Table of Contents

1. Basis of Presentation and Summary of Significant Accounting Policies

Organization

The Company designs, manufactures, markets and sells hard disk drives. Hard disk drives, which are commonly referred to as disk drives or hard drives, are used as the primary medium for storing electronic data. The Company produces a broad range of disk drive products addressing enterprise applications, where its products are primarily used in enterprise servers, mainframes and workstations; client compute applications, where its products are used in desktop and notebook computers; and client non-compute applications, where its products are used in a wide variety of end user devices such as digital video recorders (DVRs), personal data backup systems, portable external storage systems and digital media systems. The Company sells its disk drives primarily to major original equipment manufacturers (OEMs), distributors and retailers. In addition to manufacturing and selling disk drives, the Company provides storage services for small- to medium-sized businesses, including online backup, data protection and recovery solutions.

Basis of Presentation and Consolidation

The unaudited condensed consolidated financial statements include the accounts of the Company and all its wholly-owned subsidiaries, after elimination of intercompany transactions and balances. The preparation of financial statements in accordance with accounting principles generally accepted in the United States also requires management to make estimates and assumptions that affect the amounts reported in the Company's consolidated financial statements and accompanying notes. Actual results could differ materially from those estimates. The methods, estimates and judgments the Company uses in applying its most critical accounting policies have a significant impact on the results the Company reports in its consolidated financial statements. The consolidated financial statements reflect, in the opinion of management, all material adjustments necessary to present fairly the consolidated financial position, results of operations, cash flows and shareholders' equity for the periods presented. Such adjustments are of a normal and recurring nature. The Company's Consolidated Financial Statements for the fiscal year ended July 1, 2011 are included in its Annual Report on Form 10-K as filed with the United States Securities and Exchange Commission (SEC) on August 17, 2011. The Company believes that the disclosures included in the unaudited Condensed Consolidated Financial Statements, when read in conjunction with its Consolidated Financial Statements as of July 1, 2011 and the notes thereto, are adequate to make the information presented not misleading.

The results of operations for the three and six months ended December 30, 2011, are not necessarily indicative of the results of operations to be expected for any subsequent interim period in the Company's fiscal year ending June 29, 2012. The Company operates and reports financial results on a fiscal year of 52 or 53 weeks ending on the Friday closest to June 30. The three and six months ended December 30, 2011 and December 31, 2010 consisted of 13 weeks and 26 weeks, respectively. Fiscal year 2012 will be comprised of 52 weeks and will end on June 29, 2012.

Summary of Significant Accounting Policies

Since the Company's fiscal year ended July 1, 2011, there have been no significant changes in the Company's significant accounting policies other than the policy for testing impairment of goodwill discussed below. Please refer to Note 1 of Financial Statements and Supplementary Data contained in Part II, Item 8 of the Company's Annual Report on Form 10-K for the fiscal year ended July 1, 2011, as filed with the SEC on

Edgar Filing: Seagate Technology plc - Form 10-Q

August 17, 2011, for a discussion of the Company's other significant accounting policies.

Impairment of Goodwill and Other Long-lived Assets In September 2011, the FASB issued ASU No. 2011-08, *Intangibles - Goodwill and Other (ASC Topic 350) - Testing Goodwill for Impairment*. The ASU allows companies the option to perform a qualitative assessment in determining whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, including goodwill. Based on the qualitative assessment, if the fair value of a reporting unit is not less than its carrying amount then the Company is not required to perform the two-step goodwill impairment test. The Company has early adopted the ASU in the first quarter of fiscal year 2012. As required by the new ASU, the Company tests goodwill of its reporting units for impairment whenever events occur or circumstances change, such as an adverse change in business climate or a decline in the overall industry, that would more likely than not reduce the fair value of a reporting unit below its carrying amount, including goodwill.

Table of Contents*Newly Adopted and Recently Issued Accounting Pronouncements*

In December 2011, the FASB issued ASU No. 2011-11, *Balance Sheet (ASC Topic 210) Disclosures about Offsetting Assets and Liabilities*. The ASU requires enhanced disclosures on offsetting, including disclosing gross and net information about instruments and transactions eligible for offset and instruments and transactions subject to an agreement similar to a master netting agreement. The ASU is effective for the Company's first quarter of fiscal year 2014 and requires the enhanced disclosures for all comparative periods presented. Other than requiring additional disclosures, the adoption of this new guidance will not have a material impact on the Company's consolidated financial statements.

2. Balance Sheet Information*Investments*

The Company's short-term investments are primarily comprised of readily marketable debt securities with remaining maturities of more than 90 days at the time of purchase. With the exception of securities held for its non-qualified deferred compensation plan, which are classified as trading securities, the Company classifies its investment portfolio as available-for-sale. The Company recognizes its available-for-sale investments at fair value with unrealized gains and losses included in Accumulated other comprehensive income (loss), which is a component of shareholders' equity. The amortized cost of debt securities is adjusted for amortization of premiums and accretion of discounts to maturity. Such amortization and accretion are included in interest income. Realized gains and losses are included in Other, net. The cost of securities sold is based on the specific identification method.

As of December 30, 2011, the Company's restricted cash and investments consisted of \$75 million in cash equivalents and investments held in trust for payment of its non-qualified deferred compensation plan liabilities and \$18 million in cash and investments held as collateral at banks for various performance obligations. As of July 1, 2011, the Company's restricted cash and investments consisted of \$84 million in cash equivalents and investments held in trust for payment of its non-qualified deferred compensation plan liabilities and \$18 million in cash and investments held as collateral at banks for various performance obligations.

The following table summarizes, by major type, the fair value and amortized cost of the Company's investments as of December 30, 2011:

(Dollars in millions)	Amortized Cost	Unrealized Gain/(Loss)	Fair Value
Available-for-sale securities:			
Money market funds	\$ 1,310	\$	\$ 1,310
Commercial paper	346		346
Corporate bonds	209	(1)	208
U.S. treasuries and agency bonds	91		91
Auction rate securities	17	(2)	15
Other debt securities	133	1	134
	2,106	(2)	2,104
Trading securities	79	(4)	75

Edgar Filing: Seagate Technology plc - Form 10-Q

Total	\$	2,185	\$	(6)	\$	2,179
Included in Cash and cash equivalents					\$	1,664
Included in Short-term investments						407
Included in Restricted cash and investments						93
Included in Other assets, net						15
Total					\$	2,179

Table of Contents

The Company's available-for-sale securities include investments in auction rate securities. Beginning in fiscal year 2008, the Company's auction rate securities failed to settle at auction and have continued to fail through December 30, 2011. Since the Company continues to earn interest on its auction rate securities at the maximum contractual rate, there have been no payment defaults with respect to such securities, and they are all collateralized, the Company expects to recover the entire amortized cost basis of these auction rate securities. The Company does not intend to sell these securities and has concluded it is not more likely than not that the Company will be required to sell the securities before the recovery of their amortized cost basis. Given the uncertainty as to when the liquidity issues associated with these securities will improve, these securities are classified within Other assets, net in the Company's Condensed Consolidated Balance Sheets.

As of December 30, 2011, with the exception of the Company's auction rate securities, the Company had no available-for-sale securities that had been in a continuous unrealized loss position for a period greater than 12 months. The Company determined no available-for-sale securities were other-than-temporarily impaired as of December 30, 2011.

The fair value and amortized cost of the Company's investments in debt securities classified as available-for-sale at December 30, 2011 by remaining contractual maturity were as follows:

(Dollars in millions)	Amortized Cost	Fair Value
Due in less than 1 year	\$ 1,766	\$ 1,766
Due in 1 to 3 years	323	323
Thereafter	17	15
Total	\$ 2,106	\$ 2,104

The following table summarizes, by major type, the fair value and amortized cost of the Company's investments as of July 1, 2011:

(Dollars in millions)	Amortized Cost	Unrealized Gain/(Loss)	Fair Value
Available-for-sale securities:			
Commercial paper	\$ 1,729	\$	\$ 1,729
Money market funds	815		815
U.S. treasuries and agency bonds	190		190
Certificates of deposit	136		136
Corporate bonds	116		116
Auction rate securities	18	(2)	16

Finished goods		257		385
	\$	827	\$	872

Other Current Assets

(Dollars in millions)	December 30, 2011		July 1, 2011	
Vendor non-trade receivables	\$	385	\$	519
Other		137		187
	\$	522	\$	706

Other current assets include non-trade receivables from certain manufacturing vendors resulting from the sale of components to these vendors who manufacture and sell completed sub-assemblies back to the Company. The Company does not reflect the sale of these components in revenue and does not recognize any profits on these sales. The costs of the completed sub-assemblies are included in inventory upon purchase from the vendors.

Property, Equipment and Leasehold Improvements, net

(Dollars in millions)	December 30, 2011		July 1, 2011	
Property, equipment and leasehold improvements	\$	7,672	\$	7,383
Accumulated depreciation and amortization		(5,462)		(5,138)
	\$	2,210	\$	2,245

3. Debt*Short-Term Borrowings*

Edgar Filing: Seagate Technology plc - Form 10-Q

On January 18, 2011, the Company and its subsidiary, Seagate HDD Cayman (the Borrower), entered into a credit agreement which provides for a \$350 million senior secured revolving credit facility. Seagate Technology plc and certain of its material subsidiaries fully and unconditionally guarantee, on a senior secured basis, the revolving credit facility. The revolving credit facility matures in January 2015. The \$350 million revolving credit facility is available for cash borrowings and for the issuance of letters of credit up to a sub-limit of \$75 million. As of December 30, 2011, no borrowings have been drawn under the revolving credit facility, and \$4 million had been utilized for letters of credit.

Long-Term Debt

\$600 Million Aggregate Principal Amount of 6.375% Senior Notes due October 2011 (the 2011 Notes). The 2011 Notes matured on October 1, 2011 and the Company repaid the entire outstanding principal amount of \$559 million, plus accrued and unpaid interest on October 3, 2011.

\$430 Million Aggregate Principal Amount of 10.00% Senior Secured Second-Priority Notes due May 2014 (the 2014 Notes). The interest on the 2014 Notes is payable semi-annually on May 1 and November 1 of each year. The issuer under the 2014 Notes is Seagate Technology International, and the obligations under the 2014 Notes are unconditionally guaranteed by the Company and certain of its significant subsidiaries. In addition, the obligations under the 2014 Notes are secured by a second-priority lien on substantially all of the Company's tangible and intangible assets. The indenture governing the 2014 Notes contains covenants that limit the Company's ability, and

Edgar Filing: Seagate Technology plc - Form 10-Q

Table of Contents

the ability of certain of its subsidiaries, (subject to certain exceptions) to: incur additional debt or issue certain preferred shares, create liens, enter into mergers, pay dividends, redeem or repurchase debt or shares, and enter into certain transactions with the Company's shareholders or affiliates. In the first six months of fiscal year 2012, the Company repurchased \$30 million aggregate principal amount of its 2014 Notes for cash at a premium to their principal amount, plus accrued and unpaid interest. The Company recorded a loss on the redemption of approximately \$5 million, which is included in Other, net in the Company's Condensed Consolidated Statements of Operations for the six months ended December 30, 2011. The 2014 Notes are included in Long-term debt, less current portion in the Condensed Consolidated Balance Sheet at December 30, 2011.

\$600 Million Aggregate Principal Amount of 6.8% Senior Notes due October 2016 (the 2016 Notes). The interest on the 2016 Notes is payable semi-annually on April 1 and October 1 of each year. The issuer under the 2016 Notes is Seagate Technology HDD Cayman, and the obligations under the 2016 Notes are unconditionally guaranteed by certain of the Company's significant subsidiaries. The 2016 Notes are included in Long-term debt, less current portion in the Condensed Consolidated Balance Sheet at December 30, 2011.

