Approximate date of proposed sale to the public: As soon as practicable after this Registration Statement is declared effective.

If any of the securities being registered on this form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, check the following box. X

If this form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration number of the earlier effective registration statement for the same offering. O

If this form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. O

If this form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. O

CALCULATION OF REGISTRATION FEE

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Title of each class of securities to be registered	Number of shares to be registered(1)	Proposed maximum offering price per share(2)	Proposed maximum aggregate offering price	Amount of registration fee
Common stock, no par value per share	2,783,456	\$ 3.99	\$ 11,105,989	\$ 340.95

(1) Includes 780,857 shares of common stock issuable upon exercise of warrants and 2,002,599 outstanding shares of common stock.

(2) Estimated solely for the purpose of calculating the registration fee pursuant to Rule 457(c) under the Securities Act of 1933 based on the average of the high and low prices of the Registrant's common stock, as reported on The American Stock Exchange on October 4, 2007, in U.S. dollars.

The Registrant hereby amends this Registrant Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

Information contained in this prospectus is subject to completion or amendment. A registration statement relating to these securities has been filed with the Securities and Exchange Commission. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This prospectus shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

Subject to completion, dated October 5, 2007.

PROSPECTUS

GEOPETRO RESOURCES COMPANY

2,783,456 shares of Common Stock

(No Par Value)

The Offering:

This offering relates to the possible sale, from time to time, by the shareholders listed on page 84 of this prospectus, the selling shareholders, of up to 2,783,456 shares of common stock of GeoPetro Resources Company. The shares of our common stock and securities which are exercisable for shares of our common stock which are being offered by this prospectus were issued to the selling shareholders pursuant to financing transactions. We will not receive any proceeds from sales by selling shareholders. The selling shareholders may sell all or a portion of their shares covered by this prospectus through public or private transactions at fixed prices, at prevailing market prices at the time of sale, at varying prices or negotiated prices, in negotiated transactions, or in trading markets for our common stock. We will bear all costs associated with this registration.

Current Trading Market:

Our common stock trades on the American Stock Exchange under the symbol GPR. Our common stock is also listed on the Toronto Stock Exchange under the symbol GEP.s. On October 4, 2007, the last reported sale prices for our common stock on the American Stock Exchange and the Toronto Stock Exchange were \$3.99 and \$4.00, respectively.

Investing in our common stock involves a high degree of risk. See Risk Factors Beginning on Page 5.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities, or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is , 2007

If anyone provides you with different or inconsistent information, you should not rely on it. The selling shareholders are not making an offer to sell these securities in any jurisdiction where an offer or sale is not permitted. You should assume that the information appearing in this prospectus is accurate as of the date on the front cover of this prospectus only. Our business, financial condition, results of operations and prospects may have changed since that date.

Unless otherwise specified or the context otherwise requires, all dollar amounts in this prospectus are expressed in U.S. dollars.

PROSPECTUS SUMMARY

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

This summary highlights selected information contained in greater detail elsewhere in this prospectus and does not contain all of the information that you should consider before investing in our common stock. You should read the entire prospectus carefully, especially the risks of investing in our common stock, which we discuss under Risk Factors and our consolidated financial statements and related notes. Unless otherwise indicated or required by the context, we, us, and our refer to GeoPetro Resources Company and its subsidiaries and predecessors. All financial data included in this prospectus has been prepared in accordance with generally accepted accounting principles in the United States. We have provided definitions for some of the natural gas and oil industry terms used in this prospectus in the Glossary on page A-1 of this prospectus. All dollar amounts appearing in this prospectus are stated in U.S. dollars unless specifically noted in Canadian dollars (CDN\$).

GEOPETRO RESOURCES COMPANY

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

- Offices:** Our principal executive offices are located at One Maritime Plaza, Suite 700, San Francisco, CA 94111. Our telephone number is (415) 398-8186.
- Our Business:** We are an oil and gas company originally incorporated in the State of Wyoming in August 1994 but incorporated in California since June 1996. Our business is the exploration and the production of oil and natural gas reserves on a worldwide basis. We currently have projects in the United States, Canada, and Indonesia. The projects encompass approximately 1.03 million gross (236,170 net) acres consisting of mineral leases, production sharing contracts and exploration permits that give us the right to explore for, develop and produce crude oil and natural gas. We have developed a proven cash-flow generating property in our Madisonville Project in Texas which we operate. Elsewhere, we have assembled a geographically diversified portfolio of exploratory and appraisal prospects which we believe have the potential for oil and natural gas reserves.
- Corporate Strategy:** Our strategy is to maximize shareholder value through the exploration of oil and natural gas prospects. To carry out this philosophy we employ the following business strategies:
- Identify and pursue projects which individually have the potential to be company makers which we define as projects which could generate a minimum unrisks net present value of \$50 million net to our interest using a 10% discount factor. Net present value means the estimated future net cash flows resulting from the sale of oil and gas less all of the operating and capital costs, discounted to present value using a 10% discount factor.
 - Unrisks in this context means that we have not reduced the future net cash flows to account for the risk of finding and producing the reserves;
 - perform geological, engineering and geophysical evaluations;
 - gain control of key acreage;
 - generate high quality drillable exploration and lower-risk appraisal and development prospects;
 - retain a large working interest in those projects which involve low risk development, exploitation or appraisal of proven, probable and possible reserves; and
 - minimize early investment and exploration risk in higher risk exploratory prospects through farmouts to other oil and natural gas companies and maintain meaningful interests with a carry through the exploration phase.
- Management:** Stuart J. Doshi, David V. Creel and J. Chris Steinhauser, the three members of our senior management team, have a combined experience of approximately 100 years in the oil and gas industry. This experience covers a broad range of activity both onshore and offshore, domestic and international and from company start-up to mature progression and company sale. This experience also covers the entire spectrum of the risk profile in any particular project from early stage exploration through full development and production.
- Significant Risks:** Our business faces significant risks. Acquisition, exploration and overhead costs are high and have resulted in substantial losses since inception. There is a limited public market for our common shares, which may hinder our ability to raise equity capital (if needed) on advantageous terms, and there is intense competition in our industry. See Risk Factors beginning on page 5 for a detailed discussion of these and other risks.

- Madisonville Field:** We own and operate a 100% working interest in the Madisonville Project in Madison County, Texas. We own working interests in approximately 4,716 gross and net acres of leases in the Rodessa Formation interval, as well as approximately 4,589 gross and net acres of leases as to depths below the Rodessa Formation interval. In October 2001, we tested the Magness Well at rates of up to 20.8 MMcf/d. Production from this well commenced in May 2003 and stabilized at a rate of approximately 18 MMcf/d of raw gas as at October 2003. In December 2004, the Fannin Well was drilled, completed and tested at rates of up to 25.7 MMcf/d. In 2006, we drilled the Wilson and Mitchell wells. Presently, the Fannin, Mitchell and Magness wells are producing while the Wilson well is shut-in (not producing) awaiting a fracture stimulation and hook up. The well reserves are being produced from the Rodessa formation existing at approximately 12,000 feet of depth. In 2005 we entered into a long-term agreement with Madisonville Gas Processing, LP (MGP), the gas treatment plant owner, to process Rodessa formation natural gas. In connection with the agreement, MGP is expanding the capacity of the treatment plant from 18 MMcf/d to 68 MMcf/d. MGP is jointly owned by JPMorgan Partners and Bear Cub Investments LLC. Gateway Processing Company (Gateway) owns and operates an approximately nine-mile sales pipeline with an estimated capacity of approximately 70 MMcf/d to transport the natural gas from the Madisonville Field to two major pipelines in the area.
- Alaska CBM:** We entered into an agreement with Pioneer Oil Company, Inc. dated April 20, 2005, wherein we acquired a 100% working interest, 81% net revenue interest, in 122,174 acres onshore in Cook Inlet, near Anchorage, Alaska. Preliminary log analysis indicates the lease blocks may contain coal bed methane, CBM , reserves as well as conventional accumulations of natural gas in Tertiary sandstones. Please see the glossary on page A-1 for definitions of terms. The coals occur in seams which are commonly 20 feet thick and can be as thick as 70 feet. Accessible onshore areas have 200 to 300 feet of coal shallower than 5,000 feet. Gas content for these coals ranges from 80 to 250 standard cubic feet per ton. We may reduce exploration risk by finding participants to pay most or all of the money expended towards acquisition and initial exploration.
- Lokern Project:** We have a 100% working interest in 1,280 acres over a prospect in Kern County, California. An oil and gas prospect has been identified using reprocessed seismic. Please see the glossary on page A-1 for definitions of terms.
- Alberta Projects:** We, through our wholly-owned subsidiary, GeoPetro Canada Ltd. (**GeoPetro Canada**) have entered into a participation agreement wherein we acquired a 50% non-operated working interest in the Goodwin Prospect, which is located in the Central Alberta Basin, Canada. A total of 12,000 acres can be earned by the Company by the drilling of wells. To date, we have drilled and completed one well in this project. Elsewhere we have a 56.25% working interest in 2,560 leased acres in the central Alberta basin.
- Bengara (II) PSC:** We, through our 12% ownership interest of Continental-GeoPetro (Bengara II) Ltd., a British Virgin Islands corporation (**C-G Bengara**) have a 12% interest in the Bengara (II) PSC Block in East Kalimantan, Indonesia (the **Bengara Block**) which covers approximately 900,000 gross (108,000 net) acres. Two wells have been drilled in this block since 1938 and one of these resulted in a natural gas discovery, testing 19.5 MMcf/d together with 600 bbls condensate per day. Please see the glossary on page A-1 for definitions of terms. Elsewhere in the block, a large number of prospects and leads have been identified based primarily on seismic data.

THE OFFERING

Common stock that may be offered by the selling shareholders:

2,783,456 shares(1)

Common stock to be outstanding immediately after this offering:

31,583,007 shares(2)

Use of proceeds:

We will not receive any proceeds from the sales of our common stock by the selling shareholders.

Risk factors:

See Risk Factors and other information included in this prospectus for a discussion of some of the factors you should consider before deciding to purchase shares of our common stock.

American Stock Exchange Symbol: GPR

-
- (1) Includes 780,857 shares of common stock issuable upon exercise of warrants.
- (2) Assumes the sale by the selling stockholders of all the shares of common stock available for resale under this prospectus, except for 780,857 shares of common stock issuable upon exercise of warrants.

SUMMARY CONSOLIDATED FINANCIAL DATA

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The following table sets forth certain of our summary consolidated financial data for the periods indicated. The data presented below has been derived from our financial statements included elsewhere in this prospectus except for the balance sheet data as of December 31, 2004, 2003 and 2002 and the consolidated statement of operations data for the years ended December 31, 2003 and 2002, which are derived from our audited consolidated financial statements not included in this prospectus. You should read this information together with the consolidated financial statements and the notes to those statements appearing elsewhere in this prospectus and the information under Selected Consolidated Financial Data and Management's Discussion and Analysis of Financial Condition and Results of Operations.

RISK FACTORS

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

An investment in our common stock involves a high degree of risk. You should carefully consider the risks described below together with all of the other information included in this prospectus before making an investment decision. If any of the possible adverse events described below actually occurs, our business, results of operations and financial condition could suffer. Under these circumstances, the market price of our common stock could decline and you could lose all or part of your investment.

Risks Related to Our Business

As of June 30, 2007, we have capitalized costs totaling \$49.7 million as evaluated and unevaluated oil and gas properties, whereas we have generated revenues of only \$27,182,262 since January 1, 2003.

Since inception, our activities have been primarily related to acquiring and exploring leasehold interests in oil and natural gas properties in Texas, California, Alaska, Alberta, Indonesia and Australia. We incur substantial acquisition and exploration costs and overhead expenses in our operations, and until 2003, excluding minor interest and dividend income, our only significant cash inflows were the recovery of capital invested in projects through sale or other divestitures of interests in oil and gas prospects to industry partners. As a result, we have sustained an accumulated deficit through June 30, 2007 of \$10,337,821. Our production activities commenced in May 2003. Since May 2003, over 90% of our revenue has been generated from natural gas sales derived from wells in the Madisonville Field in Texas. It is possible that in the future we will be unable to continue to generate revenues from our sales of natural gas from our Madisonville Field wells because our proved reserves decline as reserves are produced from the wells. The drilling of exploratory oil and natural gas wells is highly speculative and often unproductive. Our participation in future drilling activities to explore, develop and exploit the properties in which we have an interest, or in which we may acquire interests, may be unsuccessful, may fail to generate positive cash flow, and may not enable us to maintain profitability in the future.

Approximately 99% of our current revenues are generated by our interest in the Madisonville Project. Delays or interruptions of the Madisonville Project natural gas drilling and production operations including, but not limited to, events beyond our control or the failure of third parties on which we rely to provide key services, could negatively impact our revenues.

Approximately 99% of our oil and natural gas revenues for the year ended December 31, 2006 and the six months ended June 30, 2007 were derived from the Madisonville Project. In connection with that project, we have contracted with third parties to provide key services, including:

- (a) Madisonville Gas Processing, LP (**MGP**), which owns and operates gathering pipelines and a dedicated natural gas treatment plant which we utilize to treat impurities in the Madisonville Project natural gas; and

- (b) Gateway, which operates a sales pipeline for such natural gas.

The failure of MGP or Gateway to perform their contractual obligations to us could impose delays or interruptions in our production operations and prevent us from generating revenues. In addition, events which are beyond our control, or that of Gateway or MGP, could affect our production operations. Such events include, but are not limited to:

events referred to as force majeure, such as an act of God, act of a public enemy, war, blockade, public riot, lightning, fire, storm, flood, explosion and any other causes whether of the kind enumerated or otherwise not reasonably within the control of MGP, Gateway or our company.

subsurface conditions or formations encountered during the drilling of wells, whether natural or mechanical, including but not limited to blowout, igneous rock, salt, saltwater flow, loss of circulation, loss of hole, abnormal pressures, or any other impenetrable substance or adverse condition, which renders further drilling of a well impossible or impractical.

the inability to secure raw materials or equipment,

transportation accidents, and

labor disputes and equipment failures.

In excess of 90% of our revenues to date have been derived from sales by MGP to two customers. The loss of one or both these customers could have a material adverse impact on our oil and gas revenues.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Approximately 99% of our oil and natural gas revenues for the year ended December 31, 2006 and the six months ended June 30, 2007 were derived from the Madisonville Project. During 2006, and in the current year to date, approximately 99% of our revenues have been derived from sales by MGP to two customers, Atmos Pipeline-Texas, and ETC Katy Pipeline, Ltd. The loss of one of these customers could impact the price we receive for our gas sold due to lessened competition. The loss of both customers could result in a total loss of our revenue.

Unless we replace our oil and natural gas reserves, our reserves and production will decline.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The volume of production from oil and natural gas properties generally declines as reserves are depleted, with the rate of decline depending on reservoir characteristics. Our proved reserves will decline as reserves are produced from our properties unless we are able to acquire or develop new reserves. The business of exploring for, developing or acquiring reserves is capital intensive. For example, as of June 30, 2007 we have capitalized costs totaling \$49.7 million as evaluated and unevaluated oil and gas properties. To the extent cash flow from operations is reduced and external sources of capital become limited or unavailable, our ability to make the necessary capital investment to maintain or expand our asset base of oil and natural gas reserves will be impaired. Even if we are able to raise capital to develop or acquire additional properties, no assurance can be given that our future exploitation and development drilling activities will result in the discovery of any reserves.

Our exploration and development drilling activities may not be commercially successful. The drilling of exploratory oil and natural gas wells is expensive, highly speculative and often unproductive.

Exploration for oil and natural gas on unproven prospects is expensive, highly speculative and involves a high degree of risk, including the risk that no commercially productive oil or natural gas reservoirs will be encountered. Reserves are dependent on our ability to successfully complete drilling activity on proven prospects.

The cost of drilling, completing and operating wells is often uncertain, and drilling operations may be curtailed, delayed or cancelled as a result of a variety of factors, including:

unexpected drilling conditions, pressure or irregularities in formations;

equipment failures or accidents, adverse weather conditions;

compliance with governmental requirements; and

shortages or delays in the availability of drilling rigs and the delivery of equipment.

Our evaluations of the oil and gas prospects of our properties may be wrong.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

With the exception of the Madisonville Project, the properties in which we have an interest are prospects in which the presence of oil and natural gas reserves in commercial quantities has not been established. Any decision to engage in exploratory drilling or other activities on any of these properties will be dependent in part on the evaluation of data compiled by petroleum engineers and geologists and obtained through geophysical testing and geological analysis.

Reservoir engineering, geophysics and geology are not exact sciences and the results of studies and tests used to make such evaluations are sometimes inconclusive or subject to varying interpretations. As such, there is no certain way to know in advance whether any of our prospects will yield oil and natural gas in commercial quantities. Further, it is possible that we will participate in the drilling of more dry holes than productive wells or that all or substantially all of the wells drilled will be dry holes. The drilling of dry holes on prospects in which we have an interest could adversely affect their values and our decision to undertake further exploration and

development drilling of such prospects. It is not certain or predictable whether, and no assurance can be made that, the wells drilled on the properties in which we have an interest will be productive or, if productive, that we will recover all or any part of our investment in the properties. In sum, our participation in future drilling activities may not be successful and, if unsuccessful, such failure will negatively impact our revenues and have a material adverse effect on our results of operations and financial condition. Our oil and natural gas revenues were \$6,716,360 million for the year ended December 31, 2006 and \$4,212,192 for the six months ended June 30, 2007. Future revenues could decline from those levels if our future drilling efforts are not successful. Furthermore, as of June 30, 2007 we have capitalized costs totaling \$49.7 million as evaluated and unevaluated oil and gas properties. Should our future drilling activities be unsuccessful, we may then be required to record an impairment charge equal to a portion of, or all, of the capitalized costs resulting in an immediate adverse impact on our results of operations and financial position.

Our business may be harmed by failures of third party operators on which we rely.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our ability to manage and mitigate the various risks associated with certain of our exploration and operations in Alberta, Canada, and Indonesia is limited since we rely on third parties to operate our projects. We are a non-operating interest owner in our Canadian and Indonesian properties. With respect to our interests outside of the United States, we have entered into agreements with third party operators for the conduct and supervision of drilling, completion and production operations. In the event that commercial quantities of oil and natural gas are discovered on one of our properties, the success of the oil and natural gas operations on that property depends in large measure on whether the operator of the property properly performs its obligations. The failure of such operators and their contractors to perform their services in a proper manner could result in materially adverse consequences to the owners of interests in that particular property, including us.

Our percentage share of oil and gas revenues from our Indonesian property is diminished by the terms of our production sharing contract in the Bengara Block.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

C-G Bengara is subject to a production sharing contract, which means generally that C-G Bengara is entitled to receive, from production proceeds, 100% of expenditures in the block as cost recovery. Once these costs are recovered, C-G Bengara's production share will be reduced to approximately 26.7% of oil produced and 62.5% of all natural gas produced. We are entitled to 12% of C-G Bengara's reduced share of any such production. See the discussion under Properties in this prospectus for more information concerning the production sharing contract.

Drilling and completion equipment, services, supplies and personnel are scarce and may not be available when needed, which could significantly disrupt or delay our operations.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

From time to time, there has been a general shortage of drilling rigs, equipment, supplies and oilfield services in North America and Indonesia, which may intensify with current increased industry activity. In addition, the costs and delivery times of rigs, equipment and supplies have risen. There can be no assurance that sufficient drilling and completion equipment, services and supplies will be available when needed. Shortages could delay our proposed exploration, development drilling, and sales activities, which could have a material adverse effect on our results of operations. Our oil and natural gas revenues were \$6.7 million for the year ended December 31, 2006. Future revenues could decline from those levels if we experience delays in our proposed exploration, development drilling, and sales activities. The demand for, and wage rates of, qualified rig crews have risen in the drilling industry due to the increasing number of active rigs in service. If the demand for qualified rig crews continues to rise in the drilling industry, then the oil and gas industry may experience shortages of qualified personnel to operate drilling rigs. This could delay our drilling operations and adversely affect our financial condition and results of operations.

Our working interest in properties, and our ability to realize any profits from such properties, will be diminished to the extent that we enter into farmout arrangements with unaffiliated third parties.

We have previously entered into, and may in the future enter into, farmout arrangements with third parties willing to drill natural gas and oil wells on leaseholds in which we originally acquired working interests, in exchange for our assignment of part or all of our leasehold interests. As a consequence of these arrangements, our retained interests in properties which are subject to farmout arrangements have been or may be diminished. Our

opportunity to realize revenues and profits from properties which are successfully developed under farmout arrangements will be diminished to the extent of our reduced interests.

Competition with other oil and natural gas exploration and development drilling companies for viable oil and natural gas properties may limit our success.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

It is likely that in seeking future property acquisitions, we will compete with companies which have substantially greater financial and management resources. Our competition comes primarily from three sources:

- (a) those competitors that are seeking oil and gas fields for expansion, further drilling, or increased production through improved engineering techniques;
- (b) income-seeking entities purchasing a predictable stream of earnings based upon historic production from fields being acquired; and
- (c) junior companies seeking exploration opportunities in unknown, unproven territories.

Our competitors may be able to pay more for productive oil and natural gas properties and may be able to define, evaluate, bid for and purchase a greater number of properties and prospects than we can. Our ability to acquire additional properties in the future will depend upon our ability to conduct efficient operations, evaluate and select suitable properties, implement advanced technologies and consummate transactions in a highly competitive environment.

Estimates of oil and natural gas reserves are inherently imprecise. Any material inaccuracies in these reserve estimates or underlying assumptions will affect materially the quantities and present value of our reserves.

Estimates of proved oil and natural gas reserves and the future net cash flows attributable to those reserves are prepared by independent petroleum engineers and geologists. There are numerous uncertainties inherent in estimating quantities of proved oil and natural gas reserves and cash flows attributable to such reserves, including factors beyond our control and that of our engineers. Reserve engineering is a subjective process of estimating underground accumulations of oil and natural gas that cannot be measured in an exact manner. Different reserve engineers may make different estimates of reserves and cash flows based on the same available data. The accuracy of an estimate of quantities of reserves, or of cash flows attributable to such reserves, is a function of the available data, assumptions regarding future oil and natural gas prices and expenditures for future development drilling and exploration activities, and of engineering and geological interpretation and judgment. Additionally, reserves and future cash flows may be subject to material downward or upward revisions, based upon production history, development drilling and exploration activities and prices of oil and natural gas. Actual future production, revenue, taxes, development drilling expenditures, operating expenses, underlying information, quantities of recoverable reserves and the value of cash flows from such reserves may vary significantly from the assumptions and underlying information set forth herein.

Competitive pressures may force us to implement new technologies at substantial cost and our limited financial resources may limit our ability to implement such technologies at the same rate as our competitors.

The oil and gas industry is characterized by rapid and significant technological advancements and introductions of new products and services utilizing new technologies. Other oil and gas companies may have greater financial, technical and personnel resources that allow them to enjoy technological advantages and may in the future allow them to implement new technologies before we do. There can be no assurance that we will be able to respond to such competitive pressures and implement such technologies on a timely basis or at all. One or more of the technologies currently utilized by us or implemented in the future may become obsolete.

We will require additional capital to fund our future activities. Our ability to pursue our business plan may be restricted by our access to additional financing.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Until such time as the properties in which we own interests are generating sufficient cash flow to fund planned capital expenditures, we will be required to raise additional capital through the issuance of additional securities or otherwise sell or farm out interests in our oil and natural gas properties to third parties. If and when the properties in which we own interests become productive and have adequate reserves, we may borrow funds to finance our future oil and natural gas operations and exploratory and development drilling activities. We may not

be able to raise additional funds in the future from any source or, if such additional funds are made available to us, we may not be able to obtain such additional financing on terms acceptable to us. To the extent such funds are not available from any of those sources, our operations and activities will be limited to those operations and activities we can afford with the funds then available to us. We have committed to a three well drilling program in our Madisonville project to facilitate the expansion of the gas treatment plant. The commitment is not discretionary. While we have fulfilled the commitment to drill the first two wells of the three well commitment, we are further required to commence the drilling of a third well sufficient to test the Smackover Formation (estimated to be encountered at approximately 18,000 feet) on or before September 30, 2008. This well is expected to cost approximately \$10 million to drill and complete. We have granted MGP a security interest in the Madisonville Field properties to secure the three well commitment. Subject to events of force majeure, and the availability of suitable drilling rigs, well services, and equipment, our failure to drill this well could result in the loss of our interest in the Madisonville Project. Our larger competitors, by reason of their size and relative financial strength, may be more easily able to access capital markets than us.

The volatility in crude oil and natural gas prices could adversely affect our financial results and ability to raise additional capital.

Our revenues, cash flows and profitability are substantially dependent on prevailing prices for both oil and natural gas. Decreases in natural gas prices will decrease revenues and cash flows from the Madisonville Project and our other producing properties, if any, and decreases in oil and natural gas prices could deter potential investors from investing in our company and generally impede our ability to raise additional financing to fund our exploration and development drilling activities. Historically, oil and natural gas prices and markets have been volatile, and they are likely to continue to be volatile in the future. Prices for oil and natural gas are subject to wide fluctuations in response to relatively minor changes in the supply of, and demand for, oil and natural gas, market uncertainty and a variety of additional factors that are beyond our control. These factors include, but are not limited to, political conditions in the Middle East and other regions, internal and political decisions of OPEC and other oil and natural gas producing nations to decrease or increase production of crude oil, domestic and foreign supplies of oil and natural gas, consumer demand, weather conditions, domestic and foreign government regulations, transportation costs, the price and availability of alternative fuels and overall economic conditions.

Our current operations are particularly exposed to volatility in natural gas prices because a portion of the fees we pay to process natural gas at the Madisonville gas treatment plant is fixed. The sale price of natural gas must be above a minimum price of approximately \$3.00 per Mcf at the present time before we earn any net revenues from the sale of natural gas.

We are subject to a number of operational risks beyond our control against which we may not have, or be able to obtain insurance.

Our operations are subject to the many risks and hazards incident to exploring and drilling for, and producing and transporting, oil and natural gas, including among other risks:

blowouts, fires, craterings, pollution and equipment failures that may result in damage to or destruction of wells, producing formations, production facilities and equipment;

personal injuries or death due to accidents, human error or acts of God;

unavailability of materials and equipment to drill and complete or re-complete wells; unfavorable weather conditions; engineering and construction delays;

fluctuations in product markets and prices; proximity and capacity of pipeline, and trucking or termination facilities to our oil and natural gas reserves; hazards resulting from unusual or unexpected geological or environmental conditions; environmental regulations and requirements;

accidental leakage of toxic or hazardous materials, such as petroleum liquids or drilling fluids into the environment, remediation and clean-up costs; and

political instability and civil unrest, insurrections or disruptions in foreign countries in which some of our interests are located.

If one or more of these events occurs, we could incur substantial liabilities to third parties or governmental entities, the payment of which could have a material adverse effect on our financial condition and results of operations, or we could lose properties in which we have invested significant sums (totaling \$49.7 million) which are capitalized as evaluated and unevaluated oil and gas properties as of June 30, 2007.

A loss not covered by insurance could result in substantial expenses to us.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We do not insure fully against all business risks either because such insurance is not available or because premium costs are prohibitive. This is a common practice in the oil and gas industry. However, a loss not fully covered by insurance could result in expenses to us and could have a material adverse effect on our financial position and results of operations. Uninsured losses in excess of \$1.0 million would be materially adverse.

We are subject to extensive government regulations that can change from time to time, compliance with which are costly and could negatively impact our production, operations and financial results.

The oil and gas industry is subject to extensive government regulations in the countries in which we operate. Matters subject to regulation include discharge permits for drilling operations, drilling bonds, reports concerning operations, unitization and pooling of properties and taxation. Historically, our costs of complying with these regulations have not exceeded \$100,000 per year. From time to time, regulatory agencies have imposed price controls and limitations on production by restricting the rate of flow of oil and natural gas wells below actual production capacity in order to conserve supplies of oil and natural gas. We are also subject to changing and extensive tax laws, the effects of which cannot be predicted. Legal requirements are frequently changed and subject to interpretation, and we are unable to predict the ultimate cost of compliance with these requirements or their effects on our operations. Future laws, or existing laws or regulations, as currently interpreted or reinterpreted or changed in the future, could result in increased operating costs, fines and liabilities, in amounts which are unknown at this time, any of which could materially adversely affect our results of operations and financial condition.

Our industry is subject to extensive environmental regulation that may limit our operations and negatively impact our production.

Extensive national, state, provincial and local environmental laws and regulations in the United States and foreign jurisdictions affect nearly all of our operations. These laws and regulations set various standards regulating certain aspects of health and environmental quality, provide for penalties and other liabilities for the violation of such standards and establish in certain circumstances obligations to remediate current and former facilities and locations where operations are or were conducted. In addition, special provisions may be appropriate or required in environmentally sensitive areas of operation.

Environmental legislation may require that we, among other things:

acquire permits before commencing drilling;

restrict spills, releases or emissions of various substances produced in association with our operations;

limit or prohibit drilling activities on protected areas such as wetlands or wilderness areas;

take reclamation measures to prevent pollution from former operations;

take remedial measures to mitigate pollution from former operations, such as plugging abandoned wells and remediating contaminated soil and groundwater;

take remedial measures with respect to property designated as a contaminated site.

The cost of any of these actions is presently unknown but is likely to be significant.

Compliance with existing or future environmental legislation is unknown but could be substantial.

Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties. The discharge of oil, natural gas or other pollutants into the air, soil or water

may give rise to liabilities to governments and third parties and may require us to incur substantial costs to remedy such discharge. Under these laws and regulations, we could be liable for personal injury, clean-up costs and other environmental and property damages, as well as administrative, civil and criminal penalties. We could be required to cease production on properties if environmental damage occurs. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs. Changes in, or enforcement of, environmental laws may result in a curtailment of our production activities, or a material increase in the costs of production, development drilling or exploration, any of which could have a material adverse effect on our financial condition and results of operations or prospects. We are not presently aware of any environmental liabilities or able to predict the ultimate cost of liabilities not yet recognized. We have recorded an asset retirement obligation in connection with the estimated future costs to plug certain wells in our Madisonville Project in Texas upon abandonment totaling approximately \$51,226 as of June 30, 2007.

Our natural gas deliveries to the Madisonville gas treatment plant may be affected by the demands of Crimson Exploration, Inc. (Crimson) and other third parties for access to the plant, and as a result, our access to the plant could be restricted.

We are dependent upon the Madisonville gas treatment plant to treat our natural gas. We have committed all natural gas production from our interest in the Madisonville Project to MGP, which has in turn committed to provide treatment capacity of up to 68 MMcf/d for our natural gas. Third parties may seek access to the gas treatment plant through regulatory proceedings, which could restrict our access to the plant, disrupt our production operations and negatively impact our revenues. An example of such a proceeding is the complaint filed by Crimson with the Texas Railroad Commission described under Properties Description of the Properties Texas The Madisonville Gas Treatment Plant and Gathering Facilities. On August 9, 2006, the Texas Railroad Commission issued an order requiring MGP to ratably process, take, transport or purchase natural gas produced by Crimson into the Madisonville gas treatment plant. MGP recently completed its expansion of the capacity of the treatment plant from 18 MMcf/d to 68 MMcf/d and the additional treating capacity at such facilities is currently being phased in. There is no guarantee that we will be able to obtain full access to treatment capacity of up to 68 MMcf/d once the phase-in is completed because, for example, Crimson now has the right to have its natural gas treated at the plant, which may reduce the plant's ability to treat all of our natural gas, unless the plant's capacity is further expanded.

Political and/or economic conditions in Indonesia, Canada or the United States could change in manners that negatively affect our operations and prospects in those countries.

Our business activities in Indonesia, Canada and the United States are subject to political and economic risks, including: loss of revenue, property and equipment as a result of unforeseen events like expropriation, nationalization, war, terrorist attacks and insurrection; increases in import, export and transportation regulations and tariffs, taxes and governmental royalties; renegotiation of contracts with governmental entities; changes in laws and policies governing operations of foreign-based companies; exchange controls, currency fluctuations and other uncertainties arising out of foreign government sovereignty over international operations; laws and policies affecting foreign trade, taxation and investment; and the possibility of being subject to the exclusive jurisdiction of foreign courts in connection with legal disputes and the possible inability to subject foreign persons to the jurisdiction of courts in the United States.

Terrorist attacks could have an adverse effect on our oil and natural gas operations, especially overseas.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

To date, our operations have not been disrupted by terrorist activity. It is uncertain how terrorist activity will affect us in the future, or what steps, if any, the Indonesian, Canadian or American government may take in response to terrorist activities. The attack on the New York World Trade Center in 2001 and the subsequent wars in Afghanistan and Iraq have increased the likelihood that U.S. citizens and U.S. owned interests may be targeted by terrorist groups operating both in the United States and in foreign countries, especially in Indonesia.

If we do not satisfy the work requirements of our Production Sharing Contract (PSC), the Indonesian government may terminate all or part of our contracts. Please see the Glossary for a definition of Terms.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our Indonesian PSC requires us and our partners to undertake work by specified dates in order to maintain our oil and natural gas rights. See Properties Description of the Properties Indonesia. We may not be able to satisfy our contractual obligations. If we do not otherwise comply with the work requirements of the PSC, or successfully renegotiate the terms, all or part of our contract may be terminated. If this contract is terminated, we would also lose all of our investment in that overseas prospect. If we forfeit our interest in the contract area, it will be necessary to record an impairment write-down equal to the net capitalized costs recorded for the area forfeited. This could have a material adverse impact on our financial condition and results of future operations in future periods. On September 29, 2006, we sold 70% of our interest in C-G Bengara to CNPC. C-G Bengara owns 100% of the underlying rights in the Indonesian contract area known as the Bengara Block. CNPC has agreed to fund our unmet work commitments in the Bengara Block. As discussed in greater detail under Properties in this prospectus, C-G Bengara is subject to prior work commitments for the ten-year period ended December 3, 2007 requiring total expenditures of \$25 million. As of July 31, 2007, C-G Bengara has met approximately \$12.8 million of the \$25.0 million required expenditures, leaving an approximate \$12.2 million shortfall. The applicable governing authority granted a deferral of the prior years commitments until December 2007 and we expect additional deferrals to be granted to December 2008. If the prior and future work commitments are not timely satisfied and if further deferrals of such commitments are not secured, we will need to record an impairment charge equal to the amount of costs capitalized which were approximately \$878,865 as of June 30, 2007, and we may lose all of our rights in the Bengara Block.

We may not be able to sell our natural gas production in Indonesia, limiting our ability to obtain a return on our investment there.

Our Indonesian operations lack a local market for natural gas, and if we produce natural gas in Indonesia, it will most likely have to be transported to an area where there is a demand. If no market for natural gas develops in Indonesia, we may incur costs for transportation. If we are not able to sell our natural gas production at a commercially acceptable price or at all, we may not be able to obtain a return on our investment in our Indonesian property.

We could lose our ownership interests in our properties due to a title defect of which we are not presently aware.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

As is customary in the oil and gas industry, only a perfunctory title examination, if any, is conducted at the time properties believed to be suitable for drilling operations are first acquired. Before starting drilling operations, a more thorough title examination is usually conducted and curative work is performed on known significant title defects. We typically depend upon title opinions prepared at the request of the operator of the property to be drilled. The existence of a title defect on one or more of the properties in which we have an interest could render it worthless and could result in a large expense to our business. Industry standard forms of operating agreements usually provide that the operator of an oil and natural gas property is not to be monetarily liable for loss or impairment of title. The operating agreements to which we are a party provide that, in the event of a monetary loss arising from title failure, the loss shall be borne by all parties in proportion to their interest owned.

Our acquisition activities are subject to uncertainties, may not be successful and provide a return to us on our investments.

We have grown primarily through acquisitions and intend to continue acquiring undeveloped oil and gas properties. Although we perform a review of the properties proposed to be acquired, such reviews are subject to uncertainties. It generally is not feasible to review in detail every individual property involved in an acquisition. Ordinarily, management review efforts are focused on the higher-valued properties; however, even a detailed review of all properties and records may not reveal existing or potential problems; nor will it permit us to become sufficiently familiar with the properties to assess fully their deficiencies and capabilities. Inspections are not always performed on every well, and potential problems, such as mechanical integrity of equipment and environmental conditions that may require significant remedial expenditures, are not necessarily observable even when an inspection is undertaken.

We are dependent upon our key officers and employees and our inability to retain and attract key personnel could significantly hinder our growth strategy and cause our business to fail.

While no assurances can be given that our current management resources will enable us to succeed as planned, a loss of one or more of our current directors, officers or key employees could severely and negatively impact our operations and delay or preclude us from achieving our business objectives. Stuart Doshi, David Creel and Chris Steinhauser, the three members of our senior management team, have a combined experience of approximately 100 years in the oil and gas industry. Although we have entered into employment agreements with Messrs. Doshi, Creel and Steinhauser, we could suffer the loss of key individuals for one reason or another at any time in the future. There is no guarantee that we could attract or locate other individuals with similar skills or experience to carry out our business objectives. We maintain key man insurance with respect to our Chief Executive Officer, Stuart Doshi.

Some of our directors may become subject to conflicts of interest which could impair their abilities to act in our best interest.

Nick DeMare, one of our directors, is a director, officer and/or significant shareholder of other natural resource companies and David Anderson, another one of our directors, is a director and officer of Dundee Securities Corporation, an investment banking firm that was the lead underwriter of our public offering of common stock in Canada and concurrent previous private placement of common shares with qualified institutional buyers in the U.S. Their association with these other companies in the oil and gas business may give rise to conflicts of interest from time to time. For example, they could be presented with business opportunities in their capacities as our directors, which they could, in turn, offer to the other companies for whom they also serve as directors, rather than to us, whose interests might be competitive with ours. Our directors are required by law to act honestly and in good faith with a view to our best interests and to disclose any interest which they may have in any project or opportunity to us; however, their interests in the other companies may affect their judgment and cause such directors to act in a manner that is not necessarily in our best interests.

Our directors and officers hold significant positions in our shares and their interests may not always be aligned with those of our other shareholders.

As of October 4, 2007 our directors and officers beneficially own 21.4% of our outstanding common stock. See Security Ownership of Certain Beneficial Owners and Management . This shareholding level will allow the directors, officers and certain beneficial owners to have a significant degree of influence on matters that are required to be approved by shareholders, including the election of directors and the approval of significant transactions. The short-term interests of our directors, officers and certain beneficial owners may not always be aligned with the long-term interests of our public shareholders, and vice versa. Because our directors, officers and certain beneficial owners have a significant degree of influence on matters that are required to be approved by our shareholders, they could influence the approval of transactions.

Our failure to manage internal or acquisition-based growth may cause operational difficulties and negatively affect our financial performance.

We expect to experience internal and/or acquisition-based growth, which may bring many challenges. Growth in the number of employees, sales and operations will place additional pressure on already limited resources and infrastructure. No assurances can be given that we will be able to effectively manage this or future growth. Our growth may place a significant strain on our managerial, operational, financial and other resources. Our success will depend upon our ability to manage our growth effectively which will require that we continue to implement and improve our operational, administrative and financial and accounting systems and controls and continue to expand, train and manage our employee base. Our systems, procedures and controls may not be adequate to support our operations and our management may not be able to achieve the rapid

execution necessary to exploit the market for our business model. If we are unable to manage internal and/or acquisition-based growth effectively, our business, results of operations and financial condition will be materially adversely affected.

Risks Related to this Offering and Our Common Stock

The shareholding position of holders of our common stock could be diluted by future issuances and conversions of other securities.

If our options and warrants are exercised for common shares, holders of our common stock will experience immediate and, depending on the magnitude of the exercises, substantial dilution. As of the date of this prospectus, 2,459,688 shares of our common stock are issuable upon exercise of warrants and 3,960,000 shares of our common stock are issuable upon exercise of options.

Investors may be subject to further dilution if we sell additional common shares or issue additional common shares in connection with future financings. If a significant number of our common shares are sold in the public market, the market price of our common shares could be depressed. This could hamper our ability to raise capital by issuing additional equity securities.

Our results may be affected by fluctuations in currency exchange rates.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our financial statements are reported in U.S. dollars and all of our revenue, and most of our operating costs, are currently denominated in U.S. dollars; however, we have operations outside the United States and we plan to expend money in Indonesia and Canada, where our operating costs will be denominated in local currencies. Fluctuations in exchange rates may increase our relative cost of operating in these countries, and may therefore have a negative effect on our financial results.

