas branches. On September 16, 2003, we announced that we had entered into an agreement for the sale of 7 Gold Bank-Kansas branches. An employee-investor group led by the regional Gold Bank-Kansas president in Marysville, Kansas, agreed to purchase the Gold Bank-Kansas branches. The sale of the Gold Bank-Kansas branches closed on February 13, 2004. As of the date of closing, the deposits and loans of the 7 Gold Bank-Kansas branches were approximately \$333.4 million and \$194.8 million, respectively. Total property, plant and equipment net of accumulated depreciation was \$3.8 million. In addition, goodwill of \$0.6 million was allocated to these branches. Such are shown as assets and liabilities held for sale as of December 31, 2003. In connection with the sale of these branches, we recorded a gain of approximately \$16.2 million.

Sale of Elkhart branch. On August 28, 2003, Gold Bank-Oklahoma entered into an agreement for the sale of its branch location in Elkhart, Kansas to ColoEast Bankshares. The sale of this Gold Bank-Oklahoma branch closed on February 5, 2004. As of the date of closing, the deposits and loans of this Gold Bank-Oklahoma branch were approximately \$30.0 million and \$3.2 million, respectively. Total property, plant and equipment net of accumulated depreciation was \$0.3 million. Such are shown as assets and liabilities held for sale as of December 31, 2003. In connection with the sale of this branch, we recorded a gain of approximately \$0.9 million.

Sale of CompuNet Engineering On January 15, 2004, we entered into a letter of understanding for the sale of our wholly-owned subsidiary, CompuNet Engineering, which provided information technology, e-commerce services and networking solutions for banks and other businesses, including the design, implementation and administration of local and wide area networks. This sale was made to Computer Source, Inc. and closed on February 4, 2004. In connection with the expected sale of our interest in CompuNet Engineering, we recorded a loss of approximately \$4.1 million in 2003. The financial after-tax impact of CompuNet operations in 2004 until the sale resulted in an additional loss of discontinued operations of \$0.6 million.

Merger of Gold Bank-Kansas and Gold Bank-Oklahoma. On August 11, 2003, Gold Bank-Kansas filed an application with the Federal Reserve Bank of Kansas City (the "FRB-KC") and the Office of the Kansas State Bank Commissioner (the "OSBC") to merge Gold Bank-Oklahoma and Gold Bank-Kansas, with Gold Bank-Kansas being the surviving entity. In October 2003, Gold Bank-Kansas received approval of its application and the merger was consummated on April 2, 2004.

Sale of Weatherford, Geary and Cordell, Oklahoma branches. On February 13, 2004, Gold Bank-Oklahoma entered into an agreement for the sale of its branch locations in Weatherford, Geary and Cordell, Oklahoma to Bank of Western Oklahoma of Elk City. The sale of these Gold Bank-Oklahoma branches closed on May 7, 2004. As of the date of closing, the deposits and loans of these Gold Bank-Oklahoma branches were approximately \$63.0 million and \$18.6 million, respectively. In connection with the sale of these branches, we recorded a gain of approximately \$3.6 million.

Merger of Gold Bank-Kansas and Gold Bank-Florida. On March 31, 2004, Gold Bank-Kansas filed an application with the FRB-KC and the OSBC to merge Gold Bank-Florida and Gold Bank-Kansas, with Gold Bank-Kansas being the surviving entity. In May 2004, Gold Bank-Kansas received approval of its application, and the merger was consummated on August 31, 2004.

Sale of Five Gold Bank branches. On January 12, 2005, Gold Bank entered into an agreement for the sale of 5 branch locations in Oklahoma. The deposits and loans of these Gold Bank branches were approximately \$350.2 million and \$383.4 million, respectively, as of December 31, 2004. The sale of these branches is expected to close in the second quarter of 2005 with an expected approximate gain of \$33.0 million. Total property, plant and equipment net of accumulated depreciation was \$4.1 million. Such are shown as assets and liabilities held for sale as of December 31, 2004.

Community Banking Style

We serve the needs and cater to the economic strengths of the metropolitan areas where the offices of our bank and other subsidiaries are located. We strive to provide a high level of personal and professional customer service focusing on business and personal banking and asset and wealth management in a community bank setting. Associate participation in community affairs is encouraged in order to build long-term banking relationships with established businesses and individual customers in our market areas.

We have applied our community banking style to the affluent communities in the rapidly developing Johnson County suburbs southwest of Kansas City, in affluent areas of Kansas City and Independence, Missouri, in the high-growth market areas of Tampa Bay, Sarasota and Bradenton, Florida and in the growing Tulsa, Oklahoma market area. We believe there are great opportunities in these markets for us to attract and retain, as loan customers, those owner-operated businesses

that require flexibility and responsiveness in lending decisions and that desire a personal banking relationship. We believe that we have been able to meet these customers' expectations without compromising credit standards. The success of this strategy is reflected in our growth in the suburban communities of Leawood, Shawnee, Olathe and Overland Park, Kansas, the urban communities of Kansas City and Independence, Missouri and in markets such as Tampa Bay, Sarasota and Bradenton, Florida and Tulsa, Oklahoma.

Operating Strategy

Our operating strategy is focused on business banking, personal banking and asset and wealth management. This operating strategy is to provide a focused range of financial products and services to small and medium-sized businesses and consumers in each of our markets. We emphasize personal relationships with customers, involvement in local community activities and responsive lending decisions. We strive to maintain responsive community branches with local decision makers, allowing senior management at each banking location, within certain limitations, to make their own credit and pricing decisions allowing us to retain a local identity in each of our market areas.

Our goals include long-term customer relationships and a high quality of service and responsiveness to specific customer needs. The principal elements of our operating strategy are:

- *Emphasize Personalized Customer Service.* We believe that in most of our market areas customer loyalty and service are the most important competitive factors. Our primary goal is to provide exceptional customer service. Gold Bank's management and associates participate actively in a wide variety of community activities and organizations in order to develop and maintain customer relationships. Gold Bank seeks to retain and recruit the best available banking talent to deliver the quality of personal banking services required to meet customer expectations and to permit us to meet our goals for long-term profitable growth.
- *Capitalize on Changing Market Conditions.* Our management continually monitors economic developments in our market areas in order to tailor our operations to the evolving strengths and needs of the local communities. For example, we have opened service locations in the high-growth sections of the Kansas City area to fill the niche of a community bank with extensive products and services. Our market area in Florida is a strong market for business banking, personal banking and asset and wealth management services. To further serve this area, we have opened new branches in Tampa and Sarasota.
- *Centralize and Streamline Operations to Achieve Economies of Scale.* In order to minimize duplication of functions, we have centralized certain management and administrative functions, including data processing, human resources, internal audit, loan administration and regulatory compliance. This includes the ongoing centralization of operations at the services center in Overland Park, Kansas. In 2004, we completed a company-wide conversion to common platforms for loans and deposits for all locations pending the sale of 5 Oklahoma branches. Such centralization is designed to reduce operating expenses, enhance standardization and controls, and enable our bank personnel to become even more focused on customer service. The merger of Gold Bank-Oklahoma and Gold Bank-Florida into Gold Bank-Kansas will allow us to achieve additional standardization of processes and economies of scale.

Acquisition/Growth Strategy

Regional bank acquisitions of community banks in the Midwest and Florida have created what our management perceives to be a shortage of "Super Community Business Banks." Management believes that it has been the practice of regional banking institutions to convert the banks they acquire into branches of the acquiring institution without the retention of local decision making. Management believes this practice detracts from the delivery of quality, personalized services to the existing customer base of those branches. Management believes our branching activities are distinguished from those of other regional banking institutions by the high degree of autonomy given each branch location.

This expansion activity has allowed us to grow and diversify our loan portfolio. Furthermore, we believe additional opportunities exist in our metropolitan markets due to heavy residential and small business development. The loan demand in the suburban Johnson County, Kansas communities, as well as Tampa Bay, Bradenton and Sarasota, Florida, is generally greater in contrast to national averages. We intend to continue to pursue opportunities in these metropolitan markets.

Lending Activities

General. In each market area we serve, we strive to provide a full range of financial products and services to small and medium-sized businesses and consumers. We target owner-operated businesses. Our bank has an established loan committee for each lending region which has authority to approve credits within established guidelines. Concentrations in

excess of those guidelines must be approved by a corporate loan committee comprised of the Chief Executive Officer, the Chief Credit Officer, the Director of Commercial Lending and senior lending officers of the various states. When lending to an entity, we generally obtain a guaranty from the principals of such entity. The loan mix within the bank is subject to the discretion of the bank's board of directors and the demands of the local marketplace.

Real Estate Lending. Loans secured by real estate represent the largest class of our loans. On December 31, 2004, real estate and real estate construction and development loans totaled \$1.3 billion and \$792.1 million, respectively, or 42.03% and 25.50% of gross loans, respectively. Our large portfolio of real estate loans carries with it credit risk, which is managed through proper credit administration and underwriting. Generally, residential loans are written on a variable-rate basis with adjustment periods of five years or less and amortized over terms not exceeding 30 years. We retain, in our portfolio, some adjustable rate mortgages having an adjustment period of five years or less. Commercial real estate loans are generally amortized over 20 years or less. We also generate long-term, fixed-rate residential real estate loans, which we sell in the secondary market. We take a security interest in the real estate. Commercial real estate, construction and agricultural real estate loans are generally limited, by policy, to 80% of the appraised value of the property. Commercial real estate and agricultural real estate loans also are supported by an analysis demonstrating the borrower's ability to repay. Residential loans that exceed 80% of the appraised value of the real estate generally are required, by policy, to be supported by private mortgage insurance; although, on occasion, we will retain non-conforming residential loans to known customers at premium pricing.

Commercial Lending. Loans in this category principally include loans to service, retail, wholesale and light manufacturing businesses including agricultural service businesses. Commercial loans are made based on the financial strength and repayment ability of the borrower, as well as the collateral securing the loans. As of December 31, 2004, commercial loans represented our second largest class of loans at \$908.3 million, or 29.25% of gross loans. Commercial loans can contain risk factors unique to the business of each customer. In order to mitigate these risks, we target owner-operated businesses as our customers and make lending decisions based upon a cash flow analysis of the borrower as well as value of collateral pledged to secure the loan. Working capital loans generally have a one-year renewable term and those for equipment generally have a term of seven years or less. We generally take a blanket security interest in all assets of the borrower. Equipment loans are generally limited to the lesser of the cost or appraised value of the equipment. Inventory loans generally are limited to 50% of the value of the inventory, and accounts receivable loans generally are limited to 75% of a predetermined eligible base.

Consumer and Other Lending. Loans classified as consumer and other include automobile, credit card, boat, home improvement and home equity loans, the latter two secured principally through second mortgages. We generally take a purchase-money-security interest in goods for which we provide the original financing. The terms of the loans range from one to five years depending upon the use of the proceeds, and range from 75% to 90% of the value of the collateral. The majority of these loans are installment loans with fixed interest rates. As of December 31, 2004, consumer and other loans amounted to \$31.8 million, or 1.02% of gross loans. We implemented a credit card program in late 1994 and targeted our Bank's existing customer base as potential consumers. During 2004, we sold our credit card portfolio.

Agricultural Lending. We provide short-term credit for operating loans and intermediate-term loans for farm product, livestock and machinery purchases and other agricultural improvements. Agricultural loans were \$62.8 million as of December 31, 2004, or 2.02% of total loans. Farm product loans have generally a one-year term, and machinery and equipment and breeding livestock loans have generally five to seven-year terms. Extension of credit is based upon the ability to repay as well as the existence of federal guarantees and crop insurance coverage. These loans are generally secured by a blanket lien on livestock, equipment, feed, hay, grain and growing crops. Equipment and breeding livestock loans are generally limited to 75% of the appraised value of the collateral.

Loan Origination and Processing

Loan originations are derived from a number of sources. Loan originations result from real estate broker referrals, mortgage loan brokers, direct solicitation by our bank loan officers, present savers and borrowers, builders, attorneys, walk-in customers, and in some instances, other lenders. Residential loan applications, whether originated through our bank or through mortgage brokers, are underwritten and closed based on the same standards, which generally meet Fannie Mae underwriting guidelines.

The loan underwriting procedures followed by our bank are designed to assess both the borrower's ability to make principal and interest payments and the value of any assets or property serving as collateral for the loan. Generally, as part of the process, a loan officer meets with each applicant to obtain the appropriate employment and financial information as well as any other required loan information. Our bank then obtains reports with respect to the borrower's credit record and orders and reviews an appraisal of any collateral for the loan (prepared for our bank through an independent appraiser). The loan information supplied by the borrower is independently verified.

Loan applicants are notified promptly of the decision of our bank by telephone and letter. If the loan is approved, the commitment letter specifies the terms and conditions of the proposed loan including the amount of the loan, interest rate, amortization term, a brief description of the required collateral, and required insurance coverage. Prior to closing any long-term loan, the borrower must provide proof of fire and casualty insurance on the property serving as collateral, and such insurance must be maintained during the full term of the loan. Title insurance is required on loans collateralized by real property. Interest rates on committed loans are normally locked in at the time of application or for a 30 to 45 day period.

Mortgage Banking Operations

We are engaged through Gold Bank in the production of residential mortgage loans. We originate residential mortgage loans, which are generally sold with servicing released. Income is generated from origination fees and the gain on sale of loans.

Brokerage Services

We provide securities brokerage and investment management services through Gold Capital Management, a wholly-owned subsidiary, which operates as a broker dealer in securities. Gold Capital Management is registered with the SEC as a broker dealer and investment advisor and is a member of the NASD.

Trust Services

We provide trust and investment advisory services, primarily to individuals, corporations and employee benefit plans, through Gold Trust Company, a Missouri chartered non-depository trust company and wholly-owned, non-bank subsidiary.

Merchant Banking

Although we are authorized as a financial holding company in merchant banking activities, to engage through Gold Merchant Banc, a wholly-owned, non-bank subsidiary, we have ceased being active in making any new investments of this type.

Insurance Agency Services

We provided insurance agency services through Gold Insurance Agency, a wholly-owned, non-bank subsidiary. During 2001, we sold most of our agency locations and substantially reduced the activities of Gold Insurance Agency to offering life insurance and annuity products to Gold Banks' clients. This entity was inactive in 2004.

Investment Portfolio

Our bank's investment portfolio is used to meet its liquidity needs while endeavoring to maximize investment income. Additionally, management augments the quality of the loan portfolio by maintaining a high-quality investment portfolio. The portfolio is comprised of U.S. Treasury securities, U.S. government agency instruments and a modest amount of obligations of state and political subdivisions. In managing our interest rate exposure, we also invest in mortgage backed securities and collateralized mortgage obligations. Investment securities were \$916.0 million, or 21.2% of total assets, on December 31, 2004. Federal funds sold and certificates of deposit are not classified as investment securities.

Deposits and Borrowings

Deposits are the major source of our bank's funds for lending and other investment purposes. In addition to deposits, including local public fund deposits and demand deposits of commercial customers, we derive funds from loan principal repayments, maturing investments, Federal funds borrowings from commercial banks, borrowings from the FRB-KC and the Federal Home Loan Bank, and from repurchase agreements. Loan repayments and maturing investments are a relatively stable source of funds while deposit inflows are significantly influenced by general interest rates and money market conditions. Borrowings may be used on a short-term basis to compensate for reductions in the availability of funds from other sources. They also may be

used on a long-term basis for funding specific loan transactions and for general business purposes.

Our bank offers a variety of accounts for depositors designed to attract both short-term and long-term deposits. These accounts include certificates of deposit, savings accounts, money market accounts, checking and individual retirement accounts. Deposit accounts generally earn interest at rates established by the asset liability committee with input from local management, and at rates based on competitive market factors and management's desire to increase or decrease certain types or maturities of deposits.

Competition

The deregulation of the banking industry, the widespread enactment of state laws permitting multi-bank holding companies, and the availability of nationwide interstate banking has created a highly competitive environment for financial service providers. This is particularly true for financial institutions in the suburban areas in which we operate, especially in Shawnee, Leawood, Olathe and Overland Park, Kansas; Kansas City and Independence, Missouri; Tulsa and Oklahoma City, Oklahoma; and Tampa Bay, Bradenton and Sarasota, Florida. In these communities we compete for deposits and loans with other commercial banks, savings and loan associations, credit unions, finance companies, mutual funds, insurance companies, brokerage and investment banking companies and other financial intermediaries. Some of these competitors have substantially greater resources and lending limits and may offer certain services that we do not currently provide at these locations. In addition, some of our non-bank competitors are not subject to the same extensive federal regulations that govern our bank.

We believe that we have been able to compete successfully because of our emphasis on local control and the autonomy of bank management, allowing our bank to meet what is perceived to be the preference of community residents and businesses to deal with a "local" bank. Management believes that we will continue to compete successfully in these communities, but increased competition could adversely affect our earnings.

Associates

We maintain a corporate staff of approximately 68 persons. At December 31, 2004, our bank and non-bank subsidiaries had approximately 749 associates. None of our associates or any of the associates of our bank or non-bank subsidiaries is covered by a collective bargaining agreement. We, along with our bank and our non-bank subsidiaries, believe that our associate relations are satisfactory.

Where to Find Additional Information

Additional information about us can be found on our Web site at www.goldbanc.com. We also provide on our Web site our filings with the SEC, including our annual reports, quarterly reports, and current reports along with any amendments thereto, as soon as reasonably practicable after we have electronically filed such material with the SEC.

Regulation and Supervision

Regulations Applicable to Bank Holding Companies and Financial Holding Companies. As a registered bank holding company and a financial holding company under the Bank Holding Company Act (the "BHC Act") and the Gramm-Leach-Bliley Act (the "GLB Act"), we are subject to the supervision and examination by the FRB. The FRB has authority to issue cease and desist orders against bank holding companies if it determines that their actions represent unsafe and unsound practices or violations of law. In addition, the FRB is empowered to impose civil money penalties for violations of banking statutes and regulations. Regulation by the FRB is intended to protect depositors of Gold Bank, not our stockholders.

Limitation on Acquisitions. The BHC Act requires a bank holding company to obtain prior approval of the FRB before:

- taking any action that causes a bank to become a controlled subsidiary of the bank holding company;
- acquiring direct or indirect ownership or control of voting shares of any bank or bank holding company, if the acquisition results in the acquiring bank holding company having control of more than 5% of the outstanding shares of any class of voting securities of such bank or bank holding company, and such bank or bank holding company is not majority-owned by the acquiring bank holding company prior to the acquisition;
- acquiring substantially all of the assets of a bank; or
- merging or consolidating with another bank holding company.

Limitation on Activities. The activities of bank holding companies are generally limited to the business of banking, managing or controlling banks, and other activities that the FRB has determined to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. In addition, under the GLB Act, a bank holding company, all of whose controlled depository institutions are "well-capitalized" and "well-managed" (as defined in federal banking regulations) and which obtains "satisfactory" Community Reinvestment Act ratings, may declare itself to be a "financial holding company" and engage in a broader range of activities.

A financial holding company may affiliate with securities firms and insurance companies and engage in other activities that are financial in nature or incidental or complementary to activities that are financial in nature. "Financial in nature" activities include:

- securities underwriting, dealing and market making;
- sponsoring mutual funds and investment companies;
- insurance underwriting and insurance agency activities;
- merchant banking; and
- activities that the FRB determines to be financial in nature or incidental to a financial activity, or which is complementary to a financial activity and does not pose a safety and soundness risk.

A financial holding company that desires to engage in activities that are financial in nature or incidental to a financial activity but not previously authorized by the FRB must obtain approval from the FRB before engaging in such activity. Also, a financial holding company may seek FRB approval to engage in an activity that is complementary to a financial activity, if it shows that the activity does not pose a substantial risk to the safety and soundness of insured depository institutions or the financial system.

A financial holding company may acquire a company (other than a bank holding company, bank or savings association) engaged in activities that are financial in nature or incidental to activities that are financial in nature without prior approval from the FRB. Prior FRB approval is required, however, before the financial holding company may acquire control of more than 5% of the voting shares or substantially all of the assets of a bank holding company, bank or savings association. In addition, under the FRB's merchant banking regulations, a financial holding company is authorized to invest in companies that engage in activities that are not financial in nature, as long as the financial holding company makes its investment with the intention of limiting the duration of the investment, does not manage the company on a day-to-day basis, and the company does not cross market its products or services with any of the financial holding company's controlled depository institutions.

If any subsidiary bank of a financial holding company receives a rating under the Community Reinvestment Act of less than "satisfactory", then the financial holding company is prohibited from engaging in new activities or acquiring companies other than bank holding companies, banks or savings associations, until the rating is raised to at least "satisfactory."

Regulatory Capital Requirements. The FRB has promulgated capital adequacy guidelines for use in its examination and supervision of bank holding companies. If a bank holding company's capital falls below minimum required levels, then the bank holding company must implement a plan to increase its capital, and its ability to pay dividends and make acquisitions of new bank subsidiaries may be restricted or prohibited.

The FRB's capital adequacy guidelines provide for the following types of capital:

- Tier 1 capital, also referred to as core capital, calculated as:
 - common stockholders' equity;
 - plus, non-cumulative perpetual preferred stock and any related surplus;
 - plus, minority interests in the equity accounts of consolidated subsidiaries;
 - less, all intangible assets (other than certain mortgage servicing assets, non-mortgage servicing assets and purchased credit card relationships);
 - less, certain credit-enhanced interest only strips and nonfinancial equity investments required to be deducted from capital; and
 - less, certain deferred tax assets.

- Tier 2 capital, also referred to as supplementary capital, calculated as:

10

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

- allowances for loan and lease losses (limited to 1.25% of risk-weighted assets);
- plus, unrealized gains on certain equity securities (limited to 45% of pre-tax net unrealized gains);
- plus, cumulative perpetual and long-term preferred stock (original maturity of 20 years or more) and any related surplus;
- plus, auction rate and similar preferred stock (both cumulative and non-cumulative);
- plus, hybrid capital instruments (including mandatory convertible debt securities); and
- plus, term subordinated-debt and intermediate-term preferred stock with an original weighted average maturity of five years or more (limited to 50% of Tier 1 capital).

The maximum amount of supplementary capital that qualifies as Tier 2 capital is limited to 100% of Tier 1 capital.

● Total capital, calculated as:

- Tier 1 capital;
- plus, qualifying Tier 2 capital;
- less, investments in banking and finance subsidiaries that are not consolidated for regulatory capital purposes;
- less, intentional, reciprocal cross-holdings of capital securities issued by banks; and
- less, other deductions (such as investments in other subsidiaries and joint ventures) as determined by supervising authority.

The FRB's capital adequacy guidelines require that a bank holding company maintain a Tier 1 leverage ratio equal to at least 4% of its average total consolidated assets, a Tier 1 risk-based capital ratio equal to 4% of its risk-weighted assets and a total risk-based capital ratio equal to 8% of its risk-weighted assets. On December 31, 2004, we were in compliance with all of the FRB's capital adequacy guidelines. Our capital ratios on December 31, 2004 are shown on the following chart.

	Leverage Ratio (4% minimum requirement)	Tier 1 Risk-based Capital Ratio (4% minimum requirement)	Total Risk-based Capital Ratio (8% minimum requirement)
Company	7.75%	9.32%	11.08%

Interstate Banking and Branching. Under the Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 (the "Riegle-Neal Act"), a bank holding company is permitted to acquire the stock or substantially all of the assets of banks located in any state regardless of whether such transaction is prohibited under the laws of any state. The FRB will not approve an interstate acquisition if, as a result of the acquisition, the bank holding company would control more than 10% of the total amount of insured deposits in the United States or would control more than 30% of the insured deposits in the home state of the acquired bank. The 30% of insured deposits state limit does not apply if the acquisition is the initial entry into a state by a bank holding company or if the home state waives such limit. The Riegle-Neal Act also authorizes banks to merge across state lines, thereby creating interstate branches. Banks are also permitted to acquire and to establish de novo branches in other states where authorized under the laws of those states.

Under the Riegle-Neal Act, individual states may restrict interstate acquisitions in two ways. A state may prohibit an out-of-state bank holding company from acquiring a bank located in the state unless the target bank has been in existence for a specified minimum period of time (not to exceed five years). A state may also establish limits on the total amount of insured deposits within the state which are controlled by a single bank holding company, provided that such deposit limit does not discriminate against out-of-state bank holding companies.

Source of Strength. FRB policy requires a bank holding company to serve as a source of financial and managerial strength to its subsidiary banks. Under this "source of strength doctrine," a bank holding company is expected to stand ready to use its available resources to provide adequate capital funds to its subsidiary banks during periods of financial stress or adversity, and to maintain resources and the capacity to raise capital that it can commit to its subsidiary banks. Furthermore, the FRB has the right to order a bank holding company to terminate any activity that the FRB believes is a serious risk to the financial safety, soundness or stability of any subsidiary bank.

Liability of Commonly Controlled Institutions. Under cross-guaranty provisions of the Federal Deposit Insurance Act (the "FDIA"), bank subsidiaries of a bank holding company are liable for any loss incurred by the Bank Insurance Fund (the "BIF"), the federal deposit insurance fund for banks, in connection with the failure of any other bank subsidiary of the bank holding company.

