- (a) Income from this issue is considered a preference item for purposes of calculating the alternative minimum tax (AMT).
- (b) Variable rate security. Interest rate disclosed is that which is in effect at September 30, 2009.
- (c) Pre-Refunded bonds are escrowed with U.S. government obligations and/or U.S. government agency securities and are considered by the manager to be triple-A rated even if issuer has not applied for new ratings.

See Notes to Schedule of Investments.

Western Asset Municipal Partners Fund Inc.

Schedule of Investments (unaudited) (continued)

September 30, 2009

- (d) Security is exempt from registration under Rule 144A of the Securities Act of 1933. This security may be resold in transactions that are exempt from registration, normally to qualified institutional buyers. This security has been deemed liquid pursuant to guidelines approved by the Board of Directors, unless otherwise noted.
- (e) Bonds are escrowed to maturity by government securities and/or U.S. government agency securities and are considered by the manager to be triple-A rated even if issuer has not applied for new ratings.
- (f) Variable rate demand obligations have a demand feature under which the Fund can tender them back to the issuer or liquidity provider on no more than 7 days notice. Date shown is the date of the next interest rate change.
- # Aggregate cost for federal income tax purposes is substantially the same.

	100.0%

As a percentage of total investments.

In the event that a security is rated by multiple nationally recognized statistical rating organizations (NRSROs) and receives different ratings, the Fund will treat the security as being rated in the highest rating category received from an NRSRO.

See pages 7 and 8 for definitions of ratings.

See Notes to Schedule of Investments.

Bond Ratings (unaudited)

The definitions of the applicable rating symbols are set	forth balow:
The definitions of the applicable fating symbols are set	forth below.
Standard & Poor s Ratings Service (Standard & Poor sign to show relative standings within the major rating c	r s) Ratings from AA to CCC may be modified by the addition of a plus (+) or minus () categories.
AAA	Bonds rated AAA have the highest rating assigned by Standard & Poor s. Capacity
AA	to pay interest and repay principal is extremely strong. Bonds rated AA have a very strong capacity to pay interest and repay principal and differ from the highest rated issues only in a small degree.
A	Bonds rated A have a strong capacity to pay interest and repay principal although they are somewhat more susceptible to the adverse effects of changes in
ВВВ	circumstances and economic conditions than debt in higher rated categories. Bonds rated BBB are regarded as having an adequate capacity to pay interest and repay principal. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for bonds in this category
BB, B, CCC, CC and C	than in higher rated categories. Bonds rated BB, B, CCC, CC and C are regarded, on balance, as predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation. BB represents the lowest degree of speculation and C the highest degree of speculation. While such bonds will likely have some quality and protective characteristics, these are outweighed by large
D	uncertainties or major risk exposures to adverse conditions. Bonds rated D are in default and payment of interest and/or repayment of principal is in arrears.
Moody s Investors Service (Moody s) Numerical m highest and 3 the lowest ranking within its generic categ	nodifiers 1, 2 and 3 may be applied to each generic rating from Aa to Caa, where 1 is the gory.
Aaa	Bonds rated Aaa are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as gilt edge. Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes can be visualized as most unlikely to impair the fundamentally strong position of such issues.
Aa	Bonds rated Aa are judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than in Aaa securities.
A	Bonds rated A possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment some time in the future.
Baa	Bonds rated Baa are considered as medium grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack

Ba

outstanding investment characteristics and in fact have speculative characteristics as well.

Bonds rated Ba are judged to have speculative elements; their future cannot be considered as well assured. Often the protection of interest and principal payments may be very moderate and therefore

7

Bond Ratings (unaudited)(continued)

not well safeguarded during both good and bad times over the future. Uncertainty

of position characterizes bonds in this class.

Bonds rated B generally lack characteristics of desirable investments. Assurance of

interest and principal payments or of maintenance of other terms of the contract

over any long period of time may be small.

Bonds rated Caa are of poor standing. These may be in default, or present elements

of danger may exist with respect to principal or interest.

Bonds rated Ca represent obligations which are speculative in a high degree. Such

issues are often in default or have other marked short-comings.

Bonds rated C are the lowest class of bonds and issues so rated can be regarded as

having extremely poor prospects of ever attaining any real investment standing.

Short-Term Security Ratings

SP-1 Standard & Poor s highest rating indicating very strong or strong capacity to pay

principal and interest; those issues determined to possess overwhelming safety

characteristics are denoted with a plus (+) sign.

A-1 Standard & Poor s highest commercial paper and variable-rate demand obligation

(VRDO) rating indicating that the degree of safety regarding timely payment is either overwhelming or very strong; those issues determined to possess overwhelming safety characteristics are denoted with a plus (+) sign.

Moody s highest rating for issues having a demand feature VRDO.

Moody s highest rating for short-term municipal obligations.

Moody s highest rating for commercial paper and for VRDO prior to the advent of

the VMIG 1 rating.

Fitch s highest rating indicating the strongest capacity for timely payment of

financial commitments; those issues determined to possess overwhelming strong

credit feature are denoted with a plus (+) sign.

Notes to Schedule of Investments (unaudited))
------------------------------------	------------	---

1. Organization and Significant Accounting Policies

Western Asset Municipal Partners Fund Inc. (the Fund) was incorporated in Maryland on November 24, 1992 and is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the 1940 Act). The Board of Directors authorized 100 million shares of \$0.001 par value common stock. The Fund s primary investment objective is to seek a high level of current income which is exempt from federal income taxes, consistent with the preservation of capital. As a secondary investment objective, the Fund intends to enhance portfolio value by purchasing tax exempt securities that, in the opinion of the investment manager, may appreciate in value relative to other similar obligations in the marketplace.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP).

(a) Investment Valuation. Securities are valued based on transactions in municipal obligations, quotations from municipal bond dealers, market transactions in comparable securities and various other relationships between securities. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. When prices are not readily available, or are determined not to reflect fair value, the Fund values these securities at fair value as determined in accordance with the procedures approved by the Fund s Board of Directors. Short-term obligations with maturities of 60 days or less are valued at amortized cost, which approximates fair value.

The Fund has adopted Statement of Financial Accounting Standards Board Codification Section 820 (formerly Statement of Financial Accounting Standards No. 157) (ASC Section 820). ASC Section 820 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund s investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The fund uses valuation techniques to measure fair value that are consistent with the market approach, income approach and/or cost approach, depending on the type of the security and the particular circumstance.

The following is a summary of the inputs used in valuing the Fund s assets carried at fair value:

Description	Quoted Prices (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Municipal Bonds		\$ 227,411,373		\$ 227,411,373
Short-term investment		\$ 100,000		100,000
Total		\$ 227,511,373		\$ 227,511,373

See Schedule of Investments for additional detailed categorizations.

(b) Security Transactions. Security transactions are accounted for on a trade date basis.

2. Investments

At September 30, 2009, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

Gross unrealized appreciation	\$ 10,769,053
Gross unrealized depreciation	(1,213,067)
Net unrealized appreciation	\$ 9,555,986

3. Derivative Instruments and Hedging Activities

Financial Accounting Standards Board Codification Section 815 (formerly Statement of Financial Accounting Standards No. 161) (ASC Topic 815) requires enhanced disclosure about an entity s derivative and hedging activities.

At September 30, 2009, the Fund did not hold any derivative instruments.