\$750 Million Aggregate Principal Amount of 7.75% Senior Notes due December 2018 (the 2018 Notes). The interest on the 2018 Notes is payable semi-annually on June 15 and December 15 of each year. The issuer under the 2018 Notes is Seagate Technology HDD Cayman and the obligations under the 2018 Notes are fully and unconditionally guaranteed, on a senior unsecured basis, by certain of the Company's significant subsidiaries. The 2018 Notes are included in Long-term debt, less current portion in the Condensed Consolidated Balance Sheet at December 30, 2011.

\$600 Million Aggregate Principal Amount of 6.875% Senior Notes due May 2020 (the 2020 Notes). The interest on the 2020 Notes is payable semi-annually on May 1 and November 1 of each year. The issuer under the 2020 Notes is Seagate Technology HDD Cayman, and the obligations under the 2020 Notes are fully and unconditionally guaranteed, on a senior unsecured basis, by the Company. The 2020 Notes are included in Long-term debt, less current portion in the Condensed Consolidated Balance Sheet at December 30, 2011.

\$600 Million Aggregate Principal Amount of 7.00% Senior Notes due November 2021 (the 2021 Notes). The interest on the 2021 Notes is payable semi-annually on January 1 and July 1 of each year. The issuer under the 2018 Notes is Seagate Technology HDD Cayman and the obligations under the 2021 Notes are fully and unconditionally guaranteed, on a senior unsecured basis, by certain of the Company's significant subsidiaries. The 2021 Notes are included in Long-term debt, less current portion in the Condensed Consolidated Balance Sheet at December 30, 2011.

At December 30, 2011, future principal payments on long-term debt were as follows (in millions):

Fiscal Year	
2012	\$
2013	
2014	385
2015	
2016	
Thereafter	2,550
	\$ 2,935

4. Income Taxes

The income tax benefit of \$5 million recorded for the three months ended December 30, 2011 included \$7 million of tax benefit from the reversal of a portion of the U.S. valuation allowance recorded in prior periods. The income tax provision of \$6 million recorded for the six months ended December 30, 2011 included approximately \$10 million of discrete tax benefits from the reversal of a portion of the U.S. valuation allowance recorded in prior periods and the release of tax reserves associated with the expiration of certain statutes of limitation.

The Company's income tax benefit and provision recorded for the three and six months ended December 30, 2011 differed from the provision for income taxes that would be derived by applying the Irish statutory rate of 25% to income before income taxes, primarily due to the net effect of (i) tax benefits related to non-U.S. earnings

Table of Contents

generated in jurisdictions that are subject to tax holidays or tax incentive programs and are considered indefinitely reinvested outside of Ireland, (ii) a decrease in valuation allowance for certain U.S. deferred tax assets, (iii) the release of tax reserves as a result of the expiration of statutes of limitation, and (iv) tax expense related to intercompany transactions.

The Company recorded an income tax provision of \$25 million and \$29 million for the three and six months ended December 31, 2010, respectively. The income tax provision for the three and six months ended December 31, 2010 included approximately \$1 million and \$11 million of discrete tax benefits, respectively, primarily from the release of tax reserves associated with the expiration of certain statutes of limitations. In addition, \$11 million of discrete income tax benefits from the loss recognized on the redemption of debt was offset by a corresponding increase in the valuation allowance for U.S. deferred tax assets.

The Company's provision for income taxes recorded for the three and six months ended December 31, 2010 differed from the provision for income taxes that would be derived by applying the Irish statutory rate of 25% to income before income taxes primarily due to the net effect of (i) tax benefits related to non-U.S. earnings generated in jurisdictions that are subject to tax holidays or tax incentive programs and are considered indefinitely reinvested outside of Ireland, (ii) an increase in valuation allowance for U.S. deferred tax assets, (iii) tax expense related to intercompany transactions, and (iv) the release of tax reserves as a result of the expiration of statutes of limitation.

On December 17, 2010, the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 (the 2010 Tax Relief Act) was enacted. The 2010 Tax Relief Act includes business incentives to invest in machinery and equipment, and retroactively reinstated the R&D tax credit through December 31, 2011 from December 31, 2009. These business incentives had no immediate impact on the Company's income tax provision due to the existing valuation allowances for certain U.S. deferred tax assets.

5. Acquisitions

On December 19, 2011, the Company completed the acquisition of Samsung Electronics Co., Ltd.'s (Samsung) hard disk drive (HDD) business pursuant to an Asset Purchase Agreement (APA) by which the Company acquired certain assets and liabilities of Samsung relating to the research and development, manufacture and sale of hard-disk drives. The transaction and related agreements are expected to improve the Company's position as a supplier of 2.5-inch products; position the Company to better address rapidly evolving opportunities in markets including, but not limited to, mobile computing, cloud computing and solid state storage; expand the Company's customer access in China and Southeast Asia; and accelerate time to market for new products.

The acquisition-date fair value of the consideration transferred totaled \$1,140 million, which consisted of \$571 million of cash, \$10 million of which was paid as a deposit upon signing the APA in the fourth quarter of fiscal year 2011, and 45.2 million ordinary shares with a fair value of \$569 million. The fair value of the ordinary shares issued was determined based on the closing market price of the Company's ordinary shares on the acquisition date, less a 16.5% discount for lack of marketability as the shares issued are subject to a restriction that limits their trade or transfer for approximately a one year period.

Table of Contents

The following table summarizes the preliminary estimated fair values of the assets acquired and liabilities assumed at the acquisition date (in millions):

Inventories	\$	141
Equipment		73
Intangible assets		580
Other assets		21
Total identifiable assets acquired		815
Warranty liability		(69)
Other liabilities		(43)
Total liabilities assumed		(112)
Net identifiable assets acquired		703
Goodwill		437
Net assets acquired	\$	1,140

The amount noted above for warranty is provisional, being an estimate calculated on the basis of projected product failure rates and timing of product returns during the warranty period. Seagate assumed product warranty obligations from Samsung on products sold prior to the acquisition. These products are warranted for up to three years from the original shipment date. The estimate of the warranty liability is subject to a significant degree of subjectivity since the Company does not have experience with Samsung products. If actual return rates differ materially from the Company's estimate, or if there is an epidemic failure of drives for which Seagate assumed warranty obligations, the fair value of the warranty liability may need to be reestimated during the measurement period, which may be up to one year following the acquisition date.

The Company received a patent portfolio that may have value apart from being an enabling technology that is included within the fair value of Intangible assets - Existing technology. However, the Company has not received all information regarding these patents that is necessary for the completion of a review to determine the extent of encumbrances and the scope of their application. Therefore, provisionally, no separately identifiable value has been recognized for the patent portfolio.

As part of the acquisition, the Company assumed certain vendor-related and other obligations and contingent liabilities. Due to the nature of these obligations and contingent liabilities, the Company has not received sufficient information needed to determine the fair value of these obligations.

The following table shows the fair value of the separately identifiable intangible assets at the time of acquisition and the period over which each intangible asset will be amortized:

(Dollars in millions)	Fair Value	Weighted-Average Amortization Period
Existing technology	\$ 137	2.0 years
Customer relationships	399	5.8 years
Total amortizable intangible assets acquired	536	4.8 years
In-process research and development	44	

Edgar Filing: Seagate Technology plc - Form 10-Q

Total acquired identifiable intangible assets	\$	580
---	----	-----

The \$437 million of goodwill recognized is attributable primarily to the benefits the Company expects to derive from enhanced scale and efficiency to better serve its markets and expanded customer presence in China and Southeast Asia. Except for approximately \$4 million of goodwill relating to assembled workforce in Korea, none of the goodwill is expected to be deductible for income tax purposes. As of December 30, 2011, there were no changes in the recognized amounts of goodwill resulting from the acquisition of Samsung's HDD business.

The Company incurred \$17 million and \$29 million of expenses related to the acquisition of Samsung for the three and six months ended December 30, 2011, which are included within marketing and administrative expense on the Condensed Consolidated Statement of Operations.

Table of Contents

The amounts of revenue and earnings of the acquired assets of Samsung's HDD business included in the Company's Condensed Consolidated Statement of Operations from the acquisition date during the three and six months ended December 30, 2011 were as follows:

(Dollars in millions)	For the Three Months Ended		For the Six Months Ended	
Revenue	\$	36	\$	36
Net loss		(5)		(5)

The unaudited pro forma financial results presented below for the three and six months ended December 30, 2011 and December 31, 2010 include the effects of pro forma adjustments as if the acquisition date occurred as of the beginning of the prior fiscal year on July 3, 2010. The pro forma results combine the historical results of the Company for the three and six months periods ended December 30, 2011 and December 31, 2010, respectively, and the historical results of the acquired assets and liabilities of Samsung's HDD business, and include the effects of certain fair value adjustments and the elimination of certain activities excluded from the transaction. The pro forma financial information is presented for informational purposes only and is not necessarily indicative of the results of operations that would have been achieved if the acquisition had taken place at the beginning of the earliest period presented, nor does it intend to be a projection of future results.

(Dollars in millions)	For the Three Months Ended		For the Six Months Ended	
	December 30, 2011	December 31, 2010	December 30, 2011	December 31, 2010
Revenue	\$ 3,800	\$ 3,490	\$ 7,217	\$ 6,959
Net income	526	137	597	270

The pro forma results for the three and six months ended December 30, 2011 include adjustments of \$33 million and \$65 million, respectively, to reflect the additional depreciation and amortization that would have been charged assuming the fair value adjustments to property, plant and equipment and intangible assets had been applied on July 3, 2010. The pro forma results for the three and six months ended December 31, 2010, include adjustments of \$29 million and \$56 million, respectively, to reflect the additional depreciation and amortization that would have been charged assuming the fair value adjustments to property, plant and equipment and intangible assets had been applied on July 3, 2010.

6. Goodwill and Other Intangible Assets

The changes in the carrying amount of goodwill for the six months ended December 30, 2011 are as follows:

(Dollars in millions)	
Balance as of July 1, 2011	\$ 31
Goodwill acquired	437
Balance as of December 30, 2011	\$ 468

The carrying value of other intangible assets subject to amortization as of December 30, 2011 is set forth in the following table:

Edgar Filing: Seagate Technology plc - Form 10-Q

(Dollars in millions)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted Average Remaining Useful Life
Amortizable other intangible assets:				
Existing technology	\$ 137	\$ (2)	\$ 135	2.0 years
Customer relationships	399	(2)	397	5.7 years
Total amortizable other intangible assets	\$ 536	\$ (4)	\$ 532	4.8 years

Edgar Filing: Seagate Technology plc - Form 10-Q

Table of Contents

The carrying value of other intangible assets subject to amortization as of July 1, 2011 is set forth in the following table:

(Dollars in millions)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted Average Remaining Useful Life
Customer relationships	\$ 3	\$ (2)	\$ 1	0.5 year

The carrying value of In-process research and development was \$44 million and \$0 as of December 30, 2011 and July 1, 2011, respectively.

