Forward-Looking Statements

The information in this Report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such statements are based upon current expectations, assumptions, estimates and projections about Travelzoo Inc. and our industry. These forward-looking statements are subject to the many risks and uncertainties that exist in our operations and business environment that may cause actual results, performance or achievements of Travelzoo to be different from those expected or anticipated in the forward-looking statements. Any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. For example, words such as “may”, “will”, “should”, “estimates”, “predicts”, “potential”, “continue”, “strategy”, “believes”, “anticipates”, “plans”, “expects”, “intends”, and expressions are intended to identify forward-looking statements. Travelzoo's actual results and the timing of certain events could differ significantly from those anticipated in such forward-looking statements. Factors that might cause or contribute to such a discrepancy include, but are not limited to, those discussed in this Report in Part I Item 1A and the risks discussed in our other Securities and Exchange Commission (“SEC”) filings. The forward-looking statements included in this Report reflect the beliefs of our management on the date of this Report. We undertake no obligation to update publicly any forward-looking statements for any reason, even if new information becomes available or other events or circumstances occur in the future.

Item 1. Business

Overview

Travelzoo Inc. (the “Company” or “Travelzoo”) is a global Internet media company. We inform over 27 million members in North America, Europe and Asia Pacific, as well as millions of website users, about the best travel, entertainment and local deals available from thousands of companies. Our deal experts source, research and test-book offers, recommending only those that meet Travelzoo's rigorous quality standards. We provide travel, entertainment, and local businesses with a fast, flexible, and cost effective way to reach millions of consumers. Our revenues are generated primarily from advertising fees. In Asia Pacific, the Travelzoo business is operated by Travelzoo (Asia) Limited and Travelzoo Japan K.K. under a license agreement with Travelzoo Inc. and is not owned by the Company. We attract a high-quality audience of travel and leisure enthusiasts across multiple digital platforms, including e-mail, web, social media and mobile applications. We inform our audience about travel, entertainment and local deals available at over 2,000 companies. Over 27 million members receive our e-mail newsletters, published in 11 countries worldwide, including those in Asia Pacific where our brand is operated under a license. Travelzoo's website is visited by 9.0 million unique visitors each month. We reach an audience of over 60 million Internet users each month via the Travelzoo Network, a network of websites that syndicate our deal content, including The Los Angeles Times and The Chicago Tribune. We have over 2.2 million followers on Facebook and Twitter. Our mobile applications have been downloaded 3.4 million times.

Our publications and products include the Travelzoo websites (www.travelzoo.com, www.travelzoo.ca, www.travelzoo.co.uk, www.travelzoo.de, www.travelzoo.es, www.travelzoo.fr, among others), the Travelzoo iPhone and Android applications, the Travelzoo Top 20 e-mail newsletter, and the Newsflash e-mail alert service. We operate SuperSearch, a pay-per-click travel search tool, and the Travelzoo Network, a network of third-party websites that list deals published by Travelzoo. Our Travelzoo websites include Local Deals and Getaway listings that allow our members to purchase vouchers for deals from local businesses such as spas, hotels and restaurants. We receive a percentage of the face value of the voucher from the local businesses. We also operate Fly.com, a travel search engine that allows users to quickly and easily find the best prices on flights from hundreds of airlines and online travel agencies.

In 2009, we sold our Asia Pacific operating segment to Azzurro Capital Inc. and its wholly-owned subsidiaries, Travelzoo (Asia) Limited and Travelzoo Japan K.K. We have not had significant ongoing involvement with the operations of the Asia Pacific operating segment and have not had material economic interests in the Asia Pacific operating segment since the completion of the sale. Starting November 1, 2009, the Travelzoo websites in Asia Pacific (cn.travelzoo.com, www.travelzoo.co.jp, www.travelzoo.com.au, www.travelzoo.com.hk, www.travelzoo.com.tw, among others), the Travelzoo iPhone and Android applications in Asia Pacific, the Travelzoo Top 20 e-mail

newsletters in Asia Pacific and the Newsflash e-mail alert service in Asia Pacific have been published by Travelzoo (Asia) Limited and Travelzoo Japan K.K., under a license agreement with the Company. There is a reciprocal revenue-sharing agreement among the entities operating the Travelzoo business in Asia Pacific and the Company related to cross-selling audiences.

More than 2,000 companies use our services, including Air New Zealand, Apple Vacations, British Airways, Expedia, Fairmont Hotels and Resorts, Hawaiian Airlines, Iceland Air, InterContinental Hotels Group, Interstate Hotels & Resorts, Key Tours International, Liberty Travel, Princess Cruises, Starwood Hotels & Resorts Worldwide, Travelocity, United Airlines, and Virgin America.

Our revenues are advertising revenues, consisting primarily of listing fees paid by travel, entertainment and local businesses to advertise their offers on Travelzoo's media properties. Listing fees are based on audience reach, placement, number of listings, number of impressions, number of click-throughs, number of referrals, or percentage of the face value of vouchers sold. Insertion orders are typically for periods between one month and twelve months and are not automatically renewed. Merchant agreements for Local Deals and Getaway advertisers are typically for twelve months and are not automatically renewed.

We have two operating segments based on geographic regions: North America and Europe. North America consists of our operations in Canada and the U.S. Europe consists of our operations in France, Germany, Spain, and the U.K. For the year ended December 31, 2014, European operations were 33% of revenues. Financial information with respect to our business segments and certain financial information about geographic areas appears in Note 12 to the accompanying consolidated financial statements.

Our principal business office is located at 590 Madison Avenue, 37th Floor, New York, New York 10022.

Ralph Bartel, who founded Travelzoo and who is a Director of the Company, is the sole beneficiary of the Ralph Bartel 2005 Trust, which is the controlling shareholder of Azzurro Capital Inc. As of December 31, 2014, Azzurro is the Company's largest stockholder, holding approximately 49.1% of the outstanding shares. Azzurro currently holds a proxy given to it by Holger Bartel, a director of the Company and brother of Ralph Bartel, that provides it with a total of 50.4% of the voting power.

As of December 31, 2014, there were 14,730,454 shares of common stock outstanding.

The Company was formed as a result of a combination and merger of entities founded by the Company's principal stockholder, Ralph Bartel. In 1998, Mr. Bartel founded Travelzoo.com Corporation, a Bahamas corporation, which issued approximately 5 million shares via the Internet to approximately 700,000 "Netsurfer stockholders" for no cash consideration, but subject to certain prerequisite qualifications. In April 2002, Travelzoo.com Corporation was merged into Travelzoo Inc. Holders of promotional shares of Travelzoo.com Corporation who established they had satisfied certain prerequisite qualifications were allowed a period of two years following the effective date to receive one share of Travelzoo Inc. in exchange for each share of common stock of Travelzoo.com Corporation. After April 2004, two years following the effective date, the Company ceased issuing shares to the former stockholders of Travelzoo.com Corporation; and therefore, no additional shares are reserved for issuance to any former stockholders, because their right to receive shares has now expired. Thereafter, the Company began to offer a voluntary cash program for those who established that they had satisfied certain prerequisite qualifications for Netsurfer promotional shares as further described below. On April 25, 2004, the number of shares reported as outstanding was reduced from 19,425,147 to 15,309,615 to reflect actual shares issued as of the expiration date. Earnings per share calculations reflect this reduction of the number of shares reported as outstanding.

Since completion of the merger in April 2004, most states have made claims that the former "Netsurfer stockholders" of Travelzoo.com Corporation, which remained unexchanged by April 2004, represent unclaimed property subject to escheatment to the states. Although the Company's position is that such shares were a promotional incentive and were issuable only to persons who established their eligibility as stockholders in the 2002 merger, the Company determined that it was in its best interest to seek to resolve these claims made by various states.

In April 2011, the Company entered into an agreement which required a \$20.0 million cash payment to the State of Delaware resolving all claims relating to the State of Delaware's unclaimed property review, which related primarily to the Company's unexchanged promotional shares contingency. In addition, based on multiple other state claims and settlements with the Company regarding the unexchanged promotional shares contingency, the Company recorded a \$3.0 million and \$22.0 million charge in the years ended December 31, 2012 and 2013, respectively. The Company made cash payments of \$12.3 million to the settled states after completion of the required due diligence in the year ended December 31, 2013. During the year December 31, 2014, the Company made cash payments of \$3.7 million to settled states after completion of the required due diligence. During the year ended December 31, 2014, the Company settled with the remaining states and released \$7.6 million of the reserve related to potential settlements with the remaining states in connection with unexchanged promotional shares based upon the actual settlements with the remaining states. The Company has maintained estimated reserves related to the remaining settled states, which will be paid after completion of the required due diligence during the three months ending March 31, 2015.

Although the Company has settled the states unclaimed property claims with all states, the Company may still receive inquiries from certain potential Netsurfer promotional stockholders that had not provided their state of residence to the Company by April 25, 2004. Therefore, the Company is continuing its voluntary program under which it makes cash payments to individuals related to the promotional shares for individuals whose residence was unknown by the Company and who establish that they satisfied the original conditions required for them to receive shares of Travelzoo.com Corporation, and who failed to submit requests to convert their shares into shares of Travelzoo Inc. within the required time period. This voluntary program is not available for individuals whose promotional shares have been escheated to a state by the Company, except those individuals for which their residence was unknown to the Company. The accompanying consolidated financial statements include a charge for payments under this voluntary program in general and administrative expenses of \$6,000 for the year ended December 31, 2014. See Note 1 to the accompanying consolidated financial statements for further information on the unexchanged promotional shares and related cash program.

Travelzoo is listed on the NASDAQ Global Select Market under the symbol "TZOO."

Our Industry

Our mission is to provide our audience with the highest quality information about the best travel, entertainment and local deals. We believe there is a sizable travel and entertainment industry that we participate in that provides an opportunity to find high quality deals for our members and users. Direct spending on leisure travel in the United States by domestic and international travelers totaled \$621.4 billion in 2013 and 78% of the domestic trips were taken for leisure purposes, according to the U.S. Travel Association. Direct spending on leisure travel in Europe by domestic and international travelers totaled \$663.7 billion in 2013 and 76% of the spending was for leisure purposes, according to the World Travel & Tourism Council. In addition, we believe that we are well positioned with our operations in North America and Europe to capture high quality deals for our members and users.

While our mission is to provide our audience with the highest quality information about the best travel, entertainment and local deals, our revenues are generated from advertising fees. According to the Kelsey Group's (BIA/Kelsey) new U.S. Local Media Forecast 2015, BIA/Kelsey forecasts total local media revenues to reach \$139.3 billion in 2015.

Online/digital will account for more than one-quarter (25.2 percent) of total local media revenues in 2015. Revenues for online/digital are expected to grow from \$31 billion in 2014 to \$35 billion in 2015, representing a 13.1 percent growth rate. We believe that traditional media outlets such as newspapers, television and radio continue to be another medium for travel, entertainment and local businesses to advertise their offers, though the percentage spent on advertising in these traditional media outlets is decreasing. In addition, the continued rise in smart phones has changed the ground rules for online marketing, with the consumption of online advertising rapidly moving to mobile devices. BIA/Kelsey anticipates that mobile local advertising revenues will grow from \$4.3 billion in 2014 to \$6.6 billion in 2015 and local social media revenues will grow from \$2.5 billion in 2014 to \$3.6 billion in 2015.

We believe that several factors are causing and will continue to cause travel, entertainment and local businesses to increase their spending on Internet and mobile advertising of offers:

The Internet Is Consumers' Preferred Information Source. Market research shows that the Internet has become consumers' preferred information source for travel.