Kansas Bank Holding Company Regulation. A bank holding company that owns, controls or has the power to vote 25% or more of any class of voting securities of a Kansas bank or a Kansas bank holding company must file an application with the Office of the Kansas State Bank Commissioner. Kansas prohibits any bank holding company from acquiring ownership or control of any bank that has Kansas deposits if, after such acquisition, the bank holding company would hold or control more than 15% of total Kansas deposits.

Regulations Applicable to Gold Bank. Gold Bank, a Kansas state member bank, is subject to regulation and examination by the Office of the Kansas State Bank Commissioner and the FRB. Gold Bank is also regulated by the Federal Deposit Insurance Corporation (the "FDIC"). The FRB and the FDIC are each empowered to issue cease and desist orders against Gold Bank if they determine that activities of the bank represent unsafe and unsound banking practices or violations of law. In addition, the FRB and the FDIC have the power to impose civil money penalties for violations of banking statutes and regulations. Regulation by these agencies is designed to protect the depositors of Gold Bank, not our stockholders.

Bank Regulatory Capital Requirements. The FRB has adopted minimum capital requirements applicable to state member banks which are substantially similar to the capital adequacy guidelines established by the FRB for bank holding companies. Special risk-based capital requirement (including a new Tier 3 capital component) applies to certain large banks whose trading activity (on a worldwide consolidated basis) equals 10% or more of their total assets or \$1 billion or more. Gold Bank is not subject to such special capital requirement.

Federal banking laws classify an insured financial institution in one of the following five categories, depending upon the amount of its regulatory capital:

- "well-capitalized" if it has a total Tier 1 leverage ratio of 5% or greater, a Tier 1 risk-based capital ratio of 6% or greater and a total risk-based capital ratio of 10% or greater (and is not subject to any order or written directive specifying any higher capital ratio);
- "adequately capitalized" if it has a total Tier 1 leverage ratio of 4% or greater (or a Tier 1 leverage ratio of 3% or greater, if the bank has a CAMELS rating of 1), a Tier 1 risk-based capital ratio of 4% or greater and a total risk-based capital ratio of 8% or greater;
- "undercapitalized" if it has a total Tier 1 leverage ratio that is less than 4% (or a Tier 1 leverage ratio that is less than 3%, if the bank has a CAMELS rating of 1), a Tier 1 risk-based capital ratio that is less than 4% or a total risk-based capital ratio that is less than 8%;
- "significantly undercapitalized" if it has a total Tier 1 leverage ratio that is less than 3%, a Tier 1 risk-based capital ratio that is less than 3% or a total risk-based capital ratio that is less than 6%; and
- "critically undercapitalized" if it has a Tier 1 leverage ratio that is equal to or less than 2%.

Federal banking laws require the federal regulatory agencies to take prompt corrective action against undercapitalized financial institutions.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

Gold Bank must be well-capitalized and well-managed for us to remain a financial holding company. The capital ratios and classifications of Gold Bank as of December 31, 2004 are shown on the following chart.

Leverage Ratio (4% minimum requirement)	Tier 1 Risk-based Capital Ratio (4% minimum requirement)	Total Risk-based Capital Ratio (8% minimum requirement)	Classification	
Gold Bank	8.14%	9.89%	10.81%	Well-Capitalized

Deposit Insurance and Assessments. The deposits of Gold Bank are insured by the BIF administered by the FDIC, in general up to a maximum of \$100,000 per insured depositor. Certain deposits of Gold Bank are insured by the Savings Association Insurance Fund (the "SAIF"). Under federal banking regulations, insured banks are required to pay semi-annual assessments to the FDIC for deposit insurance. The FDIC's risk-based assessment system requires BIF members to pay varying assessment rates depending upon the level of the institution's capital and the degree of supervisory concern over the institution. The FDIC's assessment rates range from zero cents to 27 cents per \$100 of insured deposits. The FDIC has authority to increase the annual assessment rate and there is no cap on the annual assessment rate which the FDIC may impose.

Limitations on Interest Rates and Loans to One Borrower. The rate of interest a bank may charge on certain classes of loans is limited by state and federal law. At certain times in the past, these limitations have resulted in reductions of net interest margins on certain classes of loans. Federal and state laws impose additional restrictions on the lending activities of banks. The maximum amount that a Kansas state bank may loan to one borrower generally is limited to 25% of the bank's capital, plus an additional 10% for loans fully secured by certain kinds of real estate collateral.

Payment of Dividends. Gold Bank is subject to federal and state laws limiting the payment of dividends. Under the FDIA, an FDIC-insured institution may not pay dividends while it is undercapitalized or if payment would cause it to become undercapitalized. State banking laws also prohibit the declaration of a dividend out of the capital and surplus of a bank, without prior regulatory approval.

Community Reinvestment Act. Gold Bank is subject to the Community Reinvestment Act (the "CRA") and implementing regulations thereunder. CRA regulations establish the framework and criteria by which the bank regulatory agencies assess an institution's record of helping to meet the credit needs of its community, including low and moderate-income neighborhoods. CRA ratings are taken into account by regulators in reviewing certain applications made by us and our bank subsidiary.

Limitations on Transactions with Affiliates. We and our non-bank subsidiaries are "affiliates" within the meaning of the Federal Reserve Act. The amount of loans or extensions of credit which a bank may make to non-bank affiliates, or to third parties secured by securities or obligations of the non-bank affiliates, are substantially limited by the Federal Reserve Act and the FDIA. Such acts further restrict the range of permissible transactions between a bank and an affiliated company. A bank and subsidiaries of a bank may engage in certain transactions, including loans and purchases of assets, with an affiliated company only if the terms and conditions of the transaction, including credit standards, are substantially the same as, or at least as favorable to the bank as, those prevailing at the time for comparable transactions with non-affiliated companies or, in the absence of comparable transactions, on terms and conditions that would be offered to non-affiliated companies.

Other Banking Activities. The investments and activities of Gold Bank are also subject to regulation by federal banking agencies regarding: investments in subsidiaries, investments for their own account (including limitations on investments in junk bonds and equity securities), loans to officers, directors and their affiliates, security requirements, anti-tying limitations, anti-money laundering, financial privacy and customer identity verification requirements, truth-in-lending, the types of interest bearing deposit accounts which it can offer, trust department operations, brokered deposits, audit requirements, issuance of securities, branching, and mergers and acquisitions.

Regulations Applicable to Our Non-bank Financial Service Subsidiaries.

General. Our non-bank financial service subsidiaries are subject to the supervision of the FRB and may be subject to the supervision of other regulatory agencies including the SEC, the NASD, state securities and insurance regulators and the Missouri Division of Finance.

Securities Broker/Dealer and Investment Advisor. As a securities broker/dealer, a registered investment advisor and member of the NASD, Gold Capital is subject to extensive regulation under federal and state securities laws. The SEC administers the federal securities laws but has delegated to self-regulatory organizations, principally the NASD, and the national securities exchanges much of the regulation of securities broker/dealers. Securities broker/dealers and certain investment advisors are also subject to regulation by state securities commissions in the states in which they are registered.

Securities broker/dealers and investment advisors are subject to regulations covering all aspects of the securities business, including sales methods, trade practices among broker/dealers, capital structure of securities firms, uses and safekeeping of customers' funds and securities, recordkeeping, and the conduct of directors, officers and associates. The SEC and the self-regulatory organizations may conduct administrative proceedings that can result in censure, fines, suspension or expulsion of a broker/dealer, its directors, officers and associates. The principal purposes of regulation of securities broker/dealers and investment advisors is the protection of customers and the securities markets rather than the protection of stockholders of broker/dealers and investment advisors.

Trust Company. As a Missouri non-depository trust company, Gold Trust Company is subject to regulation and supervision by the FRB and the Missouri Division of Finance. The purpose of such regulation is the protection of trust customers and beneficiaries, not the protection of stockholders of trust companies.

Insurance Agency. As licensed insurance agencies, Gold Capital Management and Gold Insurance Agency are subject to licensing, regulation and examination by the state insurance departments of each state in which they operate. State insurance regulations protect consumers and customers, not the stockholders of insurance agencies.

Changes in Laws and Monetary Policies

Future Legislation. Various legislation, including proposals to substantially change the financial institution regulatory system, is from time to time introduced in Congress. This legislation may change banking statutes and our operating environment in substantial and unpredictable ways. If enacted, this legislation could increase or decrease the cost of doing business, limit or expand permissible activities or affect the competitive balance among banks, savings associations, credit unions and other financial institutions. We cannot predict whether any of this potential legislation will be enacted and, if enacted, the effect that it, or any implementing regulations, could have on our business, results of operations or financial condition.

Fiscal Monetary Policies. Our business and earnings are affected significantly by the fiscal and monetary policies of the federal government and its agencies. We are particularly affected by the policies of the FRB, which regulates the supply of money and credit in the United States. Among the instruments of monetary policy available to the FRB are:

- conducting open market operations in United States government securities;
- changing the discount rates of borrowings of depository institutions;
- imposing or changing reserve requirements against depository institutions' deposits; and
- imposing or changing reserve requirements against certain borrowings by banks and their affiliates.

These methods are used in varying degrees and combinations to directly affect the availability of bank loans and deposits, as well as the interest rates charged on loans and paid on deposits. The policies of the FRB have a material effect on our business, results of operations and financial condition.

The references in the foregoing discussion to various aspects of statutes and regulations are merely summaries which do not purport to be complete and which are qualified in their entirety by reference to the actual statutes and regulations.

ITEM 2. PROPERTIES

Our subsidiary, Gold Bank, owns most of its banking facilities. Certain of Gold Bank's branch locations are in leased facilities. Our financial services subsidiaries have entered into short-term leases for their properties. We believe each of the facilities is in good condition, adequately covered by insurance and sufficient to meet the needs at that location for the foreseeable future. Our headquarters and Gold Bank's Leawood, Kansas location are contained in a 25,000 square foot building that opened in 1996, all of which we occupy.

ITEM 3. LEGAL PROCEEDINGS

United States of America ex rel. Roger L. Ediger v. Gold Banc Corporation, Inc., Gold Bank Oklahoma and Gold Bank Kansas (United States District Court for the Western District of Oklahoma) ("Qui Tam Lawsuit")

On June 15, 2004, we issued a press release announcing that a *qui tam* lawsuit was pending in the United States District Court for the Western District of Oklahoma against us, Gold Bank-Oklahoma and Gold Bank-Kansas. A *qui tam* lawsuit is an action brought by a private party (known as a "relator") seeking to represent the interests of the U.S. government. The suit was filed under the federal False Claims Act ("FCA"), which provides for recovery of treble damages, penalties and attorneys fees.

In the suit, the relator alleged that we, and our subsidiary banks, Gold Bank-Oklahoma and Gold Bank-Kansas, and their predecessors, violated the FCA by submitting false certifications and claims to the Farm Service Agency ("FSA") and charging excessive interest rates and fees on agricultural loans subject to the FSA's Guaranteed Loan Program and Interest Assistance Program. The relator alleged that we knowingly charged interest rates and fees on FSA guaranteed loans in excess of the interest rates and fees we charged to our average agricultural customers, in violation of FSA regulations.

On November 10, 2004, to avoid the litigation risk of trebled damages plus statutory penalties, we signed a settlement agreement with the United States, under the terms of which we paid \$16.0 million to the United States government. On October 29, 2004, we signed a separate settlement agreement with the relator, under the terms of which we paid \$0.5 million to cover the relator's legal fees and expenses.

On November 19, 2004, the United States District Court for the Western District of Oklahoma issued its Order approving the settlement with the United States and dismissed the claims against the defendants with prejudice.

Wayne K. Janzen, Dustin E. Cole and Michael Ross, v. Gold Banc Corporation, Inc., GBC Kansas, Inc., and Gold Bank, a Kansas bank (District Court of Kingfisher County, State of Oklahoma)

This case was filed in the District Court of Kingfisher County, Oklahoma on September 10, 2004. The plaintiffs bring the case on behalf of themselves and on behalf of the putative class of all those similarly situated. The putative class is composed of all those agricultural borrowers with loans that are or were guaranteed by the United States of America through the FSA guaranteed loan program. The plaintiffs generally allege that our subsidiary banks have engaged in a pattern of charging interest rates and fees in excess of what they charge their average agricultural customer. The petition contains six counts against us. The counts are for breach of contract, negligence in the performance of servicing the FSA guaranteed loans, unjust enrichment by realizing increased profits caused by not disclosing to borrowers that our subsidiary banks were charging excessive interest rates and fees, a claim for usury, and an injunction for preventing our subsidiary banks from continuing their alleged practice of charging excessive interest rates and fees. No specific damage amounts are specified other than more than \$10,000 is sought on each count. Plaintiffs also seek punitive damages and their costs and attorneys' fees. An answer denying the allegations in the petition was filed on behalf of Gold Banc Corporation, Inc. and GBC Kansas, Inc. only.

This case was removed on October 1, 2004 to the United States District Court for the Western District of Oklahoma. Plaintiffs filed a motion to remand the case back to state court and the federal district court granted such motion.

The plaintiffs have filed a motion for class certification. A class certification hearing is scheduled for April 13, 2005. Discovery on class certification issues has been initiated. We will object to a class certification.

We believe we have valid defenses to plaintiffs' claims and intend to vigorously defend this lawsuit.

H.D. Young, Troy Boelte, Misti Boelte, Larry M. Boelte, Necha Boelte, Mark Lorenzen, Denniece Lorenzen, Harold I. Mason, and Jaynee L. Mason, v. Gold Banc Corporation, Inc., Gold Bank-Oklahoma, Gold Bank-Kansas, GBC Oklahoma, Inc., GBC Kansas, Inc., and Gold Bank (United States District Court for the Western District of Oklahoma)

On September 23, 2004, we received notice of this case, which was originally filed in the United States District Court for the Western District of Oklahoma on behalf of the plaintiffs as individuals and on behalf of persons similarly situated. The putative class was composed of all who entered into loan agreements with our subsidiary banks, which loans were in turn guaranteed by the FSA under the FSA's federally sponsored guaranteed loan program. The complaint generally alleged that our subsidiary banks charged their average farm customer a lesser interest rate than was charged to FSA guaranteed borrowers. The plaintiffs claimed that charging the higher interest rate is usurious.

In addition to the usury cause of action, the complaint alleged that because our subsidiary banks have made no refunds to the plaintiff class, they converted said unspecified funds. Plaintiffs claimed that our subsidiary banks committed fraud by materially misrepresenting to the class that they would honestly and faithfully abide by the FSA rules and regulations although they knew they were not going to follow such rules and regulations. The complaint also alleged that (i) we owed a fiduciary duty to the class and breached such duty; (ii) our subsidiary banks failed to perform their obligations and failed to properly credit the plaintiff class with the sums of money otherwise due under the guaranteed loan program; (iii) our subsidiary banks received money from the federal government that was to be paid to the plaintiffs for the use and benefit of the class, but instead was converted by our subsidiary banks for their own use; (iv) our subsidiary banks charged a 1% origination fee on all guaranteed loans and that requiring the fee to be paid was a contract of adhesion; (v) our subsidiary banks did not charge similar fees on non-guaranteed loans and violated the applicable federal regulations; (vi) the acts of our subsidiary banks were deceitful and done with intent to defraud the class of borrowers; and (vii) because the conduct of our subsidiary banks was fraudulent, the class was entitled to a contract reformation to the extent the promissory notes and renewals of interest failed to express the true intent of the parties to follow the terms of the guaranteed loan program. The plaintiffs wanted to recover for the class all sums paid to us for usurious interest, which amount should be doubled, forgiveness of all future interest otherwise due under any note, punitive damages, and costs of the suit, including reasonable attorneys' fees. No specific amounts of monetary damages were alleged.

An answer was filed on behalf of Gold Banc Corporation, Inc., GBC Kansas, Inc. and Gold Bank, a Kansas bank. On December 2, 2004, we filed a Motion for Judgment on the Pleadings requesting dismissal of plaintiffs' claims with prejudice and plaintiffs filed their responses to the motion. On January 26, 2005, the federal district court dismissed the plaintiffs' claims that our subsidiary banks overcharged borrowers under the FSA guaranteed loan program. The court determined that with respect to the plaintiffs' federal law claims we were entitled to judgment on the pleadings because the applicable federal statutes and regulations did not provide a private right of action for the plaintiffs. The court also entered judgment for us on the plaintiffs' usury claim. Finally, the court dismissed the plaintiffs' state law claims, without prejudice, based upon a lack of jurisdiction.

H.D. Young, Troy Boelte, Misti Boelte, Larry M. Boelte, Necha Boelte, Mark Lorenzen, Denniece Lorenzen, Harold I. Mason, and Jaynee L. Mason, v. Gold Banc Corporation, Inc., Gold Bank-Oklahoma, Gold Bank-Kansas, GBC Oklahoma, Inc., GBC Kansas, Inc., and Gold Bank (District Court of Washita County, Oklahoma)

On February 2, 2005, the same plaintiffs whose federal claims were dismissed re-filed their claims in the District Court for Washita County, Oklahoma, again seeking to assert claims individually and on behalf of persons similarly situated. The putative class consists of all who entered into loan agreements with our subsidiary banks, which loans were in turn guaranteed by the FSA under the FSA's federally sponsored guaranteed loan program. The petition generally alleges that our subsidiary banks charged their average farm customer a lesser interest rate than was charged to FSA guaranteed borrowers. The plaintiffs claim that charging the higher interest rate is usurious.

In addition to the usury cause of action, the petition alleges that our subsidiary banks converted unspecified funds belonging to plaintiffs. Plaintiffs claim that our subsidiary banks committed fraud by materially misrepresenting to the class that they would honestly and faithfully abide by the FSA rules and regulations although they knew they were not going to follow such rules and regulations. The complaint also alleges that (i) our subsidiary banks charged a 1% origination fee on all guaranteed loans and that the fee was illegal and excessive; (ii) our subsidiary banks did not charge similar fees on non-guaranteed loans and violated the applicable federal regulations; (iii) plaintiffs are third-party beneficiaries of our subsidiary banks' contracts with the Farm Service Agency and that our subsidiary banks breached those contracts and harmed the plaintiffs; (iv) the acts of our subsidiary banks were deceitful and done with intent to defraud the class of borrowers; (v) our subsidiary banks received money from the federal government that was to be paid to the plaintiffs for the use and benefit of the class, but instead was converted by our subsidiary banks for their own use; (vi) because the conduct of our subsidiary banks was allegedly fraudulent, the class is entitled to a reformation of their loan contracts to conform to law and equity; and (vii) our subsidiary banks were unjustly enriched and should be required to provide restitution to plaintiffs. The plaintiffs want to recover for the class all sums paid to us for usurious interest, which amount should be doubled, forgiveness of all future interest otherwise due under any note, punitive damages, and costs of the suit, including reasonable attorneys' fees. No specific amounts of monetary damages are alleged.

We believe we have valid defenses to plaintiffs' claims and intend to vigorously defend this lawsuit.

Written Agreement dated August 26, 2003

As initially reported in a Form 8-K that we filed on August 27, 2003, we are party to a Written Agreement dated August 26, 2003, with the Kansas OSBC and the FRB. Our compliance committee believes that we have taken all corrective actions required by such agreement. Based upon their recent examination of our bank, the Kansas OSBC and the FRB concluded that we are in substantial compliance with the terms of the Written Agreement. Since we have been through two

satisfactory regulatory examinations and taken all required corrective actions, we believe that the Kansas OSBC and FRB may soon be willing to terminate the Written Agreement. Termination of the Written Agreement would require the approval of both the FRB and the Kansas OSBC, and we do not know when or whether such regulators will agree to such a termination.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to a vote of the stockholders of the Company during the fourth quarter of the fiscal year ended December 31, 2004.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock, par value \$1.00 per share, trades on the Nasdaq National Market tier of The Nasdaq Stock Market under the symbol "GLDB."

Information relating to market prices of common stock and cash dividends declared on our common stock is set forth in the table below.

	Market Price		Cash Dividends
	High	Low	
2003 Quarters			
First	\$ 11.19	\$ 7.89	\$ 0.03
Second	10.72	7.45	0.03
Third	12.32	10.27	0.03
Fourth	14.75	12.11	0.03
2004 Quarters			
First	\$ 16.34	\$ 13.15	\$ 0.03
Second	16.55	15.00	0.03
Third	16.01	13.47	0.03
Fourth	15.25	13.00	0.03

During the fourth quarter of 2004, no purchases of our common stock were made by or on behalf of us or any affiliated purchaser.

As of March 2, 2005, there were approximately 656 holders of record of our common stock.

The FRB and state regulators have the authority to prohibit or limit the payment of dividends to us by our banking subsidiaries. The FRB has the authority to prohibit or limit the payment of dividends by us to our stockholders.

Under the terms of the junior subordinated indentures associated with our trust-preferred securities, we are prohibited from declaring or paying a dividend to our stockholders in the event we either are in default under the terms of the indenture or have elected to defer payment of our obligations due thereunder.

The following table presents information as of December 31, 2004 relating to our 1996 Equity Compensation Plan and the stock option plans that we succeeded to in the acquisition of American Bank, Bradenton, Florida. It includes (i) the number of securities to be issued upon the exercise of outstanding options, (ii) the weighted average exercise price of the outstanding options, and (iii) the number of securities remaining available for future issuance under the 1996 Equity Compensation Plan.

Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in
----------------------	--	--	--

column (a))

Equity compensation plans approved by security holders	895,060	\$	8.67	609,874
Equity compensation plans not approved by security holders				
Total	895,060	\$	8.67	609,874

The information included in the table above includes outstanding options issued under the American Bancshares, Inc. and American Bank of Bradenton Incentive Stock Option Plan of 1996 (the "1996 Plan"), the American Bancshares, Inc. 1997 Nonqualified Share Option Plan for Non-Employee Directors (the "1997 Plan") and the American Bancshares, Inc. 1999 Stock Option and Equity Incentive Plan (the "1999 Plan") (each of which was assumed by the Company in connection with the acquisition of American Bank, Bradenton, Florida on March 20, 2000) and our 1996 Equity Compensation Plan. We have not issued any additional options under any plan other than our 1996 Equity Compensation Plan since March 20, 2000. The number and weighted-average exercise price for the outstanding options issued under the 1996 Plan, the 1997 Plan and the 1999 Plan, as adjusted as part of the acquisition of American Bancshares, is 124,520 shares with a weighted-average exercise price of \$6.08. These options and corresponding exercise prices are incorporated in the table above. Excluding the options previously granted under the 1996 Plan, the 1997 Plan and the 1999 Plan, the aggregate number of securities to be issued upon the exercise of our outstanding options, warrants and rights and the weighted-average exercise price of these options, warrants and rights, under our 1996 Equity Compensation Plan, are 770,540 shares and \$9.09, respectively.

ITEM 6. SELECTED CONSOLIDATED FINANCIAL DATA

This selected consolidated information should be read in conjunction with our consolidated financial statements and notes included elsewhere in this Amended Report.

- (1) Includes losses and expenses resulting from misapplication of bank funds, net of recoveries, of (\$1,868), \$136, \$1,099 and \$1,252 for 2003, 2002, 2001 and 2000, respectively.
- (2) No dividend payout ratio was calculated for 2000 because of the net loss for the year.
- (3) Net interest margin is on a fully tax-equivalent basis.
- (4) Efficiency ratio is calculated as follows: Non-interest expense less *qui tam* settlement, discontinued operation and prepaid offering costs written off; divided by the sum of net interest income before provision for loan losses, plus non-interest fee income, less discontinued operation, gain on branch sales and bond impairment.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of financial condition and results of operations should be read in conjunction with our consolidated financial statements and the notes to such consolidated financial statements, which are included elsewhere in this Annual Report. All comparisons and references in this Annual Report to the results of the years ended December 31, 2002 and 2001 are to the restated results. See "Item 1 □ Business" and Note 2 to the consolidated financial statements contained in "Item 8 □ Financial Statements and Supplementary Data" in the 2002 Annual Report.

Overview

Repositioning Our Franchise and Refining our Focus. We are a financial services holding company that has grown from the acquisition of a single bank with \$2.9 million in assets in 1978 to \$4.3 billion in assets as of December 31, 2004. Throughout this period our primary focus has been on delivering business banking, personal banking and asset and wealth management services with a community banking orientation that is built upon long-term relationships with our customers. As a result of the actions described below to reposition our franchise, refine our focus and integrate our business banking services with our personal and private banking services, we can legitimately hold ourselves out as a "Super Community Business Bank" with the scale, geographic reach, expertise and service orientation needed to deliver, in a highly personalized and effective manner, all of the financial services desired by our targeted customer base. Our principal business banking customers are small and mid-sized businesses and real estate developers and investors that are typically local owner-operators. In addition, we have placed increasing emphasis on personal and private banking as well as managing the investment assets of these businesses, their owner-operators and employees, as well as other individuals with significant investable assets, that can benefit from the sophisticated expertise we provide to increase the return on those assets.

Our customers demand, and we believe have a right to receive, exceptional and personalized service, prompt and flexible decision-making on their loan requests and responsiveness and expertise in meeting their other banking and asset management needs. This market niche has been expanded due to the consolidation of financial institutions in our markets, which has resulted in decision-making being centralized away from the local markets that the formerly locally-owned banks served. We have been able to attract and retain these types of customers by having multiple branch locations in our targeted market areas with local decision-makers who are empowered to make credit and loan pricing decisions within prescribed limits, and delivering a focused range of financial products and services with a personal touch. We encourage our associates to participate in community affairs to create a local identity and foster the development of personal relationships with our customers who also tend to be civic-minded and active in their communities.