For the three and six months ended December 30, 2011, amortization expense of other intangible assets was \$5 million and \$5 million, respectively. For the three and six months ended December 31, 2010, amortization expense of other intangible assets was \$2 million and \$5 million, respectively. As of December 30, 2011, expected amortization expense for other intangible assets for each of the next five years and thereafter is as follows:

(Dollars in millions)

Remainder of 2012	\$ 69
2013	139
2014	103
2015	71
2016	64
Thereafter	86
	\$ 532

7. Derivative Financial Instruments

The Company is exposed to foreign currency exchange rate, interest rate, and to a lesser extent, equity price risks relating to its ongoing business operations. The Company enters into foreign currency forward exchange contracts to manage the foreign currency exchange rate risk on forecasted expenses denominated in foreign currencies and to mitigate the remeasurement risk of certain foreign currency denominated liabilities. The Company's accounting policies for these instruments are based on whether the instruments are classified as designated or non-designated hedging instruments. The Company records all derivatives in the Condensed Consolidated Balance Sheets at fair value. The changes in the fair values of the effective portions of designated cash flow hedges are recorded in Accumulated other comprehensive loss until the hedged item is recognized in earnings. Derivatives that are not designated as hedging instruments and the ineffective portions of cash flow hedges are adjusted to fair value through earnings. As of December 30, 2011 and July 1, 2011, the Company had a net unrealized loss and a net unrealized gain on cash flow hedges of approximately \$5 million and \$2 million, respectively.

The Company redesignates its cash flow hedges when the forecasted hedged transactions are realized or it is probable the forecasted hedged transactions will not occur in the initially identified time period. At such time, the associated gains and losses deferred in Accumulated other comprehensive loss are reclassified immediately into earnings and any subsequent changes in the fair value of such derivative instruments are immediately reflected in earnings. The Company did not recognize any material net gains or losses related to the loss of hedge designation on discontinued cash flow hedges during the three and six months ended December 30, 2011 and December 31, 2010. As of December 30, 2011, the Company's existing foreign currency forward exchange contracts mature within 12 months. The deferred amount currently recorded in Accumulated other comprehensive loss and expected to be recognized into earnings over the next 12 months is a net loss of \$5 million.

Table of Contents

The following tables show the total notional value of the Company's outstanding foreign currency forward exchange contracts as of December 30, 2011 and July 1, 2011:

(Dollars in millions)	As of December 30, 2011	
	Contracts Designated as Hedges	Contracts Not Designated as Hedges
Thai baht	\$	\$ 210

Total return swap	Operating expenses	6	14

\$	10	\$	34
----	----	----	----

(a) The amount of gain or (loss) recognized in income represents \$0 related to the ineffective portion of the hedging relations and \$1 million related to the amount excluded from the assessment of hedge effectiveness, for the three and six months ended December 31, 2010, respectively.

8. Fair Value

Measurement of Fair Value

Fair value is defined as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required to be recorded at fair value, the Company considers the principal or most advantageous market in which it would transact and it considers assumptions that market participants would use when pricing the asset or liability.

Fair Value Hierarchy

A fair value hierarchy is based on whether the market participant assumptions used in determining fair value are obtained from independent sources (observable inputs) or reflects the Company's own assumptions of market participant valuation (unobservable inputs). A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The three levels of inputs that may be used to measure fair value:

Level 1 Quoted prices in active markets that are unadjusted and accessible at the measurement date for identical, unrestricted assets or liabilities;

Edgar Filing: Seagate Technology plc - Form 10-Q

Table of Contents

Level 2 Quoted prices for identical assets and liabilities in markets that are inactive; quoted prices for similar assets and liabilities in active markets or financial instruments for which significant inputs are observable, either directly or indirectly; or

Level 3 Prices or valuations that require inputs that are both unobservable and significant to the fair value measurement.

The Company considers an active market to be one in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis, and views an inactive market as one in which there are few transactions for the asset or liability, the prices are not current, or price quotations vary substantially either over time or among market makers. Where appropriate the Company's or the counterparty's non-performance risk is considered in determining the fair values of liabilities and assets, respectively.

Items Measured at Fair Value on a Recurring Basis

The following table presents the Company's assets and liabilities that are measured at fair value on a recurring basis, excluding accrued interest components, as of December 30, 2011:

(Dollars in millions)	Fair Value Measurements at Reporting Date Using				Total Balance
	Quoted Prices in Active Markets for Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)		
Assets:

Accrued expenses	\$		\$	(6)	\$	(6)
Total liabilities	\$		\$	(6)	\$	(6)

Level 1 assets consist of money market funds and mutual funds for which quoted prices are available in an active market.

Edgar Filing: Seagate Technology plc - Form 10-Q

The Company classifies items in Level 2 if the financial asset or liability is valued using observable inputs. The Company uses observable inputs including quoted prices in active markets for similar assets or liabilities. Level 2 assets include: agency bonds, corporate bonds, commercial paper, municipal bonds, certificates of deposit, international government securities, asset backed securities, mortgage backed securities and U.S. Treasuries. These debt investments are priced using observable inputs and valuation models which vary by asset class. The Company uses a pricing service to assist in determining the fair values of all of its cash equivalents and short-term investments. For the cash equivalents and short-term investments in the Company's portfolio, multiple pricing sources are generally available. The pricing service uses inputs from multiple industry standard data providers or other third party sources and various methodologies, such as weighting and models, to determine the appropriate price at the measurement date. The Company corroborates the prices obtained from the pricing service against other independent sources and, as of December 30, 2011, has not found it necessary to make any adjustments to the prices obtained. The Company's derivative financial instruments are also classified within Level 2. The Company's derivative financial instruments consist of foreign currency forward exchange contracts. The Company recognizes derivative financial instruments in its condensed consolidated financial statements at fair value. The Company determines the fair value of these instruments by considering the estimated amount it would pay or receive to terminate these agreements at the reporting date.

Table of Contents

The Company's Level 3 assets consist of auction rate securities with a par value of approximately \$17 million, all of which are collateralized by student loans guaranteed by the Federal Family Education Loan Program. Beginning in fiscal year 2008, these securities failed to settle at auction and have continued to fail through December 30, 2011. Since there is no active market for these securities, the Company valued them using a discounted cash flow model. The valuation model is based on the income approach and reflects both observable and significant unobservable inputs.

The table below presents a reconciliation of assets measured at fair value on a recurring basis, excluding accrued interest components, using significant unobservable inputs (Level 3) for the six months ended December 30, 2011:

(Dollars in millions)	Auction Rate Securities	
Balance at July 1, 2011	\$	16
Total net gains (losses) (realized and unrealized):		
Realized gains (losses)(1)		
Unrealized gains (losses)(2)		
Sales and Settlements		(1)
Balance at December 30, 2011	\$	15

(1) Realized gains (losses) on auction rate securities are recorded in Other, net in the Condensed Consolidated Statements of Operations.

(2) Unrealized gains (losses) on auction rate securities are recorded as a separate component of Other comprehensive income (loss) in Accumulated other comprehensive income (loss), which is a component of Shareholders' Equity.

Items Measured at Fair Value on a Non-Recurring Basis

(Dollars in millions)	Fair Value Measurements Using Significant Other				Total Balance
	Quoted Prices in Active Markets for Identical Instruments (Level 1)	Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)		
Assets:					
Equity investment	\$	\$	\$	5	\$ 5

The Company enters into certain strategic investments for the promotion of business and strategic objectives. Strategic investments are included in Other assets, net in the Condensed Consolidated Balance Sheets, are recorded at cost and are periodically analyzed to determine whether or not there are indicators of impairment. The carrying value of the Company's strategic investments at December 30, 2011 and July 1, 2011 totaled \$26 million and \$27 million, respectively.

There were no impairment charges recognized for the three months ended December 30, 2011. During the first quarter of fiscal year 2012, the Company determined that an equity investment accounted for under the cost method was other-than-temporarily impaired, and recognized a charge of \$7 million, in order to write down the carrying amount of the investment to its estimated fair value. The amount was recorded in Other,

Edgar Filing: Seagate Technology plc - Form 10-Q

net in the Condensed Consolidated Statements of Operations. There were no impairment charges recognized for the three and six months ended December 31, 2010. Since there was no active market for the equity securities of the investee, the Company estimated fair value of the investee by using the market approach which was then used to estimate the Company's applicable portion of the fair value of its underlying intellectual property assets at the end of the second quarter of fiscal 2012.

Table of Contents*Other Fair Value Disclosures*

The Company's debt is carried at amortized cost. The fair value of the Company's debt is derived from quoted prices in active markets. The following table presents the fair value and amortized cost of the Company's debt and capital lease in order of priority:

(Dollars in millions)	December 30, 2011		July 1, 2011	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value

Long-term debt, less current portion	\$ 2,925	\$ 3,137	\$ (560)	\$ (562)
			2,952	3,097

9. Shareholders' Equity*Share Capital*

The Company's authorized share capital is \$13,500 and consists of 1,250,000,000 ordinary shares, par value \$0.00001, of which 464,862,182 shares were outstanding as of December 30, 2011, and 100,000,000 preferred shares, par value \$0.00001, of which none were issued or outstanding as of December 30, 2011.

Ordinary shares Holders of ordinary shares are entitled to receive dividends when and as declared by the Company's board of directors (the Board of Directors). Upon any liquidation, dissolution, or winding up of the Company, after required payments are made to holders of preferred shares, any remaining assets of the Company will be distributed ratably to holders of the preferred and ordinary shares. Holders of shares are entitled to one vote per share on all matters upon which the ordinary shares are entitled to vote, including the election of directors.

Preferred shares The Company may issue preferred shares in one or more series, up to the authorized amount, without shareholder approval. The Board of Directors is authorized to establish from time to time the number of shares to be included in each series, and to fix the rights, preferences and privileges of the shares of each wholly unissued series and any of its qualifications, limitations or restrictions. The Board of Directors can also increase or decrease the number of shares of a series, but not below the number of shares of that series then outstanding, without any further vote or action by the shareholders.

Edgar Filing: Seagate Technology plc - Form 10-Q

The Board of Directors may authorize the issuance of preferred shares with voting or conversion rights that could harm the voting power or other rights of the holders of the ordinary shares. The issuance of preferred shares, while providing flexibility in connection with possible acquisitions and other corporate purposes, could, among other things, have the effect of delaying, deferring or preventing a change in control of the Company and might harm the market price of its ordinary shares and the voting and other rights of the holders of ordinary shares. As of December 30, 2011, there were no preferred shares outstanding.

Issuance of Ordinary Shares

During the three months ended December 30, 2011, the Company issued approximately 3.7 million of its ordinary shares from the exercise of stock options, release of restricted units and performance shares and approximately 45.2 million of its ordinary shares in connection with the Samsung acquisition.

Repurchases of Equity Securities

On January 27, 2010, our Board of Directors authorized an Anti-Dilution Share Repurchase Program. The Company's share repurchase program authorizes the Company to repurchase its ordinary shares to offset increases in diluted shares, such as those caused by employee stock plans, used in the determination of diluted net income per share. The timing and number of shares to be repurchased by the Company will be dependent on general business and market conditions, cash flows generated by future operations, the price of its ordinary shares, cash requirements for other investing and financing activities, and maintaining compliance with its debt covenants. Additionally, there is no minimum or maximum number of shares to be repurchased under the programs and the authority for the share repurchase program will continue until terminated by the Company's Board of Directors.

Table of Contents

On November 29, 2010, our Board of Directors authorized repurchases up to an additional \$2 billion of our outstanding ordinary shares.