Benefits of Internet Advertising vs. Print, TV and Radio Advertising. Internet advertising provides advertisers advantages compared to traditional advertising. These advantages include real-time listings, real-time updates, and performance tracking. See "Benefits to Travel, Entertainment and Local Businesses" below.

New Advertising Opportunities. The Internet allows advertisers to advertise their sales and specials in a fast, flexible, and cost-effective manner that has not been possible before.

Suppliers Selling Directly. We believe that many travel suppliers prefer to sell directly to consumers through suppliers' websites versus selling through travel agents. Internet advertising attracts consumers to suppliers' websites. Mobile advertising extends our products and services by providing mobile-specific features to mobile device users. Mobile advertising is still in its early stage, though mobile devices are quickly becoming the world's newest gateway for information. We are focused on developing easy-to-use mobile applications to help advertisers extend their reach, help create revenue opportunities for our customers, and deliver relevant and useful ads to users on the go. We continue to invest in improving users' access to our services through such devices.

Problems Travel, Entertainment and Local Businesses Face and Limitations of Newspaper, TV and Radio Advertising
We believe that travel, entertainment and local businesses often face the challenge of being able to effectively and quickly market and sell their excess inventory (i.e. airline seats, hotel rooms, cruise cabins, theater seats, spa appointments or restaurant seats that are likely to be unfilled). The success of marketing excess inventory can have a substantial impact on a company's profitability. Almost all costs of these services are fixed. That is, the costs do not vary significantly with sales. A relatively small amount of unsold inventory can have a significant impact on the profitability of a company.

We believe that travel, entertainment and local businesses need a fast, flexible, and cost-effective solution for marketing excess inventory. The solution must be fast, because services are a quickly expiring commodity. The period between the time when a company realizes that there is excess inventory and the time when the service has become worthless is very short. The solution must be flexible, because the demand for excess inventory is difficult to forecast. It is difficult for travel, entertainment and local businesses to price excess inventory and to forecast the marketing effort needed to sell excess inventory. The marketing must be cost-effective, because excess inventory is often sold at highly discounted prices, which lowers margins.

We believe that newspaper, TV and radio advertising, with respect to advertising excess inventory, suffers from a number of limitations which do not apply to the Internet:

- typically, ads must be submitted 2 to 5 days prior to the publication or airing date, which makes it difficult to advertise last-minute inventory;

- once an ad is published, it cannot be updated or deleted when an offer is sold out;

- once an ad is published, the company cannot change a price or offer;

- in many markets, the small number of newspapers, television companies, radio stations and other print media reduces competition, resulting in high rates for traditional advertising; and

- offline advertising does not allow for detailed performance tracking;

- creative content can be very expensive to develop.

Our Products and Services

We provide airlines, hotels, cruise lines, vacation packagers, other travel suppliers, entertainment and local businesses with a fast, flexible, and cost-effective way to reach millions of Internet users. Our publications include the Travelzoo websites, the Travelzoo Top 20 e-mail newsletter, the Newsflash e-mail alert service, and the Local Deals and Getaway e-mail alert services. We operate SuperSearch, a pay-per-click travel search tool and the Travelzoo Network, a network of third-party websites that list deals published by Travelzoo. We also operate Fly.com, a travel search engine that enables users to find and compare the best flight options from multiple sources, including airline and online travel agency websites. While our products provide advertising opportunities for travel, entertainment and local businesses, they also provide Internet users with a free source of information on current sales and specials from thousands of travel, entertainment and local businesses.

As travel, entertainment and local businesses increasingly utilize the Internet to promote their offers, we believe that our products will enable them to take advantage of the lower cost and real-time communication enabled by the Internet. Our listing management software allows our advertisers to add, update, and delete special offer listings on a real-time basis. Our software also provides our advertisers with real-time performance tracking, enabling them to optimize their marketing campaigns. Mobile advertising extends our products and services by providing mobile-specific features to mobile device users. We are focused on developing easy-to-use mobile applications to help advertisers extend their reach, help create revenue opportunities for our customers, and deliver relevant and useful ads to users on the go. We continue to invest in improving users' access to our services through such devices. In addition, we are in the process of developing a hotel booking platform that will facilitate our users to more easily book stays at hotel deals we present on our website and mobile devices.

Edgar Filing: TRAVELZOO INC - Form 10-K

The following table presents an overview of our products:

Product	Content	Publication Schedule	Reach/Usage*	Advertiser Benefits	Consumer Benefits
Travelzoo websites	Websites in the U.S., Canada, France, Germany, Spain, and the U.K. listing thousands of outstanding sales and specials from more than 2,000 travel, entertainment and local businesses	24/7	9.0 million unique visitors per month	Broad reach, sustained exposure, targeted placements by destination and travel segment	24/7 access to deals, ability to search and browse by destination or keyword
Travelzoo Top 20	Popular e-mail newsletter listing 20 of the week's most outstanding deals	Weekly	23.0 million members	Mass "push" advertising vehicle to quickly stimulate incremental travel and entertainment purchases	Weekly access to 20 outstanding, handpicked deals chosen from among thousands
Newsflash	Regionally-targeted e-mail alert service with a single time-sensitive and newsworthy travel and entertainment offer	Within two hours of an offer being identified	22.0 million members	Regional targeting, 100% share of voice for advertiser, flexible publication schedule	Breaking news offers delivered just-in-time
Local Deals and Getaway	Locally-targeted e-mail alert service with a single time-sensitive and newsworthy offer from local merchants such as spas and restaurants	Twice per week in active markets	Over 177 local markets	Local targeting by zip code, 100% share of voice for the local businesses, flexible publication schedule	Breaking news offers delivered just-in-time
Travelzoo Network	A network of third-party websites that list outstanding deals published by Travelzoo	24/7	Over 350 third-party websites	Drives qualified users with substantial distribution beyond the Travelzoo audience	Contextually relevant travel deals that have been handpicked and professionally reviewed

Travelzoo Mobile Applications	iPhone and Android applications that allow users to discover the best Travel, Entertainment and Local Deals.	On-demand	3.4 million downloads	Allows Travel, Entertainment and Local Deals advertisers to reach our audience that is on the go.	24/7 access to Travel, entertainment and Local Deals for consumers that are on the go.
SuperSearch	Travel search tool using a proprietary algorithm to recommend sites and enable one-click searching	On-demand	2.5 million monthly searches	Drives qualified traffic directly to advertiser site on a pay-per-click basis	Saves time and money by recommending the sites most likely to have great rates for a specific itinerary
Fly.com	Travel search engine that enables users to find and compare the best flight, hotel and rental car options from multiple sources	On-demand	2.5 million monthly searches	Provides advertisers a low cost distribution channel and retention of the user engagement on the advertiser's website	Free access to real-time price comparisons from airlines and online travel agencies

For Travelzoo websites, reach information is based on data from Google Analytics. For Top 20, Newsflash, Local *Deals and Getaway, Travelzoo Network, SuperSearch, Fly.com and Travelzoo mobile applications, reach/usage information is based on internal Travelzoo statistics as of December 31, 2014.

Our Audience

We attract a high-quality audience of travel and leisure enthusiasts across multiple digital platforms, including e-mail, web, social media and mobile apps. We inform our audience about travel, entertainment and local deals available at over 2,000 companies. 27 million members receive our e-mail newsletters, published in 11 countries worldwide, including those in Asia Pacific where our brand is operated under license. Travelzoo's website is visited by 9.0 million unique visitors each month. We reach an audience of over 60 million Internet users each month via the Travelzoo Network, a network of websites that syndicate our deal content, including The Los Angeles Times and The Chicago Tribune. We have over 2.2 million followers on Facebook and Twitter. Our mobile applications have been downloaded 3.4 million times.

Benefits to Travel, Entertainment and Local Businesses

Our advertisers benefit from accessing our large high-quality audience. Due to the nature of our content, we attract an older, wealthier demographic who have a strong interest in travel and leisure.

Key features of our solution for travel and entertainment companies include:

• **Real-Time Listings of Special Offers.** Our technology allows travel and entertainment companies to advertise special offers on a real-time basis.

• **Real-Time Updates.** Our technology allows travel and entertainment companies to update their listings on a real-time basis.

• **Real-Time Performance Reports.** We provide travel and entertainment companies with real-time tracking of the performance of their advertising campaigns. Our solution enables travel and entertainment companies to optimize their campaigns by removing or updating unsuccessful listings and further promote successful listings.

• **Access to Millions of Consumers.** We provide travel and entertainment companies fast access to over 27 million travel shoppers.

• **Global Reach.** We offer access to Internet users across the U.S., Canada, France, Germany, Spain, and the U.K.

Key features of our solution for local businesses include:

• **Real-Time Listings of Special Offers.** Our technology allows local businesses to advertise special offers on a real-time basis.

• **Real-Time Performance Reports.** We provide local businesses with real-time tracking of the performance of their advertising campaigns.

• **Access to Local Consumers.** Travelzoo members submit their zip code to Travelzoo when they join Travelzoo. As a result, we are able to send Local Deals to members who live or work near the local businesses.

Benefits to Consumers

Our Travelzoo websites (www.travelzoo.com, www.travelzoo.ca, www.travelzoo.co.uk, www.travelzoo.de, www.travelzoo.es, www.travelzoo.fr, among others), Travelzoo Top 20 e-mail newsletter, Newsflash, Local Deals, Getaway, the Travelzoo Network, SuperSearch search tool, and Fly.com search engine provide consumers information on current offers at no cost to the consumer. Key features of our products include:

• **Aggregation of Offers from Many Companies.** Our Travelzoo websites and our Travelzoo Top 20 e-mail newsletter aggregate information on current offers from more than 2,000 travel, entertainment and local businesses. This saves the consumer time when searching for travel, entertainment and local deals, sales and specials.

• **Current Information.** Compared to newspaper, TV or radio advertisements, we provide consumers more current information, since our technology enables travel, entertainment and local businesses to update their listings on a real-time basis.

• **Reliable Information.** We operate a Test Booking Center[®] to check the availability of travel, entertainment and local deals before publishing.

• **Search Tools.** We provide consumers with the ability to search for specific offers.

Growth Strategy

Our growth strategy relies on building a travel and lifestyle brand with a large, high-quality user base and offering our users products that keep pace with consumer preference and technology, such as the trend towards mobile usage by consumers.

Building a travel and lifestyle brand with a large, high-quality user base. We believe that it is essential to establish a strong brand with a large, high-quality user base within the travel, entertainment and local industries we serve. We currently utilize online marketing and direct marketing to promote our brand to consumers. We utilize sponsorships at industry conferences and public relations to promote our brand. We believe that high-quality content attracts a high-quality user base.

Offering products that keep pace with consumer preference and technology. We believe it is important grow engagement of our user base, by offering products that deliver high-quality deals with exceptional value and expanding our product offering over time to address frequent travel and leisure needs, including the desire to access our content via mobile devices and to search and book hotels via a hotel booking platform.

Advertisers

As of December 31, 2014, our advertiser base included more than 2,000 travel, entertainment and local businesses, including airlines, hotels, cruise lines, vacations packagers, tour operators, destinations, car rental companies, travel agents, theater and performing arts groups, restaurants, spas, and activity companies. Some of our advertisers are:

Air New Zealand

Interstate Hotels & Resort

Atlantis, Paradise Island, Bahamas

Jet Luxury Resorts

Apple Vacations

Key Tours International

British Airways

Liberty Travel

CheapTickets

Lufthansa

Cirque du Soleil

Mandalay Bay Resort and Casino

Delta Air Lines

Online Vacation Center

Expedia

Pleasant Holidays

Fairmont Hotels and Resorts

Princess Cruises

Fareportal

Starwood Hotels & Resorts Worldwide

Hawaiian Airlines

TripAdvisor

Hong Kong Tourism Board

United Airlines

Hotwire

Vacation Express

Iceland Air

Virgin America

InterContinental Hotels Group

Windstar Cruises

As discussed in Note 12 to the accompanying consolidated financial statements, we did not have any advertisers that accounted for 10% or more of our total revenues during the years ended December 31, 2014, 2013 and 2012. The agreements with certain advertisers are in the form of multiple insertion orders and merchant agreements from groups of entities under common control. It is possible that we may have an advertiser or advertisers that account for 10% or more of our total revenues in future years because management believes there is a high concentration in the online travel agency industry.