During the period from 2001 through 2005, we refined our strategy to reposition our franchise away from non-MSAs in order to concentrate solely on MSAs with attractive income and growth demographics. We acquired or established 11 branches in high-growth metropolitan markets during this time period. Also during this time period, we sold 22 branches in rural Kansas and Oklahoma, with 11 of those branches being sold in 2004. We also executed an agreement for the sale of 5 additional Oklahoma branches, which is expected to close in the second quarter of 2005. Upon the closing of the sale of these 5 Oklahoma branches, virtually all of our loans and deposits will be located in our MSA markets. The branch sales in 2004 and 2005 will position us to have approximately \$60.0 million in equity in excess of the required amount to be well capitalized.

This additional equity and capital strength will be used to support our organic growth as well as to open de novo branches and possibly acquire attractive branches in our key MSA growth markets which are Johnson County, Kansas, the counties of Manatee, Charlotte, Sarasota and Hillsborough in Florida and the faster growing parts of Jackson County, Missouri. Johnson County and three of these Florida counties are among the fastest growing in the U.S. We have the second largest deposit market share in Johnson County, Kansas which is the third fastest growing county in the country and represents 38% of our franchise as of December 31, 2004. Johnson County, Kansas is also the most affluent county in Kansas with an average household income of \$88,369 and with more than 69% of households having an income of more than \$50,000. The four county area we serve in Florida has experienced a 9.7% increase in households since 2000 and is projected to increase by 11.2% by 2009. The average household income for the four counties we serve in Florida is \$61,406 which is well above the state and national average. (The source for all demographic data is Claritas, Inc.).

Some of the non-recurring events described under "Item 1. Business" prevented management from fully implementing and realizing all the benefits of repositioning our franchise. Now that those events are substantially behind us, we have renewed, refined and intensified our focus on our core strengths—business and personal banking and asset and wealth management in high-growth metropolitan markets. We have shed the dilution in our focus by liquidating most of the investments in our merchant banking subsidiary, deactivating our insurance brokerage subsidiary and exiting the information

technology and e-commerce services business through the sale of CompuNet Engineering, Inc., which previously conducted that business. We brought greater clarity to our refined focus for our customers, associates and investors by articulating our vision, mission, values and objectives, which are set forth under "Item 1. Business". Our organizational structure was also recently revamped to ensure that our most experienced and skilled associates are in the best positions to utilize their talents in achieving our growth and performance objectives. In addition, we are enhancing the strength of our team by hiring additional experienced bankers in our high-growth markets who are involved in the communities they serve, who subscribe to our credit culture and operating philosophy, and who bring banking relationships that are seasoned and well known to them.

To ensure that our management team's incentives are properly aligned with achieving these objectives and thus the interests of our stockholders, we restructured our long-term compensation programs to award significant amounts of restricted stock, which will pay out over approximately a five-year period. In addition, by making clear to our management team and our other associates that we are focused on implementing our strategy as an independent company for the foreseeable future, there is a renewed sense of energy and commitment to building long-term stockholder value. Our associates have exhibited a remarkable sense of resiliency, loyalty and pride in our organization, which has been forged by successfully transcending the setbacks described under "Item 1. Business". The high ethical and governance standards, which have guided our collective course throughout these trying times, are codified in our Mission Statement, our Code of Business Conduct and Ethics and our Corporate Governance Guidelines.

Continue Building a Strong Loan Portfolio. A central element of our strategic focus on business banking is the continued development of a strong, diversified loan portfolio. We emphasize commercial and real estate lending in each of our metropolitan markets and have enjoyed strong loan demand, attractive yield opportunities and high asset quality in our lending activities. Even though we sold 11 branches in 2004 with loans of \$216.6 million, our commercial loans and combined real estate and real estate construction loans as of December 31, 2004 grew by \$15.0 million and \$147.1 million, respectively, as compared to 2003. We also finished 2004 with significant momentum in loan growth, producing \$185.3 in loan growth during the last quarter of 2004. We also have a strong pipeline for loan growth going into 2005 with budgeted growth in loans of \$350.0 million.

With the completion of the sale of the five Oklahoma branches, we will have more than \$60.0 million of capital above that needed to qualify as well capitalized. We plan to use a major part of that capital to support as much loan growth as we can generate, consistent with our credit quality standards.

Because of this loan growth, we are seeing an improvement in net interest margin. We are well positioned to benefit from the rising interest rate environment due to the sensitivity of our loan portfolio to rising rates. Over 50% of our loans re-price daily and our loans do not have floors or caps on the interest rates we charge. Based on the most likely interest rate environment we foresee, we expect our net interest margin to increase 15 to 20 basis points in 2005.

The quality of the loans in our portfolio has also shown marked improvement. Our non-performing loans decreased by \$16.7 million in 2004, and our provision for loan losses declined by 54.9% with the provision decreasing from \$13.1 million in 2003 to \$5.9 million in 2004.

Increasing Retail Deposits. The 11 rural branches that were sold in 2004 had \$209.8 million of core deposits in excess of outstanding loans at those branches. We nevertheless expect to grow our core deposits sufficiently to fund our loan growth in 2005 while also continuing to reduce our reliance upon brokered deposits. We reduced our brokered deposits from \$602.3 million as of December 31, 2003, to \$536.6 as of December 31, 2004, while increasing our Federal Home Loan Bank and other borrowings by \$86.9 million of which most are short-term in nature. We will aggressively seek deposits in Johnson County, Kansas and Manatee County, Florida where we have the second and third largest market shares in deposits, respectively, as well as in our other metropolitan markets. While the funding costs for attracting these additional retail deposits may be somewhat higher than brokered deposits, we are committed to developing this source of funding to provide the liquidity needed for our robust loan growth, and allow us additional cross-selling opportunities for all our products.

Increasing Our Efficiency. We have also taken significant steps to reduce our operating expenses and increase our efficiency in an effort to achieve our goal of having a consolidated efficiency ratio in the low 60% range by the end of 2005. To this end, we consolidated our Florida and Oklahoma banking charters into Gold Bank-Kansas, which is now known simply as Gold Bank. This consolidation has enabled us to achieve greater centralization of management and administrative functions, including data processing, human resources, internal

audits, loan administration and regulatory compliance. These efforts include the ongoing centralization of operations at our services center in Overland Park, Kansas and a company-wide conversion to common information management and processing platforms for both loans and deposits. The approach we have taken to centralization is not only designed to reduce operating expenses and enhance standardization and

controls, but also, and more importantly, to enable our associates to become even more focused on, and better able to provide, outstanding customer service and responsiveness.

Increasing Emphasis on Asset Management. We have added private banking services to our traditional personal banking and asset management services and placed all of them under the leadership of Jerry Neff, Chief Personal Banking and Asset Management Officer. We are confident that his proven skills in this area will better enable us to effectively integrate and package our service offerings in a personalized manner that will be appealing to high-net worth individuals as well as businesses that need sophisticated asset management. The investment assets that we are managing for our customers grew by 17.3% last year, and we expect that growth to continue with our more customer-focused and one-stop shopping service approach.

Investment Portfolio. We held \$916.0 million in investment securities in our portfolio as of December 31, 2004. The composition of our investment portfolio as of December 31, 2004 was 62.5% U.S. Government-sponsored enterprise obligations, 3.6% state and municipal securities, 24.0% mortgage-backed securities, 0.6% trading securities and 9.3% other securities, which are primarily trust-preferred pools and individual trust-preferred securities. The average maturity of these securities is approximately 3.8 years, or 3.0 years excluding trust-preferred securities. Held-to-maturity securities total \$411.8 million and available-for-sale securities total \$498.8 million. We believe that the amount of securities in the held-to-maturity category provides desirable insulation to our tangible equity level in a rising interest rate environment and fits our balance sheet needs.

We implemented a strategy in the fourth quarter of 2004 to sell \$38.5 million of non-asset-backed Fannie Mae and other investments, which resulted in losses of \$0.5 million. To the extent we can liquidate our investment securities without incurring a further loss, we plan to reduce our available-for-sale securities to provide funding for our anticipated significant growth in loans where we believe we can generate higher returns. We also recorded a \$10.8 million impairment charge primarily related to the write down on three high-yield, tax-free investments. There are no remaining high-yield securities in our portfolio. In addition, we liquidated most of the investments in our merchant banking subsidiary and do not expect to be active in making merchant banking investments in the future.

Enhancing Stockholder Value. We believe that the intense focus we are giving to execution of our refined strategy will produce substantial organic growth in our revenue and net income as well as our market share. Since we are comfortably above the "well-capitalized" level for both the bank and the holding company, we can use our excess capital to fund this organic growth and create de novo branches and acquire attractive branches in our metropolitan markets. We are considering increasing our share repurchase program above the \$12 million previously authorized by our Board of Directors (pursuant to which we have purchased 697,114 shares totaling \$10.0 million at an average cost per share of \$14.38 as of March 15, 2005), particularly after we complete the sale of our Oklahoma branches. We also are considering increasing our quarterly dividends. We will continue to responsibly consider any proposals from credible bidders to acquire our franchise, but we feel that having the opportunity to execute our refined strategy and generate consistently high returns, as an independent entity for the foreseeable future, is the best way to maximize stockholder value.

Earnings Drivers

Our net earnings depends upon the combined results of operations of Gold Bank, which conducts commercial and consumer banking business by attracting deposits from the general public and deploying those funds in earning assets, and our non-bank subsidiaries, each of which generate income from management fees and commissions.

Gold Bank's profitability depends primarily on net interest income, which is interest income on interest-earning assets less interest expense on interest-bearing liabilities. Interest-earning assets include loans, investment securities and other earning assets such as Federal Funds sold. Interest-bearing liabilities include customer deposits, time and savings deposits and other borrowings such as Federal Funds purchased, short-term borrowings and long-term debt, including junior subordinated deferrable interest debentures. Besides the balances of interest-earning assets and interest-bearing liabilities, net interest income is affected by the bank's interest rate spread. This spread is the difference between the bank's average yield on interest-earning assets and the average rate paid on interest-bearing liabilities. The interest rate spread is affected by changes in interest rates, deposit flows and loan demand, among other factors.

The levels of non-interest income and non-interest expense also affect our profitability. A significant portion of our revenue is non-interest income of our bank and non-bank subsidiaries consisting of investment trading fees and commissions, service fees, gains on the sale of mortgage loans and investment securities, and other fees. Non-interest expense consists of compensation and benefits, occupancy related expenses, deposit insurance premiums, expenses of opening bank branches, acquisition-related expenses and other operating expenses. Our profitability is also affected by our effective tax rate, the Bank's provision for loan losses, and various non-recurring items.

Our approach to management of the spread between interest income and interest expense is described below under "Results of Operations."

Critical Accounting Policies

Our accounting policies are fundamental to understanding management's discussion and analysis of results of operations and financial condition. Many of our accounting policies require significant judgment regarding valuation of assets and liabilities. A summary of significant accounting policies is listed in Note 1 to the consolidated financial statements included elsewhere in this Annual Report. Critical accounting policies are both important to the portrayal of our financial condition and results of operations, and require management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

Allowance for Loan Losses. Our most critical accounting policy relates to the allowance for loan losses and involves significant management valuation judgments. We perform periodic and systematic detailed reviews of the bank's lending portfolio to assess overall collectability. The level of the allowance for loan losses reflects our estimate of the collectability of the loan portfolio. Further discussion of the methodologies used in establishing this reserve is set forth below under "Results of Operations - Provision for Loan Losses" and "Financial Condition - Allowance for Loan Losses".

We make various assumptions and judgments about the collectability of our loan portfolio and provide an allowance for losses based on a number of factors. If our assumptions are wrong, our allowance for loan losses may not be sufficient to cover loan losses. We may have to increase or decrease the allowance in the future. Material additions to our allowance for loan losses would have a material adverse effect on our net earnings.

We actively manage our past due and non-performing loans in an effort to minimize credit losses and monitor asset quality to maintain an adequate loan loss allowance. Although management believes our allowance for loan losses is adequate, there can be no absolute assurance that the allowance will prove sufficient to cover future loan losses. Further, although management uses the best information available to make determinations with respect to the allowance for loan losses, future adjustments may be necessary if economic conditions differ substantially from the assumptions used, or adverse developments arise with respect to non-performing or performing loans. Accordingly, there can be no assurance that the allowance for loan losses will be adequate to cover loan losses or that significant increases or decreases to the allowance will not be required in the future if economic conditions should worsen or improve.

Impairment of Goodwill Analysis. As required by the provisions of Financial Accounting Standards Board (FASB) Statement No. 142, we review goodwill for impairment at least annually or more frequently based upon facts and circumstances related to a particular reporting unit. Based upon our most recent analysis on December 31, 2004, our goodwill related to our bank subsidiary is not impaired.

The fair value of our non-bank financial subsidiaries (Gold Capital Management and Gold Trust Company) fluctuates significantly based upon, among other factors, the net operating income of these subsidiaries. If these subsidiaries experience a sustained deterioration in their cash flow from operations, then we may have to record goodwill impairment charges related to the goodwill for these entities.

During 2002 and 2003, CompuNet Engineering did not earn a majority of its revenue from providing services to financial institutions. As a result, we were required under the BHC Act to divest of CompuNet. During the fourth quarter of 2003, we announced our intent to dispose of CompuNet. As a result of the expected disposition of this business, we recorded additional impairment charges of \$0.8 million and \$3.3 million in the third and fourth quarters of 2003, respectively, to reduce the carrying value of the net assets (including the remaining goodwill) to their fair value. We sold CompuNet on February 4, 2004. During the first quarter of 2004, we recorded a loss of \$0.6 million from this discontinued operation.

Deferred Income Taxes. FASB Statement No. 109, "Accounting for Income Taxes," establishes financial accounting and reporting standards for the effect of income taxes. The objectives of accounting for income taxes are to recognize the amount of taxes payable or refundable for the current year and deferred tax liabilities and assets for the future tax consequences of events that have been recognized in an entity's financial statements or tax returns related to deferred income. Judgment is required in assessing the future tax consequences of events

that have been recognized in our financial statements or tax returns. Fluctuations in the actual outcome of these future tax consequences due to IRS or state agency examination or other factors could materially impact our financial position or its results of operations.

Derivatives. We have entered into interest rate swap agreements to hedge certain variable-rate prime-based loans. We pay a variable rate of interest on the interest rate swaps tied to prime and receive a fixed rate of interest. The swaps are currently designated as cash flow hedges. The formula for computing net settlements under the swaps is the same for each

net settlement, and the re-pricing dates of the swaps match those of the variable-rate loans on which the hedged transactions are based. Ineffectiveness will be recognized in earnings and mark-to-market revaluation will be recognized in the other comprehensive income segment of stockholders' equity.

Before undertaking the hedges, management formally documented its risk management objectives, strategy and the relationship between the interest rate swap agreements and the hedged variable-rate prime-based loans. At the inception of the hedges and on an ongoing basis, management assesses whether the hedging relationship is expected to be highly effective in offsetting interest rate risk. If it is determined that the hedges are not highly effective, changes in the fair value of the interest rate swaps will be recorded in earnings.

Results of Operations

Overview. Our net earnings from continuing operations for the year ended December 31, 2004 totaled \$19.6 million, or \$0.50 per basic and diluted share. Net earnings from continuing operations for the year ended December 31, 2003 totaled \$32.8 million, or \$0.86 per basic and diluted share. Net earnings from continuing operations for the year ended December 31, 2002 totaled \$25.7 million, or \$0.76 per diluted share.

The \$13.2 million decrease in net earnings from continuing operations in 2004 was primarily the result of increased non-interest expenses of \$18.2 million, which included \$16.5 million for settlement of *qui tam* litigation and prepaid offering costs that were expensed due to refinancing of subordinated debt. In 2003 we recovered from our former CEO \$1.9 million of misappropriated bank funds with no further recovery in 2004. This recovery was part of the settlement agreement with our former CEO. In addition, in 2004 there was a net decrease in non-interest income of \$2.2 million which was comprised mainly of a change of \$13.2 million in realized losses on investment securities offset by a change of \$14.8 million in the gain on branch sales. We also had a decrease in the provision for loan losses of \$7.2 million, a decrease in net interest income of \$2.7 million and a decrease in income taxes of \$2.8 million.

The \$7.1 million increase in net earnings from continuing operations in 2003 was the result of increased net interest income of \$18.6 million, accompanied by a decrease in the provision for loan losses of \$6.4 million. We also had a decrease in other income of \$3.9 million, which was offset by an increase in non-interest expense of \$11.6 million. Income tax expense in 2003 also increased by \$2.3 million.

During the year ended December 31, 2004, we sold eight branches in rural Kansas with aggregate deposits of \$363.4 million and recorded a gain of \$17.0 million on the transactions. We also sold three locations in Oklahoma with aggregate deposits of \$63.0 million and recorded a gain of \$3.6 million on the transactions. We further merged Gold Bank - Oklahoma and Gold Bank - Florida into Gold Bank - Kansas. We also sold our technology subsidiary, CompuNet Engineering, Inc., in a transaction that was consummated on February 4, 2004. In connection with our sale of CompuNet, we recorded a loss from this discontinued operation of \$0.6 million in 2004 and \$3.4 million in 2003.

During the year ended December 31, 2003, we sold two branches in rural Kansas with aggregate deposits of \$38.0 million and recorded a gain of \$1.8 million on the transaction. In 2003, we also sold five locations in Oklahoma with aggregate deposits of \$98.0 million and recorded a gain of \$3.9 million on the transactions.

During the year ended December 31, 2002, we acquired four branch locations from a banking institution with deposits aggregating \$149 million. This purchase also resulted in the recording of an intangible asset of \$3.4 million for core deposit premium. We also purchased a trust company for a cash price of \$1.8 million. In 2002, we sold four branches in rural Kansas locations with aggregate deposits of \$66.7 million and recorded a gain of \$2.4 million on the transaction.

-
- (1) Non-accruing loans, loans for sale and investments are included in the computation of average balance.
 - (2) Yield is adjusted for the tax effect of tax exempt securities and loans. The tax effects in 2004, 2003, and 2002 were \$1,807,000, \$1,534,000, and \$3,674,000, respectively.
 - (3) We include loan fees and costs in interest income. Such fees, net of costs, totaled \$1,225,000, \$2,480,000, and \$1,040,000, in 2004, 2003, and 2002, respectively. Fees on loans held for sale are also included.
 - (4) The net interest margin on average earning assets is the net interest income divided by average interest-earning assets.

Total Interest Income. For 2004, total interest income decreased \$5.3 million, or 2.5%, on a fully taxable equivalent basis. The \$5.3 million decrease was due to a 36 basis point decrease in the average rate earned on earning assets partially offset by an increase in the balance of earning assets. Interest income on loans decreased \$4.4 million, or 2.6%. For 2004, the average loan balance increased \$56.1 million, or 2.0%, and the yield earned on loans decreased from 5.95% in 2003 to 5.69% in 2004. Interest income on investments decreased \$1.1 million, or 2.9%. For 2004, the average investment balance (taxable and non-taxable) increased \$105.4 million, or 12.3%. Interest income on taxable investments was positively impacted by the increase in the average balance outstanding, but was negatively impacted by the decrease in average rates earned.

For 2003, total interest income increased \$10.0 million, or 5.0%, on a fully taxable equivalent basis. The \$10.0 million increase was the result of an increase in the balance of earning assets. The increase was partially offset by a 96 basis

point decrease in the average rate earned on earning assets. Interest income on loans increased \$9.9 million, or 6.2%. For 2003, the average loan balance increased \$472.8 million, or 19.8%, and the yield earned on loans decreased from 6.72% in 2002 to 5.95% in 2003. Interest income on investments increased \$0.5 million, or 1.3%. For 2003, the average investment balance (taxable and non-taxable) increased \$232.2 million, or 37.0%. Interest income on non-taxable investments was positively impacted by the increase in the average balance outstanding, but was negatively impacted by the decrease in average rates earned.

Total Interest Expense. Total interest expense was \$88.7 million for 2004 compared to \$91.7 million for 2003, a 3.2% decrease. Interest expense on savings and interest-bearing checking for 2004 decreased \$1.3 million, or 12.4%, as a result of a decrease in the rate to 1.06% in 2004 compared to 1.11% in 2003. The decrease was also impacted by the \$68.9 million decrease in the average balance from 2003. Interest expense on time deposits increased \$1.1 million, or 2.2%, in spite of a rate decrease to 2.66% compared to 2.90% for 2003, which was more than offset by an increase in the average balance of such deposits of \$191.8 million, or 11.3%. Interest expense on combined short-term and long-term borrowings decreased \$2.7 million, or 8.4%, primarily as a result of a decrease in the average balance of such borrowings of \$38.4 million, or 4.2%, in 2004 compared to 2003. In addition, there was a decline in the rate of short-term borrowings from 1.33% in 2003 to 1.11% in 2004. Interest rates on long-term borrowings declined as well from 3.94% in 2003 to 3.78% in 2004.

Total interest expense was \$91.7 million for 2003 compared to \$98.0 million for 2002, a 6.5% decrease. Interest expense on savings and interest-bearing checking for 2003 decreased \$1.9 million, or 15.8%, as a result of a decrease in the rate to 1.11% in 2003 compared to 1.49% in 2002. The decrease in the rate was partially offset by the \$105.0 million increase in the average balance from 2002. Interest expense on time deposits decreased \$3.8 million, or 7.3%, primarily as a result of a rate decrease to 2.90% compared to 3.75% for 2002, which was partially offset by an increase in the average balance of such deposits of \$285.3 million, or 20.3%. Interest expense on combined short-term and long-term borrowings decreased \$0.6 million, or 1.9%, primarily as a result of a decrease in the average rates paid in 2003 compared to 2002.

Net Interest Income. As a result of the changes described above on a fully taxable equivalent basis, net interest income decreased \$2.4 million, or 2.0%, for 2004 compared on a fully taxable equivalent basis to 2003. Net interest income increased \$16.4 million, or 15.9%, for 2003 compared to 2002.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

The following table summarizes the changes in net interest income on a tax-equivalent basis, by major category of interest-earning assets and interest-bearing liabilities, identifying changes related to volumes and rates. Changes not solely due to volume or rate changes are allocated to rate. Management believes this allocation method, applied on a consistent basis, provides meaningful comparisons between periods.

Year Ended December 31,

	2004 compared to 2003			2003 compared to 2002		
	Volume	Average Rate	Total Changes	Volume	Average Rate	Total Changes
(Dollars in thousands)						
Interest Income:						
Loans(1)	\$ 3,340	\$ (7,768)	\$ (4,428)	\$ 31,760	\$ (21,868)	\$ 9,892
Investment securities-taxable	5,311	(3,119)	2,192	12,035	(11,782)	253
Investment securities-non-taxable	(3,832)	521	(3,311)	838	(583)	255
Other earning assets	18	231	249	475	(829)	(354)
Total interest income	4,837	(10,135)	(5,298)	45,108	(35,062)	10,046
Interest expense:						
Savings deposits and interest-bearing checking	(767)	(493)	(1,260)	1,568	(3,474)	(1,906)
Time deposits	5,553	(4,477)	1,076	10,711	(14,557)	(3,846)
Short-term borrowings	(155)	(290)	(445)	210	(731)	(521)
Long-term borrowings	(1,053)	(1,233)	(2,286)	11,538	(11,632)	(94)
Total interest expense	3,578	(6,493)	(2,915)	24,027	(30,394)	(6,367)
Increase (decrease) in net interest income	\$ 1,259	\$ (3,642)	\$ (2,383)	\$ 21,081	\$ (4,668)	\$ 16,413

(1) We include loan fees and costs in interest income. Such fees, net of costs, totaled \$1,225,000, \$2,480,000, and \$1,040,000 in 2004, 2003, and 2002, respectively. Fees on loans held for sale are also included.

Provision for Loan Losses. The provision for loan losses is a charge to earnings recorded to maintain the allowance for loan losses at a level consistent with management's assessment of anticipated losses inherent in the loan portfolio in light of economic conditions, market trends and other factors, at a given point in time. The allowance for loan losses is based on a regular analysis of historical loss rates, specific reserves for loans separately identified and general reserves.

The provision for loan losses was \$5.9 million for 2004 compared to \$13.1 million for 2003, or a 54.9% decrease. These provisions were made to reflect management's assessment of the change in the risk of certain loans and loan categories and for growth in outstanding loans. Our non-performing loans also decreased by \$16.7 million in 2004. During 2004, gross loans, excluding mortgage loans held for sale, increased \$88.9 million or 3.0%. The majority of the loan growth occurred in the real estate and commercial loan portfolios. This loan growth was substantially less than in 2003 which contributed to the decline in the provision along with the decline in non-performing loans.

The provision for loan losses was \$13.1 million for 2003 compared to \$19.4 million for 2002 or a 32.7% decrease. Provisions for 2003 primarily reflect allowances for an \$8.2 million commercial/retail development, two loans of \$5.7 million on two convenience stores and a commercial office building, and a \$3.5 million residential

development and construction loan. During 2003, gross loans, excluding mortgage loans held for sale, increased \$305.8 million or 11.2%. The majority of the loan growth occurred in the real estate and commercial loan portfolios. This loan growth accounted for more than one third of the increase in the provision for loan losses in 2003. Non-performing loans increased to \$32.4 million as of December 31, 2003 as compared to \$15.9 million at December 31, 2002.