The following tables set forth information with respect to repurchases of the Company's shares made during the current fiscal year for each of the Company's repurchase programs:

January 2010 Anti-Dilution Share Repurchase Program

(In millions)	Number of Shares Repurchased	Dollar Value of Shares Repurchased
Cumulative repurchased through July 1, 2011	53.1	\$ 889
Repurchased in the first fiscal quarter 2012		
Repurchased in the second fiscal quarter 2012		
Cumulative repurchased through December 30, 2011	53.1	889

November 2010 Share Repurchase Program

(In millions)	Number of Shares Repurchased	Dollar Value of Shares Repurchased
Cumulative repurchased through July 1, 2011	36.2	\$ 517
Repurchased in the first fiscal quarter 2012	9.1	128
Repurchased in the second fiscal quarter 2012	3.9	63
Cumulative repurchased through December 30, 2011	49.2	\$ 708

10. Compensation

The Company recorded approximately \$14 million and \$26 million of stock-based compensation during the three and six months ended December 30, 2011, respectively. The Company recorded approximately \$13 million and \$26 million of stock-based compensation during the three and six months ended December 31, 2010, respectively.

Seagate Technology plc 2012 Equity Incentive Plan (the "EIP"). On October 26, 2011, the shareholders approved the EIP and authorized the issuance of up to a total of 27,000,000 ordinary shares, par value \$0.0001 per share, plus any shares remaining available for grant under the SCP as of the effective date of the EIP (which was equal to 11,041,148 ordinary shares as of the effective date of the EIP and which will increase by such additional number of shares as will be returned to the share reserve in respect of awards previously granted under the SCP) (together, the

Share Reserve). Any shares that are subject to options or share appreciation rights granted under the EIP will be counted against the Share Reserve as one share for every one share granted, and any shares that are subject to restricted share bonus awards, restricted share units, performance share bonus awards or performance share units (collectively, Full-Value Share Awards) will generally be counted against the Share Reserve as two and one-tenth shares for every one share granted. As of December 30, 2011, there were approximately 37.8 million ordinary shares available for issuance under the EIP.

Shares that are subject to Full-Value Share Awards will generally vest over a period of three to four years. Options will generally vest as follows: 25% of the options will vest on the first anniversary of the vesting commencement date and the remaining 75% will vest ratably each month thereafter over the next 36 months. Options granted under the EIP have an exercise price equal to the closing price of the Company's ordinary shares on date of grant.

Seagate Technology plc 2004 Share Compensation Plan (the "SCP"). On November 4, 2011, the Company filed Post-Effective Amendment No. 1 to deregister 11,041,148 ordinary shares that remained available for grant as of October 27, 2011 under the SCP and no shares have been granted from the SCP subsequent to that date.

Table of Contents

11. Guarantees

Indemnifications to Officers and Directors

On May 4, 2009, the Company entered into a new form of indemnification agreement (the *Revised Indemnification Agreement*) with its officers and directors of the Company and its subsidiaries (each, an *Indemnitee*). The *Revised Indemnification Agreement* provides indemnification in addition to any of *Indemnitee*'s indemnification rights under the Company's Articles of Association, applicable law or otherwise, and indemnifies an *Indemnitee* for certain expenses (including attorneys' fees), judgments, fines and settlement amounts actually and reasonably incurred by him or her in any action or proceeding, including any action by or in the right of the Company or any of its subsidiaries, arising out of his or her service as a director, officer, employee or agent of the Company or any of its subsidiaries or of any other entity to which he or she provides services at the Company's request. However, an *Indemnitee* shall not be indemnified under the *Revised Indemnification Agreement* for (i) any fraud or dishonesty in the performance of *Indemnitee*'s duty to the Company or the applicable subsidiary of the Company or (ii) *Indemnitee*'s conscious, intentional or willful failure to act honestly, lawfully and in good faith with a view to the best interests of the Company or the applicable subsidiary of the Company. In addition, the *Revised Indemnification Agreement* provides that the Company will advance expenses incurred by an *Indemnitee* in connection with enforcement of the *Revised Indemnification Agreement* or with the investigation, settlement or appeal of any action or proceeding against him or her as to which he or she could be indemnified. A subsidiary of the Company has also entered into a deed of indemnity on similar terms to the *Revised Indemnification Agreement* with certain of its officers and directors. The nature of the indemnification obligations prevents the Company from making a reasonable estimate of the maximum potential amount it could be required to pay on behalf of its officers and directors. Historically, the Company has not made any significant indemnification payments under such agreements and no amount has been accrued in the accompanying condensed consolidated financial statements with respect to these indemnification obligations.

Intellectual Property Indemnification Obligations

The Company has entered into agreements with customers and suppliers that include limited intellectual property indemnification obligations that are customary in the industry. These guarantees generally require the Company to compensate the other party for certain damages and costs incurred as a result of third party intellectual property claims arising from these transactions. The nature of the intellectual property indemnification obligations prevents the Company from making a reasonable estimate of the maximum potential amount it could be required to pay to its customers and suppliers. Historically, the Company has not made any significant indemnification payments under such agreements and no amount has been accrued in the accompanying consolidated financial statements with respect to these indemnification obligations.

Product Warranty

The Company estimates probable product warranty costs at the time revenue is recognized. The Company generally warrants its products for a period of one to five years. The Company uses estimated repair or replacement costs and uses statistical modeling to estimate product return rates in order to determine its warranty obligation. In addition, estimated settlements for customer compensatory claims relating to product quality issues, if any, are accrued as warranty expense. Changes in the Company's product warranty liability during the three months ended December 30, 2011 and December 31, 2010 were as follows:

Edgar Filing: Seagate Technology plc - Form 10-Q

(Dollars in millions)	For the Three Months Ended		For the Six Months Ended	
	December 30, 2011	December 31, 2010	December 30, 2011	December 31, 2010
Balance, beginning of period	\$ 334	\$ 353	\$ 348	\$ 372
Warranties issued	42	53	85	102
Repairs and replacements	(67)	(51)	(125)	(99)
Changes in liability for pre-existing warranties, including expirations	23	12	24	(8)
Warranty liability assumed from Samsung HDD business	69		69	
Balance, end of period	\$ 401	\$ 367	\$ 401	\$ 367

Table of Contents**12. Earnings Per Share**

Basic earnings per share is computed by dividing income available to shareholders by the weighted-average number of shares outstanding during the period. Diluted earnings per share is computed by dividing income available to shareholders by the weighted-average number of shares outstanding during the period and the number of additional shares that would have been outstanding if the potentially dilutive securities had been issued. Potentially dilutive securities include outstanding options, shares to be purchased under the ESPP, and unvested restricted stock units. The dilutive effect of potentially dilutive securities is reflected in diluted earnings per share by application of the treasury stock method. Under the treasury stock method, an increase in fair market value of the Company's share price can result in a greater dilutive effect from potentially dilutive securities.

The following table sets forth the computation of basic and diluted net income per share:

(Dollars in millions, except per share data)	For the Three Months Ended		For the Six Months Ended	
	December 30, 2011	December 31, 2010	December 30, 2011	December 31, 2010
Numerator:				
Net income	\$ 563	\$ 150	\$ 703	\$ 299
Number of shares used in per share calculations:				
Total shares for purpose of calculating basic net income per share	427	469	424	470
Weighted-average effect of dilutive securities:				
Employee equity award plans	12	17	12	17
Dilutive potential shares:	12	17	12	17
Total shares for purpose of calculating diluted net income per share	439	486	436	487
Net income per share:				
Basic net income per share	\$ 1.32	\$ 0.32	\$ 1.66	\$ 0.64
Diluted net income per share	\$ 1.28	\$ 0.31	\$ 1.61	\$ 0.61

The following potential shares were excluded from the computation of diluted net income per share, as their effect would have been anti-dilutive:

(In millions)	For the Three Months Ended		For the Six Months Ended	
	December 30, 2011	December 31, 2010	December 30, 2011	December 31, 2010
Employee equity award plans	9	14	13	19

13. Legal, Environmental and Other Contingencies

Edgar Filing: Seagate Technology plc - Form 10-Q

The Company assesses the probability of an unfavorable outcome of all its material litigation, claims, or assessments to determine whether a liability had been incurred and whether it is probable that one or more future events will occur confirming the fact of the loss. In the event that an unfavorable outcome is determined to be probable and the amount of the loss can be reasonably estimated, the Company establishes an accrual for the litigation, claim or assessment. In addition, in the event an unfavorable outcome is determined to be less than probable, but reasonably possible, the Company will disclose an estimate of the possible loss or range of such loss; however, when a reasonable estimate cannot be made, the Company will provide disclosure to that effect. Litigation is inherently uncertain and may result in adverse rulings or decisions. Additionally, the Company may enter into settlements or be subject to judgments that may, individually or in the aggregate, have a material adverse effect on its results of operations. Accordingly, actual results could differ materially.

Intellectual Property Litigation

Convolve, Inc. (Convolve) and Massachusetts Institute of Technology (MIT) v. Seagate Technology LLC, et al. On July 13, 2000, Convolve and MIT filed suit against Compaq Computer Corporation and Seagate Technology LLC in the U.S. District Court for the Southern District of New York, alleging infringement of U.S. Patent Nos. 4,916,635, *Shaping Command Inputs to Minimize Unwanted Dynamics* (the 635 patent) and U.S. Patent No. 5,638,267, *Method and Apparatus for Minimizing Unwanted Dynamics in a Physical System* (the 267

Table of Contents

patent), misappropriation of trade secrets, breach of contract, tortious interference with contract and fraud relating to Convolve and MIT's Input Shaping® and Convolve's Quick and Quiet technology. The plaintiffs claimed their technology is incorporated in the Company's sound barrier technology, which was publicly announced on June 6, 2000. The complaint seeks injunctive relief, \$800 million in compensatory damages and unspecified punitive damages, including for willful infringement and willful and malicious misappropriation. On November 6, 2001, the U.S. Patent and Trademark Office (USPTO) issued to Convolve US Patent No. 6,314,473, System for Removing Selected Unwanted Frequencies in Accordance with Altered Settings in a User Interface of a Data Storage Device, (the '473 patent). Convolve filed an amended complaint on January 16, 2002, alleging defendants infringe this patent. The '635 patent expired on September 12, 2008. The court ruled in 2010 that the '267 patent was out of the case.

On August 16, 2011, the court granted in part and denied in part the Company's motion for summary judgment. The court granted summary judgment in favor of the Company on all patent infringement claims and on 11 of the 15 remaining alleged trade secrets at issue. The court also denied Convolve's request for enhanced damages as moot and dismissed Convolve's request for injunctive relief. Following this ruling, the parties entered into a stipulation to conditionally dismiss without prejudice the remaining claims in order to facilitate an appeal of the August 16, 2011 order by Convolve to the U.S. Court of Appeals for the Federal Circuit. Pursuant to this stipulation, the court entered a final judgment on October 4, 2011. Convolve filed its notice of appeal to the U.S. Court of Appeals for the Federal Circuit on November 3, 2011. In view of the court's August 16, 2011 ruling and the uncertainty regarding the amount of damages, if any, that could be awarded Convolve in this matter, the Company does not believe that it is currently possible to determine a reasonable estimate of the possible range of loss related to this matter.

Siemens, AG v. Seagate Technology (Ireland) On December 2, 2008, Siemens served Seagate Technology (Ireland), an indirect wholly-owned subsidiary of Seagate Technology, with a writ of summons alleging infringement of European Patent (UK) No. 0 674 769 (the EU '769 patent), which is the European counterpart to U.S. Patent No. 5,686,838 upon which Siemens had sued Seagate Technology in the U.S. The suit was filed in the High Court of Justice in Northern Ireland, Chancery Division. Siemens alleges that giant magnetoresistive (GMR), tunnel magnetoresistive (TMR), and tunnel giant magnetoresistive (TGMR) products designed and manufactured by Seagate Technology (Ireland) infringe the EU '769 patent. On January 30, 2012, the parties entered into a confidential settlement to resolve this matter.