In 2014, 67% of our total revenues were generated from our North America operations, and 33% of our total revenues were generated from our European operations. See Note 12 to the accompanying consolidated financial statements.

Sales and Marketing

As of December 31, 2014, our advertising sales force and sales support staff consisted of 142 employees worldwide. We intend to grow our advertiser base by expanding over time the size of our sales force.

We currently utilize online marketing and direct marketing to promote our brand to consumers. In addition, we utilize an online marketing program to acquire new members for our e-mail publications. We believe that we build brand awareness by product excellence that is promoted by word-of-mouth. We utilize sponsorships at industry conferences and public relations to promote our brands.

Technology

We have designed our technology to serve a large volume of Web traffic and send a large volume of e-mails in an efficient and scalable manner.

We co-locate our production servers with Equinix, Inc. (“Equinix”), a global provider of hosting, network, and application services. Equinix's facilities include features such as power redundancy, multiple egress and peering to other ISPs, fire suppression and access to our own separate physical space. We believe our arrangements with Equinix will allow us to grow without being limited by our own physical and technological capacity, and will also provide us with sufficient bandwidth for our anticipated needs. Because of the design of our websites, our users are not required to download or upload large files from or to our websites, which allows us to continue increasing the number of our visitors and page views without adversely affecting our performance or requiring us to make significant additional capital expenditures.

Our software is written using widely used standards, such as Visual Basic Script, and HTML, and interfaces with products from Microsoft and ITA software. We have generally standardized our hardware platform on HP servers and Cisco switches.

Competition

We compete for advertising dollars with large Internet portal sites such as MSN and Yahoo! that offer listings or other advertising opportunities to travel, entertainment and local businesses. We compete with search engines like Google and Bing that offer pay-per-click listings. We compete with travel meta-search engines like Kayak and online travel and entertainment deal publishers. We compete with large online travel agencies like Expedia and Priceline that also offer advertising placements and capture consumer interest. We compete with companies like Groupon and LivingSocial that sell vouchers for deals from local businesses such as spas, hotels, restaurants and activity companies. We expect to face increased competition from other Internet and technology-based businesses such as Google and Microsoft, each of which has launched initiatives which are directly competitive to our Local Deals and Getaway products. In addition, we compete with newspapers, magazines and other traditional media companies that operate websites which provide advertising opportunities. We expect to face additional competition as other established and emerging companies, including print media companies, enter our market. We believe that the primary competitive factors are price, performance and audience quality.

Many of our current and potential competitors have longer operating histories, significantly greater financial, technical, marketing and other resources and larger advertiser bases than we do. In addition, current and potential competitors may make strategic acquisitions or establish cooperative relationships to expand their businesses or to offer more comprehensive solutions.

New technologies could increase the competitive pressures that we face. The development of competing technologies by market participants or the emergence of new industry standards may adversely affect our competitive position. Competition could result in reduced margins on our services, loss of market share or less use of our products by our advertisers and consumers. If we are not able to compete effectively with current or future competitors as a result of these and other factors, our business could be materially adversely affected.

Government Regulation and Legal Uncertainties

There are increasing numbers of laws and regulations pertaining to the Internet, including laws and regulations relating to user privacy, liability for information retrieved from or transmitted over the Internet, online content regulation, and domain name registration. Moreover, the applicability to the Internet of existing laws governing issues such as intellectual property ownership and infringement, copyright, patent, trademark, trade secret, obscenity, libel and personal privacy is uncertain and developing.

Privacy Concerns. U.S. government agencies are considering adopting regulations regarding the collection and use of personal identifying information obtained from individuals when using Internet sites or e-mail services. While we have implemented and intend to implement additional programs designed to enhance the protection of the privacy of our users, these programs may not conform to any regulations which may be adopted by these agencies. In addition, these regulatory and enforcement efforts may adversely affect our ability to collect demographic and personal information from users, which could have an adverse effect on our ability to provide advertisers with demographic information. The European Union (the “EU”) has adopted a directive that imposes restrictions on the collection and use of personal data. The directive could impose restrictions that are more stringent than current Internet privacy standards in the U.S. The directive may adversely affect our operations in Europe.

Anti-Spam Legislation. The CAN-SPAM Act, a federal anti-spam law, pre-empts various state anti-spam laws and establishes a single standard for e-mail marketing and customer communications. We believe that this law, on an

overall basis, benefits our business as we do not use spam techniques or practices and may benefit now that others are prohibited from doing so.

10

Domain Names. Domain names are the user's Internet "addresses." The current system for registering, allocating and managing domain names has been the subject of litigation and of proposed regulatory reform. We have registered travelzoo.com, travelzoo.ca, travelzoo.co.jp, travelzoo.com.au, travelzoo.com.tw, travelzoo.co.uk, travelzoo.de, travelzoo.fr, travelzoo.org, travelzoo.net, weekend.com, and weekends.com, among other domain names, and have registered "Travelzoo" as a trademark in the United States, Canada, and the European Union. In January 2009, we purchased the domain name Fly.com. Because of these protections, it is unlikely, yet possible, that third parties may bring claims for infringement against us for the use of our domain name and trademark. In the event such claims are successful, we could lose the ability to use our domain names. There can be no assurance that our domain names will not lose their value, or that we will not have to obtain entirely new domain names in addition to or in lieu of our current domain names if changes in overall Internet domain name rules result in a restructuring in the current system of using domain names which include ".com," ".net," ".gov," ".edu" and other extensions.

Jurisdictions. Due to the global nature of the Internet, it is possible that, although our transmissions over the Internet originate primarily in California, the governments of other states and foreign countries might attempt to regulate our business activities. In addition, because our service is available over the Internet in multiple states and foreign countries, these jurisdictions may require us to qualify to do business as a foreign corporation in each of these states or foreign countries, which could subject us to additional taxes and other regulations.

Intellectual Property

Our success depends to a significant degree upon the protection of our brand names, including Travelzoo® and Top 20®. If we were unable to protect the Travelzoo and Top 20 brand names, our business could be materially adversely affected. We rely upon a combination of copyright, trade secret and trademark laws to protect our intellectual property rights. We have registered the Travelzoo and Top 20 trademarks, among others, with the United States Patent and Trademark Office. We have registered the Travelzoo and Travelzoo Top 20 trademarks with the Office for Harmonization in the Internal Market of the European Community. We have registered the Travelzoo trademark in Australia, Canada, China, Hong Kong, Japan, South Korea, and Taiwan. The steps we have taken to protect our proprietary rights, however, may not be adequate to deter misappropriation of proprietary information. We are defending ourselves against current patent infringement claims as described further in Note 5 to the accompanying consolidated financial statements.

We may not be able to detect unauthorized use of our proprietary information or take appropriate steps to enforce our intellectual property rights. In addition, the validity, enforceability and scope of protection of intellectual property in Internet-related industries are uncertain and still evolving. The laws of other countries in which we may market our services in the future are uncertain and may afford little or no effective protection of our intellectual property.

Employees

As of December 31, 2014, we had 438 employees in Europe and North America. None of our employees are represented under collective bargaining agreements. We consider our relations with our employees to be good.

Internet Access to Other Information

We make available free of charge, on or through our website (www.travelzoo.com), annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as well as proxy statements, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. Information included on our website does not constitute part of this report.

Item 1A. Risk Factors

Investing in our common stock involves a high degree of risk. Any or all of the risks listed below as well as other variables affecting our operating results could have a material adverse effect on our business, our quarterly and annual operating results or financial condition, which could cause the market price of our stock to decline or cause substantial volatility in our stock price, in which event the value of your common stock could decline. You should also keep these risk factors in mind when you read forward-looking statements.

Risks Related to Our Financial Condition and Business Model

We cannot assure you that we will be profitable.

In the years ended December 31, 2014, and 2012, we generated a net income of \$16.4 million and \$18.2 million, respectively. In the year ended December 31, 2013, we incurred a net loss of \$5.0 million. Although we were profitable in 2014 and 2012, there is no assurance that we will continue to be profitable in the future. We forecast our future expense levels based on our operating plans and our estimates of future revenues. We may find it necessary to significantly accelerate expenditures relating to our sales and marketing efforts or otherwise increase our financial commitment to creating and maintaining brand awareness among Internet users and advertisers. We may also make investments in our products as well as develop new products that may impact our profitability. If our revenues grow at a slower rate than we anticipate, or if our spending levels exceed our expectations or cannot be adjusted to reflect slower revenue growth, we may not generate sufficient revenues to be profitable. Any of these developments could result in a significant decrease in the trading price of our common stock.

Fluctuations in our operating results may negatively impact our stock price.

Our quarterly and annual operating results may fluctuate significantly in the future due to a variety of factors that could affect our revenues or our expenses in any particular period. You should not rely on quarter-to-quarter comparisons of our results of operations as an indication of future performance. Factors that may affect our quarterly results include:

- mismatches between resource allocation and client demand due to difficulties in predicting client demand in a new market;
- changes in general economic conditions that could affect marketing efforts generally and online marketing efforts in particular;
- the magnitude and timing of marketing initiatives, including our acquisition of new members and our expansion efforts in other regions;
- the introduction, development, timing, competitive pricing and market acceptance of our products and services and those of our competitors;
- our ability to attract and retain key personnel;
- our ability to manage our planned growth;
- our ability to attract users to our websites, which may be adversely affected by the audience shift to mobile devices;
- technical difficulties or system downtime affecting the Internet generally or the operation of our products and services specifically; and
- volatility of our operating results in new markets.

We may significantly increase our operating expenses related to advertising campaigns for the Travelzoo and Fly.com brands, as well as our hotel booking platform, for a certain period if we see a unique opportunity for a brand marketing campaign, if we find it necessary to respond to increased brand marketing by a competitor, or if we decide to accelerate our acquisition of new members.

If revenues fall below our expectations in any quarter and we are unable to quickly reduce our operating expenses in response, our operating results would be lower than expected and our stock price may fall.

Our expansion of our product offering to include Local Deals and Getaway formats and the addition of a hotel booking platform may result in additional costs that exceed revenue and may trigger additional stock volatility. During the third quarter of 2010, we launched our Local Deals format of advertising and during the second quarter of 2011, we launched our Getaway format of advertising, under which we sell vouchers directly to consumers to advertise promotional deals provided by merchants. For example, a consumer could buy a voucher for \$99 for a dinner for two at a merchant's restaurant that would normally be valued at \$199, representing a promotional value of \$100 to the consumer. This format may require investments to maintain and grow the business including additional sales force hiring, building a customer service organization, marketing, technology tracking systems and payment processing. This format, introduced to the market in recent years, has resulted in many competitors entering the marketplace, thereby creating a very competitive marketplace. This competitive landscape along with the required investments to start, maintain and grow this format create a risk that our costs may exceed our revenues in the short and long term, which may materially impact our results of operation and financial condition. Operating this format may introduce additional volatility to our stock price due to the performance of this format by the Company and/or the overall market valuations that are being determined by the market for companies operating this format of advertising. Moreover, the rate at which our existing customers purchase vouchers has declined, and may continue to decline, given, among other things, increased competition in the marketplace and the decrease in demand of consumers for voucher deals. Historically, our customers often purchased a voucher when they received our emails, even though they may not have intended to use the voucher in the near term. The growth in recent periods of competition and the marketplaces of deals has enabled customers to wait until they are ready to use the related vouchers before making purchases. This shift in purchasing behavior may adversely impact revenues. While we are continuing to evolve our strategy to address the changing market dynamics, we may not always be successful in doing so. In addition, we are in the process of expanding our hotel booking platform which may result in an increase in costs to further develop the platform in the near-term and an increase in cost structure in the long-term, which may be in excess of incremental revenue. If our hotel booking platform is not embraced by our users or our advertising partners, our business and financial results could be adversely affected. In addition, the hotel booking platform will be sensitive to fluctuations in hotel supply, occupancy and average daily rates and a fluctuation in any of these factors could negatively impact our hotel booking revenue. We can give no assurances that the hotel booking platform will yield the benefits we expect and will not result in additional costs or have adverse impacts on our business.