Non-Interest Income. The following table presents the components of our non-interest income for the years indicated:

	Year Ended December 31,		
	2004	2003	2002
	(Dollars in thousands)		
Service fees	\$ 15,618	\$ 17,626	\$ 17,457
Investment trading fees and commissions	2,824	5,004	5,649
Net gains on sales of mortgage loans	1,447	2,746	2,201
Unrealized gains (losses) on securities	(53)	30	(42)
Realized gains (losses) on securities	(11,359)	1,847	9,542
Gain on sale of branch facilities	20,574	5,738	2,380
Gain on sale of credit card portfolio	1,156	□	□
Trust fees	4,249	3,721	2,414
Bank-owned life insurance	3,766	3,717	3,463
Other income	1,097	1,129	2,423
	<hr/>	<hr/>	<hr/>
Total non-interest income	\$ 39,319	\$ 41,558	\$ 45,487
	<hr/>	<hr/>	<hr/>
Non-interest income as a percentage of average total assets	0.93%	1.01%	1.34%

Non-interest income was \$39.3 million for 2004 compared to \$41.6 million for 2003, a 5.4% decrease. Service fees declined \$2.0 million due primarily to a \$2.3 million decrease in deposit account service charges partially offset by an increase in underwriting and other fees. Investment trading fees and commissions declined by \$2.2 million due to declining activity in managed assets. Gains on the sales of mortgage loans decreased \$1.3 million, or 47.3%, in 2004 due to the decreased activity in mortgage refinancing and subsequent sales to the secondary market. Realized and unrealized gains on securities changed from a gain of \$1.9 million to a loss of \$11.4 million in 2004. The loss in 2004 was primarily the result of a write-down on three high yield tax-free investments that we determined to be impaired. The impairment charge recorded in the third quarter was \$10.8 million. We also implemented a strategy in the fourth quarter to sell certain low yield investments, which resulted in losses of \$0.5 million. The largest item of non-interest income was derived from the sale of branch facilities, which resulted in gains of \$20.6 million compared to \$5.7 million in 2003. During 2004, we sold our credit card portfolio which resulted in a gain of \$1.2 million. Trust fees increased by \$0.9 million in 2004 due to higher activity in the asset management area of the trust company. Other income decreased by \$0.4 million.

Non-interest income was \$41.6 million for 2003 compared to \$45.5 million for 2002, an 8.6% decrease. This was due to a decrease in investment trading fees and commissions of \$0.6 million as a result of declining activity in the stock and bond markets. Gains on the sales of mortgage loans increased \$0.5 million, or 24.8%, in 2003 due to increased activity in mortgage refinancing and subsequent sales to the secondary market. Realized and unrealized gains on securities decreased from \$9.5 million to \$1.9 million. Approximately \$2.9 million of such realized gains in 2002 came from the sale of an equity security that was an investment of our merchant banking subsidiary. The remainder of such realized gains in 2002 was primarily from the sale of a substantial portion of Gold Bank-Oklahoma's portfolio of mortgage-backed securities, which had an average yield of approximately 7.5%. Faced with increasing prepayments on these higher yielding mortgage-backed securities, we decided to liquidate them and capture our gain on these securities. This situation did not exist in 2003 and therefore the gains on sales of securities were reduced. Gain on sale of branches increased from \$2.4 million in 2002 to \$5.7 million in 2003, which was related to the sale of more branches in 2003 than in 2002. Trust fees increased by \$1.3 million due to increased marketing of trust services and the revenues derived from the George K. Baum acquisition. Other income decreased by \$1.3 million primarily due to a decrease in the gain on sale of bank premises and equipment.

Non-Interest Expense. The following table presents the components of our non-interest expense for the years indicated:

	Year Ended December 31,		
	2004	2003	2002
	(Dollars in thousands)		
Salaries and employee benefits	\$ 50,683	\$ 52,044	\$ 44,174
Expenses for the settlement of <i>qui tam</i> litigation, net	16,500	□	□
Data processing	8,131	8,214	6,651
Net occupancy expense	7,316	7,652	6,218
Depreciation expense	6,505	6,653	6,250
Professional services	6,384	5,697	6,067
Amortization of prepaid offering expenses	3,365	136	136
Losses and expenses resulting from misapplication of bank funds, net of recoveries	□	(1,868)	136
Marketing and advertising	2,995	2,735	2,748
Postage, delivery and supplies	2,651	3,306	3,374
Loan and real estate owned expenses	2,051	2,235	2,646
Telephone	1,921	2,076	2,161
Regulatory assessments and taxes	1,575	1,278	1,003
Acquisition expenses	1,265	□	□
Travel	1,219	1,258	1,433
Insurance	776	707	634
Core deposit intangible amortization	751	751	500
Director's fees and expenses	525	579	512
Dues and subscriptions	518	592	560
Other expenses	3,163	6,057	3,252
Total non-interest expense	\$ 118,294	100,102	\$ 88,455
Efficiency ratio	66.48%	59.24%	56.16%

Total non-interest expense was \$118.3 million for 2004 compared to \$100.1 million for 2003, an 18.2% increase. Salaries and employee benefits decreased \$1.4 million due to branch sales. Settlements and other expenses associated with the *qui tam* lawsuit amounted to \$16.5 million in 2004. Occupancy expenses decreased \$0.3 million as a result of the sale of branch facilities. Depreciation remained fairly constant with a slight reduction of \$0.1 million. Professional services increased from \$5.7 million to \$6.4 million due to an increase of \$0.5 million in legal fees and an increase of \$0.4 million in consulting fees offset by a decrease of \$0.2 million in accounting fees. These increases were attributable among other things to Sarbanes-Oxley compliance and the *qui tam* litigation. Amortization of prepaid offering expenses increased \$3.2 million due to the calling of our trust-preferred debt issuances. In 2004, there were no additional recoveries or losses from misapplication of bank funds. Postage, delivery and supplies declined \$0.7 million primarily due to the reduced number of branches. Acquisition expenses were incurred in 2004 related to the proposed Silver acquisition. Other expenses decreased due to a change from miscellaneous net recoveries to net losses, swap expenses in 2003, a decline in automobile expenses and a decline in investor relations expenses.

Total non-interest expense was \$100.1 million for 2003 compared to \$88.5 million for 2002, a 13.2% increase. This increase is primarily the result of increases in salaries and employee benefits of \$7.9 million and increases in occupancy expenses of \$1.4 million. The increase in salaries and benefits is directly due to the opening of new branch facilities and staffing them accordingly, and the recording of \$1.6 million associated with our restricted stock awards. Data processing expenses increased \$1.6 million due to adding facilities. The increase in occupancy expense is due to the opening of new branch facilities in 2003, as well as branch facilities that were opened

during 2002. Professional services decreased from \$6.1 million to \$5.7 million. A significant portion of this decrease was that the costs of litigation in 2002 seeking protection of our "More Than Money" trademark declined in 2003. In 2003, the amount of improper credits and expenses related to the

misappropriations of our former CEO were reimbursed through negotiated restitution agreements. This resulted in a decrease in non-interest expense of \$1.9 million because the net amount received through restitution exceeded expenses associated with the recovery.

Income Tax Expense. Income tax expense was \$10.9 million for 2004 compared to \$13.6 million for 2003, a \$2.8 million, or 20.2%, decrease. Income tax expense for 2003 was \$13.6 million or \$2.3 million more than the income tax expense of \$11.4 million for 2002, an increase of 20.0%. The effective tax rates for 2004, 2003 and 2002 were 35.7 %, 29.4% and 30.6%, respectively. The 2004 effective rate differs from the expected rate and is increased from 2003 due to a decline in tax-exempt securities interest as well as the portion of the *qui tam* settlement which was non-deductible. The 2003 and 2002 effective tax rates differ from the expected rate of 35% due primarily to the non-taxable income recorded from our investment in bank-owned life insurance policies and tax-exempt securities.

Discontinued Operation. During 2002 and 2003, CompuNet Engineering, Inc. did not earn a majority of its revenue from providing services to financial institutions. As a result, we were required under the Bank Holding Company Act to divest our interest in CompuNet. On January 15, 2004, we entered into a letter of understanding for the sale of our interest in CompuNet. This sale closed on February 4, 2004. We recorded a net loss from this discontinued operation of \$0.6 million in 2004, \$3.4 million in 2003 and net income of \$0.5 million in 2002. The 2003 loss included impairment charges of \$4.1 million to reduce the carrying value of CompuNet's net assets (primarily goodwill) to estimated fair values.

Financial Condition

Lending Activities

Commercial Loans. This category includes loans to service, retail, wholesale and light manufacturing businesses, including agricultural service businesses. Commercial loans were \$908.3 million as of December 31, 2004, or 29.2% of total loans, as compared to \$893.3 million as of December 31, 2003, or 29.7% of total loans. This increase of \$15.0 million, or 1.7%, can be attributed to a continued increase in market share in the Kansas City metro area and contributions from our expansion into the Sarasota and Tampa, Florida markets.

Real Estate Construction. Real estate construction loans totaled \$792.1 million at December 31, 2004, compared to \$656.2 million at December 31, 2003, an increase of \$135.9 million, or 20.7%. This increase primarily reflects the continual increase in residential and commercial construction activity in Johnson County, Kansas, as well as an increased presence in our Florida market area.

Real Estate Loans. Real estate loans represent the largest class of our loans. We categorize real estate loans as follows:

- **Commercial.** Commercial real estate loans increased to \$1,086.2 million at December 31, 2004 compared to \$996.7 million at December 31, 2003, an increase of \$89.5 million, or 9.0%. This increase was the direct result of increased market share in the Kansas City metro area and continued expansion into the Sarasota and Tampa, Florida markets.
- **1 to 4 Family Residential.** Residential real estate loans totaled \$186.0 million at December 31, 2004, compared to \$224.0 million at December 31, 2003, a decrease of \$38.0 million, or 17.0%. Loans in this category consist primarily of owner-occupied residential loans. This decrease is due to the sale of loans held in our portfolio and to significant decline in refinancing activity due to the upward trend in interest rates in the home mortgage market.
- **Agricultural.** This category consists of loans secured by agricultural real estate. Agricultural real estate loans totaled \$33.0 million at December 31, 2004, compared to \$73.2 million at December 31, 2003, a decrease of \$40.2 million, or 54.9%. This decrease in loans corresponds with a similar decrease in agricultural loans (discussed below) as the bank sold several of its rural bank locations and the agricultural real estate loans that were included in their asset base.
- **Mortgage Loans Held for Sale.** Mortgage loans held for sale represent residential loans intended to be sold to secondary investors and in the process of being delivered. Mortgage loans held for sale totaled \$5.7 million at December 31, 2004, compared to \$5.9 million at December 31, 2003, a decrease of \$0.2

million, or 2.7%. This decrease was the result of the timing of the sale of individual loans and the low volume of refinancings at the end of 2004.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

Agricultural Loans. Agricultural loans are typically made to farmers, small corporate farms, and feed and grain dealers. Agricultural loans were \$62.8 million as of December 31, 2004, as compared to \$113.6 million as of December 31, 2003, a decrease of \$50.9 million, or 44.8%. Agricultural loans as a percent of total loans decreased from 3.8% in 2003 to 2.0% in 2004. The decrease in agricultural loans was due to management's decision to sell rural branches and the agricultural loans that were included in their base.

As of December 31, 2004, we had approximately \$15.1 million of agricultural loans that were guaranteed by the Farm Service Agency ("FSA"). Approximately \$4.9 million of such loans were part of the FSA's interest assistance program, pursuant to which the FSA pays us 400 basis points of interest payments annually. Currently, substantially all of our FSA guaranteed loans are located in Enid, Oklahoma and related rural Oklahoma branches. We have a pending contract to sell these branches, but we plan to retain all of the FSA guaranteed loans and our staff that services those loans. Currently, we do not plan to make any new FSA guaranteed loans to borrowers that are not existing customers of Gold Bank.

During the first quarter of 2005, we submitted approximately \$0.3 million of claims to the FSA for interest assistance payments due to Gold Bank on FSA guaranteed loans (substantially all of which was recognized in 2004). The FSA denied our claims on the grounds that our certifications submitted with such claims were not in the form required by its regulations. We dispute the FSA's denial of our claims for payments due and plan to appeal its administrative decision.

For a discussion of pending litigation related to our FSA loan program, see "Item 3 Legal Proceeding" of this Form 10-K.

Consumer and Other Loans. Loans classified as consumer and other loans include automobile and other personal loans. The majority of these are installment loans with fixed interest rates. Consumer and other loans were \$31.8 million as of December 31, 2004, compared to \$54.0 million as of December 31, 2003, a decrease of \$22.2 million, or 41.1%. Consumer and other loans represented 1.0% of total loans as of December 31, 2004, a decrease from 1.8% as of December 31, 2003.

The following table presents the balance of each major category of our loans as of December 31 of each year.

	2004		2003		2002		2001		2000	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%

Total	\$ 2,722,424		\$ 2,816,632		\$ 2,730,351		\$ 2,162,405		\$ 1,946,168	

(1) Includes commercial real estate loans, agriculture real estate loans and 1 to 4 family residential real estate loans.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

The following table sets forth the re-pricing of our portfolio loans and the amount of loans with predetermined interest rates and floating rates outstanding as of December 31, 2004.

	0-3 Months(1)	4 Months to 12 Months	Over 1 to 5 Years	Over 5 Years	Total
(Dollars in thousands)					
Loan category:					
Commercial	\$ 529,598	\$ 67,480	\$ 203,004	\$ 12,536	\$ 812,618
Real estate construction	683,438	23,636	77,196	7,793	792,063
Real estate	264,354	202,041	515,837	82,446	1,064,678
Mortgage loans held for sale	1,543	□	□	4,181	5,724
Agricultural loans	9,190	1,912	8,894	78	20,074
Consumer and other loans	3,575	7,632	12,572	3,488	27,267
Total Loans	\$ 1,491,698	\$ 302,701	\$ 817,503	\$ 110,522	\$ 2,722,424

(1) Loans repricing in 3 months or less exclude loans held for sale.

As of December 31, 2004, loans re-pricing after one year include approximately \$695 million in fixed rate loans and \$233 million in floating or adjustable rate loans.

Asset Quality. We follow regulatory guidelines in placing loans on a non-accrual basis and place loans with doubtful principal repayment on a non-accrual basis, whether current or past due. We consider non-performing assets to include all non-accrual loans, other loans 90 days or more past due as to principal and interest, other real estate owned ("OREO") and repossessed assets. We do not return a loan to accrual status until it is brought current with respect to both principal and interest and future principal payments are no longer in doubt. When a loan is placed on non-accrual status, any previously accrued and uncollected interest income is reversed against current income. We would have recorded additional interest in the amounts of \$1.5 million, \$1.5 million and \$0.8 million, for the years ended December 31, 2004, 2003, and 2002, respectively, if non-accrual loans had been current during these periods. Restructured and impaired loans, other than non-accrual loans, are considered insignificant for all years presented.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

Our non-performing assets are summarized in the following table:

	December 31,				
	2004	2003	2002	2001	2000
	(Dollars in thousands)				
Loans:					
Loans past due 90 days or more still accruing	\$ 593	\$ 9,239	\$ 790	\$ 5,270	\$ 869
Non-accrual loans	15,100	23,131	15,077	17,737	19,853
Non-performing loans	15,693	32,370	15,867	23,007	20,722
Other assets	137	300	4,366	5,288	141
Foreclosed assets held for sale	3,737	6,362	1,993	4,217	3,573
Non-performing assets	\$ 19,567	\$ 39,032	\$ 22,226	\$ 32,512	\$ 24,436
Non-performing loans as a percentage of total loans (excluding mortgage loans held for sale)	0.51%	1.07%	0.58%	1.06%	1.14%
Non-performing assets as a percentage of total assets	0.45%	0.90%	0.58%	1.08%	0.90%
Non-performing assets as a percentage of total loans and OREO (excluding mortgage loans held for sale)	0.63%	1.29%	0.81%	1.50%	1.25%

The decrease during 2004 in non-performing loans can be largely attributed to three specific credits, which can be summarized as follows:

- An \$8.2 million commercial/retail development loan that was past due over 90 days at the end of 2003 was returned to performing status in the first quarter of 2004.
- Two related credits totaling \$5.7 million, which were placed on non-accrual status in 2003, were secured by two convenience stores and a commercial office building. In 2004, two of the properties were sold and the proceeds were used to reduce the total outstanding balance by \$2.6 million. The remaining commercial building was foreclosed upon and was subsequently purchased by the Bank.
- A \$3.5 million residential development and construction loan which was included in non-performing loans at December 31, 2003 was foreclosed on in 2004. The properties were sold with the exception of one property that is now included in OREO with a valuation of \$0.3 million.
- The increase during 2003 in non-performing loans can be largely attributed to the three specific credits described above

Allowance for Loan Losses. The success of a bank depends to a significant extent upon the quality of its assets, particularly loans. This is highlighted by the fact that net loans, including loans held for sale, were 71.0% of our total assets as of December 31, 2004. Credit losses are inherent in the lending business. The risk of loss will vary with general economic conditions, the type of loan being made, the creditworthiness of the borrower over the term of the loan and the quality of the collateral in the case of a collateralized loan, among other things. Management maintains an allowance for loan losses based on industry standards, management's experience, historical experience, an evaluation of economic conditions and regular reviews of delinquencies and loan portfolio quality. Based upon such factors, management makes various assumptions and judgments about the ultimate collectability of the loan portfolio and provides an allowance for probable loan losses.

We review our loan portfolio on a monthly basis specifically analyzing loans which are internally classified as having above-average risk. We determine the level of allowance to be established for each type of loan based on our historical losses, adjusted for current economic conditions. For specific high risk loans, we analyze the

collateral securing such loans to determine if adequate collateral value is available to cover the indebtedness in the event of default and liquidation of such collateral. If we determine that the principal amount of the high risk loan minus the estimated liquidation value of the collateral is less than the specific loan loss allowance assigned to such loan, then we record an additional specific loan loss allowance for such loan. In general, increasing or decreasing risks in a certain industry type, or changes in the collateral value of specifically identified high risk loans, will impact negatively or positively on our allowance for loan losses.

We actively manage our past due and non-performing loans in an effort to minimize credit losses and monitor asset quality to maintain an adequate loan loss allowance. Although management believes our allowance for loan losses is adequate, there can be no assurance that the allowance will prove sufficient to cover future loan losses. Further, although management uses the best information available to make determinations with respect to the allowance for loan losses, future adjustments may be necessary if economic conditions differ substantially from the assumptions used, or adverse developments arise with respect to non-performing or performing loans. Accordingly, there can be no assurance that our allowance for loan losses will be adequate to cover loan losses or that significant increases to the allowance will not be required in the future if economic conditions should worsen. Material additions to the allowance for loan losses would result in a decrease of our net income and capital and could result in an inability to pay dividends, among other adverse consequences.

The allowance for loan losses on December 31, 2004 totaled \$32.1 million, or 1.03% of outstanding loans, compared to \$34.0 million, or 1.13% of outstanding loans, at December 31, 2003. The decrease in our allowance for loan losses during 2004 reflects the \$16.7 million decrease in non-performing loans. Our non-performing loans as a percentage of our total loans decreased from 1.07% at December 31, 2003 to 0.51% at December 31, 2004. See discussion in the provision for loan losses section for additional detail on the provision for loan losses and charge-offs. Charge-offs were \$7.0 million, recoveries were \$1.1 million and provisions charged to expense were \$5.9 million in 2004.

The allowance for loan losses on December 31, 2003 totaled \$34.0 million, or 1.13% of outstanding loans, compared to \$33.4 million, or 1.23% of outstanding loans, at December 31, 2002. The increase in our allowance for loan losses during 2003 reflects the \$286.6 million or 10.5% increase in our loan portfolio. Our non-performing loans as a percentage of our total loans increased from 0.58% at December 31, 2002 to 1.07% at December 31, 2003. See discussion in the provision for loan losses section for additional detail on the provision for loan losses and charge-offs. Charge-offs were \$13.5 million, recoveries were \$1.0 million and provisions charged to expense were \$13.1 million in 2003.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

The following table sets forth activity in our allowance for loan losses during the periods indicated.

Year Ended December 31,

	2004	2003	2002	2001	2000
(Dollars in thousands)

The following table sets forth the allocation of our allowance for loans losses among categories of loans and the percentage of each loan category to total loans outstanding (including loans held for sale) as of December 31, 2004, 2003, 2002, 2001 and 2000:

	Dec. 31, 2004	Percent of Loans in Each Category to Total Loans	Dec. 31, 2003	Percent of Loans in Each Category to Total Loans	Dec. 31, 2002	Percent of Loans in Each Category to Total Loans	Dec. 31, 2001	Percent of Loans in Each Category to Total Loans	Dec. 31, 2000	Percent of Loans in Each Category to Total Loans
(Dollars in thousands)										
Commercial	\$ 12,682	29.25%	\$ 10,584	29.61%	\$ 11,408	29.91%	\$ 7,598	29.12%	\$ 10,498	27.50%
Real estate construction	5,551	25.50%	6,477	21.75%	4,114	13.09%	2,459	9.42%	1,463	9.67%
Real estate Mortgage loans held for sale	11,726	42.03%	14,578	42.88%	14,976	47.64%	12,173	46.65%	9,161	39.51%
Agricultural	35	0.18%	295	0.20%	289	0.92%	137	0.52%	609	6.89%
Consumer and other	1,160	2.02%	1,273	3.77%	1,841	5.86%	2,373	9.09%	2,844	10.42%
	954	1.02%	810	1.79%	811	2.58%	1,357	5.20%	1,605	6.01%
Total	\$ 32,108	100.00%	\$ 34,017	100.00%	\$ 33,439	100.00%	\$ 26,097	100.00%	\$ 26,180	100.00%

The allocation percentages assigned to each category of loans have been developed based on an analysis of historical loss rates, specific reserves and general reserves. The amount of real estate construction loans increased as a result of significant activity in the major metropolitan areas the bank serves. Agricultural loans decreased due to the sale of our rural branches.

Investment Activities. Our investment portfolio serves three important functions: first, it facilitates the adjustment of the balance sheet's sensitivity to changes in interest rate movements; second, it provides an outlet for investing excess funds; and third, it provides liquidity. The investment portfolio is structured to maximize the return on invested funds within conservative risk management guidelines. During 2004, we executed an investment strategy whereby a total of \$312.5 million of investment securities were reclassified from available-for-sale to held-to-maturity to better reflect the nature of the investment securities within our overall interest rate risk management objectives. We believe that the amount of securities in the held-to-maturity category provides desirable insulation to our tangible equity level in a rising interest rate environment and fits our balance sheet needs.

The portfolio is comprised of available-for-sale securities, which includes U.S. Treasury securities, U.S. government sponsored enterprise obligations, state and municipal obligations, Federal Reserve Bank stock, FNMA stock, and Federal Home Loan Bank stock. The U.S. government sponsored enterprise obligations include Federal Home Loan Mortgage Corporation ("FHLMC") notes, FNMA notes and mortgage-backed securities, Federal Home Loan Bank notes and Government National Mortgage Association ("GNMA") mortgage-backed securities. As of December 31, 2004, the available-for-sale portfolio totaled \$498.8 million, including a net unrealized loss of \$6.7 million.

The portfolio is also comprised of held-to-maturity securities, which includes U.S. Treasury securities, U.S. government sponsored enterprise obligations, mortgage-back securities, state and municipal obligations, and trust-preferred securities. As of December 31, 2004, the held-to-maturity portfolio totaled \$411.8 million and was carried at amortized cost.

The investment portfolio decreased \$70.1 million, or 7.1%, during 2004. During 2003, the investment portfolio increased \$250.0 million, or 34.0%. The investment portfolio increased \$147.3 million, or 25.0%, during 2002. We examined our portfolio for any impairment in value and took a \$10.8 million impairment charge primarily related to the write down on 3 high-yield, tax-free investments in 2004. There are no such remaining high-yield securities in our portfolio

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

The composition of the investment portfolio as of December 31, 2004 was 62.5% U.S. government sponsored enterprise obligations, 3.6% state and municipal securities, 24.0% mortgage-backed securities, 0.6% trading securities and 9.3% other securities. The comparable distribution for December 31, 2003 was 60.8% U.S. government sponsored enterprise obligations, 5.0% state and municipal securities, 24.5% mortgage-backed securities, 1.0% trading securities and 8.7% other securities. The investment portfolio represented 21.2% and 22.8% of total assets at December 31, 2004 and 2003, respectively.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

The following table sets forth the composition of our investment portfolio at the dates indicated.