Alexander Shukh v. Seagate Technology Former Seagate engineer Alexander Shukh filed a complaint and an amended complaint against the Company in Minnesota federal court, alleging, among other things, employment discrimination based on his Belarusian national origin and wrongful failure to name him as an inventor on several patents and patent applications. Mr. Shukh's employment was terminated as part of a company-wide reduction in force in fiscal year 2009. He seeks damages in excess of \$75 million. The Company believes the claims are without merit and intends to vigorously defend this case. Trial is scheduled to begin April 1, 2013. In view of the uncertainty regarding the amount of damages, if any, that could be awarded in this matter, the Company does not believe that it is currently possible to determine a reasonable estimate of the possible range of loss related to this matter.

Siemens GmbH v. Seagate Technology (Germany) On March 26, 2010, Siemens commenced proceedings against Seagate Technology GmbH, the Netherlands branch office of Seagate Technology International, and Seagate Technology LLC in the Dusseldorf District Court in Germany. The complaint alleges infringement of European Patent Number 0 674 769 (the "EU '769 Patent"), which corresponds to the patent in suit in the U.S. and Northern Ireland Siemens' litigations. Siemens seeks a declaration that the EU '769 Patent is infringed by GMR and TMR products, removal of all infringing inventory, damages in an unstated amount, and costs. On January 30, 2012, the parties entered into a confidential settlement to resolve this matter.

Table of Contents

Rembrandt Data Storage, LP v. Seagate Technology LLC On November 10, 2010, Rembrandt Data Storage, LP filed suit against Seagate Technology LLC in the U.S. District Court for the Western District of Wisconsin alleging infringement of U.S. Patent No. 5,995,342 C1, Thin Film Heads Having Solenoid Coils, and U.S. Patent No. 6,195,232, Low-Noise Toroidal Thin Film Head With Solenoidal Coil. The complaint seeks unspecified compensatory damages, enhanced damages, injunctive relief, and attorneys' fees and costs. The Company intends to vigorously defend this case. Trial is scheduled to begin June 4, 2012. Rembrandt has not stated the amount of damages it would seek at trial. In view of the uncertainty regarding the amount of damages, if any, that could be established at trial and in light of Rembrandt not having stated an amount of damages it may seek in this matter, the Company does not believe that it is currently possible to determine a reasonable estimate of the possible loss or possible range of loss related to this matter.

Rambus, Inc. ITC Investigation re Certain Semiconductor Chips and Products Containing the Same On December 1, 2010, Rambus, Inc. filed a complaint with the International Trade Commission seeking an investigation pursuant to Section 337 of the Tariff Act of 1930, as amended. The complaint names Seagate Technology LLC and numerous other defendants, including LSI, Inc. and ST Microelectronics, Inc., alleging that Seagate products incorporate semiconductor products made by LSI and STMicroelectronics that infringe various patents owned by Rambus. The ITC initiated an investigation on December 29, 2010. Rambus seeks an order to exclude entry of infringing products into the U.S. and a cease and desist order. The Company is responding to the investigation. The hearing before the Administrative Law Judge was held on October 12-20, 2011. The Administrative Law Judge's initial determination is expected in March 2012. In light of the current status of this matter and the nature of the relief sought, the Company does not believe that it is currently possible to determine a reasonable estimate of the possible loss or range of loss, or other possible adverse result, if any, that may be incurred with respect to this matter.

Environmental Matters

The Company's operations are subject to U.S. and foreign laws and regulations relating to the protection of the environment, including those governing discharges of pollutants into the air and water, the management and disposal of hazardous substances and wastes and the cleanup of contaminated sites. Some of the Company's operations require environmental permits and controls to prevent and reduce air and water pollution, and these permits are subject to modification, renewal and revocation by issuing authorities.

The Company has established environmental management systems and continually updates its environmental policies and standard operating procedures for its operations worldwide. The Company believes that its operations are in material compliance with applicable environmental laws, regulations and permits. The Company budgets for operating and capital costs on an ongoing basis to comply with environmental laws. If additional or more stringent requirements are imposed on the Company in the future, it could incur additional operating costs and capital expenditures.

Some environmental laws, such as the Comprehensive Environmental Response Compensation and Liability Act of 1980 (as amended, the Superfund law) and its state equivalents, can impose liability for the cost of cleanup of contaminated sites upon any of the current or former site owners or operators or upon parties who sent waste to these sites, regardless of whether the owner or operator owned the site at the time of the release of hazardous substances or the lawfulness of the original disposal activity. The Company has been identified as a potentially responsible party at several sites. At each of these sites, the Company has an assigned portion of the financial liability based on the type and amount of hazardous substances disposed of by each party at the site and the number of financially viable parties. The Company has fulfilled its responsibilities at some of these sites and remains involved in only a few at this time.

While the Company's ultimate costs in connection with these sites is difficult to predict with complete accuracy, based on its current estimates of cleanup costs and its expected allocation of these costs, the Company does not expect costs in connection with these sites to be material.

The Company may be subject to various state, federal and international laws and regulations governing the environment, including those restricting the presence of certain substances in electronic products. For example, the European Union (EU) enacted the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment, which prohibits the use of certain substances, including lead, in certain products, including disk drives, put on the market after July 1, 2006. Similar legislation has been or may be enacted in other jurisdictions, including in the United States, Canada, Mexico, Taiwan, China, Japan and others. The European Union REACH Directive (Registration, Evaluation, Authorization, and Restriction of Chemicals, EC 1907/2006) also restricts substances of very high concern (SVHCs) in products. If the Company or its suppliers fails to comply

Table of Contents

with the substance restrictions, recycle requirements or other environmental requirements as they are enacted worldwide, it could have a materially adverse effect on the Company's business.

Other Matters

The Company is involved in a number of other judicial and administrative proceedings incidental to its business, and the Company may be involved in various legal proceedings arising in the normal course of its business in the future. Although occasional adverse decisions or settlements may occur, the Company believes that the final disposition of such matters will not have a material adverse effect on its financial position or results of operations.

14. Subsequent Events

Dividends

On January 25, 2012, the Board of Directors declared a quarterly cash dividend of \$0.25 per share. The dividend is payable on March 1, 2012 to shareholders of record as of the close of business on February 15, 2012.

Share Repurchases

On January 25, 2012, the Board of Directors authorized the Company to repurchase an additional \$1 billion of its outstanding ordinary shares.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is a discussion of the financial condition and results of operations for our fiscal quarters ended December 30, 2011, September 30, 2011 and December 31, 2010 referred to herein as the December 2011 quarter, the September 2011 quarter and the December 2010 quarter, respectively. Unless the context indicates otherwise, as used herein, the terms we, us, Seagate, the Company and our refer to Seagate Technology plc, an Irish public limited company, and its subsidiaries. References to \$ are to United States dollars.

You should read this discussion in conjunction with financial information and related notes included elsewhere in this report. We operate and report financial results on a fiscal year of 52 or 53 weeks ending on the Friday closest to June 30. The December 2011, June 2011, and December 2010 quarters were all 13 weeks. Except as noted, references to any fiscal year mean the twelve-month period ending on the Friday closest to June 30 of that year.

Some of the statements and assumptions included in this Quarterly Report on Form 10-Q are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 or Section 21E of the Securities Exchange Act of 1934, each as amended, including, in particular, statements about our plans, strategies and prospects and estimates of industry growth for the fiscal quarter ending December 30, 2011 (the December 2011 quarter) and beyond. These statements identify prospective information and include words such as expects, plans, anticipates, believes, estimates, predicts, projects and similar expressions. These forward-looking statements are based on information available to us as of the date of this report. Current expectations, forecasts and assumptions involve a number of risks, uncertainties and other factors that could cause actual results to differ materially from those anticipated by these forward-looking statements. Such risks, uncertainties and other factors may be beyond our control. In particular, the uncertainty in global economic conditions continues to pose a risk to our operating and financial performance as consumers and businesses may defer purchases in response to tighter credit and negative financial news. Such risks and uncertainties also include, but are not limited to, the impact of the variable demand and the adverse pricing environment for disk drives, particularly in view of current business and economic conditions; dependence on our ability to successfully qualify, manufacture and sell our disk drive products in increasing volumes on a cost-effective basis and with acceptable quality, particularly the new disk drive products with lower cost structures; the impact of competitive product announcements and possible excess industry supply with respect to particular disk drive products; our ability to achieve projected cost savings in connection with restructuring plans; the risk that we will incur significant incremental costs in connection with the implementation of our recently executed transactions with Samsung or that we will not achieve the benefits expected from such transactions (see Transaction with Samsung below); and significant disruption to the industry supply chain due to the severe flooding throughout parts of Thailand (see Severe Flooding in Thailand below) and the industry's ability to recover from such disruption, which may pose a risk to the Company's operating and financial condition. We also encourage you to read our Annual Report on Form 10-K for the year ended July 1, 2011, which contains information concerning risks, uncertainties and other factors that could cause results to differ materially from those projected in the forward-looking statements and this Form 10-Q. These forward-looking statements should not be relied upon as representing our views as of any subsequent date and we undertake no obligation to update forward-looking statements to reflect events or circumstances after the date they were made.

Our Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is provided in addition to the accompanying condensed consolidated financial statements and notes to assist readers in understanding our results of operations, financial condition, and cash flows. Our MD&A is organized as follows:

- *Our Company.* Overview of our business.
- *Overview of the December 2011 quarter.* The December 2011 quarter summary and trends.
- *Results of Operations.* An analysis of our financial results comparing the December 2011 quarter to the September 2011 quarter and the December 2010 quarter.

Edgar Filing: Seagate Technology plc - Form 10-Q

- *Liquidity and Capital Resources.* An analysis of changes in our balance sheets and cash flows, and discussion of our financial condition including the credit quality of our investment portfolio and potential sources of liquidity.
- *Critical Accounting Policies.* Accounting policies and estimates that we believe are important to understanding the assumptions and judgments incorporated in our reported financial results.

Table of Contents

Our Company

We are the world's leading provider of hard disk drives based on revenue. We design, manufacture, market and sell hard disk drives. Hard disk drives, commonly referred to as disk drives, hard drives or HDDs, are devices that store digitally encoded data on rapidly rotating disks with magnetic surfaces. The performance attributes of disk drives, including their cost effectiveness and high storage capacities, have resulted in disk drives being used as the primary medium for storing electronic data.

We produce a broad range of disk drive products addressing enterprise applications, where our products are designed for enterprise servers, mainframes and workstations; client compute applications, where our products are designed for desktop and notebook computers; and client non-compute applications, where our products are designed for a wide variety of end user devices such as digital video recorders (DVRs), personal data backup systems, portable external storage systems and digital media systems. In addition to manufacturing and selling disk drives, we provide data storage services for small- to medium-sized businesses, including online backup, data protection and recovery solutions.

Overview of the December 2011 Quarter

Our operating performance during the December 2011 quarter was significantly impacted by the disruptions to our industry's supply chain due to the severe flooding throughout many parts of Thailand in October of 2011. Given the resulting significantly constrained supply of HDDs, the sales pricing environment was favorable and resulted in an overall increase in our average selling price (ASP) to \$67 in the December 2011 quarter, up from \$55 in the September 2011 quarter. We shipped 46.9 million units during the quarter, generating \$3.2 billion in revenue and \$719 million in operating cash flow. Additionally, we completed our acquisition of the hard disk drive (HDD) business of Samsung Electronics Co., Ltd (Samsung).