Our business could be negatively affected by changes in search engine algorithms and dynamics or other traffic-generating arrangements.

We utilize Internet search engines such as Google, principally through the purchase of travel-related keywords, to generate additional traffic to our websites. Search engines, including Google, frequently update and change the logic that determines the placement and display of results of a user's search, such that the purchased or algorithmic placement of links to our websites can be negatively affected. In addition, a significant amount of traffic is directed to our websites through our participation in pay-per-click and display advertising campaigns on search engines, including Google, travel metasearch engines, including Kayak, and Internet media properties, including TripAdvisor. Pricing and operating dynamics for these traffic sources can experience rapid change, both technically and competitively. Moreover, a search or metasearch engine could, for competitive or other purposes, alter its search algorithms or results causing a website to place lower in search query results. If a major search engine changes its algorithms or results in a manner that negatively affects the search engine ranking, paid or unpaid, of our websites or that of our third-party distribution partners, or if competitive dynamics impact the costs or effectiveness of search engine optimization, search engine marketing or other traffic-generating arrangements in a negative manner, our business and financial performance would be adversely affected, potentially to a material extent.

Recent trends in consumer adoption and use of mobile devices create new challenges.

Widespread adoption of mobile devices, such as the iPhone, Android-enabled smart phones, and tablets such as the iPad, coupled with the improved web browsing functionality and development of thousands of useful “apps” available on these devices, is driving substantial traffic and commerce activity to mobile platforms. We have experienced a significant shift of business to mobile platforms and our advertising partners are also seeing a rapid shift of traffic to mobile platforms. Our major competitors and certain new market entrants are offering mobile applications for travel products and other functionality, including proprietary last-minute discounts for hotel bookings. Advertising and distribution opportunities may be more limited on mobile devices given their smaller screen sizes. The gross profit earned on a mobile transaction may be less than that earned from a typical desktop transaction due to different consumer purchasing patterns. For example, hotel reservations made on a mobile device typically are for shorter lengths of stay and are not made as far in advance as hotel reservations made on desktop. Further, given the device sizes and technical limitations of tablets and smartphones, mobile consumers may not be willing to download multiple applications from multiple travel service providers and instead prefer to use one or a limited number of applications for their mobile travel activity. As a result, the consumer experience with mobile applications, as well as brand recognition and loyalty, are likely to become increasingly important. We have made progress creating mobile offerings which have received strong reviews and have shown solid download trends. We believe that mobile bookings present an opportunity for growth. Further development of our mobile offerings is necessary to maintain and grow our business as consumers increasingly turn to mobile devices instead of personal computers and to mobile applications instead of a web browser. Further, many consumers use a mobile device based web browser instead of an application. As a result, it is increasingly important for us to develop and maintain effective mobile websites optimized for mobile devices to provide customers with appealing easy-to-use mobile website functionality. If we are unable to continue to rapidly innovate and create new, user-friendly and differentiated mobile offerings and efficiently and effectively advertise and distribute on these platforms, or if our mobile applications are not downloaded and used by travel consumers, we could lose market share to existing competitors or new entrants and our future growth and results of operations could be adversely affected.

Recent trends showing that consumers are becoming more interested in a “pull” marketplace than a “push” marketplace have created new challenges.

We have been successful with a “push” marketplace by inspiring people to take trips or purchase travel deals that they had not planned. We have noticed that consumers, however, have been seeking a “pull” marketplace to allow consumers the ability to search and browse for specific needs on specific dates. As we continue to invest in products, such as the hotel booking platform, to make it easier to search for our travel deals and move towards a “pull” marketplace, our results of operations could be adversely affected. Our required investment to make our website, mobile site and apps easier to search and more simple to buy or book deals create a risk that our costs and product development expenditures may exceed our revenues in the short and long term, which may materially impact our financial condition. We anticipate that our financial results will be impacted as we continue to invest in our growth through increased spending in improving our products to accommodate a “pull” marketplace.

We may have exposure to additional tax liabilities.

As a global company, we are subject to income taxes as well as non-income based tax, in both the United States and various foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes and other tax liabilities. Although we believe that our tax estimates are reasonable, there is no assurance that the final determination of tax audits or tax disputes will not be different from what is reflected in our historical income tax provisions and accruals. Changes in tax laws or tax rulings may have a significantly adverse impact on our effective tax rate.

We are also subject to non-income based taxes, such as value-added, payroll, sales, use, net worth, property and goods and services taxes, in both the United States and various foreign jurisdictions. From time to time, we are under audit by tax authorities with respect to these non-income based taxes and may have exposure to additional non-income based tax liabilities. The Company's 2009 and 2010 federal income returns are currently under examination, including a review of the impact of the sale of Asia Pacific business segment in 2009. These examinations may lead to ordinary course adjustments or proposed adjustments to our taxes or our net operating income. In addition, we have received a Revenue Agent's Report (RAR) generally issued at the conclusion of an IRS examination, which was consistent with the Notice of Proposed Adjustment we received earlier from the IRS for the 2009 calendar year related to the sale of our Asia Pacific business segment with the addition of penalties. The RAR proposes an increase to our U.S. taxable income which would result in additional federal tax expense, federal penalty and state tax expense totaling approximately \$31 million, excluding interest and state penalties, if any. The proposed adjustment is primarily driven by IRS's view that the Asia Pacific business segment assets sold by the Company had a significantly higher valuation than the sales proceeds the Company received upon the sale. The Company disagrees with the proposed adjustments and intends to vigorously contest them. The Company did not make any adjustments to its liabilities for uncertain tax positions related to the RAR during the year December 31, 2014 because the Company does not believe the IRS's valuation of Asia Pacific business segment assets is appropriate. If we are not able to resolve these proposed adjustments at the IRS examination level, we plan to pursue all available administrative and, if necessary, judicial remedies. The Company is not able to predict the ultimate amount or outcome of this tax audit and we may incur additional costs in defending any claims that may arise, even if we ultimately are not liable for any additional taxes. Adverse application of state and local tax laws could have an adverse effect on our business and results of operation. Our expansion of our product offering to include a hotel booking platform may subject us to state and local tax laws and result in additional tax liabilities. A number of jurisdictions in the United States have initiated lawsuits against other on-line travel companies, related to, among other things, the payment of hotel occupancy and other taxes (i.e., state and local sales tax). In addition, a number of municipalities have initiated audit proceedings, issued proposed tax assessments or started inquiries relating to the payment of hotel occupancy and other taxes.

Given that we intend for our hotel booking platform to consist of an agency model whereby we will facilitate reservations on behalf of a hotel, the payment of hotel occupancy taxes and other taxes should be the responsibility of the merchant. The intended business practice for our hotel booking platform will primarily be for the merchant to be responsible for remitting applicable taxes to the various tax authorities. Nevertheless, to the extent that any tax authority succeeds in asserting that we have a tax collection responsibility, or we determine that we have one, with respect to future transactions, we may collect any such additional tax obligation from our customers, which would have the effect of increasing the cost of hotel room reservations to our customers and, consequently, could make our hotel service less competitive (i.e., versus the websites of other online travel companies or hotel company websites) and reduce hotel reservation transactions. Either step could have a material adverse effect on our business and results of operations. We will continue to assess the risks of the potential financial impact of additional tax exposure. Our business model may not be adaptable to a changing market.

Our current revenue model depends primarily on advertising fees paid by travel and entertainment companies. If current clients decide not to continue advertising their offers with us and we are unable to replace them with new clients, our business may be adversely affected. To be successful, we must provide online marketing solutions that achieve broad market acceptance by travel and entertainment companies. In addition, we must attract sufficient Internet users with attractive demographic characteristics to our products. It is possible that we will be required to further adapt our business model and products in response to changes in the online advertising market or if our current

business model is not successful. For example, the trend toward mobile online traffic will require us to adapt our product offering to facilitate consumers use of our products. If we do not adapt to this trend fully or quickly enough, we may lose advertising revenue as consumer usage may decline from our non-mobile traffic. If we are not able to anticipate changes in the online advertising market or if our business model is not successful, our business could be materially adversely affected.

If we fail to retain existing advertisers or add new advertisers, our revenue and business will be harmed. We depend on our ability to attract and retain advertisers (hotels, spas, restaurants, vacation packagers, airlines, etc.) that are prepared to offer products or services on compelling terms to our members. We do not have long-term arrangements to guarantee the availability of deals that offer attractive quality, value and variety to consumers or favorable payment terms to us. We must continue to attract and retain advertisers in order to increase revenue and maintain profitability. If new advertisers do not find our marketing and promotional services effective, or if existing advertisers do not believe that utilizing our products provides them with a long-term increase in customers, revenue or profit, they may stop making offers through our marketplace. In addition, we may experience attrition in our advertisers in the ordinary course of business resulting from several factors, including losses to competitors and advertiser closures or bankruptcies. If we are unable to attract new advertisers in numbers sufficient to grow our business, or if too many advertisers are unwilling to offer products or services with compelling terms to our members or offer favorable payment terms to us, we may sell less advertising, and our operating results will be adversely affected. For example, we may lose advertisers due to market conditions or performance, such as our recent loss of revenue from certain online booking engines, airlines and vacation packagers. We may not add enough additional revenue, such as hotel revenue from Getaways or the hotel booking platform, in order to replace the lost revenue. Furthermore, the new revenue may cost more to generate compared to the costs that the lost revenue required to generate, thereby adversely impacting our operating results.

Our existing advertisers may shift from one advertising service to another, which may adversely affect our revenue. Existing advertisers may shift from one advertising service (e.g. Top 20) to another (e.g. Local Deals, Getaways or the planned hotel booking platform). These shifts between advertising services by advertisers could result in no incremental revenue or less revenue than in previous periods depending on the amount purchased by the advertisers, and in particular with Local Deals, Getaways and the hotel booking platform, depending on how many vouchers are purchased by members and how many hotel bookings are made. In addition, we are anticipating a shift from our existing hotel revenue to commission-based revenue in connection with the launch of our hotel booking platform capabilities, which may result in lower revenue depending on volume of hotel bookings.

An increase in our refund rates related to our Local Deals and Getaway could reduce our liquidity and profitability. We provide refunds related to our Local Deals and Getaway voucher sales. As we increase our revenue, our refund rates may exceed our historical levels. A downturn in general economic conditions may also increase our refund rates. An increase in our refund rates could significantly reduce our liquidity and profitability.

As we do not have control over our merchants and the quality of products or services they deliver, we rely on a combination of our historical experience with our merchants over time and the type of refunds provided for development of our estimate for refund claims. Our actual level of refund claims could prove to be greater than the level of refund claims we estimate. If our refund reserves are not adequate to cover future refund claims, this inadequacy could have a material adverse effect on our liquidity and profitability.

