BOOTS & COOTS INTERNATIONAL WELL CONTROL, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
Six Months Ended June 30, 2007
(Unaudited)

A. BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. They do not include all information and notes required by accounting principles generally accepted in the United States of America for complete annual financial statements. The accompanying condensed consolidated financial statements include all adjustments, including normal recurring accruals, which, in the opinion of management, are necessary to make the condensed consolidated financial statements not misleading. The unaudited condensed consolidated financial statements and notes thereto and the other financial information contained in this report should be read in conjunction with the audited financial statements and notes in our annual report on Form 10-K for the year ended December 31, 2006, and our reports filed previously with the Securities and Exchange Commission (“SEC”). The results of operations for the six month period ended June 30, 2007 are not necessarily indicative of the results to be expected for the full year. Certain reclassifications have been made to the prior period consolidated financial statements to conform to current period presentation.

B. SIGNIFICANT ACCOUNTING POLICIES

Stock Based Compensation— Effective January 1, 2006, we adopted Statement of Financial Accounting Standards No. 123 (revised 2004), “Share-Based Payment” (“SFAS No. 123R”), which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees, consultants and directors, including employee stock options, based on estimated fair values. SFAS No. 123R supersedes our previous accounting under Accounting Principles Board Opinion No. 25, “Accounting for Stock Issued to Employees” (“APB 25”) for periods beginning in fiscal year 2006. In March 2005, the SEC issued Staff Accounting Bulletin No. 107 (“SAB 107”) relating to SFAS No. 123R. We have applied the provisions of SAB 107 in our adoption of SFAS No. 123R.

Foreign currency— Effective January 1, 2006, and related to our acquisition of the hydraulic well control business of Oil States International, Inc. (see “Note E – Business Combination” for more information), we changed our functional currency in Venezuela from the Venezuelan Bolivar to the U.S. Dollar. This change allows us to have one consistent functional currency after the acquisition. Accumulated other comprehensive loss reported in the consolidated statements of stockholders’ equity before January 1, 2006 totaled \$1.2 million and consisted solely of the cumulative foreign currency translation adjustment in Venezuela prior to changing our functional currency. In accordance with SFAS No. 52, “Foreign Currency Translation,” the currency translation adjustment recorded up through the date of the change in functional currency will only be adjusted in the event of a full or partial disposition of our investment in Venezuela.

The accounts of foreign subsidiaries have been translated into U.S. Dollars in accordance with SFAS No. 52, “Foreign Currency Translation.” Accordingly, foreign currency is translated to U.S. dollars for financial purposes by using the U.S. Dollar as the functional currency and exchange gains and losses, as well as translation gains and losses, are reported in income and expenses. These foreign currency gains or losses are reported as other operating expenses. Monetary balance sheet accounts are translated using the current exchange rate in effect at the balance sheet date for assets and liabilities, and for non-monetary items, the accounts are translated at the historical exchange rate in effect when acquired. Revenues and expenses are translated at the average exchange rate for the period.

C. RECENTLY ISSUED ACCOUNTING STANDARDS

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements." SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP), and expands disclosures about fair measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements, the FASB having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, this Statement does not require any new fair value measurements. However, for some entities, the application of this Statement will change current practice. The Company has not yet determined the estimated impact on its financial condition or results of operations, if any, of adopting SFAS No. 157, which becomes effective for the fiscal years beginning after November 15, 2007.

Table of Contents

In February 2007, the FASB issued SFAS No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115.” SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. This Statement is expected to expand the use of fair value measurement, which is consistent with the Board’s long-term measurement objectives for accounting for financial instruments. The Company has not yet determined the estimated impact on its financial condition or results of operations, if any, of adopting SFAS No. 159, which becomes effective for the fiscal years beginning after November 15, 2007.

E. BUSINESS COMBINATION

On March 3, 2006, we acquired the hydraulic well control business (HWC) of Oil States International, Inc. (NYSE: OIS). The transaction was effective for accounting and financial purposes as of March 1, 2006. As consideration for the acquisition, we issued approximately 26.5 million shares, or approximately 45%, of our common stock and subordinated promissory notes with an aggregate balance of \$15 million, adjusted to \$21.2 million during the quarter ended June 30, 2006 to reflect a \$6.2 million adjustment for working capital acquired. Oil States International, Inc. sold 14.95 million shares of our common stock in April 2007 and owns approximately 15% of the Company as of the date of this report.

In accordance with SFAS No. 141, "*Business Combinations*", we used the purchase method to account for this transaction. Under the purchase method of accounting, the assets acquired and liabilities assumed from HWC were recorded at the date of acquisition at their respective fair values. In connection with the acquisition, we engaged a valuation firm to assist in the determination of the fair value of certain assets and liabilities of HWC. The purchase price, including direct acquisition costs, exceeded the fair value of acquired assets and assumed liabilities, resulting in the recognition of goodwill of approximately \$4.3 million. The total purchase price, including direct acquisition costs of \$1.4 million less cash acquired of \$4.4 million, was \$44.7 million. The operating results of HWC are included in the condensed consolidated financial statements subsequent to the March 1, 2006 effective date.

