SOURCE CAPITAL, INC.

SEMIANNUAL REPORT

for the six months ended June 30, 2018

**SOURCE CAPITAL, INC.
LETTER TO SHAREHOLDERS**

DEAR SHAREHOLDERS:**Performance**

During the second quarter of 2018, the net asset value per share return of Source Capital (or the "Fund") was 0.40%, and 0.23% on a market price basis (both percentages including the reinvestment of the distributions paid during the period). These changes compare with a 3.43% return for the S&P 500 Index, a -0.16% return for the Bloomberg Barclays U.S. Aggregate Bond Index and a 1.99% return for the 60/40 blended S&P 500/ Bloomberg Barclays U.S. Aggregate benchmark during the same period. For the calendar year to date period, the net asset value per share return of the Fund was -0.50%, and -1.29% on a market price basis (both percentages including the reinvestment of the distributions paid during the period). These changes compare with returns of 2.65%, -1.62% and 1.00% for the S&P 500 Index, the Bloomberg Barclays U.S. Aggregate Bond Index and the 60/40 blended S&P 500/ Bloomberg Barclays U.S. Aggregate benchmark during the same period, respectively.¹

The Fund's top five winners and losers for the second quarter of 2018 are presented below. The winners contributed 1.47%, while the losers detracted -1.56%.²

Winners	Performance Contribution	Losers	Performance Contribution
Facebook	0.36%	Arconic	-0.70%
Microsoft	0.30%	Mylan	-0.28%
Alphabet	0.30%	TE Connectivity	-0.28%
Baidu	0.27%	Bank of America	-0.17%
Kinder Morgan	0.24%	Oracle	-0.13%

Equities

Growth continued to outperform value year-to-date, hurting the Fund's performance relative to the broader benchmarks. The Russell 1000 Growth Index returned 7.25%, while the Russell 1000 Value Index declined -1.69% in the first half of the year.

One needn't look much further than the investments that had the greatest impact on the Fund's Q2 performance to drive this point home. The top four contributors are considered "growth" companies. The holdings that hurt Q2's performance largely fall in the "value" category.

For equities, our strategy is largely to purchase equity in undervalued businesses. If we have correctly assessed the opportunity, we believe our investments can deliver a better than market rate of return by virtue of a discounted valuation. The market will define some of these investments as value and others as growth.

Buying growing businesses with an adequate margin of safety is just as much a value investment as buying, say, a financial firm at a discount to tangible book value or a holding company at a discount to readily ascertainable net asset value. We've held all three types of investments in our portfolio over the past decade.

When analyzing businesses, we focus on the key performance indicators that we believe matter. Sometimes financial statements tell the story, and in those cases, investments typically appear "cheap" based on reported financial results. In other situations, information not in the financial statements might be most relevant, for instance, data like a company's position on the cost curve, its subscribers/user base, its total addressable market, its customer acquisition

cost, the lifetime value of a customer, or real asset marked-to-market. In these situations, our holding might appear "expensive" based on reported financial results, but not when one looks at these other factors. Our value approach is the same no matter what the ultimate driver of intrinsic value.

We suspect that balance sheet sources of value will prove a less fertile source of opportunities than in the past, given evolutionary changes in the economy and business models over the past thirty years. In the past few years, the team has spent much time building a base of knowledge in businesses that are capital light, demonstrate outstanding economics and are likely to offer substantial organic growth over the next decade. Some of these companies are too hard for us to underwrite and others trade at values that seem devoid of a margin of safety, but others, like Facebook, Expedia, JD.com and Baidu, have made it into our portfolio.

¹ Comparison to the S&P 500 Index and the Bloomberg Barclays U.S. Aggregate Index is for illustrative purposes only. The Fund does not include outperformance of any index or benchmark in its investment objectives.

² Reflects the top contributors and top detractors to the Fund's performance based on contribution to return for the quarter. Contribution is presented gross of investment management fees, transactions costs and Fund operating expenses, which if included, would reduce the returns presented.

SOURCE CAPITAL, INC.

Admittedly, no bright line divides growth and value. Lacking a more robust methodology, index funds place some companies into both buckets. A company with a low price-to-earnings ratio but a high price-to-book may find some portion of its market capitalization allocated to a value index and the remainder in a growth index.

