Indicate by check mark whether the registrant files or will file annual reports under cover Form 20-F or Form 40-F.

Form 20-F

Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

**Note:** Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

**Note:** Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's home country), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether by furnishing the information contained in this Form, the registrant is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

**FOR IMMEDIATE RELEASE**

**Oncolytics Biotech Inc. Announces Conclusion of Patient Follow Up in  
Canadian Phase I Recurrent Malignant Glioma Clinical Trial**

**CALGARY, AB, January 17, 2006** Oncolytics Biotech Inc. ( Oncolytics ) (TSX:ONC, NASDAQ:ONCY) announced today that the six-month follow up period has been concluded for patients in its Phase I Canadian recurrent malignant glioma clinical trial. As reported in October 2005, intratumoural administration of reovirus was well tolerated by the patients and a maximum tolerated dose was not reached. Surviving patients continue to be monitored and data analysis is ongoing.

We intend to continue to investigate REOLYSIN<sup>®</sup> as a monotherapy in our U.S. Phase I/II malignant glioma clinical trial, employing an alternative delivery method, said Dr. Brad Thompson, President and CEO of Oncolytics. We are also considering the potential use of REOLYSIN<sup>®</sup> in combination with both the chemotherapeutics and radiation therapy that are the current standards of care for malignant glioma.

The study examined the use of a single, intratumoural injection of REOLYSIN<sup>®</sup>, delivered using imaging-guided surgery, in patients with malignant gliomas that had recurred despite other treatments, including surgery and radiation therapy. A total of 12 patients were treated in the study at dosages of 10<sup>7</sup>, 10<sup>8</sup>, and 10<sup>9</sup> TCID<sub>50</sub> in a delivery volume of 0.9 ml.

**About Oncolytics Biotech Inc.**

Oncolytics is a Calgary-based biotechnology company focused on the development of REOLYSIN<sup>®</sup>, its proprietary formulation of the human reovirus, as a potential cancer therapeutic. Oncolytics researchers have demonstrated that the reovirus is able to selectively kill cancer cells and, *in vitro*, kill human cancer cells that are derived from many types of cancer including breast, bladder, prostate, pancreatic and brain tumours, and have also demonstrated successful cancer treatment results in a number of animal models. Previous Phase I clinical trial results have indicated that REOLYSIN<sup>®</sup> was well tolerated and that the reovirus demonstrated activity in tumours injected with REOLYSIN<sup>®</sup>.

*This press release contains forward-looking statements, within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements, including the Company's expectations related to the results of the Canadian Phase I recurrent malignant glioma clinical trial and the US Phase I/II trial investigating delivery of REOLYSIN<sup>®</sup> for recurrent malignant gliomas, and the Company's belief as to the potential of REOLYSIN<sup>®</sup> as a cancer therapeutic, involve known and unknown risks and uncertainties, which could cause the Company's actual results to differ materially from those in the forward-looking statements. Such risks and uncertainties include, among others, the availability of funds and resources to pursue research and development projects, the efficacy of REOLYSIN<sup>®</sup> as a cancer treatment, the success and timely completion of clinical studies and trials, the Company's ability to successfully commercialize REOLYSIN<sup>®</sup>, uncertainties related to the research and development of pharmaceuticals, uncertainties related to the regulatory process and general changes to the*