At December 31,			
	2004	2003	2002
(Dollars in thousands)			
Securities held to maturity (1):			
U.S. government-sponsored enterprise obligations	\$ 251,770	\$ 87,329	\$ 155,754
Mortgage-backed securities	95,881	45,208	44,565
Other (2)	44,495	19,656	1,244
Obligations of states and political subdivisions	19,656	955	1,244
Total	\$ 411,802	\$ 133,492	\$ 201,563
Securities available for sale (3):			
U.S. government sponsored enterprise obligations	\$ 321,023	\$ 599,576	\$ 143,705
Mortgage-backed securities	123,632	153,859	269,197
Other (4)	40,474	40,852	42,029
Obligations of states and political subdivisions	13,634	48,613	76,106
Total	498,763	842,900	531,037
Securities held for trading (5)	5,456	9,692	3,485
Total investment securities	\$ 916,021	\$ 986,084	\$ 736,085

- (1) Held-to-maturity securities are carried at amortized cost.
- (2) Includes trust-preferred securities and U.S. Treasury obligations.
- (3) Available-for-sale securities are carried at fair value.
- (4) Includes Federal Home Loan Bank stock, Federal Reserve stock, FNMA stock and U.S. Treasury obligations.
- (5) Trading securities are carried at fair value.

The following table sets forth a summary of maturities in the investment portfolio at December 31, 2004:

	One year or less		Over One Year Through 5 Years		Over 5 Years Through 10 Years		Over 10 years		Total	
	Weighted Amount	Yield	Weighted Amount	Yield	Weighted Amount	Yield	Weighted Amount	Yield	Weighted Amount	Yield
(Dollars in thousands) (At carrying value)										
U.S. government sponsored enterprise obligations	\$ 769	2.13%	\$ 527,730	2.91%	\$ 39,352	3.05%	\$ 4,938	5.08%	\$ 572,789	2.93%
Obligations of states and political subdivisions	5,628	2.15%	9,939	3.83%	13,038	4.06%	4,685	6.52%	33,290	3.98%
Mortgage-backed securities	□	□	5	7.11%	□	□	219,508	3.71%	219,513	3.71%
Other	67	3.01%	3,761	7.71%	□	□	42,046	7.12%	45,874	7.16%
Total	\$ 6,464	2.16%	\$ 541,435	2.95%	\$ 52,390	3.30%	\$ 271,177	4.31%	\$ 871,466	3.39%

The above table does not include trading securities of \$5.5 million and investments without stated maturities of \$39.1 million, which consists principally of Federal Home Loan Bank stock.

Deposit and Borrowing Activities. Deposits are the major source of our funds for lending and other investment purposes. In addition to deposits, we derive funds from interest payments, loan principal payments, loan and securities sales, and funds from operations. Scheduled loan repayments are a relatively stable source of funds while deposit inflows are significantly influenced by general interest rates and money market conditions. We may use borrowings on a short-term basis, if necessary, to compensate for reductions in the availability of other sources of funds, or borrowings may be used on a longer-term basis for general business purposes.

Deposits are attracted principally from within our primary market areas through the offering of a broad variety of deposit instruments including: checking accounts, money market accounts, savings accounts, certificates of deposit

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

(including jumbo certificates in denominations of \$100,000 or more), and retirement savings plans. We have aggressively attempted to obtain deposits in selected markets to increase market share or meet particular liquidity needs. We have used brokered deposits and have sought to attract deposits outside our market areas. On December 31, 2004, we had approximately \$536.6 million of deposits, compared with \$602.3 million on December 31, 2003, which were obtained through brokers. Brokered deposits represented 17.1% of our total deposits as of December 31, 2004.

We establish maturity terms, service fees and withdrawal penalties on a periodic basis. Our determination of rates and terms is predicated on funds transaction and liquidity requirements, rates paid by competitors, growth goals and federal obligations.

During 2004, average balances of non-interest-bearing demand deposits increased \$23.5 million, or 7.7%; average balances of savings and interest-bearing deposits decreased \$68.9 million, or 7.5%; and average balances of time deposits increased \$191.8 million, or 11.3%. As of December 31, 2004, the balance of total deposits, including deposits held for sale, had decreased \$27.5 million compared to December 31, 2003. This decrease is due to an increase of \$355.0 million in time deposits less than \$100,000, a \$345.2 million decrease in time deposits greater than \$100,000, a \$53.0 million decrease in savings and NOW accounts and a \$15.8 million increase in non-interest-bearing accounts. Approximately \$65.7 million of the decrease was the direct result of decreases in brokered deposits, and approximately \$426.4 million deposits were disposed of in branch sales in 2004.

During 2003, average balances of non-interest-bearing demand deposits increased \$48.8 million, or 18.8%; average balances of savings and interest-bearing deposits increased \$105.0 million, or 13.0%; and average balances of time deposits increased \$285.3 million, or 20.3%. As of December 31, 2003, the balance of total deposits, including deposits held for sale, had increased \$447.9 million compared to December 31, 2002. This increase is due to an increase of \$47.7 million in time deposits less than \$100,000, a \$335.2 million increase in time deposits greater than \$100,000, a \$10.0 million increase in savings and NOW accounts and a \$55.0 million increase in non-interest-bearing accounts. Approximately \$352.7 million of the increase was the direct result of increases in brokered deposits offset by approximately \$131.5 million in deposits that were disposed of in branch sales in 2003.

The following table sets forth the average balances and weighted average rates for our categories of deposits at the dates indicated, including deposits held for sale.

	Year Ended December 31,								
	2004			2003			2002		
	Average Balance	Average Rate	% of Total Deposits	Average Balance	Average Rate	% of Total Deposits	Average Balance	Average Rate	% of Total Deposits
	(Dollars in thousands)								
Non-interest-bearing demand	\$ 331,220		10.81%	\$ 307,690		10.55%	\$ 258,897		10.45%
Savings and interest-bearing demand deposits	846,004	1.06%	27.62%	914,915	1.11%	31.37%	809,875	1.49%	32.69%
Time deposits	1,885,656	2.66%	61.57%	1,693,859	2.90%	58.08%	1,408,577	3.75%	56.86%
Total	\$ 3,062,880		100.00%	\$ 2,916,464		100.00%	\$ 2,477,349		100.00%

The aggregate average balance of brokered time deposits was \$615.7 million, \$418.6 and \$205.6 million for the years ended December 31, 2004, 2003 and 2002, respectively.

We do not have a concentration of deposits from any one source of which the loss would have a material adverse effect on our business.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

The following table sets forth a summary of our deposits at the dates indicated.

	December 31,		
	2004	2003	2002
	(Dollars in thousands)		
Non-interest-bearing	\$ 371,380	\$ 355,637	\$ 300,679
Interest-bearing:			
Savings and NOW accounts	862,206	915,212	905,154
Time deposits less than \$100,000			
Brokered	512,183	154,245	85,951
Retail	863,600	866,541	887,114
Time deposits greater than \$100,000			
Brokered	24,415	448,031	163,661
Retail	503,176	424,777	373,997
Less deposits held for sale	350,186	347,169	□
Total deposits	\$ 2,786,774	\$ 2,817,274	\$ 2,716,556

The increase in interest-bearing brokered deposits in 2003 was a result of the need of additional deposits to fund the increase in loans in our higher-growth metropolitan markets. In 2004, brokered deposits declined as we grew retail time deposits.

The following table summarizes at December 31, 2004, our certificates of deposit of \$100,000 or more (excluding brokered deposits) by time remaining until maturity (dollars in thousands).

Maturity Period:	
Less than three months	\$ 169,983
Over three months through six months	86,750
Over six months through twelve months	46,781
Over twelve months	199,662
Total	\$ 503,176

We have no other time deposits in excess of \$100,000 (excluding brokered deposits).

Short-term borrowings consist of federal funds purchased and securities sold under agreements to repurchase. Balances for securities sold under agreements to repurchase outstanding at year end 2004 were \$112.2 million, a \$15.6 million decrease from \$127.8 million outstanding at year end 2003. The balance at year end 2002 was \$153.6 million. Balances in these accounts, which generally have overnight maturities, can fluctuate significantly on a day-to-day basis. The average balance of securities sold under agreements to repurchase was \$133.5 million in 2004, \$140.6 million in 2003, and \$128.8 million in 2002. The average rate paid on these borrowings was 1.80%, 1.34% and 1.10% during 2004, 2003 and 2002, respectively. Federal funds purchased and other short-term borrowings were \$2.5 million, \$7.3 million and \$25.7 million at year end 2004, 2003 and 2002, respectively.

Our subsidiary bank also borrows from the Federal Home Loan Bank (FHLB). At year end 2004 these advances totaled \$576.8 million, of which \$165.6 million is due in 2005. The debt maturing in 2005 may be refinanced or may be repaid with funds generated by the loan and securities portfolios. At year end 2003, these advances

totaled \$489.9 million, and at year end 2002, these advances totaled \$536.4 million. The weighted average interest rate on FHLB borrowings was 4.44%, 4.50% and 4.30% as of 2004, 2003 and 2002, respectively. Long-term debt for 2004 also includes an \$80.0 million long-term repurchase agreement and a \$9.7 million note payable on our Employee Stock Ownership Plan.

Derivative Financial Instruments. We utilize derivative instruments as part of our overall interest rate sensitivity management strategy to mitigate exposure to interest rate risk.

Subordinated-Debt Securities Swaps. In 2003, we had three interest rate swap agreements (initiated during 2002) with an aggregate notional amount of \$82.5 million. The interest rate swaps are derivative financial instruments and were designated as fair value hedges of our subordinated-debt securities. Each swap had a notional amount equal to the outstanding principal amount of the related subordinated-debt securities, together with the same payment dates, maturity

date and call provisions as the related subordinated-debt securities. Under each of the swaps, we paid interest at a variable rate equal to a spread over 90-day LIBOR, adjusted quarterly, and we received a fixed rate equal to the interest that we are obligated to pay on the related trust-preferred securities. A \$28.7 million notional amount swap agreement was called by the counter-party and terminated on April 7, 2003. A \$16.3 million notional amount swap agreement was called by the counter party and terminated on June 30, 2003. The third and final swap for \$37.6 million was called by the counter party and terminated on November 1, 2004. Under these swap agreements, no payments were due between the parties and we recognized no gain or loss when they were called during 2003 and 2004.

FHLB Debt Swaps. We entered into seven interest rate swap agreements with an aggregate notional amount of \$190 million for the purpose of effectively converting \$190 million of fixed-rate FHLB borrowings into floating rate obligations. These interest rate swaps are derivative financial instruments and were designated as fair value hedges of the FHLB borrowings. Each swap had a notional amount equal to the outstanding principal amount of the related FHLB borrowings, together with the same payment dates, maturity dates and call provisions as the related FHLB borrowings. Under each of the swaps, we paid interest at a variable rate equal to a spread over 30-day LIBOR, adjusted monthly, and we receive a fixed rate equal to the interest that we were obligated to pay on the related FHLB borrowings. As a result of the issuance of FASB Statement No. 133 Issue G25- "Cash Flow Hedges: Using the First-Payments-Received Technique in Hedging the Variable Interest Payments on a Group of Non-Benchmark-Rate-Based Loans" (G25) in July 2004, we opted to close-out these fair value hedges on November 30, 2004, for new cash flow swaps based on pools of prime-based loans (discussed below) now permitted under G25. As a result of the termination of these hedges, we made a cash payment of \$5.4 million to our counterparty. A loss of \$0.6 million due to hedging ineffectiveness was recognized in earnings during 2004 for these derivatives. The carrying value of the mark-to-market asset for the hedged FHLB debt is approximately \$4.9 million, which will be amortized to earnings over the life of the related FHLB debt, using the straight-line method which is not materially different from the effective interest method required under APB 21-"Interest on Receivables and Payables". The annual expense recorded in earnings will be \$0.8 million over the term of the underlying debt.

Variable Rate Loans Swaps. On December 1, 2004, we entered into three interest rate swap agreements with an aggregate notional amount of \$190 million for the purpose of effectively converting variable-rate prime-based loans' interest streams into fixed-rate interest streams. Pools of prime-based loans have been designated under the swaps, the principal amount of these pools corresponding to the hedged transactions equal to 102% of the notional amount of the swaps. The formula for computing net settlements under the swaps is the same for each net settlement; that is, the fixed rate is the same throughout the term of the swap and the variable rate is the prime rate. The re-pricing dates of the swaps match those of the variable-rate assets on which the hedged transactions are based. These interest rate swaps are derivative financial instruments and have been designated as cash flow hedges of prime-based pools of loans. The first swap has a notional value of \$60 million and will effectively fix our interest rate at 6.841% plus the credit spread over Prime, if any, with a maturity date of December 2009. The second swap has a notional value of \$60 million and will effectively fix our interest rate at 7.0% plus the credit spread over Prime, if any, with a maturity date of December 2010. The third swap has a notional value of \$70 million and will effectively fix our interest rate at 7.14% plus the credit spread over Prime, if any, with a maturity date of December 2011.

Cash Flows from Swaps. During the year ended December 31, 2004, we received net cash flows of \$1.5 million under the trust-preferred securities related fair value swaps and \$3.5 million on the FHLB debt related fair value swaps for a total of \$5.0 million, which was recorded as a reduction of interest expense on borrowings. During the year ended December 31, 2004, we received net cash flows of \$0.3 million on the seven prime-based loan pools related cash value swaps, which was recorded in interest income on loans. During the year ended December 31, 2004, no losses were recognized in earnings on the cash flow hedges due to hedging ineffectiveness. While approximately \$0.7 million of mark-to-market revaluation was recognized in the Other Comprehensive Income segment of Stockholders' Equity, with approximately \$0.3 million recognized as a deferred tax liability, the carrying value of the mark-to-market asset for the swaps is reported in Accrued interest and other assets in the Consolidated Balance Sheets.

The use of derivative financial instruments is intended to reduce our interest rate exposure. Derivative financial instruments held by us for purposes of managing interest rate risk are summarized as follows:

December 31

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

	2004		2003	
	Notional amount	Credit exposure	Notional amount	Credit Exposure
	(Dollars in thousands)			
Interest rate swaps	\$190,000	1,300 42	\$227,550	443

The notional amounts of derivative financial instruments do not represent amounts exchanged by the parties and, therefore, are not a measure of our credit exposure through our use of these instruments. The credit exposure represents the accounting loss we would incur in the event the counterparties failed completely to perform according to the terms of the derivative financial instruments and the collateral held to support the credit exposure was of no value.

Capital and Liquidity

Sources of Liquidity. Liquidity defines our ability, and the ability of Gold Bank, to generate funds to support asset growth, satisfy other disbursement needs, meet deposit withdrawals and other fund reductions, maintain reserve requirements and otherwise operate on an ongoing basis. Our immediate liquidity needs are met primarily by Federal Funds sold, short-term investments, deposits and the generally predictable cash flow (primarily repayments) from our assets. Intermediate term liquidity is provided by our investment portfolios. We also have established credit facilities with several Federal Home Loan Banks, under which we are eligible for short-term advances and long-term borrowings secured by real estate loans or mortgage-related investments. Our liquidity needs and funding are provided through non-affiliated bank borrowing, cash dividends and tax payments from our subsidiaries.

Cash provided by operating activities for 2004 was \$41.4 million, consisting primarily of net earnings adjusted for non-cash items, loan loss provision (which was offset by origination of loans held for sale), losses on securities sales and gains on branch sales, and increase in accrued interest and other assets, an increase in bank-owned life insurance, and a decrease in accrued interest and other liabilities. Cash used in investing activities was \$459.3 million, consisting primarily of increased loans of \$141.4 million, cash paid of \$184.7 million from branch sales, increased assets held for sale of \$183.1 million, a net decrease of held-to-maturity securities of \$35.0 million, and a decrease in available-for-sale securities of \$12.6 million. Net activity in financing consisted of an increase in deposits of \$398.6 million, a decrease in securities sold under agreements to repurchase of \$15.6 million and net proceeds on issuances of long-term debt of \$30.8 million, which resulted in net cash provided of \$409.1 million.

The principal source of funds at the holding company level is dividends from Gold Bank. The payment of dividends is subject to restrictions imposed by federal and state banking laws and regulations. At December 31, 2004, Gold Bank could pay \$28.4 million in dividends to us and still remain well-capitalized. Management believes funds generated from the dividends from our subsidiaries and our existing lines of credit will be sufficient to meet our current cash requirements.

LaSalle Line of Credit. We chose not to renew our revolving line of credit with LaSalle Bank National Association ("LaSalle Credit Line"). On July 1, 2003, we entered into an amendment with LaSalle Bank to reduce the maximum amount that we could borrow from \$25 million to \$10 million and extended the maturity date from July 1, 2003 to July 1, 2004 (later extended to September 30, 2004). Interest accrued on advances under the LaSalle Credit Line, at our option, was at a rate equal to either LIBOR plus 1.25% per annum or LaSalle Bank's prime rate (but in no event would the interest rate under the LaSalle Credit Line be less than 3.5% per annum). We drew on the LaSalle Credit Line from time to time to fund various corporate matters. As of December 31, 2003, we had an outstanding balance of approximately \$1.5 million on the LaSalle Credit Line, which was paid off in the first quarter of 2004.

Bank One, NA Line of Credit. On October 1, 2004, we entered into a new line of credit with Bank One, NA ("Bank One Credit Line") that allows us to borrow up to \$25 million. The Bank One Credit Line matures on October 1, 2005. We anticipate that the line will be renewed at that time. Interest accrues on advances under the Bank One Credit Line, at our option, at a rate equal to either LIBOR plus 1.25% per annum or Bank One's prime rate. We may draw on the Bank One Credit Line from time to time to fund various corporate matters. As of December 31, 2004, we had no outstanding balance on the Bank One Credit Line.

LaSalle ESOP Loan Agreement. Under our Amended and Restated Loan Agreement, dated as of February 8, 2002 ("Prior ESOP Loan Agreement"), between our Employees' Stock Ownership Plan (the "ESOP") and LaSalle Bank, our ESOP could borrow up to \$15 million. Loans under the Prior ESOP Loan Agreement bore interest, at the ESOP's option, at either LaSalle Bank's Prime Base Rate or LIBOR plus 1.75%. As of December 31, 2003, our ESOP had approximately \$11.6 million outstanding under the Prior ESOP Loan Agreement, which it borrowed to purchase our common stock. We guaranteed the ESOP's obligations under the Prior ESOP Loan Agreement. The LaSalle ESOP loan was repaid on September 30, 2004.

Bank One, NA ESOP Loan Agreement. Under a new Loan Agreement, dated as of October 1, 2004 ("ESOP Loan Agreement"), between our ESOP and Bank One, NA, our ESOP may borrow up to \$10.1 million. Loans under the ESOP Loan Agreement bear interest, at the ESOP's option, at either Bank One's Prime Base Rate or LIBOR plus 1.70%. As of December 31, 2004, our ESOP had approximately \$9.7 million outstanding under the ESOP Loan Agreement, which it borrowed to pay off the Prior ESOP loan. We have guaranteed the ESOP's obligations under the ESOP Loan Agreement. We do not anticipate that the ESOP will borrow any further amounts under the ESOP Loan Agreement.

Federal Home Loan Banks of Des Moines, Topeka and Atlanta. As of December 31, 2004, we had \$10.0 million outstanding under our credit agreement with Federal Home Loan Bank of Des Moines ("FHLB-Des Moines"), \$496.8 million of advances outstanding under our credit agreement with the Federal Home Loan Bank of Topeka ("FHLB-Topeka"), and \$70.0 million of advances outstanding under our credit agreement with the Federal Home Loan Bank of Atlanta ("FHLB-Atlanta").

Capital. We actively monitor our compliance with regulatory capital requirements. The elements of capital adequacy standards include strict definitions of core capital and total assets, which include off-balance sheet items such as commitments to extend credit. Under the risk-based capital method of capital measurement, the ratio computed is dependent on the amount and composition of assets recorded on the balance sheet and the amount and composition of off-balance sheet items, in addition to the level of capital. Historically, we have increased core capital through retention of earnings or capital infusions. The primary source of funds available to us is dividends by our subsidiaries, in particular Gold Bank. The bank's ability to pay dividends is subject to regulatory requirements. At December 31, 2004, our subsidiaries could pay dividends of \$90.5 million including \$28.4 million from Gold Bank. To be "well-capitalized" a company's total risk-based capital ratio, tier 1 risk-based capital ratio and tier 1 leverage ratio would be at least 10.0%, 6.0% and 5.0%, respectively. Our total risk-based capital ratio, tier 1 risk-based capital ratio and tier 1 leverage ratio at December 31, 2004 were 11.08%, 9.32% and 7.75%, respectively. These same ratios at December 31, 2003 were 10.78%, 8.87% and 7.01%, respectively.

BOLI Policies. Gold Bank has purchased bank-owned life insurance ("BOLI") policies with death benefits payable to the Bank on the lives of certain officers. These single-premium, whole-life policies provide favorable tax benefits, but are illiquid investments. Federal guidelines limit a bank's aggregate investment in BOLI to 25% of the bank's capital and surplus, and its aggregate investment in BOLI policies from a single insurance company to 15% of the bank's capital and surplus. All Gold Bank BOLI investments comply with federal guidelines. As of December 31, 2004, Gold Bank had \$83.0 million of BOLI (equal to 22.4% of its capital and surplus) compared to \$80.2 million (24.5% of its capital and surplus) as of December 31, 2003, an increase of \$2.8 million or 3.5%.

We monitor the financial condition and credit rating of each of the three life insurance companies that issued the BOLI policies. We believe that these BOLI investments will not have any significant impact on the capital or liquidity of Gold Bank.

CompuNet Activities. CompuNet Engineering, Inc. provided information technology, e-commerce services and networking solutions for banks and other businesses. On February 4, 2004, we sold CompuNet Engineering to Computer Source, Inc.

Subordinated-Debt Securities. We formed three statutory trusts during 2004 to issue a total of \$84.0 million in trust-preferred securities. The three offerings were pooled private placements exempt from registration under the Securities Act pursuant to Section 4(2) thereunder. We own 100% of the common securities of all three trusts. The trusts were formed with the sole purpose of issuing the trust-preferred securities and investing the proceeds from the sale of such trust-preferred securities in subordinated debentures issued by us. The debentures held by the trusts are the sole assets of the trusts. We have provided a full, irrevocable, and unconditional subordinated guarantee of the obligations of the three trusts under the preferred securities.

We formed Gold Banc Trust III on March 11, 2004. Effective March 15, 2004, Gold Banc Trust III issued \$16.0 million of trust-preferred securities to institutional investors. Gold Banc Trust III used the proceeds from the issuance of the trust-preferred securities, as well as our \$495,000 capital investment in the trust, to purchase \$16,495,000 of junior subordinated debt securities issued by us. The debentures mature on April 23, 2034, and may be redeemed, at our option, after April 23, 2009. The interest rate of the debentures is fixed at 5.80% for a five-year period through April 23, 2009. Thereafter, interest is at a floating rate equal to LIBOR plus 2.75%, adjustable quarterly. Interest is payable quarterly. The trust-preferred securities carry an interest rate identical to that of the related debenture.

We formed Gold Banc Trust IV on March 12, 2004. Effective March 15, 2004, Gold Banc Trust IV issued \$30.0 million of trust-preferred securities to institutional investors. Gold Banc Trust IV used the proceeds from the issuance of the trust-preferred securities, as well as our \$928,000 capital investment in the trust, to purchase \$30,928,000 of floating rate junior subordinated-debt securities issued by us. The debentures mature on April 7, 2034, and may be redeemed, at our option, after April 7, 2009. The interest rate of the debentures is a floating rate equal to LIBOR plus 2.75%, adjustable quarterly. Interest is payable quarterly. The trust-preferred securities carry an interest rate identical to that of the related debenture.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

On April 22, 2004, we used the proceeds of Gold Banc Trust III's and Gold Banc Trust IV's issuance of trust-preferred securities to redeem (i) \$16,249,420 in principal amount of the 8.50% Preferred Securities issued by Gold Banc

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

Capital Trust, formerly ABI Capital Trust and (ii) \$28,750,000 in principal amount of the 8.75% Preferred Securities issued by GBCI Capital Trust.

We formed Gold Banc Capital Trust V on November 8, 2004. Effective November 10, 2004, Gold Banc Capital Trust V issued \$38.0 million of trust-preferred securities to institutional investors. Gold Banc Capital Trust V used the proceeds from the issuance of the trust-preferred securities, as well as our \$1,176,000 capital investment in the trust, to purchase \$39,176,000 of junior subordinated deferrable interest debentures issued by us. The debentures mature on December 15, 2034, and may be redeemed, at our option, after December 15, 2009. The interest rate of the debentures is fixed at 5.90% for a five-year period through December 15, 2009. Thereafter, interest is at a floating rate equal to LIBOR plus 2.10%. Interest is payable quarterly. The trust-preferred securities carry an interest rate identical to that of the related debenture. On November 15, 2004, we used the proceeds of Gold Banc Capital Trust V's issuance of trust-preferred securities to redeem \$37,550,000 in principal amount of the 9.12% Preferred Securities issued by GBCI Capital Trust II.

We have adopted the provisions of FASB Interpretation No. 46R, "Consolidation of Variable Interest Entities." FASB Interpretation No. 46R requires, among other things, that such trusts be deconsolidated. As a result, we no longer consolidate the Trusts in our consolidated financial statements.

Total expenses associated with the issuance of the trust-preferred securities during 2004 were \$0.4 million which are being amortized on a straight-line basis over the life of the related obligations. During 2004, \$3.3 million of prepaid offering costs were written off related to the retirement of GBCI Capital Trust, GBCI Capital Trust II and Gold Banc Capital Trust. Amortization of issuance expenses during the years ended December 31, 2004, 2003 and 2002, included in interest expense, aggregated \$0.1 million, \$0.1 million and \$0.1 million, respectively.