Non- U.S. holders of our common shares may be subject to U.S. federal income tax on the sale of our common shares and purchasers may have IRS withholding requirements

Unless certain requirements are met, gain recognized by a non U.S. holder on the sale of our common shares will be subject to U.S. federal income tax at normal graduated rates, and a purchaser will be required to withhold for the benefit of the IRS 10% of the purchase price since we are a United States real property holding corporation. There is an exemption from U.S. federal income tax for non-U.S. holders of 5% or less of our common shares (and to withholding for all non U.S. holders) if our common shares are regularly traded on an established securities market. In the event that 100 or fewer persons own 50% or more of our common shares (which had been, and may now and may continue to be, the case), temporary Treasury Regulations provide that our common shares will be regularly traded on an established securities market for a calendar quarter only if the established securities market is located in the United States and our common shares are regularly quoted by more than one broker or dealer making a market in our common shares; our common shares are currently listed on the American Stock Exchange (which constitutes an established securities market for this purpose) and quotes are being regularly made by at least two broker dealers. There can be no assurance, however, that our common shares will continue to be regularly traded on an established securities market for this purpose in any particular calendar quarter so as to avoid U.S. federal income tax on the sale of our common shares by non-U.S. holders of 5% or less of our common shares and the withholding requirement on the purchaser.

At such time that it is no longer the case that 100 or fewer persons own 50% or more of our common shares, under temporary Treasury Regulations, our common shares would also be regularly traded on an established securities market for a calendar quarter if: (a) our common shares trade, other than in de minimis quantities, on at least 15 days during the calendar quarter; (b) the aggregate number of our common shares traded during the calendar quarter is at least 7.5% of the average number of our common shares outstanding during such calendar quarter (reduced to 2.5% if there are 2,500 or more record shareholders); and (c) in the event that our common shares are traded on an established securities market located outside the United States, the common shares are registered under Sec. 12 of the Securities Exchange Act of 1934 (which they presently are).

There is a limited public market for our common shares, and the ability of our shareholders to dispose of their common shares may be limited.

Our common shares have been listed on The Toronto Stock Exchange since March 2006, and have been trading on the American Stock Exchange since February 15, 2007. We cannot foresee the degree of liquidity that will be associated with our common shares. A holder of our common shares may not be able to liquidate his, her

or its investment in a short time period or at the market prices that currently exist at the time the holder decides to sell. The purchase and sale of relatively small common share positions may result in disproportionately large increases or decreases in the price of our common shares. A trade involving a large number of common shares could have an exaggerated effect on the reported market price of our common shares.

Our stock price may fluctuate significantly.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The stock market in general and the market for natural gas and oil exploration companies have experienced price and volume fluctuations that are often unrelated or disproportionate to the operating results or asset values of companies. These broad market and industry factors may seriously impact the market price and trading volume of our common shares regardless of our actual operating performance. The market price of our common stock could also fluctuate significantly as a result of:

actual or anticipated quarterly variations in our operating results and our reserve estimates;

changes in expectations as to our future financial performance or changes in financial estimates, if any, of public market analysts;

announcements relating to our business or the business of our competitors;

conditions generally affecting the oil and natural gas industry, including changes in oil and natural gas prices;

speculation in the press or investment community;

general market and economic conditions;

the success of our operating strategy; and

the operating and stock price performance of other comparable companies.

The large numbers of shares of our common stock eligible for sale following this offering may depress the market price of our common stock.

The sale of a substantial number of shares of our common stock in the public market, or the perception that substantial sales may occur, could cause the market price of our common stock to decrease. Following this offering, substantially all of the shares of our common stock are freely transferable or will be transferable in compliance with restrictions under the Securities Act of 1933, as amended. These include shares of our common stock sold in this offering, as well as shares of common stock outstanding after this offering which are available for sale in public markets pursuant to Rule 144 or Rule 701 promulgated under the Securities Act.

We will continue to incur significant expenses as a result of being a public company, which may negatively impact our financial performance.

We have incurred and will continue to incur significant legal, accounting, insurance and other expenses as a result of being a public company. The Sarbanes-Oxley Act of 2002, as well as related rules implemented by the Securities and Exchange Commission, or SEC, and the American Stock Exchange, have required changes in corporate governance practices of public companies. Compliance with these laws, rules and regulations has increased our expenses, including our legal and accounting costs, and made some activities more time-consuming and costly. We also believe these laws, rules and regulations have made it more expensive for us to obtain director and officer liability insurance, and in the future we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. As a result, it may be more difficult for us to attract and retain qualified persons to serve on our board of directors or as officers. Furthermore, any additional increases in legal, accounting, insurance and certain other expenses that we may experience in the future could negatively impact our financial performance and have a material adverse effect on our results of operations and financial condition.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Most of the matters discussed within this prospectus include forward-looking statements of our current expectations and projections about future events. Words such as may, should, potential, continue, expect, anticipate, intend, plan, believe, seek, estimate, and similar are intended to identify such forward looking statements. These statements are based on our current beliefs, expectations, and assumptions and are subject to a number of risks and uncertainties and, therefore, actual results and events may vary significantly from those discussed in the forward-looking statements. These risks and uncertainties include those noted in Risk Factors above. Other factors besides those listed here could adversely affect us.

These forward-looking statements may include, among other things, statements relating to the following matters:

the level of oil and gas reserves that can be extracted at any of our projects;

our ability to extract reserves at commercially attractive prices;

our ability to compete against companies with much greater resources than us;

identified drilling locations;

exploration and development drilling prospects, inventories, projects and programs;

financial strategy;

production;

lease operating expenses, general and administrative costs and finding and development drilling costs;

future operating results; and

plans, objectives, expectations and intentions.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise, except to the extent we are required to do so by law.

You should not unduly rely on these forward-looking statements in this prospectus as they speak only as of the date of this prospectus. Except as required by law, we undertake no obligation to publicly release any revisions to these forward-looking statements to reflect events or circumstances occurring after the date of this prospectus or to reflect the occurrence of unanticipated events. See the information under the heading **Risk Factors** in this prospectus for some of the important factors that could affect our financial performance or could cause actual results to differ materially from estimates contained in forward-looking statements.

USE OF PROCEEDS

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We will not receive any proceeds from the sale of our common stock by the selling shareholders; however if all warrants to acquire our common stock being registered hereunder were to be exercised, we will realize cash proceeds of approximately \$3,359,856, which we expect to use for general working capital purposes.

We do not know if, or how many, of the warrants will be exercised. This is our best estimate of our use of proceeds generated from the possible exercise of warrants or options based on the current state of our business operations, our current plans and current economic and industry conditions. Any changes in the projected use of proceeds will be made at the sole discretion of our board of directors.

DILUTION

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The net tangible book value of our common stock on June 30, 2007 was approximately \$36,293,447 or \$1.23 per share. Net tangible book value per share represents the amount of our total tangible assets, less our total liabilities, divided by the total number of shares of our common stock outstanding. The number of shares of our common stock outstanding may be increased by shares issued upon payment of dividends, or exercise of options and warrants, and, to the extent options and warrants are exercised for cash, the net tangible book value

of our common stock may increase. If all the options and warrants for which the shares of our common stock that are issuable upon exercise of the options and warrants were exercised for cash, the net tangible book value of our common stock would be \$49,924,614 or approximately \$1.41 per share, excluding the effect of any other transactions occurring after June 30, 2007. Since we will not receive any of the proceeds from the sale of common stock sold under this prospectus, the net tangible book value of our common stock will not be increased as a result of such sales, nor will the number of shares outstanding be affected by such sales. Consequently, there will be no change in the net tangible book value per share of our common stock as a result of any sales under this prospectus. However, any dilution to new investors will represent the difference between the amount per share paid by purchasers of shares of our common stock from the selling stockholders in this offering and the net tangible book value per share of our common stock at the time of purchase.

MARKET PRICE OF COMMON STOCK

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our common stock trades on the American Stock Exchange under the symbol GPR . Our common stock is also listed on the Toronto Stock Exchange under the symbol GEP.s . On October 4, 2007, the last reported sale prices for our common stock on the American Stock Exchange and Toronto Stock Exchange were \$3.99 and \$4.00, respectively. The following table sets forth the high and low sale prices of our common shares as reported on the American Stock Exchange and the Toronto Stock Exchange and bid prices as quoted in the United States in the pink sheets over-the-counter market for the periods presented. Prior to the first quarter of 2006, there was no trading market for our common shares.

	American Stock Exchange (1)		Toronto Stock Exchange (2)		U.S. Pink Sheets	
	High	Low	High	Low	High	Low
2007

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

- (1) Our common stock commenced trading on the American Stock Exchange on February 15, 2007.

- (2) Our common stock is quoted in U.S. dollars on the Toronto Stock Exchange. Our common stock commenced trading on the Toronto Stock Exchange on March 30, 2006.

As of October 4, 2007, there were 577 holders of record of our common shares.

Over-the-counter market quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission, and may not necessarily represent actual transactions.

DIVIDENDS

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

On March 28, 2007, all outstanding shares of Series AA 8% Convertible Preferred Stock converted to common shares. Dividends on Series AA preferred stock are no longer payable. The holders of Series AA preferred stock were entitled to receive ratably such cash dividends, as were declared from time to time by the board of directors out of funds legally available therefor and, when declared, dividends were paid at the rate of \$0.28 per share per annum, paid on a calendar quarter basis. Prior to the conversion, we had declared and paid dividends on a quarterly basis with respect to all outstanding shares of Series AA preferred stock at the rate of \$0.28 per share per year from the time the Series AA stock was issued.

The holders of our common stock shall be entitled to receive ratably such lawful dividends as may be declared by the Board of Directors. We have never paid any dividends, whether cash or property, on our common stock. For the foreseeable future it is anticipated that any earnings which may be generated from our operations will be used to finance our growth and that dividends will not be paid to common stockholders.

SELECTED CONSOLIDATED FINANCIAL DATA

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The following selected consolidated financial data should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and the related notes to those statements included elsewhere in this prospectus. The consolidated statements of operations data for the years ended December 31, 2004, 2005 and 2006 and the balance sheet data as of December 31, 2005 and 2006 are derived from our audited consolidated financial statements included elsewhere in this prospectus. The consolidated statements of operations data for the years ended December 31, 2002 and 2003 and the balance sheet data as of December 31, 2002, 2003 and 2004 are derived from our audited consolidated financial statements not included in this prospectus. The selected consolidated statements of operations data for the six months ended June 30, 2006 and 2007 and the selected consolidated balance sheet data as of June 30, 2007 have been derived from our unaudited consolidated financial statements included elsewhere in this prospectus. The unaudited consolidated financial statements include, in the opinion of management, all adjustments that management considers necessary for the fair presentation of the financial information set forth in those statements. Historical results are not necessarily indicative of the results to be expected in the future, and the results for the six months ended June 30, 2007 should not be considered indicative of results expected for the full year.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS**

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The following discussion and analysis should be read in conjunction with accompanying financial statements and related notes included elsewhere in this prospectus. It contains forward looking statements that reflect our future plans, estimates, beliefs and expected performance. The forward looking statements are dependent upon events, risks and uncertainties that may be outside our control. Our actual results could differ materially from those discussed in these forward looking statements. Factors that could cause or contribute to such differences include, but are not limited to, market prices for natural gas and oil, economic and competitive conditions, regulatory changes, estimates of proved reserves, potential failure to achieve production from development drilling projects, capital expenditures and other uncertainties, as well as those factors discussed below and elsewhere in this prospectus, particularly in Risk Factors and Cautionary Notes Regarding Forward Looking Statements, all of which are difficult to predict and which expressly qualify all subsequent oral and written forward-looking statements attributable to us or persons acting on our behalf. In light of these risks, uncertainties and assumptions, the forward looking events discussed may not occur. We do not have any intention or obligation to update forward-looking statements included in this prospectus after the date of this prospectus, except as required by law.

Overview

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We are an oil and gas company in the business of exploring and developing oil and natural gas reserves on a worldwide basis. Since inception, we have conducted leasehold acquisition, exploration and drilling activities on our North American, Australian and Indonesian prospects. These projects currently encompass approximately 1.03 million gross (236,170 net) acres, consisting of mineral leases, production sharing contracts and exploration permits that give us the right to explore for, develop and produce oil and natural gas. Most of these properties are in the exploration, appraisal or development drilling phase and have not begun to produce revenue from the sale of oil and natural gas. Excluding minor interest and dividend income, our only significant cash inflows until 2003 were the recovery of capital invested in projects through sale or other divestiture of interests in oil and gas prospects to industry partners.

Since 2003, substantially all of our revenue has been generated from natural gas sales derived from the Magness #1, the Fannin#1, and the Mitchell#1 wells in the Madisonville Field in East Texas under spot gas purchase contracts at market prices. Natural gas sales from the Madisonville Field are expected to account for substantially all of our revenues for 2007. We expect the majority of our capital expenditures in 2007 to be the costs of drilling and completing wells in the Madisonville Field.

Revenue and Operating Trends in 2007

As discussed in the Properties Texas Madisonville Project section in this prospectus, in order to produce the gas reserves from the Rodessa Formation, we developed an onsite plan to treat and remove impurities from the Madisonville Project natural gas in order to meet pipeline-quality specifications. In 2003, the construction and installation of a natural gas treatment plant with a designed capacity of 18 million cubic feet of gas per day (MMcf/d) and associated pipeline and gathering facilities were completed. The treatment plant and associated pipeline and gathering facilities are owned by an unaffiliated third party.

In 2005 we secured a commitment from MGP to install and make operational additional treating facilities capable of treating 50 MMcf/d, which combined with the capacity of the current in-service treating facilities will represent a total designed treating capacity of 68 MMcf/d for the Madisonville treatment plant. In early October 2007, MGP completed the additional treating facilities and the additional treating capacity at such facilities is currently being phased in.

Upon completion of the phase-in, we expect to produce our Fannin Well and Mitchell Well at a higher rate as the well rate has previously been restricted due to capacity limitations in the gas treatment plant. The Mitchell Well was placed in production in June 2007. In addition, later in 2007 we expect to fracture stimulate the Wilson Well, and provided such stimulation is successful, we will place the Wilson Well on production.

In addition, our contract with MGP provides that for the first 18,000 Mcf/d of gas measured and delivered to the inlet flange of the gas treatment plant, MGP will receive a treating fee of \$1.50 per thousand cubic feet (Mcf) (this fee is presently \$1.55 per Mcf adjusted for inflation). For any gas volumes in excess of 18,000 Mcf/d of gas delivered to the inlet flange of the gas treatment plant, the treating fee received by MGP is reduced from \$1.50 to \$1.10 per Mcf (\$1.14 per Mcf adjusted for inflation). We record our revenues net of these treating fees. Thus, if we are able to increase our inlet production volumes over 18 MMcf/d on a sustained basis, we expect to experience a disproportionately higher increase in revenue due to lower average treating fees per Mcf.

While there can be no assurance, the higher production rates from our wells combined with the lower average treating fees per Mcf, may result in higher net production and increased revenue during later periods in 2007 as compared to the second quarter of 2007 and prior periods.

Industry Overview for the six months ended June 30, 2007

The six months ended June 30, 2007 saw strengthening natural gas prices. The Houston Ship Channel price, the index price prevailing in the locale of our Madisonville Project in Madison County, Texas, as quoted in Gas Daily as of June 29, 2007, was \$6.66 versus \$5.40 as of December 29, 2006. Natural gas prices improved during the quarter due to higher demand induced by cold temperatures experienced in many parts of the United States, among other factors.

Comparison of Results of Operations for six months ended June 30, 2007 and 2006

During the six months ended June 30, 2007, we had oil and natural gas revenues of \$4,212,192. Our net production was 1,108,338 Mcf of natural gas at an average price of \$3.80 per Mcf. During the six months ended June 30, 2006, we had oil and natural gas revenues of \$3,467,517. Our net production for the six months ended June 30, 2006 was 1,084,684 Mcf at an average price of \$3.19 per Mcf. Revenues increased in the six months ended June 30, 2007 as compared to the prior year period due to higher gas prices and 2% higher production volumes. Prices were approximately 19% higher for the six months ended June 30, 2007 versus the same period in 2006.

During the six months ended June 30, 2007, we incurred lease operating expense of \$846,107. Our average lifting cost for the 2007 period was \$0.76 per Mcf. During the six months ended June 30, 2006, we incurred lease operating expense of \$717,929. Our average lifting cost for the 2006 period was \$0.66 per Mcf. The higher average lifting cost for the six months ended June 30, 2007 was due to a workover performed on the Magness well and higher production taxes attributable to the Fannin and Mitchell wells.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

During the six months ended June 30, 2007, we incurred net profits interest expense of \$428,588 associated with the Magness, the Fannin, and the Mitchell wells as compared to \$360,471 during the six months ended June 30, 2006. The 19% increase resulted from higher gas prices as well as slightly higher production volumes in the six months ended June 30, 2007 versus 2006.

General and administrative expenses for the six months ended June 30, 2007 were \$1,526,919 compared to \$1,287,620 for the six months ended June 30, 2006. This represents a \$239,299 increase over the prior year period due primarily to U.S. and Canada public company filing fees, and costs associated with our SEC registration statement, listing on the American Stock Exchange and ongoing filing requirements.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Depreciation, depletion and amortization expense (DD&A) for the six months ended June 30, 2007 was \$1,229,870 as compared to \$1,106,162 in the same period of 2006, which amounts primarily represent amortization of the U.S. full cost pool for the six months ended June 30, 2007 and 2006, respectively. The increase was due to higher net production in the six months period of 2007 and an increase in the amount of capitalized cost in the U.S. full cost pool.

Earnings from operations totaled \$180,708 for the six months ended June 30, 2007 as compared to loss from operations of \$4,665 for the six months ended June 30, 2006. The increase in the income from operations was due primarily to higher gas prices as well as slightly higher production volumes in the six months ended June 30, 2007 versus 2006.

Other income for the six months ended June 30, 2007 and 2006 consisted of interest income in the amount of \$56,201 and \$91,894, respectively. The reason for the decreased interest income was lower average cash and cash equivalent balances during the 2007 period as compared to 2006 period.

During the six months ended June 30, 2007 and 2006, we incurred interest expense of \$178,445 and \$126,030, respectively. The higher interest expense in the current period was due to short-term borrowings which were incurred in 2007 to complete the Mitchell well as well as a workover performed on the Magness well.

Net income before taxes for the six months ended June 30, 2007 was \$58,464 as compared to net loss before taxes of \$38,801 for the six months ended June 30, 2006. The increase in net income during the six months ended June 30, 2007 was primarily due to higher gas prices as well as slightly higher production volumes in the six months ended June 30, 2007 versus 2006.

Income tax expense for the six months ended June 30, 2007 was \$2,300 compared to \$21,291 in the same period of 2006. Income tax expense in 2006 was more than 2007 due to estimated 2005 tax return recorded in 2006.

Industry Overview for the Year Ended December 31, 2006

The year 2006 saw softening natural gas prices. The Houston Ship Channel price, the index price prevailing in the locale of our Madisonville Project in Madison County, Texas, as quoted in Gas Daily as of December 29, 2006, was \$5.40 versus \$7.80 as of December 31, 2005. In the year of 2005, the natural gas prices were strong as a result of hurricane related supply disruptions and generally tight supplies of natural gas in the United States. Availability of capital, particularly equity capital for junior oil and natural gas companies, continued to show improvement in 2006. As a result of the initial public offering in Canada in March 2006, we were able to drill two wells in our Madisonville Project during 2006.

Company Overview in 2006

Our net loss after taxes for the year ended December 31, 2006 was \$1,011,806. From our inception, through mid-2003, we only received nominal revenues from our oil and natural gas activities, while incurring substantial acquisition and exploration costs and overhead expenses which have resulted in an accumulated deficit through December 31, 2006 of \$10,393,985. Commencing in May 2003, we placed our Madisonville Project into production. Substantially all of our oil and natural gas sales for the year ended December 31, 2006 were derived from our Madisonville Project, from two producing wells, the UMC Ruby Magness #1 well (the Magness Well) and the Angela Farris Fannin #1 well (the Fannin Well).

Comparison of Results of Operations for the twelve months ended December 31, 2006 and 2005

During the twelve months ended December 31, 2006, we had oil and natural gas revenues of \$6,716,360. Our net production was 2,229,059 thousand cubic feet (Mcf) of natural gas at an average price of \$3.01 per Mcf. During the twelve months ended December 31, 2005, we had oil and natural gas revenues of \$7,975,990. Our net production for the twelve months ended December 31, 2005 was 1,991,105 Mcf at an average price of \$4.01 per Mcf. Revenues decreased in the twelve months ended December 31, 2006 as compared to the prior year period due to lower gas prices in spite of 12% higher production volumes. Prices were approximately 25% lower for the twelve months ended December 31, 2006 versus the same period in 2005.

During the twelve months ended December 31, 2006, we incurred lease operating expenses of \$1,602,932. Our average lifting cost for the 2006 period was \$0.72 per Mcf. During the twelve months ended December 31, 2005, we incurred lease operating expenses of \$878,176. Our average lifting cost for the 2005 period was \$0.44 per Mcf. The higher average lifting cost in 2006 was due to higher lease operating costs and production taxes attributable to the Fannin #1 well. The primary reason for the increase in average lifting cost per Mcf were increases in production costs related to the Fannin #1 well which was placed in production in March 2006. The production for the Magness and the Fannin wells is at present limited to the current treatment plant's capacity of up to 18,000 Mcf/d. Therefore, the production from the Fannin #1 and the Magness #1 wells is limited to a rate that is below the combined productive flow capability of the wells. A majority of the lease operating costs are fixed costs such as chemical treatments for the wells, insurance, ad valorem tax, and salaries paid to the field personnel. During the twelve months ended December 31, 2006, the total lease operating costs for the Magness #1 well were \$752,924 versus \$878,176 in the same period of 2005. The net production of the Magness #1 well was 1,155,840 Mcf for the twelve months ended December 31, 2006 compared to 1,991,105 Mcf in same period of 2005. Some of the production decrease is attributable to natural declines and some of the decrease is attributable to the fact that the Magness #1 well shared the treating capacity of the treatment plant with the Fannin #1 well in 2006 whereas in the comparable 2005 period it did not. As a result, the average lifting cost for Magness #1 well was \$0.65 per Mcf for the twelve months ended December 31, 2006 versus \$0.44 per Mcf in the same period of 2005. The Fannin #1 well's average lifting cost was higher than the Magness #1 well due mainly to the severance tax of \$230,600 which was incurred on the Fannin #1 well for the twelve months ended December 31, 2006. The Magness #1 well is exempt from the severance tax. The average lifting cost for the Fannin #1 well was \$0.79 per Mcf for the twelve months ended December 31, 2006.

During the twelve months ended December 31, 2006, we incurred net profits interest expense of \$632,708 associated with the Magness and Fannin wells as compared to \$856,837 during the twelve months ended December 31, 2005. The 26% decrease resulted from lower net revenues from the wells in the twelve months ended December 31, 2006 versus 2005. The net profits interest is 12.5% of the net operating profits from our Magness and Fannin wells.

General and administrative expenses for the twelve months ended December 31, 2006 were \$2,347,447 compared to \$1,551,747 for the twelve months ended December 31, 2005. This represents a \$795,700 increase over the prior year period due to primarily to:

1. \$198,000 of stock based compensation,

2. a \$265,000 increase in directors and officers liability insurance,
3. \$48,000 in filing fees related to our public listing on the Toronto Stock Exchange; and
4. \$285,000 in legal, audit, printing and filing fees associated with the S-1 registration statement which was prepared for the resale of some of our common stock.

For the year ended December 31, 2006, impairment expense was incurred in amount of \$38,849 as compared to \$0 in the same period of 2005. The 2006 impairment write-downs were associated with the Canadian cost pool. The remaining costs of drilling a dry hole in Canada of \$38,849 were expensed in 2006.

Depreciation, depletion and amortization expense (DD&A) for the twelve months ended December 31, 2006 was \$2,406,612 as compared to \$1,832,693 in the same period of 2005, which amounts represent amortization of the U.S. full cost pool for the twelve months ended December 31, 2006 and 2005, respectively. The increase was due to higher net production in the twelve months period of 2006 and an increase in the amount of capitalized cost in the U.S. full cost pool.

Loss from operations totaled \$312,188 for the twelve months ended December 31, 2006 as compared to income from operations of \$2,856,537 for the twelve months ended December 31, 2005. The decrease in the income from operations was due primarily to lower gas prices, higher lease operating expenses, and higher G&A expenses.

Other income for the twelve months ended December 31, 2006 and 2005 consisted of interest income in the amount of \$198,050 and \$18,969, respectively. The reason for the increased interest income was higher average cash and cash equivalent balances during 2006 period as compared to 2005 period resulting from net proceeds received from common stock offerings completed by us in 2006.

During the twelve months ended December 31, 2006 and 2005, we incurred interest expense of \$306,682 and \$217,768, respectively. The higher interest expense in the current year period was due to \$194,691 in expense related to the amortization of debt issuance costs in connection with a debt financing in January 2006 consisting of: (i) the fair market value assigned to common stock warrants issued, and (ii) a loan origination fee paid.

Net loss before taxes for the twelve months ended December 31, 2006 was \$420,820 as compared to net income before taxes of \$2,657,738 for the twelve months ended December 31, 2005. The loss incurred during 2006 was primarily due to lower gas income, higher lease operating expenses as well as higher general and administrative costs.

Income tax expense for the twelve months ended December 31, 2006 was \$61,586 compared to \$17,267 in the same period of 2005. The increased income tax expense was due to 2005 alternative minimum tax paid in 2006.

Industry Overview for the Year Ended December 31, 2005

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The year 2005 saw continued strong natural gas prices as a result of hurricane related supply disruptions and generally tight supplies of natural gas in the United States. The Houston Ship Channel price, the index price prevailing in the locale of our Madisonville Project in Madison County, Texas, as quoted in Gas Daily as of December 31, 2005, was \$7.80 versus \$5.82 as of December 31, 2004. Availability of capital, particularly equity capital for junior oil and natural gas companies, continued to show improvement in 2005, and in 2005, we raised \$4,727,824 net of issuance costs through equity financing transactions. As a result, and through the sale of one of our Indonesian property interests, we were able to repay our indebtedness of \$1.7 million to various creditors and improve our capital position during 2005.

During 2005, we received a weighted average net price of \$4.01 per mcf of gas sold. As further discussed under Properties Texas Madisonville Project , we receive revenue for our gas sales net of certain costs to treat and transport the gas. The weighted average gross price during 2005, prior to the deduction of the treating and transportation costs, was \$6.81. This compares to \$7.80 which was the price prevailing on the last day of 2005.

Company Overview in 2005

Our net income for the year ended December 31, 2005 was \$2,640,471. From our inception to 2003, we only received nominal revenues from our oil and natural gas activities, while incurring substantial acquisition and exploration costs and overhead expenses which resulted in our sustaining an accumulated deficit through December 31, 2005 of \$9,382,179. We placed our Madisonville Project into production in May 2003. Substantially all of our oil and natural gas sales for the year ended December 31, 2005 were derived from our Madisonville Project, from one producing well, the Magness #1 well.

Comparison of Results of Operations for the twelve months ended December 31, 2005 and 2004

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

During the year ended December 31, 2005, we had oil and natural gas revenues of \$7,975,990. Our net production was 1,991,105 thousand cubic feet (Mcf) of natural gas at an average price of \$4.01 per Mcf. During the year ended December 31, 2004, we had oil and natural gas revenues of \$5,825,072. Our net production for the year ended December 31, 2004 was 2,316,895 Mcf at an average price of \$2.51 per Mcf. Revenues increased in the year ended December 31, 2005 as compared to the prior period due to higher gas prices. Average prices in 2005 were 60% higher than 2004, more than offsetting the 14% drop in production from 2004 to 2005. Production was lower due to normal declines associated with the production of reserves from the Magness #1 well.

During the year ended December 31, 2005, we incurred lease operating expenses of \$878,176. Our average lifting cost for this period was \$0.44 per Mcf. During the year ended December 31, 2004, we incurred lease operating expenses of \$780,237. Our average lifting cost for this period was \$0.34 per Mcf. The primary reasons for the increase in average lifting cost per Mcf were increases in costs and lower net production. The increase in lease operating costs was due primarily to higher insurance premiums, approximately \$40,000, and higher costs of chemical treatments, approximately \$60,000 associated with the Magness #1 well.

During the year ended December 31, 2005, we incurred net profits interest expense of \$856,837 associated with the Magness Well compared to \$579,590 during the year ended December 31, 2004. The increase resulted from higher revenues associated with the Magness Well in 2005 versus 2004.

General and administrative expenses for the year ended December 31, 2005 were \$1,551,747 compared to \$1,963,649 for the year ended December 31, 2004. This represents a \$411,902 decrease over the prior year period due to stock based compensation incurred in 2004. During 2004 we issued 500,000 shares of our common stock for cash proceeds of \$500,000 in connection with the exercise of stock options by an officer and director. Concurrent with the exercise of stock options, the officer sold 117,647 shares of common stock to us at the estimated fair market value price prevailing at that time of \$4.25 per share. We recorded compensation expense of \$500,000 in connection with the purchase of stock.

Depreciation, depletion and amortization expense for the year ended December 31, 2005 was \$1,832,693 compared to \$2,077,004 in the year ended December 31, 2004, which amounts represent amortization of the U.S. full cost pool for the year ended December 31, 2005 and 2004, respectively. The decrease was due to lower net production in 2005 as well as an upward revision in net proved reserve estimates during the year.

For the year ended December 31, 2005, no impairment expense was incurred as compared to \$2,038,422 for the year ended December 31, 2004. The 2004 impairment write-downs were associated with the Canadian and Australian cost pools. We expensed the costs of drilling dry holes in those areas during 2004 while no such costs associated with unsuccessful wells were incurred in 2005.

Earnings from operations totaled \$2,856,537 for the year ended December 31, 2005 compared to a loss of \$1,613,830 for the year ended December 31, 2004. The increase in the earnings from operations was due primarily to higher revenues associated with the Magness Well.

Other income for the year ended December 31, 2005 and 2004 consisted of interest income in the amount of \$18,969 and \$6,548, respectively. The reason for the increase was higher average cash and cash equivalents balances for the 2005 period as compared to 2004.

During the year ended December 31, 2005 and 2004, we incurred interest expense of \$217,768 and \$402,958, respectively. The lower interest expense in the current year period was due to lower average debt levels. In March 2004, we incurred a cash finders fee of \$67,375 to a director associated with the negotiation of a reduction in debt through the conversion of \$1,347,500 of long-term debt to equity.

Net income after taxes for the year ended December 31, 2005 was \$2,640,471 compared to net loss of \$2,077,615 for the year ended December 31, 2004. The increase in net income was primarily due to higher revenues associated with the Magness Well and the impairments expense recorded in the previous period.

Industry Overview for the Year Ended December 31, 2004

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The year 2004 saw continued strong natural gas prices as a result of tight supplies of natural gas in the United States. The Houston Ship Channel price, the index price prevailing in the locale of the Madisonville Project, as quoted in Gas Daily as of December 30, 2004, was \$5.82 versus \$5.76 as of December 31, 2003. Availability of capital, particularly equity capital for junior oil and natural gas companies, continued to show improvement in 2004 and in 2004, we raised \$3,479,899 net of issuance costs through equity financing transactions.

Revenue Trend in 2004

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The results of operations for the year ended 2004 reflected a full year of production revenues from the Madisonville Project where we had one well on production. Substantially all of our oil and natural gas sales for the year ended December 31, 2004 were derived from our Madisonville Project in Madison County, Texas.

Comparison of Results of Operations for the Years ended December 31, 2004 and 2003

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

During the year ended December 31, 2004, we had oil and natural gas revenues of \$5,825,072. Our net production was 2,316,895 Mcf at an average price of \$2.51 per Mcf. During the year ended December 31, 2003, we had oil and natural gas revenues of \$2,452,648. Our net production was 1,217,327 Mcf at an average price of \$2.01 per Mcf for 2003.

During the year ended December 31, 2004, we incurred lease operating expenses of \$780,237. Our average lifting cost for this period was \$0.34 per Mcf. During the year ended December 31, 2003, we incurred lease operating expenses of \$582,889. Our average lifting cost for this period was \$0.48 per Mcf. The reason for the significant decrease in average lifting cost per Mcf was that the Magness Well experienced significantly higher production volumes in 2004 versus 2003.

During the year ended December 31, 2004, we incurred net profits interest expense of \$579,590 associated with the Magness Well compared to \$225,869 in 2003. This was due to higher revenues associated with the Magness Well in 2004 versus 2003.

General and administrative expenses for the year ended December 31, 2004 were \$1,963,649 compared to \$1,259,269 for 2003. This represents a \$704,380 or a 56% increase over the prior year period. The primary reason for the increase was a \$500,000 non-cash charge associated with stock-based compensation. During 2004 we issued 500,000 shares of our common stock for cash proceeds of \$500,000 in connection with the exercise of stock options by an officer and director. Concurrent with the exercise of stock options, the officer sold 117,647 shares of common stock to us at the estimated fair market value price at that time of \$4.25 per share. We recorded compensation expense of \$500,000 in connection with the purchase of stock. The balance of the increase was due to additional employees and salary increases.

Depreciation, depletion and amortization expense for the year ended December 31, 2004 was \$2,077,004 compared to \$798,555 for 2003, substantially all of which represents amortization of the U.S. full cost pool for the respective periods. The increase was due to higher depletion expense associated with the Magness Well due to higher production in 2004 versus 2003.

For the years ended December 31, 2004 and 2003, we incurred impairment expense of \$2,038,422 and \$473,496, respectively. The 2004 impairment write-downs were associated with the Canadian and Australian cost pools while the 2003 impairment write-down was due to the expiration of Permit #386 in Australia. We expensed the costs of drilling dry holes in Canada and Australia during 2004. The impairment charge in 2003 relates to the costs capitalized in connection with an exploration permit which expired during 2003.

Loss from operations totaled \$1,613,830 for the year ended December 31, 2004 compared to a loss of \$887,430 for 2003. The increase in the loss from operations was due to higher impairments and depletion expenses.

Other income for the year ended December 31, 2004 and 2003 consisted of interest income in the amount of \$6,548 and \$4,769, respectively. The reason for the increase was higher average cash and cash equivalents balances for the 2004 period as compared to 2003.

During the years ended December 31, 2004 and 2003, we incurred interest expense of \$402,958 and \$802,031, respectively. The higher interest expense in the prior year period was due to short-term borrowings which were incurred to drill and complete the injection well and equipment for production of the Magness Well. In 2004, we incurred debt conversion expense of \$67,375 associated with the conversion of \$1,347,500 of long-term debt to equity.

Net loss for the year ended December 31, 2004 was \$2,077,615 compared to a loss of \$1,684,692 for the year ended December 31, 2003. The increase in net loss was primarily due to higher impairments and depletion.

Recent Developments

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

On August 13, 2007, we sold, pursuant to a private placement, 2,002,599 units of our securities at a price of \$3.85 per unit for total gross proceeds of \$7,710,006. Each unit consists of one share of common stock and a warrant to purchase three-tenths of a common share. Each one whole warrant shall entitle the holder to acquire one share of common stock at a price of \$4.50 per share for a period of five years from the closing date. The units were purchased by a small number of accredited investors. We agreed to file a resale registration statement covering the common shares sold in the placement. The gross proceeds of the sale of common shares will be used to fund the Company's exploration and development program and for general working capital purposes.

Under the terms of a registration rights agreement in connection with the private placement, we must pay the holders of the registrable securities issued in the private placement liquidated damages if a registration statement is not filed in conjunction with the private placement with the U.S. Securities and Exchange Commission (SEC) within 60 days of the closing of the private placement (August 13, 2007). In addition, we must pay the holders of the registrable securities liquidated damages in the event a registration statement that was filed in conjunction with the private placement has not been declared effective by the U.S. Securities and Exchange Commission (SEC) within 180 days of the closing of the private placement (August 13, 2007). We must pay as liquidated damages a number of shares of common stock equal to 1.0% of the number of shares of our common stock (including common stock underlying warrants) that were issued to the holder for each 30-day period (pro-rated on a daily pro-rata basis for periods shorter than 30 days) that the above conditions are not met, not to exceed 10% of the aggregate number of shares of common stock issued to such holder.

In February 2007, we borrowed \$900,000 pursuant to three promissory notes bearing interest at 8% per annum. The notes mature on October 31, 2007. In connection with these notes, we paid loan origination fees totaling \$27,000 and issued warrants to the Noteholders to purchase 45,000 shares of our common stock at \$3.50 per share through February 2009.

In February 2007, we received an extension of the maturity date of our promissory note for \$1,000,000 payable to Pine Hill Capital, LLC to October 31, 2007. In connection with the extension, we paid a loan extension fee of \$30,000 and issued a warrant to purchase 50,000 shares of our common stock at \$3.50 per share which expires in February 2009. If we do not repay the note by October 31, 2007, we are required to dedicate 5% of our net cash flow from the Madisonville Project located in Madison County, Texas, toward the unpaid principal and all accrued and unpaid interest on the note, until all such amounts are paid in full. Net cash flow for this purpose means gross revenues, less royalties, production taxes and net profits interest expense.

In February 2007, Stuart J. Doshi, President and CEO, loaned \$100,000 to us pursuant to a promissory note bearing interest at 8% per annum, payable upon demand. We repaid the note plus accrued interest on March 28, 2007.

On June 7, 2006, we loaned \$1,000,000 to G. Carter Sednaoui, a 5% shareholder at the time of the loan, evidenced by a full-recourse short-term promissory note with a maturity date of March 31, 2007. On March 30, 2007, we extended the maturity date of the note to June 30, 2007. On June 29, 2007, we received full payment of the note plus accrued interest.

On March 28, 2007, all 1,890,710 of our outstanding shares of our Series AA Stock automatically converted into 1,890,710 shares of our common stock. Under our Amended and

Restated Articles of Incorporation, the Series AA stock automatically converts into common shares on a one-for-one share basis effective the first trading day after the reported high selling price for our common shares is at least \$5.25 per share for any consecutive ten trading days, which condition was met on March 27, 2007. As a result of the conversion of our Series AA stock to common stock on March 28, 2007, dividends on the Series AA Stock ceased accruing on December 31, 2006. In 2006, dividends paid on the Series AA Stock totaled \$529,400.

On April 25, 2007, May 9, 2007, and June 13, 2007, J. Chris Steinhauser, an officer and director, exercised warrants to purchase 80,000, 70,000 and 33,333 shares of common stock at an exercise price of \$2.00, \$2.00 and \$4.00 per share, respectively. The warrants were granted on June 18, 2000 and had expiration dates of between June 18 and June 30, 2007.

On May 11 and May 14, 2007, we issued 12,357 and 25,000 shares of common stock at an exercise price of \$3.50 per share in connection with exercises of outstanding warrants.

On June 20, 2007, we agreed to sell and transfer all of our remaining property interests in Australia to an unrelated party for cash consideration and a Petroleum Sales Royalty Payment equal to 25% of the future annual earnings before interest, taxes, depreciation and amortization from the property interests. The agreement is subject to satisfaction of certain terms and conditions. Specifically, the agreement provides that we will be paid consideration for the sale and transfer of our property interests as follows:

1. Initial cash consideration of \$175,000 subject to certain closing conditions;
2. a second cash payment of \$175,000 upon a successful flow test of petroleum from a well located on the property interests. A successful flow test is defined for purposes of this agreement to be a test of at least 7 million standard cubic feet of natural gas for a continuous and uninterrupted 24 hour period (or an equivalent oil/condensate rate based on a conversion ratio of 6000 cubic feet of gas to a barrel of oil or condensate); and,
3. a Petroleum Sales Royalty Payment equal to 25% of the future annual earnings before interest, taxes, depreciation and amortization from the property interests up to a total amount of \$2,200,000.

On June 21, 2007, we entered into a participation agreement wherein we acquired a 50% non-operated working interest in the Goodwin Prospect, which is located in the Central Alberta Basin, Canada. We can earn a total of 12,000 acres by the drilling of wells. Subsequent to June 30, 2007, we advanced US \$494,677 to be applied toward the drilling and completion of the first well in the prospect, the Nexstar Goodwin 16-19-58-12 Well as well as US \$21,193 towards the acquisition of additional leases in the Goodwin Prospect.