With active and passive funds building ever larger exposure to growth stocks, the lack of oxygen left in the room for value stocks has triggered some wilting in price. That, along with somewhat higher volatility, has allowed us to initiate new positions.

Last year the U.S. market posted the lowest volatility on record, but 2018 has seen bigger ups and downs.³ The S&P 500 has already declined more than 1% on four times as many trading days in 2018 than in all of last year; the MSCI ACWI, six times as many.

Source: Bloomberg

³ The VIX Index

SOURCE CAPITAL, INC.

When investors become fearful, we like to take advantage of indiscriminate selling. In the first half of the year, that allowed us to establish ten new long positions and exit five. This is more portfolio movement than we've had in years.

Fixed Income

At mid-year, the investment community appears to be comfortable with a gradual increase in the Fed Funds rate. The Federal Reserve began tightening monetary policy via increases in the Fed Funds rate in December 2015. The next increase occurred at the end of 2016, followed by three increases in 2017 and a market expectation of three or four increases this year. The chart below compares the yield curves as of December 15, 2015 (green line) and June 30, 2018 (blue line).

Source: Bloomberg.

The chart shows that increasing rates on the short end of the curve have been accompanied by less significant increases in other parts of the curve, causing the yield curve to flatten significantly over the past two-and-a-half years.

One immediate impact of the Fed's tightening path is that it has introduced more yield into bond markets, particularly in the one- to five-year portion of the yield curve. As we have stated before, as long as rates are sufficient to compensate us for taking on duration risk, we are willing to do so.

Open Market Repurchases

We started the quarter with the market discount to net asset value of 10.16% and ended the quarter with the discount at 10.35%. We repurchased 3,128 shares in the second quarter of 2018 at an average discount of 10.54%. While the number of shares repurchased was modest, it was accretive to shareholders by adding \$0.002 per share to the Fund's NAV.

As a reminder, Source Capital is authorized to make open-market repurchases of its common stock of up to 10% of the Fund's outstanding shares at such times as its shares trade at a greater than 10% discount to the Fund's net asset

value, when in FPA's judgment such repurchases would benefit shareholders, subject to various factors, including the limitations imposed by the federal securities laws governing the repurchase of an issuer's stock by the issuer and the managers' ability to raise cash to repurchase shares in a tax-efficient manner. There is no assurance that Source Capital will purchase shares at any specific discount levels or in any specific amounts.

Respectfully submitted,

Source Capital Portfolio Management Team

July 2018

SOURCE CAPITAL, INC.

Important Disclosures

On December 1, 2015, a new portfolio management team assumed management of the Fund and the Fund transitioned to a balanced strategy. Performance prior to December 1, 2015 reflects the performance of the prior portfolio manager and investment strategy and is not indicative of performance for any subsequent periods.

Performance data quoted represents past performance, which is no guarantee of future results. Current performance may vary from the performance quoted. The Fund is managed according to its investment strategy which may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark(s). Overall Fund performance, characteristics and volatility may differ from the benchmark(s) shown.

The views expressed herein and any forward-looking statements are as of the date of this publication and are those of the portfolio management team. Future events or results may vary significantly from those expressed and are subject to change at any time in response to changing circumstances and industry developments. This information and data has been prepared from sources believed reliable, but the accuracy and completeness of the information cannot be guaranteed and is not a complete summary or statement of all available data.

Portfolio composition will change due to ongoing management of the Fund. References to individual securities are for informational purposes only and should not be construed as recommendations by the Fund or the portfolio managers. It should not be assumed that future investments will be profitable or will equal the performance of the security examples discussed. Please visit our website, www.sourcecapitalinc.com, for a complete list of portfolio holdings.

Investing in closed-end funds involves risk, including loss of principal. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. In addition, there is no guarantee the Fund's investment objectives will be achieved. You should consider the Fund's investment objectives, risks, and charges and expenses carefully before you invest.

Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. It is important to remember that there are risks inherent in any investment and there is no assurance that any investment or asset class will provide positive performance over time.

Non-U.S. investing presents additional risks, such as the potential for adverse political, currency, economic, social or regulatory developments in a country, including lack of liquidity, excessive taxation, and differing legal and accounting standards. Non-U.S. securities, including American Depository Receipts (ADRs) and other depository receipts, are also subject to interest rate and currency exchange rate risks.