Severe Flooding in Thailand

In early October 2011, dike breakages north of Bangkok, Thailand resulted in severe flooding. Floodwaters inundated many manufacturing industrial parks that contained a number of the factories supporting the HDD industry's supply chain. The HDD industry had concentrated a large portion of its supply chain participants within these industrial parks in an effort to reduce cost and improve logistics. As a result, the inundation of floodwaters into these industrial parks had caused the closure or suspension of production within the HDD supply chain.

Even though the HDD supply chain was significantly impacted by the severe flooding, our component and drive assembly factories in Thailand were not directly affected by the flood, and continue to be fully operational. However, seven of our ten largest component suppliers had some of their factories inundated which lead to shortages of some critical components. As such, in the December 2011 quarter, we shipped 46.9 million units, which is less than our installed manufacturing capacity, and we believe total shipments in the industry were 119 million units, which was significantly less than unconstrained demand.

Industry Supply Balance

From time to time the disk drive industry has experienced periods of imbalance between supply and demand. To the extent that the disk drive industry builds capacity based on expectations of demand that do not materialize, price erosion may become more pronounced. Conversely, during periods where demand exceeds supply, price erosion is generally muted. During the December 2011 quarter, due to the severe flooding in Thailand, we believe demand far exceeded supply resulting in price increases across many of our products.

As a result of structural damage to the supply chain, there is a substantial and growing shortfall in unmet exabyte demand. We believe that pre-flood exabyte demand was growing at 40% per year, while areal density growth and disk capacity was increasing at less than 25% per year. We continue to expect that calendar year 2012 unit demand will exceed supply and the exabyte shortage will be more pronounced than the unit shortage.

Transaction with Samsung

On December 19, 2011, we completed the acquisition of Samsung's HDD business pursuant to an asset purchase agreement ("APA") entered into on April 19, 2011, by which the Company acquired certain assets and

Table of Contents

liabilities of Samsung relating to the research and development, manufacture and sale of HDD s. The transaction and related agreements are expected to improve our position as a supplier of 2.5-inch products; position us to better address rapidly evolving opportunities in markets including, but not limited to, mobile computing, cloud computing and solid state storage; expand our customer access in China and Southeast Asia; and accelerate time to market for new products.

The December 19, 2011 acquisition-date fair value of the consideration transferred to Samsung totaled \$1.1 billion, which consisted of 45.2 million of our ordinary shares and the remaining balance settled in cash.

Upon the closing of the transactions contemplated by the APA, the Shareholder Agreement entered into with Samsung, as previously described in our Current Report on Form 8-K filed on April 19, 2011, and filed as an exhibit to our Annual Report on Form 10-K for the fiscal year ended July 1, 2011 filed on August 17, 2011, became effective. Amongst other things, the Shareholder Agreement provides that Samsung shall have the right to appoint one representative to our Board of Directors so long as Samsung and its affiliates continue to hold at least 7% of our outstanding ordinary shares.

In addition, we agreed, subject to certain exceptions set forth in the Shareholder Agreement, to file a registration statement on or prior to one year following the date of acquisition in order to register the ordinary shares issued to Samsung.

The acquisition is expected to increase our manufacturing capacity and product development expense going forward. We also expect to incur additional incremental integration costs relating to the acquisition.

Results of Operations

We list in the table below the Condensed Consolidated Statements of Operations by dollars and as a percentage of revenue for the periods indicated.

(Dollars in millions)	For the Three Months Ended			For the Six Months Ended	
	December 30, 2011	September 30, 2011	December 31, 2010	December 30, 2011	December 31, 2010

Revenue

The following table summarizes information regarding revenue, volume shipments, average selling prices (ASPs) and revenues by channel and geography:

(In millions, except percentages and ASPs)	For the Three Months Ended			For the Six Months Ended	
	December 30, 2011	September 30, 2011	December 31, 2010	December 30, 2011	December 31, 2010
Net Revenue	\$ 3,195	\$ 2,811	\$ 2,719	\$ 6,007	\$ 5,417
Unit Shipments:					
Enterprise	6.4	6.9	7.1	13.3	14.0
Client Compute	32.7	33.3	31.5	66.0	64.8
Client Non-Compute	7.8	10.5	10.3	18.3	19.3
Total Units Shipped	46.9	50.7	48.9	97.6	98.1
Industry Units Shipped	119.0	175.8	167.3	294.8	331.4
ASPs (per unit)	67	55	55	61	54
Revenues by Channel (%)					
OEMs	72%	67%	68%	70%	69%
Distributors	20%	23%	21%	21%	22%
Retailers	8%	10%	11%	9%	9%
Revenues by Geography (%)					
Americas	26%	28%	29%	27%	29%
EMEA	19%	21%	21%	20%	21%
Asia Pacific	55%	51%	50%	53%	50%

We shipped 46.9 million units and generated revenue of \$3.2 billion in the December 2011 quarter. Revenue increased over the September 2011 quarter and the December 2010 quarter due to improved pricing for our products as a result of the substantial unmet demand resulting from the impact of the severe flooding in Thailand.

Edgar Filing: Seagate Technology plc - Form 10-Q

We maintain various sales programs such as point-of-sale rebates, sales price adjustments and price protection, aimed at increasing customer demand. During the December 2011 quarter, sales programs were approximately 2.4% of gross revenue, significantly lower than our historical range of 6%-12% as a result of the substantial unmet demand. So long as there remains significant unmet demand, we will continue to see lower sales programs as compared to our historical range. Adjustments to revenues due to under or over accruals for sales programs related to revenues reported in prior quarterly periods have averaged 0.5% of quarterly gross revenue for fiscal years 2010 and 2011, and were 1.1% of gross revenue in the December 2011 quarter.

Table of Contents*Cost of Revenue and Gross Margin*

(Dollars in millions)	For the Three Months Ended			For the Six Months Ended	
	December 30, 2011	September 30, 2011	December 31, 2010	December 30, 2011	December 31, 2010
Cost of revenue	\$ 2,185	\$ 2,262	\$ 2,190	\$ 4,448	\$ 4,338
Gross margin	1,010	549	529	1,559	1,079
Gross margin percentage	32%	20%	19%	26%	20%

Gross margins as a percentage of revenue increased significantly from the September 2011 quarter and the December 2010 quarter due to improved pricing as a result of the substantial unmet demand, partially offset by lower capacity utilization due to shortages of some critical components.

In the December 2011 quarter, total warranty cost was 2.0% of revenue and warranty cost related to new shipments was 1.3% of revenue. Net unfavorable changes in estimates of prior warranty accruals as a percentage of revenue approximated 0.7% of revenue.

In January 2012, we shortened the standard warranty term for a number of our products. This change in business terms is anticipated to reduce our warranty costs going forward.

Operating Expenses

(Dollars in millions)	For the Three Months Ended			For the Six Months Ended	
	December 30, 2011	September 30, 2011	December 31, 2010	December 30, 2011	December 31, 2010
Product development	\$ 259	\$ 208	\$ 213	\$ 467	\$ 422
Marketing and administrative	141	105	102	245	206
Amortization of intangibles	2		1	3	2
Restructuring and other, net	3		7	3	11
Operating expenses	\$ 405	\$ 313	\$ 323	\$ 718	\$ 641

Product development expense. Product development expense for the three months ended December 30, 2011 increased by approximately 25% and 22% over the three months ended September 30, 2011 and December 31, 2010, respectively. Product development expense for the six months ended December 30, 2011 increased by approximately 11% over the six months ended December 31, 2010. These increases were primarily due to an increase in variable compensation.

Marketing and administrative expense. Marketing and administrative expense for the three months ended December 30, 2011 increased by approximately 34% and 38% over the three months ended September 30, 2011 and December 31, 2010, respectively. Marketing and administrative expense for the six months ended December 30, 2011 increased by approximately 19% over the six months ended December 31, 2010. These increases were primarily due to an increase in variable compensation and Samsung integration and acquisition costs. Samsung integration and acquisition costs totaled \$17 million and \$29 million in the three and six months ended December 30, 2011, respectively,

Edgar Filing: Seagate Technology plc - Form 10-Q

compared to none in the corresponding year ago periods.

Amortization of intangibles. Amortization expense of intangible assets increased as a result of the acquisition of Samsung's HDD business. Future estimated amortization expense for the remainder of fiscal year 2012 is \$69 million.

Restructuring and other, net. During the three and six months ended December 30, 2011, we recorded \$3 million of restructuring charges primarily related to previously announced restructuring plans. In the three and six months ended December 31, 2010, we recorded \$7 million and \$11 million, respectively, of restructuring charges associated with previously announced restructuring plans primarily relating to the closure of our Ang Mo Kio, Singapore manufacturing operations.

Other income (expense), net

(Dollars in millions)	For the Three Months Ended			For the Six Months Ended	
	December 30, 2011	September 30, 2011	December 31, 2010	December 30, 2011	December 31, 2010
Other expense, net	\$ (47)	\$ (84)	\$ (31)	\$ (132)	\$ (110)

Table of Contents

Other expense, net for the December 2011 quarter decreased from the September 2011 quarter primarily due to lower interest expense from a lower average debt balance and a gain on deferred compensation plan assets.

Other expense, net for the December 2011 quarter increased from the December 2010 quarter primarily due to increase in interest expense from a higher average debt balance and an increase in foreign exchange remeasurement losses.

Other expense, net for the first half of fiscal year 2012 increased from the same period in fiscal year 2011 primarily due to a higher average debt balance and an equity investment write-down, partially offset by favorable foreign exchange hedges and remeasurement.

Income taxes

(Dollars in millions)	For the Three Months Ended			For the Six Months Ended	
	December 30, 2011	September 30, 2011	December 31, 2010	December 30, 2011	December 31, 2010
Provision for (benefit from) income taxes	\$ (5)	\$ 12	\$ 25	\$ 6	\$ 29

Our income tax benefit recorded for the December 2011 quarter included \$7 million of tax benefits from the reversal of a portion of the U.S. valuation allowance recorded in prior periods. Our income tax provision recorded for the first half of fiscal year 2012 included approximately \$10 million of discrete tax benefits from the reversal of a portion of the U.S. valuation allowance recorded in prior periods and the release of tax reserves associated with the expiration of certain statutes of limitation.

Our income tax benefit and provision for the December 2011 quarter and for the first half of fiscal year 2012 differed from the provision for income taxes that would be derived by applying the Irish statutory rate of 25% to income before income taxes, primarily due to the net effect of (i) tax benefits related to non-U.S. earnings generated in jurisdictions that are subject to tax holidays or tax incentive programs and are considered indefinitely reinvested outside of Ireland, (ii) a decrease in valuation allowance for certain U.S. deferred tax assets, (iii) the release of tax reserves as a result of the expiration of statutes of limitation, and (iv) tax expense related to intercompany transactions. The acquisition of Samsung's HDD business is not expected to have a significant impact on our effective tax rate in fiscal year 2012.

Our income tax provision recorded for the December 2010 quarter and for the first half of fiscal year 2011 included approximately \$1 million and \$11 million of discrete tax benefits, respectively, primarily from the release of tax reserves associated with expiration of certain statutes of limitation. In addition, during the first half of fiscal year 2011, \$11 million of discrete income tax benefits from the loss recognized on the redemption of 2.375% Notes and 5.75% Debentures was offset by a corresponding increase in the valuation allowance for U.S. deferred tax assets.