Liquidity and Capital Resources

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We had a working capital deficit of \$590,515 versus \$1,238,261 at June 30, 2007 and December 31, 2006, respectively. Our working capital increased during six months ended June 30, 2007 due primarily to higher oil and gas income for the six months ended June 30, 2007 in spite of increase costs associated with our SEC registration, our listing on the American Exchange and the Mitchell well s hookup costs.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We have historically financed our business activities through June 30, 2007 principally through issuances of common shares, promissory notes and common stock purchase warrants in private placements. These financings, since 2004, are summarized as follows:

	Six Months Ended June 30, 2007 (unaudited)	2006	Years Ended December 31,	
			2005	2004
Cash flows from Financing Activities:				
Proceeds from sale of common shares, option and warrant exercises, net	620,644	16,717,604	4,727,824	3,479,899
Payments of preferred dividends		(529,400)	(529,397)	(529,363)
Proceeds from promissory notes, net	1,000,000	1,900,000		2,075,000
Payment of loan fee	(57,000)	(30,000)		
Repayments of promissory notes	(100,000)	(900,000)	(4,781,807)	(1,158,569)
Deferred offering costs		(1,213,789)	(730,906)	(150,255)
Purchase of treasury stock			(592,435)	
Net cash provided by (used in) financing activities	\$ 1,463,644	\$ 15,944,415	\$ (1,906,721)	\$ 3,716,712

The net proceeds of our financings have been primarily invested in oil and natural gas properties totaling \$1,430,493, \$16,721,944, \$5,602,741, and \$9,171,589 for the six months ended June 30, 2007 and for the years ended December 31, 2006, 2005, and 2004, respectively.

On May 31, 2005, we paid the remaining balance of \$962,780 plus accrued but unpaid interest of \$4,431 on a note to G. Carter Sednaoui dated July 19, 2004. See Certain Relationships and Related Party Transactions.

In October 2005, we sold our 40% interest in C-G Yapen for cash proceeds of \$2.4 million. Our cost basis in C-G Yapen was \$698,000. The sale of the interest was recorded as a reduction of the capitalized cost pool for the Indonesian properties. We utilized the cash proceeds to repay indebtedness during the fourth quarter of 2005. On October 27, 2005, we repaid the remaining principal balance of \$1,260,292 plus accrued but unpaid interest of \$8,287 on the Rolling Hill Promissory Note dated October 18, 2002, as well as the unsecured promissory note dated September 30, 2004 with a remaining principal balance of \$475,000 and accrued but unpaid interest of \$9,058 to Patricia S. Cayce. See Certain Relationships and Related Party Transactions.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our cash balance at June 30, 2007 was \$2,702,934 compared to a cash balance of \$734,561 at December 31, 2006. The change in the Company's cash balance is summarized as follows:

Cash balance at December 31, 2006	\$	734,561
Sources of cash:		
Cash provided by operating activities		941,103
Cash provided by financing activities		1,463,644
Cash provided by payment of notes receivable		1,000,000
Total sources of cash including cash on hand		4,139,308
Uses of cash:		
Cash used in investing activities:		
Oil and natural gas property expenditures		(1,430,493)
Furniture, fixtures and equipment		(5,881)
Total uses of cash		(1,436,374)
Cash balance at June 30, 2007	\$	2,702,934

During January and February 2006, we conducted a private placement of common shares to accredited investors. We issued 927,314 common shares at \$3.50 per share for gross cash proceeds of \$3,245,600 (net of \$3,123,408).

On January 31, 2006, we borrowed \$1,000,000 from Pinehill Capital Inc. pursuant to an 8% promissory note with a maturity date of January 31, 2007. We issued 150,000 shares at \$3.50 per share of no par voting common stock warrants, immediately exercisable with an expiration date on January 31, 2009 to Pinehill Capital Inc., as well as a \$30,000 loan origination fee. The fair market value of the warrants on the date of issuance, \$182,390, as well as the \$30,000 loan origination fee, was recorded as a debt discount and is being amortized over the life of the promissory note. On February 1, 2007, the maturity date was extended to October 31, 2007. We paid \$80,000 accrued interest thru January 31, 2007. In connection with the extension, we paid a loan extension fee of \$30,000 and granted a three-year warrant exercisable to purchase 50,000 Common Shares at \$3.50 per share. The fair value of the warrants on the date of issuance, \$57,242, together with the \$30,000 loan extension fee, were recorded as a debt discount and are being amortized over the life of the promissory note. As of June 30, 2007, the unamortized debt discount was \$38,774. In the event this note is not repaid by the maturity date, and unless an extension thereof is mutually agreed to, then we have agreed that we shall dedicate 5% of our net cash flow from the Madisonville Field toward the unpaid principal amount and all accrued and unpaid interest thereon, until such amounts are paid in full. Net cash flow for purposes of this provision means gross revenues received by us less royalties, production taxes and net profits interest expense.

On March 30, 2006, we completed an initial public offering pursuant to a final prospectus under the securities laws of each of the provinces of Canada, which consisted of 3,730,021 common shares from our treasury at an issue price of \$3.50 per common share and 519,500 common shares issued on a flow-through basis under the *Income Tax Act* of Canada at an issue price of \$3.85 per common share for aggregate gross proceeds of \$15,055,149. We used the net proceeds of the offering to fund development drilling of proven and probable natural gas reserves associated with the Madisonville Project and to conduct exploration and appraisal activities on our other projects in the United States, Canada and Indonesia.

It is required that we expend \$2,000,075 of the proceeds realized from the Canadian offering from the issuance of 519,500 flow-through shares toward Canadian exploration expense pursuant to Canadian tax law. Canadian exploration expense generally means, but is not limited to, the drilling of exploratory wells in Canada. Pursuant to the terms of our agreement with the subscribers of the flow-through shares, we must renounce the tax deductions which would result from these expenditures and pass the deductions through to the holders of these shares. We must incur these expenditures by the end of our fiscal year ended December 31, 2007.

Our current cash and cash equivalents and anticipated cash flow from operations may not be sufficient to meet our working capital, capital expenditures and growth strategy requirements for the foreseeable future. See Outlook for 2007 for a description of our expected capital expenditures for 2007. If we are unable to generate revenues necessary to finance our operations over the long-term, we may have to seek additional capital through the sale of our equity or borrowing. As noted in Recent Developments, we periodically borrow funds pursuant to short term promissory notes to finance our activities Contractual Obligations

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

A summary of our contractual obligations as of December 31, 2006 is provided in the following table.

Contractual Obligations at December 31, 2006	Payments Due By Period(6)				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Operating lease obligations(1)	\$ 168,256	\$ 76,856	\$ 91,400	\$ 0	\$ 0
Production sharing contract(2)	120,000	120,000	0	0	0
Madisonville Field drilling obligation(3)	10,000,000	0	10,000,000	0	0
Cook Inlet Alaska work program(4)	3,568,063	0	3,568,063	0	0
Canadian flow-through shares(5)	2,000,075	2,000,075	0	0	0
Total	\$ 15,856,394	\$ 2,196,931	\$ 13,659,463	\$ 0	\$ 0

- (1) Lease for our principal executive office located at One Maritime Plaza, Suite 700, San Francisco, CA 94111.

- (2) We have work program commitments associated with our participation net to our 12% working interest in the Bengara II PSC (production sharing contract) in Indonesia. These work program commitments must be met in order to maintain the production sharing contract in effect.

- (3) In order to facilitate the expansion of the gas treatment plant in our Madisonville Project, we are subject to a drilling commitment. The commitment, subject to events of force majeure, including, but not limited to rig availability, requires us to commence the drilling of a well sufficient to test the Smackover Formation (estimated to be encountered at approximately 18,000 feet) on or before September 30, 2008. The commitment is not discretionary. We have granted MGP a security interest in the Madisonville Field properties to secure the commitment. The security interest shall be subordinated to any third party lender in the event we secure future debt against the property. MGP granted us a security interest in the Madisonville Field Gas Treatment Plant to secure their obligation to expand the capacity of the facilities.

- (4) Within three years from the date of receipt of legally sufficient assignment of the 100% working interest in the leases in our Cook Inlet Alaska CBM Project, we have the option to conduct a \$2.5 million work program consisting of, but not limited to, a multiple test well drilling program on the leases over a three-year period, and, after completion of the work program and an evaluation of the results, to remit the final additional acreage consideration of \$10 per acre for the leases estimated at approximately \$1,068,000. The Cook Inlet Option provides that if we fail to pay the lease consideration when due, fail to perform the work program or otherwise default under the Cook Inlet Option, we shall forfeit our interest and reassign the leases to Pioneer with no further liability to us.

- (5) It is required that we expend \$2,000,075 of the proceeds realized from the Canadian offering from the issuance of 519,500 flow-through shares toward Canadian exploration expense pursuant to Canadian tax law. Canadian exploration expense generally means, but is not limited to, the drilling of exploratory wells in Canada. Pursuant to the terms of our agreement with the subscribers of the flow-through shares, we must renounce the tax deductions which would result from these expenditures and pass the deductions through to the holders of these shares. We must incur these expenditures by the end of our fiscal year ended December 31, 2007.

- (6) This table does not include the liability for dismantlement, abandonment and restoration costs of oil and gas properties. Effective with the adoption of SFAS No. 143, Accounting for Asset Retirement Obligations, we recorded a separate liability for the fair value of this asset retirement obligation. See Note 2 of the Notes to Consolidated Financial Statements for further discussion.

In addition to the above future commitments, our 12% owned subsidiary, C-G Bengara, is subject to prior work commitments for the ten-year period ended December 3, 2007 requiring total expenditures of \$25 million in the Indonesian contract area known as the Bengara Block. As of July 31, 2007, C-G Bengara had met approximately \$12.8 million of the \$25.0 million required expenditures, leaving an approximate \$12.2 million shortfall. BP Migas, the applicable governing authority, has granted a deferral of the prior years' commitments. On September 29, 2006, we sold to CNPC 70% of our shareholding in our C-G Bengara subsidiary and our interest in the Bengara Block, reducing our interest from 40% to 12%. Per the terms of the agreement, CNPC deposited an \$18.7 million earning obligation into a C-G Bengara account jointly controlled by CNPC, Continental and us. The funds are being used exclusively to pay for 2007 exploration appraisal drilling in the 900,000 Bengara Block in East Kalimantan, Indonesia. The earning obligation funds of \$18.7 million, together with the \$6.3 million previously spent prior to September 29, 2006, will satisfy all of the past and future work commitments on the Bengara Block.

Other than the above commitments, the timing of most of our capital expenditures is discretionary. We have no other material long-term commitments associated with our capital expenditure plans or operating agreements. Consequently, we have a significant degree of flexibility to adjust the level of such expenditures as circumstances warrant. The level of capital expenditures will vary in future periods depending on the success we experience on planned exploratory and appraisal drilling activities, natural gas and oil price conditions and other related economic and political factors. Accordingly, we have not yet prepared an estimate of capital expenditures for periods beyond 2007.

Consequently, we have a significant degree of flexibility to adjust the level of such expenditures as circumstances warrant. The level of capital expenditures will vary in future periods depending on the success we experience on planned exploratory and appraisal drilling activities, natural gas and oil price conditions and other related economic and political factors. Accordingly, we have not yet prepared an estimate of capital expenditures for periods beyond 2007.

Income Taxes

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

As of December 31, 2006, we had net operating loss (NOL) carryforwards of approximately \$22,932,000 for federal income tax purposes beginning to expire in 2010 and \$10,926,000 for state income tax purposes which began to expire in 2006.

A significant change in our ownership may limit our ability to use these NOL carryforwards. Statement of Financial Accounting Standards No. 109, *Accounting for Income Taxes*, requires that the tax benefit of such net operating loss be recorded as an asset. At December 31, 2006, we had net deferred tax assets of approximately \$3.7 million related to the NOL and other temporary differences. We have recorded a full valuation allowance of \$3.7 million at December 31, 2006, due to uncertainties surrounding the realizability of the deferred tax asset.

Effective January 1, 2007, we adopted the provisions of FASB interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, the detail of which is included in Note 5 to the Financial Statements.

Off Balance Sheet Arrangements

We do not have any off-balance sheet arrangements.

Financial Instruments

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We currently have no natural gas price financial instruments or hedges in place. Similarly, we have no financial derivatives. Our natural gas marketing contracts use spot market prices. Given the uncertainty of the timing and volumes of our natural gas production this year, we do not currently plan to enter into any long term fixed-price natural gas contracts, swap or hedge positions, other gas financial instruments or financial derivatives in 2007.

Outlook for 2007

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Depending on capital availability, we are forecasting capital spending of up to approximately \$15.0 million during the remainder of 2007, allocated as follows:

1. Madisonville Project, Madison County, Texas. Approximately \$13.0 million will be expended in the Madisonville Field area as follows: \$10,000,000 to drill a deep well location, \$2,000,000 toward the fracture stimulation and hook up costs of the Wilson Well, and \$1,000,000 to be utilized for land acquisition, engineering and permitting.
2. Central Alberta Project. Up to approximately \$2.0 million will be expended to drill exploratory wells and acquire 3-D seismic data.

We may, in our discretion, decide to allocate resources towards other projects in addition to or in lieu of, those listed above should other opportunities arise and as circumstances warrant.

We expect commodity prices to be volatile, reflecting the current tight supply and demand fundamentals for North American natural gas and world crude oil. Political events around the world, which are difficult to predict, will continue to influence both oil and gas prices. Higher prices for oil and gas often lead to higher levels of drilling activity which in turn lead to higher costs to explore, develop and acquire oil and gas reserves due to greater competition for resources and supplies. These higher costs could affect the returns on our capital expenditures. Higher crude prices could also help keep natural gas prices high by keeping alternative fuels, such as heating oil and residual fuel, expensive.

Impact of Inflation & Changing Prices

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

As the following table illustrates, average sales prices of natural gas have been volatile in the past three years. This has created fluctuations in revenues and earnings from operations:

	FOR THE YEARS ENDED DECEMBER 31		
	2006 (1)	2005	2004(2)
Average Sales Prices per Mcf	3.01	4.01	2.51
Production volume Mcf	2,229,059	1,991,105	2,316,895
Revenues	\$ 6,716,360	\$ 7,975,990	\$ 5,825,072
Earnings (loss) from operations	\$ (312,188)	\$ 2,856,537	\$ (1,613,830)

- (1) Includes \$38,849 impairment expense

- (2) Includes \$2,038,422 impairment expense

We are highly dependent upon natural gas pricing. A material decrease in current and projected natural gas prices could impair our ability to raise additional capital on acceptable terms. Likewise, a material decrease in current and projected natural gas prices could also impact our revenues and cash flows. This could impact our ability to fund future activities.

Changing prices have had a significant impact on costs of drilling and completing wells, particularly in the Madisonville Field area where we are currently the most active. The estimated cost of drilling and completing a Rodessa formation well at approximately 12,300 feet of depth has increased from \$3.0 million to \$7.5 million in 2007 due to higher costs associated with tubular goods, well equipment, and day rates for drilling contracts, among other factors. These higher costs have impacted and will continue to impact our income from operations in the form of higher depletion expense.

Quantitative and Qualitative Disclosures About Market Risk

Commodity Risk. Our major commodity price risk exposure is to the prices received for our natural gas production. Realized commodity prices received for our production are the spot prices applicable to natural gas in the East Texas region. Prices received for natural gas are volatile and unpredictable and are beyond our control. For the year ended December 31, 2006, a 10% change in the prices received for natural gas production would have had an approximate \$700,000 impact on our revenues.

Currency Translation Risk. Because our revenues and expenses are primarily in U.S. dollars, we have little exposure to currency translation risk, and, therefore, we have no plans in the foreseeable future to implement hedges or financial instruments to manage international currency changes.

Critical Accounting Estimates

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our consolidated financial statements have been prepared by management in accordance with U.S. GAAP.

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Management believes the most critical accounting policies that may have an impact on our financial results relate to the accounting for oil and gas properties. Amortization, abandonment costs and full cost ceiling limitation write-downs are all based on numerous estimates, many of which are beyond management's control. Reserves valuation is central to much of the accounting for an oil and gas company as described below.

Significant accounting policies are contained in Note 2 to the consolidated financial statements. A summary of unaudited supplementary oil and gas reserve information is contained in Note 12 to the consolidated financial statements.

The following discusses the accounting estimates that are critical in determining the reported financial results:

Oil and Gas Properties We follow the full cost method of accounting for oil and gas producing activities as prescribed by U.S. GAAP and, accordingly, capitalize all costs incurred in the acquisition, exploration, and development drilling of proved oil and gas properties, including the costs of abandoned properties, dry holes, geophysical costs, and lease rentals. All general corporate costs are expensed as incurred. In general, sales or other dispositions of oil and gas properties are accounted for as adjustments to capitalized costs, with no gain or loss recorded. Amortization of evaluated oil and gas properties is computed on the units of production method based on all proved reserves on a country by country basis. Unevaluated oil and gas properties are assessed for impairment either individually or on an aggregate basis. The net capitalized costs of evaluated oil and gas properties (full cost ceiling limitation) are not to exceed their related estimated future net revenues discounted at 10%, and the lower of cost or estimated fair value of unproved properties, net of tax considerations.

Reserves We engage independent petroleum engineering consultants to evaluate our reserves. Reserves, future production profiles, and net revenues are estimated by independent professional reservoir engineering firms. While we engage qualified reservoir engineering firms, their estimates are inherently uncertain, involve numerous assumptions that may not be realized, and predict asset values that may not be indicative of the true market value of the assets evaluated. As a result of the inherent uncertainties and changing technical and economic assumptions, reserve estimates are subject to revisions that can materially impact our results.

Asset Retirement Obligation We provide for the estimated site restoration and abandonment costs of tangible long-lived assets using a fair value method, which approximates the cost a third party would incur in performing the tasks necessary to retire such assets. The reported liability is a discounted amount. The amount of the liability is affected by factors such as the number of wells, the timing of the expected expenditures and the discount factor. These estimates will change and the revisions could impact the amortization rates.

Stock Based Compensation The Company has a stock- based compensation plan that allows employees to purchase common shares of the Company. Option exercise prices approximate the market price for the common shares on the date the options were issued. Options granted under the plan are generally fully exercisable after

five years and expire five to ten years after the grant date. Under U.S. GAAP, prior to 2006, the Company elected not to expense compensation cost for stock-based employee compensation at fair value but did disclose the impact of the fair value accounting of employee stock options in Note 2 to the annual audited consolidated financial statements. GeoPetro adopted Statement of Financial Accounting Standards No. 123(R) (Statement 123R) on January 1, 2006, which is the beginning of its first interim period following the effective date of Statement 123R. GeoPetro has applied the modified prospective method of adoption, and accordingly, the financial statements for GeoPetro's prior interim periods and fiscal years will not reflect any restated amounts. GeoPetro has recorded \$69,870 of stock-based employee compensation for the six months ended June 30, 2007 in connection with the portion of previously granted employee stock options that vest on or after January 1, 2006. The impact of the fair value accounting of employee stock options is estimated on the date of grant using the Black-Scholes option pricing model with assumptions for: risk free interest rates, expected dividend yields, expected life of the options from the date of grant, and expected volatility.

Recently Issued Accounting Pronouncements

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, which is effective for the Company beginning January 1, 2008 and provides a definition of fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements for future transactions. We do not expect the adoption of this pronouncement to have a material impact on our financial position or results of operations.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, which permits an entity to measure certain financial assets and financial liabilities at fair value. The objective of SFAS No. 159 is to improve financial reporting by allowing entities to mitigate volatility in reported earnings caused by the measurement of related assets and liabilities using different attributes, without having to apply complex hedge accounting provisions. Under SFAS No. 159, entities that elect the fair value option (by instrument) will report unrealized gains and losses in earnings at each subsequent reporting date. The fair value option election is irrevocable, unless a new election date occurs. SFAS No. 159 establishes presentation and disclosure requirements to help financial statement users understand the effect of the entity's election on its earnings, but does not eliminate disclosure requirements of other accounting standards. Assets and liabilities that are measured at fair value must be displayed on the face of the balance sheet. We do not expect the adoption of this pronouncement to have a material impact on our financial position or results of operations.

BUSINESS

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We were incorporated in the State of Wyoming in August 1994 under the name GeoPetro Company as an oil and gas exploration, development drilling and production company. In June 1996, we merged with our wholly-owned subsidiary, GeoPetro Resources Subsidiary Company, a California corporation, and the resulting merged company is incorporated in the state of California under the California General Corporation Law under the name GeoPetro Resources Company.

Our principal and registered office is located at One Maritime Plaza, Suite 700, San Francisco, California, USA 94111.

Intercorporate Relationships

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We hold 100% of the shares of Redwood Energy Company, a Texas corporation, **Redwood**. Redwood is the general partner of, and holds a 5% interest in, Redwood Energy Production, L.P., **Redwood LP**, a Texas limited partnership. We are the sole limited partner of Redwood LP and own the remaining 95% partnership interest in Redwood LP.

In addition, we hold a 12% interest in Continental-GeoPetro (Bengara II) Ltd., **C-G Bengara** which is a British Virgin Islands company and a 50% interest in CG Xploration Inc., **CG Xploration**, which is a Delaware corporation.

We also hold 100% of the shares of GeoPetro Canada Ltd., **GeoPetro Canada**, an Alberta company, and 100% of the shares of GeoPetro Alaska LLC **GeoPetro Alaska**, an Alaska limited liability company.

GENERAL DEVELOPMENT OF THE BUSINESS

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

During the past five years, we have conducted leasehold acquisition, exploration and drilling activities on our North American, Australian and Indonesian prospects. These projects currently encompass approximately 1.03 million gross (236,170 net) acres, consisting of mineral leases, production sharing contracts and exploration permits that give us the right to explore for, develop and produce oil and natural gas. Most of these properties are in the exploration, appraisal or development drilling phase and have not begun to produce revenue from the sale of oil and natural gas. Excluding minor interest and dividend income, our only cash inflows until 2003 were the recovery of capital invested in projects through sale or other divestiture of interests in oil and gas prospects to industry partners.

In December 2000, we acquired working interests in oil and natural gas leases in the Madisonville Field in Madison County, Texas, including interests in the Rodessa Formation. Also included in the acquisition was the Magness Well, an existing well that had been drilled, cased and production tested in the Rodessa Formation. In October 2001, we re-completed and tested the Magness Well over a 12-day period. In October 2002, we drilled, completed and successfully tested an injection well to dispose of waste products resulting from the treating process for gas produced from the Rodessa Formation. The Madisonville Field gas treatment plant and associated pipelines, which were built specifically for this project, were placed into service in May 2003, and the Magness Well began production in late May 2003. Since 2003, substantially all of our revenue has been generated from

natural gas sales derived from the Madisonville Field. The Madisonville Project is expected to be our primary source of revenue in 2007. The first development well in the Madisonville Field, the Fannin Well, was drilled in 2004 and was tested at rates of up to 25.7 MMcf/d. In 2006, we drilled the Wilson and Mitchell wells. Presently, the Fannin, Mitchell and Magness wells are producing while the Wilson well is shut-in awaiting a fracture stimulation. We own a 100% working interest in the four wells. Historically, our wells have been production constrained by the gas treatment plant at the Madisonville Field, which had a treating capacity limit of approximately 18,000 Mcf per day. We entered into an agreement with the plant owner, MGP, an unaffiliated third party, which required, among other things, that MGP expand the treating capacity of the plant from 18,000 to 68,000 Mcf per day to treat additional volumes from our producing wells. In early October 2007, MGP completed the additional treating facilities and the additional treating capacity at such facilities is currently being phased in.

As of October 4, 2007 we have 31,583,007 shares of common stock outstanding as a result of raising approximately \$54 million of equity, net of offering costs, by way of private placements and a public offering in Canada. These funds have been used primarily to acquire, explore and develop our oil and natural gas prospects.

On March 30, 2006, we completed an initial public offering in Canada, which consisted of 3,730,021 shares of common stock at an issue price of \$3.50 per share and 519,500 shares of common stock issued on a flow-through basis under the *Income Tax Act* (Canada) at an issue price of \$3.85 per share for aggregate gross proceeds of \$15,055,149. The sale of our common stock was conducted (a) outside the United States pursuant to the exemption from registration provided by Regulation S, and (b) within the United States only in accordance with an applicable exemption from the registration requirements of the 1933 Securities Act. We used the net proceeds of the offering to fund development drilling of proven and probable natural gas reserves associated with the Madisonville Project and to conduct exploration and appraisal activities on our other projects in the United States, Canada and Indonesia.

On August 13, 2007, we sold, pursuant to a private placement, 2,002,599 units of our securities at a price of \$3.85 per unit, for total gross proceeds of \$7,710,006. Each unit consists of one share of our common stock and a warrant to purchase three-tenths of a common share. Each one whole warrant shall entitle the holder to acquire one share of common stock at a price of \$4.50 per share for a period of five years from the closing date. The units were purchased by a small number of accredited investors. We agreed to file a re-sale registration statement covering the common shares sold in such placement. The gross proceeds of the sale of common shares will be used to fund the Company's exploration and development program and for general working capital purposes.

Growth Strategy

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our strategy is to maximize shareholder value through the exploration and development drilling of oil and natural gas prospects. To carry out this philosophy we employ the following business strategies:

identify and pursue potential projects which individually have the potential to be company makers which we define as projects which could generate a minimum unrisks net present value of \$50 million net to our interest using a 10% discount factor;

perform geological, engineering and geophysical evaluations;

gain control of key acreage;

generate high quality drillable exploration and development drilling prospects;

retain a large working interest in those projects which involve low risk appraisal or development drilling, exploitation or appraisal of proven, probable and possible reserves; and

minimize early investment and exploration risk in higher risk exploratory prospects through farmouts to other oil and natural gas companies and maintain meaningful interests with a carry through the exploration phase.

Risks Associated With Foreign Operations

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our business activities in Indonesia, Canada and the United States are subject to political and economic risks, including: loss of revenue, property and equipment as a result of unforeseen events like expropriation, nationalization, war, terrorist attacks and insurrection; risks of increases in import, export and transportation regulations and tariffs, taxes and governmental royalties; renegotiation of contracts with governmental entities; changes in laws and policies governing operations of foreign-based companies in Indonesia; exchange controls, and numerous other factors. While we expect these risks are greater in Indonesia, especially political risk, any one or more of such political or economic conditions could change in the United States or Canada to our detriment. For a related discussion of the risks attendant with foreign operations, see Risk Factors.

Regulations

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Domestic exploration for, and production and sale of, oil and gas are extensively regulated at both the federal and state levels. Our business is and will be directly or indirectly affected by numerous governmental laws and regulations applicable to the energy industry, including:

Federal environmental laws and regulations

State environmental laws and regulations

Local environmental laws and regulations

Conservation laws and regulations

Tax and other laws and regulations pertaining to the energy industry

Legislation, rules and regulations affecting the oil and gas industry are under constant review for amendment or expansion, frequently increasing the regulatory burden. Any changes in the existing legislation, rules or regulations could adversely affect our business. The regulatory burdens are often costly to comply with and carry substantial penalties for failure to comply.

As of October 2007, we have re-completed an existing production well and drilled three additional production wells and an injection well in the Madisonville Project as operator. In addition, we may drill oil, gas and disposal wells in the future as the operator and will be required to obtain local government and other permits to drill such wells. There can be no assurance that such permits will be available on a timely basis or at all. Texas and other states have statutes or regulations pertaining to conservation matters which, among other matters, regulate the unitization or pooling of gas properties and the spacing, plugging and abandonment of such wells and set limits on the maximum rates of natural gas that can be produced from gas wells.

Our operations and activities are subject to numerous federal, state and local environmental laws and regulations. These laws and regulations:

Require the acquisition of permits

Restrict the type, quantities and concentration of various substances that can be discharged into the environment

Limit or prohibit drilling and other activities on wetlands and other designated, protected areas

Regulate the generation, handling, storage, transportation, disposal and treatment of waste materials

Impose criminal or civil liabilities for pollution resulting from oil and natural gas operations

We expect that with the increase in our exploratory and development drilling activities, the impact of environmental laws and regulations on our business and operations will also increase. We may be required in the future to make substantial outlays of money to comply with environmental laws and regulations. Additional changes in operating procedures and expenditures to comply with future environmental laws cannot be predicted.

Other than our U.S. projects, we do not operate oil and gas properties in which we own an interest. In those instances, we are not in the position to exert direct control over compliance with most of the rules and regulations

discussed above. We are substantially dependent on the operators of our non-operated oil and gas properties to monitor, administer and oversee such compliance. The failure of the operator to comply with such rules and regulations could result in substantial liabilities to us.

As the operator of the Madisonville Project, among other various environmental laws and regulations, we will be subject to the U.S. Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and any comparable legislation adopted by Texas which imposes strict, joint and several liability on owners and operators of properties and on persons who dispose or arrange for the disposal of hazardous substances found on or under the sites of such properties. Under CERCLA, one owner, lessee or other party, having responsibility for and an interest in a site requiring cleanup may, under certain circumstances, be required to bear a disproportionate share of liability for the cost of such cleanup if payments cannot be obtained from other responsible parties. The Resource Conservation and Recovery Act (RCRA) and comparable rules adopted by Texas and other states regulate the generation, management and disposal of hazardous oil and gas waste.

The Texas Railroad Commission has been delegated the responsibility and authority to regulate and prevent pollution from oil and gas operations, including the prevention of pollution of surface or subsurface water resulting from the drilling of oil and gas wells and the production of oil and gas. In addition to regulating the generation, management and disposal of hazardous oil and gas waste, the Texas Railroad Commission has been delegated authority to regulate underground hydrocarbon storage, saltwater disposal pits and injection wells.

The drilling of oil and gas wells in Texas requires operators to obtain drilling permits, file an organization report and a performance bond or other form of financial security, such as a letter of credit, and obtain a permit to maintain pits to store and dispose of drilling fluids, saltwater and waste as well as other types of pits for other purposes. The issuance of such permits is conditioned upon the Texas Railroad Commission's determination that these pits will not result in waste or pollution of surface or subsurface water.

Other states in which we have an interest in oil and gas properties may impose similar or more stringent regulations than imposed under CERCLA or RCRA.

In re-completing the existing well on the Madisonville Project, we were required to drill a well for injection or disposal of produced waste gas from wells. Injection wells are subject to regulation under the Safe Drinking Water Act (SDWA) and the regulations and procedures which have been adopted by the Environmental Protection Agency (EPA) under that Act. Generally, enforcement procedures under the SDWA are administered by the EPA unless such authority has been delegated by the EPA to a state which has primary enforcement responsibility based on the EPA's determination that the state has adopted drinking water regulations no less stringent than the national primary drinking water regulations and meets certain other criteria. Underground injection wells not used for the underground injection of natural gas for storage are generally unlawful and subject to penalties under the SWDA unless authorized by:

permit issued by the EPA or a state having primary enforcement responsibility, or

rule pursuant to an underground injection control program established by a state or the EPA.

The regulatory burden on the natural gas and oil industry increases our cost of doing business and affects our financial condition. Future developments, such as stricter requirements of environmental or health and safety laws and regulations affecting our business or more stringent interpretations of, or enforcement policies with respect to, such laws and regulations, could adversely affect us. To meet changing permitting and

operational standards, we may be required, over time, to make site or operational modifications at our facilities, some of which might be significant and could involve substantial expenditures. There can be no assurance that material costs or liabilities will not arise from these or additional environmental matters that may be discovered or otherwise may arise from future requirements of law.

Overseas Regulations

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We own a working interest and in oil and gas project located in Indonesia. We have farmed out our interest in this project to a third party who is the operator of this project. In exploring for, drilling and developing this property, this operator will be required to comply with the environmental, conservation, tax and other laws and regulations of Indonesia. To date we have farmed out our interest in 20 properties since our inception. This has

impacted our business from a financial point of view. In some instances, we have received cash consideration pursuant to the terms of a farmout which we typically record as a reduction of capitalized oil and gas properties. Often, the terms of the farmouts we negotiate require the third party farmee to expend a certain amount toward the exploration and/or development drilling of the property in order to earn an interest in the property. This lessens the demand on our own capital resources to perform the exploration and/or development drilling of the property. Conversely, when and if the property produces revenue, it also reduces our share of such revenue to the extent of the interest farmed out.

Technology

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We participate in projects utilizing economically feasible exploration technology in our exploration and development drilling activities to reduce risks, lower costs, and more efficiently produce oil and gas. We believe that the availability of cost effective 2-D and 3-D seismic data makes its use in exploration and development drilling activities attractive from a risk management perspective in certain areas.

Briefly, through the use of a seismograph, a seismic survey sends pulses of sound from the surface down into the earth, and records the echoes reflected back to the surface. By calculating the speed at which sound travels through the various layers of rock, it is possible to estimate the depth to the reflecting surface. It then becomes possible to infer the structure of rock deep below the earth's surface. We evaluate substantially all of our exploratory prospects using 2-D seismic data. In addition, we own approximately 12 square miles of 3-D seismic data covering our leasehold and adjacent lands in the Madisonville Project.

The use of seismic technology does not entirely remove the risk of exploration and development drilling of oil and natural gas deposits. It is important to consider the following:

we may not recognize significant geological features due to errors in interpretation, processing limitations, the presence of certain geological environments that are out of our control or other factors; and

seismic generally becomes less reliable with increasing depth of the geological horizon; and

the use of this technology may increase our finding cost over that if it is not used.

Principal Products

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our principal products are the production of natural gas and crude oil from properties in which we own an interest. Since our inception, we have realized only limited production of natural gas and crude oil from the properties in which we own an interest. We have working interests in various undeveloped oil and gas properties. See [Properties](#) for a general description of these properties.

During the last three fiscal years, 100% of our revenues have been derived from the sale of natural gas. Substantially all of our natural gas sales, approximately 99%, have been generated by three producing wells, the Magness #1, Fannin #1 and Mitchell #1 wells, located in the Madisonville Field in East Texas. Natural gas produced by the wells is sold at the wellhead where it is delivered to a gathering pipeline and transported to a nearby gas treatment plant where it is treated to remove impurities. The gas is then transported nine miles to one of two common carrier pipelines from which point it is delivered to the greater Dallas, Texas area. The price received for the natural gas is the Houston Ship Channel price index less certain adjustments for the quality of the gas delivered. The adjustments for the quality of gas delivered at the wellsite as well as the gathering and transportation costs presently amount to approximately \$1.73 per Mcf of untreated gas delivered at the wellsite.

For financial information regarding our business activities by segment, please see our Financial Statements beginning on page F-1 of this prospectus. Substantially all of our revenue is produced from natural gas sales in the Madisonville Field located in East Texas.

Reserves

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The volume of production from oil and natural gas properties generally declines as reserves are depleted, with the rate of decline depending on reservoir characteristics. Our proved reserves will decline as reserves are produced from our properties unless we are able to acquire or develop new reserves.

Acquisition of Producing Properties

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We may supplement our exploration efforts with acquisitions of producing oil and gas properties. We may seek to acquire producing properties that are underperforming relative to their potential.

Patents, Trademarks, Licenses, Franchises and Concessions Held

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Permits and licenses are important to our operations, since they allow the search for the extraction of any oil, gas and minerals discovered on the areas covered. See [Properties](#) for a general description of the permits and licenses under which we operate. Provided we establish a commercial discovery thereon, the Bengara PSC in Indonesia grants us the right to produce oil and gas from the PSC area until 2027.

Seasonality of Business

Our business is not seasonal.

Working Capital Items

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The majority of our current assets are in the form of cash and deposits in trust received from the sale of natural gas from our Madisonville Project in Texas and from the sale of common stock in private placements. We are required to use this cash to pay for the cost of our operations and activities. See further, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Customers

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Substantially all of our revenues to date have been derived from sales by MGP to two customers, Atmos Pipeline-Texas, and ETC Katy Pipeline, Ltd., of natural gas produced from our Madisonville Project in Texas. We have not committed any forward sales of our natural gas. We contract to sell the gas with spot-market based contracts that vary with market forces on a monthly basis. No other customer accounts for in excess of 10% of the company's revenues.

Competition

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The natural gas and oil industry is intensely competitive and speculative in all of its phases. We encounter competition from other natural gas and oil companies in all areas of our operations. In seeking suitable natural gas and oil properties for acquisition, we compete with other companies operating in our areas of interest, including large natural gas and oil companies and other

independent operators, which have greater financial resources and in many instances, have been engaged in the exploration and production business for a much longer time than we have. Many of our competitors also have substantially larger operating staffs than we do. Many of these competitors not only explore for and produce natural gas and oil but also market natural gas and oil and other products on a regional, national or worldwide basis. These competitors may be able to pay more for productive natural gas and oil properties and exploratory prospects and define, evaluate, bid for and purchase a greater number of properties and prospects than us. In addition, these competitors may have a greater ability to continue exploration activities during periods of low market prices. Our ability to acquire additional properties and to discover reserves in the future will depend on our ability to evaluate and select suitable properties and to consummate transactions in a highly competitive environment.

The prices of our natural gas production are controlled by market forces. However, competition in the natural gas and oil exploration industry also exists in the form of competition to acquire leases and obtain favorable transportation prices. We are relatively small and may have difficulty acquiring additional acreage and/or projects and may have difficulty arranging for the transportation of our production. We also face competition in obtaining natural gas and oil drilling rigs and in sourcing the manpower to run them and provide related services.

Employees

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Currently, we have 9 employees, all of whom are full time. We use the services of independent consultants and contractors to perform various professional services, including reservoir engineering, land, legal, environmental and tax services. On those properties where we are not the operator, we rely on outside operators to drill, produce and market our natural gas and oil.

PROPERTIES

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our principal executive office consists of 2,956 square feet and is located at One Maritime Plaza, Suite 700, San Francisco, CA 94111.

Description of the Properties

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our current oil and natural gas exploration, appraisal and development drilling activities are focused in three distinct project areas as follows:

United States Texas (onshore East Texas region), **Alaska** (onshore Cook Inlet area) and **California** (onshore San Joaquin basin);

Canada Alberta (central Alberta basin);

Indonesia onshore East Kalimantan Province; and

We do not fully insure against all business risks either because such insurance is not available or because premium costs are prohibitive. This is a common practice in the oil and gas industry. We believe our property is adequately insured in view of the nature of our operations and industry practices in this regard.

We previously owned an interest in two Australian exploration permits: (1) a 26.22% working interest in Exploration Permit #408 consisting of 200,895 gross (52,675 net) acres, and (2) a 32.588% working interest in Exploration Permit 381, both located in the South Perth basin,

Southwest Australia, consisting of 330,000 gross (107,540 net) acres. On June 20, 2007, we agreed to sell and transfer all of our property interests in Australia to an unrelated party.

Texas

Madisonville Project

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We own and operate the interest in the Madisonville Project in Madison County, Texas. We own working interests in approximately 4,716 gross and net acres of leases in the Rodessa Formation interval, as well as approximately 4,589 gross and net acres of leases as to depths below the Rodessa Formation interval. We also own a license as to 12.5 square miles of 3-D seismic data over the Madisonville Field.

The Madisonville Field, located approximately 100 miles north of Houston, has produced oil and natural gas from four different horizons above the Rodessa Formation for over 50 years. The field was discovered in 1945 with the Boring No. 1 well, which was drilled to the Rodessa Formation. The well blew out at an uncontrolled rate for three days during a test; however, due to hydrogen sulphide, carbon dioxide and nitrogen in the Rodessa Formation natural gas, the gas reserves were never developed. Over 125 wells were drilled in the Madisonville Field to shallower intervals above the Rodessa Formation. In 1994, nearly 50 years after the initial discovery, United Meridian Corporation (**UMC**) drilled the Magness Well as the first follow-up well into the Rodessa Formation to the Boring No. 1 well. The Magness Well had 139 feet of net pay but the natural gas was found to contain 28% impurities.

UMC previously production tested the Magness Well in 1994 through perforations in the lower most ten feet of the indicated Rodessa Formation pay interval. The well tested at a rate of 12 MMcf/d from this limited interval on a 22/64ths inch choke with flowing wellhead pressures increasing from 3,915 to 3,919 pounds per square inch. In 2001, we re-entered and recompleted the Magness Well. A total of 139 feet of interval has been perforated in the Rodessa Formation at approximately 12,000 feet of depth for this well. The well was production tested over a 12-day period in 2001 on various choke sizes with flowing rates ranging up to approximately 20.8 MMcf/d. We own a 100% working interest (75.1333% net revenue interest) in the Magness Well located in the surrounding production unit consisting of 629 gross and net acres. The Magness Well commenced production in May of 2003.

The first development well, the Fannin Well, was drilled and completed in 2004. We own a 100% working interest (70.0719% net revenue interest) in the Fannin Well located in the surrounding production unit consisting of 704 gross (704 net) acres. A total of 146 feet of indicated pay was perforated in the well and a flow test of the well was completed in December 2004 from the Rodessa Formation at rates of up to 25.7 MMcf/d. We commenced production from the Fannin Well in early 2006.

