Letter from the chairman

Dear Shareholder,

We are pleased to provide the semi-annual report of Western Asset Managed Municipals Fund Inc. for the six-month reporting period ended November 30, 2012. Please read on for Fund performance information and a detailed look at prevailing economic and market conditions during the Fund's reporting period.

Recent regulations adopted by the Commodity Futures Trading Commission (the CFTC) require operators of registered investment companies, including closed-end funds, to register as commodity pool operators unless the fund limits its investments in commodity interests. Effective December 31, 2012, your Fund's manager has claimed the exclusion from the definition of commodity pool operator. More information about the CFTC rules and their effect on the Fund is included later in this report on page 26.

As always, we remain committed to providing you with excellent service and a full spectrum of investment choices. We also remain committed to supplementing the support you receive from your financial advisor. One way we accomplish this is through our website, www.lmcef.com. Here you can gain immediate access to market and investment information, including:

- Fund prices and performance,
- Market insights and commentaries from our portfolio managers, and
- A host of educational resources.

We look forward to helping you meet your financial goals.

Sincerely,

R. Jay Gerken, CFA

Investment commentary

Economic review

While the U.S. economy continued to grow over the six months ended November 30, 2012, it did so at an uneven pace. Looking back, U.S. gross domestic product (GDP)i growth, as reported by the U.S. Department of Commerce, was 2.0% in the first quarter of 2012. The economy slowed in the second quarter, as GDP growth was a tepid 1.3%, before accelerating to 3.1% in the third quarter. The increase was partially due to increased private inventory and investment, higher federal government spending and a deceleration in imports.

The U.S. job market remained weak. While there was some improvement during the reporting period, unemployment continued to be elevated. Looking back, unemployment, as reported by the U.S. Department of Labor, was 8.1% in April 2012, the lowest rate since January 2009, but still high by historical standards. The unemployment rate then moved higher to 8.2% in May and 8.3% in July, before falling to 7.8% in September and ending the reporting period at 7.7% in November. However, the number of longer-term unemployed remained high, as roughly 40% of the 12 million people without a job have been out of work for more than six months.

Meanwhile, the housing market brightened, as sales have started to improve of late and home prices continued to rebound. According to the National Association of Realtors (NAR), existing-home sales rose 5.9% on a seasonally adjusted basis in November 2012 versus the previous month and they were 14.5% higher than in November 2011. In addition, the NAR reported that the median existing-home price for all housing types was \$180,600 in November 2012, up 10.1% from November 2011. This marked the ninth consecutive month that home prices rose compared to the same period a year earlier. Furthermore, the inventory of homes available for sale fell 3.8% in November, which represents a 4.8 month supply at the current sales pace. This represents the lowest inventory since September 2005.

The manufacturing sector appeared to overcome a soft patch that occurred in the summer of 2012 as it improved toward the end of the reporting period, only to experience another setback in November 2012. Based on the Institute for Supply Management 's PMI (PMI)ii, after expanding 34 consecutive months, the PMI fell to 49.7 in June 2012, which represented the first contraction in the manufacturing sector since July 2009 (a reading below 50 indicates a contraction, whereas a reading above 50 indicates an expansion). Manufacturing continued to contract in July and August before ticking up to 51.5 in September and 51.7 in October. However, the PMI fell back to contraction territory with a reading of 49.5 in November, its lowest level since July 2009.

Investment commentary (continued)

Market review

Q. How did the Federal Reserve Board (Fed) respond to the economic environment?

A. The Fed took a number of actions as it sought to meet its dual mandate of fostering maximum employment and price stability. In June 2012, the Fed announced that it would extend its program of purchasing longer-term Treasury securities and selling an equal amount of shorter-term Treasury securities (often referred to as Operation Twist) until the end of 2012. In September, the Fed announced a third round of quantitative easing, which involves purchasing \$40 billion each month of agency mortgage-backed securities on an open-end basis. In addition, the Fed said that Operation Twist would continue and that it will keep the federal funds rate in a historically low range between zero and 0.25% until at least mid-2015. Finally, at its meeting in December, after the reporting period ended, the Fed announced that it would continue purchasing \$40 billion per month of agency mortgage-backed securities (MBS), as well as initially purchasing \$45 billion a month of longer-term Treasuries. The Fed also said that it would keep the federal funds rate on hold ...as long as the unemployment rate remains above 6.5%, inflation between one and two years ahead is projected to be no more than a half percentage point above the Committee s 2.0% longer-run goal, and longer-term inflation expectations continue to be well anchored.