Commitments, Contractual Obligations, and Off-Balance Sheet Arrangements

Various commitments and contingent liabilities arise in the normal course of business, which are not required to be recorded on the consolidated balance sheet. The most significant of these are unfunded loan commitments totaling approximately \$909.2 million and standby letters of credit, totaling approximately \$97.7 million at December 31, 2004. We have various other financial instruments with off-balance sheet risk, such as commercial letters of credit and commitments to purchase and sell when-issued securities. Since many commitments expire unused or only partially used, these totals do not necessarily reflect future cash requirements. Management does not anticipate any material losses arising from commitments and contingent liabilities and believes there are no material commitments to extend credit that represent risks of an unusual nature.

A table summarizing contractual cash obligations (excluding interest) of the Company at December 31, 2004 and the expected timing of these payments follows:

(In thousands)	In One Year or Less	After One Year through Three Years	After Three Years through Five Years	After Five	Total
Long-term debt obligations	\$ 166,156	\$ 147,466	\$ 33,987	\$ 430,524	\$ 778,133
Operating lease obligations	3,579	5,505	4,629	14,229	27,942
Purchase obligations	5,643	5,194	2,365	433	13,635
Time Open and C.D.'s	1,106,604	568,273	227,748	749	1,903,374
Total	\$ 1,281,982	\$ 726,438	\$ 268,729	\$ 445,935	\$ 2,723,084

Impact of Inflation and Changes in Prices

The primary impact of inflation on our operations is reflected in increased operating costs. Unlike most industrial companies, virtually all of the assets and liabilities of a financial institution are monetary in nature. As a result, changes in interest rates have a more significant impact on the performance of a financial institution

than do changes in the general rate of inflation and changes in prices. Interest rate changes do not necessarily move in the same direction or have the same magnitude as changes in the prices of goods and services.

Impact of Recently Issued Accounting Standards

See note 1(o) of the Notes to Consolidated Financial Statements.

Forward Looking Information and Statements

The information included or incorporated by reference in this Report contains certain forward-looking statements with respect to our financial condition, results of operations, plans, objectives, future financial performance and business, including, without limitation:

- statements that are not historical in nature;
- statements preceded by, followed by or that include the words "believes," "expects," "may," "will," "should," "could," "anticipates," "estimates," "intends" or similar expressions; and
- statements regarding the timing of the closing of the branch sales.

Forward-looking statements are not guarantees of future performance or results. They involve risks, uncertainties and assumptions. Actual results may differ materially from those contemplated by the forward-looking statements due to, among others, the following factors:

- inability to obtain waivers of defaults under our credit facilities or find alternative financing;
- transition and strategies of new management;
- changes in interest margins on loans;
- changes in allowance for loan losses;
- changes in the interest rate environment;
- competitive pressures among financial services companies may increase significantly;
- general economic conditions, either nationally or in our markets, may be less favorable than expected;
- legislative or regulatory changes may adversely affect the business in which our Company and its subsidiaries are engaged;
- technological changes may be more difficult or expensive than anticipated;
- hedging activities may be less effective than anticipated; and
- changes may occur in the securities markets.

These risks and other risks are described in Exhibit 99.1 to this Annual Report and are incorporated herein by reference.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**Asset/Liability Management**

Asset/liability management refers to management's efforts to minimize fluctuations in net interest income caused by interest rate changes. This is accomplished by managing the re-pricing of interest rate sensitive interest-earning assets and interest-bearing liabilities. An interest rate sensitive balance sheet item is one that is able to re-price quickly through maturity or otherwise. Controlling the maturity or re-pricing of an institution's liabilities and assets in order to minimize interest rate risk is commonly referred to as gap management. Close matching of the re-pricing of assets and liabilities will normally result in little change in net interest income when interest rates change. A mismatched gap position will normally result in changes in net interest income as interest rates change.

Along with internal gap management reports, we use an asset/liability modeling service to analyze the Bank's current gap position. The system simulates our Bank's asset and liability base rate scenario and projects future net interest income results under several interest rate assumptions. We strive to maintain an aggregate gap position such that changes in interest rates will not affect net interest income by more than 10% in any 12-month period. We utilize interest rate swap agreements to assist in the management of interest rate sensitivity, as described in "Item 7-Management's Discussion and Analysis of Financial Condition and Results of Operations". The use of such derivative financial instruments is intended to reduce our interest rate exposure.

The following table indicates that, at December 31, 2004, if there had been a sudden and sustained increase in prevailing market interest rates, our 2005 net interest income would be expected to increase, while a decrease in rates would indicate a decrease in income.

<u>Changes in Interest Rate</u>	<u>Net Interest Income</u>	<u>Change</u>	<u>Percent Change</u>
(Dollars in thousands)			
200 basis point rise	\$ 143,449	\$ 10,055	7.5%
100 basis point rise	139,303	5,909	4.4%
Base rate scenario	133,394	□	□
50 basis point decline	129,450	(3,944)	(3.0)%
100 basis point decline	125,135	(8,259)	(6.2)%

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

The following table sets forth the maturities of our interest-earning assets and interest-bearing liabilities outstanding at December 31, 2004.

Interest Rate Sensitivity					
0-3 Months	4 Months to 12 Months	Over 1 to 5 Years	Over 5 Years	Total	
(Dollars in thousands)					
Rate-Sensitive Assets:					
Loans (1)	\$ 1,491,698	\$ 302,701	\$ 817,503	\$ 110,522	\$ 2,722,424
Investment securities	34,476	96,604	651,383	133,558	916,021
Other interest-bearing assets	43,286	□	□	□	43,286
Total rate-sensitive assets	\$ 1,569,460	\$ 399,305	\$ 1,468,886	\$ 244,080	\$ 3,681,731
Rate-Sensitive Liabilities:					
Savings deposits and interest-bearing checking (2)	\$ 737,957	\$ □	\$ □	\$ □	\$ 737,957
Time deposits (3)	234,257	696,665	797,836	749	1,729,507
Short-term borrowings	114,668	□	□	□	114,668
Long-term borrowings	272,659	60,312	212,929	232,233	778,133
Total rate-sensitive liabilities	\$ 1,359,541	\$ 756,977	\$ 1,010,765	\$ 232,982	\$ 3,360,265
Interest Rate Derivatives	(190,000)	□	60,000	130,000	□
Net gap	\$ 19,919	\$ (357,672)	\$ 518,121	\$ 141,098	\$ 321,466
Cumulative gap	\$ 19,919	\$ (337,753)	\$ 180,368	\$ 321,466	
Cumulative ratio of interest-earning assets to interest-bearing liabilities	115.44%	52.75%	145.32%	104.76%	
Ratio of cumulative gap to interest-earning assets	1.27%	(84.59)%	12.28%	131.71%	

(1) Loans 3 months or less exclude \$383,364,000 of loans held for sale.

(2) Savings deposits and interest-bearing checking 3 months or less exclude \$124,249,000 of deposits held for sale.

(3) Time deposits 3 months or less exclude \$173,867,000 of deposits held for sale.

The cumulative gap value shown above indicates that a small rise or fall in interest rates would not have a material effect on net interest income. Our ability to re-price rates on savings deposits and interest-bearing checking accounts in line with our markets or need for deposits helps with the management of margins. Historically, rate changes on these deposits have not reflected the full effect of overall rate movements.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Gold Banc Corporation, Inc.:

We have audited the accompanying consolidated balance sheets of Gold Banc Corporation, Inc. and subsidiaries as of December 31, 2004 and 2003, and the related consolidated statements of operations, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2004. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Gold Banc Corporation, Inc. and subsidiaries as of December 31, 2004 and 2003, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2004, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 2 to the consolidated financial statements, the Company disposed of CompuNet Engineering, Inc., a wholly owned subsidiary of the Company in 2004. The assets, liabilities, and results of operations of CompuNet are included in discontinued operations in the accompanying consolidated financial statements.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Gold Banc Corporation, Inc.'s internal control over financial reporting as of December 31, 2004, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 24, 2005, expressed an unqualified opinion on management's assessment of, and the effective operation of, internal control over financial reporting.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A
GOLD BANC CORPORATION, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2004, 2003 and 2002

(1) Summary of Significant Accounting Policies

(a) Principles of Consolidation

The consolidated financial statements include the accounts of Gold Banc Corporation, Inc. and its subsidiary bank and companies, collectively referred to as the Company. All significant inter-company accounts and transactions have been eliminated.

(b) Nature of Operations

The Company is a bank holding company that owns and operates a community bank with branches located in Kansas, Missouri, Florida, and Oklahoma. The Company provides a full range of commercial and consumer financial services. The Company owns and operates a full-service broker/dealer and investment firm and a trust company. The Company has determined that its financial services businesses are a single operating segment. As a result of the Company's sale of CompuNet Engineering, Inc. in 2004, its information technology service subsidiary, the Company's consolidated financial statements present CompuNet as a discontinued operation for all years presented.

(c) Basis of Presentation

The preparation of the consolidated financial statements, in conformity with accounting principles generally accepted in the United States of America, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Certain amounts for prior years have been reclassified to conform to the current year presentation.

(d) Investment Securities

The Company classifies investment securities in one of three categories: trading, available-for-sale, or held-to-maturity. Trading securities are bought and held principally for the purpose of selling in the near term. Held-to-maturity securities are those that the Company has the positive intent and ability to hold to maturity. All other securities are classified as available-for-sale.

Held-to-maturity securities are recorded at amortized cost. Trading and available-for-sale securities are recorded at fair value. Unrealized holding gains and losses on trading securities are included in earnings. Unrealized holding gains and losses, net of related tax effect, on available-for-sale securities are excluded from earnings and are reported as a separate component of other comprehensive income until realized. Realized gains and losses upon disposition of investment securities are included in earnings using the specific identification method for determining the cost of the securities sold. Transfers of available-for-sale securities to the held-to-maturity portfolio to better reflect the Company's overall interest rate risk management objectives are intended to be infrequent with the total unrealized gain or loss being recorded in accumulated other comprehensive income and amortized to earnings over the life of the securities.

A decline in the fair value of any security below its cost that is deemed other than temporary is charged to earnings resulting in the establishment of a new cost basis for the security. Premiums and discounts are amortized or accreted over the life of the related security as an adjustment to interest income. Dividend and interest income are recognized when earned.

(e) Mortgage Loans Held for Sale

Mortgage loans held for sale are carried at the lower of cost or fair value, computed on an individual basis. Fair value is computed using the outstanding commitment price from investors. Loan origination and processing fees and related direct origination costs are deferred until the related loan is sold. Revenue from the sale of loans is recognized at the sale date when title passes.

The Company generally does not retain mortgage servicing rights. Sales of mortgage servicing rights are recorded when title has passed, substantially all risks and rewards of ownership have irrevocably passed to the buyer, and any recourse is minor and can be reasonably estimated. Any gains or losses from such sales are recorded at the sale date.

(f) Loans

Loans receivable that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at their outstanding principal balance adjusted for any charge-offs, the allowance for loan losses, and any deferred fees or costs on originated loans and unamortized premiums or discounts on purchased loans. Loans held for sale are carried at the lesser of carrying amount or fair value less costs to sell and represent loans identified for pending, planned branch sales.

Interest income on loans is accrued and credited to earnings based on the principal amount outstanding and the applicable rate. The accrual of interest on impaired loans is discontinued when, in management's opinion, the borrower may be unable to meet payments as they become due. When interest accrual is discontinued, all unpaid accrued interest is reversed against current period interest income. Interest income is subsequently recognized after the Company has received payment of the full principal balance. Once that principal balance has been received, the Company recognizes interest income that would have been earned as if the loan had continued to accrue interest.

(g) Allowance for Loan Losses

Provisions for losses on loans receivable are based upon management's estimate of the amount required to maintain an adequate allowance for losses, reflective of the risk in the loan portfolio. This estimate is based on reviews of the loan portfolio, including assessment of the estimated net realizable value of the related underlying collateral, and upon consideration of past loss experience, current economic conditions, and such other factors that, in the opinion of management, deserve current recognition. Impaired loans include all non-accrual loans and loans ninety days delinquent and still accruing interest. Loans are charged off to the extent they are deemed to be uncollectible.

(h) Premises and Equipment

Premises and equipment are stated at cost, less accumulated depreciation and amortization. Depreciation and amortization are computed using the straight-line and accelerated methods based on the estimated useful lives of the related assets.

(i) Goodwill

The Company adopted Financial Accounting Standards Board (FASB) Statement No. 142, "Goodwill and Other Intangible Assets," (FASB 142) on January 1, 2002, which established new accounting and reporting for acquired goodwill and other intangible assets. Under FASB 142, goodwill and intangible assets that have indefinite useful lives are not amortized, but rather are tested at least annually for impairment. Intangible assets that have finite useful lives continue to be amortized over those periods.

(j) Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the consolidated financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and are measured using enacted tax rates expected to apply to taxable income in the years in which those differences are expected to be recovered or settled. Valuation allowances are established for deferred tax assets unless it is more likely than not that such deferred tax assets will be realized. The effect on deferred tax assets and liabilities for subsequent changes in tax rates is recognized in the period that includes the tax rate change.

(k) Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, cash equivalents include cash on hand, amounts due from banks, federal funds sold, and interest-bearing deposits.

(l) Earnings Per Share

Basic earnings per share is based upon the weighted average number of common shares outstanding during the periods presented. Diluted earnings per share include the effects of all dilutive potential common shares outstanding during each year. The shares used in the calculation of basic and diluted income per share are shown below (in thousands):

	<u>2004</u>	<u>2003</u>	<u>2002</u>
Weighted average common shares outstanding □ basic	38,723	37,961	33,588
Stock options and unvested restricted stock	306	333	183
Weighted average common shares outstanding □ diluted	<u>39,029</u>	<u>38,294</u>	<u>33,771</u>

The Company accounts for stock option awards to employees using the intrinsic value method of accounting in accordance with Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees." Under the intrinsic value method, because the exercise price of the Company's employee stock options equals the market price of the underlying stock on the date of grant, compensation expense is not recognized. Had compensation cost for the Company's stock options granted been determined based upon the fair value at the grant date for awards consistent with the methodology prescribed under FASB Statement No. 123, "Accounting for Stock-Based Compensation," the Company's net earnings and earnings per share would have been reduced to the pro forma amounts shown below:

	<u>2004</u>	<u>2003</u>	<u>2002</u>
(Dollars in thousands, except per share data)			
Net earnings:			
As reported	\$ 19,087	\$ 29,410	\$ 26,217
Stock-based compensation expense included in reported net earnings, net of tax	2,147	1,070	□
Deduct total stock-based employee compensation determined under fair value method, net of tax	(2,667)	(1,625)	(299)
Pro forma	<u>\$ 18,567</u>	<u>\$ 28,855</u>	<u>\$ 25,918</u>
Basic earnings per share:			
As reported	0.49	0.77	0.78
Pro forma	0.47	0.76	0.77
Diluted earnings per share:			
As reported	0.49	0.77	0.78
Pro forma	0.47	0.75	0.77

(m) Derivatives

The Company is exposed to market risk, including changes in interest rates. To manage the volatility relating to this exposure, the Company utilizes certain derivative instruments. Derivatives utilized in hedging relationships are designated, based on the exposure being hedged, as fair value or cash flow hedges. Under the fair value hedging model, gains or losses attributable to the change in fair value of the derivative, as well as gains and losses attributable to the change in fair value of the hedged item, are recognized in current earnings. Under the

cash flow hedging model, the effective portion of the gain or loss related to the derivative is recognized as a component of other comprehensive income (loss). The ineffective portion is recognized in current earnings. The company assesses the effectiveness of the derivative instruments on an ongoing basis. If it is determined that these instruments are ineffective,

hedge accounting will be discontinued with changes in the fair value of the instruments recorded in current period earnings.

(n) Impact of Recently Issued Accounting Standards

In March 2004, the SEC staff released Staff Accounting Bulletin No. 105, "Application of Accounting Principles to Loan Commitments" (SAB 105), which provided recognition and disclosure guidance for entities entering loan commitments that are required to be accounted for as derivative instruments. The Company's adoption of SAB 105 did not have a significant impact on the Company's consolidated financial statements.

In March 2004, The Emerging Issues Task Force (EITF) issued consensus Issue No. 03-1, "The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments" (Issue 03-1), which provided guidance for evaluating whether an investment is other-than-temporarily impaired. The recognition and measurement provisions of Issue 03-1 were effective for other-than-temporary impairment evaluations made in reporting periods beginning after June 15, 2004 with the disclosure provisions generally effective for annual financial statements for fiscal years ended after December 15, 2004. In September 2004, the Financial Accounting Standards Board (FASB) staff issued FASB Staff Position (FSP) EITF 03-1-a, which effectively delays certain recognition and measurement provisions of the Issue. The Company is currently evaluating the impact of Issue 03-1 on the Company's consolidated financial statements, has made required disclosures, and intends to comply with all provisions of Issue 03-1 as they are effective.

On July 27, 2004, the Derivatives Implementation Group (DIG) issued Statement 133 Implementation Issue No. G25, "Cash Flow Hedges: Using the First-Payments-Received Technique in Hedging the Variable Interest Payments on a Group of Non-Benchmark-Rate-Based Loans", (G25). G25 permits companies to hedge pools of prime-based assets or liabilities (or other "non-benchmark-based" pools) using a "first-payments-received" method. Based on this guidance, derivatives can be used as a hedging instrument, as long as the derivative meets the requirements of FASB Statement No. 133 (that is, the derivative must still be "highly effective" at achieving offsetting changes in cash flows and any "ineffectiveness" must be recognized in earnings). This issue is applicable to the Company's current hedging strategy described in Note 13 of the Company's Notes to Consolidated Financial Statements.

On December 16, 2004, The FASB published FASB Statement No. 123 (revised 2004), "Share-Based Payment" (FASB 123), requiring that the compensation cost relating to share-based payment transactions be recognized in financial statements as an expense. The Company will implement this new standard for the quarter ended September 30, 2005, in accordance with its requirements. The Company cannot currently quantify with precision the effect that this standard would have on the financial position or results of operations in the future, except that the Company likely will recognize a greater expense for any awards that are granted in the future versus using the current guidance.

On December 16, 2004, The FASB published FASB Statement No. 153, "Exchanges of Non-monetary Assets, an amendment of APB Opinion 29, Accounting for Non-monetary Transactions" (FASB 153), which addresses the measurement of exchanges of non-monetary assets. The amendments are based on the principle that exchanges of non-monetary assets should be measured based on the fair value of the assets exchanged. It eliminates the exception from fair value measurement for non-monetary exchanges of similar productive assets, and replaces it with an exception for exchanges that do not have commercial substance. The Statement specifies that a non-monetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. The Company is currently evaluating the impact of FASB 153 on the consolidated financial statements and will implement this new standard for the quarter ended September 30, 2005, in accordance with its requirements.

(o) Related Parties

At December 31, 2004, the Company has a commitment to invest up to \$5.0 million in a Small Business Investment Company in which a member of the board of directors is a principal and has a current investment outstanding of \$2.0 million. The current carrying value of this investment is \$1.8 million. The balance of this investment was \$0.7 million as of December 31, 2003 with a carrying value of \$0.6 million.

(2) Discontinued Operation

During the fourth quarter of 2003, the Company announced its intent to dispose of CompuNet Engineering, Inc. (CompuNet). CompuNet was a wholly-owned subsidiary of the Company that engaged in technology and e-commerce services. As a result of the disposition of this business, in 2003 the Company recorded an estimated pre-tax impairment charge of \$4.1 million (\$2.7 million after tax), to reduce the carrying value of the net assets (including goodwill) to their fair value net of selling costs. On February 4, 2004, the Company completed the sale of CompuNet to an outside investor. The financial after-tax impact of CompuNet operations in 2004 until the sale date resulted in an additional loss from discontinued operations of \$0.6 million for that period. In accordance with FASB Statement No. 144, "Accounting for the Impairment or Disposal of Long-lived Assets", the Company has presented CompuNet as a discontinued operation. The following table presents the net assets (carrying value) of CompuNet as of December 31, 2003 (amounts in thousands):

Cash	\$	331
Other assets		2,761
Property, plant and equipment, net		395
Goodwill		416
Accounts payable and accrued expenses		(599)
Long-term debt		(2)
Other liabilities		(27)
		<hr/>
Net assets	\$	3,275
		<hr/>

Summarized results of operations related to CompuNet (as reported in discontinued operation) are as follows for the years ended December 31, 2004, 2003 and 2002 (amounts in thousands):

	2004	2003	2002
	<hr/>	<hr/>	<hr/>

	<hr/>	<hr/>	<hr/>

(3) Dispositions

Sale of Credit Card Portfolio. On June 15, 2004, the Company entered into an agreement to dispose of its credit card portfolio and recognized a gain of \$1.2 million.

Sale of Seven Gold Bank-Kansas branches. On September 16, 2003, the Company announced that it had entered into an agreement for the sale of seven Gold Bank-Kansas branches. An employee-investor group led by the regional Gold Bank-Kansas president in Marysville, Kansas, agreed to purchase the Gold Bank-Kansas branches. The sale of the Gold Bank-Kansas branches closed on February 13, 2004. As of the date of closing, the deposits and loans of the seven Gold Bank-Kansas branches were \$333.4 million and \$194.8 million, respectively. Total property, plant and equipment net of accumulated depreciation was \$3.8 million. Such are shown as assets and liabilities held for sale as of December 31, 2003. In addition, goodwill of \$0.6 million was allocated to these branches. In connection with the sale of these branches, the Company recorded a gain of \$16.2 million.

Sale of Elkhart branch. On August 28, 2003, Gold Bank-Oklahoma entered into an agreement for the sale its branch location in Elkhart, Kansas to ColoEast Bankshares. The sale of this Gold Bank-Kansas branch closed on February 5, 2004. As of the date of closing, the deposits and loans of this Gold Bank-Oklahoma branch were \$30.0 million and \$3.2 million, respectively. Total property, plant and equipment net of accumulated depreciation was

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

\$0.3 million. Such are shown as assets and liabilities held for sale as of December 31, 2003. In connection with the sale of this branch, the Company recorded a gain of \$0.9 million.

Sale of Weatherford, Geary and Cordell, Oklahoma branches. On February 13, 2004, Gold Bank-Oklahoma entered into an agreement for the sale of its branch locations in Weatherford, Geary and Cordell, Oklahoma to Bank of Western Oklahoma of Elk City. The sale of these Gold Bank-Oklahoma branches closed on May 7, 2004. As of

the date of closing, the deposits and loans of these Gold Bank-Oklahoma branches were \$63.0 million and \$18.6 million, respectively. In connection with the sale of these branches, the Company recorded a gain of \$3.6 million.

Sale of Guymon Branch. On December 24, 2002, Gold Bank-Oklahoma entered into an agreement for the sale of its Guymon, Oklahoma branch location to City National Bank and Trust Company of Guymon, Oklahoma. The deposits and loans of this branch were approximately \$36.0 million and \$5.5 million, respectively, at the closing date. The sale of this branch closed on April 11, 2003, following receipt of regulatory approvals. In connection with the sale of the Guymon branch location, the Company recorded a gain of approximately \$0.9 million.

Sale of Wakita & Helena Branches. On March 4, 2003, Gold Bank-Oklahoma entered into an agreement for the sale of its Helena and Wakita, Oklahoma branch locations to Farmers Exchange Bank of Cherokee, Oklahoma. The aggregate deposits and loans of these Gold Bank-Oklahoma branches were approximately \$17.0 million and \$3.0 million, respectively, at the closing date. The sale of these branches closed on May 30, 2003 upon receipt of regulatory approvals. In connection with the sale of these branches, the Company recorded a gain of approximately \$0.3 million.

Sale of LaCygne and Pleasanton Branches. On June 10, 2003, Gold Bank-Kansas entered into an agreement for the sale of its LaCygne and Pleasanton, Kansas branch locations to Labette Bank. The aggregate deposits and loans of these Gold Bank-Kansas branches were approximately \$38.0 million and \$15.0 million, respectively, at the closing date. The sale of these branches closed on August 15, 2003 upon receipt of regulatory approvals. In connection with the sale of these branches, the Company recorded a gain of approximately \$1.8 million.

Sale of Hobart & Lone Wolf Branches. On September 16, 2003, Gold Bank-Oklahoma entered into an agreement for the sale of its Hobart & Lone Wolf, Oklahoma branch locations to BancFirst of Oklahoma City, Oklahoma. The aggregate deposits and loans of these branches were approximately \$40.5 million and \$14.8 million, respectively, at the closing date. The sale of these branches closed on November 13, 2003 upon receipt of regulatory approvals. In connection with the sale of these branches, the Company recorded a gain of approximately \$2.7 million.

(4) Losses and Expenses Resulting from Misapplication of Bank Funds, Net of Recoveries

During 2002, 2001 and 2000, Michael W. Gullion, the Company's former Chief Executive Officer diverted funds to his account for personal use, as well as the use of the Company's credit card for personal use and improper reimbursement of personal expenses. Such amounts, along with the costs of an investigation that uncovered the activity, aggregated \$136,000 during 2002.