In 2006, we drilled the Wilson and Mitchell wells. We own a 100% working interest (70% net revenue interest) in the Wilson and Mitchell wells.

The Madisonville Field is a geologic feature encompassing approximately 4,100 acres at the Rodessa limestone at about 11,800 feet of depth. A 3-D seismic program shot in early 1998 confirmed the size of the structure and slightly increased its size over earlier interpretations.

Our working interest covers the Rodessa Formation at approximately 12,000 feet of depth. The Rodessa reserves are being developed through the recompletion of the Magness Well and the drilling of additional proved and probable undeveloped locations. Production began in May 2003

and stabilized at a rate of 18 MMcf/d of raw gas from the Magness Well. Presently, the Fannin, Mitchell and Magness wells are producing while the Wilson well is shut-in awaiting a fracture stimulation. In addition, we own a working interest in certain leases and farmout rights which cover depths below the Rodessa Formation.

The hydrogen sulphide, carbon dioxide and nitrogen combined comprise about 28% of the gas content. As described below, an unaffiliated third party purchases the untreated natural gas from us at the well site point of delivery for a net price equal to the weighted average price per MMBTU that the third party receives for the natural gas delivered to the sales pipeline less certain gathering, treatment and transportation charges. As a result of the charges, we receive a net price that is substantially lower than we would otherwise receive if the gas did not contain the 28% of impurities. In addition, the high concentrations of hydrogen sulphide and carbon dioxide result in higher capital and operating costs for our wells. For example, the hydrogen sulphide and carbon dioxide are corrosive to the wellbores. This means we have to utilize higher grade specification well tubing and casing which is more expensive than what we would utilize absent the impurities. In addition, we continuously treat the well bores with chemicals designed to inhibit the corrosive effects of the impurities. We also maintain field personnel at or near the wellsites who monitor the wells on a twenty four hour basis and equip the wellsites with extensive safety equipment systems due to the toxic properties of the hydrogen sulphide and carbon dioxide. These factors and others result in higher capital and operating costs for our wells in the Madisonville Project.

The Madisonville Gas Treatment Plant and Gathering Facilities

In order to produce the proven gas reserves from the Rodessa Formation, we developed an onsite plan to treat and remove impurities from the Madisonville Project natural gas in order to meet pipeline-quality specifications. On June 15, 2001, we, through our subsidiary Redwood LP, entered into an agreement, which agreement was subsequently amended and restated, together with certain related agreements (collectively, the **Hanover Agreement**), with Hanover pursuant to which Hanover committed to fund, construct and operate a dedicated natural gas treatment plant capable of treating approximately up to 18 MMcf/d of inlet natural gas from the Rodessa Formation. The Hanover Agreement also provided for the installation by Gateway of field gathering pipelines and an approximately nine-mile sales pipeline with an estimated capacity of approximately 70 MMcf/d to transport the Madisonville Field natural gas to a major pipeline. By April of 2003, the construction and installation of Hanover's natural gas treatment plant and Gateway's associated pipeline and gathering facilities were completed. Gas production from the Magness Well commenced in May 2003. We received the first revenues from the sale of natural gas from the Madisonville Project in July 2003.

On July 25, 2005, MGP purchased the natural gas treatment plant from Hanover and purchased the gathering pipelines upstream of the gas treatment plant from Gateway. Concurrent with MGP's purchase of the gas treatment plant and gathering pipelines, we, through our subsidiary Redwood LP, Gateway and MGP terminated the Hanover Agreement and entered into a new agreement, (the **MGP Agreement**), to treat and transport our gas production from the Madisonville Project. As a result of the MGP Agreement, MGP committed to install and make operational additional treating facilities capable of treating 50 MMcf/d, which combined with the capacity of the original treating facilities represent a total treating capacity of 68 MMcf/d for the Madisonville treatment plant.

In early October 2007, MGP completed the additional treating facilities and the additional treating capacity at such facilities is currently being phased in.

The term of the MGP Agreement commenced August 1, 2005 and continues so long as we own any oil and gas leases in the Madisonville Field, provided that it shall terminate on July 31, 2035 unless extended. Under the terms of the MGP Agreement, we have committed all natural gas production from our interest in the Madisonville Project to MGP. MGP purchases the untreated natural gas from us at the well site point of delivery for a net price equal to the weighted average price per MMBTU that MGP receives for the natural gas delivered to the sales pipeline less certain gathering, treatment and transportation charges. The gathering, treatment and transportation price adjustments are described below. All proceeds from MGP's sale of Rodessa Formation gas are deposited in an escrow account and then disbursed in accordance with the joint direction of MGP and ourselves.

The MGP Agreement provides that certain gathering, treating and transportation fees shall be paid to MGP from the escrow account. The MGP Agreement provides that MGP will receive a gathering and marketing fee of \$0.07 and \$0.01 per Mcf, respectively, of gas measured and delivered to the natural gas treatment plant. In addition, for the first 18,000 Mcf/d of gas measured and delivered to the inlet flange of the gas treatment plant, MGP will receive a treating fee of \$1.50 per Mcf. This treating fee will remain in effect until September 30, 2010. For any gas volumes in excess of 18,000 Mcf/d of gas delivered to the inlet flange of the gas treatment plant, MGP will receive a treating fee of \$1.10 per Mcf. Beginning October 1, 2010, this fee of \$1.10 per Mcf shall be charged for all gas measured and delivered to the plant. One-quarter ($\frac{1}{4}$) of the foregoing treating fees are adjusted using the Producer Price Index for Industrial Commodities (**PPI**) and one-quarter ($\frac{1}{4}$) using the Consumer Price Index (**CPI**). One-half ($\frac{1}{2}$) of the foregoing gathering and marketing fees are adjusted using the CPI. We have the right, upon giving 60 days' notice, to terminate the marketing fee whereupon we shall assume the sole responsibility of marketing the natural gas sold. The **PPI** and the **CPI** are price indices published by the U.S. Department of Labor.

For the first 18,000 Mcf/d of gas measured and delivered to the inlet flange of the gas treatment plant, Gateway will receive a transportation fee of \$0.10 per Mcf. This fee will remain in effect through July 31, 2008. Beginning August 1, 2008 and terminating on July 31, 2010, the fee shall be reduced to \$0.08 per Mcf for the first 18,000 Mcf/d of gas measured and delivered to the inlet flange of the gas treatment plant. For any gas volumes in excess of 18,000 Mcf/d of gas measured and delivered to the inlet flange of the gas treatment plant, Gateway will receive a transportation fee of \$0.12 per Mcf measured and delivered from the outlet flange of the plant. This fee will remain in effect through July 31, 2008 and shall be reduced to \$0.10 per Mcf thereafter. After July 31, 2010, this transportation fee shall be \$0.10 per Mcf for all volumes delivered from the outlet flange of the plant.

The foregoing gathering, treatment and transportation price adjustments are inclusive of all costs and expenses to gather, separate, treat, dehydrate and transport natural gas produced and delivered from our well(s).

Our natural gas deliveries to the Madisonville gas treatment plant may be affected by third party demands for access to the plant. On July 20, 2005 Crimson Exploration Inc. (**Crimson**) filed a complaint with the Texas Railroad Commission (**TRC**) against Gateway and Hanover. The complaint alleged discrimination by Hanover and Gateway, and requested that the TRC issue an order requiring Hanover and Gateway to ratably process, take, transport, or purchase natural gas produced by Crimson into the Madisonville Field gas treatment plant. The complaint did not allege any wrongdoing by Redwood or Redwood LP; however, the complaint referred to the contractual relationship between each of Redwood LP, Hanover, and Gateway which was terminated July 25, 2005 as the basis for its discrimination complaint. Redwood received a subsequent notice

dated January 13, 2006 from the TRC informing Redwood that (i) Crimson had filed a request to docket its complaint against MGP for failure to ratably take gas pursuant to Texas regulations and (ii) a pre-hearing conference was held on January 25, 2006 relating to the complaint. Redwood withdrew from the proceeding.

On January 23, 2006, our counsel received a letter from counsel for MGP reaffirming that regardless of the outcome of the proceedings before the TRC, MGP nonetheless recognizes that it has a contractual obligation to treat 68 MMcf/d of natural gas produced by Redwood LP and delivered to the treatment plant. After consultation with legal counsel, we believe that our contract with MGP is fully enforceable.

On August 9, 2006, the Texas Railroad Commission issued an order requiring MGP to ratably process, take, transport or purchase natural gas produced by Crimson into the Madisonville gas treatment plant. The gas treatment plant is currently operating at capacity. There is no guarantee that we will be able to obtain full access to treatment capacity of up to 68 MMcf/d once the additional treating capacity of the gas treatment plant is phased in because, for example, Crimson now has the right to have its natural gas treated at the plant, which may reduce the plant's ability to treat all of our natural gas, unless the plant's capacity is further expanded.

To date, Crimson has permitted four wells to be drilled to the Rodessa Formation. The drilling of two of these wells has been completed to a depth of approximately 12,635 feet. One of these wells has been placed on production. Crimson has also drilled an injection well for disposal of waste products resulting from the treatment of their natural gas.

We committed to a three-well drilling program to facilitate the expansion of the gas treatment plant. We have drilled two of the three required wells to the Rodessa formation. The commitment requires us to commence the drilling of the third well sufficient to test the Smackover Formation (estimated to be encountered at approximately 18,000 feet) on or before September 30, 2008. We estimate the 18,000 foot well will cost \$10 million to drill and complete. We have granted MGP a security interest in the Madisonville Field properties to secure the three well commitment. The security interest shall be subordinated to any third party lender in the event we secure future debt against the property. MGP has granted us a similar security interest in the gas treatment plant to secure its obligation to expand the treatment plant on a timely basis.

Other Interests in the Madisonville Project

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our working interest in the Madisonville Project is subject to a net profits interest in favor of the third party that sold us our working interests in the Madisonville Project. The net profits interest is 12.5% (proportionately reduced to our interest) of the net operating profits until payout is achieved. After payout, the net profits interest increases to 30% (proportionately reduced to our interest). Payout, for purposes of the net profits interest, is defined and achieved at such time as we have recouped from net operating cash flows our total net investment in the Madisonville Project plus a 33% cash on cash return.

Alaska

The Cook Inlet Alaska CBM Project

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We entered into an agreement with Pioneer Oil Company, Inc. (**Pioneer**) dated April 20, 2005, wherein we secured the Cook Inlet Option to acquire a 100% working interest, 81% net revenue interest, in approximately 122,174 acres onshore in Cook Inlet, Alaska. We have since acquired 5,368 additional acres. We believe this acreage to be prospective for both coal bed methane and conventional gas production.

The 122,174 acre lease position consists of two separate target areas that have been selected for exploration. These areas are called the Point MacKenzie and Trading Bay Prospects, respectively.

The Point MacKenzie Prospect is located six miles northwest of Anchorage. The Trading Bay Prospect is located 50 miles west of Anchorage across the Cook Inlet. The Cook Inlet basin contains a thick section of terrestrial Tertiary rocks which includes shales, sandstones, and coals. The coals occur in seams which are commonly 20 feet thick and can be as thick as 70 feet. Accessible onshore areas have 200 to 300 feet of coal shallower than 5,000 feet. Gas content for these coals ranges from 80 to 250 standard cubic feet per ton, but testing is restricted to a very small number of bore holes and is almost completely unknown for most of the inlet.

Markets for natural gas in the Cook Inlet area include power generation, heating, fertilizer production and liquefied natural gas exports. An extensive pipeline system supplies these facilities and crosses the Point MacKenzie Prospect and Trading Bay Prospect lease blocks. These pipelines are only partially filled with gas and could accommodate additional production.

In addition to coal bed methane reserve potential, preliminary log analysis indicates the Point MacKenzie Prospect and Trading Bay Prospect lease blocks may also contain conventional accumulations of natural gas reserves in Tertiary sandstones.

The terms of the Cook Inlet Option provide for us to pay total consideration of \$20 per acre, or approximately \$2.3 million, for the leases. The Cook Inlet Option provides that we will pay the total lease consideration in two installments. We paid the first installment totaling \$1,068,063 on August 17, 2005 and we have received assignment of the 100% working interest in the leases. Within three years from the date of receipt of legally sufficient assignment of the 100% working interest in the leases, we have the option to conduct a \$2.5 million work program consisting of, but not limited to, a multiple test well drilling program on the leases over a three-year period, and, after completion of the work program and an evaluation of the results, to remit the final additional acreage consideration of \$10 per acre for the leases. The Cook Inlet Option provides that if we fail to pay the lease consideration when due, fail to perform the work program or otherwise default under the Cook Inlet Option, we shall forfeit our interest and reassign the leases to Pioneer, and we will have no further liability to Pioneer.

Approximately one to two miles of pipeline will be required to tie in any wells drilled at a currently preferred location at the Point MacKenzie Prospect, and approximately four to five miles of the pipeline will be required to tie in any wells drilled at a currently preferred location at the Trading Bay Prospect. We have not yet prepared an estimate of the cost to tie these wells in.

We are aware of two major pipelines which transverse the acreage blocks, the Enstar 20 line and the UnoCal-Marathon 16 line. We estimate the UnoCal-Marathon 16 line presently has available unused capacity of approximately 40 MMcf/d. In addition, we estimate the Enstar 20 line has available unused capacity of approximately 100 MMcf/d.

California

Lokern Project

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We have a working interest in the Lokern Project, located in the southern San Joaquin basin, near Bakersfield, California. The primary exploration objective is the Miocene Stevens formation. The secondary objectives include the Miocene Reef Ridge and Pliocene Etchegoin sands. The Stevens formation is Upper Miocene age.

The Lokern Project is being developed in part as a result of positive results from the Machii-Ross Ackerman show well drilled in 1979 on acreage currently controlled by us. Based on log analysis, we believe that well had approximately 240 feet of potential net oil pay and an additional 150 feet of potential pay in the Stevens zone. The Machii-Ross Ackerman well was drilled to a depth of 15,078 feet by Machii-Ross Petroleum Company and was plugged and abandoned as a dry hole. We believe, based on our log analysis, that the well may have been a bypassed producer.

We expect that a well will be drilled, either by us or through a farmout arrangement with a third party, to a depth of 15,000 feet by 2008.

Based on our review of title information from public authorities and other publicly available sources, we believe that we have a 100% working interest in the Lokern Project. As is customary in the U.S. oil and gas industry, we will not conduct a thorough title review with respect to our interest in the Lokern Project until we have made a definitive decision to drill in a particular lease area.

Alberta

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Goodwin Prospect

On June 21, 2007, we, through our wholly-owned subsidiary, GeoPetro Canada, entered into a participation agreement wherein we acquired a 50% non-operated working interest in the Goodwin Prospect, which is located in the Central Alberta Basin, Canada. A total of 12,000 acres can be earned by us through the drilling of wells. The primary exploration objective is the Lower Cretaceous Falher formation and the lower Jurassic Nordegg formation. Deeper Mississippian and Devonian leads have also been identified on 3-D seismic.

Subsequent to June 30, 2007, the Company has advanced US \$494,677 to be applied toward the drilling and completion of the first well in the prospect, the Nexstar Goodwin 16-19-58-12 Well. This well has been drilled to a total depth of 6,200 feet and production casing has been set. We have production tested this well and determined that it is non-commercial. We plan to plug and abandon this well.

Other Central Alberta Projects

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our other Canadian project is located in Alberta, Canada, approximately 100 miles northeast of Calgary. The primary exploration objective is Leduc D3 Pinnacle Reefs. A Leduc D3 Pinnacle Reef refers to a certain type of reef complex within the Leduc formation. Secondary objectives will include the shallower Nisku formation and deeper Winnipegosis formation.

These formations are expected to be encountered at depths of less than 10,000 feet. We, through our wholly-owned subsidiary, GeoPetro Canada, have acquired seismic data and plan to participate in the drilling of test wells.

We have a 56.25% working interest in 2,560 leased acres.

Indonesia

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

C-G Bengara owns 100% of the underlying rights to explore for and produce oil and natural gas within the contract area designated as the Bengara II Block, which rights have been granted under a production sharing contract dated December 4, 1997 (the **Bengara II PSC**) with Pertamina. Until recently, we owned 40% of CG Bengara and Continental Energy Corporation (Continental) owned the remaining 60% and, through it, the rights to the Bengara II PSC. On September 29, 2006, we executed a definitive agreement to sell 70% of our interest in C-G Bengara to CNPCHK (Indonesia) Limited (CNPC). We have retained a 12% stake in C-G Bengara and the Bengara II PSC. Continental has likewise sold its interest and retained an 18% interest in C-G Bengara and the Bengara II PSC.

The Bengara Block is located in the Tarakan Basin, mostly onshore but partially offshore astride the Bulungan River Delta in the Indonesian province of East Kalimantan. It originally covered a single contiguous area of approximately 1.2 million gross acres, of which 300,000 gross acres were relinquished in 2001 by C-G Bengara in accordance with the terms of the Bengara II PSC. A portion of our holdings in Indonesia was scheduled to be relinquished effective December 3, 2005. We have requested a postponement of the relinquishment from BP Migas; however, if the postponement is not granted, then a further 300,000 gross acres will be relinquished.

Geologically, the Bengara Block lies in the Tarakan Basin near major oilfields at Tarakan and Bunyu. More than 320 MMbbls and 96 bcf of natural gas have been produced from the Tarakan Basin according to records maintained by BP Migas. The Tarakan Basin is one of five sedimentary basins making up eastern Borneo on the eastern margin of the broad area of Southeast Asia and are some of the deepest in Indonesia, with seismic surveys indicating depths greater than 20,000 feet in the Tarakan Basin southeast of Bunyu Island.

The Makapan Gas Field

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Since 1938, only two wells have been drilled in the Bengara Block, one of which resulted in the discovery of the Makapan Gas Field. The Muara Makapan No. 1 well was drilled in 1988 by P.T. Deminex Indonesia from a swamp barge positioned on one of the Bulungan River Delta mouth channel distributaries. The well was drilled to a total depth of 10,800 feet and tested 19.5 million cubic feet of gas per day together with 600 bbls of 54 degree API condensate per day from a 33 feet thick sandstone section near 6,000 feet. The well was plugged and abandoned as a natural gas discovery. Several other gas zones indicated on logs were not tested. The well was not produced nor were any confirmation wells drilled due to the lack of a local natural gas market at the time the well was drilled. The Makapan Gas Field gas is a Wet gas with a high LPG fraction which may be commercial to extract at the wellhead for a third revenue source in addition to the gas and condensate. The Makapan Gas Field lies mostly offshore in very shallow water, less than 10 feet, amidst numerous islands of the Bulungan River Delta.

Exploration in the Bengara Block

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We believe that the key to successful prospecting in the Bengara Block will be the identification of traps and understanding sand distribution.

A striking feature of the Bengara Block is the presence of a few old wellbores actively leaking oil into surface lakes. Site investigations with a wireline unit are planned to determine the depths of the existing wellbores and obtain rock and oil samples at depth if possible.

Nearly 2,200 line kilometres of 2-D seismic data available within the Bengara Block appear to be adequate for both detailed and reconnaissance interpretation purposes. Some localized areas may benefit from reprocessing. New seismic data is required in places where insufficient data exists and for prospect confirmation in other locations. Field geology surveys are expected to confirm initial drilling targets without the need for additional seismic data at this time.

Several separate and unique geologic plays within the Bengara Block as well as a number of prospects and leads have been identified. Some well-defined prospects present immediate drilling targets. Exploration within the Bengara Block is in its formative stages and it is premature to make meaningful resource or reserve estimates. However, the existing exploration work to date indicates that there may be potential petroleum accumulations in the Bengara Block. Analysis of source rocks indicates a propensity for both oil and natural gas.

Terms of Participation in the Bengara Block

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The Bengara II PSC is a standard terms PSC employed by BP Migas for all oil and natural gas concessions in Indonesia. Generally, the joint venture participants are entitled to receive, from production proceeds, 100% of expenditures in the block as cost recovery. Once these costs are recovered, C-G Bengara is entitled to a production share of approximately 26.7% of oil produced and 62.5% of all natural gas produced. We will be entitled to 12% of C-G Bengara's share of any such production. Sharing terms for certain categories of oil vary slightly as defined in the Bengara II PSC.

The term of the contract is thirty years or a shorter period if C-G Bengara elects to terminate its obligations under the contract or if no commercial hydrocarbons are discovered within the contract area. At the end of six years, unless mutually extended by C-G Bengara and BP Migas, the contract expires if no commercially producible hydrocarbons have been discovered in the contract area.

C-G Bengara and BP Migas have mutually extended the early termination provisions until December 3, 2008. C-G Bengara may terminate the contract at any time by relinquishing all of its rights and obligations under the contract area.

C-G Bengara is required to relinquish 25% of the contract area within the first three years of the contract, a further 25% of the contract area within six years from the commencement of the contract and an additional area within the first ten years so that the area retained thereafter shall not be in excess of 970 square kilometres, or 20% of the original total contract area, whichever is less. C-G Bengara may designate which areas are to be relinquished subject to approval by BP Migas. C-G Bengara's obligation to relinquish parts of the original contract area under these provisions does not apply to the surface area of any field in which petroleum has been discovered. In 2001, C-G Bengara relinquished approximately 300,000 gross acres of the original 1.2 million gross acre contract area pursuant to the requirement to relinquish 25% of the contract area within the first three years of the PSC. The 300,000 gross acres relinquished were located in the western portion of the block which C-G Bengara considered to be the least prospective for oil and natural gas. C-G Bengara was required to relinquish an additional 25% of the contract area in December 2005. However, C-G Bengara received a one-year postponement of the relinquishment until December 3, 2006 from BP Migas. We have since tendered an additional 25% relinquishment comprising approximately 300,000 gross acres which we consider to be less geologically prospective than the remaining 600,000 acres. The relinquishment is pending approval by BP Migas.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

C-G Bengara is required to pay to BP Migas specified amounts based on achieving certain cumulative production quantities of crude oil from the contract area when and if commercial production is established. These production bonuses are as follows:

Cumulative Production	Cash Bonus Due
25,000,000 boe	\$ 500,000
60,000,000 boe	\$ 1,500,000
100,000,000 boe	\$ 2,500,000

In order to maintain the Bengara II PSC in effect, C-G Bengara is required to complete the following work programs and expenditures during the first ten years of the contract, unless the requirement is extended or waived by BP Migas:

Contract Year	Work Program	Amount	Our 12% Share
1998	Geologic and geophysical studies	\$ 500,000	\$ 60,000
1999	Seismic reprocessing	500,000	60,000
2000	Drill two wells	6,000,000	720,000
2001	Geologic and geophysical studies	1,000,000	120,000
2002	Drill one well	5,000,000	600,000
2003	Acquire seismic	3,750,000	450,000
2004	Drill one well	5,250,000	630,000
2005	Evaluate well results	1,000,000	120,000
2006	Geologic and geophysical studies	1,000,000	120,000
2007	Geologic and geophysical studies	1,000,000	120,000
	TOTAL	\$ 25,000,000	\$ 3,000,000

To date, C-G Bengara has not fulfilled the minimum work and cash expenditure requirements described above. These work and expenditure requirements were extended by BP Migas until December 2006 and an additional deferral until December 2007 has been requested. In accordance with the terms of the contract and with BP Migas consent, C-G Bengara may carry forward such yearly commitments to subsequent periods provided that BP Migas consents to any additional extensions. Failure of C-G Bengara to pay such commitments when due or to farm out its interest to an industry partner, which pays such obligation, may result in the forfeiture of its interest in, and rights to explore, drill and develop, the Bengara Block.

Upon establishing commercial production, if ever, C-G Bengara and BP Migas shall share ratably in the first 20% of oil and natural gas produced in the contract area within a given year according to the percentages specified below. After the first 20% of production, C-G Bengara is entitled to receive 100% of production until cost recovery has been achieved. Cost recovery generally includes 100% of the operating and drilling costs and depreciation of fixed assets applicable to oil and natural gas operations within the contract area. After C-G Bengara has received oil and natural gas production with a value sufficient to achieve cost recovery in a given year, C-G Bengara and BP Migas shall then share ratably in the production according to the percentages specified below:

Description	BP Migas	C-G Bengara	Our net share
Oil production	73.2143%	26.7857%	3.2143%
Gas production	37.5%	62.5%	7.5%

Thus, once we have achieved cost recovery, we will end up receiving approximately 3.2% and 7.5% of the proceeds from the sale of oil and gas, respectively.

Upon the completion of five years after commercial production commences, C-G Bengara is further subject to a domestic market obligation. This obligation requires C-G Bengara to sell and deliver to BP Migas, to meet Indonesia's domestic crude oil needs, a specified quantity of crude oil at a price which is only 15% of the market price of the oil. However, for new fields, for a period of five years starting on the month of the first delivery of crude oil produced from a new field, the fee per barrel for such crude oil supplied to the Indonesian domestic market shall be the market price, with the condition that the excess over the 15% of market price shall preferably be used to assist financing of continued exploration efforts in the contract area.

Upon the first commercial discovery of oil or natural gas in the contract area, BP Migas has the right to demand that 10% of C-G Bengara's undivided interest in the total rights and obligations under the Bengara II PSC be offered to itself or an entity owned by Indonesian nationals. The 10% interest shall be offered at a dollar amount equal to 10% of C-G Bengara's cumulative costs incurred in the contract area.

C-G Bengara is subject to work commitments, as previously described under "Terms of Participation in the Bengara Block", for the ten-year period ended December 3, 2007 requiring total expenditures of \$25 million. As of July 31, 2007, C-G Bengara had met approximately \$12.8 million of the \$25.0 million required expenditures, leaving an approximate \$12.2 million shortfall. BP Migas, the applicable governing authority, has granted a deferral of the prior years' commitments until December 2007. We expect to receive additional deferrals, if needed, beyond December 3, 2007.

Current and Planned Activities in the Bengara Block

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

In accordance with the terms of our agreement dated September 29, 2006 to sell 70% of our interest in C-G Bengara to CNPC, CNPC has:

1. Purchased 14,000 and 21,000 shares of C-G Bengara from us and Continental, respectively, at a cost of \$1 per share. As a result of the transaction, we and Continental own 6,000 and 9,000 C-G Bengara shares, respectively, retaining a 12% and 18% interest in C-G Bengara, respectively.

2. Paid the sum of \$18.7 million (the **Earning Obligation**) into a special joint venture account at a Hong Kong international bank. The funds will be under joint signature control of CNPC, ourselves and Continental, and are being expended exclusively to pay for 2006 and 2007 exploration and/or appraisal drilling in the Bengara II PSC area.

3. Agreed to provide development loans to pay 100%, and thereby carry our share and Continental's share of all C-G Bengara's exploitation, drilling, and development expenditures attributable to the Bengara II PSC, after the Earning Obligation funds are expended, until an additional amount of U.S. \$41.3 million over and above the Earning Obligation funds has been expended.

4. Agreed to pay a cash bonus totaling \$5,000,000, in the proportions of \$2,000,000 to us and \$3,000,000 to Continental, respectively, contingent upon and within fourteen business days of the receipt by C-G Bengara of the written approval from governmental authorities approving the development of the first commercial oil or gas discovery within the Bengara II PSC contract area.

The Earning Obligation funds of \$18.7 million, together with the \$6.3 million previously spent as of September 29, 2006, will satisfy all of the past and future work commitments on the Bengara II PSC.

BP Migas previously waived the work program expenditure requirement provisions of the Bengara II PSC until December 2007. If we do not satisfy our work expenditure commitments by December 2007, and if BP Migas does not grant any further deferrals of those commitments, we may be compelled to relinquish our interest in the contract area. In the event we relinquish our interest, we will record an impairment expense equal to the costs which have been capitalized in connection with the contract area. As of June 30, 2007 we have capitalized costs totaling approximately \$879,000 in respect to the contract area.

C-G Bengara recently revised and accelerated its 2007 drilling program for the Bengara II PSC. The revised plan filed with Indonesian authorities increases the drilling program for 2007 from a total of four new exploration wells to a total of six new wells, two of which are classified as exploration wells and four of which are classified as appraisal wells.

Drilling on the company's first 2007 Bengara II PSC well, the Seberaba-#1, commenced in April 2007. Drilling on Seberaba #1 was terminated short of the planned 13,123 feet total depth after having reached a total depth of 9,665 feet. A 7" liner was set at 9,570 feet in the third sidetrack after the original hole and first two sidetrack holes were compromised due to encountering a zone of overpressure below 9,612 feet. A workover rig has arrived on location and will be deployed on the Seberaba-#1 to conduct a planned extensive formation flow testing program based on oil shows encountered in the drill cuttings and identified on well logs in sandstones below 6,500 feet.

A second drilling rig contracted by the company arrived in the Bengara II PSC in August and has commenced drilling on the Sebaraba #4 appraisal well, the second well of the planned six well program in 2007. The Sebaraba #4 well is approximately 1.5 miles southeast of the Sebaraba #1 well. The Seberaba-#4 is the first of 3 planned appraisal wells to further evaluate the seismically identified Seberaba structure. Drilling of the Seberaba-#4 is planned to a total depth of 9,186 feet.

The drilling rig used to drill the Seberaba #1 wildcat exploration well has been moved to the Seberaba #3 appraisal well location, the third well of the planned six well program in 2007. The Seberaba #3 well is located approximately 1.4 miles northwest of the Seberaba #1 well and approximately 3 miles northwest of the Seberaba #4 well. Drilling of the Seberaba-#3 is planned to a total depth of 9,186 feet.

A third rig has been transported to the Bengara II PSC to expedite the completion of the 2007 drilling program.

CG Xploration

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

In November 2005, we and Continental formed CG Xploration to pursue new venture oil and gas exploration and production projects and obtain new exploration concessions in Indonesia. CG Xploration Inc. is incorporated in Delaware and is owned 50% by us and 50% by Continental. CG Xploration Inc. will actively pursue and may acquire new venture opportunities on behalf of ourselves and Continental. To date, CG Xploration has made no acquisitions.

Natural Gas Reserves

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our estimated total net proved reserves of natural gas and oil as of December 31, 2006, 2005 and 2004, and the present values of estimated future net revenues attributable to those reserves as of those dates, are presented in the following tables.

Proved developed oil and gas reserves means reserves that can be expected to be recovered through existing wells with existing equipment and operating methods. Additional oil and gas expected to be obtained through the application of fluid injection or other improved recovery techniques for supplementing the natural forces and mechanisms of primary recovery should be included as proved developed reserves only after testing by a pilot project or after the operation of an installed program has confirmed through production response that increased recovery will be achieved.

Proved developed nonproducing reserves means reserves expected to be recovered from zones behind casing in existing wells.

Proved oil and gas reserves means estimated quantities of crude oil, natural gas, and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made. Prices include consideration of changes in existing prices provided only by contractual arrangements, but not on escalations based upon future conditions.

(i) Reservoirs are considered proved if economic producibility is supported by either actual production or conclusive formation test. The area of a reservoir considered proved includes (A) that portion delineated by drilling and defined by gas-oil and/or oil-water contacts, if any; and (B) the immediately adjoining portions not yet drilled, but which can be reasonably judged as economically productive on the basis of available geological and engineering data. In the absence of information on fluid contacts, the lowest known structural occurrence of hydrocarbons controls the lower proved limit of the reservoir.

(ii) Reserves which can be produced economically through application of improved recovery techniques (such as fluid injection) are included in the proved classification when successful testing by a pilot project, or the operation of an installed program in the reservoir, provides support for the engineering analysis on which the project or program was based.

(iii) Estimates of proved reserves do not include the following:

(A) oil that may become available from known reservoirs but is classified separately as indicated additional reserves ;

(B) crude oil, natural gas, and natural gas liquids, the recovery of which is subject to reasonable doubt because of uncertainty as to geology, reservoir characteristics, or economic factors;

(C) crude oil, natural gas, and natural gas liquids, that may occur in undrilled prospects; and

(D) crude oil, natural gas, and natural gas liquids, that may be recovered from oil shales, coal, gilsonite and other such sources.

Proved undeveloped reserves means reserves that are expected to be recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required for recompletion. Reserves on undrilled acreage shall be limited to those drilling units offsetting productive units that are reasonably certain of production when drilled. Proved reserves for other

undrilled units can be claimed only where it can be demonstrated with certainty that there is continuity of production from the existing productive formation. Under no circumstances should estimate for proved undeveloped reserves be attributable to any acreage for which an application of fluid injection or other improved recovery technique is contemplated, unless such techniques have been proved effective by actual tests in the area and in the same reservoir.

The 2006 estimates were prepared by MHA Petroleum Consultants, independent reservoir engineers, and are part of their reserve reports on our natural gas and oil properties. The 2005 and 2004 estimates were prepared by Sproule Associates Inc., independent reservoir engineers, and are part of their reserve reports on our natural gas and oil properties. MHA Petroleum Consultants and Sproule Associates Inc.'s estimates were based on a review of geologic, economic, ownership and engineering data that we provided. In estimating the reserve quantities that are economically recoverable, MHA Petroleum Consultants and Sproule Associates Inc. used end-of-period natural gas and oil prices. In accordance with U.S. Securities and Exchange Commission regulations, no price or cost escalation or reduction was considered. All of our proved reserves are attributable to our Madisonville Project in Madison County, Texas.

	AS OF DECEMBER 31,		
	2006 (MMcf)	2005 (MMcf)	2004 (MMcf)
Proved developed	12,235	4,645	4,448
Proved developed non-producing	12,365	8,903	7,037
Proved undeveloped		7,881	6,923
Total	24,600	21,428	18,408

In accordance with Securities and Exchange Commission regulations, estimates of our proved reserves and future net revenues are made using sales prices estimated to be in effect as of the date of such reserve estimates and are held constant throughout the life of the properties, except to the extent a contract specifically provides for escalation. Estimated quantities of proved reserves and future net revenues therefrom are affected by natural gas and oil prices, which have fluctuated significantly in recent years. We filed a report with the U.S. Department of Energy in July 2007 that included total proved reserves inclusive of royalties and net profits interests as of December 31, 2006 totaling 43,517 MMcf. The total net proved reserves, excluding royalties and net profits interests, as of December 31, 2006 was 24,600 MMcf. The difference between the two numbers represents proved reserves attributable to royalties and net profits interests. We filed a report with the Alberta Securities Commission on March 30, 2007 that included total proved reserves inclusive of royalties and net profits interests as of December 31, 2006 totaling 43,517 MMcf. The total net proved reserves, excluding royalties and net profits interests, as of December 31, 2006 was 24,600 MMcf. The difference between the two numbers represents proved reserves attributable to royalties and net profits interests.

Standardized Measure of Discounted Future Net Cash Flows

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

For purposes of the following disclosures, estimates were made of quantities of proved reserves and the periods during which they are expected to be produced. Future cash flows were computed by applying year-end prices to estimated annual future production from proved gas reserves. The average year-end prices for gas were as indicated below. Future development drilling and production costs were computed by applying year-end costs to be incurred in producing and further developing the proved reserves. Future income tax expenses were computed by applying, generally,

year-end statutory tax rates (adjusted for permanent differences, tax credits and allowances) to the estimated net future pre-tax cash flows. The discount was computed by application of a 10% discount factor. The calculations assume the continuation of existing economic, operating and contractual conditions. However, such arbitrary assumptions have not proven to be the case in the past. Other assumptions of equal validity could give rise to substantially different results.

	YEAR ENDED DECEMBER 31,		
	2006	2005	2004
		(in thousands)	
Future cash inflows	\$ 101,867	\$ 162,459	\$ 90,815
Future production costs	(37,783)	(60,176)	(30,240)
Future development costs	(1,074)	(6,560)	(4,860)
Future income taxes	(8,128)	(18,941)	(9,609)
Future net cash flows	54,882	76,782	46,106
10% annual discount	(8,341)	(13,293)	(8,455)
Standardized measure of discounted future net cash flows	\$ 46,541	\$ 63,489	\$ 37,651

Pricing Assumptions

SEC regulations require that the gas and oil prices used in the MHA Petroleum Consultants and Sproule Associates Inc. reserve reports included herewith are the period-end prices for natural gas at December 31, 2006, 2005 and 2004, respectively. These prices are projected without inflation for the life of the wells included in the reserve reports. The pricing assumptions are listed below:

2006 REPORT Gas (\$ /MMBtu)	AVERAGE YEAR-END PRICE				
	2005 REPORT Gas (\$ /MMBtu)	2004 REPORT Gas (\$ /MMBtu)			
\$	5.40	\$	7.80	\$	5.20

Drilling Activities

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The following indicates the number of natural gas and oil wells drilled during the periods indicated.

	Productive		Dry		Total Wells	
	Gross	Net	Gross	Net	Gross	Net
Year ended December 31, 2006						
Exploratory	0	0	0	0	0	0
Development	2	2	0	0	2	2
Year ended December 31, 2005						
Exploratory	0	0	0	0	0	0
Development	0	0	0	0	0	0
Year ended December 31, 2004						
Exploratory	0	0	1	0.75	1	0.75
Development	1	1	0	0	1	1

Acreage and Productive Wells

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The following table sets forth our ownership interest in undeveloped acreage, developed acreage and productive wells in the areas indicated where we own a working interest as of December 31, 2006. Gross represents the total number of acres or wells in which we own a working interest. Net represents our proportionate working interest resulting from our ownership in gross acres or wells. Productive wells are wells in which we have a working interest and that are capable of producing natural gas or oil. Wells that are completed in more than one producing horizon are counted as one well.

	Undeveloped Acreage		Developed Acreage		Producing Wells		Non-Producing Wells	
	Gross	Net	Gross	Net	Gross	Net	Gross	Net
Indonesia	900,000	108,000						
Australia(1)	530,896	160,216					2	0.52
Texas	3,383	3,383	1,333	1,333	2	2.00	4	3.02
California	1,280	1,280						
Alaska	122,174	122,174						
Total	1,557,733	395,053	1,333	1,333	2	2.00	6	3.54

(1) Subsequent to December 31, 2006, we sold all of our interests in Australia to an unrelated party.

The following table sets forth as of December 31, 2006, the expiration periods of the gross and net undeveloped acreage:

	United States		Undeveloped Acreage Indonesia		Australia(1)	
	Gross	Net	Gross	Net	Gross	Net
Twelve months ended						
December 31, 2007	2,135	2,135	900,000	108,000		
December 31, 2008	123,691	123,691			530,896	160,216
December 31, 2009	526	526				
December 31, 2010	44	44				
December 31, 2011 and later	441	441				
Total	126,837	126,837	900,000	108,000	530,896	160,216

(2) Subsequent to December 31, 2006, we sold all of our interests in Australia to an unrelated party.

Volumes, Prices and Production Costs

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Substantially all of our production is derived from our Madisonville Project in Madison County, Texas. The following table sets forth information with respect to our production volumes, average prices received and average production costs for the periods indicated:

	YEAR ENDED DECEMBER 31,		
	2006	2005	2004
Production:			
Natural gas (MMcf)	2,229	1,991	2,317
Natural gas (MMcfd)	6.11	5.46	6.35
Average Sales Prices (1)			
Natural gas (\$per Mcf)	\$ 3.01	\$ 4.01	\$ 2.51
Lease Operating Expense			
(\$per Mcf)	\$ 0.72	\$ 0.44	\$ 0.34

(1) Represents sales price realized net of treatment costs.

Business Risks and Other Special Considerations

Refer to Risk Factors on page 5 of this prospectus for a discussion of business risks and other special considerations.

LEGAL PROCEEDINGS

Litigation

From time to time, we are party to litigation or other legal and administrative proceedings that we consider to be a part of the ordinary course of our business. Currently, we are not involved in

any legal proceedings nor are we party to any pending or threatened claims that could, individually or in the aggregate, reasonably be expected to have a material adverse effect on our financial condition, cash flow or results of operations.

Crimson Complaint

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Please see the discussion regarding Crimson Exploration Inc.'s complaint against Gateway Processing Company and Hanover Compression Limited Partnership regarding gas deliveries to the Madisonville Field gas treatment plant set forth in the Properties section under the heading Texas Madisonville Project The Madisonville Gas Treatment Plant and Gathering Facilities.

MANAGEMENT

Directors and Executive Officers

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The following table sets forth information, as of October , 2007 about our directors and executive officers.