Our standard agreements with our merchants generally limit the time period during which we may seek reimbursement for member refunds or claims. Our members may make claims for refunds with respect to which we are unable to seek reimbursement from our merchants. Our members could also make false or fraudulent refund claims. Our inability to seek reimbursement from our merchants for refund claims could have an adverse effect on our liquidity and profitability.

If our advertisers do not meet the needs and expectations of our members, our business could suffer. Our business depends on our reputation for providing high-quality deals, and our brand and reputation may be harmed by actions taken by advertisers that are outside our control. In particular, this is the case with our Local Deals and Getaway merchants, since we are selling vouchers on behalf of the merchants directly to our members as opposed to our travel business when we are only collecting the advertising fee from the advertiser and the members are booking the deal directly with the advertiser. Any shortcomings of one or more of our merchants, particularly with respect to an issue affecting the quality of the deal offered or the products or services sold, may be attributed by our members to us, thus damaging our reputation, brand value and potentially affecting our results of operations. In addition, negative publicity and member sentiment generated as a result of fraudulent or deceptive conduct by our merchants could damage our reputation, reduce our ability to attract new members or retain our current members, and diminish the

value of our brand.

16

Our business relies heavily on e-mail and other messaging services, and any restrictions on the sending of e-mails or messages or a decrease in member willingness to receive messages could adversely affect our revenue and business. Our business is highly dependent upon e-mail and other messaging services. Deals offered through e-mails and other messages sent by us, or on our behalf by our affiliates, generate a substantial portion of our revenue. Because of the importance of e-mail and other messaging services to our businesses, if we are unable to successfully deliver e-mails or messages to our members or potential members, or if members decline to open our e-mails or messages, our revenue and profitability would be adversely affected. New laws and regulations regulating the sending of commercial e-mails, including those enacted in foreign jurisdictions (such as Canada), may affect our ability to deliver of e-mails or messages to our members or potential members and may also result in increased compliance costs. Further, actions by third parties to block, impose restrictions on, or charge for the delivery of, e-mails or other messages could also materially and adversely impact our business. From time to time, Internet service providers block bulk e-mail transmissions or otherwise experience technical difficulties that result in our inability to successfully deliver e-mails or other messages to third parties. In addition, our use of e-mail and other messaging services to send communications about our website or other matters may result in legal claims against us, which if successful might limit or prohibit our ability to send e-mails or other messages. Any disruption or restriction on the distribution of e-mails or other messages or any increase in the associated costs would materially and adversely affect our revenue and profitability. In addition, the shift in our website traffic originating from mobile devices accessing our services may decrease our members' willingness to use our services if they are not satisfied with our mobile user experience and could decrease their willingness to be an e-mail member, which could adversely affect our revenue and profitability.

Our reported total number of members may be higher than the number of our actual individual members and may not be representative of the number of persons who are active potential customers.

The total number of members we report may be higher than the number of our actual individual members because some members have multiple registrations, other members have died or become incapacitated and others may have registered under fictitious names. Given the challenges inherent in identifying these members, we do not have a reliable system to accurately identify the number of actual individual members, and thus we rely on the number of total members shown on our records as our measure of the size of our member base. In addition, the number of members we report includes the total number of individuals that have completed registration through a specific date, less individuals who have unsubscribed. Those numbers may include individuals who do not receive our e-mails because our e-mails have been blocked or are otherwise undeliverable. As a result, the reported number of members should not be considered as representative of the number of persons who continue to actively consider our deals by reviewing our e-mail offers.

We may not be able to obtain sufficient funds to grow our business and any additional financing may be on terms adverse to your interests.

For the year ended December 31, 2014, our cash and cash equivalents decreased by \$11.4 million to \$54.8 million, of which \$41.8 million was held outside the U.S. in certain of our foreign operations. We intend to continue to grow our business and fund our current operations using cash on hand. However, this may not be sufficient to meet our needs, including the payments required to settle escheat or tax claims, as described under Note 5 and 6 to the accompanying consolidated financial statements. We may not be able to obtain financing on commercially reasonable terms, or at all. If additional financing is not available when required or is not available on acceptable terms, we may be unable to fund our expansion, successfully promote our brand name, develop or enhance our products and services, take advantage of business opportunities, or respond to competitive pressures, any of which could have a material adverse effect on our business.

If we choose to raise additional funds through the issuance of equity securities, existing stockholders may experience significant dilution of their ownership interest and holders of the additional equity securities may have rights senior to existing stockholders of our common stock. If we obtain additional financing by issuing debt securities or bank borrowings, the terms of these arrangements could restrict or prevent us from paying dividends and could limit our flexibility in making business decisions.

Our business may be sensitive to recessions.

The demand for online advertising may be linked to the level of economic activity and employment in the U.S. and abroad. Specifically, our business is primarily dependent on the demand for online advertising from travel and entertainment companies. The recent recession decreased consumer travel and caused travel and entertainment companies to reduce or postpone their marketing spending generally, and their online marketing spending in particular. Continued or future recessions could have a material adverse effect on our business and financial condition. Moreover, declines or disruptions in the travel industry could adversely affect our launch of our hotel booking platform and financial performance.

Our operations could be significantly hindered by the occurrence of a natural disaster or other catastrophic event. Our operations are susceptible to outages due to fire, floods, power loss, telecommunications failures, unexpected technical problems in the systems that power our websites and distribute our e-mail newsletters, break-ins and similar events. In addition, a significant portion of our network infrastructure is located in Northern California, an area susceptible to earthquakes. We do not have multiple site capacity to protect us against any such occurrence. Outages could cause significant interruptions of our service. In addition, despite our implementation of network security measures, our servers are vulnerable to computer viruses, physical and electronic break-ins, and similar disruptions from unauthorized tampering with our computer systems. We do not carry business interruption insurance to compensate us for losses that may occur as a result of any of these events.

Technological or other assaults on our service could harm our business.

We are vulnerable to coordinated attempts to overload our systems with data, which could result in denial or reduction of service to some or all of our users for a period of time. We have experienced denial of service attacks in the past, and may experience such attempts in the future. Any such event could reduce our revenue and harm our operating results and financial condition. We do not carry business interruption insurance to compensate us for losses that may occur as a result of any of these events.

We are subject to payments-related risks.

We accept payments for the sale of vouchers using a variety of methods, including credit cards and debit cards. We pay interchange and other fees, which may increase over time and raise our operating expenses and lower profitability. We rely on third parties to provide payment processing services, including the processing of credit cards and debit cards, and it could disrupt our business if these companies become unwilling or unable to provide these services to us. We are also subject to payment card association operating rules, certification requirements and rules governing electronic funds transfers, which could change or be reinterpreted to make it difficult or impossible for us to comply. Moreover, under payment card rules and our contracts with our card processors, if there is a security breach of payment card information, we could be liable to the payment card issuing banks for their cost of issuing new cards and related expenses. If we fail to comply with these rules or requirements, we may be subject to fines and higher transaction fees and lose our ability to accept credit and debit card payments, process electronic funds transfers, or facilitate other types of online payments, and our business and results of operations could be adversely affected. If one or more of these contracts are terminated and we are unable to replace them on similar terms, or at all, it could adversely affect our results of operations.

Our reported financial results may be adversely affected by changes in United States generally accepted accounting principles, and we may incur significant costs to adjust our accounting systems and processes to comply with significant changes.

United States generally accepted accounting principles are subject to interpretation by the Financial Accounting Standards Board, or FASB, the American Institute of Certified Public Accountants, the SEC and various bodies formed to promulgate and interpret appropriate accounting principles. In 2014, the FASB issued a new accounting standard related to revenue recognition which could change the way we account for certain of our sales transactions. The adoption of this standard and changes in other principles or interpretations could have a significant effect on our reported financial results and could affect the reporting of transactions completed before the announcement of a change. In addition, the SEC is considering a multi-year plan that could ultimately lead to the use of International Financial Reporting Standards by United States issuers in their SEC filings. Any such change could have a significant effect on our reported financial results. In addition, we may need to significantly change our accounting systems and processes if we are required to adopt future or proposed changes in accounting principles noted above. The cost of these changes may negatively impact our results of operations during the periods of transition.

Risks Related to Our Markets and Strategy

Our international expansion may result in operating losses, and is subject to other material risks.

In May 2005, we began operations in the U.K. In 2006, we began operations in Canada, Germany, and Spain. In 2007, we began operations in France.

Our revenues in Europe increased 1.3% in 2014 compared to 2013, and our operations in Europe generated an operating income before tax of \$5.7 million and \$7.7 million in 2014 and 2013, respectively. We intend to continue adding a significant number of members in selected countries in which we operate as we believe this is one of the

factors that will allow us to increase our advertising rates and increase our revenues in Europe.

18

If we incur losses from our operations in the future, these losses may not have any recognizable tax benefit. We expect that this would have a material negative impact on our net income and cash flows. Any of these developments could result in a significant decrease in the trading price of our common stock. In addition to uncertainty about our ability to generate net income from our foreign operations and expand our international market position, there are certain risks inherent in doing business internationally, including:

- trade barriers and changes in trade regulations;
- difficulties in developing, staffing and simultaneously managing foreign operations as a result of distance, language and cultural differences;
- stringent local labor laws and regulations;
- currency exchange rate fluctuations;
- risks related to government regulation; and
- potentially adverse tax consequences.

We may not be able to continue developing awareness of our brand names.

We believe that continuing to build awareness of the Travelzoo and Fly.com brand names is critical to achieving widespread acceptance of our business. Brand recognition is a key differentiating factor among providers of online advertising opportunities, and we believe it could become more important as competition in our industry increases. In order to maintain and build brand awareness, we must succeed in our marketing efforts. If we fail to successfully promote and maintain our brands, incur significant expenses in promoting our brands and fail to generate a corresponding increase in revenue as a result of our branding efforts, or encounter legal obstacles which prevent our continued use of our brand names, our business could be materially adversely affected.

If we fail to retain our existing members or acquire new members, our revenue and business will be harmed.

We spent \$7.8 million, \$5.5 million and \$5.4 million on online marketing initiatives relating to member acquisition for years ended December 31, 2014, 2013 and 2012 and expect to continue to spend significant amounts to acquire additional members. We must continue to retain and acquire members in order to maintain or increase revenue. We cannot assure you that the revenue from members we acquire will ultimately exceed the cost of acquiring new members. If members do not perceive our offers to be of high value and quality or if we fail to introduce new and more relevant deals, we may not be able to acquire or retain members. If we reduce our member acquisition costs, we cannot assure you that this will not adversely impact our ability to acquire new members. If we are unable to acquire new members who purchase our deals directly or indirectly in numbers sufficient to grow our business, or if members cease to purchase our deals directly or indirectly through our advertisers, the revenue we generate may decrease and our operating results will be adversely affected. If the level of usage by our member base declines or does not grow as expected, we may suffer a decline in member growth or revenue. A significant decrease in the level of usage or member growth would have an adverse effect on our business, financial condition and results of operations. In addition, a shift of our audience to mobile devices and social media channels without corresponding updates of our offerings or marketing activities to address this audience could result in lower revenues.

Our business may be sensitive to events affecting the travel industry in general.

Events like the Middle East conflicts or the terrorist attacks on the U.S. in 2001 or the recent global financial crisis have a negative impact on the travel industry. We are not in a position to evaluate the net effect of these circumstances on our business. In the longer term, our business might be negatively affected by financial pressures on the travel industry. However, our business may also benefit if travel companies increase their efforts to promote special offers or other marketing programs. If such events result in a long-term negative impact on the travel industry, such impact could have a material adverse effect on our business.

We may not be able to attract travel and entertainment companies or Internet users if we do not continually enhance and develop the content and features of our products and services.