The return of principal in a fund that invests in fixed income securities is not guaranteed. The Fund's investments in fixed income securities have the same issuer, interest rate, inflation and credit risks that are associated with underlying bonds owned by the Fund. Lower rated bonds, convertible securities and other types of debt obligations involve greater risks than higher rated bonds.

When interest rates go up, the value of fixed income securities, such as bonds, typically go down and investors may lose principal value. Credit risk is the risk of loss of principle due to the issuer's failure to repay a loan. Generally, the lower the quality rating of a security, the greater the risk that the issuer will fail to pay interest fully and return principal in a timely manner. If an issuer defaults, the security may lose some or all its value.

Mortgage securities and collateralized mortgage obligations (CMOs) are subject to prepayment risk and the risk of default on the underlying mortgages or other assets; such derivatives may increase volatility. Convertible securities are generally not investment grade and are subject to greater credit risk than higher-rated investments. High yield securities can be volatile and subject to much higher instances of default. The Fund may experience increased costs, losses and delays in liquidating underlying securities should the seller of a repurchase agreement declare bankruptcy or default.

Value style investing presents the risk that the holdings or securities may never reach their full market value because the market fails to recognize what the portfolio management team considers the true business value or because the portfolio management team has misjudged those values. In addition, value style investing may fall out of favor and underperform growth or other styles of investing during given periods.

Index Definitions

S&P 500 Index includes a representative sample of 500 leading companies in leading industries of the U.S. economy. The index focuses on the large-cap segment of the market, with over 80% coverage of U.S. equities, but is also considered a proxy for the total market.

The Barclays U.S. Aggregate Bond Index provides a measure of the performance of the U.S. investment grade bonds market, which includes investment grade U.S. Government bonds, investment grade corporate bonds, mortgage pass-through securities and asset-backed securities that are publicly offered for sale in the United States. The securities in the Index must have at least 1-year remaining in maturity. In addition, the securities must be denominated in U.S. dollars and must be fixed rate, nonconvertible, and taxable.

SOURCE CAPITAL, INC.

60% S&P 500/40% Barclays Aggregate Index is a hypothetical combination of unmanaged indices comprised of 60% S&P 500 Index and 40% Barclays U.S. Aggregate Bond Index, representing the Fund's neutral mix of 60% stocks and 40% bonds.

Indices are unmanaged, do not reflect any commissions or fees which would be incurred by an investor purchasing the underlying securities. Investors cannot invest directly in an index.

You can obtain additional information by visiting the website at www.fpa.com, by email at crm@fpa.com, toll free by calling 1-800-279-1241 (option 1), or by contacting the Fund in writing.

The discussion of Fund investments represents the views of the Fund's managers at the time of this report and are subject to change without notice. References to individual securities are for informational purposes only and should not be construed as recommendations to purchase or sell individual securities. While the Fund's managers believe that the Fund's holdings are value stocks, there can be no assurance that others will consider them as such. Further, investing in value stocks presents the risk that value stocks may fall out of favor with investors and underperform growth stocks during given periods.

The Russell 2500 Index is an unmanaged index comprised of the 2,500 smallest companies in the Russell 3000 Index. The Russell 3000 Index measures the performance of the 3,000 largest U.S. companies based on total market capitalization. The S&P 500 Index is an index of 500 companies with large market capitalization.

FORWARD LOOKING STATEMENT DISCLOSURE

As managers, one of our responsibilities is to communicate with shareholders in an open and direct manner. Insofar as some of our opinions and comments in our letters to shareholders are based on our current expectations, they are considered "forward-looking statements," which may or may not be accurate over the long term. While we believe we have a reasonable basis for our comments and have confidence in our opinions, actual results may differ materially from those we anticipate. You can identify forward-looking statements by words such as "believe," "expect," "may," "anticipate," and other similar expressions when discussing prospects for particular portfolio holdings and/or the markets, generally. We cannot, however, assure future results and disclaim any obligation to update or alter any forward-looking statements, whether as a result of new information, future events, or otherwise. Further, information provided in this report should not be construed as a recommendation to purchase or sell any particular security.

(a) Non-income producing security.