Name	Age	Position with GeoPetro(1)
Stuart J. Doshi	62	Director, Chairman, President and Chief Executive Officer
David V. Creel	68	Director and Vice President of Exploration
J. Chris Steinhauser	48	Director, Chief Financial Officer, Principal Accounting Officer and Corporate Secretary
Kevin M. Delehanty	50	Director
Thomas D. Cunningham(2)(3)	58	Director
David G. Anderson(2)(3)	54	Director
Nick DeMare(2)(3)	52	Director

Notes:

(1) Each of the directors has been appointed to hold office until the next annual meeting of shareholders or until their successor is duly elected or appointed, unless their office is earlier vacated. Our bylaws permit the Board itself to fill vacancies and appoint additional directors, subject to shareholder approval at the next annual meeting. Officers are appointed to serve until the meeting of the Board of Directors following the next annual meeting of shareholders and until their successors have been elected and qualified. Our bylaws currently authorize a minimum of four and a maximum of seven directors to serve on the Board of Directors. We have held one special meeting of our shareholders.

(2) Member of the Audit Committee.

(3) Independent, in accordance with the rules of the American Stock Exchange.

Stuart J. Doshi. Mr. Doshi has been actively engaged in the oil and gas business since 1970. Mr. Doshi began his oil and gas career with Natomas Company in 1970. He held various positions of increasing responsibility in planning, corporate development and financial management with Natomas. After leaving Natomas in 1985, Mr. Doshi served as a Senior Vice President of Energy Sources Group until 1988. Mr. Doshi then served as Vice President of Pan Pacific Petroleum, Inc. from 1988 to 1991. Immediately prior to forming GeoPetro, Mr. Doshi was the Managing Director of Sierra Overseas Corporation. Mr. Doshi founded GeoPetro in 1994 and has served as a director and our President and Chief Executive Officer since our inception and as Chairman of the Board

since March 1998. Mr. Doshi is a graduate of the University of San Francisco with a Bachelor's Degree in Finance and the University of California, Santa Barbara with a Master's Degree in Economics.

David V. Creel. Mr. Creel has 41 years oil and gas experience as a petroleum exploration geologist. Mr. Creel held various geological and supervisory positions in Libya during his eleven-year career with AMOSEAS (the operator for CALTEX Petroleum). Mr. Creel was also the Exploration Manager of the Rocky Mountain Region and Canada for Ladd Petroleum Company; Exploration Manager of the Rocky Mountain Region for Kilroy Company of Texas; and President of Aztec Resources Corporation. Since 1995, Mr. Creel worked as an independent geologic consultant and in June 1998 he joined GeoPetro in his current role as Vice President of Exploration. Mr. Creel has served as a director of GeoPetro since October 2001. Mr. Creel is a graduate of the University of Notre Dame with a Bachelor's degree in Geology and the University of Tulsa with a Master's degree in Geology.

J. Chris Steinhauser. Mr. Steinhauser is an accountant with 23 years of experience in the energy and financial services industries. Mr. Steinhauser began his career with Peat, Marwick, Mitchell & Co. from 1981 through 1984. From September 1987 through January 1998, Mr. Steinhauser was employed by Sharon Energy Ltd. and Sharon Resources, Inc., its operating subsidiary, ultimately serving as Executive Vice President and Chief Financial Officer of the parent and President, Chief Operating Officer and Director of the subsidiary. From January 1998 until June 2000 Mr. Steinhauser was employed by Beta Oil & Gas, Inc. as a director and Chief Financial Officer where his primary activities included Beta's initial public offering and listing on the NASDAQ National Market System, business development and corporate acquisitions. Mr. Steinhauser joined GeoPetro in June 2000 as its Chief Financial Officer and Vice President of Finance. Mr. Steinhauser has served as a director of GeoPetro since October 2001. Mr. Steinhauser is a graduate of the University of Southern California with a Bachelor's degree in Business and conducted graduate studies at the University of Denver Graduate Tax Program and was a certified public accountant.

Kevin M. Delehanty. Mr. Delehanty has 22 years of experience in the commercial real estate business. Mr. Delehanty is currently a Senior Vice President with Colliers International Inc., an international real estate services firm. Prior to joining Colliers in March of 1996, Mr. Delehanty founded and operated Delehanty Commercial Brokerage (a sole proprietorship), a company which specialized in real estate leasing and investment transactions. Mr. Delehanty began his real estate career as a land specialist with Hayden & Smith Co. of Dallas, Texas. Mr. Delehanty has served as a director of GeoPetro since August 1997. Mr. Delehanty is a graduate of Southern Methodist University with a Bachelor's degree in Business Administration and a Bachelor's degree in Fine Arts.

Thomas D. Cunningham. Mr. Cunningham has 31 years of experience in general management, with expertise in mergers and acquisitions, foreign exchange, sales, financial analysis and personnel management. Since January 2003, he has served as Senior Vice President of OfficePower L.L.C., a privately owned company in the distributed generation business. Prior to joining OfficePower L.L.C., Mr. Cunningham served as Executive Vice President and Chief Financial Officer of Microban International, Ltd., a seller and licensor of branded additives from 2000 to 2003. From 1997 to 2000, Mr. Cunningham was a member of the Board and Executive Vice President of EMCOR Group, Inc. Prior to EMCOR, Mr. Cunningham was with Swiss Army Brands Inc. from 1994 to 1997, where he served on the Board of Directors and as Executive Vice President and Chief Financial Officer. Prior to that position, Mr. Cunningham spent 21 years with

J.P. Morgan & Co., in various positions of increasing responsibility and last served as Managing Director in the Corporate Banking Group. Mr. Cunningham has served as a director of GeoPetro since April 2000. Mr. Cunningham is a graduate of Harvard College with a Bachelor's degree in Economics and Columbia University with a Master's degree in Business Administration.

David G. Anderson. Mr. Anderson is a Senior Vice President and director of Dundee Securities Corporation where he has managed the firm's investment banking and capital markets activities since 1998. Mr. Anderson began his career with the National Energy Board of Canada in 1976 and later was employed by Amoco Production Company from 1978 to 1986 in its Calgary, Chicago and Houston offices. In 1987, Mr. Anderson returned to Canada with Midland Doherty and later joined BBN James Capel where he was the Managing Director from 1988 to 1995. From 1995 to 1998, Mr. Anderson was a partner and Managing Director with another investment dealer, Loewen, Ondaatje, McCutcheon Limited. Mr. Anderson has served as a director of GeoPetro since March 2006. Mr. Anderson is a graduate from the University of Manitoba with a Master's degree in Business Administration and Bachelor's degree in Arts.

Nick DeMare. Mr. DeMare is a member in good standing of the Institute of Chartered Accountants of British Columbia. Since May 1991, Mr. DeMare has been the President of Chase Management Ltd., a private company which provides a broad range of administrative, management and financial services to private and public companies engaged in mineral exploration and development, gold and silver production, oil and gas exploration and production and venture capital. Mr. DeMare indirectly owns 100% of Chase Management Ltd. Mr. DeMare currently serves as an officer and director of the following public companies: Rochester Resources Ltd., a mineral interest acquisition and exploration company, Centrasia Mining Corp., a base and precious metal exploration company, Halo Resources Ltd., a mineral exploration company, and Tumi Resources Limited, a mineral exploration company, each of which trades on the OTC Bulletin Board. Mr. DeMare has served as a director of GeoPetro since March 2006. Mr. DeMare is a graduate of the University of British Columbia with a Bachelor's degree in Commerce.

Board of Directors

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

David Anderson, Thomas Cunningham and Nick DeMare are independent as defined by the rules of the American Stock Exchange. Stuart Doshi, David Creel, Chris Steinhauser and Kevin Delehanty are not independent. Our Board of Directors is not currently comprised of a majority of independent directors in reliance upon the phase-in period provided for by Section 809 of the American Stock Exchange Company Guide, which provides companies transferring from other markets that do not have substantially similar board independence requirements, one year from the date of listing to establish a Board of Directors consisting of a majority of independent directors.

Committees of the Board of Directors

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We currently have an Audit Committee of the Board of Directors which complies with the rules of the American Stock Exchange and the SEC. Our Audit Committee charter is available for viewing on our website, www.geopetro.com, under the investor relations section. The inclusion of our website address in this prospectus does not include or incorporate by reference the information on our website into this prospectus.

Audit Committee

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our Audit Committee currently consists of three directors, Thomas Cunningham, Nick DeMare and David Anderson. Messrs. Cunningham, DeMare and Anderson are independent as defined by the rules of the American Stock Exchange and the SEC. Each member of the Audit Committee meets the financial literacy and experience requirements of the SEC and American Stock Exchange rules. Mr. Cunningham serves as the chairperson of the Audit Committee and Nick DeMare is an audit committee financial expert under applicable SEC rules. We have adopted an Audit Committee charter that satisfies applicable SEC and American Stock Exchange rules.

Our Audit Committee charter requires that the Audit Committee oversee our corporate accounting and financial reporting processes. The primary duties of our Audit Committee are to, among other things:

evaluate our independent auditors' qualifications, independence and performance;

determine the engagement and compensation of our independent auditors;

approve the retention of our independent auditors to perform any audit and permissible non-audit services;

monitor the rotation of partners of the independent auditors on our engagement team as required;

review our consolidated financial statements;

review our critical accounting policies;

meet with our management periodically to consider the adequacy of our internal controls and procedures for financial reporting;

establish procedures for the receipt, retention and treatment of complaints regarding accounting, internal accounting controls or auditing matters and the confidential, anonymous submissions by employees of concerns regarding questionable accounting or auditing matters;

review on an ongoing basis and approve related party transactions;

prepare the reports required by the rules of the SEC to be included in our annual proxy statement;

discuss with our management and our independent auditors the results of our annual audit and the review of our quarterly consolidated financial statements.

Compensation Committee

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We do not have a Compensation Committee. The Board of Directors believes that it is in the best interest of the company to permit all independent directors to fully participate in the compensation decisions for our officers including Stuart Doshi, our President and Chief Executive Officer, Chris Steinhauser, our Chief Financial Officer, and David Creel, our Vice President of Exploration, as well as our directors. In accordance with the rules of the American Stock Exchange, the compensation of our Chief Executive Officer and all other officers are determined, or recommended to the Board of Directors for determination by a majority of independent directors. In addition, the independent directors' duties include:

establishing overall employee compensation policies and recommending to our board of directors major compensation programs;

reviewing and approving the compensation of our corporate officers and directors, including salary, bonus awards and stock option grants;

administering our various employee benefit, pension and equity incentive programs;

reviewing executive officer and directors indemnification and insurance matters;

managing and reviewing employee loans; and

preparing a report on executive compensation for inclusion in our annual report and, as applicable, our proxy or information statement.

Our independent directors who participate in the consideration of executive officer and director compensation are David Anderson, Thomas Cunningham and Nick DeMare. In establishing compensation for our executive officers and directors, we do not rely on independent compensation consultants to analyze or prepare formal surveys for us. Our independent directors review executive compensation on an annual basis. In establishing compensation to our executives, we strive to provide compensation that will: (1) motivate and retain executives and reward performance; (2) encourage our long-term success; (3) encourage the long-term enhancement of shareholder value; and (4) encourage the application of prudent decision-making processes in an industry marked by volatility and high risk.

Nominating Committee

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We do not have a Nominating Committee. The Board of Directors believes that it is in the best interest of the company to permit all independent directors to fully participate in the director nomination process. In accordance with the rules of the American Stock Exchange, director nominees are selected, or recommended to the Board of Directors for selection by a majority of independent directors. In addition, the independent directors' duties include:

establishing standards for service on our board of directors and nominating guidelines and principles;

identifying individuals qualified to become members of our board of directors and recommending director candidates for election to our board of directors;

considering and making recommendations to our board of directors regarding its size and composition, committee composition and structure and procedures affecting directors;

establishing policies regarding the consideration of any director candidates recommended by our stockholders, and the procedures to be followed by stockholders in submitting such recommendations;

evaluating and reviewing the performance of existing directors; and

monitoring our corporate governance principles and practices and making recommendations to our board of directors regarding governance matters, including our articles of incorporation, bylaws and charters of our committees.

Compensation of Directors

The following table sets forth the fees and awards paid to or earned by our directors (other than the named executive officers) for the fiscal year 2006.

Director Compensation Table

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Name(3)	Period	Fees Earned or Paid in Cash (\$)		Option Awards (\$)		Total (\$)
David Anderson	2006	\$	-0-	\$	20,608(1)\$	20,608
Thomas D. Cunningham	2006	\$	-0-	\$	3,523(2)\$	3,523
	2005	\$	-0-	\$	3,523 \$	3,523
	2004	\$	-0-	\$	3,523 \$	3,523
Kevin Delehanty	2006	\$	-0-	\$	7,926(2)\$	7,926
	2005	\$	-0-	\$	7,926 \$	7,926
	2004	\$	-0-	\$	7,926 \$	7,926
Nick Demare	2006	\$	-0-	\$	20,608(1)\$	20,608

(1) Represents compensation cost recognized in 2006 associated with options granted in 2006 which vested during 2006. Assumptions made in the valuation of the modification are discussed in *Note 8. Common Stock Options* of the footnotes to the financial statements contained herein. Messrs. Anderson and DeMare joined the Board on March 30, 2006.

(2) Represents compensation cost recognized in 2006 associated with options granted in 2003 which vested during 2006. Assumptions made in the valuation of the option grants are discussed in *Note 8. Common Stock Options* of the footnotes to the financial statements contained herein.

(3) The following table details information with respect to all options to purchase our common stock held by our named executive officers and outstanding on December 31, 2006:

Name	Number of Securities Underlying Unexercised Options		Option Exercise Price	Option Expiration Date
	Exercisable/Unexercisable (#)			
David Anderson	/	75,000	\$ 3.85	4/16/2011
Thomas D. Cunningham	50,000	/	\$ 2.00	12/29/2007
	80,000	/	\$ 2.10	5/13/2013
Kevin Delehanty	250,000	/	\$ 2.00	12/29/2007
	180,000	/	\$ 2.10	5/13/2013
Nick Demare	/	75,000	\$ 3.85	4/16/2011

(4) Mr. Cunningham also has a warrant to purchase 10,000 shares of our common stock, which is fully vested, as follows:

	Number of Securities Underlying Exercisable Warrants		Warrant Exercise Price	Warrant Expiration Date
	(#)			
	10,000		\$ 2.00	12/31/2008

The grant date fair values of option grants to our directors in 2006 are as follows:

Name	Grant Date	Number of Securities Underlying Options		Exercise Price	Total Grant Date Fair Market Value of Option Awards (\$)
		#			
David Anderson	4/17/06	75,000	\$	3.85	\$ 137,389(1)
Nick DeMare	4/17/06	75,000	\$	3.85	\$ 137,389(2)

(1) Represents the total fair value on the date of grant related to the issuance of certain common stock options exercisable to purchase 75,000 common stock to Mr. Anderson. For accounting purposes, this amount will be recognized ratably over a five year period, which is the vesting period. Assumptions made in the valuation of the issuance are discussed in *Note 8. Common Stock Options* of the footnotes to the financial statements contained herein. We granted the options to Mr. Anderson on April 17, 2006. The options have an exercise price of \$3.85 per share. The closing price on the Toronto Stock Exchange on the day preceding the date of grant was \$3.50 per share.

(2) Represents the total fair value on the date of grant related to the issuance of certain common stock options exercisable to purchase 75,000 common stock to Mr. DeMare. For accounting purposes, this amount will be recognized ratably over a five year period, which is the vesting period. Assumptions made in the valuation of the issuance are discussed in *Note 8. Common Stock Options* of the footnotes to the financial statements contained herein. We granted the options to Mr. DeMare on April 17, 2006. The options have an exercise price of \$3.85 per share. The closing price on the Toronto Stock Exchange on the day preceding the date of grant was \$3.50 per share.

Summary of Director Compensation

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We do not provide cash compensation to our directors for their services as members of the Board or for attendance at Board or audit committee meetings. However, our directors will be reimbursed for reasonable travel and other expenses incurred in connection with attending meetings of the Board and its committees. Under our Stock Option Plan, directors are eligible to receive stock option grants at the discretion of the Board of Directors.

On April 17, 2006, subsequent to their appointment to the Board effective March 30, 2006, Messrs. Anderson and DeMare were each granted options to purchase 75,000 shares of our common stock at an exercise price of \$3.85 per share. These options have a term of five years and vest in five equal annual installments beginning on April 17, 2007.

Compensation Committee Interlocks and Insider Participation

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

None of our executive officers has served as a director or member of a compensation committee (or board committee performing equivalent functions or, in the absence of any such committee, the entire board of directors) of any other entity, any of whose executive officers served as one of our directors, or Compensation Committee members, or independent directors participating in compensation decisions, of our board of directors. In 2006, Stuart Doshi, our chief executive officer and president, served on the Compensation Committee of our board of directors.

EXECUTIVE COMPENSATION

Compensation Discussion and Analysis

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We do not presently have a Compensation Committee. The Board of Directors believes that it is in the best interest of the company to permit all independent directors to fully participate in the compensation decisions for our executive officers. In accordance with the rules of the American Stock Exchange, the compensation of our President and Chief Executive Officer, Stuart Doshi, and all other officers including Chris Steinhauser and David Creel are determined, or recommended to the Board of Directors for determination, by a majority of independent directors. The independent directors also consider the input of our Mr. Doshi in making their recommendations for Messrs. Creel and Steinhauser.

Our independent directors are responsible for reviewing executive compensation on an annual basis. Compensation for our executive officers consists of three components:

base salaries;

stock option grants; and

cash bonuses.

In establishing the compensation paid to our executives, we emphasize providing compensation that will: (1) motivate and retain executives and reward performance; (2) encourage our long term success; (3) encourage the long term enhancement of shareholder value; and (4) encourage the application of prudent decision making processes in an industry marked by volatility and high risk.

Historically, we have evaluated compensation paid to our executive officers based upon the following factors:

the growth in our oil and gas reserves and production;

cash flow;

the extent to which our executive officers have been successful in finding and creating opportunities for us to participate in attractive oil and gas projects;

the ability of our executives to formulate and maintain sound budgets for drilling ventures and other business activities;

our overall financial condition;

the extent to which proposed business plans are met; and

by comparing the compensation packages of our executive officers with the compensation packages of executive officers of other companies in the oil and gas industry, which are similar to us in their size and operations among other factors.

We do not assign relative weights or rankings to these factors. Instead, we make subjective determinations based upon a consideration of all of these factors. While specific performance levels or benchmarks are not used to establish compensation, we do take into account our overall progress over time.

In establishing compensation for our executive officers, we do not rely on independent consultants to analyze or prepare formal surveys for us; however, we make informal comparisons of our executives' compensation with the compensation paid to executives of other publicly and privately held companies similar to ours. In addition, we take into account the fact that we do not provide significant perquisites and we provide no retirement plan or pension benefits to our executive officers.

In reviewing the overall compensation of Mr. Doshi, our Chief Executive Officer, in 2006 and previous periods, we took into account the fact that Mr. Doshi declined receiving an increase in his base salary since 2003 or an award of stock options since 2003. Throughout 2006, we were faced with intense competition in the oil and gas industry, including competition for oil and gas leases, and scarcity of available drilling rigs and goods and services related to the drilling, testing and completion of wells. While industry competition has intensified in the

past several years, particularly from competitors that have similar or greater financial and human resources than we do, we believe the insight, experience and leadership of Mr. Doshi has been instrumental in keeping us positioned to access sufficient capital and remain competitive. Additionally, Mr. Doshi, in his capacity as Chief Executive Officer, has been responsible for achieving a number of historical benchmarks for us, including, but not limited to:

Negotiating with Hanover and Gateway the installation and construction of a new gas treatment plant and related pipelines which became operational in 2003 in the Madisonville Project which was necessary in order to treat natural gas production from our wells in the Madisonville Field in Texas (See Properties Madisonville Project The Madisonville Gas Treatment Plant and Gathering Facilities).

Arranging the sale of the gas treatment plant by Hanover to MGP and the related commitment by MGP to expand the treating capacity of the plant from 18 MMcf/d to 68 MMcf/d (See Properties Madisonville Project The Madisonville Gas Treatment Plant and Gathering Facilities).

The drilling of additional wells at the Madisonville Project in an industry environment affected by intense competition and shortages of available drilling rigs and associated goods and services.

The acquisition of the Cook Inlet Project (See Properties Alaska The Cook Inlet Alaska CBM Project).

On March 30, 2006, we completed an initial public offering in Canada, which consisted of 3,730,021 shares of common stock at an issue price of \$3.50 per share and 519,500 shares of common stock issued on a flow-through basis under the Income Tax Act (Canada) at an issue price of \$3.85 per share for aggregate gross proceeds of \$15,055,149. (See Management's Discussion And Analysis).

On September 29, 2006 we sold 70% of our interest in C-G Bengara to CNPC-HK in exchange for a substantial financial commitment from CNPC-HK to conduct exploration, appraisal and development activities on the Bengara II PSC production sharing contract in Indonesia. We have retained a 12% stake in C-G Bengara and the Bengara II PSC. (See Properties Indonesia).

The sale of in October 2005 in another Indonesian production sharing contract for cash consideration of \$2,400,000 (See page F-19 in the footnotes to the financial statements).

The settlement in June 2006 of all of our pending litigation related to two lawsuits, titled the Miller Lawsuit and Redwood vs. George Mejlender (See Management's Discussion And Analysis).

Messrs. Doshi, Steinhauser and Creel are currently parties to employment agreements whereby their base salaries are fixed for the terms of their agreements, with the exception of Mr. Doshi's base salary, which is subject to an annual inflation adjustment based on the 1995 Consumer Price Index, per the terms of his employment agreement. We have amended Messrs. Doshi, Steinhauser and Creel's employment agreements in the past to provide for increases in base salary. When determining base salaries, we perform a subjective analysis of each executive officer's contributions and overall performance, consider the current compensation paid to executives of similar companies, and the officer's current salary.

During 2006, salaries accounted for approximately 84% of total compensation for the Chief Executive Officer and 79% on average for our other named executive officers.

When awarding stock options, we attempt to provide executives with an incentive compensation vehicle that could result in future additional compensation to them, but only if the value of our common stock increases for all stockholders. We perform a subjective analysis of each executive officer's contributions, and we consider the number of options granted on prior occasions and the length of time between option grants. All stock options are granted with exercise prices equal to or above the fair market value of the common stock on the date of grant.

We have not granted any options to our named executive officers since 2003. The option grants in 2003 were made pursuant to our 2001 Stock Incentive Plan and were granted with an exercise price that was above the estimated fair market value of our common stock at that time. The options were granted with a five year vesting schedule providing that 20% of the options would vest on each one year anniversary of the date of grant of May 13, 2003. We determined that the five year vesting schedule was appropriate to provide a long term

incentive to the named executive officers to remain employed with us and to work toward the long term best interests of all of our shareholders.

In 2004, we implemented a new 2004 Stock Option and Appreciation Rights Plan (the **Stock Option Plan**) providing for awards of incentive stock options, non-qualified stock options and stock appreciation rights. The Stock Option Plan replaced the 2001 Stock Incentive Plan as to new award grants effective in 2004 or thereafter to our directors, officers, employees and consultants. The terms of the Stock Option Plan will govern future grants to our named executive officers. The terms provide, among other things, that the exercise price of option grants shall be no less than 110% of the fair market value of the common stock on the date of grant and that such grant shall vest at a rate no less than twenty percent (20%) over five years from the date of grant. We do not have specific established criteria for determining the timing of option grants.

During 2006, stock option equity incentives accounted for approximately 14% of total compensation for the Chief Executive Officer and 16% on average for our other named executive officers. These amounts pertain to options and warrants that were granted in prior periods that either vested during 2006 or were modified during 2006. See the Summary Compensation Table below for an explanation of these items. There were no grants of stock options to our named executive officers in 2006. The Board determined that our named executive officers had a sufficient equity stake in GeoPetro, consisting of shares of common stock and/or existing options and warrants, to align their interests with ours and our stockholders.

Bonuses for each of our named executive officers are discretionary. During 2006, Mr. Doshi declined to receive a bonus and we awarded Messrs. Creel and Steinhauser a cash bonus of \$7,000 and \$10,000, respectively. In future periods, in considering whether to award bonuses, we will consider such factors as enumerated above in determining overall compensation, with a particular emphasis on our profitability and financial condition.

During 2006, cash bonus awards accounted for approximately 5% on average for our named executive officers other than the Chief Executive Officer, who declined to receive a bonus. In determining the bonus amounts, our Board took into consideration that our named executive officers have significant equity interests in us through direct ownership of shares or prior option grants, which already provide them with performance incentives.

We provide certain personal benefits to our Chief Executive Officer in the form of life and disability insurance. During 2006, personal benefits accounted for approximately 2% of total compensation for the Chief Executive Officer.

We do not have any established formal criteria to determine how decisions regarding one compensation element might affect decisions regarding other compensation elements or fit into our overall compensation objectives.

The employment agreements with our named executive officers provide for certain payments in the event of a change in control and/or termination. Mr. Doshi's employment agreement provides for substantial and immediate cash payments in the event of a change in control or termination. Messrs. Steinhauser and Creel are entitled to post employment compensation in the event of termination without cause. The amounts of, and the conditions precedent for, such payments are discussed in detail in this prospectus under Potential Payments Upon Termination or Change in Control.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

It is our conclusion that the amount and types of compensation currently being paid to our executive officers are sufficient to retain and motivate them, reward their performance and encourage their efforts to increase the value of our common stock for all stockholders.

Compensation of Executive Officers

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The following table sets forth all compensation awarded to, earned by or paid to our Chief Executive Officer, Chief Financial Officer and our other most highly compensated executive officer whose annual salary and bonus exceeded \$100,000 for services rendered during our 2004, 2005 and 2006 fiscal years. These three officers are referred to as the named executive officers in this prospectus. No other executive officer received a combined salary and bonus of more than \$100,000 in the fiscal years ended December 31, 2004, 2005 and 2006.

Summary Compensation Table

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Name and Principal Position(1)	Year	Salary (\$)	Bonus (\$)	All Other Compensation (\$)	Option Awards (\$)	Total (\$)
Stuart J. Doshi	2006	407,565(2)		(2) 10,308(3)	69,888(4)	487,761
Chairman, President and Chief Executive Officer	2005	401,802	30,333	9,633	35,226	476,994
	2004	363,530		9,082	535,226(5)	907,838
David V. Creel	2006	125,000(6)	7,000		5,284(7)	137,284
Vice President of Exploration	2005	150,000	11,000		5,284	166,284
	2004	132,000			5,284	137,284
J. Chris Steinhauser	2006	150,000(8)	10,000		64,275(9)	224,275
Chief Financial Officer	2005	150,000	11,000	8,654(10)	5,284	174,938
(Principal Accounting Officer)	2004	132,000			5,284	137,284

- (1) None of the named executive officers received any compensation for their services as a director during 2006.
- (2) \$79,619 of Mr. Doshi's salary for 2006 consists of an annual inflation adjustment based on the 1995 Consumer Price Index, per the terms of his employment agreement. Mr. Doshi declined to receive a bonus award for 2006.
- (3) Represents life and disability insurance benefits paid on Mr. Doshi's behalf.
- (4) Includes \$35,226 of compensation cost recognized in 2006 associated with options granted in 2003 which vested during 2006. Assumptions made in the valuation of the option grants are discussed in *Note 8. Common Stock Options* of the Notes to Consolidated Financial Statements. Also includes the incremental fair value of \$34,992 related to the extension of the expiration date of an option to purchase 750,000 shares of our common stock which previously expired on April 30, 2006 and was extended to expire on April 30, 2008 and has an exercise price of \$0.50 per share. The extension was treated as a modification of the terms or conditions of an equity stock option or warrant award. Accordingly, the extension was treated as an exchange of the original award for a new award. Assumptions made in the valuation of the modification are discussed in *Note 8. Common Stock Options* of the Notes to Consolidated Financial Statements contained herein.
- (5) Includes \$500,000 of compensation cost recognized in 2004 associated with the exercise of stock options by Mr. Doshi. We issued 500,000 shares of our common stock for cash proceeds of \$500,000 pursuant to the exercise of stock options by Mr. Doshi. Concurrent with the exercise of the stock options, Mr. Doshi sold 117,647 shares of common stock to us at the estimated fair market value price prevailing at that time of \$4.25 per share. We recorded compensation expense of \$500,000 in connection with the purchase of stock. This transaction is discussed in *Note 8. Common Stock Options* of the Notes to Consolidated Financial Statements contained herein.
- (6) Mr. Creel's annual base salary during 2006 was \$150,000. He did not receive his full base salary during 2006 due to a temporary medical leave of absence. On December 18, 2006, the independent members of the board of directors acting on the recommendation of Mr. Doshi voted to increase Mr. Creel's annual salary to \$163,200 effective January 1, 2007.
- (7) Includes \$5,284 of compensation cost recognized in 2006 associated with options granted in 2003 which vested during 2006. Assumptions made in the valuation of the option grants are discussed in *Note 8. Common Stock Options* of the Notes to Consolidated Financial Statements contained herein.
- (8) Mr. Steinhauser's base salary during 2006 was \$150,000. On December 18, 2006, the independent members of the board of directors acting on the recommendation of Mr. Doshi voted to increase Mr. Steinhauser's annual salary to \$163,200 effective January 1, 2007.

(9) Includes \$5,284 of compensation cost recognized in 2006 associated with options granted in 2003 which vested during 2006. Assumptions made in the valuation of the option grants are discussed in *Note 8. Common Stock Options* of the Notes to Consolidated Financial Statements contained herein. Also includes the incremental fair value of \$58,991 related to the extension of the expiration dates of: (a) a warrant to purchase 150,000 shares of our common stock which previously expired on June 18, 2006 and was extended to expire on June 30, 2007 and has an exercise price of \$2.00; and (b) a warrant to purchase 33,333 shares of our common stock which previously expired on June 18, 2006 and was extended to expire on April 30, 2008 and has an exercise price of \$3.00. The extensions were treated as modifications of the terms or conditions of an equity stock option or warrant award. Accordingly, the extensions were treated as an exchange of the original award for a new award. Assumptions made in the valuation of the modification are discussed in *Note 8. Common Stock Options* of the Notes to Consolidated Financial Statements contained herein.

(10) Represents payment for cancellation of unused vacation time.

As indicated above, we extended the expiration dates of certain options and warrants to purchase our common stock which were previously granted to Messrs. Doshi and Steinhauser. The terms of the extensions are summarized below:

Name	Description	Underlying Option or Warrant	Exercise Price Per Share	Previous Expiration Date	Revised Expiration Date	Aggregate Value of Extension
Stuart J. Doshi	Common Stock Option	750,000	\$ 0.50	4/30/2006	4/30/2008	\$ 34,661.94
J. Chris Steinhauser	Common Stock Warrant	150,000	\$ 2.00	6/18/2006	6/30/2007	\$ 34,266.84
J. Chris Steinhauser	Common Stock Warrant	33,333	\$ 3.00	6/18/2006	4/30/2008	\$ 24,724.12
						\$ 93,652.90

The above listed options and warrants are fully vested.

Employment Agreements

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We entered into a contract of employment with Stuart J. Doshi, Founder, President, Chief Executive Officer and Chairman of the Board of Directors, dated July 28, 1997 (effective July 1, 1997) and amended on January 11, 2001, July 1, 2003, April 20, 2004, May 9, 2005, July 28, 2005 and January 30, 2006. The contract as amended currently provides for a five-year term which commenced May 1, 2005 which term is automatically extended for successive two-year renewal terms unless: (a) the Board of Directors elects not to renew the contract and we provide notice to Mr. Doshi of such non-renewal at least six months prior to the expiry of his employment term or any renewal term, (b) Mr. Doshi provides notice at any time prior to the expiry of his employment term or any renewal term that he elects not to renew the contract, or (c) Mr. Doshi attains age 75, in which case the term ends upon the completion of the calendar year in which he becomes 75 years old unless we and Mr. Doshi mutually agree to one-year extensions. The contract of employment provides for an annual base salary of \$300,000, subject to annual inflation adjustments based on the 1995 United States Department of Labor, Bureau of Labor Statistics Consumer Price Index of Urban Wage Earners and Clerical Workers. The contract also provided for options to purchase up to 750,000 shares of our common stock at an exercise price of \$0.50 per share which options, as amended, expire on April 30, 2008. See Note 11 to the financial statements on page F-34. The options are immediately exercisable. In the event that we file a registration statement under the 1933 Act, other than our initial registration statement, we have agreed to permit Mr. Doshi to include in the proposed registration the shares of our common stock that he would hold on exercise of his stock options and other securities issued to him, at no expense to him, subject to his payment of his own taxes, legal fees and underwriter's discounts, commissions and spreads.

We have entered into a contract of employment with David V. Creel, Vice President of Exploration, dated April 28, 1998 and amended on June 15, 2000, May 12, 2003 and January 1, 2005. The contract provides for a term of employment until June 1, 2009 at an annual salary of \$150,000 effective January 1, 2005. We issued options to Mr. Creel to acquire 100,000 shares of common stock at a price of \$2.00 per share pursuant to the original April 28, 1998 agreement. Mr. Creel exercised the option on May 31, 2005. The June 15, 2000

amendment provided that we would issue options to acquire an additional 100,000 shares of common stock at a price of \$2.00 per share. The options were issued with an effective grant date of May 31, 2000 and were subject to vesting over a five-year period with the first 20% vesting on the first anniversary of the date of grant and an additional 20% vesting on each of the four successive anniversaries. Mr. Creel exercised the option on May 31, 2005.

On December 18, 2006, the independent members of the board of directors, acting on the recommendation of Mr. Doshi, voted to increase Mr. Creel's annual base salary to \$163,200 effective January 1, 2007.

We have entered into a contract of employment with J. Chris Steinhauser, Vice President of Finance and Chief Financial Officer, dated June 19, 2000 and amended on December 12, 2002 and January 1, 2005. The contract provides for a term of employment until June 30, 2008 at an annual salary of \$150,000, effective January 1, 2005. The agreement with Mr. Steinhauser provided for a \$10,000 cash bonus payable upon execution of the agreement, which was paid in 2000. In addition, Mr. Steinhauser's employment agreement provided that we would issue warrants to purchase 250,000 shares of our common stock to Mr. Steinhauser. Such warrants, as amended, have terms expiring between June 2007 and April 2008, are fully vested, and as of December 31, 2006, remain outstanding. Each warrant entitles Mr. Steinhauser to purchase one share of our common stock as follows:

Exercise Price Per Common Share	No. of Common Shares Underlying Warrants	
\$ 2.00	2.00	150,000
\$ 3.00	3.00	33,333
\$ 4.00	4.00	33,333
\$ 5.00	5.00	33,334
Total		250,000

On December 18, 2006, the independent members of the board of directors, acting on the recommendation of Mr. Doshi, voted to increase Mr. Steinhauser's annual base salary to \$163,200, effective January 1, 2007.

GRANTS OF PLAN-BASED AWARDS

We did not grant any stock options or stock appreciation rights under any plan to any of our named executive officers during 2006.

Stock Incentive and Option Plans

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Effective as of September 10, 2001, the Board of Directors approved the 2001 Stock Incentive Plan (the **Stock Incentive Plan**), providing for awards under the terms and provisions of such plan of incentive stock options, nonqualified stock options, stock appreciation rights and restricted stock to our officers, directors, employees and consultants. The purpose of the Stock Incentive Plan was to attract, motivate, reward and retain personnel and provide incentive compensation through participation in our growth. The awards available under the Stock Incentive Plan were exercisable for up to 5,000,000 shares of our common stock.

In 2004, we implemented a new 2004 Stock Option and Appreciation Rights Plan (the **Stock Option Plan**) providing for awards of incentive stock options, non-qualified stock options and stock appreciation rights. The Stock Option Plan replaced the Stock Incentive Plan as to new award grants effective in 2004 or thereafter to our directors, officers, employees and consultants. Outstanding awards issued under the Stock Incentive Plan will continue to be outstanding in accordance with their terms and the terms of the Stock Incentive Plan, but will count toward the limits in the number of shares of common stock available to be issued under the Stock Option Plan, which is 5,000,000.

Awards to purchase 1,750,000 shares of our common stock were issued under the Stock Incentive Plan, and to date, awards to purchase 170,000 shares of our common stock have been issued under the Stock Option Plan. 3,080,000 shares remain available for issuance pursuant to award grants under the Stock Option Plan.

The Stock Option Plan is administered by the Board of Directors or a committee designated by the Board. The Board of Directors or committee designated by the Board determines the number of shares of common stock which may be purchased pursuant to an award grant, the exercise price, vesting schedule, expiration date, and all other terms and conditions of the award grant, subject to the terms of the Stock Option Plan.

The exercise price of stock options granted under the Stock Option Plan may not be less than 110% of the fair market value of our common stock on the date of grant. The maximum number of shares of common stock which may be reserved for issuance to insiders under the Stock Option Plan is 10% of our shares of common stock outstanding at the time of the grant, less any shares reserved for issuance to insiders under any other stock compensation arrangement. The maximum number of shares of common stock which may be issued to insiders under the Stock Option Plan is also subject to certain annual limits.

The following table sets forth information with respect to the options outstanding, under the Stock Option Plan and otherwise, as of October 4, 2007.

Group (Number)	Date Options Granted	Shares Underlying Option	Average Exercise Price(3)	Closing Price One Day Prior to Grant(3)	Expiry Date	Market Value of Options(4)
Executive Officers(3)	various	2,950,000	\$ 1.66	N/A	various(2)	\$ 6,865,500
Directors(1)(3)(4)	various	775,000	\$ 2.40	N/A	various(2)	\$ 1,232,250
Employees(3)	various	185,000	\$ 2.42	N/A	various(2)	\$ 290,650
Total		3,910,000	\$ 1.84			\$ 8,388,400

Notes:

- (1) Directors who are not also executive officers.

(2) Options have expiry dates not more than 10 years following their date of grant. Currently outstanding options have expiry dates between February 28, 2007 and May 13, 2013.

(3) The stock options were issued prior to February of 2006 and therefore no public trading market existed for our common stock with the exception of the grant of options exercisable to purchase 75,000 common stock to each of David Anderson and Nick DeMare. We granted the options to Mr. Anderson and Mr. DeMare, 150,000 options in total, on April 17, 2006. The options have an exercise price of \$3.85 per share. The closing price on the Toronto Stock Exchange on the day preceding the date of grant was \$3.50 per share.

(4) Based on the closing price of our common stock on the American Stock Exchange on October 4, 2007.

Outstanding Equity Awards at Fiscal Year-End 2006

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The following table details information with respect to all options and warrants to purchase our common stock held by our named executive officers and outstanding on December 31, 2006.

Name	Name of Securities Underlying Unexercised Options/Warrants		Option/Warrant Exercise Price	Option/Warrant Expiration Date
	Exercisable/	Unexercisable (#)		
Stuart J. Doshi	750,000	/	\$ 0.50	4/30/2008
President and Chief Executive Officer	750,000	/	\$ 2.00	12/29/2007
	800,000	/	200,000(1)\$ 2.10	5/13/2013
David V. Creel	100,000	/	\$ 2.00	12/29/2007
Vice President of Exploration	120,000	/	30,000(2)\$ 2.10	5/13/2013
J. Chris Steinhauser	50,000	/	\$ 2.00	12/29/2007
Chief Financial Officer	120,000	/	30,000(3)\$ 2.10	5/13/2013
	150,000	/	\$ 2.00	6/30/2007
	33,333	/	\$ 3.00	4/30/2008
	33,333	/	\$ 4.00	6/18/2007
	33,334	/	\$ 5.00	6/18/2007

(1) Mr. Doshi has 200,000 common stock options which are not yet vested. The unvested common stock options will vest on May 13, 2008. Mr. Doshi must still be employed by us on the vesting date in order to vest his options, subject to certain exceptions. See Potential Payments Upon Termination or Change in Control.

(2) Mr. Creel has 30,000 common stock options which are not yet vested. The unvested common stock options will vest on May 13, 2008. Mr. Creel must still be employed by us on the vesting date in order to vest his options. However, if Mr. Creel is terminated without cause, all unvested options shall immediately vest. See Potential Payments Upon Termination or Change in Control.

(3) Mr. Steinhauser has 30,000 common stock options which are not yet vested. The unvested common stock options will vest on May 13, 2008. Mr. Steinhauser must still be employed by us on the vesting date in order to vest his options.

Option Exercises in 2006

There were no option exercises by the named officers during 2006. None of our named executive officers holds any shares of restricted stock or any other stock awards subject to vesting requirements.

Indebtedness of Directors and Officers

None of our directors or officers, nor any of their associates or affiliates, are or have been indebted to us, nor have any of the foregoing been the subject of a guarantee, support agreement, letter of credit or similar arrangement or understanding provided by us.