Table of Contents

The fair values of the assets acquired and liabilities assumed effective March 1, 2006 were as follows:

Current assets (excluding cash)	\$ 15,299
Property and equipment	39,645
Goodwill	4,326
Total assets acquired	59,270
Current liabilities	9,505
Deferred taxes	5,110
Total liabilities assumed	14,615
Net assets acquired	\$ 44,655

In accordance with the requirements of SFAS No. 142, "Goodwill and Other Intangible Assets", the goodwill associated with the acquisition will not be amortized, but will be reviewed at least annually for impairment or more often if changes in facts and circumstances indicate a loss in value has occurred. The goodwill related to this acquisition has been assigned to the Well Intervention segment which is deemed the reporting unit. The assessment of impairment on goodwill is conducted whenever changes in the facts and circumstances indicate a loss in value has occurred. In the fourth quarter of each year, the Company will perform an annual impairment assessment of goodwill based on the fair value of the Well Intervention reporting unit. The Company performed its annual review in the fourth quarter of 2006 and determined that no impairment was necessary.

The following unaudited pro forma financial information presents the combined results of operations of the Company and HWC as if the acquisition had occurred as of the beginning of the period presented. The unaudited pro forma financial information is not necessarily indicative of what our consolidated results of operations actually would have been had we completed the acquisition at the dates indicated. In addition, the unaudited pro forma financial information does not purport to project the future results of operations of the combined company.

Basic Shares Outstanding		58,232
Diluted Shares Outstanding		59,521

F. LONG-TERM DEBT AND NOTES PAYABLE

In conjunction with the acquisition of HWC on March 3, 2006, we entered into a Credit Agreement (the "Credit Agreement") with Wells Fargo Bank, National Association, which established a revolving credit facility capacity totaling \$10.3 million, subject to an initial borrowing base of \$6.0 million, and a term credit facility totaling \$9.7 million. The term credit facility is payable monthly over a period of sixty months and is payable in full on March 3, 2010, subject to extension under certain circumstances to March 3, 2011. The revolving credit facility is due and payable in full on March 3, 2010, subject to a year-to-year renewal thereafter. We utilized initial borrowings under the Credit Agreement totaling \$10.5 million to repay senior and subordinated debt in full and to repurchase all of our

outstanding shares of preferred stock and for other transaction related expenses. The loan balance outstanding on June 30, 2007 was \$6.8 million on the term credit facility and there was no balance on the revolving credit facility.

Table of Contents

At our option, borrowings under the Credit Agreement bear interest at either (i) Wells Fargo's prime commercial lending rate plus a margin ranging, as to the revolving credit facility up to 1.00%, and, as to the term credit facility, from 0.50% to 1.50% or (ii) the London Inter-Bank Market Offered Rate plus a margin ranging, as to the revolving credit facility, from 2.50% to 3.00% per annum, and, as to the term credit facility, from 3.00% to 3.50%, which margin increases or decreases based on the ratio of the outstanding principal amount under the Credit Agreement to our consolidated EBITDA. The interest rates applicable to borrowings under the revolving credit facility and the term credit facility at June 30, 2007 were 8.25% and 8.75%, respectively. Interest is accrued and payable monthly for both agreements. Fees on unused commitments under the revolving credit facility are due monthly and range from 0.25% to 0.50% per annum, based on the ratio of the outstanding principal amount under the Credit Agreement to our consolidated EBITDA.

Substantially all of our assets are pledged as collateral under the Credit Agreement. The Credit Agreement contains various restrictive covenants and compliance requirements, including: (1) maintenance of a minimum book net worth through December 31, 2006 equal to 90% of the pro forma book net worth calculated on March 1, 2006, but in no event less than \$25 million, or, for each fiscal year thereafter, equal to the greater of the minimum book net worth required for the preceding fiscal year or 85% of book net worth on the last day of the preceding fiscal year (for these purposes "book net worth" means the aggregate of our common and preferred stockholders' equity on a consolidated basis); (2) maintenance of a minimum ratio of our consolidated EBITDA less unfinanced capital expenditures to principal and interest payments required under the Credit Agreement, on a trailing twelve month basis, of 1.50 to 1.00; (3) notice within five (5) business days of making any capital expenditure exceeding \$500,000; and (4) limitation on the incurrence of additional indebtedness except for indebtedness arising under the subordinated promissory notes issued in connection with the HWC acquisition. We were in compliance with these covenants at June 30, 2007.

The \$15 million of unsecured subordinated debt issued to Oil States Energy Services, Inc. in connection with the HWC acquisition on March 3, 2006 was adjusted to \$21.2 million during the quarter ended June 30, 2006 to reflect a \$6.2 million adjustment for working capital acquired. The note bears interest at a rate of 10% per annum, and requires a one-time principal payment on September 9, 2010. Interest is accrued monthly and payable quarterly.