(b) Variable/Floating Rate Security The rate shown is based on the latest available information as of June 30, 2018. For Senior Loan Notes, the rate shown may represent a weighted average interest rate. Certain variable rate securities are not based on a published rate and spread but are determined by the issuer or agent and are based on current market conditions. These securities do not indicate a reference rate and spread in their description.

(c) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, typically only to qualified institutional buyers. Unless otherwise indicated, these securities are not considered to be illiquid.

(d) Investments categorized as a significant unobservable input (Level 3) (See Note 6 of the Notes to Financial Statements).

(e) Step Coupon Coupon rate increases in increments to maturity. Rate disclosed is as of June 30, 2018.

(f) Restricted securities. These restricted securities constituted 1.05% of total net assets at June 30, 2018, most of which are considered liquid by the Adviser. These securities are not registered and may not be sold to the public. There are legal and/or contractual restrictions on resale. The Fund does not have the right to demand that such securities be registered. The values of these securities are determined by valuations provided by pricing services, brokers, dealers, market makers, or in good faith under policies adopted by authority of the Fund's Board of Directors.

(g) These securities have been valued in good faith under policies adopted by authority of the Board of Director in accordance with the Fund's fair value procedures. These securities constituted 0.00% of total net assets at June 30, 2018.

See notes to financial statements.

SOURCE CAPITAL, INC.
NOTES TO FINANCIAL STATEMENTS

(Unaudited)

NOTE 1 Significant Accounting Policies

Source Capital, Inc. (the "Fund"), is registered under the Investment Company Act of 1940 as a diversified, closed-end management investment company. The investment objective of the Fund is to seek maximum total return for Common shareholders from both capital appreciation and investment income to the extent consistent with protection of invested capital. The Fund qualifies as an investment company pursuant to Financial Accounting Standard Board (FASB) Accounting Standards Codification (ASC) No. 946, Financial Services Investment Companies. The significant accounting policies followed by the Fund in the preparation of its financial statements include the following:

A. Security Valuation

The Fund's investments are reported at fair value as defined by accounting principles generally accepted in the United States of America, ("U.S. GAAP"). The Fund generally determines its net asset value as of approximately 4:00 p.m. New York time each day the New York Stock Exchange is open. Further discussion of valuation methods, inputs and classifications can be found under Disclosure of Fair Value Measurements.

B. Use of Estimates

The preparation of the financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported. Actual results could differ from those estimates.

C. Securities Transactions and Related Investment Income

Securities transactions are accounted for on the date the securities are purchased or sold. Dividend income and distributions to shareholders are recorded on the ex-dividend date. Interest income and expenses are recorded on an accrual basis. The books and records of the Fund are maintained in U.S. dollars as follows: (1) the foreign currency market value of investment securities, and other assets and liabilities stated in foreign currencies, are translated using the daily spot rate; and (2) purchases, sales, income and expenses are translated at the rate of exchange prevailing on the respective dates of such transactions. The resultant exchange gains and losses are included in net realized or net unrealized gain (loss) in the statement of operations. Distributions payable on the Common Stock are recorded on the ex-dividend date.

NOTE 2 Risk Considerations

Investing in the Fund may involve certain risks including, but not limited to, those described below.

Market Risk: Because the values of the Fund's investments will fluctuate with market conditions, so will the value of your investment in the Fund. You could lose money on your investment in the Fund or the Fund could underperform other investments.

Common Stocks and Other Securities (Long): The prices of common stocks and other securities held by the Fund may decline in response to certain events taking place around the world, including; those directly involving companies whose securities are owned by the Fund; conditions affecting the general economy; overall market changes; local,

regional or global political, social or economic instability; and currency, interest rate and commodity price fluctuations. In addition, the emphasis on a value-oriented investment approach by the Fund's investment adviser, First Pacific Advisors, LLC ("Adviser"), generally results in the Fund's portfolio being invested primarily in medium or smaller sized companies. Smaller companies may be subject to a greater degree of change in earnings and business prospects than larger, more established companies, and smaller companies are often more reliant on key products or personnel than larger companies. Also, securities of smaller companies are traded in lower volumes than those issued by larger companies and may be more volatile than those of larger companies. The Fund's foreign investments are subject to additional risks such as, foreign markets could go down or prices of the Fund's foreign investments could go down because of unfavorable changes in foreign currency exchange rates, foreign government actions, social, economic or political instability or other factors that can adversely affect investments in foreign countries. These factors can also make foreign securities less liquid, more volatile and harder to value than U.S. securities. In light of these characteristics of smaller companies and their securities, the Fund may be subjected to greater risk than that assumed when investing in the equity securities of larger companies