Potential Payments Upon Termination or Change in Control

Messrs. Doshi, Steinhauser and Creel are currently parties to employment agreements which provide for payments upon the termination of their employment under certain circumstances.

Mr. Doshi's employment contract provides that the Company has the right to terminate his employment at any time prior to the expiration of his employment term for cause and that he may voluntarily terminate his employment with the Company, in his sole discretion, prior to the expiration of his employment term. Upon termination for cause, Mr. Doshi may exercise any vested stock options within 30 days of his termination, and upon a voluntary termination by Mr. Doshi, he may exercise his vested stock options until such options expire. If Mr. Doshi's employment had been terminated by the Company for cause, or terminated by Mr. Doshi voluntarily on the last business day of the Company's last completed fiscal year (December 29, 2006), the in-the-money market value of Mr. Doshi's 2,100,000 vested stock options based on the \$2.60 closing market price of our common stock, as quoted on the Toronto Stock Exchange on December 29, 2006, would have been \$2,325,000.

Mr. Doshi's employment contract also provides that at any time prior to the expiration of his employment term: (a) the Company has the right to terminate his employment for any reason, in the sole discretion of the Board of Directors; and (b) Mr. Doshi has the right to terminate his employment if the Company materially breaches any material term of his employment agreement and fails to correct such breach for 30 days following written notice of such breach. Upon either of such events, or an Involuntary Termination (as herein defined), all unvested options issued by us to Mr. Doshi will vest and Mr. Doshi is entitled to receive:

(a) in exchange for all of his vested stock options and vested restricted shares, such number of shares of common stock having a market value equal to the difference between (x) the aggregate total market value of all vested restricted shares and shares of common stock he would receive upon exercise of all vested stock options less (y) the aggregate total exercise price for all of his vested stock options; provided, however, that if the common stock to be delivered to Mr. Doshi upon such change of control or termination have not been registered so as to permit immediate public resale, Mr. Doshi shall instead receive a cash payment equal to the market value on the date of termination of all vested stock options and restricted shares without any discount for liquidity or minority position against cancellation of such options and restricted shares,

(b) a cash payment equal to the greater of (i) his salary for the remainder of his term and the aggregate amount of his bonuses in respect of the last four fiscal years and (ii) four times his compensation in the current year and the aggregate amount of his bonuses for the last four fiscal years, and

(c) an additional cash payment representing his employment benefits equal to 20% of the amount of salary he is entitled to receive under (b)(i) or (b)(ii) above, as applicable.

Involuntary Termination means the Company's failure to renew Mr. Doshi's employment agreement at the end of its five-year initial term or any renewal term (except for the automatic termination which occurs as a result of Mr. Doshi turning 75) or Mr. Doshi's termination of his employment with the Company, if such termination occurs within 90 days of (a) a change of control of the Company, (b) a reduction in title, duties or authority to below Chief Executive Officer, or (c) Mr. Doshi ceasing to report directly to the Board of Directors.

If the Company had terminated Mr. Doshi's employment for any reason, in the sole discretion of the Board of Directors, or Mr. Doshi had terminated his employment upon the Company's material breach of a material term of his employment agreement and failure to cure such breach for 30 days following written notice, as described above, or in the event an Involuntary Termination had occurred, in each instance on the last business day of the company's last completed fiscal year (December 29, 2006), the potential post-employment benefits payable to Mr. Doshi would have been as follows (estimates are based on the \$2.60 closing market price of our common stock as quoted on the Toronto Stock Exchange on December 29, 2006):

a. Provided the shares so delivered were entitled to immediate resale, he would have received 971,154 shares of common stock based on the following:

Number of Options	Exercise Price	Market Price	# of Shares
750,000	\$ 0.50	\$ 2.60	605,769
750,000	\$ 2.00	\$ 2.60	173,077
1,000,000	\$ 2.10	\$ 2.60	192,308
Total			971,154

If the common stock to be delivered to him upon the triggering event had not been registered so as to permit immediate resale, he would have instead received an immediate cash payment equal to the market value of all vested stock options totaling \$2,525,000 as follows:

Number of Options	Exercise Price	Market Price	Market Value of Options
750,000	\$ 0.50	\$ 2.60	\$ 1,575,000
750,000	\$ 2.00	\$ 2.60	450,000
1,000,000	\$ 2.10	\$ 2.60	500,000
Total			\$ 2,525,000

b. A cash payment equal to four times his 2006 salary of \$407,565 and the aggregate amount of his bonuses of \$30,333 for the last four fiscal years, for a total of \$1,660,593, payable immediately.

c. And an additional cash payment representing employment benefits equal to 20% of the amount calculated in paragraph (b) or \$332,119, payable immediately.

Mr. Creel's employment contract provides that Mr. Creel has the right to terminate his employment prior to the expiration of his employment term upon a material breach by the Company of a material term of his employment contract which remains uncorrected for 30 days following his written notice of such breach to the Company. In such event, Mr. Creel is entitled to receive his base salary for the remainder of the term, paid out over the remainder of the term in accordance with the Company's standard payroll practices for currently employed employees. In addition, all of Mr. Creel's unvested options will become immediately vested and exercisable.

If Mr. Creel had terminated his employment due to a material breach by the Company of a material term of his employment contract on the last business day of the Company's last completed fiscal year (December 29, 2006), Mr. Creel would have received monthly payments of salary totaling \$362,500, through June 1, 2009, and the market value of Mr. Creel's 60,000 unvested options would have been \$30,000 based on the \$2.60 closing market price of our common stock as quoted on the Toronto Stock Exchange on December 29, 2006.

Mr. Creel's employment contract also provides that his employment may be terminated by the Company for cause, terminated as a result of his death, and as a result of his incapacity. In such event, Mr. Creel's vested stock options may be exercised by Mr. Creel or his representative, as applicable, for 30 days from the date of termination in the event of a termination for cause, or for 180 days from the date of termination in the event of a termination due to his death or incapacity. If Mr. Creel's employment contract had been terminated for cause or as a result of his death or incapacity on the last business day of the Company's last completed fiscal year (December 29, 2006), the market value of Mr. Creel's 190,000 vested options would have been \$105,000 based on the \$2.60 closing market price of our common stock as quoted on the Toronto Stock Exchange on December 29, 2006.

Mr. Creel's employment contract provides that he may be terminated by us without cause upon the payment to Mr. Creel of cash payments equal to the lesser of three months' base salary or base salary during the remainder of the employment term, and, in the event of termination without cause, all unvested options issued by us to Mr. Creel will vest.

Mr. Steinhauser's employment contract provides that he may be terminated by us without cause upon the making of cash payments equal to the lesser of three months' base salary or base salary during the remainder of the employment term, and, in the event of termination without cause, Mr. Steinhauser may retain all warrants issued to him pursuant to his employment agreement, whether or not vested.

If Messrs. Creel and Steinhauser's employment agreements had been terminated without cause on the last business day of the company's last completed fiscal year (December 29, 2006), the potential post-employment benefits payable would have been as follows:

a. Messrs. Creel and Steinhauser would each be entitled to receive \$12,500 per month over a three month period for an aggregate amount of \$37,500.

b. In addition, all of Mr. Creel's unvested options would become immediately vested and exercisable. As of December 29, 2006, Mr. Creel had a total of 60,000 unvested options to purchase common stock at an exercise price of \$2.10 and an expiration date of May 13, 2013. The market value of the in-the-money portion of these unvested options was \$30,000 and the market value of the in-the-money portion of Mr. Creel's 190,000 vested options was \$105,000 based on the \$2.60 closing market price of our common stock as quoted on the Toronto Stock Exchange on December 29, 2006.

c. The market value of the in-the-money portion of Mr. Steinhauser's 140,000 vested options was \$75,000 and the market value of the in-the-money portion of Mr. Steinhauser's vested warrants was \$90,000 based on the \$2.60 closing market price of our common stock as quoted on the Toronto Stock Exchange on December 29, 2006.

Mr. Steinhauser's employment contract also provides that his employment may be terminated by the Company for cause, as a result of his death, and as a result of his disability. In the event Mr. Steinhauser's employment is terminated as a result of his death or disability, Mr. Steinhauser is entitled to the continued right to exercise any stock warrants granted to him pursuant to his employment contract, which have vested as of the date of termination. In the event Mr. Steinhauser's employment is terminated for cause, Mr. Steinhauser has the right to retain all warrants which are vested as of such date. Assuming Mr. Steinhauser's employment contract had been terminated for cause or as a result of his death or incapacity on the last business day of the Company's last completed fiscal year (December 29, 2006), the in-the-money market-value of Mr. Steinhauser's 250,000 vested warrants granted pursuant to his employment contract would have been \$90,000 based on the \$2.60 closing market price of our common stock as quoted on the Toronto Stock Exchange on December 29, 2006.

We provide the foregoing post-employment payments in order to attract and retain an appropriate caliber of talent for the position. We believe that our severance and change in control provisions are consistent with the provisions and benefit levels of other companies disclosing such provisions as reported in public SEC filings.

The payment and benefit levels to Messrs. Creel and Steinhauser that were determined under the various circumstances that trigger post employment payments or provision of benefits were based on negotiations between them and us.

The termination provisions of Mr. Doshi's employment contract were designed, in part, to impede and discourage a hostile takeover attempt and to protect the continuity of management. The termination provisions, including appropriate payment and benefit levels and the various

circumstances that trigger payments or provision of benefits, were determined through negotiations between Mr. Doshi, our directors and representatives of Dundee Securities Corporation, the lead underwriter in connection with a sale of common shares we completed on March 30, 2006.

SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The following table sets forth certain information about the beneficial ownership of common shares as of October 4, 2007 by:

Each of our directors;

Each of the named executive officers listed in the Summary Compensation table above;

All of our directors and executive officers as a group; and

Each person known to us to be the beneficial owner of more than 5% of our outstanding common shares.

For purposes of the following table, a person is deemed to be the beneficial owner of securities that can be acquired by that person within 60 days from October 4, 2007 upon the exercise of warrants or options or upon the conversion of convertible securities. Each beneficial owner's percentage is determined by assuming that options, warrants or conversion rights that are held by that person regardless of price, but not those held by any other person, and which are exercisable within 60 days from October 4, 2007 have been exercised.

The information in the following table is based upon information supplied by officers, directors, certain named individuals and principal shareholders. The percentage of beneficial ownership is based on 31,583,007 common shares outstanding on October 4, 2007, subject to adjustment for each beneficial owner as described above. Except as otherwise noted below, and subject to applicable community property laws, the persons named have sole voting and investment power with respect to all shares of common stock shown as beneficially owned by them. Unless otherwise indicated, the address of the following stockholders is c/o GeoPetro Resources Company, One Maritime Plaza, Suite 700, San Francisco, CA 94111.

Name of Beneficial Owner	Shares Beneficially Owned	Approximate Percent of Class Before and After the Offering (1)
Stuart J. Doshi, President, CEO and Chairman (2)	5,042,957	14.9%
David V. Creel, Vice President and Director (3)	470,000	1.5%
J. Chris Steinhauser, Chief Financial Officer and Director (4)	236,666	*
David Anderson, Director (5)	15,000	*
Thomas D. Cunningham, Director (6)	381,667	1.2%
Kevin Delehanty, Director (7)	1,210,880	3.8%
Nick DeMare, Director (8)	92,500	*
All executive officers, key persons and directors as a group, (7 persons)	7,449,670	21.4%
<u>5 percent or more shareholders:</u>		
Jeffrey C. Friedman 911 Moraga Ave., Suite 205 Laffayette, CA 94549	1,762,898	5.6%

* Less than 1.0%

(1) For the purposes of calculating the percent of class beneficially owned by a holder, shares of common stock which may be issued to that holder within 60 days of October 4, 2007 are deemed to be outstanding. Assumes the sale by the selling stockholders of all shares of common stock available for resale under this prospectus, except for 2,459,688 shares of common stock issuable upon exercise of warrants and 3,960,000 shares of common stock issuable upon exercise of options.

(2) Includes direct ownership of 2,742,957 common shares and stock options to purchase 2,300,000 common shares that are exercisable within 60 days of October 4, 2007.

(3) Includes direct ownership of 250,000 common shares and stock options to purchase 220,000 common shares that are exercisable within 60 days of October 4, 2007.

(4) Includes direct ownership of 33,333 common shares and stock options and warrants to purchase 203,333 common shares that are exercisable within 60 days of October 4, 2007.

(5) Includes stock options to purchase 15,000 common shares that are exercisable within 60 days of October 4, 2007.

(6) Includes direct ownership of 191,667 common shares, indirect ownership of 50,000 common shares and stock options and warrants to purchase 140,000 common shares that are exercisable within 60 days of October 4, 2007.

(7) Includes direct ownership of 779,880 common shares, indirect ownership of 1,000 common shares and stock options to purchase 430,000 common shares that are exercisable within 60 days of October 4, 2007.

(8) Includes indirect ownership of 77,500 common shares and stock options to purchase 15,000 common shares that are exercisable within 60 days of October 4, 2007.

SELLING SHAREHOLDERS

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

This prospectus relates to the proposed resale by the selling shareholders of up to 2,002,599 shares of outstanding common stock and the resale of up to 780,857 shares of common stock issuable upon exercise of warrants.

Any or all of the common shares offered hereby may be offered for sale pursuant to this prospectus by the selling shareholders from time to time. Please see Plan of Distribution. Accordingly, no estimate can be given as to the number of shares of common stock that will be held by the selling shareholders upon consummation of any such sales.

Unless otherwise indicated and subject to community property laws where applicable, we believe that each selling shareholder has sole voting and investment power over all shares of common stock shown as beneficially owned by them.

The following table sets forth as of October 4, 2007 certain information concerning the persons for whom we are registering the shares for resale to the public. We will not receive any of the proceeds from the sale of the shares by the selling shareholders. We prepared the table based on the information furnished to us by the selling shareholders named in the table below, and we have not sought to verify such information. Information concerning the selling shareholders may change from time to time and any changed information will be set forth in supplements to this prospectus if and when necessary; provided, however that the addition of any selling shareholders or other material changes will be set forth in a post-effective amendment to the registration statement.

The following table contains information as of October 4, 2007 regarding:

the amount of our common stock beneficially owned by selling shareholders prior to the commencement of the offering described in this prospectus;

the amount of our common stock offered by selling shareholders by means of this prospectus;

the amount of our common stock beneficially owned by selling shareholders after completion of the offering described in this prospectus; and

the percentage of our common stock beneficially owned by selling shareholders after completion of the offering described in this prospectus.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

For purposes of the following table, a person is deemed to be the beneficial owner of securities that can be acquired by that person within 60 days from October 4, 2007 upon the exercise of warrants or options. Each beneficial owner's percentage is determined by assuming that options, warrants or conversion rights that are held by that person regardless of price, but not those held by any other person, and which are exercisable within 60 days from October 4, 2007, have been exercised. There were 31,583,007 shares of our common stock outstanding as of October 4, 2007.

(1) Assumes the sale by the selling stockholders of all of the shares of common stock available for resale under this prospectus, except for those shares of common stock which are issuable upon exercise of warrants.

(2) Shares of common stock beneficially owned before and after the offering includes 125,844 shares issuable upon exercise of warrants owned by BlackRock Energy Opportunity Master Fund, L.P. BlackRock Capital Management, Inc. is the investment advisor for the BlackRock Energy Opportunity Master Fund, L.P. and, as such, has sole voting and investment control over these securities. Dan Rice is the Managing Director of BlackRock Capital Management, Inc. Number of shares offered hereby includes 125,844 shares issuable upon exercise of warrants.

(3) Shares of common stock beneficially owned before and after the offering includes 112,614 shares issuable upon exercise of warrants owned by SSR Energy and Natural Resources Hedge Fund LLC. State Street Research & Management Company is the investment advisor for the SSR Energy and Natural Resources Hedge Fund LLC and, as such, has sole voting and investment control over these securities. Dan Rice is the Managing Director of State Street

Research & Management Company. Number of shares offered hereby includes 112,614 shares issuable upon exercise of warrants.

(4) Shares of common stock beneficially owned before and after the offering includes 2,040 shares issuable upon exercise of warrants owned by Opus Select Strategies, LLC. BlackRock Capital Management, Inc. is the investment advisor for the Opus Select Strategies, LLC and, as such, has sole voting and investment control over these securities.

Dan Rice is the Managing Director of BlackRock Capital Management, Inc. Number of shares offered hereby includes 2,040 shares issuable upon exercise of warrants.

(5) Shares of common stock beneficially owned before and after the offering includes 41,190 shares issuable upon exercise of warrants owned by Edison Sources Ltd. State Street Research & Management Company is the investment advisor for the Edison Sources Ltd. and, as such, has sole voting and investment control over these securities. Dan Rice is the Managing Director of State Street Research & Management Company. Number of shares offered hereby includes 41,190 shares issuable upon exercise of warrants.

(6) Shares of common stock beneficially owned before and after the offering includes 30,000 shares issuable upon exercise of warrants owned by BlackRock Energy Opportunity (Employees) Fund, L.P. BlackRock Capital Management, Inc. is the investment advisor for the BlackRock Energy Opportunity (Employees) Fund, L.P. and, as such, has sole voting and investment control over these securities. Dan Rice is the Managing Director of BlackRock Capital Management, Inc. Number of shares offered hereby includes 30,000 shares issuable upon exercise of warrants.

(7) Shares of common stock beneficially owned before and after the offering includes 76,052 shares issuable upon exercise of warrants owned by ECS Capital Management, L.P. Russel Weinberg and Keith Behrens, General Partners, have shared voting and investment control over these securities. Messrs. Weinberg and Behrens are partners of Energy Capital Solutions, LP, a registered broker dealer. The number of shares being registered on behalf of ECS Capital Management, LP includes 60,078 shares underlying warrants which were issued as compensation for investment banking services. Number of shares offered hereby includes 76,052 shares issuable upon exercise of warrants.

(8) Shares of common stock beneficially owned before and after the offering includes 116,883 shares issuable upon exercise of warrants owned by Ironman PI Fund (QP), L.P. G. Bryan Dutt, Managing Director, has sole voting and investment control over these securities. Number of shares offered hereby includes 116,883 shares issuable upon exercise of warrants.

(9) Shares of common stock beneficially owned before and after the offering includes 150,000 shares issuable upon exercise of warrants owned by Carlyle Multi-Strategy Master Fund, Ltd. Carlyle-Blue Wave Partners Management, LP (CBWPM) is the investment manager for Carlyle Multi-Strategy Master Fund, Ltd. and has sole voting and investment control over these securities. Ralph Reynolds and Richard Goldsmith are the managing members of a managing member of the general partner of CBWPM, and each of Mr. Goldsmith, Mr. Reynolds, and CBWPM may thereby be deemed to have beneficial ownership of such securities. To the extent permitted by law, Mr. Goldsmith, Mr. Reynolds, CBWPM and any entities controlled by any of them, each disclaim beneficial interest in such securities. Number of shares offered hereby includes 150,000 shares issuable upon exercise of warrants.

(10) Shares of common stock beneficially owned before and after the offering includes 3,896 shares issuable upon exercise of warrants. Mr. Nelson is a partner with Energy Capital Solutions, LP, a registered broker dealer. Number of shares offered hereby includes 3,896 shares issuable upon exercise of warrants.

(11) Shares of common stock beneficially owned before and after the offering includes 2,338 shares issuable upon exercise of warrants. Mr. Czuppon is associated with Energy Capital Solutions, LP, a registered broker dealer. Number of shares offered hereby includes 2,338 shares issuable upon exercise of warrants.

(12) Shares of common stock beneficially owned before and after the offering includes 25,000 shares issuable upon exercise of warrants. Number of shares offered hereby includes 50,000 shares issuable upon exercise of warrants.

(13) Shares of common stock beneficially owned before and after the offering includes 15,000 shares issuable upon exercise of warrants. Number of shares offered hereby includes 15,000 shares issuable upon exercise of warrants.

(14) Shares of common stock beneficially owned before and after the offering includes 5,000 shares issuable upon exercise of warrants. Number of shares offered hereby includes 5,000 shares issuable upon exercise of warrants.

(15) Shares of common stock beneficially owned before and after the offering includes 25,000 shares issuable upon exercise of warrants. Thomas M. Skirvin, Principal, has sole voting and investment control over these securities. Number of shares offered hereby includes 25,000 shares issuable upon exercise of warrants.

(16) Shares of common stock beneficially owned before and after the offering includes 200,000 shares issuable upon exercise of warrants. James W. Fisher, has sole voting and investment control over these securities. Number of shares offered hereby includes 50,000 shares issuable upon exercise of warrants.

PLAN OF DISTRIBUTION

The selling security holders and any of their pledgees, donees, assignees and successors-in-interest may, from time to time, sell any or all of their shares of common stock being offered under this prospectus on any stock exchange, market or trading facility on which shares of our common stock are traded or in private transactions. These sales may be at fixed or negotiated prices. The selling security holders may use any one or more of the following methods when disposing of shares:

ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;

block trades in which the broker-dealer will attempt to sell the shares as agent but may position and resell a portion of the block as principal to facilitate the transaction;

purchases by a broker-dealer as principal and resales by the broker-dealer for its account;

an exchange distribution in accordance with the rules of the applicable exchange;

privately negotiated transactions;

to cover short sales made after the date that the registration statement of which this prospectus is a part is declared effective by the Securities and Exchange Commission;

broker-dealers may agree with the selling security holders to sell a specified number of such shares at a stipulated price per share;

a combination of any of these methods of sale; and

any other method permitted pursuant to applicable law.

The shares may also be sold under Rule 144 under the Securities Act, if available, rather than under this prospectus. The selling security holders have the sole and absolute discretion not to accept any purchase offer or make any sale of shares if they deem the purchase price to be unsatisfactory at any particular time.

The selling security holders may pledge their shares to their brokers under the margin provisions of customer agreements. If a selling security holder defaults on a margin loan, the broker may, from time to time, offer and sell the pledged shares.

Broker-dealers engaged by the selling security holders may arrange for other broker-dealers to participate in sales. Broker-dealers may receive commissions or discounts from the selling security holders (or, if any broker-dealer acts as agent for the purchaser of shares, from the purchaser) in amounts to be negotiated, which commissions as to a particular broker or dealer may be in excess of customary commissions to the extent permitted by applicable law.

If sales of shares offered under this prospectus are made to broker-dealers as principals, we would be required to file a post-effective amendment to the registration statement of which this prospectus is a part. In the post-effective amendment, we would be required to disclose the names of any participating broker-dealers and the compensation arrangements relating to such sales.

The selling security holders and any broker-dealers or agents that are involved in selling the shares offered under this prospectus may be deemed to be underwriters within the meaning of the Securities Act in connection with these sales. Commissions received by these broker-dealers or agents and any profit on the resale of the shares purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act. Any broker-dealers or agents that are deemed to be underwriters may not sell shares offered under this prospectus unless and until we set forth the names of the underwriters and the material details of their underwriting arrangements in a supplement to this prospectus or, if required, in a replacement prospectus included in a post-effective amendment to the registration statement of which this prospectus is a part.

The selling security holders and any other persons participating in the sale or distribution of the shares offered under this prospectus will be subject to applicable provisions of the Exchange Act, and the rules and regulations under that act, including Regulation M. These provisions may restrict activities of, and limit the timing of purchases and sales of any of the shares by, the selling security holders or any other person. Furthermore, under Regulation M, persons engaged in a distribution of securities are prohibited from simultaneously engaging in market making and other activities with respect to those securities for a specified period of time prior to the commencement of such distributions, subject to specified exceptions or exemptions. All of these limitations may affect the marketability of the shares.

If any of the shares of common stock offered for sale pursuant to this prospectus are transferred other than pursuant to a sale under this prospectus, then subsequent holders could not use this prospectus until a post-effective amendment or prospectus supplement is filed, naming such holders. We offer no assurance as to whether any of the selling security holders will sell all or any portion of the shares offered under this prospectus.

We have agreed to pay all fees and expenses incident to the registration of the shares being offered under this prospectus. However, each selling security holder and purchaser is responsible for paying any discounts, concessions and similar selling expenses they incur.

We and certain of the selling security holders have agreed to indemnify one another against certain losses, damages and liabilities arising in connection with this prospectus, including liabilities under the Securities Act.

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

In the ordinary course of our business and in connection with our financing activities, we have entered into a number of transactions with our directors, officers and 5% or greater stockholders. We believe that we have executed all of the transactions set forth below on terms no less favorable to us than we could have obtained from unaffiliated third parties.

We appointed David G. Anderson as a Director on March 30, 2006. See Management . Mr. Anderson is the Senior Vice President and a director of Dundee Securities Corporation, the lead underwriter in connection with a sale of common shares we recently completed on March 30, 2006. The sale of common shares was conducted (a) outside the United States pursuant to the exemption from registration provided by Regulation S, and (b) within the United States only in accordance with an applicable exemption from the registration requirements of the 1933 Securities Act. The decision to distribute the common shares and the determination of the terms of the distribution were made through arm's length negotiations primarily between us and Dundee Securities Corporation as lead underwriter. Mr. Anderson had some involvement in such negotiations solely in his capacity as a director and officer of Dundee Securities Corporation. Dundee Securities Corporation received an underwriters' fee totaling \$632,000 in connection with the offering.

On June 6, 2005 we purchased 139,396 shares of common stock from Stuart Doshi, our President and Chief Executive officer, at the estimated fair market value prices on that date of \$4.25 per share for a total of \$592,433. We believe the purchase price of \$4.25 per share was at least as favorable to us as could have been obtained through arm's length negotiations with unaffiliated third parties since we also sold 939,194 shares of our common stock for \$4.25 per share in 2005.

On August 27, 2004, Mr. Doshi exercised an option to purchase 500,000 shares of common stock at an exercise price of \$1.00 per share. The option was granted to Mr. Doshi on August 30, 1999 pursuant to his services as our Chief Executive Officer.

On February 12, 2007, Stuart J. Doshi, President and CEO, loaned \$100,000 to the Company. The note bears interest at 8% annually and is payable on demand. The note plus accrued interest was repaid on March 28, 2007.

On May 31, 2005, David Creel, an executive officer and a director, exercised options to purchase 200,000 shares of common stock at an exercise price of \$2.00 per share. The options were granted to Mr. Creel pursuant to his services as an executive officer as follows: (i) 100,000 options on June 1, 1998 and (ii) 100,000 options on June 1, 2000.

On April 29, 2005, Thomas Cunningham, a director, exercised an option to purchase 100,000 shares of common stock at an exercise price of \$2.00 per share. The option was granted to Mr. Cunningham on April 30, 2000 pursuant to his services as a director.

On March 25, 2004, Kevin Delehanty, a director, exercised an option to purchase 70,900 shares of common stock at an exercise price of \$1.00 per share. The option was granted to Mr. Delehanty on August 30, 1999 pursuant to his services as a director.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

On August 25, 2004, Mr. Delehanty exercised a warrant to purchase 100,000 shares of common stock at an exercise price of \$1.00 per share. The warrant was granted to Mr. Delehanty on August 30, 1999 pursuant to his services as a director.

During 2004, we paid cash finders fees of \$165,670 to Mr. Delehanty in connection with our equity and debt financings as follows: (i) \$86,545 relating to the private placement issuances of 350,800 shares of our common stock at \$4.25 per share during July, August and September of 2004, and (ii) \$79,125 relating to the conversion into common stock of certain promissory notes and warrants held by a 5% shareholder as described below.

Effective March 22, 2004, we issued 539,000 shares of common stock to G. Carter Sednaoui and Rolling Hill Investors, LLC, an entity owned by Mr. Sednaoui, a 5% shareholder at the time of the transaction, pursuant to the exercise of warrants. Concurrently, Mr. Sednaoui and Rolling Hill Investors, LLC agreed to a \$1,347,500 reduction in the principal balance of certain of our promissory notes payable as consideration for the exercise of the warrants. The common stock warrants were exercisable at a price of \$2.50 and had an expiration date of December 31, 2008. The largest aggregate amount of principal outstanding on these promissory notes payable during 2004 was \$5,130,180. A total of \$2,508,948 in principal repayments were made toward the promissory notes during 2004. A total of \$334,358 of interest was paid toward the promissory notes during 2004 at interest rates between 8% and 11%. As of this date, the promissory notes have been repaid in their entirety.

Effective September 17, 2004, we issued 62,500 shares of common stock to Mr. Sednaoui pursuant to the conversion of a \$250,000 convertible note payable. The convertible note was issued on September 18, 2001 at an interest rate of 8% per annum for the purposes of funding our capital expenditures in the Madisonville Project in Texas. The largest aggregate amount of principal outstanding of this convertible note payable during 2004 was \$250,000. A total of \$14,262 of interest was paid toward the promissory note during 2004 at an interest rate of 8%. As indicated, the note was converted in 2004.

Effective September 30, 2004, we issued 117,648 shares of common stock to Mr. Sednaoui in exchange for a \$500,000 reduction in the principal balance of a promissory note payable dated July 19, 2004 as consideration. The largest aggregate amount of principal outstanding of this promissory note payable during 2004 was \$2,000,000. A total of \$500,000 in principal repayments were made toward the promissory note during 2004. A total of \$37,145 of interest was paid toward the promissory note during 2004 at an interest rate of 8%. As of this date, the promissory note has been repaid in its entirety.

During 2004, we sold 378,448 shares of common stock at a price of \$4.25 per share to Mr. Sednaoui and certain entities owned and controlled by him. We believe the purchase price of \$4.25 per share was at least as favorable to us as could have been obtained through arm's length negotiations with unaffiliated third parties since we sold 939,194 shares of our common stock for \$4.25 per share in the first half of 2005.

Previously, Eric Doshi, Stuart Doshi's son, was employed as our Manager of Planning. We paid Eric Doshi \$37,500, \$78,540 and \$105,689 during 2006, 2005 and 2004, respectively, for his services. Eric Doshi's compensation, based on industry comparables, was at least as favorable to us as could have been obtained through arm's length negotiations with unaffiliated third parties.

On January 23, 2007, our Board of Directors adopted a written Amended and Restated Audit Committee charter which provides that the Audit Committee shall review all related-party

transactions and potential conflict of interest situations involving amounts in excess of \$120,000 on an ongoing basis. Related party transactions include transactions between GeoPetro and:

Any of our directors or executive officers;

Any nominee for election as a director;

Any security holder who is known to us to own of record or beneficially more than five percent of any class of our voting securities; and

Any member of the immediate family of any of the foregoing persons.

The Audit Committee shall determine whether the terms of proposed related party transactions are at least as favorable to us as could be obtained through arm's length negotiations with unaffiliated third parties. In making such determinations, the Audit Committee shall consider, where practicable, some or all of the following factors:

Competitive bids;

Industry or market comparables;

Informal comparisons to similar transactions of other publicly and privately held companies similar to ours; and

Similar transactions entered into by the Company through arm's length negotiations with unaffiliated third parties.

The above described transactions that were entered into prior to the adoption of the Amended and our Restated Audit Committee charter on January 23, 2007, did not require approval or ratification by the Audit Committee. Since our adoption of the Amended and Restated Audit Committee charter, we have not entered into any related party transactions that have required approval or ratification by the Audit Committee.

MATERIAL INCOME TAX CONSEQUENCES

United States Federal Income Tax Considerations

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The following is a summary of the material U.S. federal income tax consequences relating to the purchase, ownership and disposition of our common shares applicable to non-U.S. holders (as defined below). This summary is based on the Internal Revenue Code of 1986 (the **Code**), and Treasury Regulations promulgated thereunder, administrative pronouncements and judicial decisions, changes to any of which, subsequent to the date of this prospectus, may affect the tax consequences described herein. We undertake no obligation to update this tax summary in the future. This summary applies only to non-U.S. holders that will hold our common shares as capital assets within the meaning of Section 1221 of the Code. This summary does not purport to be a complete analysis of all the potential tax consequences that may be material to a non-U.S. holder based on his, her or its particular tax situation. This summary also does not address tax consequences applicable to non-U.S. holders that may be subject to special tax rules, such as controlled foreign corporations, passive foreign investment companies, persons liable for the

alternative minimum tax, certain former citizens and long-term residents of the United States or corporations that accumulate earnings to avoid U.S. federal income tax. Such persons should consult with their own tax advisors to determine the U.S. federal tax consequences that may be relevant to them. In addition, this discussion does not address the tax treatment of partnerships or persons who hold their common shares through partnerships or other pass-through entities. A partner in a partnership that will hold our common shares should consult his or her tax advisor regarding the tax consequences of the ownership and disposition of our common shares. Moreover, this discussion does not consider the effect of any applicable state, local, foreign or other tax laws, including gift and estate tax laws.

References to a non-U.S. holder mean a beneficial owner of our common shares that for U.S. federal income tax purposes is other than:

an citizen or individual resident of the United States, as determined for U.S. federal income tax purposes;

a corporation, or other entity taxable as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States or any state thereof or the District of Columbia;

an estate the income of which is subject to U.S. federal income taxation regardless of its source; or

a trust that is subject to the primary supervision of a U.S. court and to the control of one or more U.S. persons, or that was in existence on August 20, 1996, and has a valid election in effect under applicable Treasury Regulations to be treated as a U.S. person.

Taxation of Distributions and Dispositions

Distributions on Common Shares

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

In general, if distributions are made with respect to our common shares, such distributions will be treated as dividends to the extent of our current and accumulated earnings and profits as determined under the Code and be subject to withholding as discussed in the following paragraph. Any portion of a distribution that exceeds our current and accumulated earnings and profits will first be applied to reduce the non-U.S. holder's basis in the common shares and, to the extent such portion exceeds the non-U.S. holder's basis, the excess will be treated as gain from the disposition of the common shares, the tax treatment of which is discussed below under Dispositions of Common Shares. In addition, if we are a U.S. real property holding corporation (**USRPHC**), and any distribution exceeds our current and accumulated earnings and profits, we will need to choose to satisfy our withholding requirements either by treating the entire distribution as a dividend, subject to the withholding rules in the following paragraph (and withhold at a minimum rate of 10%), or by treating only the amount of the distribution equal to our reasonable estimate of our current and accumulated earnings and profits as a dividend, with the excess portion of the distribution subject to withholding as if such excess were the result of a sale of shares in a USRPHC (discussed below under Dispositions of Common Shares).

Generally, dividends paid to a non-U.S. holder will be subject to U.S. withholding tax at a 30% rate, subject to the two following exceptions:

Dividends effectively connected with the conduct by the non-U.S. holder of a trade or business within the United States or, if a tax treaty applies, dividends effectively connected

with the conduct by the non-U.S. holder of a trade or business within the United States and attributable to a U.S. permanent establishment (or a fixed base in the case of an individual) maintained by the non-U.S. holder, generally will not be subject to withholding if the non-U.S. holder complies with applicable certification requirements of the Internal Revenue Service (IRS) and generally will be subject to U.S. federal income tax on a net income basis at regular graduated rates. In the case of a non-U.S. holder that is a corporation, such effectively connected dividends also may be subject to the branch profits tax at a 30% rate (or such lower rate as may be prescribed by an applicable tax treaty).

The withholding tax might not apply, or might apply at a reduced rate, under the terms of an applicable tax treaty. In the case of a non-U.S. holder entitled to the benefits of the income tax treaty between the U.S. and Canada, the tax rate is reduced to 15%. Under applicable Treasury Regulations, to obtain a reduced rate of withholding under a tax treaty, a non-U.S. holder generally will be required to satisfy applicable certification and other requirements prescribed by such Treasury Regulations. A non-U.S. holder of our common shares eligible for a reduced rate of U.S. withholding tax may obtain a refund of any excess amounts withheld by filing an appropriate claim for refund with the IRS.

Dispositions of Common Shares

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Generally, a non-U.S. holder will not be subject to U.S. federal income tax with respect to gain recognized upon the disposition of such non-U.S. holder's common shares unless:

We are or have been a USRPHC for U.S. federal income tax purposes at any time during the five-year period ending on the date of disposition or such shorter period that such common shares were held and certain trading requirements described below are not met;

the non-U.S. holder is an individual who is present in the United States for 183 days or more in the taxable year of disposition and certain other conditions are met; or

such gain is effectively connected with the conduct by the non-U.S. holder of a trade or business within the United States or, if a tax treaty applies, the gain is effectively connected with the conduct by the non-U.S. holder of a trade or business within the United States and is attributable to a U.S. permanent establishment (or a fixed base in the case of an individual) maintained by the non-U.S. holder.

An individual non-U.S. holder described in the second bullet point above will be subject to a flat 30% tax on the gain derived from the sale, which may be offset by U.S. source capital losses (even though the individual is not considered a resident of the United States). A non-U.S. holder described in the third bullet point above will be subject to tax on the gain derived from the sale under regular graduated U.S. federal income tax rates and, if it is a corporation, may be subject to the branch profits tax at a rate equal to 30% (or such lower rate as may be prescribed by an applicable tax treaty).

As to matters described in the first bullet point above, we believe we are currently a USRPHC for U.S. federal income tax purposes. Therefore, unless certain trading requirements described below are met, the sale of our common shares by a non-U.S. holder will be subject to U.S. federal income tax at normal graduated rates with respect to gain recognized. In addition, the purchaser of our common shares will be required to withhold tax at the rate of 10% of the amount realized from the sale and to report and remit such tax to the IRS within 20 days of the purchase. Such withheld amount is not an additional tax but is a credit against the non-U.S. holder's U.S. federal income tax

liability arising from the sale. If our common shares are regularly traded on an established securities market, however, the common shares will not be treated as an interest in a USRPHC (and therefore gain recognized on disposition will not be subject to U.S. federal income tax) with respect to non-U.S. holders who do not hold, actually or constructively, more than 5% of our outstanding common shares at any time during the five-year period ending on the date of disposition or such shorter period that such common shares were held. In addition, the purchaser of our common shares will not be required to withhold tax if our common shares are regularly traded on an established securities market (regardless of whether the selling non-U.S. holder held more than 5% of our outstanding common shares).

An established securities market consists of any of the following: (a) a United States national securities exchange which is registered under Sec. 6 of the Securities Exchange Act of 1934; (b) a non-United States national securities exchange which is officially recognized, sanctioned, or supervised by a governmental authority; or (c) any over-the-counter market. Presently, our common shares are traded on the American Stock Exchange (AMEX) which is a United States national securities exchange registered under Section 6 of the Securities Exchange Act of 1934. Thus our shares are presently traded on an established securities market.

Under temporary Treasury Regulations, for so long as 100 or fewer persons own 50% or more of our common shares (which is the case now and which we anticipate will continue to be the case for some period of time), the common shares will be regularly traded on an established securities market for a calendar quarter only if the established securities market is located in the United States and the common shares are regularly quoted by more than one broker or dealer making a market in the common shares. A broker or dealer makes a market in a class of stock only if the broker or dealer holds himself out to buy or sell shares of such class of stock at the quoted price.

At such time that it is no longer the case that 100 or fewer persons own 50% or more of our common shares, under temporary Treasury Regulations, our common shares would also be regularly traded on an established securities market for a calendar quarter if: (a) our common shares trade, other than in de minimis quantities, on at least 15 days during the calendar quarter; (b) the aggregate number of our common shares traded during the calendar quarter is at least 7.5% of the average number of our common shares outstanding during such calendar quarter (reduced to 2.5% if there are 2,500 or more record shareholders); and (c) in the event that our common shares are traded on an established securities market located outside the United States, either (x) the common shares are registered under Sec. 12 of the Securities Exchange Act of 1934, or (y) we attach a statement to our U.S. federal income tax return providing the following information:

a caption stating The following information concerning certain shareholders of this corporation is provided in accordance with the requirements of § 1.897-9T ;

the name and state in which we are incorporated, our principal place of business, and our employer identification number;

the identity of each person who, at any time during our tax year, was the beneficial owner of more than 5% of our common shares;

the total number of common shares issued; and

with respect to each beneficial owner of more than 5% of our common shares, the number of our common shares owned, the percentage of our common shares represented thereby, and the nature of the beneficial ownership of our common shares so owned.

Because the determination of whether we are a USRPHC depends on the fair market value of our U.S. real property interests relative to the fair market value of our foreign real property interests and other business assets, we may not be a USRPHC in the future. Even if and when we are no longer a USRPHC, however, generally only after we have not been a USRPHC for five consecutive years will the income tax and withholding requirements terminate.

Information Reporting and Backup Withholding

Information Reporting

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We must report annually to the IRS and to each non-U.S. holder the entire amount of any distribution irrespective of any estimate of the portion of the distribution that represents a taxable dividend paid to such non-U.S. holder, and the tax withheld with respect to such distribution. Copies of the information returns reporting such distributions and withholding may also be made available to the tax authorities in the country in which the non-U.S. holder resides under the provisions of an applicable income tax treaty.

