### Additional Information for the Floating Rate Notes

#### *General*

The Floating Rate Notes will be issued under an Indenture dated as of October 1, 1993, between the issuer and The Bank of New York Mellon, as trustee, as supplemented by the First Supplemental Indenture dated as of December 15, 1995. The Floating Rate Notes will be unsecured and will have the same rank as all of the issuer's other unsecured and unsubordinated debt.

#### *Interest*

Interest on the Floating Rate Notes will be payable quarterly to the persons in whose names the Floating Rate Notes are registered at the close of business on the fifteenth calendar day preceding each interest payment date. Interest on the Floating Rate Notes will accrue from and including January 27, 2017, to but excluding the first interest payment date, and then from and including the most recent interest payment date to which interest has been paid or duly provided for, to but excluding the next interest payment date or maturity date, as the case may be. We refer to each of these periods as an interest period. The amount of accrued interest that we will pay for any interest period can be calculated by multiplying the face amount of the Floating Rate Note by an accrued interest factor. This accrued interest factor is computed by adding the interest factor calculated for each day from January 27, 2017, or from the last date we paid interest to you, to the date for which accrued interest is being calculated. The interest factor for each day is computed by dividing the interest rate applicable to that day by 360.

When we use the term London business day, we mean any day on which dealings in United States dollars are transacted in the London interbank market. A business day means any day except a Saturday, a Sunday or a legal holiday in The City of New York or a day on which banking institutions in The City of New York are authorized or obligated by law, regulation or executive order to close. In the event that any interest payment date (other than the maturity date) and interest reset date for the Floating Rate Notes would otherwise fall on a day that is not a business day, that interest payment date and interest reset date will be postponed to the next day that is a business day. If the postponement would cause the day to fall in the next calendar month, the interest payment date and interest reset date will be the immediately preceding business day.

## Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form FWP

The interest rate on the Floating Rate Notes will be calculated by the calculation agent appointed by the issuer, initially The Bank of New York Mellon. The calculation agent will reset the interest rate on each interest payment date and on January 27, 2017, each of which we refer to as an interest reset date. The second London business day preceding an interest reset date will be the interest determination date for that interest reset date. The interest rate in effect on each day that is not an interest reset date will be the interest rate determined as of the interest determination date pertaining to the immediately preceding interest reset date. The interest rate in effect on any day that is an interest reset date will be the interest rate determined as of the interest determination date pertaining to that interest reset date.

LIBOR will be determined by the calculation agent in accordance with the following provisions:

(a) With respect to any interest determination date, LIBOR will be the rate for deposits in United States dollars having a maturity of the Index Maturity commencing on the first day of the applicable interest period that appears on Reuters Screen LIBOR01 Page as of 11:00 a.m., London time, on that interest determination date. If no rate appears, LIBOR for that interest determination date will be determined in accordance with the provisions described in (b) below.

(b) With respect to an interest determination date on which no rate appears on Reuters Screen LIBOR01 Page, as specified in (a) above, the calculation agent will request the principal London offices of each of four major reference banks in the London interbank market, as selected by the calculation agent (after consultation with the issuer), to provide the calculation agent with its offered quotation for deposits in United States dollars for the Index Maturity, commencing on the first day of the applicable interest period, to prime banks in the London interbank market at approximately 11:00 a.m., London time, on that interest determination date and in a principal amount that is representative for a single transaction in United States dollars in that market at that time. If at least two

---

quotations are provided, then LIBOR on that interest determination date will be the arithmetic mean of those quotations. If fewer than two quotations are provided, then LIBOR on the interest determination date will be the arithmetic mean of the rates quoted at approximately 11:00 a.m., in The City of New York, on the interest determination date by three major banks in The City of New York selected by the calculation agent (after consultation with the issuer) for loans in United States dollars to leading European banks, having an Index Maturity and in a principal amount that is representative for a single transaction in United States dollars in that market at that time. If, however, the banks selected by the calculation agent are not providing quotations in the manner described by the previous sentence, LIBOR determined as of that interest determination date will be LIBOR in effect on that interest determination date.

Reuters Screen LIBOR01 Page means the display designated as the Reuters Screen LIBOR01 Page, or such other screen as may replace the Reuters Screen LIBOR01 Page on the service or any successor service as may be nominated for the purpose of displaying London interbank offered rates for United States dollar deposits by ICE Benchmark Administration Limited ( IBA ) or its successor or such other entity assuming the responsibility of IBA or its successor in calculating the London interbank offered rate in the event that IBA or its successor no longer does so.

All percentages resulting from any calculation of the interest rate on the Floating Rate Notes will be rounded to the nearest one hundred-thousandth of a percentage point with five one millionths of a percentage point rounded upwards (e.g., 9.876545% (or .09876545) would be rounded to 9.87655% (or .0987655)), and all dollar amounts used in or *resulting* from such calculation on the Floating Rate Notes will be rounded to the nearest cent (with one-half cent being rounded upward). Each calculation of the interest rate on the Floating Rate Notes by the calculation agent will (in the absence of manifest error) be final and binding on the noteholders and the issuer.

So long as any of the Floating Rate Notes remain outstanding, there will at all times be a calculation agent. If that bank is unable or unwilling to continue to act as the calculation agent or if it fails to calculate properly the interest rate on the Floating Rate Notes for any interest period, the issuer will appoint another leading commercial or investment bank to act as calculation agent in its place. The calculation agent may not resign its duties without a successor having been appointed.

**\*Note: A securities rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time.**

**The issuer has filed a registration statement (including a prospectus) with the SEC for the offering to which this communication relates. Before you invest, you should read the prospectus in that registration statement and other documents the issuer has filed with the SEC for more complete information about the issuer and this offering. You may get these documents for free by visiting EDGAR on the SEC web site at [www.sec.gov](http://www.sec.gov).