During the year ended December 31, 2003, the Company reached an agreement with the former chief executive officer in which the Company received approximately \$3.5 million of restitution. The restitution amount consisted of \$1.2 million in cash and 212,864 shares of the Company's common stock, and has been netted against expenses of \$1.6 million incurred in 2003 by the Company in connection with the investigation.

(5) Investment Securities

The amortized cost, gross unrealized gains and losses, and estimated fair value of investment securities by major security category at December 31, 2004 and 2003 are as follows (dollars in thousands):

	2004			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value
Available-for-sale:				
U.S. government-sponsored enterprise obligations	\$ 326,209	\$ □	\$ (5,186)	\$ 321,023
Obligations of states and political subdivisions	13,640	34	(40)	13,634
Mortgage-backed securities	125,028	2	(1,398)	123,632
Other	40,571	158	(255)	40,474
Total	\$ 505,448	\$ 194	\$ (6,879)	\$ 498,763
Held-to-maturity:				
U.S. government-sponsored enterprise obligations	\$ 251,770	\$ 10	\$ (4,151)	\$ 247,629
Obligations of states and political subdivisions	19,656	224	(62)	19,818
Mortgage-backed securities	95,881	699	(175)	96,405
Other	44,495	2,885	□	47,380
Total	\$ 411,802	\$ 3,818	\$ (4,388)	\$ 411,232
	2003			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value
Available-for-sale:				
U.S. government-sponsored enterprise obligations	\$ 604,435	\$ 874	\$ (5,733)	\$ 599,576
Obligations of states and political subdivisions	47,120	1,563	(70)	48,613
Mortgage-backed securities	154,475	419	(1,035)	153,859
Other	40,808	49	(5)	40,852
Total	\$ 846,838	\$ 2,905	\$ (6,843)	\$ 842,900
Held-to-maturity:				
Obligations of states and political subdivisions	\$ 955	35	\$ □	\$ 990
Mortgage-backed securities	87,329	1,399	(2)	88,726
Other	45,208	3,169	□	48,377
Total	\$ 133,492	\$ 4,603	\$ (2)	\$ 138,093

The above table does not include trading securities. The Company's trading portfolio consists of Federal agency securities, tax-exempt bonds and equity securities.

Other securities classified as available-for-sale consist primarily of restricted stock in the Federal Reserve Bank (\$4,487,850) and Federal Home Loan Banks (\$29,709,100) that are required to be maintained by the Company, as well as certain other debt and equity securities. These stocks are required to be held for regulatory purposes and for borrowing availability based on the capital structure and borrowing amounts, respectively.

The table above shows that some of the securities in the available-for-sale investment portfolio had unrealized losses, or were temporarily impaired, as of December 31, 2004 and 2003. This temporary impairment represents the amount of loss that would be realized if the securities were sold December 31, 2004 and occurs as a result of changes in the overall bond yields between the purchase date of the bond and valuation date. Securities that were temporarily impaired at December 31, 2004 are shown below, along with the length of the impairment period.

(dollars in thousands)	Less than 12 months		12 months or longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. government sponsored enterprise obligations	\$ 202,690	\$ 2,917	\$ 117,292	\$ 2,269	\$ 319,982	\$ 5,186
Obligations of state and political subdivisions	6,355	31	474	9	6,829	40
Mortgage-backed securities	84,992	1,020	30,186	378	115,178	1,398
Other	□	□	1,386	255	1,386	255
Total temporarily impaired securities	\$ 294,037	\$ 3,968	\$ 149,338	\$ 2,911	\$ 443,375	\$ 6,879

At December 31, 2004 the total available for sale portfolio consisted of 149 individual securities, of which 90 securities were in an unrealized loss position. Securities that had an unrealized loss for a period greater than 12 months amounted to 29 specific securities. Management examined the Company's portfolio for any impairment in value and took a \$10.8 million impairment charge to reduce the carrying value of three high-yield tax-free investments. There are no such remaining high-yield, tax-free investments in our portfolio. Management does not believe that the impairment on any additional securities is other than temporary.

During 2004, the Company executed an interest-rate-risk strategy whereby a total of \$312.5 million of investment securities were reclassified from available-for-sale to held-to-maturity to better reflect the nature of the investment securities within its overall interest rate risk management objectives. The Company believes that the amount of securities in the held-to-maturity category provides desirable insulation to its tangible equity level in a rising interest rate environment and fits its balance sheet needs. Such transfers are intended to be infrequent with the total unrealized gain or loss being recorded in accumulated other comprehensive income and amortized to earnings over the lives of the securities.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

The amortized cost and estimated fair values of investment securities at December 31, 2004 by contractual maturity are shown below (dollars in thousands). Expected maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

2004

	Held-to-maturity		Available-for-sale	
	Amortized cost	Estimated fair value	Amortized cost	Estimated fair value
Due in one year or less	\$ 1,646	\$ 1,664	\$ 4,762	\$ 4,752
Due after one year through five years	227,014	223,375	316,317	311,366
Due after five years through ten years	33,441	33,028	19,181	18,949
Due after ten years	9,325	9,380	300	297
Mortgage-backed securities	95,881	96,405	125,028	123,632
Other	44,495	47,380	39,860	39,767
Total	\$ 411,802	\$ 411,232	\$ 505,448	\$ 498,763

The following table presents proceeds from sales of securities and the components of net securities gains (losses) (dollars in thousands):

	2004	2003	2002
Proceeds from sales	\$ 532,872	\$ 271,934	\$ 270,645
Realized gains	\$ 251	\$ 3,650	\$ 10,812
Realized losses	(764)	(1,803)	(1,270)
Realized losses from other than temporarily impaired securities	(10,846)	□	□
Net realized gains (losses)	\$ (11,359)	\$ 1,847	\$ 9,542

At December 31, 2004, 2003 and 2002, investment securities with fair values of approximately \$576,221,000, \$742,069,000 and \$535,140,000, respectively, were pledged to secure public deposits and for other purposes.

(6) Loans

Loans are summarized as follows as of December 31, 2004 and 2003 (dollars in thousands):

	2004	2003
Real estate	\$ 1,305,186	\$ 1,293,942
Real estate-construction	792,063	656,163
Commercial	908,287	893,317
Agricultural	62,774	113,641
Consumer and other	31,754	53,975
	3,100,064	3,011,038
Loans held for sale	383,364	200,289
	\$ 2,716,700	\$ 2,810,749

As discussed in notes 3 and 24, loans of certain branches at December 31, 2004 and 2003 have been reclassified as held for sale in the summary above. At December 31, 2004, loans of \$1,168,099,000 were pledged as collateral to the Federal Home Loan Bank of Topeka.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

Loans outstanding to directors and executive officers of Gold Banc and its subsidiaries were \$30,264,000 and \$57,885,000 at December 31, 2004 and 2003, respectively. Such loans were made in the ordinary course of business on normal credit terms, including interest rate and collateralization considerations, and do not represent more than a normal risk of collection. Reclassifications are due to changes in members of the board of directors and the consolidation of bank charters. Changes in such loans for 2004 were as follows (dollars in thousands):

Balance at December 31, 2003	\$	57,885
Additions		9,459
Reclassifications		(36,370)
Amounts collected		(710)
		<hr/>
Balance at December 31, 2004	\$	30,264
		<hr/>

Impaired loans include all non-accrual loans and loans ninety days delinquent and still accruing interest. Impaired loans approximated \$15,693,000, \$32,370,000 and \$15,867,000 at December 31, 2004, 2003 and 2002, respectively. The interest income not recognized on impaired loans was approximately \$1,474,000, \$1,454,000 and \$763,000 in 2004, 2003, and 2002, respectively. Non-accrual loans amounted to \$15,100,000, \$23,131,000 and \$15,077,000 at December 31, 2004, 2003 and 2002, respectively. Loans 90 days or more delinquent and still accruing interest amounted to \$593,000, \$9,239,000 and \$790,000 at December 31, 2004, 2003 and 2002, respectively. Overdrafts reclassified as loans amounted to \$1,567,000 and \$1,606,000 as of December 31, 2004 and 2003, respectively.

The following table shows the recorded investment in impaired loans, the amount of that recorded investment for which there is a related allowance for credit losses and the amount of that allowance, and the amount of that recorded investment for which there is no related allowance for credit losses as of December 31, 2004 and 2003 (dollars in thousands):

	<u>2004</u>	<u>2003</u>
Impaired loans for which an allowance has been established	\$ 12,982	\$ 23,131
Impaired loans for which no allowance has been established	2,711	9,239
	<hr/>	<hr/>
Total recorded investment in impaired loans	\$ 15,693	\$ 32,370
	<hr/>	<hr/>
Allowance for loan losses allocated to impaired loans	\$ 1,273	\$ 3,829
	<hr/>	<hr/>

The average balance of impaired loans for 2004 and 2003 was \$26,358,000 and \$22,566,000 based on month-end balances, respectively. The net amount of interest recorded on such loans during their impairment period aggregated \$43,000, \$955,000 and \$27,000 in 2004, 2003 and 2002, respectively.

The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company, upon which the extension of credit is based, relies on management's credit evaluation of the counterparty. Collateral held varies but may include real estate, accounts receivable, inventory, property, plant, equipment, and income-producing commercial properties. The Company's banking operations are located throughout the states of Kansas, Oklahoma, Missouri, and Florida; therefore, the Company's loan portfolio has no unusual geographic concentrations of credit risk beyond the markets it serves.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

Activity in the allowance for loan losses during the years ended December 31, 2004, 2003, and 2002, are as follows (dollars in thousands):

	<u>2004</u>	<u>2003</u>	<u>2002</u>
Balance at beginning of year	\$ 34,017	\$ 33,439	\$ 26,097
Provision for loan losses	5,895	13,064	19,420
Allowance adjustment for branches sold	(1,820)	□	□
Allowance adjustment for credit card sale	(100)	□	□
Charge-offs	(6,953)	(13,522)	(13,837)
Recoveries	1,069	1,036	1,759
	<u> </u>	<u> </u>	<u> </u>
Balance at end of year	<u>\$ 32,108</u>	<u>\$ 34,017</u>	<u>\$ 33,439</u>

During 2004, the Company sold loans aggregating \$216,600,000 as part of the sale of branch facilities. The related allowance for loan losses was included as part of the net assets sold to determine the gain on sale.

(7) Premises and Equipment, net

Premises and equipment are summarized as follows as of December 31, 2004 and 2003 (dollars in thousands):

	Depreciable Life	<u>2004</u>	<u>2003</u>
Land	□	\$ 10,164	\$ 9,838
Buildings and leasehold improvements	39 years	37,713	42,783
Furniture, fixtures, and equipment	5-7 years	33,818	40,227
Software	3 years	9,549	6,964
Automobiles	5 years	466	755
		<u>91,710</u>	<u>100,567</u>
Accumulated depreciation		<u>35,951</u>	<u>37,436</u>
		<u>55,759</u>	<u>63,131</u>
Premises and equipment held for sale		<u>4,146</u>	<u>4,086</u>
		<u>\$ 51,613</u>	<u>\$ 59,045</u>

As discussed in notes 3 and 24, premises and equipment of certain branches at December 31, 2004 and 2003 have been reclassified as held for sale in the summary above. Depreciation expense from continuing operations totaled \$6,505,000, \$6,653,000, and \$6,250,000 for the years ended December 31, 2004, 2003, and 2002, respectively.

The majority of the Company's operations are conducted in premises owned by the Company. In some cases, leases have been entered into for equipment and space with terms that generally do not exceed ten years. Following is a schedule, by year, of future minimum lease payments required under existing operating leases that have initial or remaining non-cancelable terms in excess of one year as of December 31, 2004 (dollars in thousands):

<u>Year ending December 31,</u>	<u>Amount</u>
2005	\$ 3,579
2006	3,116

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

2007	2,389
2008	2,282
2009	2,347
Thereafter	14,229
	<hr/>
Total minimum payments required	\$ 27,942
	<hr/>

The Company records rent expense over the term of the lease. Rent expense amounted to approximately \$3,712,000, \$3,491,000 and \$2,112,000 for the years ended December 31, 2004, 2003, and 2002, respectively, and is included in net occupancy expense in the accompanying consolidated statements of operations.

(8) Deposits

Deposits are summarized as follows as of December 31, 2004 and 2003 (dollars in thousands):

	2004	2003
	<hr/>	<hr/>
Demand:		
Non-interest bearing	\$ 371,380	\$ 355,637
	<hr/>	<hr/>
Interest-bearing:		
NOW	353,240	263,431
Money market	428,662	545,558
	<hr/>	<hr/>
	781,902	808,989
	<hr/>	<hr/>
Total demand	1,153,282	1,164,626
Savings	80,304	106,223
Time	1,903,374	1,893,594
	<hr/>	<hr/>
	3,136,960	3,164,443
	<hr/>	<hr/>
Deposits held for sale	350,186	347,169
	<hr/>	<hr/>
	\$ 2,786,774	\$ 2,817,274
	<hr/>	<hr/>

As discussed in notes 3 and 24, deposits of certain branches at December 31, 2004 and 2003 have been reclassified as held for sale in the summary above. Time deposits include certificates of deposit of \$100,000 and greater totaling \$527,591,000 and \$902,807,000 at December 31, 2004 and 2003, respectively.

Principal maturities of time deposits at December 31, 2004 were as follows (dollars in thousands):

	Amount
Year	<hr/>
2005	\$ 1,106,604
2006	331,946
2007	236,327
2008	128,184
2009	99,564
Thereafter	749
	<hr/>
	\$ 1,903,374
	<hr/>

(9) Securities Sold Under Agreements to Repurchase

Data concerning securities sold under agreements to repurchase was as follows as of December 31, 2004 and 2003 (dollars in thousands):

	2004	2003
	<hr/>	<hr/>
Average monthly balance during the year	\$ 133,501	\$ 140,555
Maximum month-end balance during the year	159,020	158,305

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

Balance at December 31,	112,205	127,789
Weighted average interest rate	1.80%	1.34%

At December 31, 2004, such agreements were secured by investment and mortgage-backed securities. Pledged securities are placed with a safekeeping agent under the direction of the Company.

(10) Federal Funds Purchased and Other Short-Term Borrowings

Following is a summary of federal funds purchased and other short-term borrowings at December 31, 2004 and 2003 (dollars in thousands):

	<u>2004</u>	<u>2003</u>
Other borrowings, weighted average interest rates of 5.75% and 4.26% at December 31, 2004 and 2003	\$ 1,063	\$ 4,775
Advances under a \$10.0 million line of credit from LaSalle Bank N.A., interest at LIBOR plus 1.25%, matured on July 1, 2004 (extended to September 30, 2004), secured by common stock of subsidiary bank, terminated on September 30, 2004	□	1,500
Advances under a \$25.0 million line of credit from Bank One, N.A., interest at LIBOR plus 1.25% or interest at the Bank One prime rate, maturing on October 1, 2005, secured by common stock of subsidiary bank	□	□
Treasury, Tax and Loan	1,400	985
	<u>\$ 2,463</u>	<u>\$ 7,260</u>

(11) Long-Term Borrowings

Following is a summary of long-term borrowings at December 31, 2004 and 2003 (dollars in thousands):

	<u>2004</u>	<u>2003</u>
FHLB borrowings by subsidiary banks bearing weighted average fixed interest rates of 4.47% and 4.50% at December 31, 2004 and 2003, secured by qualifying one-to-four-family mortgage loans, with maturity dates ranging to 2013	\$ 571,854	\$ 489,900
Long-term repurchase agreements by subsidiary bank bearing weighted average fixed interest rate of 2.32%, secured by investment securities, maturing in 2006	80,000	130,000
Note payable of Gold Banc Corporation, Inc. Employee Stock Ownership Plan, weighted average interest rate of 4.26% and 2.93% at December 31, 2004 and 2003, secured by 1,402,866 and 1,353,807 shares of Company common stock at December 31, 2004 and 2003, respectively, maturing in December 2006	9,680	11,626
	<u>\$ 661,534</u>	<u>\$ 631,526</u>

Included in the carrying value of the FHLB debt is an unamortized fair value adjustment of \$4,919,000. The debt was hedged under a fair-value hedge (see note 13) until November 30, 2004, at which time the related derivative was terminated. The unamortized gain will be amortized to earnings over the life of the related FHLB debt, using the straight-line method which is not materially different from the effective interest method required under APB 21-"Interest on Receivables and Payables". The annual expense recorded in earnings will be \$800,000 over the term of the underlying debt. Termination of the debt would result in amortization of the remaining balance into earnings.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

Principal maturities of long-term borrowings at December 31, 2004 are as follows (dollars in thousands):

Year ending December 31,	Amount
2005	\$ 166,669
2006	103,782
2007	50,484
2008	19,900
2009	13,000
Thereafter	312,618
	666,453
Unamortized gain	(4,919)
Total	\$ 661,534

None of the Company borrowings have any related compensating balance requirements, which restrict the usage of Company assets. However, regulations of the Federal Reserve System require reserves to be maintained by all banking institutions according to the types and amounts of certain deposit liabilities. These requirements restrict usage of a portion of the amounts shown as consolidated "cash and due from banks" from everyday usage in operation of the Bank.

(12) Subordinated Debt

Following is a summary of subordinated-debt and trust-preferred securities at December 31, 2004 and 2003 (dollars in thousands):

	2004	2003
Subordinated-debt securities maturing November 2031 with semiannual interest at a variable rate, based upon the six-month LIBOR plus 3.75% (6.44% as of December 31, 2004)	\$ 30,000	\$ 30,000
Subordinated-debt securities maturing on April 23, 2034, may be redeemed, at the option of the Company, after April 23, 2009, interest rate fixed at 5.80% for a five-year period through April 23, 2009; thereafter, interest is at a floating rate equal to LIBOR plus 2.75%, adjustable quarterly	16,495	□
Subordinated-debt securities previously issued by Gold Banc Capital Trust, formerly ABI Capital Trust, interest rate fixed at 8.50%	□	16,752
Subordinated-debt securities maturing on April 7, 2034, may be redeemed, at the option of the Company, after April 7, 2009, interest rate floating equal to LIBOR plus 2.75%, adjustable quarterly	30,928	□
Subordinated-debt securities previously issued by GBCI Capital Trust, interest rate fixed at 8.75%	□	29,639
Subordinated-debt securities maturing on December 15, 2034, may be redeemed, at the option of the Company, after December 15, 2009, interest rate fixed at 5.90% for a five-year period through December 15, 2009; thereafter, interest is at a floating rate equal to LIBOR plus 2.10%, adjustable quarterly	39,176	□
Subordinated-debt securities previously issued by GBCI Capital Trust II, interest rate fixed at 9.12%	□	38,711
Gain on hedged debt	□	(251)
	\$ 116,599	\$ 114,851

Subordinated Debt. The Company's floating rate subordinated-debt securities mature November 2031 and pay interest semiannually at a variable rate, based upon the six-month LIBOR plus 3.75%. The Company has the right to redeem the securities on or after November 2011 at par value plus any accrued but unpaid interest.

Total expenses associated with the issuance of the floating rate subordinated-debt securities were \$910,000 and are being amortized on a straight-line basis over the life of the securities. Amortization during the years ended December 31, 2004, 2003 and 2002, and included in interest expense, was \$182,000, \$182,000, and \$182,000, respectively.

Trust-Preferred Securities. The Company formed three statutory trusts during 2004 to issue a total of \$84.0 million in trust-preferred securities. The three offerings were pooled private placements exempt from registration under the Securities Act pursuant to Section 4(2) thereunder. The Company owns 100% of the common securities of all three trusts. The trusts were formed with the sole purpose of issuing the trust-preferred securities and investing the proceeds from the sale of such trust-preferred securities in subordinated debentures issued by the Company. The debentures held by the trusts are the sole assets of the trusts. The Company has provided a full, irrevocable, and unconditional subordinated guarantee of the obligations of the three trusts under the preferred securities.

The Company formed Gold Banc Trust III on March 11, 2004. Effective March 15, 2004, Gold Banc Trust III issued \$16,000,000 of trust-preferred securities to institutional investors. Gold Banc Trust III used the proceeds from the issuance of the trust-preferred securities, as well as the Company's \$495,000 capital investment in the trust, to purchase \$16,495,000 of junior subordinated debt securities issued by the Company. The debentures mature on April 23, 2034, and may be redeemed, at the option of the Company, after April 23, 2009. The interest rate of the debentures is fixed at 5.80% for a five-year period through April 23, 2009. Thereafter, interest is at a floating rate equal to LIBOR plus 2.75%, adjustable quarterly. Interest is payable quarterly. The trust-preferred securities carry an interest rate identical to that of the related debenture.

The Company formed Gold Banc Trust IV on March 12, 2004. Effective March 15, 2004, Gold Banc Trust IV issued \$30 million of trust-preferred securities to institutional investors. Gold Banc Trust IV used the proceeds from the issuance of the trust-preferred securities, as well as the Company's \$928,000 capital investment in the trust, to purchase \$30,928,000 of floating rate junior subordinated-debt securities issued by the Company. The debentures mature on April 7, 2034 and may be redeemed, at the option of the Company, after April 7, 2009. The interest rate of the debentures is a floating rate equal to LIBOR plus 2.75%, adjustable quarterly. Interest is payable quarterly. The trust-preferred securities carry an interest rate identical to that of the related debenture.

On April 22, 2004, the Company used the proceeds of Gold Banc Trust III's and Gold Banc Trust IV's issuance of trust-preferred securities to redeem (i) \$16,249,420 in principal amount of the 8.50% Preferred Securities previously issued by Gold Banc Capital Trust, formerly ABI Capital Trust and (ii) \$28,750,000 in principal amount of the 8.75% Preferred Securities previously issued by GBCI Capital Trust.

The Company formed Gold Banc Capital Trust V on November 8, 2004. Effective November 10, 2004, Gold Banc Capital Trust V issued \$38 million of trust-preferred securities to institutional investors. Gold Banc Capital Trust V used the proceeds from the issuance of the trust-preferred securities, as well as the Company's \$1,176,000 capital investment in the trust, to purchase \$39,176,000 of junior subordinated deferrable interest debentures issued by the Company. The debentures mature on December 15, 2034, and may be redeemed, at the option of the Company after December 15, 2009. The interest rate of the debentures is fixed at 5.90% for a five-year period through December 15, 2009. Thereafter, interest is at a floating rate equal to LIBOR plus 2.10%. Interest is payable quarterly. The trust-preferred securities carry an interest rate identical to that of the related debenture. On

November 15, 2004, the Company used the proceeds of Gold Banc Capital Trust V's issuance of trust-preferred securities to redeem \$37,550,000 in principal amount of the 9.12% Preferred Securities previously issued by GBCI Capital Trust II.

Total expenses associated with the issuance of the trust-preferred securities during 2004 were \$369,000 which are being amortized on a straight-line basis over the life of the related obligations. During 2004, \$3,290,000 of prepaid offering costs were written off related to the redemption of the trust-preferred securities issued by GBCI Capital Trust, GBCI Capital Trust II and Gold Banc Capital Trust and are included in other expenses. Amortization of issuance expenses for all trusts (including those retired) during the years ended December 31, 2004, 2003 and 2002, included in interest expense, aggregated \$77,000, \$125,000 and \$125,000, respectively.

(13) Derivative Financial Instruments

The Company utilizes derivative financial instruments as part of its overall interest rate sensitivity management strategy to mitigate exposure to interest rate risk. The Company entered into three interest rate swap agreements implemented during 2002 with an aggregate notional amount of \$82.5 million. The interest rate swaps are derivative financial instruments and were designated as fair value hedges of subordinated debentures. Each swap had a notional amount equal to the outstanding principal amount of the related subordinated debentures, together with the same payment dates, maturity date and call provisions as the related subordinated debentures. Under each of the swaps, the Company paid interest at a variable rate equal to a spread over 90-day LIBOR, adjusted quarterly, and the Company received a fixed rate equal to the interest that it was obligated to pay on the related subordinated debentures. A \$28.7 million notional amount swap agreement was called by the counter-party and terminated on April 7, 2003. A \$16.3 million notional amount swap agreement was called by the counter-party and terminated on June 30, 2003. The third and final swap for \$37.6 million was called by the counter-party and terminated on November 1, 2004. Under these swap agreements, no payments were due between the parties and the Company recognized no gain or loss when they were called during 2003 and 2004.

In August 2003, the Company entered into seven interest rate swap agreements with an aggregate notional amount of \$190 million for the purpose of effectively converting \$190 million of fixed-rate FHLB borrowings into floating rate obligations. These interest rate swaps are derivative financial instruments and were designated as fair value hedges of the FHLB borrowings. Each swap had a notional amount equal to the outstanding principal amount of the related FHLB borrowings, together with the same payment dates, maturity dates and call provisions as the related FHLB borrowings. Under each of the swaps, the Company paid interest at a variable rate equal to a spread over 30-day LIBOR, adjusted monthly, and the Company received a fixed rate equal to the interest that it was obligated to pay on the related FHLB borrowings. As a result of the issuance of Statement 133 Issue G25, "Cash Flow Hedges: Using the First-Payments-Received Technique in Hedging the Variable Interest Payments on a Group of Non-Benchmark-Rate-Based Loans" (G25) in July 2004, the Company opted to terminate these fair value hedges on November 30, 2004, for new cash flow hedges of pools of prime-based loans (discussed below) now permitted under G25. As a result of the termination of these hedges, a cash payment of \$5.4 million was made to the counterparty. A loss of \$0.6 million due to hedging ineffectiveness was recognized in interest expense during 2004 for these derivatives.