To remain competitive, we must continually improve the responsiveness, functionality, and features of our products and services. We may not succeed in developing features, functions, products, or services that travel and entertainment companies and Internet users find attractive. This could reduce the number of travel and entertainment companies and Internet users using our products and materially adversely affect our business.

We may lose business if we fail to keep pace with rapidly changing technologies and client needs.

Our success is dependent on our ability to develop new and enhanced software, services, and related products to meet rapidly evolving technological requirements for online advertising. Our current technology may not meet the future technical requirements of travel and entertainment companies. Trends that could have a critical impact on our success include:

- rapidly changing technology in online advertising, including a significant shift of business to mobile platforms;
- evolving industry standards, including both formal and de facto standards relating to online advertising;

- developments and changes relating to the Internet;

- competing products and services that offer increased functionality; and

- changes in travel company, entertainment company, and Internet user requirements.

If we are unable to timely and successfully develop and introduce new products and enhancements to existing products in response to our industry's changing technological requirements, our business could be materially adversely affected.

Our business and growth will suffer if we are unable to hire and retain highly skilled personnel.

Our future success depends on our ability to attract, train, motivate, and retain highly skilled employees. We may be unable to retain our skilled employees, or attract, assimilate, and retain other highly skilled employees in the future.

We have from time to time in the past experienced, and we expect to continue to experience in the future, difficulty in hiring and retaining highly skilled employees with appropriate qualifications. If we are unable to hire and retain skilled personnel, our growth may be restricted, which could adversely affect our future success.

We may not be able to effectively manage our expanding operations.

Since the commencement of our operations, we have experienced periods of rapid growth. In order to execute our business plan, we must continue to grow significantly. As of December 31, 2014, we had 438 employees, up from 436 employees as of December 31, 2013. We expect that the number of our employees will fluctuate yet continue to increase for the foreseeable future. This growth has placed, and our anticipated future growth will continue to place, a significant strain on our management, systems, and resources. We expect that we will need to continue to improve our financial and managerial controls and reporting systems and procedures. We will also need to continue to expand and maintain close coordination among our sales, production, marketing, IT, and finance departments. We may not succeed in these efforts. Our inability to expand our operations in an efficient manner could cause our expenses to grow disproportionately to revenues, our revenues to decline or grow more slowly than expected and could otherwise have a material adverse effect on our business.

Intense competition may adversely affect our ability to achieve or maintain market share and operate profitably. We compete for advertising dollars with large Internet portal sites, such as MSN and Yahoo!, that offer listings or other advertising opportunities to travel, entertainment and local businesses. These companies have significantly greater financial, technical, marketing and other resources and larger advertiser bases. We compete with search engines like Google and Bing that offer pay-per-click listings. We compete with travel metasearch engines like Kayak and online travel and entertainment deal publishers. We compete with large online travel agencies like Expedia and Priceline that also offer advertising placements and hotel booking platforms and capture consumer interest. We compete with companies like Groupon and LivingSocial that sell vouchers for deals from local businesses such as spas, hotels and restaurants. We expect to face increased competition from other Internet and technology-based businesses such as Google and Microsoft, each of which has launched initiatives which are directly competitive to our Local Deals and Getaway products. Google has introduced its hotel search product, which negatively impacted our ability to efficiently purchase Google hotel search traffic to drive our Search product revenues. In addition, we compete for traffic acquisition with many companies and we are subject to higher prices to acquire this traffic, which drives our Search revenue in particular. We have and may reduce our traffic acquisition for our Search products if we believe the acquisition costs are too high for us to remain profitable. When we reduce our traffic acquisition spending it negatively impacts our Search revenue. During year ended December 31, 2014, we reduced traffic spending, which reduced revenue by over \$5.0 million compared to the year ended December 31, 2013. To the extent that Google, or other leading search or metasearch engines that have a significant presence in our key markets, offer comprehensive travel planning or shopping capabilities, or refer those leads to suppliers directly, or to other favored partners, there could be an adverse impact on our business and financial performance. We also have seen that some competitors will accept lower margins, or negative margins, to attract attention and acquire new members. If competitors engage in group buying initiatives in which merchants receive a higher percentage of the face value than we currently offer, we may be forced to pay a higher percentage of the face value than we currently offer, which may reduce our revenue. In addition, we compete with newspapers, magazines and other traditional media companies that operate websites which provide online advertising opportunities. We expect to face additional competition as other established and emerging companies, including print media companies, enter the online advertising market. Competition could result in reduced margins on our services, loss of market share or less use of Travelzoo by advertisers and consumers. If we are not able to compete effectively with current or future competitors as a result of these and other factors, our business could be materially adversely affected.

Loss of any of our key management personnel could negatively impact our business.

Our future success depends to a significant extent on the continued service and coordination of our management team, particularly Christopher Loughlin, our Chief Executive Officer. The loss or departure of any of our officers or key employees could materially adversely affect our ability to implement our business plan. We do not maintain key person life insurance for any member of our management team. In addition, we expect new members to join our management team in the future. These individuals will not previously have worked together and will be required to become integrated into our management team. If our key management personnel are not able to work together effectively or successfully, our business could be materially adversely affected.

We may not be able to access third party technology upon which we depend.

We use data technology and software products from third parties including Microsoft and ITA Software. Technology from our current or other vendors may not continue to be available to us on commercially reasonable terms, or at all. Moreover, to the extent an airline does not provide content to ITA Software or third party data providers, or to us, and we cannot obtain the content, we may face additional costs (including legal costs) and the financial results of Fly.com could be negatively affected. If we are unable to continue to display travel data from multiple airline carriers, it would reduce the breadth of our query results on Fly.com and the number of travelers using our services could decline, resulting in a loss of revenues and a decline in our operating results. Fly.com depends on access to information related to airline schedules and fares and, to the extent our travel service providers no longer provide such information, Fly.com's business and results of operations could be harmed. Our business will suffer if we are unable to access this technology, to gain access to additional products or to integrate new technology with our existing systems. This could cause delays in our development and introduction of new services and related products or enhancements of existing products until equivalent or replacement technology can be accessed, if available, or developed internally, if feasible.

If we experience these delays, our business could be materially adversely affected.

21

Acquisitions, investments and joint ventures could result in operating difficulties, dilution, and other harmful consequences that may adversely impact our business and results of operations.

We may evaluate and consider a wide array of potential strategic transactions as part of our overall business strategy, including business combinations, acquisitions and dispositions of businesses, technologies, services, and other assets, as well as strategic investments and joint ventures. At any given time we may be engaged in discussions or negotiations with respect to one or more of these types of transactions. Any of these transactions could be material to our financial condition and results of operations.

These transactions involve significant challenges and risks. Some of the areas where we may face risks or difficulties include:

• Diversion of management time and focus from operating our business to acquisition integration challenges.

• Implementation or remediation of controls, procedures, and policies at the acquired company.

• Integration of the acquired company's accounting, human resources, and other administrative systems, and coordination of product, engineering, and sales and marketing functions.

• Transition of operations, users, and customers onto our existing platforms.

• Failure to obtain required approvals on a timely basis, if at all, from governmental authorities, or conditions placed upon approval, under competition and antitrust laws which could, among other things, delay or prevent us from completing a transaction, or otherwise restrict our ability to realize the expected financial or strategic goals of an acquisition.

• In the case of foreign acquisitions, the need to integrate operations across different cultures and languages and to address the particular economic, currency, political, and regulatory risks associated with specific countries.

• Failure to successfully further develop the acquired business or technology.

• Cultural challenges associated with integrating employees from the acquired company into our organization, and retention of employees from the businesses we acquire.

• Liability for activities of the acquired company before the acquisition, including patent and trademark infringement claims, violations of laws, commercial disputes, tax liabilities, and other known and unknown liabilities.

• Litigation or other claims in connection with the acquired company, including claims from terminated employees, customers, former stockholders, or other third parties.

• Challenges relating to the structure of an investment, such as governance, accountability and decision-making conflicts that may arise in the context of a joint venture.

• Expected and unexpected costs incurred in pursuing acquisitions, including identifying and performing due diligence on potential acquisition targets that may or may not be successful.

• Entrance into markets in which we have no direct prior experience and increased complexity in our business.

• Inability to sell excess assets.

• Impairment of goodwill and other assets acquired.

Our failure to address these risks or other problems encountered in connection with our past or future acquisitions and investments could cause us to fail to realize the anticipated benefits of such acquisitions or investments, incur unanticipated liabilities, and harm our business generally.

Future acquisitions may also require us to issue additional equity securities, spend our cash, or incur debt (and increased interest expense), liabilities and amortization expenses related to intangible assets or write-offs of goodwill, which could adversely affect our results of operations and dilute the economic and voting rights of our stockholders. Also, the anticipated benefit of many of our acquisitions may not materialize.

Risks Related to the Market for our Shares

Our stock price has been volatile historically and may continue to be volatile.

The trading price of our common stock has been and may continue to be subject to wide fluctuations. During the twelve months ended February 12, 2015, the closing price of our common stock on the NASDAQ Global Select Market ranged from \$8.58 to \$24.12. Our stock price may fluctuate in response to a number of events and factors, such as quarterly variations in operating results; announcements of technological innovations or new products by us or our competitors; changes in financial estimates and recommendations by securities analysts; the operating and stock price performance of other companies that investors may deem comparable to us; and news reports relating to trends in our markets or general economic conditions. Our stock price may be volatile given that operating results may vary from the expectations of securities analysts and investors, which are beyond our control. In the event that our operating results fall below the expectations of securities analysts or investors, the trading price of our common shares may decline significantly. Moreover, fluctuations in our stock price and our price-to-earnings multiple may have made our stock attractive to hedge or day-trading investors who often shift funds into and out of stocks rapidly, exacerbating price fluctuations in either direction, particularly when viewed on a quarterly basis.

In addition, the stock market in general, and the market prices for Internet-related companies in particular, have experienced volatility that often has been unrelated to the operating performance of such companies. These broad market and industry fluctuations may adversely affect the price of our stock, regardless of our operating performance. We have a principal stockholder.

Ralph Bartel, who founded Travelzoo and who is a Director of the Company is the sole beneficiary of the Ralph Bartel 2005 Trust, which is the controlling shareholder of Azzurro Capital Inc. As of December 31, 2014, Azzurro is the Company's largest stockholder, holding approximately 49.1% of the Company's outstanding shares. Azzurro currently holds a proxy given to it by Holger Bartel that provides it with a total of 50.4% of the voting power.

Risks Related to Legal Uncertainty

We may become subject to shareholder lawsuits over securities violations due to volatile stock price and this can be burdensome to management and costly to defend.

Shareholder lawsuits for securities violations are often launched against companies whose stock price is volatile. Such lawsuits involving the Company would require management's attention to defend, which may distract attention from operating the Company. In addition, the Company may incur substantial costs to defend itself and/or settle such claims, which may be considered advisable to minimize the distraction and costs of defense. Such lawsuits would result in judgments against the Company requiring substantial payments to claimants. Such costs may materially impact our results of operations and financial condition. Between August 2011 and January 2012, numerous class action and derivative lawsuits were filed against the Company, which have since been resolved.

We may become subject to burdensome government regulations and legal uncertainties affecting the Internet which could adversely affect our business.