Interest Rate and Credit Risk: The values of, and the income generated by, most debt securities held by the Fund may be affected by changing interest rates and by changes in the effective maturities and credit rating of these securities. For example, the value of debt securities in the Fund's portfolio generally will decline when interest rates rise and increase when interest rates fall. In addition, falling interest rates may cause an issuer to redeem, call or refinance a security before its stated maturity, which may result in the Fund having to reinvest the proceeds in lower yielding securities. Debt securities are subject to credit risk, meaning that the issuer of the debt security may default or fail to make timely payments of principal or interest. The values of any of the Fund's investments may also decline in response to events affecting the issuer or its credit rating. The lower rated debt securities in which the Fund may invest are considered speculative and are generally subject to greater volatility and risk of loss than investment grade securities, particularly in deteriorating economic conditions.

NOTES TO FINANCIAL STATEMENTS (Continued)

(Unaudited)

Repurchase Agreements: Repurchase agreements permit the Fund to maintain liquidity and earn income over periods of time as short as overnight. Repurchase agreements held by the Fund are fully collateralized by U.S. Government securities, or securities issued by U.S. Government agencies, or securities that are within the three highest credit categories assigned by established rating agencies (Aaa, Aa, or A by Moody's or AAA, AA or A by Standard & Poor's) or, if not rated by Moody's or Standard & Poor's, are of equivalent investment quality as determined by the Adviser. Such collateral is in the possession of the Fund's custodian. The collateral is evaluated daily to ensure its market value equals or exceeds the current market value of the repurchase agreements including accrued interest. In the event of default on the obligation to repurchase, the Fund has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation.

The Fund may enter into repurchase agreements, under the terms of a Master Repurchase Agreement ("MRA"). The MRA permits the Fund, under certain circumstances including an event of default (such as bankruptcy or insolvency), to offset payables and/or receivables under the MRA with collateral held and/or posted to the counterparty and create one single net payment due to or from the Fund. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against such a right of offset in the event of a MRA counterparty's bankruptcy or insolvency. Pursuant to the terms of the MRA, the Fund receives securities as collateral with a market value in excess of the repurchase price to be received by the Fund upon the maturity of the repurchase transaction. Upon a bankruptcy or insolvency of the MRA counterparty, the Fund recognizes a liability with respect to such excess collateral to reflect the Fund's obligation under bankruptcy law to return the excess to the counterparty. Repurchase agreements outstanding at the end of the period are listed in the Fund's Portfolio of Investments.

NOTE 3 Capital Stock

The Fund did not issue any shares of Common Stock under its Dividend Reinvestment Plan for shareholders during the period ended June 30, 2018. During the year ended period ended June 30, 2018, the Fund repurchased 6,563 of its outstanding shares at a weighted-average discount of 10.75% from net asset value per share. These repurchases were made pursuant to the stock repurchase program approved annually by the Fund's Board of Directors. Under the program, the Fund is authorized to make open-market repurchases of its common stock of up to 10% of the Fund's outstanding shares. The Fund expects to repurchase its common stock when the discount to NAV of the trading price of its common stock on the NYSE is greater than 10%, subject to various factors, including the ability of the Fund to raise cash to repurchase shares in a tax-efficient manner.

NOTE 4 Advisory Fees and Other Affiliated Transactions

Pursuant to an investment advisory agreement (the "Agreement"), the Fund pays the Adviser, monthly investment advisory fees calculated at an annual rate of 0.725% for the first \$100 million of total net assets, 0.700% for the next \$100 million of total net assets, and 0.675% for any total net assets in excess of \$200 million. The Agreement obligates the Adviser to reduce its fee to the extent necessary to reimburse the Fund for any annual expenses (exclusive of interest, taxes, the cost of brokerage and research services, legal expenses related to portfolio securities, and extraordinary expenses such as litigation) in excess of 1 $\frac{1}{2}$ % of the first \$30 million and 1% of the remaining average net assets of the Fund for the year.