Our income tax provision for the December 2010 quarter and for the first half of fiscal year 2011 differed from the provision for income taxes that would be derived by applying the Irish statutory rate of 25% to income before income taxes primarily due to the net effect of (i) tax benefits related to non-U.S. earnings generated in jurisdictions that are subject to tax holidays or tax incentive programs and are considered indefinitely reinvested outside of Ireland, (ii) an increase in valuation allowance for U.S. deferred tax assets, (iii) tax expense related to intercompany

transactions, and (iv) the release of tax reserves as a result of the expiration of statutes of limitation.

On December 17, 2010, the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 (the 2010 Tax Relief Act) was enacted. The 2010 Tax Relief Act includes business incentives to invest in machinery and equipment, and retroactively reinstated the R&D tax credit through December 31, 2011 from December 31, 2009. These business incentives had no immediate impact on our tax provision due to the existing valuation allowance for certain of our U.S. deferred tax assets.

Liquidity and Capital Resources

The following sections discuss our principal liquidity requirements, as well as our sources and uses of cash and our liquidity and capital resources. Our cash and cash equivalents are maintained in investments with remaining maturities of 90 days or less at the time of purchase. Our short-term investments consist primarily of readily marketable debt securities with remaining maturities of more than 90 days at the time of purchase. The principal

Table of Contents

objectives of our investment policy are the preservation of principal and maintenance of liquidity. We intend to maintain a highly liquid portfolio by investing only in those marketable securities that we believe have active secondary or resale markets. We believe our cash equivalents and short-term investments are liquid and accessible. We operate in some countries that have restrictive regulations over the movement of cash and/or foreign exchange across their borders. These restrictions have not impeded our ability to conduct our business, nor do we expect them to in the next 12 months. We are not aware of any downgrades, losses or other significant deterioration in the fair value of our cash equivalents or short-term investments and accordingly, we do not believe the fair value of our short-term investments has significantly changed from the values reported as of December 30, 2011.

Cash and Cash Equivalents, Short-term Investments, and Restricted Cash and Investments

(Dollars in millions)	December 30, 2011	July 1, 2011	Change
Cash and cash equivalents	\$ 1,825	\$ 2,677	\$ (852)
Short-term investments	407	474	(67)
Restricted cash and investments	93	102	(9)
Total	\$ 2,325	\$ 3,253	\$ (928)

Our cash and cash equivalents, short-term investments and restricted cash and investments decreased by \$928 million from July 1, 2011 as cash provided by operating activities of \$879 million was offset by \$561 million paid to Samsung, \$594 million in repayments of long term debt, \$361 million paid for capital expenditures, \$191 million paid to repurchase 13 million of our ordinary shares and \$154 million in dividends paid to our shareholders.

Cash Provided by Operating Activities

Cash provided by operating activities for the six months ended December 30, 2011 of \$879 million includes the effects of net income adjusted for non-cash items including depreciation, amortization, and share-based compensation, and:

- a decrease of \$134 million in vendor non-trade receivables due to a decrease in volumes;
- an increase of \$130 million in accounts receivable, net, due to an increase in revenues;
- a decrease of \$500 million in accounts payable due to an overall decrease in volumes, a change in supplier payment terms and accelerated payments to certain suppliers affected by the Thailand flooding, offset by strategic purchases to secure key components; and
- a decrease of \$181 million in inventories due to a depletion of our vendor managed inventory levels, offset by strategic purchases to secure key components.

Cash Used in Investing Activities

During the six months ended December 30, 2011, we used \$843 million for net cash investing activities, which was primarily attributable to net payments to Samsung of \$561 million and payments for property, equipment and leasehold improvements of approximately \$361 million.

Cash Used in Financing Activities

Net cash used in financing activities of \$888 million for the six months ended December 30, 2011 was primarily attributable to approximately \$594 million in long term debt repayments \$191 million paid to repurchase 13 million of our ordinary shares and \$154 million in dividends paid to our shareholders.

Liquidity Sources, Cash Requirements and Commitments

Our primary sources of liquidity as of December 30, 2011, consisted of: (1) approximately \$2.2 billion in cash, cash equivalents, and short-term investments, (2) cash we expect to generate from operations and (3) a \$350 million senior secured revolving credit facility. We also had \$93 million in restricted cash and investments, of which \$75 million was related to our employee deferred compensation liabilities under our non-qualified deferred compensation plan.

Table of Contents

The credit agreement that governs our revolving credit facility contains certain covenants that we must satisfy in order to remain in compliance with the credit agreement. The agreement also includes three financial covenants: (1) minimum cash, cash equivalents and marketable securities; (2) a fixed charge coverage ratio; and (3) a net leverage ratio.

Our liquidity requirements are primarily to meet our working capital, research and development and capital expenditure needs, to fund scheduled payments of principal and interest on our indebtedness, and to fund our quarterly dividend. Our ability to fund these requirements will depend on our future cash flows, which are determined by future operating performance, and therefore, subject to prevailing global macroeconomic conditions and financial, business and other factors, some of which are beyond our control.

From time to time we may repurchase any of our outstanding notes in open market or privately negotiated purchases or otherwise, or may redeem outstanding notes pursuant to the terms of the applicable indenture.

As of December 30, 2011, we were in compliance with all of the covenants under our credit facility and debt agreements. Based on our current outlook, we expect to be in compliance with the covenants of our debt agreements over the next 12 months.

On January 25, 2012, our Board of Directors (the "Board") declared a cash dividend of \$0.25 per share, payable on March 1, 2012 to shareholders of record as of the close of business on February 15, 2012. The payment of any future quarterly dividends will be at the discretion of the Board and will be dependent upon our financial position, results of operations, available cash, cash flow, capital requirements and other factors deemed relevant by the Board. Additionally, the Board authorized an additional \$1 billion of repurchases of our outstanding ordinary shares.

Critical Accounting Policies

Our discussion and analysis of financial condition and results of operations are based upon our Condensed Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of such statements requires us to make estimates and assumptions that affect the reported amounts of revenues and expenses during the reporting period and the reported amounts of assets and liabilities as of the date of the financial statements. Our estimates are based on historical experience and other assumptions that we consider to be appropriate in the circumstances. However, actual future results may vary from our estimates.

Since our fiscal year ended July 1, 2011, there have been no material changes in our critical accounting policies and estimates. Please refer to Management's Discussion and Analysis of Financial Condition and Results of Operations contained in Part II, Item 7 of our Annual Report on Form 10-K for the fiscal year ended July 1, 2011, as filed with the SEC on August 17, 2011, for a discussion of our critical accounting policies and estimates.

Recent Accounting Pronouncements

Edgar Filing: Seagate Technology plc - Form 10-Q

See Part I, Item 1. Financial Statements Note 1. Basis of Presentation and Summary of Significant Accounting Policies for information regarding the effect of new accounting pronouncements on our financial statements.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We have exposure to market risks due to the volatility of interest rates, foreign currency exchange rates, equity and bond markets. A portion of these risks are hedged, but fluctuations could impact our results of operations, financial position and cash flows. Additionally, we have exposure to downgrades in the credit ratings of our counterparties as well as exposure related to our credit rating changes.

Interest Rate Risk. Our exposure to market risk for changes in interest rates relates primarily to our investment portfolio. At December 30, 2011, with the exception of our auction rate securities, we had no marketable securities that had been in a continuous unrealized loss position for a period greater than 12 months and determined that no investments were other-than-temporarily impaired. We currently do not use derivative financial instruments in our investment portfolio.

We have fixed rate debt obligations. We enter into debt obligations to support general corporate purposes including capital expenditures and working capital needs. We currently do not use interest rate derivatives to hedge interest rate exposure on our outstanding debt.

The table below presents principal amounts and related weighted average interest rates by year of maturity for our investment portfolio and debt obligations as of December 30, 2011.

Fiscal Years Ended

(Dollars in millions, except percentages)	2012	2013	2014	2015	2016	Thereafter	Total	Fair Value at December 30, 2011
Assets								
Cash equivalents:								
Fixed rate	\$ 1,664	\$	\$	\$	\$	\$	\$ 1,664	\$ 1,664
Average interest rate	0.12%						0.12%	
Short-term investments:								
Fixed rate	\$ 22	\$ 113	\$ 142	\$ 85	\$ 12	\$ 22	\$ 396	\$ 407
Average interest rate	0.59%	1.11%	1.22%	1.42%	1.19%	1.16%	1.19%	
Long-term investments:								
Variable rate	\$	\$	\$	\$	\$	\$ 17	\$ 17	\$ 15
Average interest rate						1.87%	1.87%	
Total investment securities	\$ 1,686	\$ 113	\$ 142	\$ 85	\$ 12	\$ 39	\$ 2,077	\$ 2,086
Average interest rate	0.13%	1.11%	1.22%	1.42%	1.19%	1.87%	0.34%	
Debt								
Fixed rate	\$	\$	\$ 385	\$	\$	\$ 2,550	\$ 2,935	\$ 3,137
Average interest rate			10.00%			7.14%	7.52%	

Foreign Currency Exchange Risk. We may enter into foreign currency forward exchange contracts to manage exposure related to certain foreign currency commitments and anticipated foreign currency denominated expenditures. Our policy prohibits us from entering into derivative

Edgar Filing: Seagate Technology plc - Form 10-Q

financial instruments for speculative or trading purposes. During the six months ended December 30, 2011 and fiscal years 2011 and 2010, we did not enter into any hedges of net investments in foreign operations.

We also hedge a portion of our foreign currency denominated balance sheet positions with foreign currency forward exchange contracts to reduce the risk that our earnings will be adversely affected by changes in currency exchange rates. The changes in fair value of these hedges are recognized in earnings in the same period as the gains and losses from the remeasurement of the assets and liabilities. These foreign currency forward exchange contracts are not designated as hedging instruments under ASC 815, *Derivatives and Hedging*. All these forward contracts mature within 12 months.

We evaluate hedging effectiveness prospectively and retrospectively and record any changes in the fair value of the ineffective portion of the hedging instruments in Costs of Revenue on the Consolidated Statements of Operations. We did not have any material net gains (losses) recognized in Costs of Revenue for cash flow hedges due to hedge ineffectiveness or discontinued cash flow hedges during the six months ended December 30, 2011 or December 31, 2010, nor did we discontinue any material cash flow hedges for a forecasted transaction in the respective periods.

Table of Contents

The table below provides information as of December 30, 2011 about our foreign currency forward exchange contracts. The table is provided in U.S. dollar equivalent amounts and presents the notional amounts (at the contract exchange rates) and the weighted average contractual foreign currency exchange rates.

(Dollars in millions, except average contract rate)	Notional Amount	Average Contract Rate	Estimated Fair Value (1)
Foreign currency forward exchange contracts:			
Thai Baht	\$ 210	31.07	\$ (3)
Singapore dollar	126	1.24	(5)
Chinese Renminbi	35	6.34	
Czech Koruna	11	19.07	
Total	\$ 382		\$ (8)

(1) Equivalent to the unrealized net gain (loss) on existing contracts.

Other Market Risks. We have exposure to counterparty credit downgrades in the form of credit risk related to our foreign currency forward exchange contracts and our fixed income portfolio. We monitor and limit our credit exposure for our foreign currency forward exchange contracts by performing ongoing credit evaluations. We also manage the notional amount of contracts entered into with any one counterparty, and we maintain limits on maximum tenor of contracts based on the credit rating of the financial institutions. Additionally, the investment portfolio is diversified and structured to minimize credit risk. As of December 30, 2011, we had counterparty credit exposure of \$1 million comprised of the mark-to-market valuation related to our foreign currency forward exchange contracts in a gain position. Changes in our corporate issuer credit ratings have minimal impact on our financial results, but downgrades may negatively impact our future transaction costs and our ability to execute transactions with various counterparties.