Q. Did Treasury yields trend higher or lower during the six months ended November 30, 2012?

A. Overall, short-term Treasury yields edged lower, while long-term Treasury yields rose during the reporting period. When the period began, two- and ten-year Treasury yields were 0.27% and 1.59%, respectively. Two-year Treasury yields rose as high as 0.33% in late June and hit a trough of 0.22% on several occasions during the period. On July 25, 2012, ten-year Treasuries closed at an all-time low of 1.43%. Ten-year Treasuries peaked at 1.88% in mid-September due to some positive developments in Europe and the introduction of additional central bank quantitative easing programs in the U.S. and abroad. When the reporting period ended on November 30, 2012, two-year Treasury yields were 0.25% and ten-year Treasury yields were 1.62%.

Q. What factors impacted the spread sectors (non-Treasuries) during the reporting period?

A. The spread sectors experienced periods of volatility during the period given a number of macro issues, including periodic fears of contagion from the European sovereign debt crisis and mixed economic data in the U.S. However, overall the spread sectors performed well given generally solid demand from investors looking to generate incremental yield in the low interest rate environment.

Q. How did the municipal bond market perform versus the taxable bond market over the reporting period?

A. The municipal bond market outperformed its taxable bond counterpart during the six months ended November 30, 2012. Over that period, the Barclays Municipal Bond Index^v and the Barclays U.S. Aggregate Index^{vi} returned 4.18% and 1.99%,

respectively. The municipal bond market was supported by generally solid demand, a sharp decline in new issuance, improving tax revenues and low default rates. Additionally, investor sentiment improved as a number of states made progress toward shoring up their financial situation by raising taxes and cutting expenses.

Performance review

For the six months ended November 30, 2012, Western Asset Managed Municipals Fund Inc. returned 8.45% based on its net asset value (NAV) and 14.64% based on its New York Stock Exchange (NYSE) market price per share. The Fund's unmanaged benchmark, the Barclays Municipal Bond Index, returned 4.18% for the same period. The Lipper General & Insured Municipal Debt (Leveraged) Closed-End Funds Category Average returned 8.77% over the same time frame. Please note that Lipper performance returns are based on each fund's NAV.

Certain investors may be subject to the federal alternative minimum tax, and state and local taxes will apply. Capital gains, if any, are fully taxable. Please consult your personal tax or legal adviser.

During this six-month period, the Fund made distributions to common stock shareholders totaling \$0.39 per share, which may have included a return of capital. The performance table shows the Fund's six-month total return based on its NAV and market price as of November 30, 2012. **Past performance is no guarantee of future results.**

Performance Snapshot as of November 30, 2012 (unaudited)

Price Per Share		6-Month Total Return*
\$14.75 (NAV)		8.45%
\$15.46 (Market Price)		14.64%

All figures represent past performance and are not a guarantee of future results. Performance figures for periods shorter than one year represent cumulative figures and are not annualized.

*Total returns are based on changes in NAV or market price, respectively.

Total return assumes the reinvestment of all distributions, including returns of capital, if any, at NAV. Prior to January 1, 2012, total return assumed the reinvestment of all distributions in additional shares in accordance with the Fund's Dividend Reinvestment Plan.

Total return assumes the reinvestment of all distributions, including returns of capital, if any, in additional shares in accordance with the Fund's Dividend Reinvestment Plan.

Looking for additional information?

The Fund is traded under the symbol `MMU` and its closing market price is available in most newspapers under the NYSE listings. The daily NAV is available on-line under the symbol `XMMUX` on most financial websites. *Barron's* and the *Wall Street Journal's* Monday edition both carry closed-end fund tables that provide additional information. In addition, the Fund issues a quarterly press release that can be found on most major financial websites as well as www.lmcef.com.

Investment commentary (cont d)

In a continuing effort to provide information concerning the Fund, shareholders may call 1-888-777-0102 (toll free), Monday through Friday from 8:00 a.m. to 5:30 p.m. Eastern Time, for the Fund's current NAV, market price and other information.

As always, thank you for your confidence in our stewardship of your assets.