To date, governmental regulations have not materially restricted use of the Internet in our markets. However, the legal and regulatory environment that pertains to the Internet is uncertain and may change. Uncertainty and new regulations, including those enacted in foreign jurisdictions, could increase our costs of doing business, prevent us from delivering our products and services over the Internet, or slow the growth of the Internet. For example, new laws and regulations regulating online advertisements, including those enacted in foreign jurisdictions, may affect our advertising revenue and may also result in decreased traffic to our websites. In addition to new laws and regulations being adopted, existing laws may be applied to the Internet. New and existing laws may cover issues which include:

- user privacy;
- anti-spam legislation;
- consumer protection;
- copyright, trademark and patent infringement;
- pricing controls;
- characteristics and quality of products and services;
- sales and other taxes; and
- other claims based on the nature and content of Internet materials.

We are subject to laws and regulations worldwide, changes to which could increase the Company's costs and individually or in the aggregate adversely affect the Company's business.

The Company is subject to laws and regulations affecting its domestic and international operations in a number of areas. These U.S. and foreign laws and regulations affect the Company's activities including, but not limited to, in areas of employment related laws and regulations, advertising, digital content, consumer protection, real estate, billing, e-commerce, promotions, intellectual property ownership and infringement, tax, anti-corruption, foreign exchange controls and cash repatriation restrictions, data privacy requirements, anti-competition, health, and safety. Compliance with these laws, regulations and similar requirements may be onerous and expensive, and they may be inconsistent from jurisdiction to jurisdiction, further increasing the cost of compliance and doing business. Any such costs, which may rise in the future as a result of changes in these laws and regulations or in their interpretation, could individually or in the aggregate make the Company's services less attractive to the Company's customers, delay the introduction of new products in one or more regions, or cause the Company to change or limit its business practices or incur more costs to comply or defend itself. The Company has implemented policies and procedures designed to ensure compliance with applicable laws and regulations, but there can be no assurance that the Company's employees, contractors, or agents will not violate such laws and regulations or the Company's policies and procedures.

The implementation of the CARD Act and similar state and foreign laws may harm our Local Deals business. Vouchers which are issued under our Local Deals and Getaway may be considered gift cards, gift certificates, stored value cards or prepaid cards and therefore governed by, among other laws, the Credit Card Act of 2009 (the "CARD Act"), and state laws governing gift cards, stored value cards and coupons. Other foreign jurisdictions have similar laws in place, in particular European jurisdictions where the European E-Money Directive regulates the business of electronic money institutions. Many of these laws contain provisions governing the use of gift cards, gift certificates, stored value cards or prepaid cards, including specific disclosure requirements and prohibitions or limitations on the use of expiration dates and the imposition of certain fees. For example, if the vouchers are subject to the CARD Act and are not included in the exemption for promotional programs, it is possible that the purchase value, which is the amount equal to the price paid for the voucher, or the promotional value, which is the add-on value of the voucher in excess of the price paid, or both, may not expire before the later of (i) five years after the date on which the voucher was issued; (ii) the voucher's stated expiration date (if any); or (iii) a later date provided by applicable state law. Purported class actions against other companies have been filed in federal and state court claiming that coupons similar to the vouchers are subject to the CARD Act and various state laws governing gift cards and that the defendants have violated these laws by issuing the coupons with expiration dates and other restrictions. In addition, investigations by certain state attorney general offices have been launched against other companies with regards to similar issues. If similar claims are asserted against the Company in respect of the Local Deals and Getaways vouchers and are successful, we may become subject to fines and penalties and incur additional costs. In addition, if federal or state laws require that the face value of our vouchers have a minimum expiration period beyond the period desired by a merchant for its promotional program, or no expiration period, this may affect the willingness of merchants to issue vouchers in jurisdictions where these laws apply. For unredeemed vouchers, similar laws in other jurisdictions require us or merchants to honor the face value of vouchers sold, after the redemption period. For example, in Germany, certain consumer protection laws require us to refund consumers for approximately four years after the purchase date for the amount of the face value of purchased vouchers which remains unredeemed at the end of the redemption period. Therefore, we do not recognize the unredeemed amounts as revenue until after we are not subject to these laws. There may be similar laws in other countries or provinces that require similar practices. Such developments may materially and adversely affect the profitability or viability of our Local Deals and Getaways. If we are required to materially increase the estimated liability recorded in our financial statements with respect to unredeemed Local Deals and Getaways vouchers due to application of certain gift card laws, our net income could be materially and adversely affected.

In certain states and foreign jurisdictions, our Local Deals and Getaway vouchers may be considered a gift card. Some of these states and foreign jurisdictions include gift cards under their unclaimed and abandoned property laws which require companies to remit to the government the value of the unredeemed balance on the gift cards after a specified period of time (generally between one and five years) and impose certain reporting and recordkeeping obligations. The analysis of the potential application of the unclaimed and abandoned property laws to our vouchers is complex, involving an analysis of constitutional and statutory provisions and factual issues, including our relationship with members and merchants and our role as it relates to the issuance and delivery of a voucher. In the event that one or more states or foreign jurisdictions successfully challenges our position on the application of its unclaimed and abandoned property laws to vouchers, or if the estimates that we use in projecting the likelihood of vouchers being redeemed prove to be inaccurate, our liabilities with respect to unredeemed vouchers may be materially higher than the amounts shown in our financial statements. If we are required to materially increase the estimated liability recorded in our financial statements with respect to unredeemed gift cards, our net income could be materially and adversely affected. Moreover, a successful challenge to our position could subject us to penalties or interest on unreported and unremitted sums, and any such penalties or interest would have a further material adverse impact on our net income.

New tax treatment of companies engaged in Internet commerce may adversely affect the commercial use of our services and our financial results.

Due to the global nature of the Internet, it is possible that various states or foreign countries might attempt to regulate our transmissions or levy sales, income or other taxes relating to our activities. Tax authorities at the international, federal, state and local levels are currently reviewing the appropriate treatment of companies engaged in Internet

commerce. New or revised international, federal, state or local tax regulations may subject us or our members to additional sales, income and other taxes. We cannot predict the effect of current attempts to impose sales, income or other taxes on commerce over the Internet. New or revised taxes and, in particular, sales taxes, VAT and similar taxes would likely increase the cost of doing business online and decrease the attractiveness of advertising and selling goods and services over the Internet. New taxes could also create significant increases in internal costs necessary to capture data, and collect and remit taxes. Any of these events could have an adverse effect on our business and results of operations.

We may suffer liability as a result of information retrieved from or transmitted over the Internet and claims related to our service offerings.

We may be sued for defamation, civil rights infringement, negligence, patent, copyright or trademark infringement, invasion of privacy, personal injury, product liability, breach of contract, unfair competition, discrimination, antitrust or other legal claims relating to information that is published or made available on our websites or service offerings we make available (including provision of an application programming interface platform for third parties to access our website, mobile device services and geolocation applications). These types of claims have been brought, sometimes successfully, against online services in the past. The fact that we distribute information via e-mail or text message may subject us to potential risks, such as liabilities or claims resulting from unsolicited e-mail or spamming, lost or misdirected messages, security breaches, illegal or fraudulent use of e-mail or interruptions or delays in e-mail or mobile service. These risks are enhanced in certain jurisdictions outside the U.S., where our liability for such third-party actions may be less clear and we may be less protected. In addition, we could incur significant costs in investigating and defending such claims, even if we ultimately are not found liable. If any of these events occurs, our business could be materially and adversely affected.

We are subject to risks associated with information disseminated through our websites and applications, including consumer data, content that is produced by our editorial staff and errors or omissions related to our product offerings. Such information, whether accurate or inaccurate, may result in our being sued by our advertisers, merchants, members or third parties and as a result our revenue and goodwill could be materially and adversely affected.

In addition, we may acquire personal or confidential information, including credit card information, from users of our websites and mobile applications, related to our Local Deals, Getaway and planned hotel booking platform. Our existing security measures may not be successful in preventing security breaches. For example, outside parties may attempt to fraudulently induce employees, merchants or customers to disclose sensitive information in order to gain access to our secure systems and networks. A party (whether internal, external, an affiliate or unrelated third party) that is able to circumvent our security systems could steal consumer information or transaction data or other proprietary information. In the last few years, several major companies, such as Target, have experienced high-profile security breaches that exposed their customers' personal information. While we strive to use commercially acceptable means to protect customer personal information, no method of transmission over the Internet, or method of electronic storage, is 100% secure. Further, because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently and often are not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures. Security breaches or the unauthorized disclosure of customer personal information could result in negative publicity, damage our reputation, expose us to risk of loss or litigation and possible liability and subject us to regulatory penalties and sanctions. Any failure or perceived failure by us, or our service providers, to comply with the privacy policies, privacy-related obligations to users or other third parties, or privacy related legal obligations, or any compromise of security that results in the unauthorized release or transfer of personally identifiable information or other user data, may result in governmental enforcement actions, litigation or public statements against the company by consumer advocacy groups or others and could cause our customers and members to lose trust in the Company, which could have an adverse effect on our business. If our security measures are breached, or if our services are subject to attacks that degrade or deny the ability of users to access our products and services, our products and services may be perceived as not being secure, users and customers may curtail or stop using our products and services, and we may incur significant legal and financial exposure.

Claims have been asserted against us relating to shares not issued in our 2002 merger.

The merger of Travelzoo.com Corporation into the Company became effective on April 25, 2002. Holders of promotional shares of Travelzoo.com Corporation who established they had satisfied certain prerequisite qualifications were allowed a period of two years following the effective date to receive one share of Travelzoo Inc. in exchange for each share of common stock of Travelzoo.com Corporation. After April 25, 2004, two years following the effective date, we ceased issuing shares to the former stockholders of Travelzoo.com Corporation. Many of the "Netsurfer stockholders," who had applied to receive shares of Travelzoo.com Corporation in 1998 for no cash

consideration, did not elect to receive their shares which were issuable in the merger prior to the end of the two-year period. A total of 4,115,532 of our shares which had been reserved for issuance in the merger were not claimed. As discussed under Note 1 to the accompanying consolidated financial statements, on April 21, 2011, we settled all claims by the State of Delaware relating to a previously-announced unclaimed property review relating to shares of Travelzoo which have not been claimed by former Netsurfers stockholders of Travelzoo.com Corporation, which remained unexchanged in the 2002 merger, as discussed in the preceding paragraph. Unclaimed shares which were properly issuable and which the holders state of residence was unknown, were subject to escheat claims by the State of Delaware because the Company is organized under Delaware law.

As discussed in Note 1 to the accompanying consolidated financial statements, since March 2012, the Company became subject to unclaimed property reviews by most of the other states in the U.S. that relate primarily to the unexchanged promotional shares, which were not covered by the April 2011 settlement and release agreement with the State of Delaware. During the three months ended March 31, 2012, the Company recorded a \$3.0 million charge related to this unexchanged promotional shares contingency.

In October 2013, the Company entered into settlement agreements with 35 additional states to resolve those states' claims related to similar unclaimed property audits. The multi-state settlement relates to approximately 700,000 additional shares of the Company that were not claimed by residents of those states following the merger, which those states claimed were subject to escheat. While the Company disputes the states' claims, the Company determined that it was in its best interest to resolve the disputes and settle with these states. The remaining states, which were not included in the multi-state settlement as of October 2013, had potential claims on approximately 400,000 additional shares that were not claimed by residents in those states following the merger.

During the year ended December 31, 2013, the Company recorded a \$22.0 million charge related to the settlements it entered into and for potential future settlements with the remaining states. During the year ended December 31, 2013, the Company made cash payments of \$12.3 million to the settled states after completion of the required due diligence. During the year December 31, 2014, the Company settled with the remaining states and made cash payments of \$3.7 million to the settled states after completion of the required due diligence. During the year ended December 31, 2014, the Company released a \$7.6 million of the reserve related to potential future settlements with the remaining states in connection with unexchanged promotional shares based upon the actual settlements with the remaining states under more favorable term than was estimated. The Company has maintained estimated reserves related to the remaining settled states, which will be paid after completion of the required due diligence during the three months ending March 31, 2015.