The payment of proceeds from the sale of our common shares by a broker to a non-U.S. holder which is not subject to the USRPHC withholding and reporting rules discussed above is generally not subject to information reporting if:

the beneficial owner of our common shares certifies its non-U.S. status under penalties of perjury, or otherwise establishes an exemption; or

the sale of our common shares is effected outside the United States by a foreign office, unless the broker is:

a U.S. person as defined in the Code;

a foreign person that derives 50% or more of its gross income for certain periods from activities that are effectively connected with the conduct of a trade or business in the United States;

a controlled foreign corporation for U.S. federal income tax purposes; or

a foreign partnership, if, at any time during its tax year, one or more of its partners are U.S. persons as defined in Treasury Regulations, who in the aggregate hold more than 50% of the income or capital interest in the partnership or if, at any time during its tax year, the foreign partnership is engaged in a U.S. trade or business.

Backup Withholding

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Dividends paid to a non-U.S. holder of our common shares generally will be exempt from backup withholding if the non-U.S. holder provides a properly executed IRS Form W-8BEN or otherwise establishes an exemption. The payment of proceeds from a disposition of our common shares effected by a non-U.S. holder outside the United States by or through a foreign office of a broker generally will not be subject to backup withholding. Payment of the proceeds from a disposition by a non-U.S. holder of our common shares made by or through the U.S. office of a broker is generally not subject to backup withholding if the non-U.S. holder provides a properly executed IRS Form W-8BEN or otherwise establishes an exemption. Notwithstanding the foregoing, backup withholding may apply if either we, our paying agent or the broker had actual knowledge, or reason to know, that the non-U.S. holder is a U.S. person.

Backup withholding is not an additional tax. Any amount withheld under these rules from a payment to a non-U.S. holder will be allowed as a credit against such non-U.S. holder's U.S. federal income tax liability and may entitle such non-U.S. holder to a refund provided the required information is furnished timely to the IRS.

The U.S. federal income tax discussion set forth above is included for general information only and may not be applicable depending upon a non-U.S. holder's particular situation. Anything contained in this summary concerning any U.S. federal tax issue is not intended or written to be used, and it cannot be used, for the purpose of avoiding federal tax penalties under the Code. This summary was written to support the promotion or marketing of the transactions or matters addressed by this prospectus. Potential investors should consult their own tax advisors with respect to the tax consequences to them of the purchase, ownership and disposition of our common shares, including the tax consequences under U.S. federal, state, local, foreign and other tax laws, including gift and estate tax laws, and the possible effects of changes in federal or other tax laws.

DESCRIPTION OF SECURITIES

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our articles of incorporation authorize the issuance of up to 100,000,000 common shares, and 50,000,000 shares of blank check convertible preferred stock, which may be issued from time to time in one or more series and with such rights, preferences and limitations as the Board of Directors may designate.

Common Shares

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The holders of our common shares, no par value per shares, are entitled to one vote per share. The holders of common stock are entitled to cumulative voting rights with respect to the election of directors. Subject to the dividend preferences on outstanding preferred stock, the holders of our common shares are entitled to receive ratably on a share-for-share basis such dividends as may be declared by the Board of Directors. In the event of a liquidation, the holders of our common shares are entitled to share ratably in all assets remaining after payment of liabilities, subject to prior distribution rights of preferred stock.

Series AA Stock

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

On March 28, 2007, all 1,890,710 of our outstanding shares of Series AA Stock 8% Convertible Preferred automatically converted into 1,890,710 shares of our common stock, no par value per share. Under our Amended and Restated Articles of Incorporation the Series AA (Series AA Stock) stock automatically converted into common shares on a one-for-one share basis effective the first trading day after the reported high selling price for our common shares was at least \$5.25 per share for any consecutive ten trading days, which condition was met on March 27, 2007. Dividends accrued on the Series AA Stock at a rate of \$0.28 per annum, per share, while the Series AA Stock was outstanding. In 2006, dividends paid on the Series AA Stock totaled \$529,400. Pursuant to the terms of the Series AA Stock, no dividends were payable for the first quarter of 2007.

Shareholder Action

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

According to our Articles of Incorporation and Bylaws, concerning any act or action required of or by the shareholders, the affirmative vote of the holders of a majority of the issued and outstanding common stock is sufficient to authorize, affirm, ratify or consent to such act or action,

except as otherwise provided by law. Officers, directors and holders of 5% or more of our outstanding common stock do not constitute a majority and thus do not control the voting upon all actions required or permitted to be taken by our shareholders, including the election of directors.

Possible Anti-Takeover Effects of Authorized but Unissued Stock

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our authorized but unissued capital stock consists of 68,416,993 shares of common stock. One of the effects of the existence of authorized but unissued capital stock may be to enable the Board of Directors to render more difficult or to discourage an attempt to obtain control of GeoPetro by means of a merger, tender offer, proxy contest or otherwise, and to protect the continuity of GeoPetro's management. If in the due exercise of its fiduciary obligations, for example, the Board of Directors were to determine that a takeover proposal was not in GeoPetro's best interests, such shares could be issued by the Board of Directors without shareholder approval in one or more private placements or other transactions that might prevent or render more difficult or costly the completion of the takeover transaction by diluting the voting or other rights of the proposed acquiring or insurgent shareholder or shareholder group, by creating a substantial voting block in institutional or other hands that might undertake to support the position of the incumbent Board of Directors, by effecting an acquisition that might complicate or preclude the takeover, or otherwise.

Undesignated Preferred Stock

Our undesignated preferred stock enables the board of directors to render more difficult or to discourage an attempt to obtain control of our company by means of a tender offer, proxy contest, merger or otherwise, and thereby to protect the continuity of management. The issuance of shares of the preferred stock pursuant to the board of directors' authority described above may adversely affect the rights of the holders of common stock. For example, preferred stock that we may rank prior to the common stock as to dividend rights, liquidation preference or both, may have full or limited voting rights and may be convertible into shares of common stock. Accordingly, the issuance of shares of preferred stock may discourage bids for the common stock or may otherwise adversely affect the market price of the common stock.

Other Anti-Takeover Provisions

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We executed a contract of employment with Stuart J. Doshi, our President, Chief Executive Officer and Chairman of the Board of Directors, dated July 28, 1997, as amended. The contract currently provides for a five-year term which commenced May 1, 2005, which term is automatically extended for successive two-year renewal terms unless the Board of Directors or Mr. Doshi elects not to renew, or Mr. Doshi attains age 75. The contract provides for an annual salary of \$300,000, subject to annual inflation adjustments. The contract also provided for options to purchase up to 750,000 shares of our common stock at an exercise price of \$0.50 per share which options were to expire on April 30, 2006. The expiration dates of the options have been extended to April 30, 2008. In the event of a change of control, or if we do not renew Mr. Doshi's agreement, or if Mr. Doshi is terminated without cause, or under certain circumstances, with cause, he is entitled to receive (a) in exchange for all of his vested stock options and vested restricted shares, such number of shares of common stock having a market value equal to the difference between (x) the aggregate total market value of all vested restricted shares and shares of common stock he would receive upon exercise of all vested stock options less (y) the aggregate total exercise price for all of his vested stock options; provided, however, that if the common stock to be delivered to Mr. Doshi upon such change of control or termination have not been registered so as to permit immediate public resale, Mr. Doshi shall instead receive a cash payment equal to the market value on the date of termination of all vested stock options and restricted shares without any discount for liquidity or minority position

against cancellation of such options and restricted shares, (b) a cash payment equal to the greater of (i) his salary for the remainder of his term and the aggregate amount of his bonuses in respect of the last four fiscal years and (ii) four times his compensation in the current year and the aggregate amount of his bonuses for the last four fiscal years, and (c) an additional cash payment representing his employment benefits equal to 20% of the amount of salary he is entitled to receive under (b)(i) or (b)(ii) above, as applicable. In addition, in the event of a change of control or termination without cause, all unvested options issued by us to Mr. Doshi will vest.

The termination provisions of this employment contract were designed, in part, to impede and discourage a hostile takeover attempt and to protect the continuity of management.

Certain Charter and Bylaws Provisions

Limitation of Liability

Our Articles of Incorporation and Bylaws limit the liability of directors and provide that directors and officers shall be indemnified to the fullest extent permitted by California law. Section 317 of the California Corporations Code permits indemnification to be authorized by either: (a) a majority vote of disinterested directors constituting a quorum of the board of directors; (b) if such a quorum of directors is not obtainable, by independent legal counsel in a written opinion; (c) a vote of the shareholders; or (d) a court. The California Corporations Code states, generally, that to the extent a director or officer is successful on the merits in defense of a proceeding, he or she has the right to be indemnified against expenses actually and reasonably incurred in connection therewith.

We have obtained a directors and officers liability insurance policy for the purposes of indemnification which shall cover all of our elected and appointed directors and officers up to \$15,000,000 for each claim and \$15,000,000 in the aggregate. We believe that the limitation of liability provision in our Articles of Incorporation, and the directors and officers liability insurance will facilitate our ability to continue to attract and retain qualified individuals to serve as directors and officers.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to our directors, officers, and controlling persons, we have been advised that in the opinion of the Commission such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. Except for our payment of expenses incurred or paid by a director, officer, or controlling person in the successful defense of any action, suit or proceeding, if a claim for indemnification against such liabilities is asserted by such director, officer or controlling person in connection with the securities being registered, we will, unless in the opinion of our counsel the matter has been settled by a controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by us is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issues.

Shareholder Meetings and Other Provisions

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Under our Bylaws, special meetings of the our shareholders may be called only by a majority of the members of the Board of Directors, the Chairman of the Board, the President, or by one or more shareholders holding shares in the aggregate entitled to cast not less than 10% of the votes at any such meeting. The annual meeting shall be held on such date and at such place as may be determined each year by our Board of Directors.

Listing

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Our common stock is listed on the American Stock Exchange under the symbol "GPR" and on the Toronto Stock Exchange under the symbol "GEP.s". United States persons and persons in the United States may not purchase our stock on the Toronto Stock Exchange. Non-United States persons holding stock listed on the Toronto Stock Exchange may sell such stock on the American Stock Exchange subject to compliance with SEC Rule 144.

Transfer Agent and Registrar

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The registrar and transfer agent for our common shares is Computershare Trust Company of Canada, at its principal offices in Calgary, Alberta and Toronto, Ontario.

LEGAL MATTERS

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The validity of our shares of common stock offered hereby will be passed upon by Greene Radovsky Maloney Share & Hennigh LLP.

EXPERTS

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The unaudited supplementary oil and gas reserve information included in this prospectus has been included in reliance of the report of, and on the authority of, Sproule Associates Inc., and MHA Petroleum Consultants.

The consolidated financial statements set forth herein have been audited by Hein & Associates LLP, an independent registered public accounting firm as stated in their report appearing herein, and have been so included in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

WHERE YOU CAN FIND MORE INFORMATION

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

We have filed with the SEC a Registration Statement on Form S-1 (including the exhibits and amendments thereto) under the Securities Act with respect to the shares of common stock to be sold in this offering. This prospectus does not contain all the information set forth in the registration statement. For further information regarding us and our shares of common stock to be sold in this offering, please refer to the registration statement.

You may read and copy all or any portion of the registration statement or any other information that we file at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549. You can request copies of these documents, upon payment of a duplication fee, by writing to the SEC. Please call the SEC at 1-800-SEC-0330 for further information on the operation of the public reference rooms. Our SEC filings, including the Registration Statement, are also available to you on the SEC's website (www.sec.gov).

We are subject to the information and reporting requirements of the Exchange Act, and, in accordance therewith, will file periodic reports, proxy statements and other information with the SEC.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

March 29, 2007,

To the Shareholders and Board of Directors

GeoPetro Resources Company

San Francisco, California

We have audited the accompanying consolidated balance sheets of GeoPetro Resources Company and subsidiaries as of December 31, 2006 and 2005, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2006. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of GeoPetro Resources Company and subsidiaries as of December 31, 2006 and 2005, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 2 to the accompanying consolidated financial statements, effective January 1, 2006, the Company adopted Statement of Financial Accounting Standard No. 123(R), Share-Based Payment.

(Signed) *HEIN & ASSOCIATES LLP*

Irvine, California

GEOPETRO RESOURCES COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Information subsequent to December 31, 2006 is unaudited)

1. ORGANIZATION AND NATURE OF OPERATIONS:

GeoPetro GeoPetro Resources Company (GeoPetro or the Company) was originally incorporated as GeoPetro Company under the laws of the State of Wyoming in 1994 to participate in the oil and gas acquisition, exploration, development and production business in the United States and internationally. GeoPetro Company was subsequently merged into GeoPetro Resources Subsidiary Company, a California corporation, on June 28, 1996. GeoPetro's name was then changed to GeoPetro Resources Company. GeoPetro's corporate offices are in San Francisco, California. The accompanying consolidated financial statements include the accounts of GeoPetro and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

Operations Although GeoPetro is not a development stage enterprise, the company has a limited operating history upon which an evaluation of its business prospects can be based. The risks, expense, and difficulties encountered by early stage companies must be considered when evaluating GeoPetro's business prospects. GeoPetro recorded net income of \$56,164 for the six months ended June 30, 2007 and \$2,111,074 in 2005 but incurred net losses of \$1,011,806 and \$2,606,978 in 2006 and 2004 respectively, and had an accumulated deficit at June 30, 2007 of \$10,337,821. GeoPetro expects to make significant capital expenditures in the foreseeable future. Management believes that GeoPetro will be successful in obtaining adequate sources of cash to fund its anticipated capital expenditures through the end of 2007 and to follow through with plans for continued investments in oil and gas properties. GeoPetro's success, in part, depends on its ability to generate additional financing, farm-out certain of its projects and manage its relations with the companies that provide exploration and development services. GeoPetro's success also depends on its ability to effectively manage growth and develop proven reserves. Additionally, GeoPetro's operations are subject to all of the environmental and operational risks normally associated with the oil and gas industry. GeoPetro maintains insurance that is customary in the industry.

Since its inception, GeoPetro has participated as a working interest owner in the acquisition of undeveloped leases, seismic options, lease options and foreign concessions and has participated in seismic surveys and the drilling of test wells on its undeveloped properties. Further leasehold acquisitions and seismic operations are planned for 2007 and future periods. In addition, exploratory and development drilling is scheduled during 2007 and future periods on GeoPetro's undeveloped properties. It is anticipated that these exploration activities together with others that may be entered into may impose financial requirements which may exceed the existing working capital of GeoPetro. Management may raise additional equity and/or debt capital, and has farmed-out certain of its projects to finance its continued participation in planned activities. However, if additional financing is not available, GeoPetro may be compelled to reduce the scope of its business activities. If GeoPetro is unable to fund planned expenditures, it may be necessary to:

1. forfeit its interest in wells that are proposed to be drilled;
2. farm-out its interest in proposed wells;

3. sell a portion of its interest in prospects and use the sale proceeds to fund its participation for a lesser interest; and
4. reduce general and administrative expenses.

In order for GeoPetro to maintain its interest in the Indonesian contract area, certain work and expenditure commitments must be met or an extension must be granted by the applicable governing authority. In the event that GeoPetro does not meet the commitments and no extensions are granted for meeting the commitments, GeoPetro will forfeit its interest in the contract area requiring an impairment write-down equal to the capitalized costs recorded for the area forfeited. This could have a material adverse impact on GeoPetro's results of operations in future periods.

In July 2005, GeoPetro entered into agreements with unaffiliated companies that have purchased and are operating a dedicated gas treatment plant and related pipelines to process and transport GeoPetro's gas from the Madisonville Project in Madison County, Texas. These agreements are discussed in detail in Note 10. In connection with the Madisonville Project, GeoPetro re-completed an existing well for production from the Rodessa formation interval at approximately 11,800 feet of depth and completed an injection well for disposal of waste gasses from the production well. GeoPetro initiated gas sales from the Madisonville Project in May 2003. A second well (the Fannin #1 well) was drilled, tested and completed during 2004. Two additional development wells (the Wilson #1 and the Mitchell #1 well) were drilled during 2006. The Fannin #1 and the Mitchell#1 well are presently producing on a restricted rate awaiting a planned expansion of the gas treatment plant. Another well is planned for drilling during late 2007 or 2008 in the Madisonville Project.

Other than the above work and expenditure commitments, the timing of most of GeoPetro's capital expenditures is discretionary. GeoPetro has no material long-term commitments associated with its capital expenditure plans or operating agreements. Consequently, GeoPetro has a significant degree of flexibility to adjust the level of such expenditures as circumstances warrant. The level of capital expenditures will vary in future periods depending on the success of exploratory drilling activities, gas and oil price conditions and other related economic factors. See Note 11 for discussion of financing received subsequent to year end.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

U.S. GAAP The Company's financial statements have been prepared in accordance with accounting principles generally accepted within the United States of America (U.S. GAAP).

Use of Estimates and Significant Estimates Certain amounts in GeoPetro's financial statements are based upon significant estimates, including oil and gas reserve quantities which form the basis for the calculation of depreciation, depletion, amortization and impairment of oil and gas properties. Actual results could materially differ from those estimates.

Oil and Gas Properties GeoPetro follows the full cost method of accounting for oil and gas producing activities and, accordingly, capitalizes all costs incurred in the acquisition,

exploration, and development of proved oil and gas properties, including the costs of abandoned properties, dry holes, geophysical costs, and annual lease rentals. All general corporate costs are expensed as incurred. In general, sales or other dispositions of oil and gas properties are accounted for as adjustments to capitalized costs, with no gain or loss recorded. Amortization of evaluated oil and gas properties is computed on the units of production method based on all proved reserves on a country by country basis. Unevaluated oil and gas properties are assessed for impairment either individually or on an aggregate basis. The net capitalized costs of evaluated oil and gas properties (full cost ceiling limitation) are not to exceed their related estimated future net revenues discounted at 10%, and the lower of cost or estimated fair value of unproved properties, net of tax considerations.

Joint Ventures Some exploration and production activities are conducted jointly with others and, accordingly, the accounts reflect only GeoPetro's proportionate interest in such activities.

Revenue Recognition Revenue is recognized upon delivery of oil and gas production and is shown net of applicable royalty payments, processing and transportation fees. In addition, the Company recognizes revenue from the Madisonville Field net of applicable fees to gather, treat and transport the Company's natural gas production. The applicable fees are paid to unrelated third parties. Revenue from the Madisonville Field is recognized when the price for gas delivered becomes fixed and determinable. The price for gas delivered to the purchaser, Madisonville Gas Processing LP (MGP), becomes fixed and determinable after the gas has been gathered, treated, and transported to a common carrier pipeline where it is then resold by MGP to the common carrier pipeline on a spot market basis. The proceeds from the sale of the gas are deposited directly into an escrow account under the joint signature control of the Company and MGP. The fees to gather, treat and transport the gas are distributed to MGP in accordance with agreements between them and the Company. The remaining net proceeds are distributed to the Company. See Note 10 for a more detailed discussion of the fees under the MGP Agreement.

Asset Retirement Obligation In accordance with Statement of Financial Accounting Standards No. 143, *Accounting for Asset Retirement Obligations* (SFAS 143), the fair value of an asset retirement cost, and corresponding liability, should be recorded as part of the cost of the related long-lived asset and subsequently allocated to expense using a systematic and rational method. GeoPetro recorded an asset retirement obligation to reflect GeoPetro's legal obligations related to future plugging and abandonment of its oil and gas wells. GeoPetro estimated the expected cash flow associated with the obligation and discounted the amount using a credit-adjusted, risk-free interest rate. At least annually, GeoPetro reassesses the obligation to determine whether a change in the estimated obligation is necessary. GeoPetro evaluates whether there are indicators that suggest the estimated cash flows underlying the obligation have materially changed. Should those indicators suggest the estimated obligation has materially changed, GeoPetro will accordingly update its assessment.

	June 30, 2007 (Unaudited)	2006	December 31, 2005	2004
Asset retirement obligations, beginning of period	\$ 48,842	\$ 26,641	\$ 24,705	\$ 12,374
Liabilities incurred	954	19,537		11,094
Accretion expense	1,430	2,664	1,936	1,237
Asset retirement obligations, end of period	\$ 51,226	\$ 48,842	\$ 26,641	\$ 24,705

Furniture, Fixtures and Equipment Furniture, fixtures and equipment are stated at cost. Depreciation is provided on furniture, fixtures and equipment using the straight-line method over an estimated service life of three to seven years.

Income Taxes GeoPetro accounts for income taxes using the asset and liability method wherein deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to be recovered or settled. Because management has determined that realization of deferred tax assets is not more likely than not, the net deferred tax assets are fully reserved.

Concentrations of Credit Risk Credit risk represents the accounting loss that would be recognized at the reporting date if counterparties failed completely to perform as contracted. Concentrations of credit risk (whether on or off balance sheet) that arise from financial instruments exist for groups of customers or counterparties when they have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions described below. The credit risk amounts for cash and accounts receivable do not take into account the value of any collateral or security.

GeoPetro maintains several cash accounts with three financial institutions. Accounts at each institution are insured by the Federal Deposit Insurance Corporation up to \$100,000. As of June 30, 2007, the uninsured bank balance was \$3,057,166. GeoPetro has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk.

During the six months ended June 30, 2007 and the years ended December 31, 2006, 2005 and 2004, the Company had sales to customers exceeding 10% of total sales as follows:

	June 30, 2007	2006	2005	2004
Customer A	82%	79%	99.7%	99.6%
Customer B	18%	21%		

At June 30, 2007, December 31, 2006, 2005 and 2004, the Company had accounts receivable balances from Customer A of \$702,527 or 91%, \$394,337 or 77%, \$691,564, or 100%, and \$449,947, or 99.5% of total accounts receivable respectively.

Allowance for Doubtful Accounts Trade accounts receivable are recorded at net realizable value. If the financial condition of GeoPetro's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. Delinquent trade accounts receivable are charged against the allowance for doubtful accounts once uncollectibility has been determined. The allowance is determined through an analysis of the past-due status of accounts receivable and assessments of risk that are based on historical trends and an evaluation of the impact of current and projected economic conditions. There was no activity in the allowance for doubtful accounts as of June 30, 2007, December 31, 2006 and 2005.

Fair Value of Financial Instruments The estimated fair values for financial instruments are determined at discrete points in time based on relevant market information. These estimates involve uncertainties and cannot be determined with precision. For certain of GeoPetro's financial instruments, including cash, accounts receivable, accounts payable and current portion of notes payable, the carrying amounts approximate fair value due to their maturities.

Stock-Based Compensation Statement of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation* (SFAS 123), encourages, but does not require, companies to record compensation cost for stock-based employee compensation at fair value. Prior to January 1, 2006, GeoPetro elected to account for stock-based compensation using the intrinsic value method prescribed in Accounting Principles Board Opinion No. 25 (APB 25), *Accounting for Stock Issued to Employees*, and related interpretations.

In accordance with SFAS 123, GeoPetro discloses the impact of the fair value accounting of employee stock options. Transactions in equity instruments with non-employees for goods or services have been accounted for using the fair value method as prescribed by SFAS 123.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The following table illustrates the effect on GeoPetro's net loss and loss per share as if GeoPetro had applied the fair value recognition provisions of SFAS 123 to its stock-based employee compensation awards granted in 2003 and in 2005, and recognized expense over the applicable award vesting period. There were no stock-based employee compensation awards granted in 2004.

	As of and for the Years Ended December 31,		
	2005	2004	2003
Net income (loss) available to common shareholders as reported	\$ 2,111,074	\$ (2,606,978)	\$ (1,943,565)
Compensation FAS 123	(98,870)	(63,655)	(94,495)
Pro forma income (loss)	\$ 2,012,204	\$ (2,670,633)	\$ (2,038,060)
Income (loss) per share as reported	\$ 0.09	\$ (0.14)	\$ (0.12)
Pro forma income (loss) per share	\$ 0.08	\$ (0.14)	\$ (0.12)

The assumptions made for purposes of estimating the fair value of the stock options are included in Note 8.

Effective January 1, 2006, the Company adopted the fair value recognition provisions of Statement of Financial Accounting Standard 123(R) *Share-Based Payment* (SFAS 123(R)) using the modified prospective transition method. In addition, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 107 *Share-Based Payment* (SAB 107) in March, 2005, which provides supplemental SFAS 123(R) application guidance based on the views of the SEC. Under the modified prospective transition method, compensation cost recognized in the six month period ended June 30, 2007 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of January 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of SFAS No. 123, and (b) compensation cost for all share-based payments granted beginning January 1, 2006, based on the grant date fair value estimated in accordance with the provisions of SFAS 123(R). In accordance with the modified prospective transition method, results for prior periods have not been restated.

The adoption of SFAS 123(R) resulted in stock compensation expense for the six months period ended June 30, 2007 of \$69,870 to income from continuing operations and income before income taxes, of which the entire amount was recorded to general and administrative expenses. The Company did not recognize a tax benefit from the stock compensation expense because the Company considers it is more likely than not that the related deferred tax assets, which have been reduced by a full valuation allowance, will not be realized.

The fair value of each option grant was estimated on the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions used for grants in 2003 and 2005 for all periods presented: risk-free, weighted-average interest rates ranging from 2.52 to 3.75% based on the U.S. Treasury yield curve in effect at the time of grant, expected

dividend yield of 0%, expected life of 5 years from the date of grant, and expected volatility of 10 and 25%. After the initial public offering on March 30, 2006, an expected volatility factor of 58% was used for the newly issued common stock options and the extension of common stock warrants and options. A newly issued stock option is an option that was granted on or after March 30, 2006 or a previously granted stock option that is modified on or after March 30, 2006. The fair value of all newly issued stock options grants is estimated using the Black-Scholes option pricing model with the following weighted average assumptions used for grants and modifications of prior grants made on or after March 30, 2006 for the six months ended June 30, 2007: risk-free, weighted average interest rate of 4.9% based on the U.S. Treasury yield curve in effect at the time of grant, expected dividend yield of 0%, expected life of 5 years from the date of grant (the remaining term of the option in the case of option extensions), and expected volatility of 58%. GeoPetro has selected 10 publicly traded small cap companies whose primary business is oil and gas exploration and production. Small cap, for purposes of this analysis, is defined as companies with a market capitalization under \$1 billion. From this peer group of similar companies, GeoPetro randomly selected 10 companies and derived expected volatility factors for the most recent completed fiscal years for each entity as reported in their recently filed 10K or 10KSB Annual Reports with the Securities and Exchange Commission. Where the expected volatilities were expressed as a range, a simple average of the range is used as an expected volatility for that entity.

The options outstanding as of June 30, 2007 have the following contractual lives:

Number of Options Outstanding	Number of Exercisable	Exercise Prices	Weighted Average Remaining Contractual Life
750,000	750,000	0.50	0.84
1,290,000	1,290,000	2.00	0.50
1,750,000	1,380,000	2.10	5.93
150,000	30,000	3.85	3.80
10,000	4,000	4.25	2.51
10,000	4,000	6.25	2.95
3,960,000	3,458,000		

As of June 30, 2007, there are 3,458,000 options which are exercisable. The remaining 502,000 options will become exercisable ratably over the next four years.

Earnings (Loss) Per Common Share Basic earnings per share excludes dilution and is calculated by dividing net income or loss by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared from the earnings of the entity. Potential common shares for the periods ended June 30, 2006, December 31, 2006 and 2004 were excluded from the earnings per share computation because the Company incurred a net loss and were anti-dilutive. There were 196,375 and 1,506,064 outstanding common stock warrants at June 30, 2007 and December 31, 2005, respectively, as well as 20,000 outstanding common stock options on June 30, 2007 and December 31, 2005, that were not included in the diluted EPS calculation because the warrants and options exercise prices were greater than the average market price of the common shares. 1,890,710 shares of Series AA Stock were not included in the diluted EPS calculation at December 31, 2005 because they were anti-dilutive.

Segment Reporting GeoPetro has oil and gas exploration, development and production operations in the United States, Canada, Australia and Indonesia. All revenues and related costs are associated with operations in the United States. A summary of assets and capital expenditures by geographical segment is included in Note 3.

Cash and Cash Equivalents Cash and cash equivalents include cash on hand, amounts held in banks and highly liquid investments purchased with an original maturity of three months or less.

Interim Financial Statements The interim consolidated financial statements have been prepared by the Company's management, without audit, in accordance with accounting principles generally accepted in the United States and in the opinion of management, contain all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the Company's consolidated financial position, results of operations and cash flows for the periods presented. The condensed consolidated results of operations, financial position, and cash flows for the interim periods presented herein are not necessarily indicative of future financial results.

Recently Issued Accounting Pronouncements In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, which is effective for the Company beginning January 1, 2008 and provides a definition of fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements for future transactions. The Company does not expect the adoption of this pronouncement to have a material impact on its financial position or results of operations.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, which permits an entity to measure certain financial assets and financial liabilities at fair value. The objective of SFAS No. 159 is to improve financial reporting by allowing entities to mitigate volatility in reported earnings caused by the measurement of related assets and liabilities using different attributes, without having to apply complex hedge accounting provisions. Under SFAS No. 159, entities that elect the fair value option (by instrument) will report unrealized gains and losses in earnings at each subsequent reporting date. The fair value option election is irrevocable, unless a new election date occurs. SFAS No. 159 establishes presentation and disclosure requirements to help financial statement users understand the effect of the entity's election on its earnings, but does not eliminate disclosure requirements of other accounting standards. Assets and liabilities that are measured at fair value must be displayed on the face of the balance sheet. The Company does not expect the adoption of this pronouncement to have a material impact on its financial position or results of operations.

3. SUMMARY OF OIL AND GAS OPERATIONS:

Capitalized costs at year end and costs incurred relating to GeoPetro's oil and gas activities are summarized as follows:

Capitalized costs as of December 31, 2006 are as follows:

	United States	Australia	Indonesia	Canada	Totals
Evaluated properties	\$ 40,835,432	\$ 2,388,051	\$	\$ 478,027	\$ 43,701,510
Unevaluated properties	1,955,252	1,697,718	759,885	90,626	4,503,481
Less accumulated depletion and impairment	(8,691,179)	(2,388,051)		(478,027)	(11,557,257)
Net capitalized costs	\$ 34,099,505	\$ 1,697,718	\$ 759,885	\$ 90,626	\$ 36,647,734

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Costs incurred for the year ended December 31, 2006 are as follows:

Property acquisition	\$	351,803	\$		\$		\$	351,803
Exploration		(42,834)			576,296	20,561		554,023
Development		15,816,118						15,816,118
Total costs incurred	\$	16,125,087	\$		576,296	20,561	\$	16,721,944

F-17

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

Capitalized costs as of December 31, 2005 are as follows:

	United States	Australia	Indonesia	Canada	Totals
Evaluated properties	\$ 25,019,314	\$ 2,388,051	\$	\$ 439,178	\$ 27,846,543
Unevaluated properties	1,646,282	1,697,718	183,589	108,915	3,636,504
Less accumulated depletion and impairment	(6,303,640)	(2,388,051)		(439,178)	(9,130,869)
Net capitalized costs	\$ 20,361,956	\$ 1,697,718	\$ 183,589	\$ 108,915	\$ 22,352,178

Costs incurred for the year ended December 31, 2005 are as follows:

	United States	Australia	Indonesia	Canada	Totals
Property acquisition	\$ 1,220,150	\$	\$	\$	\$ 1,220,150
Exploration	1,246,550		(2,090,089)	26,564	(816,975)
Development	2,799,567				2,799,567
Total costs incurred	\$ 5,266,267	\$	\$ (2,090,089)	\$ 26,564	\$ 3,202,742

Generally, sales or dispositions of oil and gas properties, including sales of partial interests in prospects, are treated as adjustments to capitalized costs, with no gain or loss recorded.

Evaluated Oil and Gas Properties In periods prior to 2004 it was determined that the total net costs in the U.S. and Australian evaluated cost pool exceeded their net realizable value. Accordingly, impairment write-downs of \$2,426,526 were recorded in the prior periods. During 2004 it was determined that the total net costs in the Australian evaluated cost pool exceeded their net realizable value. Accordingly, impairment write-downs of \$1,599,244 were recorded for the years ended December 31, 2004. In addition, an impairment write-down associated with the Canadian evaluated cost pool of \$439,178 was recorded for the year ended December 31, 2004 and \$38,849 was recorded for the year ended December 31, 2006.

Unevaluated Oil and Gas Properties - United States As GeoPetro's properties are evaluated through exploration, they will be included in the amortization base. Costs of unevaluated properties in the United States at December 31, 2006 and 2005 represent exploration costs in connection with GeoPetro's California and Alaska prospects. The prospects and their related costs in unevaluated properties have been assessed individually and no impairment charges were considered necessary for the United States properties for any of the periods presented. The current status of these prospects is that seismic data is being interpreted on an on-going basis on the subject lands within the prospects.

Drilling in California prospects is expected to commence as early as 2008 and will continue in future periods. As the prospects are evaluated through drilling in future periods, the property

acquisition and exploration costs associated with the wells drilled will be transferred to evaluated properties where they will be subject to amortization.

Unevaluated Oil and Gas Properties - Australia Unevaluated costs incurred in Australia represent costs in connection with the exploration of two exploration permit areas in Australia. The prospects and their related costs in unevaluated properties have been assessed individually and no impairment charges were considered necessary for the Australian properties for any of the periods presented. The current status of these prospects is that appraisal wells have been drilled and are being evaluated for commerciality on the subject lands within the prospects. Subsequent to December 31, 2006, the Company has entered into a contract to sell its Australian Properties to an unaffiliated third party, See Note 10.

Unevaluated Oil and Gas Properties - Indonesia Unevaluated costs incurred in Indonesia represent costs in connection with one production sharing contract area in Indonesia. The prospect and its related costs in unevaluated properties have been assessed individually and no impairment charges were considered necessary for the Indonesian property for any of the periods presented. The current status of this prospect is that seismic data is being interpreted on an on-going basis to identify drilling locations on the subject lands within the prospect. In October 2005, the Company sold its interest in another Indonesian production sharing contract for cash consideration of \$2,400,000. The proceeds realized were credited to the Indonesian unevaluated cost pool.

Drilling is expected to commence on the prospect as early as 2007 and is expected to continue in future periods. As the prospect is evaluated through drilling in future periods, the property acquisition and exploration costs associated with the wells drilled will be transferred to evaluated properties where they will be subject to amortization.

The Company's interest in one of the production sharing contract areas is subject to prior work commitments, for the ten-year period ended December 3, 2007, requiring total expenditures of \$3,000,000 net to the Company's 12% working interest in the contract area. The Company has met approximately \$1,536,000 of the \$3,000,000 required expenditures. The applicable governing authority has granted the Company a deferral of prior years' commitments until December 2007. The Company may request additional deferral of the commitments from the applicable governing authority beyond December 2007.

The Company retains a carried 12% stake in the Bengara (II) Block PSC through its subsidiary, Continental-GeoPetro (Bengara-II) Ltd. (CGB2), the operator company of the project with offices in Jakarta, Indonesia. GeoPetro's partner, Continental Energy Corporation likewise retains an 18% interest in the Bengara (II) Block. CNPCHK (Indonesia) Limited owns the remaining 70% in the Bengara (II) Block and has agreed to pay 100% of the cost of drilling certain exploratory and appraisal wells.

In the event that the Company does not meet the work program commitments and provided that no extensions are granted for meeting the commitments, the Company must forfeit its interest in the production sharing contract. If the Company forfeits its interest, it will be necessary to record an impairment write-down equal to the capitalized costs recorded for the area forfeited.

Breakdown of Unevaluated Oil and Gas Properties The following table sets forth a summary of oil and gas property costs not being amortized at December 31, 2006, by the period in which the costs were incurred:

	Totals	Year Ended December 31, 2006	Year Ended December 31, 2005	Year Ended December 31, 2004	2003 and Prior Years
Unproved property acquisition	\$ 1,853,945	\$ 351,803	\$	\$ 13,475	\$ 1,488,667
Exploration	2,649,536	515,174	(816,974)	(68,144)	3,019,480
Total	\$ 4,503,481	\$ 866,977	\$ (816,974)	\$ (54,669)	\$ 4,508,147

Management expects that planned activities for the year 2007 will enable the evaluation of approximately 5% of the costs as of December 31, 2006. Evaluation of 30% of the remaining costs is expected to occur in 2008 with the remaining 65% in 2009 and beyond.

4. SHORT TERM DEBT:

Short-term non-convertible debt at June 30, 2007 (unaudited) and December 31, 2006 consisted of the following:

	June 30, 2007 (unaudited)	December 31, 2006
Amounts Due Unrelated Parties:		
Promissory note dated January 31, 2006, payable to Pinehill Capital; collateralized with an undivided 5% of the net cash flow in GeoPetro's Madisonville Project; payable on or before October 31, 2007 (a)	\$ 1,000,000	\$ 1,000,000
Promissory note dated February 1, 2007 payable on or before October 31, 2007 (b)	500,000	
Promissory note dated February 6, 2007 payable on or before October 31, 2007 (c)	300,000	
Promissory note dated February 1, 2007 payable on or before October 31, 2007 (d)	100,000	
	1,900,000	1,000,000
Less discount on promissory notes	(72,419)	(17,699)
	\$ 1,827,581	\$ 982,301

(a) The Company issued a \$1,000,000 short term promissory note on January 31, 2006 with a maturity date of January 31, 2007. The note may be repaid at any time without penalty. In the event the note is not repaid by the maturity date, the Company has agreed to dedicate 5% of the net cash flow from the Madisonville Project in Texas toward the repayment of the note and any accrued interest thereon. In connection with the note, the Company paid a loan origination fee of \$30,000 and granted a three-year warrant exercisable to purchase 150,000 Common Shares at \$3.50 per share. The fair value of the warrants on the date of issuance, \$182,390, as well as the \$30,000 loan origination fee,

was recorded as a debt discount and is being amortized over the life of the promissory note. On February 1, 2007, the maturity date was extended to October 31, 2007. The Company has paid \$80,000 accrued interest thru January 31, 2007. In connection with the extension, the Company paid a loan extension fee of \$30,000 and granted a three-year warrant exercisable to purchase 50,000 Common Shares at \$3.50 per share. The fair value of the warrants on the date of issuance, \$57,242, together with the \$30,000 loan extension fee, were recorded as a debt discount and are being amortized over the life of the promissory note. As of June 30, 2007, the unamortized debt discount was \$38,774.

(b) The Company issued a \$500,000 short term promissory note payable on February 1, 2007 with a maturity date of October 31, 2007. The note may be repaid at any time without penalty. The principal plus accrued interest on the note are due on the maturity date. In connection with the note, the Company paid a loan origination fee of \$15,000 and granted a three-year exercisable warrant to purchase 25,000 Common Shares at \$3.50 per share. The fair value of the warrants on the date of issuance, \$27,072, as well as the \$15,000 loan origination fee, was recorded as a debt discount and is being amortized over the life of the promissory note. As of June 30, 2007, the unamortized debt discount was \$18,699.

(c) The Company issued a \$300,000 short term promissory note payable on February 6, 2007 with a maturity date of October 31, 2007. The note may be repaid at any time without penalty. The principal plus accrued interest on the note are due on the maturity date. In connection with the note, the Company paid a loan origination fee of \$9,000 and granted a three-year exercisable warrant to purchase 15,000 Common Shares at \$3.50 per share. The fair value of the warrants on the date of issuance, \$16,214, as well as the \$9,000 loan origination fee, was recorded as a debt discount and is being amortized over the life of the promissory note. As of June 30, 2007, the unamortized debt discount was \$11,206.

(d) The Company issued a \$100,000 short term promissory note payable on February 1, 2007 with a maturity date of October 31, 2007. The note may be repaid at any time without penalty. The principal plus accrued interest on the note are due on the maturity date. In connection with the note, the Company paid a loan origination fee of \$3,000 and granted a three-year exercisable warrant to purchase 5,000 Common Shares at \$3.50 per share. The fair value of the warrants on the date of issuance, \$5,414, as well as the \$3,000 loan origination fee, was recorded as a debt discount and is being amortized over the life of the promissory note. As of June 30, 2007, the unamortized debt discount was \$3,740.

5. INCOME TAXES:

The Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, on January 1, 2007. As a result of the adoption of FIN 48, the Company has unrecognized tax benefits of \$86,000 as of the date of adoption. No

corresponding interest and penalties have been accrued as the Company is in a net operating loss position.