On December 1, 2004, the Company entered into three interest rate swap agreements with an aggregate notional amount of \$190 million for the purpose of effectively converting variable-rate prime-based loans' interest streams into fixed-rate interest streams. Pools of prime-based loans have been designated under the swaps, the principal amount of these pools corresponding to the hedged transactions equal to 102% of the notional amount of the swaps. The formula for computing net settlements under the swaps is the same for each net settlement; that is, the fixed rate is the same throughout the term of the swap and the variable rate is the prime rate. The re-pricing dates of the swaps match those of the variable-rate assets on which the hedged transactions are based. These interest rate swaps are derivative financial instruments and have been designated as cash flow hedges of prime-based pools of loans. The first swap has a notional value of \$60 million and will effectively fix the Company's interest rate at 6.841% plus the credit spread over Prime, if any, with a maturity date of December 2009. The second swap has a notional value of \$60 million and will effectively fix the Company's interest rate at 7.0% plus the credit spread over Prime, if any, with a maturity date of December 2010. The third swap has a notional value of \$70 million and will effectively fix the Company's interest rate at 7.14% plus the credit spread over Prime, if any, with a maturity date of December 2011.

During the year ended December 31, 2004, the Company received net cash flows of \$1.5 million under the subordinated debentures related swaps and \$3.5 million on the FHLB debt related swaps for a total of \$5.0 million, which was recorded as a reduction of interest expense on borrowings. During the year ended December 31, 2004, the Company received net cash flows of \$0.3 million on the seven prime-based loan pools related cash value swaps, which was recorded in interest income on loans. During the year ended December 31, 2004, no losses were recognized in earnings on the cash flow hedges due to hedging ineffectiveness, while \$0.7 million of mark-to-market revaluation was recognized in other comprehensive income (loss), with approximately \$0.3 million recognized as a deferred tax liability. The carrying value of the mark-to-market asset for the swaps is reported in Accrued interest and other assets in the Consolidated Balance Sheets.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

Derivative financial instruments held by the Company for purposes of managing interest rate risk are summarized as follows:

December 31,			
2004		2003	
Notional Amount	Credit exposure	Notional amount	Credit exposure

(Dollars in thousands)

Interest rate swaps	\$ 190,000	1,300	\$ 227,550	443
---------------------	------------	-------	------------	-----

The notional amounts of derivative financial instruments do not represent amounts exchanged by the parties and, therefore, are not a measure of the Company's credit exposure through its use of these instruments. The credit exposure represents the accounting loss the Company would incur in the event the counterparties failed completely to perform according to the terms of the derivative financial instruments and the collateral held to support the credit exposure was of no value.

During 2004, 2003 and 2002, Gold Banc received net cash flows on derivative financial instruments of \$5,340,000, \$4,336,000, and \$1,314,000 respectively. Such amounts were recorded as adjustments of interest income on loans and interest expense on borrowings.

(14) Income Taxes

Income tax expense (benefit) related to continuing operations for 2004, 2003, and 2002 is summarized as follows (dollars in thousands):

	Current	Deferred	Total
2004:			
Federal	\$ 12,878	\$ (2,243)	\$ 10,635
State	1,047	(796)	251
	\$ 13,925	\$ (3,039)	\$ 10,886
2003:			
Federal	\$ 13,003	\$ (747)	\$ 12,256
State	1,054	334	1,388
	\$ 14,057	\$ (413)	\$ 13,644
2002:			
Federal	\$ 2,353	\$ 8,034	\$ 10,387
State	44	941	985
	\$ 2,397	\$ 8,975	\$ 11,372

Income tax expense (benefit) from discontinued operations was (\$297,000), (\$2,231,000), and \$355,000 for the years ended December 31, 2004, 2003, and 2002, respectively.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

The tax effects of temporary differences that give rise to significant portions of deferred-tax assets and deferred-tax liabilities at December 31, 2004 and 2003 are presented below (dollars in thousands):

	<u>2004</u>	<u>2003</u>
Deferred-tax assets:		
Allowance for loan losses	\$ 11,442	\$ 12,018
Unrealized loss on AFS securities	2,977	1,126
Restricted stock awards	366	241
Other	1,276	535
	<u>16,061</u>	<u>13,920</u>
Total deferred-tax assets □ continuing operations	16,061	13,920
	<u>16,061</u>	<u>13,920</u>
Total deferred-tax assets of discontinued operation	□	1,464
	<u>16,061</u>	<u>15,384</u>
	16,061	15,384
Deferred-tax liabilities:		
FHLB stock dividends	694	383
Premises and equipment	3,560	3,422
Deferred income	328	305
Real estate investment trust income	3,224	6,637
Other	1,942	1,750
	<u>9,748</u>	<u>12,497</u>
Total deferred-tax liabilities from continued operations	9,748	12,497
	<u>9,748</u>	<u>12,497</u>
Total deferred-tax liabilities of discontinued operation	□	417
	<u>9,748</u>	<u>12,914</u>
Total deferred-tax liabilities	9,748	12,914
	<u>9,748</u>	<u>12,914</u>
Net deferred-tax assets	\$ 6,313	\$ 2,470
	<u>\$ 6,313</u>	<u>\$ 2,470</u>

A valuation allowance for deferred-tax assets was not necessary at December 31, 2004 or 2003 due to the Company's past and expected future profitability.

The Company has deferred income for tax purposes related to its investment in a Real Estate Investment Trust due to a different tax year for a subsidiary entity. As a result of a new regulation promulgated by the Treasury Department in 2002, this income will be included in taxable income ratably over a four-year period beginning in 2002. As a result of this change in tax law, the Company has a remaining deferred income tax liability of \$3,200,000 as of December 31, 2004, which will be paid ratably in the years ending December 31, 2005 and 2006.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

A reconciliation of expected income tax expense from continuing operations, based on the statutory rate of 35% for 2004, 2003, and 2002, to actual tax expense for 2004, 2003, and 2002 is summarized as follows (dollars in thousands):

	<u>2004</u>	<u>2003</u>	<u>2002</u>
Expected federal income tax expense	\$ 10,683	\$ 16,256	\$ 12,974
Tax-exempt interest	(1,256)	(2,498)	(1,929)
State taxes, net of federal tax benefit	163	902	640
Bank-owned life insurance	(1,318)	(1,331)	(1,092)
Non-deductible portion of <i>qui tam</i> lawsuit settlement	1,512	□	□
ESOP compensation expense	602	243	□
Other	500	72	779
	<u>\$ 10,886</u>	<u>\$ 13,644</u>	<u>\$ 11,372</u>

(15) Employee Benefit Plans

The Gold Banc Corporation, Inc. Employee Stock Ownership Plan (ESOP) was formed to acquire shares of Company common stock for the benefit of all eligible employees. At December 31, 2004 and 2003, the ESOP borrowings, used to acquire shares of the Company's common stock on the open market, totaled \$9,680,000 and \$11,626,000, respectively, and were secured by 1,402,866 and 1,353,807, respectively, unallocated shares of Company common stock. The ESOP will repay the debt with contributions and dividends received from the Company. Accordingly, the Company has recorded the obligation (see Note 11) with an offsetting amount of unearned compensation included in stockholders' equity in the accompanying consolidated balance sheets. The amount of annual contributions from the Company is determined by the board of directors. Contributions were approximately \$1,618,000, \$2,342,000, and \$1,088,000 for the years ended December 31, 2004, 2003, and 2002, respectively. The 2004, 2003 and 2002 contributions were used to make principal payments of \$1,945,000, \$1,807,000 and \$568,000. The fair value of the unallocated shares at December 31, 2004 aggregated approximately \$20,509,000.

The Company has a 401(k) savings plan for the benefit of all eligible employees. The Company matched 50% of employee contributions up to 5% of base compensation, subject to certain Internal Revenue Service limitations. Contributions charged to salaries and employee benefits expense were \$696,000, \$913,000 and \$717,000 for 2004, 2003, and 2002, respectively.

Under the Company's stock option plan, options to acquire shares of the Company's common stock may be granted to certain officers, directors, and employees of the Company. The options enable the recipient to purchase stock at an exercise price equal to or greater than the fair market value of the stock at the date of the grant. Options vest at various annual rates and generally expire ten years from the grant date. A summary of stock option activity is as follows:

	<u>2004</u>		<u>2003</u>		<u>2002</u>	
	<u>Shares</u>	<u>Weighted average price</u>	<u>Shares</u>	<u>Weighted average price</u>	<u>Shares</u>	<u>Weighted average price</u>
Outstanding at beginning of year	1,283,921	\$ 8.62	1,561,699	\$ 8.18	1,134,009	\$ 8.00

	<u>895,060</u>	<u>8.67</u>	<u>1,283,921</u>	<u>8.62</u>	<u>1,561,699</u>	<u>8.12</u>

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

Options exercisable at year-end	437,660	\$	7.88	579,587	\$	8.18	653,619	\$	8.18
				75					

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

The following table summarizes information about the plan's stock options at December 31, 2004:

Options outstanding				Options exercisable	
Range of exercise price	Number outstanding	Weighted average remaining contractual life	Weighted Average exercise price	Number exercisable	Weighted average exercise price
\$ 4.00-5.25	57,490	4.51	\$ 4.89	54,490	\$ 4.92
6.58-6.81	88,030	3.76	6.77	85,830	6.77
7.03-8.05	398,140	6.70	7.28	181,640	7.25
8.85-11.03	277,900	8.14	10.66	91,200	10.48
12.12-13.25	26,000	5.69	12.80	22,000	12.81
14.40-18.38	47,500	7.83	14.61	2,500	18.38
\$ 4.00-18.38	895,060	6.75	\$ 8.67	437,660	\$ 7.88

Below are the fair values of options granted using an option pricing model and the model assumptions:

	2004	2003	2002
Weighted per share average fair value at grant date	\$ 4.02	\$ 4.06	\$ 4.47
Assumptions:			
Dividend yield	0.79%	1.09%	0.86%
Volatility	23.97%	28.44%	25.96%
Risk-free interest rate	4.37%	3.78%	3.82%
Expected life	10	10	10

During 2004, the Company awarded 32,000 shares of restricted stock and 21,333 restricted stock units to certain employees of the Company. The awards vest over a two-year period. During 2003, the Company awarded 211,000 shares of restricted stock and 140,667 restricted stock units to certain employees of the Company. The awards vest over periods ranging up to 3 years. In addition to the service period requirement, 192,000 shares of restricted stock and 128,000 restricted stock units have a vesting provision whereby the awards do not vest until the Company's stock price reaches a predetermined level. All awards vest upon a change in control of the Company. Except for restrictions placed on the transferability of restricted stock, holders of restricted stock have full stockholders' rights during the term of restriction, including voting rights and the rights to receive dividends.

During 2004, 98,800 shares of restricted stock and 2,000 restricted stock units vested, and the Company recorded additional salaries and benefits expense of \$3,300,000 and \$1,600,000 in 2004 and 2003, respectively. As of December 31, 2004, 86,600 shares of unvested restricted stock and 57,733 restricted stock units were outstanding.

(16) Intangible Assets and Goodwill

The following table presents information about the Company's intangible assets as of December 31, 2004 and 2003:

2004		2003	
Gross Carrying Amount	Accumulated amortization	Gross Carrying Amount	Accumulated amortization

(In thousands)

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

Core deposit intangible	\$	7,508	\$	2,172	\$	7,508	\$	1,421
								76

As of December 31, 2004, the Company does not have any intangible assets that are not being amortized (excluding goodwill). Aggregate amortization expense on intangible assets for the years ended December 31, 2004 and 2003 was \$751,000 and \$751,000, respectively. The estimated average useful life of such intangible assets is 10 years. Estimated annual amortization expense for the years ending December 31, 2005 through 2009 is as follows (dollars in thousands).

2005	\$	751
2006		751
2007		751
2008		751
2009		751

Effective January 1, 2002, the Company adopted FASB Statement No. 142, "Goodwill and Other Intangible Assets" (FASB 142). FASB 142 requires that goodwill and intangible assets with indefinite useful lives no longer be amortized, but instead tested for impairment at least annually. It also requires that intangible assets with estimable useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment. As required by FASB 142, the Company discontinued recording goodwill amortization effective January 1, 2002.

In accordance with FASB 142, the Company is required to perform an annual impairment analysis of its existing goodwill. The Company's goodwill impairment evaluation as of December 31, 2004 indicated that no impairment of goodwill from continuing operations existed. Goodwill of \$598,000 was allocated to the seven branches in Kansas sold during 2004. Net assets of discontinued operation included \$416,000 of goodwill at December 31, 2003. As described in Note 2, the Company reduced the carrying value of goodwill associated with CompuNet by \$4,145,000 in 2003 in connection with the discontinued operation and completed sale of CompuNet in 2004.

(17) Financial Instruments with Off-Balance Sheet Risk

Financial instruments that represent off-balance sheet credit risk consist of open commitments to extend credit, irrevocable letters of credit, and loans sold with recourse. Open commitments to extend credit and irrevocable letters of credit amounted to approximately \$1,006,868,000 at December 31, 2004. Such agreements require the Company to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses. Since many of the commitments are expected to expire without being fully drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained (if deemed necessary by the Company upon extension of credit) is based on management's credit evaluation of the customer. Collateral held varies, but may include accounts receivable, inventory, property, plant, equipment, and income-producing commercial properties.

The Company processes residential home mortgage loans for sale in the secondary market. In conjunction with the sale of such loans, the Company has entered into agreements with the purchasers of the loans, setting forth certain provisions. Among those provisions is the right of the purchaser to return the loans to the Company in the event the borrower defaults within a stated period. This period ranges among the various purchasers from between one to twelve months. The Company's exposure to credit loss in the event of default by the borrower and the return of the loan by the purchaser is represented by the difference in the amount of the loan and the recovery value of the underlying collateral.

At December 31, 2004, a liability in the amount of \$893,000, representing the carrying value of the guarantee obligations associated with standby letters of credit (included in the above total of open commitments), was recorded in accordance with FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others," that requires recognition of the fair value of the liability related to the guarantee issued under standby letters of credit. This amount was offset by a miscellaneous receivable of \$741,000 and a charge to earnings of \$152,000. These balances will be amortized over the life of the commitments. The contractual amount of these letters of credit, which represents the maximum potential future payments guaranteed by the Company, was \$97,700,000 at December 31, 2004.

(18) Other Expense

Significant items included in other expense in the consolidated statements of operations:

	2004	2003	2002
	(Dollars in thousands)		
Marketing and advertising	\$ 2,996	\$ 2,735	\$ 2,748

	<u>\$ 19,410</u>	<u>\$ 21,574</u>	<u>\$ 18,823</u>

(19) Disclosures about the Fair Value of Financial Instruments

The following disclosures of the estimated fair value of financial instruments are made in accordance with the requirements of FASB Statement No. 107, "Disclosures about Fair Value of Financial Instruments". The estimated fair value amounts have been determined by the Company and its subsidiaries using available market information and valuation methodologies. However, considerable judgment is necessarily required to interpret market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company and its subsidiaries could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material impact on the estimated fair value amounts.

The estimated fair value of the Company's financial instruments is as follows (dollars in thousands):

	2004		2003	
	Carrying amount	Estimated fair value	Carrying amount	Estimated fair value
Cash and cash equivalents	\$ 108,297	\$ 108,297	\$ 117,102	\$ 117,102
Investment securities	916,021	915,451	986,084	990,685
Mortgage loans held for sale	5,724	5,724	5,883	5,883
Loans	2,684,892	2,664,681	2,796,732	2,785,163
Loans held for sale	383,364	383,364	200,289	200,289
Deposits	2,786,774	2,769,947	2,817,274	2,820,915
Securities sold under agreements to repurchase	112,205	112,205	127,789	127,789
Federal funds purchased and other short-term borrowings	2,463	2,463	7,260	7,260
Long-term financial				

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

borrowings and subordinated debt	778,133	791,369	746,377	784,943
Deposits held for sale	350,186	384,186	347,169	364,269
Derivative financial instruments	995	995	(2,002)	(2,002)
			78	

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

- *Cash and cash equivalents* - The carrying amounts of cash and due from banks, federal funds sold and interest-bearing deposits approximate fair value. Federal funds sold generally mature in ninety days or less.
- *Investment securities* - Various methods and assumptions were used to estimate fair value of the investment securities. For investment securities, excluding other securities, fair values are based on quoted market prices or dealer quotes. If a quoted market price is not available, fair value is estimated using quoted prices for similar securities. The carrying value of other securities approximates fair values.
- *Mortgage loans held for sale* - The fair value of mortgage and student loans held for sale equals the contractual sales price agreed-upon with third-party investors.
- *Loans* - For certain homogenous categories of loans, such as some Small Business Administration guaranteed loans, student loans, residential mortgages, and consumer loans, fair value is estimated using quoted market prices for similar loans or securities backed by similar loans, adjusted for differences in loan characteristics. The fair value of other types of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.
- *Deposits* - The fair value of demand deposits, savings accounts, and money market deposits are the amount payable on demand at the reporting date. The fair value of fixed maturity certificates of deposit is estimated by discounting the future cash flows using the rates currently offered for deposits of similar remaining maturities.
- *Federal funds purchased and other short-term borrowings* - For these instruments, the current carrying amount is a reasonable estimate of fair value.
- *Long-term borrowings and subordinated debt* - The fair value of long-term borrowings and subordinated debt is estimated using discounted cash flow analyses based on the Company's and subsidiaries' current incremental borrowing rates for similar types of borrowing arrangements.
- *Derivative financial instruments* - The fair value of derivative financial instruments is based on the estimated amounts that the Company would receive or pay to terminate the contracts at the reporting date, based on dealer quotes.
- *Loans and deposits held for sale* - The fair value of assets and liabilities held for sale is based on the contractual premium in the branch purchase and assumption agreement.

The fair value estimates presented herein are based on pertinent information available to management as of December 31, 2004, and 2003. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of the consolidated financial statements since that date and; therefore, current estimates of fair value may differ significantly from the amounts presented herein.

(20) Capital Adequacy

Quantitative measures established by regulation to ensure capital adequacy require the Company and its banking subsidiary to maintain minimum amounts and ratios (set forth in the table below on a consolidated basis, dollars in thousands) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets and of Tier 1 capital to average assets. At December 31, 2004, total risk-based and Tier 1 capital includes approximately \$86,599,000 of Trust-Preferred Securities issued by GBCI Trust III, GBCI Trust IV and GBCI Trust V, and at December 31, 2003 and 2002, total risk-based and Tier 1 capital includes approximately \$82,549,000 and \$74,762,000, respectively, of Trust-Preferred Securities issued by GBCI Capital Trust, GCBI Capital Trust II, and ABI Capital Trusts, which is permitted under regulatory guidelines. As of December 31, 2004, the Company meets all capital adequacy requirements to which it is subject.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

The following table sets forth the capital requirements for the Company and its bank subsidiary(ies) (dollars in thousands):

	<u>3,285</u>	<u>2,183</u>	<u>1,599</u>
Cash at end of year	\$ 3,285	\$ 2,183	\$ 1,599

The primary source of funds available to the Company is the payment of dividends by the subsidiaries and borrowings. Subject to maintaining certain minimum regulatory capital requirements, regulations limit the amount of dividends that may be paid without prior approval of the subsidiaries' regulatory agencies. At December 31, 2004, the subsidiaries could pay dividends of \$90,500,000 without prior regulatory approval. Bank regulatory authorities have the authority to prohibit or limit dividends paid by the Company's subsidiary bank to the Company and dividends paid by the Company to its stockholders.

(22) Comprehensive Income

Comprehensive income is defined as the change in equity from transactions and other events and circumstances from non-owner sources, and excludes investments by and distributions to owners. Comprehensive income includes net income and other items of comprehensive income meeting the above criteria. The components of other comprehensive income as shown below are unrealized holding gains and losses on available for sale securities and gains and losses from the mark-to-market of derivative financial instruments in effective cash flow hedges.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

The amount of income tax expense or benefit allocated to each component of other comprehensive income is as follows:

	Unrealized Before-tax Amount	Tax (expense) or benefit	Net of tax amount
(Dollars in thousands)			
Year ended December 31, 2004:			
Unrealized gains on securities:			
Unrealized holding losses	\$ (17,869)	\$ 6,361	\$ (11,508)
Reclassification adjustment for losses included in net earnings	11,359	(3,976)	7,383
Change in unrealized gain on cash flow swaps	995	(348)	647
Amortization of unrealized loss on investment securities transferred from available-for-sale to held-to-maturity portfolio	435	(152)	283
Other comprehensive income (loss)	<u>\$ (5,080)</u>	<u>\$ 1,885</u>	<u>\$ (3,195)</u>
Year ended December 31, 2003			
Unrealized gains on securities:			
Unrealized holding gains (losses)	\$ (7,729)	\$ 2,597	\$ (5,132)
Reclassification adjustment for (gains) losses included in net earnings	(1,847)	678	(1,169)
Other comprehensive income (loss)	<u>\$ (9,576)</u>	<u>\$ 3,275</u>	<u>\$ (6,301)</u>
Year ended December 31, 2002			
Unrealized gains on securities:			
Unrealized holding gains (losses)	\$ 15,193	\$ (5,791)	\$ 9,402
Reclassification adjustment for (gains) losses included in net earnings	(9,542)	3,637	(5,905)
Other comprehensive income	<u>\$ 5,651</u>	<u>\$ (2,154)</u>	<u>\$ 3,497</u>

(23) Loss Contingencies

In the ordinary course of business, various commitments and contingent liabilities are outstanding which are not reflected in the accompanying consolidated balance sheets. Management does not expect any material losses to result from these matters.

In the ordinary course of business, the Company and its subsidiaries are routinely defendants in or parties to a number of pending and potential legal actions, including actions brought on behalf of various classes of claimants, and regulatory matters. The Company is named as a defendant in lawsuits related to Farm Service Agency loans. Claims for significant monetary damages are asserted in certain of these actions and proceedings. Due to the inherent difficulty of predicting the outcome of such matters, the Company cannot ascertain what the eventual outcome of these matters will be; however, based on current knowledge and after consultation with legal counsel, the Company does not believe that judgments or settlements, if any, arising from pending or potential legal actions or regulatory matters, either individually or in the aggregate, will have a material adverse effect on the consolidated financial position or liquidity of the Company although they could have a material effect on net income for a given period. The Company intends to defend itself vigorously against all of the claims asserted in these matters. Accordingly, no accrual for a loss contingency on this litigation has been made in the Company's consolidated financial statements as the Company is unable to reasonably estimate a loss or range of potential loss.

(24) Subsequent Events

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

On January 12, 2005, the Company entered into an agreement with Olney Bancshares of Texas, Inc. for the sale of five Gold Bank branches located in Oklahoma City, El Reno, Kingfisher, Hennessey and Enid, Oklahoma. The sale, which is subject to regulatory approval, includes deposits of \$350.2 million and loans of \$383.4 million. Total property, plant and equipment net of accumulated depreciation was \$4.1 million. Such are shown as assets and liabilities held for sale as of December 31, 2004.

Edgar Filing: GOLD BANC CORP INC - Form 10-K/A

On January 19, 2005, the Company granted 156,900 shares of restricted stock and 106,600 restricted stock units pursuant to the Company's stock option plan. The restricted stock and restricted stock units vest at the end of three years from the date of grant, provided continued employment with the Company during this period.

Interest income, net interest income and non-interest expense as set forth above differ from amounts previously reported in the Company's previously filed Forms 10-Q because of the reclassification of direct costs of loan origination as a reduction of interest income in accordance with the provisions of FASB Statement No. 91, "Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Costs

of Leases."

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

Not applicable.

ITEM 9A CONTROLS AND PROCEDURES

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control over financial reporting is a process designed under the supervision of our principal executive and principal financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external reporting purposes in accordance with U.S. generally accepted accounting principles.

As of the end of our 2004 fiscal year, management conducted an assessment of the effectiveness of our internal control over financial reporting based on the framework established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment made under Internal Control Integrated Framework, management has concluded that our internal control over financial reporting as of December 31, 2004 is effective.

Management's assessment of the effectiveness of our internal control over financial reporting as of December 31, 2004 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in their report which follows.

Disclosure Controls and Procedures

As of the end of the period covered by this report, an evaluation was carried out by management, with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and procedures were effective as of the end of the period covered by this report.

Changes to Internal Control over Financial Reporting

No change in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the quarter ended December 31, 2004 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Gold Banc Corporation, Inc.:

We have audited management's assessment, included in the accompanying Management's Report on Internal Control on Financial Reporting, that Gold Banc Corporation, Inc. maintained effective internal control over financial reporting as of December 31, 2004, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Gold Banc Corporation, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that Gold Banc Corporation, Inc. maintained effective internal control over financial reporting as of December 31, 2004, is fairly stated, in all material respects, based on criteria established in *Internal Control—Integrated Framework* issued by COSO. Also, in our opinion, Gold Banc Corporation, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2004, based on criteria established in *Internal Control—Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Gold Banc Corporation, Inc. and subsidiaries as of December 31, 2004 and 2003, and the related consolidated statements of operations, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2004, and our report dated March 24, 2005, expressed an unqualified opinion on those consolidated financial statements.