Although the Company has settled the states unclaimed property claims with all states, the Company may still receive inquiries from certain potential Netsurfer promotional stockholders that had not provided their state of residence to the Company by April 25, 2004. Therefore, The Company is continuing its voluntary program under which it makes cash payments to individuals related to the promotional shares for individuals whose residence was unknown by the Company and who establish that they satisfy the original conditions required for them to receive shares of Travelzoo.com Corporation, and who failed to submit requests to convert their shares into shares of Travelzoo Inc. within the required time period. This voluntary program is not available for individuals whose promotional shares have been escheated to a state by the Company, except those individuals for which their residence was unknown to the Company. The accompanying consolidated financial statements include a charge for payments under this voluntary program in general and administrative expenses of \$6,000 for the year ended December 31, 2014.

The total cost of this voluntary program is not reliably estimable because it is based on the ultimate number of valid requests received and future levels of the Company's common stock price. The Company's common stock price affects the potential liability because the amount of cash payments under the program is based in part on the recent level of the stock price at the date valid requests are received. The Company does not know how many of the requests for shares originally received by Travelzoo.com Corporation in 1998 were valid, but the Company believes that only a portion of such requests were valid. In order to receive payment under this voluntary program, a person is required to establish that such person validly held shares in Travelzoo.com Corporation.

Federal laws and regulations, such as the Bank Secrecy Act and the USA PATRIOT Act and similar foreign laws, could be expanded to include Local Deals and Getaways vouchers.

Various federal laws, such as the Bank Secrecy Act and the USA PATRIOT Act and foreign laws and regulations, such as the European Directive on the prevention of the use of the financial system for the purpose of money laundering and terrorist financing, impose certain anti-money laundering requirements on companies that are financial institutions or that provide financial products and services. For these purposes, financial institutions are broadly defined to include money services businesses such as money transmitters, check cashers and providers of prepaid access cards. Examples of anti-money laundering requirements imposed on financial institutions include customer identification and verification programs, suspicious activity monitoring and reporting, record retention policies and procedures and transaction reporting. We do not believe that we are a financial institution subject to these laws and regulations based, in part, upon the closed loop nature and other characteristics of vouchers and our role with respect to the distribution of vouchers to members. However, the Financial Crimes Enforcement Network, a division of the U.S. Department of the Treasury tasked with implementing the requirements of the Bank Secrecy Act, recently issued final rules regarding the scope and requirements for non-bank parties involved in stored value or prepaid access cards, including obligations on sellers or providers of “prepaid access”. Under the final rule, providers or sellers of closed loop vouchers, such as those offered through the Local Deals and Getaways program, would only be subject to registration if the voucher exceed \$2,000 in total value or if they are sold in aggregate amounts exceeding \$10,000 to any single person in one day. Should the \$2,000 limit be exceeded or should more than \$10,000 in aggregate vouchers be sold to any individual person (sales to businesses for resale or distribution are excluded) then we may be deemed either a seller or provider of prepaid access subject to regulation. In the event that we become subject to the requirements of the Bank Secrecy Act or any other anti-money laundering law or regulation imposing obligations on us as a money services business, our regulatory compliance costs to meet these obligations would likely increase which could reduce our net income. In addition, the costs for third parties to sell vouchers would increase, which may restrict our ability to enlist third parties to issue vouchers.

Our internal control over financial reporting may not be effective, and our independent auditors may not be able to certify as to the effectiveness of such internal controls, which could have a significant and adverse effect on our business.

We are obligated to evaluate our internal control over financial reporting in order to allow management to report on, and our independent auditors to opine on, our internal control over financial reporting, as required by Section 404 of the Sarbanes-Oxley Act of 2002 and the rules and regulations of the SEC, which we collectively refer to as Section 404. In our Section 404 evaluation, we have identified areas of internal controls that may need improvement and have instituted remediation efforts where necessary. Currently, none of our identified areas that need improvement has been categorized as material weaknesses. We may identify conditions that may result in significant deficiencies or material weaknesses in the future.

We may be unable to protect our registered trademark or other proprietary intellectual property rights.

Our success depends to a significant degree upon the protection of the Travelzoo brand name. We rely upon a combination of copyright, trade secret and trademark laws, as well as non-disclosure and other contractual arrangements to protect our intellectual property rights. The steps we have taken to protect our proprietary rights, however, may not always succeed in deterring misappropriation of proprietary information.

We have registered the Travelzoo trademark in the U.S., Australia, Canada, China, Hong Kong, Japan, South Korea, Taiwan, the European Union and the U.K. If we are unable to protect our rights in the mark in North America, Europe, and Asia Pacific, where we have licensed the trademark as described above under “overview”, a key element of our strategy of promoting Travelzoo as a brand could be disrupted and our business could be adversely affected. We may not always be able to detect unauthorized use of our proprietary information or take appropriate steps to enforce our intellectual property rights. In addition, the validity, enforceability, and scope of protection of intellectual property in Internet-related industries are uncertain and still evolving. The laws of countries in which we may market our services in the future are uncertain and may afford little or no effective protection of our intellectual property. The unauthorized reproduction or other misappropriation of our proprietary technology could enable third parties to benefit from our technology and brand name without paying us for them. If this were to occur, our business could be materially adversely affected.

We may face liability from intellectual property litigation that could be costly to prosecute or defend and distract management's attention with no assurance of success.

We cannot be certain that our products, content and brand names do not or will not infringe valid patents, copyrights or other intellectual property rights held by third parties. We expect that infringement claims in our markets will increase in number as more participants enter the markets. We may be subject to legal proceedings and claims from time to time relating to the intellectual property of others in the ordinary course of our business. We may incur substantial expenses in defending against these third party infringement claims, regardless of their merit, and such claims could result in a significant diversion of the efforts of our management personnel. Successful infringement claims against us may result in monetary liability or a material disruption in the conduct of our business. As discussed under Note 5 to the accompanying consolidated financial statements included in this report, a lawsuit was filed against us by a non-practicing entity, commonly referred to as a "patent troll", claiming that the trip-planning metasearch service available on Fly.com infringes one or more claims of certain asserted patents. The plaintiff has asserted similar claims against other metasearch websites, including Expedia, Orbitz, Travelocity, Priceline, Yahoo! Inc., American Express, Kayak and BookIt. We endeavor to defend our intellectual property rights diligently, but intellectual property litigation is extremely expensive and time consuming, and has and is likely to continue to divert managerial attention and resources from our business objectives. Successful infringement claims against us could result in monetary liability and resolution of claims may require us to obtain licenses to use intellectual property rights belonging to third parties, which may be expensive to procure.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We are headquartered in New York, New York, where we occupy approximately 13,500 square feet of leased office space. In addition to our New York office, we have several leased offices throughout the U.S. and Canada for our North America operations, including offices in Chicago, Illinois; Austin, Texas; Boston, Massachusetts; Las Vegas, Nevada; Los Angeles, California; Miami, Florida; Mountain View, California; San Diego, California; San Francisco, California; Toronto, Ontario; and Vancouver, British Columbia.

We also have leased offices for our Europe operations in France, Germany, Spain, and the U.K., including offices in Barcelona, Berlin, Hamburg, London, Manchester, Munich, and Paris.

We believe that our leased facilities are adequate to meet our current needs; however, we intend to expand our operations and therefore may require additional facilities in the future. We believe that such additional facilities are available.

Item 3. Legal Proceedings

The information set forth under "Note 5 - Commitments and Contingencies" to the accompanying consolidated financial statements included in Part II, Item 8 of this report is incorporated herein by reference.

Item 4. Mine Safety Disclosure

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Since August 18, 2004, our common stock has been trading on the NASDAQ Global Select Market under the symbol "TZOO." From December 30, 2003 to August 17, 2004, our common stock was traded on the NASDAQ SmallCap Market under the symbol "TZOO." The following table sets forth, for the periods indicated, the high and low sales prices per share of our common stock as reported by NASDAQ.

	High	Low
2014:		
Fourth Quarter	\$15.86	\$12.17
Third Quarter	\$19.60	\$15.50
Second Quarter	\$23.48	\$17.09
First Quarter	\$24.75	\$20.91
2013:		
Fourth Quarter	\$27.16	\$20.28
Third Quarter	\$32.68	\$26.52
Second Quarter	\$29.40	\$21.15
First Quarter	\$23.88	\$18.77

On February 13, 2015, the last reported sales price of our common stock on the NASDAQ Global Select Market was \$8.58 per share.

As of February 13, 2015, there were approximately 182 stockholders of record of our shares.

Dividend Policy

Travelzoo has not declared or paid any cash dividends since inception and does not expect to pay cash dividends for the foreseeable future. The payment of dividends will be at the discretion of our board of directors and will depend upon factors such as future earnings, capital requirements, our financial condition and general business conditions.

Sales of Unregistered Securities

There were no unregistered sales of equity securities during fiscal year 2014.

Repurchases of Equity Securities

We did not purchase any of our equity securities during the three months ended December 31, 2014.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs	Maximum Shares that May Yet be Purchased Under the Programs (1)

Performance Graph

The following graph compares, for the dates specified, the cumulative total stockholder return for Travelzoo, the NASDAQ Stock Market (U.S. companies) Index (the “NASDAQ Market Index”), and the Standard & Poor's 500 Publishing Index (the “S&P 500 Publishing”). Measurement points are the last trading day of each of the Company's fiscal years ended December 31, 2009, December 31, 2010, December 31, 2011, December 31, 2012, December 31, 2013, and December 31, 2014. The graph assumes that \$100 was invested on December 31, 2009 in the Common Stock of the Company, the NASDAQ Market Index and the S&P 500 Publishing and assumes reinvestment of any dividends. The stock price performance on the following graph is not indicative of future stock price performance.

Measurement Point	12/31/2009	12/31/2010	12/31/2011	12/31/2012	12/31/2013	12/31/2014
Travelzoo Inc.	\$ 100	\$ 336.70	\$ 200.00	\$ 154.52	\$ 173.47	\$ 102.69
NASDAQ Market Index	\$ 100	\$ 116.91	\$ 114.81	\$ 133.07	\$ 184.06	\$ 209.71
S&P 500 Publishing	\$ 100	\$ 60.46	\$ 67.24	\$ 84.35	\$ 135.8	\$ 130.36

Item 6. Selected Consolidated Financial Data

The selected consolidated financial data set forth below are derived from our audited consolidated financial statements. The following selected consolidated financial data is qualified in its entirety by, and should be read in conjunction with, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the consolidated financial statements and the notes thereto included elsewhere herein.

Consolidated Statement of Operations Data:

	Year Ended December 31,				
	2014	2013	2012	2011	2010
	(In thousands, except per share data)				
Revenues	\$142,076	\$158,234	\$151,168	\$148,342	\$112,784
Income from operations	21,050	2,278	25,489	15,022	23,512
Net income (loss)	16,352	(5,011)) 18,198	3,319	13,157
Net income (loss) per share - basic	\$1.11	\$(0.33)) \$1.15	\$0.20	\$0.80
Net income (loss) per share - diluted	\$1.10	\$(0.33)) \$1.14	\$0.20	\$0.80
Shares used in per share calculation — basic	14,768	15,269	15,866	16,315	16,444
Shares used in per share calculation — diluted	14,809	15,269	15,901	16,414	16,453

Consolidated Balance Sheet Data:

	Year Ended December 31,				
	2014	2013	2012	2011	2010
	(In thousands, except per share data)				
Cash and cash equivalents	\$54,812	\$66,223	\$61,169	\$38,744	\$41,184
Working capital	\$41,185	\$30,912	\$42,654	\$28,411	\$