The Company files income tax returns in the U.S. federal jurisdiction and various states. There is currently a federal income tax audit for the 2004 tax year in progress. There are currently no other federal or state income tax examinations underway for these jurisdictions. Furthermore, the Company is no longer subject to U.S. federal income tax examinations by the Internal Revenue service for tax years before 2003 and for state and local tax authorities for years before 2002. The Company does, however, have net operating losses generated in tax years 1995 and after, which remain open for examination.

The Company provides for income taxes in accordance with Statement of Financial Accounting Standards No. 109, Accounting for Income Taxes (SFAS 109). SFAS 109 requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial statement carrying amounts and the tax basis of the assets and liabilities. Where it is more likely than not that a tax benefit will not be realized, a valuation allowance is recorded to reduce the deferred tax asset to its realizable value.

A valuation allowance has been provided against the Company's net deferred tax assets as the Company believes that it is more likely than not that the net deferred tax assets will not be realized. As a result of this valuation allowance, the effective tax rate for the six months ended June 30, 2007 and for the year ended December 31, 2006 is zero percent.

The provision for income taxes consist of the following:

	2006	2005
Current		
Federal	\$ 59,500	\$ 16,000
State	2,500	1,000
Total	62,000	17,000
Deferred		
Federal		
State		
Total		
Total Income Tax Provision	\$ 62,000	\$ 17,000

The actual income tax benefit (expense) differs from the expected tax benefit (expense) as computed by applying the US Federal corporate income tax rate of 35% for each period as follows:

	2006	2005
Amount of expected tax benefit (expense)	\$ (169,000)	\$ 930,000
Non-deductible expenses	5,000	5,000
Alternative minimum tax		17,000
Expiration of net operating loss		(49,000)
Utilization of NOL	630,000	
Other	(10,000)	5,000
Valuation allowance adjustments	(394,000)	(891,000)
	\$ 62,000	\$ 17,000

Deferred income taxes reflect the net tax effects of temporary differences between carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets (liabilities) are as follows:

	2006	2005
Deferred tax assets (liabilities):		
Net operating loss carry forwards	\$ 8,654,000	\$ 6,061,000
Oil and gas property basis differences	(5,069,000)	(2,018,000)
Credit carryforwards		16,000
Stock compensation	74,000	
Other	13,000	6,000
Total deferred tax assets	3,672,000	4,065,000
Valuation allowance	(3,672,000)	(4,065,000)
Total net deferred taxes	\$	\$

As of December 31, 2006, GeoPetro had net operating loss (NOL) carryforwards of approximately \$22,932,000 for federal beginning to expire in 2010 and \$10,926,000 for state which began to expire in 2006. A significant change in ownership of GeoPetro may limit GeoPetro's ability to use these NOL carryforwards.

6. RELATED PARTY TRANSACTIONS:

On April 25, 2007, May 9, 2007, and June 13, 2007, an officer and director, exercised warrants to purchase 80,000, 70,000 and 33,333 shares of common stock at an exercise price of \$2.00, \$2.00 and \$4.00 per share, respectively. The warrants were granted on June 18, 2000 and had an expiration dates of between June 18 and June 30, 2007.

On February 12, 2007, Stuart J. Doshi, President and CEO, loaned \$100,000 to the Company. The note bore interest at 8% annually and was payable on demand. The note plus accrued interest was repaid on March 28, 2007.

On June 7, 2006, the Company loaned \$1,000,000 to G. Carter Sedanoui (Borrower), a shareholder, evidenced by a short term promissory note payable to the Company with a maturity date on March 31, 2007. On March 30, 2007, the Company extended the maturity date of the note to June 30, 2007. The note plus the accrued interest was paid in full on June 29, 2007.

The Company appointed David G. Anderson as a Director on March 30, 2006. Mr. Anderson is the Senior Vice President and a director of Dundee Securities Corporation, the lead underwriter in connection with a sale of common shares the Company completed on March 30, 2006. The decision to distribute the common shares and the determination of the terms of the distribution were made through arm's length negotiations primarily between the Company and Dundee Securities Corporation as lead underwriter. Mr. Anderson had some involvement in such negotiations solely in his capacity as a director and officer of Dundee Securities Corporation. Dundee Securities Corporation received an underwriters' fee totaling \$632,000 in connection with the offering.

On June 6, 2005 the Company purchased 139,396 shares of common stock from Stuart Doshi, the Company's President and Chief Executive officer, at the estimated fair market value prices on that date of \$4.25 per share for a total of \$592,433. The Company believes the purchase price of \$4.25 per share was at least as favorable to the Company as could have been obtained through arm's length negotiations with unaffiliated third parties since the Company also sold 939,194 shares of common stock for \$4.25 per share in 2005.

On May 31, 2005, David Creel, Vice President of Exploration and a director, exercised options to purchase 200,000 shares of common stock at an exercise price of \$2.00 per share. The options were granted to Mr. Creel pursuant to his services as Vice President of Exploration as follows: (i) 100,000 options on June 1, 1998 and (ii) 100,000 options on June 1, 2000.

On April 29, 2005, Thomas Cunningham, a director, exercised an option to purchase 100,000 shares of common stock at an exercise price of \$2.00 per share. The option was granted to Mr. Cunningham on April 30, 2000 pursuant to his services as a director.

Effective September 17, 2004, the Company issued 62,500 shares of common stock to Mr. Sednaoui pursuant to the conversion of a \$250,000 convertible note payable. The convertible note was issued on September 18, 2001 at an interest rate of 8% per annum for the purposes of funding the Company's capital expenditures in the Madisonville Project in Texas. The largest aggregate amount of principal outstanding of this convertible note payable during 2004 was \$250,000. A total of \$14,262 of interest was paid toward the promissory note during 2004 at an interest rate of 8%. As indicated, the note was converted in 2004.

Effective September 30, 2004, the Company issued 117,648 shares of common stock to Mr. Sednaoui in exchange for a \$500,000 reduction in the principal balance of a promissory note payable dated July 19, 2004 as consideration. The largest aggregate amount of principal

outstanding of this promissory note payable during 2004 was \$2,000,000. A total of \$500,000 in principal repayments were made toward the promissory note during 2004. A total of \$37,145 of interest was paid toward the promissory note during 2004 at an interest rate of 8%. The promissory note has been repaid in its entirety.

On August 27, 2004, Mr. Doshi exercised an option to purchase 500,000 shares of common stock at an exercise price of \$1.00 per share. The option was granted to Mr. Doshi on August 30, 1999 pursuant to his services as Chief Executive Officer of the Company.

On August 25, 2004, Mr. Delehanty exercised a warrant to purchase 100,000 shares of common stock at an exercise price of \$1.00 per share. The warrant was granted to Mr. Delehanty on August 30, 1999 pursuant to his services as a director.

March 25, 2004, Kevin Delehanty, a director, exercised an option to purchase 70,900 shares of common stock at an exercise price of \$1.00 per share. The option was granted to Mr. Delehanty on August 30, 1999 pursuant to his services as a director.

During 2004, the Company paid cash finders fees of \$165,670 to Mr. Delehanty in connection with the Company's equity and debt financings as follows: (i) \$86,545 relating to the private placement issuances of 350,800 shares of common stock at \$4.25 per share during July, August and September of 2004, and (ii) \$79,125 relating to the conversion into common stock of certain promissory notes and warrants held by a 5% shareholder as described below.

Effective March 22, 2004, the Company issued 539,000 shares of common stock to G. Carter Sednaoui and Rolling Hill Investors, LLC, an entity owned by Mr. Sednaoui, a 5% shareholder, pursuant to the exercise of warrants. Concurrently, Mr. Sednaoui and Rolling Hill Investors, LLC agreed to a \$1,347,500 reduction in the principal balance of certain of the Company's promissory notes payable as consideration for the exercise of the warrants. The common stock warrants were exercisable at a price of \$2.50 and had an expiration date of December 31, 2008. The largest aggregate amount of principal outstanding on these promissory notes payable during 2004 was \$5,130,180. A total of \$2,508,948 in principal repayments were made toward the promissory notes during 2004. A total of \$334,358 of interest was paid toward the promissory notes during 2004 at interest rates between 8% and 11%. The promissory notes have been repaid in their entirety.

During 2004, the Company sold 378,448 shares of common stock at a price of \$4.25 per share to Mr. Sednaoui and certain entities owned and controlled by him. The Company believes the purchase price of \$4.25 per share was at least as favorable to the Company as could have been obtained through arm's length negotiations with unaffiliated third parties since the Company sold 939,194 shares of its common stock for \$4.25 per share in the first half of 2005.

7. SHAREHOLDERS EQUITY:

GeoPetro's articles of incorporation allow for the issuance of 100,000,000 shares of common stock, 1,000,000 shares of Series A preferred stock (Series A Stock), 5,000,000 shares of

Series AA preferred stock (Series AA Stock), and an additional 44,000,000 shares of preferred stock which may be issued from time to time in one or more series.

Common Stock The holders of common stock are entitled to one vote per share. Subject to preferences on outstanding preferred stock, the holders of common stock are entitled to receive ratably such dividends as may be declared by the board of directors. In the event of a liquidation, the holders of common stock and Series A preferred stock are entitled to share ratably in all assets remaining after payment of liabilities, subject to prior distribution rights of preferred stock.

Conversion of Series A Stock Upon completion of the Company's initial public offering on March 30, 2006, all of the 1,000,000 shares of Series A Stock automatically converted into a like number of common shares.

Preferred Stock Significant rights and preferences attaching to the Series AA Stock are as follows:

Dividends The holders of Series AA Stock are entitled to receive ratably such cash dividends, if any, as may be declared from time to time by the board of directors out of funds legally available therefore and when declared, dividends shall be paid at the rate of \$0.07 per share each calendar quarter. Any quarterly dividends not paid when due shall be accrued and shall accumulate until paid.

Preference in Liquidation In the event of a liquidation, dissolution or winding up of GeoPetro, the holders of Series AA Stock are entitled to receive, prior and in preference to any distribution of any assets or surplus funds to the holders of Series A Stock and common stock, an amount equal to \$3.50 per share plus any dividends declared but unpaid on such shares, but no more.

Voting Rights The holders of Series AA Stock are entitled to the number of votes equal to the number of shares of common stock into which each share of preferred stock is convertible on the record date for the vote.

Conversion Each share of Series AA Stock is convertible, at the option of the holder, into fully paid and nonassessable shares of common stock on a one-for-one basis, subject to certain adjustments. If GeoPetro's common stock is listed on a national or regional exchange, including the NASD Over-the-Counter Bulletin Board, the Series AA Stock will automatically convert into shares of GeoPetro common stock on a one-for-one share basis effective the first trading day after the reported high selling price for GeoPetro's common stock is at least \$5.25 per share for any consecutive ten trading days. If an automatic conversion occurs within one year after issuance of the Series AA Stock, a holder will receive, on the one year anniversary date of the issuance of the Series AA Stock, a final cash dividend equivalent to a full year of dividends less any dividends paid before such conversion.

8. COMMON STOCK OPTIONS:

Effective as of September 10, 2001, the board of directors approved an incentive stock plan, providing for awards under the terms and provisions of such plan of incentive stock options, stock appreciation rights and restricted stock awards to officers, directors and employees of GeoPetro and its consultants (the Stock Incentive Plan). The plan provides, among other provisions, the following:

The maximum number of Common Shares which may be awarded, optioned and sold under the plan is 5,000,000 (subject to adjustment for stock splits, stock dividends and certain other adjustments to GeoPetro's common stock); and the per share exercise price for Common Shares to be issued pursuant to the exercise of an option shall be no less than the fair market value of GeoPetro's Common Shares as of the date of grant.

The Stock Incentive Plan provides for the granting to employees of incentive stock options within the meaning of Section 422 of the United States Internal Revenue Code of 1986, as amended, and for the granting of non-statutory stock options to directors who are not employees and consultants. In the case of employees who receive incentive stock options which are first exercisable in a particular calendar year and the aggregate fair market value of which exceeds \$100,000, the excess of the \$100,000 limitation shall be treated as a nonstatutory stock option under the Stock Incentive Plan.

The Stock Incentive Plan is being administered by the Board of Directors. The Board of Directors determines the terms of the options granted, including the number of Common Shares subject to each option, the exercisability and vesting requirements of each option, and the form of consideration payable upon the exercise of such option (i.e., whether cash or exchange of existing Common Shares in a cashless transaction or a combination thereof).

The Stock Incentive Plan will continue in effect for 10 years from September 10, 2001 (i.e., the date first adopted by the Board), unless sooner terminated by the board of directors. The Company has implemented a new 2004 Stock Option and Appreciation Rights Plan (the Stock Option Plan) for the issuance of options to purchase Common Shares and/or stock appreciation rights in 2004 or thereafter to directors, officers, employees and consultants of the Company and its subsidiaries. The Stock Option Plan has replaced the Stock Incentive Plan. Outstanding options issued under the Stock Incentive Plan will continue to be outstanding in accordance with their terms and the terms of the Stock Incentive Plan, but will count toward the limits in the amount of Common Shares available to be issued under the Stock Option Plan.

During 2004 no options were issued to employees or directors. No stock-based compensation was recognized for the years ended December 31, 2005. Effective January 1, 2006, the Company adopted SFAS 123 (R) resulting in stock compensation expense for the twelve months period ended December 31, 2006 of \$201,335. During 2004, the Company issued 500,000 shares of our common stock for cash proceeds of \$500,000 in connection with the

exercise of stock options by an officer and director. Concluded with the exercise of stock options, the officer sold 117,647 shares of common stock to the Company at the estimated fair market value prevailing at that time of \$4.25 per share. We recorded compensation expense of \$500,000 in connection with the purchase of stock. During 2006, 150,000 stock options were issued to directors and during 2005, 20,000 stock options were issued to employees pursuant to the Stock Option Plan.

A summary of the status of GeoPetro's stock option plan is as follows:

	Options	Exercise Prices	Weighted Average Exercise Price
Outstanding at December 31, 2003	4,839,750	\$0.50 to \$3.00	\$ 1.66
Granted			
Exercised	(584,500)	\$1.00 to \$1.25	1.00
Expired	(100,000)	\$1.00	1.00
Outstanding at December 31, 2004	4,155,250	\$0.50 to \$3.00	1.77
Granted	20,000	\$4.25 to \$6.25	5.25
Exercised	(300,000)	\$2.00	2.00
Outstanding at December 31, 2005	3,875,250	\$0.50 to \$6.25	1.77
Granted	150,000	\$3.85	3.85
Exercised			
Expired	(20,000)	\$3.00	3.00
Outstanding at December 31, 2006	4,005,250	\$0.50 to \$6.25	\$ 1.84

The weighted average fair value of options granted during the year ended December 31, 2005, as calculated under the Black-Scholes pricing model is \$0.70 and for the weighted average fair value of options granted in 2006, as calculated under the same method is \$1.83 per share.

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions used for grants in 2005 and 2006: risk-free, weighted-average interest rates ranging from 3.75 to 4.9 percent based on the U.S. Treasury yield curve in effect at the time of grant, expected dividend yield of 0 percent, expected life of 5 years from the date of grant, and expected volatility of 10 and 58 percent .

The options outstanding as of December 31, 2006 have the following contractual lives:

Number of Options Outstanding	Number of Options Exercisable	Exercise Prices	Weighted Average Remaining Contractual Life
750,000	750,000	0.50	1.33
45,250	45,250	1.25	0.16
1,290,000	1,290,000	2.00	0.99
1,750,000	1,050,000	2.10	6.43
150,000	20,000	3.85	4.29
10,000	4,000	4.25	3.01
10,000	2,000	6.25	3.44
4,005,250	3,161,250		

As of December 31, 2006, there are 3,161,250 options which are exercisable. The remaining 844,000 options will become exercisable ratably over the next four years.

9. COMMON STOCK WARRANTS:

In conjunction with the finance with a short term note payable during 2006, GeoPetro issued warrants to purchase 150,000 shares of GeoPetro's common stock at exercise prices of \$3.50 per share. The purchase rights under the warrants have expiration date of January 31, 2009 unless terminated earlier in accordance with the stock warrant purchase agreement. The fair value of the warrants issued on the date of the grant, \$182,390, was recorded as a discount to notes payable and is being amortized as interest expense over the term of the note. As of December 31, 2006, the unamortized amount is \$17,966.

The following table summarizes the number of shares reserved for the exercise of common stock purchase warrants as of December 31, 2006:

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

	Expiration Date	Exercise Price	12/31/2005 Shares	Warrants Exercised	Warrants Granted	Warrants (Expired)	12/31/2006 SHARES

			1,969,522	(75,000)	150,000	(106,667)	1,937,855

In conjunction with the issuance of units of equity securities during 2005, GeoPetro issued warrants to purchase 37,000 shares of GeoPetro's common stock at exercise prices of \$5.00 per share. The purchase rights under the warrants have expiration dates from June 30, 2006 to February 28, 2008 unless terminated earlier in accordance with the stock warrant purchase agreement. The Company agreed to extend the warrants by a period of one year for a total of 143,334 shares. The fair value of the warrants on the date of extension, \$32,404, was disclosed and combined with compensation expense, FAS 123 in Note 2 and \$2,927 was recorded as consulting expense.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

The following table summarizes the number of shares reserved for the exercise of common stock purchase warrants as of December 31, 2005:

	Expiration Date	Exercise Price	12/31/04 Shares	Warrants Exercised	Warrants Granted	Warrants Extended (expired)	12/31/05 Shares

In conjunction with the issuance of units of equity securities during 2004, GeoPetro issued warrants to purchase 155,000 shares of GeoPetro's common stock at exercise prices ranging from \$5.00 to \$5.25 per share. The purchase rights under the warrants have expiration dates from December 31, 2005 to March 31, 2009 unless terminated earlier in accordance with the stock warrant purchase agreement.

During 2004, in conjunction with the issuance of promissory notes, GeoPetro issued warrants to purchase 64,375 shares of GeoPetro's common stock at an exercise price of \$5.00 per share. The purchase rights under the warrants have expiration dates from July 19 to September 30, 2008, unless terminated earlier in accordance with the stock warrant purchase agreement. The

fair value of the warrants on the date of issuance, \$31,729, was recorded as a debt discount and is being amortized over the life of the promissory notes.

The following table summarizes the number of shares reserved for the exercise of common stock purchase warrants as of December 31, 2004:

	Expiration Date	Exercise Price	12/31/03 Shares	Warrants Exercised	Warrants Granted	Warrants Extended (canceled)	12/31/04 Shares

10. COMMITMENTS AND CONTINGENCIES:

Employment Agreements The Company entered into a contract of employment with Stuart J. Doshi, Founder, President, Chief Executive Officer and Chairman of the Board of Directors, dated July 28, 1997 (effective July 1, 1997) and amended on January 11, 2001, July 1, 2003, April 20, 2004, May 9, 2005, July 28, 2005 and January 30, 2006. The contract as amended provides for a five-year term commencing May 1, 2005 which term is automatically extended for successive two-year renewal terms unless: (a) the board of directors elects not to renew the

contract and the Company provides notice to Mr. Doshi of such non-renewal at least six months prior to the expiry of his employment term or any renewal term, or (b) Mr. Doshi attains age 75, in which case the term ends upon the completion of the calendar year in which he becomes 75 years old unless the Company and Mr. Doshi mutually agree to one-year extensions. The contract of employment currently provides for an annual base salary of \$300,000 and further provides that in the event of a change of control of the Company or if Mr. Doshi is terminated without cause, he is entitled to receive (a) in exchange for all of his vested stock options and vested restricted shares, such number of Common Shares having a market value equal to the difference between (x) the aggregate total market value of all vested restricted shares and Common Shares he would receive upon exercise of all vested stock options less (y) the aggregate total exercise price for all of his vested stock options; provided, however, that if the Common Shares to be delivered to Mr. Doshi upon such change of control or termination have not been registered so as to permit immediate public resale, Mr. Doshi shall instead receive a cash payment equal to the market value on the date of termination of all vested stock options and restricted shares without any discount for liquidity or minority position against cancellation of such options and restricted shares, (b) a cash payment equal to the greater of (i) his compensation for the remainder of his term, including salary and the aggregate amount of his bonuses in respect of the last four fiscal years and (ii) four times his compensation in the current year, including his then-current salary and the average amount of his bonuses for the last four fiscal years, and (c) an additional cash payment representing his employment benefits equal to 20% of the amount of salary he is entitled to receive under (b)(i) or (b)(ii) above, as applicable. In addition, in the event of a change of control or termination without cause, all unvested options issued by the Company to Mr. Doshi will vest.

GeoPetro has executed an employment contract dated April 28, 1998 and amended on June 15, 2000, May 12, 2003 and January 1, 2005 with its Vice President of Exploration, David V. Creel. The contract provides an annual salary of \$150,000 and may be terminated by GeoPetro without cause upon the payment to Mr. Creel of cash payments equal to the lesser of three months' base salary or base salary during the remainder of the employment term, and, in the event of termination without cause, all unvested options issued by GeoPetro to Mr. Creel will vest.

GeoPetro has executed an employment contract dated June 19, 2000 and amended on December 12, 2002 and January 1, 2005 with its Vice President of Finance and Chief Financial Officer, J. Chris Steinhauser. The contract provides for an annual salary of \$150,000 and may be terminated by GeoPetro without cause upon the making of cash payments equal to the lesser of three months' base salary or base salary during the remainder of the employment term, and, in the event of termination without cause, all unvested warrants issued by GeoPetro to Mr. Steinhauser will vest.

Office Lease Effective March 1, 2004, GeoPetro is committed under an office sublease which provides for a sixty month term. The sublease is cancelable by either party after thirty-six months. The sublease provides for minimum monthly lease payments of \$5,788 during the first thirty-six months of the lease term and \$6,527 per month from the thirty-seventh month to the sixtieth month. Minimum annual rentals due under this agreement are as follows:

Year	Amount
2007	76,856
2008	78,334
2009	13,056

Rent expense for the years ended December 31, 2006, 2005 and 2004, was approximately \$69,466, \$69,466, and \$67,138, respectively, and is included in general and administrative expenses in the accompanying statements of operations.

Madisonville MGP Agreement GeoPetro owns a 100% working interest in leases located in Madisonville (Rodessa) Field in Madison County, Texas. GeoPetro's working interest covers the Rodessa formation interval at approximately 11,800 feet of depth. The Rodessa reserves are being developed through the re-entry and recompletion of the Ruby Magness No. 1 well (originally drilled in 1994) and the drilling of additional well locations. The natural gas in the Rodessa formation contains 28% impurities which must be removed in order to meet pipeline quality specifications.

In this connection, GeoPetro entered into agreements with a subsidiary of a NYSE listed company, Hanover Compressor Company (Hanover), that funded, constructed, installed and operated a dedicated gas treatment plant to process the Rodessa gas. The gas treatment plant is presently capable of treating and bringing up to pipeline specifications approximately 18 million cubic feet of inlet gas per day. Gateway Processing Company (Gateway) has installed field gathering pipelines and a sales pipeline with an estimated capacity of at least 70 million cubic feet of gas per day to transport the treated natural gas to a major pipeline in the area.

Effective July 25, 2005, Madisonville Gas Processing, LP (MGP) purchased the natural gas treatment plant from Hanover. Concurrent with MGP's purchase of the gas treatment plant, the Company, Gateway and MGP terminated the Hanover/Gateway agreements and entered into a new agreement, (the **MGP Agreement**), to treat and transport the Company's gas production from the Madisonville Project. As a result of the MGP Agreement, MGP has committed to install and make operational additional treating facilities capable of treating 50 MMcf/d, which combined with the capacity of the current in-service treating facilities will represent a total treating capacity of 68 MMcf/d for the Madisonville treatment plant.

The term of the MGP Agreement commenced August 1, 2005 and continues so long as the Company owns any oil and gas leases in the Madisonville Field, provided that it shall terminate 30 years from the effective date unless extended. Under the terms of the MGP Agreement, the Company has committed all natural gas production from its interest in the Madisonville Project

to MGP. MGP purchases the untreated natural gas from the Company at the well site point of delivery for a net price equal to the weighted average price per MMBTU that MGP receives for the natural gas delivered to the sales pipeline less certain gathering, treatment and transportation charges. The gathering, treatment and transportation price adjustments are described below. All proceeds from MGP's sale of Rodessa Formation gas are deposited in an escrow account and then disbursed in accordance with the joint direction of the Company and MGP.

The MGP Agreement provides that certain gathering, treating and transportation fees shall be paid to MGP from the escrow account. The MGP Agreement provides that MGP will receive a gathering and marketing fee of \$0.07 and \$0.01 per Mcf, respectively, of gas measured and delivered to the natural gas treatment plant. In addition, for the first 18,000 Mcf/d of gas measured and delivered to the inlet flange of the gas treatment plant, MGP will receive a treating fee of \$1.50 per Mcf. This treating fee will remain in effect until September 30, 2010. For any gas volumes in excess of 18,000 Mcf/d of gas delivered to the inlet flange of the gas treatment plant, MGP will receive a treating fee of \$1.10 per Mcf. Beginning October 1, 2010, this fee of \$1.10 per Mcf shall be charged for all gas measured and delivered to the plant. One-quarter (1/4) of the foregoing treating fees will be adjusted using the Producer Price Index for Industrial Commodities (PPI) and one-quarter (1/4) using the Consumer Price Index (CPI) commencing January 1, 2006. One-half (1/2) of the foregoing gathering and marketing fees will be adjusted using the Consumer Price Index (CPI) commencing January 1, 2006. The Company has the right, upon giving 60 days' notice, to terminate the marketing fee whereupon it shall assume the sole responsibility of marketing the natural gas sold.

For the first 18,000 Mcf/d of gas measured and delivered to the inlet flange of the gas treatment plant, Gateway will receive a transportation fee of \$0.10 per Mcf. This fee will remain in effect for 36 months from the effective date of the MGP Agreement. Beginning in the 37th month and terminating at the end of the 60th month from the effective date of the MGP Agreement, the fee shall be reduced to \$0.08 per Mcf for the first 18,000 Mcf/d of gas measured and delivered to the inlet flange of the gas treatment plant. For any gas volumes in excess of 18,000 Mcf/d of gas measured and delivered to the inlet flange of the gas treatment plant, Gateway will receive a transportation fee of \$0.12 per Mcf measured and delivered from the outlet flange of the plant. This fee will remain in effect 36 months from the effective date of the MGP Agreement and shall be reduced to \$0.10 per Mcf thereafter. After 60 months, this transportation fee shall be \$0.10 per Mcf for all volumes delivered from the outlet flange of the plant.

The foregoing gathering, treatment and transportation price adjustments are inclusive of all costs and expenses to gather, separate, treat, dehydrate and transport natural gas produced and delivered from the Company's well(s).

The Company has committed to a three-well drilling program to facilitate the expansion of the gas treatment plant. The Company has drilled two of the three required wells to the Rodessa formation. The commitment requires the Company to commence the drilling of the third well sufficient to test the Smackover Formation (estimated to be encountered at approximately 18,000 feet) on or before September 30, 2008. It is estimated that the 18,000 foot well will cost

\$10 million to drill and complete. The Company has granted MGP a security interest in the Madisonville Field properties to secure the three well commitment. The security interest shall be subordinated to any third party lender in the event the Company secures future debt against the property. MGP has granted the Company a similar security interest in the gas treatment plant to secure its obligation to expand the treatment plant on a timely basis.

Madisonville Net Profits Interest Redwood LP's 95.3125% to 100% working interest is subject to a net profits interest in favor of an unrelated third party. The net profits interest is 12.5% (proportionately reduced) of the net operating profits until payout is achieved. After payout, the net profits interest increases to 30% (proportionately reduced). Payout, for purposes of the net profits interest, is defined and achieved at such time as Redwood LP has recouped from net operating cash flows its total net investment in the project plus a 33% cash on cash return.

The Cook Inlet Alaska CBM Project The Company entered into an agreement with Pioneer Oil Company, Inc. (Pioneer) dated April 20, 2005, wherein it acquired a 100% working interest (81% net revenue interest) in approximately 117,000 acres onshore in Cook Inlet, Alaska. The Company has subsequently acquired an additional 5,000 acres in this project. The terms provide for the Company to pay total consideration of \$20 per acre, or approximately \$2.3 million, for the leases. The Option provides that the Company will pay the total lease consideration in two installments. The Company paid the first installment totaling \$1,068,063 on August 17, 2005 and has received assignment of the 100% working interest in the leases. Within three years from the date of receipt of legally sufficient assignment of the 100% working interest in the leases, the Company has the option to conduct a \$2.5 million work program consisting of, but not limited to, a multiple test well drilling program on the leases over a three-year period, and, after completion of the work program and an evaluation of the results, to remit the final additional acreage consideration of \$10 per acre for the leases. The agreement provides that if the Company fails to pay the lease consideration when due, fails to perform the work program or otherwise defaults under the agreement, it shall forfeit its interest and reassign the leases to Pioneer with no further liability to GeoPetro.

Salary Increases On December 18, 2006, the independent members of the board of directors, acting on the recommendations of Stuart J. Doshi, the President and CEO, voted to increase the salaries of Messrs. Creel and Steinhauser, officers of the Company, to \$163,200 annually effective January 1, 2007.

Sale of Australian Interests, EP 381 & EP 408 - On June 20, 2007, the Company agreed to sell and transfer all of its remaining property interests in Australia to an unrelated party for cash consideration and a Petroleum Sales Royalty Payment equal to 25% of the future annual earnings before interest, taxes, depreciation and amortization from the property interests. The agreement is subject to satisfaction of certain terms and conditions. Specifically, the agreement provides that the Company will be paid consideration for the sale and transfer of its property interests as follows:

1. Initial cash consideration of \$175,000 subject to certain closing conditions;

2. a second cash payment of \$175,000 upon a successful flow test of petroleum from a well located on the property interests. A successful flow test is defined for purposes of this agreement to be a test of at least 7 million standard cubic feet of natural gas for a continuous and uninterrupted 24 hour period (or an equivalent oil/condensate rate based on a conversion ratio of 6000 cubic feet of gas to a barrel of oil or condensate); and,

3. a Petroleum Sales Royalty Payment equal to 25% of the future annual earnings before interest, taxes, depreciation and amortization from the property interests up to a total amount of \$2,200,000.

Goodwin Prospect, Central Alberta, Canada On June 21, 2007, the Company entered into a participation agreement wherein it acquired a 50% non-operated working interest in the Goodwin Prospect, which is located in the Central Alberta Basin, Canada. A total of 12,000 acres can be earned by the Company by the drilling of wells. On July 2, 2007, the Company advanced US \$477,050 to be applied toward the drilling and completion of the first well in the prospect, the Nexstar Goodwin 16-19-58-12 Well.

11. SUBSEQUENT EVENTS:

Proceeds from Notes The Company issued three promissory notes in February 2007 as the following:

The Company issued a \$500,000 short term Note payable on February 1, 2007 with a maturity date of October 31, 2007. The note may be repaid at any time without penalty. The principal plus accrued interest on the note are due on the maturity date. In connection with the note, the Company paid a loan origination fee of \$15,000 and granted a three-year exercisable warrant to purchase 25,000 Common Shares at \$3.50 per share.

The Company issued a \$300,000 short term Note payable on February 6, 2007 with a maturity date of October 31, 2007. The note may be repaid at any time without penalty. The principal plus accrued interest on the note are due on the maturity date. In connection with the note, the Company paid a loan origination fee of \$9,000 and granted a three-year exercisable warrant to purchase 15,000 Common Shares at \$3.50 per share.

The Company issued a \$100,000 short term Note payable on February 1, 2007 with a maturity date of October 31, 2007. The note may be repaid at any time without penalty. The principal plus accrued interest on the note are due on the maturity date. In connection with the note, the Company paid a loan origination fee of \$3,000 and

granted a three-year exercisable warrant to purchase 5,000 Common Shares at \$3.50 per share.

Note Extension On February 1, 2007, the Company received an extension of its note payable to Pine Hill Capital, LLC and the new maturity date is October 31, 2007. Under the agreement, the Company agreed to repay the entire remaining principal balance plus accrued interest on October 31, 2007. In the event this Note is not repaid by the maturity date, and unless an extension thereof is mutually agreed to, per the terms of the Note, the Company agreed that it shall dedicate 5% of its net cash flow from the Madisonville Project located in Madison County, Texas toward the unpaid Principal Amount and all accrued and unpaid interest thereon, until such amounts are paid in full. Net cash flow for purposes of this provision shall mean gross revenues received by the Company less royalties, production taxes and net profits interest expense. The Company has paid \$80,000 accrued interest thru January 31, 2007. In connection with the extension, the Company paid a loan extension fee of \$30,000 and granted a three-year exercisable warrant to purchase 50,000 Common Shares at \$3.50 per share.

Related Party Promissory Note On February 12, 2007, Stuart J. Doshi, President and CEO, loaned \$100,000 to the Company. The note bears interest at 8% annually and is payable on demand. The note plus accrued interest was repaid on March 28, 2007.

Note Receivable Extension On June 7, 2006, the Company loaned \$1,000,000 to G. Carter Sedanoui, a 5% shareholder, evidenced by a short term promissory note payable to the Company with an original maturity date of March 31, 2007. On March 30, 2007, the Company extended the maturity date of the note to June 30, 2007. The Company received the full payment of the note plus accrued interest on June 29, 2007.

Warrants Issued On February 12, 2007, the Company issued a two-year exercisable no par voting common stock warrant to purchase 20,000 Common Shares at \$3.50 per share to an unaffiliated third party for geophysical services. The purchase rights under the warrant has an expiration dates of February 12, 2009 unless terminated earlier in accordance with the stock warrant purchase agreement.

On February 28, 2007, the Company issued a two-year exercisable no par voting common stock warrant to purchase 5,000 Common Shares at \$4.51 per share to the same party as above for geophysical services. The purchase rights under the warrant has an expiration date of February 28, 2009 unless terminated earlier in accordance with the stock warrant purchase agreement.

Warrants Exercises On April 25, 2007, May 9, 2007, and June 13, 2007, an officer and director, exercised warrants to purchase 80,000, 70,000 and 33,333 shares of common stock at an exercise price of \$2.00, \$2.00 and \$4.00 per share, respectively. The warrants were granted on June 18, 2000 and had an expiration dates of between June 18 and June 30, 2007.

Edgar Filing: GEOPETRO RESOURCES CO - Form S-1

On May 11 and May 14, 2007, 12,357 and 25,000 shares of common stock, respectively, were issued for gross and net proceeds of \$130,750 pursuant to the exercise of warrants.

Conversion of Series AA Preferred Stock On March 28, 2007, all 1,890,710 of the Company's outstanding shares of Series AA Stock automatically converted into 1,890,710

F-38

shares of our common stock, no par value per share. Under the Company's Amended and Restated Articles of Incorporation, and as more fully described in Note 7, the Series AA stock automatically converts into common shares on a one-for-one share basis effective the first trading day after the reported high selling price for our common shares is at least \$5.25 per share for any consecutive ten trading days, which condition was met on March 27, 2007. Dividends accrued on the Series AA Stock at a rate of \$0.28 per annum, per share, while the Series AA Stock was outstanding. In 2006, dividends paid on the Series AA Stock totaled \$529,400. Pursuant to the terms of the Series AA Stock, no dividends are payable for the first quarter of 2007.

Common Stock Offering On August 13, 2007, the Company entered into agreements to sell, pursuant to a private placement, 2,002,599 units of the Company at a subscription price of \$3.85 per Unit for total gross proceeds of \$7,710,006. Each unit consists of one share of common stock of the Company and three-tenths common share purchase warrant of the Company. Each one whole warrant shall entitle the holder to acquire one share of common stock at a price of \$4.50 per share for a period of five years from the closing date. The units have been purchased by a group of private investors, subject to customary closing conditions on August 13, 2007. The Company will file a registration statement covering the common shares. The gross proceeds of the sale of common shares will be used to fund the Company's exploration and development program and for general working capital purposes.

Under the terms of a registration rights agreement in connection with the offering, the Company must pay the holders of the registrable securities issued in the private placement liquidated damages if a registration statement is not filed in conjunction with the private placement with the U.S. Securities and Exchange Commission (SEC) within 60 days of the closing of the private placement (August 13, 2007). In addition, the Company must pay the holders of the registrable securities liquidated damages in the event a registration statement that was filed in conjunction with the private placement has not been declared effective by the U.S. Securities and Exchange Commission (SEC) within 180 days of the closing of the private placement (August 13, 2007). The Company must pay as liquidated damages a number of shares of common stock equal to 1.0% of the number of shares of common stock (including common stock underlying warrants) that were issued to the holder for each 30-day period (pro rated on a daily pro-rata basis for periods shorter than 30 days) that the above conditions are not met, not to exceed 10% of the aggregate number of shares of common stock issued to such holder.

12. UNAUDITED SUPPLEMENTARY OIL AND GAS RESERVE INFORMATION:

The following supplementary information is presented in compliance with United States Securities and Exchange Commission regulations and is not covered by the report of GeoPetro's independent registered public accountants. The information required to be disclosed for the years ended 2006, 2005 and 2004 in accordance with FASB Statement No. 69, "Disclosures about Oil and Gas Producing Activities," is discussed below and is further detailed in the following tables.

The reserve quantities and valuations for fiscal 2006 are based upon estimates by MHA Petroleum Consultants. The reserve quantities and valuations for fiscal 2005 and 2004 are based upon estimates by Sproule Associates Inc. The proved reserves presented herein are located entirely within the United States. Proved reserves are the estimated quantities of crude oil, natural gas and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, i.e. prices and costs as of the date the estimate is made. Prices include consideration of changes in existing prices provided only by contractual arrangements, but not on escalations based upon future conditions. Reservoirs are considered proved if economic productivity is supported by either actual production or a conclusive formation test. The area of a reservoir considered proved includes

(A) that portion delineated by drilling and defined by gas-oil and/or oil-water contacts, if any, and (B) the immediately adjoining portions not yet drilled, but which can reasonably be judged as economically productive on the basis of available geological and engineering data. In the absence of information on fluid contacts the lowest known structural occurrence of hydrocarbons controls the lower proved limit of the reservoir.

Proved developed reserves are reserves that can be expected to be recovered through existing wells with existing equipment and operating methods. Additional oil and gas reserves expected to be obtained through the application of fluid injection or other improved recovery techniques for supplementing the natural forces and mechanisms of primary recovery should be included as proved developed reserves only after testing by a pilot project or after the operation of an installed program has confirmed through production response that increased recovery will be achieved.

The estimates included in the following tables are by their nature inexact and are subject to changing economic, operating and contractual conditions. At December 31, 2006, all of GeoPetro's reserves are attributable to two producing wells, two shut-in wells and an undeveloped location. Other than the one producing well which has been on production since May 2003 and the shut-in well which was placed on production in March 2006, there is no other production history as of or subsequent to that date. Reserve estimates for these wells are subject to substantial upward or downward revisions after production commences and a production history is obtained. Accordingly, reserve estimates of future net revenues from production may be subject to substantial revision from year to year. Reserve information presented herein is based on reports prepared by independent petroleum engineers.

The assumptions used to compute the standardized measure are those prescribed by the Financial Accounting Standards Board and, as such, do not necessarily reflect GeoPetro's expectations for actual revenues to be derived from those reserves nor their present worth. The limitations inherent in the reserve quantity estimation process, as discussed previously, are equally applicable to the standardized measure computations since these are the basis for the valuation process.

	AS OF DECEMBER 31,		
	2006 (MMcf)	2005 (MMcf)	2004 (MMcf)
Proved developed	12,235	4,645	4,448
Proved developed non-producing	12,365	8,903	7,037
Proved undeveloped		7,880	6,923
Total	24,600	21,428	18,408

For purposes of the following disclosures, estimates were made of quantities of proved reserves and the periods during which they are expected to be produced. Future cash flows were computed by applying year-end prices to estimated annual future production from proved gas reserves. The average year-end prices for gas were as indicated below. Future development and production costs were computed by applying year-end costs to be incurred in producing and further developing the proved reserves. Future income tax expenses were computed by applying, generally, year-end statutory tax rates (adjusted for permanent differences, tax credits and allowances) to the estimated net future pre-tax cash flows. The discount was computed by application of a 10% discount factor. The calculations assume the continuation of existing economic, operating and contractual conditions. However, such arbitrary assumptions have not proven to be the case in the past. Other assumptions of equal validity could give rise to substantially different results.

STANDARDIZED MEASURE OF DISCOUNTED FUTURE NET CASH FLOWS
RELATING TO PROVED PETROLEUM AND NATURAL GAS RESERVES (UNAUDITED)

	YEAR ENDED DECEMBER 31,