For the period ended June 30, 2018, the Fund paid aggregate fees and expenses of \$80,789 to all Directors who are not affiliated persons of the Adviser.

NOTE 5 Federal Income Tax

No provision for federal income tax is required because the Fund has elected to be taxed as a "regulated investment company" under the Internal Revenue Code (the "Code") and intends to maintain this qualification and to distribute each year to its shareholders, in accordance with the minimum distribution requirements of the Code, its taxable net investment income and taxable net realized gains on investments.

Cost of purchases of investment securities (excluding short-term investments) aggregated \$121,095,690 for the period ended June 30, 2018. The proceeds and cost of securities sold resulting in net realized gains of \$14,460,641 aggregated \$113,954,280 and \$99,493,639, respectively, for the period ended June 30, 2018. Realized gains or losses are based on the specific identification method.

The cost of investment securities held at June 30, 2018, was \$337,011,190 for federal income tax purposes. Gross unrealized appreciation and depreciation for all investments (excluding short-term investments) at June 30, 2018, for federal income tax purposes was \$44,674,171 and \$7,558,821, respectively resulting in net unrealized appreciation of \$37,115,350. As of and during the period ended June 30, 2018, the Fund did not have any liability for unrecognized tax benefits. The Fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statement of Operations. During the year, the Fund did not incur any interest or penalties. The Fund is not subject to examination by U.S. federal tax authorities for years ended on or before December 31, 2014 or by state tax authorities for years ended on or before December 31, 2013.

NOTE 6 Disclosure of Fair Value Measurements

The Fund uses the following methods and inputs to establish the fair value of its assets and liabilities. Use of particular methods and inputs may vary over time based on availability and relevance as market and economic conditions evolve.

SOURCE CAPITAL, INC.
NOTES TO FINANCIAL STATEMENTS (Continued)

(Unaudited)

Equity securities are generally valued each day at the official closing price of, or the last reported sale price on, the exchange or market on which such securities principally are traded, as of the close of business on that day. If there have been no sales that day, equity securities are generally valued at the last available bid price. Securities that are unlisted and fixed-income and convertible securities listed on a national securities exchange for which the over-the-counter ("OTC") market more accurately reflects the securities' value in the judgment of the Fund's officers, are valued at the most recent bid price. However, most fixed income securities are generally valued at prices obtained from pricing vendors and brokers. Vendors value such securities based on one or more of the following inputs: transactions, bids, offers quotations from dealers and trading systems, spreads and other relationships observed in the markets among comparable securities, benchmarks, underlying equity of the issuer, and proprietary pricing models such as cash flows, financial or collateral performance and other reference data (includes prepayments, defaults, collateral, credit enhancements, and interest rate volatility). Short-term corporate notes with maturities of 60 days or less at the time of purchase are valued at amortized cost

Securities for which representative market quotations are not readily available or are considered unreliable by the Adviser are valued as determined in good faith under procedures adopted by the authority of the Fund's Board of Directors. Various inputs may be reviewed in order to make a good faith determination of a security's value. These inputs include, but are not limited to, the type and cost of the security; contractual or legal restrictions on resale of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; significant events occurring after the close of trading in the security; and changes in overall market conditions. Fair valuations and valuations of investments that are not actively trading involve judgment and may differ materially from valuations of investments that would have been used had greater market activity occurred.

The Fund classifies its assets based on three valuation methodologies. Level 1 values are based on quoted market prices in active markets for identical assets. Level 2 values are based on significant observable market inputs, such as quoted prices for similar assets and quoted prices in inactive markets or other market observable inputs as noted above including spreads, cash flows, financial performance, prepayments, defaults, collateral, credit enhancements, and interest rate volatility. Level 3 values are based on significant unobservable inputs that reflect the Fund's determination of assumptions that market participants might reasonably use in valuing the assets. The valuation levels are not necessarily an indication of the risk associated with investing in those securities. The following table presents the valuation levels of the Fund's investments as of June 30, 2018:

Investments	Level 1	Level 2	Level 3	Total
Common Stocks				
Internet Media	\$32,556,824	\$	\$	\$32,556,824