We are subject to equity market risks due to changes in the fair value of the notional investments selected by our employees as part of our Seagate Deferred Compensation Plan (the "SDCP"). We currently manage our exposure to equity market risks associated with the SDCP liabilities by investing directly in mutual funds that mirror the employees' investment options.

As of December 30, 2011, we continued to hold auction rate securities with a par value of approximately \$17 million, all of which are collateralized by student loans guaranteed by the Federal Family Education Loan Program. Beginning in the March 2008 quarter, these securities have continuously failed to settle at auction. As of December 30, 2011, the estimated fair value of these auction rate securities was \$15 million. We believe that the impairments totaling approximately \$2 million are temporary as we do not intend to sell these securities and have concluded it is not more likely than not that we will be required to sell the securities before the recovery of the amortized cost basis. As such, the impairment was recorded in Other comprehensive income (loss) and these securities were classified as long-term investments.

ITEM 4. CONTROLS AND PROCEDURES

An evaluation was performed under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this quarterly report. Based on the evaluation, our management, including our chief executive officer and chief financial officer,

Edgar Filing: Seagate Technology plc - Form 10-Q

concluded that our disclosure controls and procedures were effective as of December 30, 2011. During the quarter ended December 30, 2011, there were no changes in our internal control over financial reporting that materially affected, or were reasonably likely to materially affect our internal control over financial reporting.

OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a discussion of legal proceedings, see Part I, Item 1. Financial Statements Note 13, Legal, Environmental and Other Contingencies of this Report on Form 10-Q.

ITEM 1A. RISK FACTORS

Except for the risk factors set forth below, there have been no material changes to the description of the risk factors associated with our business previously disclosed in Part I, Item 1A, Risk Factors in our Annual Report on Form 10-K for the year ended July 1, 2011. In addition to the other information set forth in this report, you should carefully consider the risk factors discussed in our Annual Report on Form 10-K as they could materially affect our business, financial condition and future results.

The risks described in our Annual Report on Form 10-K are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business, financial condition or operating results.

Dependence on Supply of Components, Equipment and Raw Materials *If we experience shortages or delays in the receipt of, or cost increases in, critical components, equipment or raw materials necessary to manufacture our products, we may suffer lower operating margins, production delays and other material adverse effects.*

The cost, quality and supply of components, certain equipment and raw materials used to manufacture disk drives and key components like recording media and heads are critical to our success. The equipment we use to manufacture our products and components is frequently custom made and comes from a few suppliers and the lead times required to obtain manufacturing equipment can be significant. Particularly important components for disk drives include read/write heads, aluminum or glass substrates for recording media, ASICs, spindle motors, printed circuit boards, and suspension assemblies. We rely on sole suppliers or a limited number of suppliers for some of these components that we do not manufacture, including aluminum and glass substrates, read/write heads, ASICs, spindle motors, printed circuit boards, and suspension assemblies. Many of such component suppliers are geographically concentrated, in particular, in Thailand, which makes our supply chain more vulnerable to regional disruptions such as the recent flooding in Thailand, which has had a material impact on the production and availability of many components. If our vendors for these components are unable to meet our cost, quality, and supply requirements, we could experience a shortage in supply or an increase in production costs, which would adversely affect our results of operations.

Certain rare earth elements are critical in the manufacture of our products. We purchase components that contain rare earth elements from a number of countries, including the People's Republic of China. We cannot predict whether any nation will impose regulations, quotas or embargoes upon the rare earth elements incorporated into our products that would restrict the worldwide supply of such metals or increase their

Edgar Filing: Seagate Technology plc - Form 10-Q

cost. We have experienced increased costs and production delays when we were unable to obtain the necessary equipment or sufficient quantities of some components, and/or have been forced to pay higher prices or make volume purchase commitments or advance deposits for some components, equipment or raw materials that were in short supply in the industry in general. If any major supplier were to restrict the supply available to us or increase the cost of the rare earth elements used in our products, we could experience a shortage in supply or an increase in production costs, which would adversely affect our results of operations.

Consolidation among component manufacturers may result in some component manufacturers exiting the industry or not making sufficient investments in research to develop new components.

If there is a shortage of, or delay in supplying us with, critical components, equipment or raw materials, then:

- it is likely that our suppliers would raise their prices and, if we could not pass these price increases to our customers, our operating margin would decline;
- we might have to reengineer some products, which would likely cause production and shipment delays, make the reengineered products more costly and provide us with a lower rate of return on these products;
- we would likely have to allocate the components we receive to certain of our products and ship less of others, which could reduce our revenues and could cause us to lose sales to customers who could purchase more of their required products from manufacturers that either did not experience these shortages or delays or that made different allocations; and

Table of Contents

- we might be late in shipping products, causing potential customers to make purchases from our competitors, thus causing our revenue and operating margin to decline.

We cannot assure you that we will be able to obtain critical components in a timely and economic manner.

Failure to Pay Quarterly Dividends *Our failure to pay quarterly dividends to our shareholders could cause the market price of our ordinary shares to decline significantly.*

On April 7, 2011, our Board of Directors (Board) declared a dividend of \$0.18 per share that was paid on June 1, 2011 to our shareholders of record as of May 2, 2011. On July 20, 2011, our Board declared a cash dividend of \$0.18 per share, which was paid on August 26, 2011 to our shareholders of record as of August 5, 2011. On October 21, 2011, our Board declared a dividend of \$0.18 per share that was paid on November 18, 2011 to shareholders of record as of November 3, 2011. On January 26, 2012, our Board declared a quarterly dividend of \$0.25 per share payable on March 1, 2012 to shareholders of record on February 15, 2012.

Our ability to pay quarterly dividends will be subject to, among other things, our financial position and results of operations, available cash and cash flow, capital requirements, and other factors. Any reduction or discontinuation of quarterly dividends could cause the market price of our ordinary shares to decline significantly. Moreover, in the event our payment of quarterly dividends is reduced or discontinued, our failure or inability to resume paying dividends at historical levels could result in a persistently low market valuation of our ordinary shares.

If we do not realize the expected benefits of our acquisition of Samsung's HDD business, our business and financial condition may be materially impaired.

We may not achieve the desired benefits from our strategic alignment with Samsung. If we cannot successfully integrate the business we acquired from Samsung into our operations, we may experience negative consequences to our business, financial condition or results of operations. The integration of Samsung's HDD business into our operations will involve a number of risks, including, but not limited to:

- Diversion of senior management's attention from the management of daily operations to the integration of the acquired assets into our business;
- The potential that we do not successfully integrate the employees that we hired from Samsung's hard disk drive business into our business;
- The potential loss of key customers or suppliers of Samsung's HDD business who do not choose to do business with us;

Edgar Filing: Seagate Technology plc - Form 10-Q

- The potential that key customers do not accept new products of the combined company;
- The potential that we do not successfully coordinate sales and marketing efforts to communicate the capabilities of the combined company;
- Potential revenue attrition in excess of anticipated levels;
- The potential that we do not qualify the combined company's products as a primary source of supply with OEM customers on a timely basis or at all;
- The risk of higher than anticipated costs in continuing support and development of acquired products;
- Difficulties and uncertainties in achieving anticipated cost reductions and operational synergies;
- Potential difficulties integrating manufacturing and design processes and controls;
- Potential difficulties integrating and harmonizing financial reporting systems; and
- Potential incompatibility of technology and systems.

Table of Contents

Even if we are able to successfully integrate the business that we acquired from Samsung into our business, we may not be able to realize the cost savings, synergies and growth that we anticipate from this transaction in the timeframe we currently expect, and the costs of achieving these benefits may be higher than we currently expect, because of a number of risks, including but not limited to:

- The possibility that the transaction may not further our business strategy as we expected;
- Our operating results or financial condition may be adversely impacted by liabilities that we assume in the transaction; and
- The risk of intellectual property disputes with respect to the acquired assets.

In addition, the Chinese Ministry of Commerce conditioned its approval of the Samsung acquisition on our compliance with several on-going requirements, including: adopting measures to keep the Samsung HDD brand as a separate competitor to the Seagate HDD brand, expanding the Samsung HDD production capacity within six months of the decision, and investing at least \$800 million per year for three years in R&D in our combined Samsung and Seagate HDD businesses. Compliance with these obligations may involve significant costs or require changes in business practices that result in reduced revenue. Noncompliance could result in extending the time under which we would be compelled to operate under these conditions.

As a result of these risks, the transaction may not contribute to our earnings as we expected, we may not achieve expected cost synergies when expected, or at all, and we may not achieve the other anticipated strategic and financial benefits of this transaction.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Recent Sales of Unregistered Equity Securities

On December 19, 2011, we issued 45.2 million ordinary shares with a fair value of \$569 million to Samsung Electronics Co., Ltd (Samsung) as partial consideration for the acquisition of the Samsung hard disk drive business by us. The fair value of the ordinary shares issued was determined based on the closing market price of the Company's ordinary shares on the acquisition date, less a 16.5% discount for lack of marketability as the shares issued are subject to a restriction that limits their trade or transfer for approximately a one year period.

This issuance was not registered under the Securities Act of 1933, as amended, in reliance on the exemptions provided by Section 4(2) thereof and Regulation D promulgated thereunder for private sales by an issuer not involving a public offering.

Repurchases of Equity Securities

On January 27, 2010, our Board of Directors authorized an Anti-Dilution Share Repurchase Program, which was publicly announced on February 1, 2010. The repurchase program authorizes us to repurchase our shares to offset increases in diluted shares, such as those caused by employee stock plans and convertible debt, used in the determination of diluted net income per share. The timing and number of shares to be repurchased by us will be dependent on general business and market conditions, cash flows generated by future operations, the price of our shares, cash requirements for other investing and financing activities, and maintaining compliance with our debt covenants. Additionally, there is no minimum or maximum number of shares to be repurchased under the program and the authority for the Anti-Dilution Share Repurchase Program will continue until terminated by our Board of Directors.

On November 29, 2010, our Board of Directors authorized repurchases up to an additional \$2 billion of our outstanding ordinary shares. This new share repurchase authorization continues our commitment to enhancing shareholder value.

Table of Contents

The following table sets forth information, by repurchase program, with respect to repurchases of our shares made during the fiscal quarter ended September 30, 2011:

January 2010 Anti-Dilution Share Repurchase Program

(In millions, except average price paid per share)	Total Number of Shares Repurchased	Average Price Paid per Share	Total Number of Shares Repurchase Under Publicly Announced Plans or Programs	Approximately Dollar Value of Shares Repurchased Under the Plans or Programs
Cumulative repurchased through September 30, 2011	53.1	\$ 16.74	53.1	889
October 1, 2011 through October 28, 2011				
October 29, 2011 through November 25, 2011				
November 26, 2011 through December 30, 2011				
Cumulative repurchased through December 30, 2011	53.1	\$ 16.74	53.1	889

November 2010 Share Repurchase Program

(In millions, except average price paid per share)	Total Number of Shares Repurchased	Average Price Paid per Share	Total Number of Shares Repurchase Under Publicly Announced Plans or Programs	Approximately Dollar Value of Shares Repurchased Under the Plans or Programs
Cumulative repurchased through September 30, 2011	45.3	\$ 14.20	45.3	645
October 1, 2011 through October 28, 2011				
October 29, 2011 through November 25, 2011				
November 26, 2011 through December 30, 2011	3.9	16.41	3.9	63
Cumulative repurchased through December 30, 2011	49.2	\$ 14.38	49.2	708