Sincerely,

R. Jay Gerken, CFA

Chairman, President and Chief Executive Officer

December 28, 2012

RISKS: The Fund's investments are subject to a number of risks such as liquidity risk, interest rate risk, credit risk, leveraging risk and management risk. As interest rates rise, the price of fixed-income investments declines. Lower rated, higher-yielding bonds are subject to greater credit risk than higher-rated investment grade securities. Municipal securities purchased by the Fund may be adversely affected by changes in the financial condition of municipal issuers and insurers, regulatory and political developments, uncertainties and public perceptions, and other factors. The Fund may make significant investments in derivative instruments. Derivative instruments can be illiquid, may disproportionately increase losses and could have a potentially large impact on Fund performance. Leverage may result in greater volatility of NAV and market price of common shares and may increase a shareholder's risk of loss.

All investments are subject to risk including the possible loss of principal. Past performance is no guarantee of future results. All index performance reflects no deduction for fees, expenses or taxes. Please note that an investor cannot invest directly in an index.

The information provided is not intended to be a forecast of future events, a guarantee of future results or investment advice. Views expressed may differ from those of the firm as a whole.

Edgar Filing: WESTERN ASSET MANAGED MUNICIPALS FUND INC. - Form N-CSRS

- i Gross domestic product (GDP) is the market value of all final goods and services produced within a country in a given period of time.
- ii The Institute for Supply Management's PMI is based on a survey of purchasing executives who buy the raw materials for manufacturing at more than 350 companies. It offers an early reading on the health of the manufacturing sector.
- iii The Federal Reserve Board (Fed) is responsible for the formulation of policies designed to promote economic growth, full employment, stable prices and a sustainable pattern of international trade and payments.
- iv The federal funds rate is the rate charged by one depository institution on an overnight sale of immediately available funds (balances at the Federal Reserve) to another depository institution; the rate may vary from depository institution to depository institution and from day to day.
- v The Barclays Municipal Bond Index is a market value weighted index of investment grade municipal bonds with maturities of one year or more.
- vi The Barclays U.S. Aggregate Index is a broad-based bond index comprised of government, corporate, mortgage- and asset-backed issues, rated investment grade or higher, and having at least one year to maturity.
- vii Net asset value (NAV) is calculated by subtracting total liabilities and outstanding preferred stock (if any) from the closing value of all securities held by the Fund (plus all other assets) and dividing the result (total net assets) by the total number of the common shares outstanding. The NAV fluctuates with changes in the market prices of securities in which the Fund has invested. However, the price at which an investor may buy or sell shares of the Fund is the Fund's market price as determined by supply of and demand for the Fund's shares.
- viii Lipper, Inc., a wholly-owned subsidiary of Reuters, provides independent insight on global collective investments. Returns are based on the six-month period ended November 30, 2012, including the reinvestment of all distributions, including returns of capital, if any, calculated among the 75 funds in the Fund's Lipper category.

Fund at a glance (unaudited)

Investment breakdown (%) as a percent of total investments

The bar graph above represents the composition of the Fund's investments as of November 30, 2012 and May 31, 2012 and does not include derivatives such as futures contracts. The Fund is actively managed. As a result, the composition of the Fund's investments is subject to change at any time.

Spread duration (unaudited)

Economic Exposure November 30, 2012

Spread duration measures the sensitivity to changes in spreads. The spread over Treasuries is the annual risk-premium demanded by investors to hold non-Treasury securities. Spread duration is quantified as the % change in price resulting from a 100 basis points change in spreads. For a security with positive spread duration, an increase in spreads would result in a price decline and a decline in spreads would result in a price increase. This chart highlights the market sector exposure of the Fund's portfolio and the exposure relative to the selected benchmark as of the end of the reporting period.

Benchmark	Barclays Municipal Bond Index
MMU	Western Asset Managed Municipals Fund Inc.

Effective duration (unaudited)

Interest Rate Exposure November 30, 2012

Total Effective Duration

MMU	7.38 years
Benchmark	6.06 years

Effective duration measures the sensitivity to changes in relevant interest rates. Effective duration is quantified as the % change in price resulting from a 100 basis points change in interest rates. For a security with positive effective duration, an increase in interest rates would result in a price decline and a decline in interest rates would result in a price increase. This chart highlights the interest rate exposure of the Fund's sectors relative to the selected benchmark sectors as of the end of the reporting period.