As of June 30, 2007 and December 31, 2006, long-term debt consisted of the following (in thousands):

	June 30, 2007	December 31, 2006
	(Unaudited)	
U.S. revolving credit facility, with available commitments up to \$10.3 million, a borrowing base of \$6.4 million as of June 30, 2007 and an interest rate of 8.25% as of June 30, 2007	\$	—\$ 1,917
U.S. term credit facility with initial borrowings of \$9.7 million, payable over 60 months and an interest rate of 8.75% as of June 30, 2007		6,837 8,349
Subordinated unsecured debt issued to Oil States Energy Services, Inc. with a fixed interest rate of 10%		21,166 21,166
Total debt		28,003 31,432
Less: current maturities		(1,940) (1,940)
Total long-term debt	\$	26,063 \$ 29,492

G. COMMITMENTS AND CONTINGENCIES

We are involved in or threatened with various legal proceedings from time to time arising in the ordinary course of business. Management does not believe that any liabilities resulting from any such proceedings will have a material adverse effect on our operations or financial position.

Table of Contents**H. EARNINGS PER SHARE**

Basic and diluted income per common share is computed by dividing net income attributable to common stockholders by the weighted average common shares outstanding. The weighted average number of shares used to compute basic and diluted earnings per share for the three and six months ended June 30, 2007 and 2006 are illustrated below (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
	(Unaudited)		(Unaudited)	
Numerator:				
For basic and diluted earnings per share:				
Net income attributable to common stockholders	\$ 274	\$ 2,632	\$ 738	\$ 3,926
Denominator:				
For basic earnings per share-weighted-average shares	70,916	58,436	65,092	48,667
Effect of dilutive securities:				
Stock options and warrants(1)	2,233	3,823	2,303	3,212
Denominator:				
For diluted earnings per share – weighted-average shares	73,149	62,259	67,395	51,879

(1) Excludes the effect of outstanding stock options and warrants that have an anti-dilutive effect on earnings per share for the three and six month periods ended June 30, 2007 and June 30, 2006.

The exercise price of our stock options and stock warrants varies from \$0.67 to \$3.00 per share. The maximum number of potentially dilutive securities at June 30, 2007, and 2006 included: (1) 5,916,000 and 6,635,000 common shares, respectively, issuable upon exercise of stock options, (2) 637,500 and 733,952, common shares, respectively, issuable upon exercise of stock purchase warrants, and (3) 60,000 and 120,000 shares of common stock, respectively, with the remaining 60,000 shares to be issued as compensation in October 2007.

I. EMPLOYEE “STOCK-BASED” COMPENSATION

We have adopted Statement of Financial Accounting Standards No. 123 (revised 2004), “Share-Based Payment” (“SFAS No. 123R”), which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees, consultants and directors; including employee stock options based on estimated fair values. SFAS No. 123R supersedes our previous accounting under Accounting Principles Board Opinion No. 25, “Accounting for Stock Issued to Employees” (“APB 25”) for periods beginning in fiscal year 2006. In March 2005, the SEC issued Staff Accounting Bulletin No. 107 (“SAB 107”) relating to SFAS No. 123R. We have applied the provisions of SAB 107 in our adoption of SFAS No. 123R.

We adopted SFAS No. 123R using the modified prospective transition method, which requires the application of the accounting standard as of January 1, 2006, the first day of our fiscal year 2006. Our condensed consolidated financial statements as of and for the three and six months ended June 30, 2007 and 2006 reflect the impact of SFAS No. 123R.

Table of Contents

We used the Black-Scholes option pricing model to estimate the fair value of options on the date of grant. The following assumptions were applied in determining stock-based employee compensation under SFAS No. 123R:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Risk-free interest rate	4.60%	4.61%	4.60%	4.59%
Expected dividend yield				
Expected option life	3.9 yrs	6.5 yrs	3.9 yrs	6.5 yrs
Expected volatility	60.8%	95.7%	60.8%	95.5%
Weighted average fair value of options granted at market value	\$ 1.03	\$ 1.16	\$ 1.03	\$ 1.15
Forfeiture rate	4.12%	2.59%	4.12%	2.59%

J. BUSINESS SEGMENT INFORMATION

Effective January 1, 2006, we redefined the segments in which we operate as a result of the acquisition of HWC. Our current business segments are “Well Intervention” and “Response”. Intercompany transfers between segments were not material. Our accounting policies for the operating segments are the same as those described in Note A, “Basis of Presentation”. For purposes of this presentation, operating expenses and depreciation and amortization have been charged to each segment based upon specific identification of expenses and an allocation of remaining non-segment specific expenses pro rata between segments based upon relative revenues. Selling, general and administrative and corporate expenses have been allocated between segments in proportion to their relative revenue. HWC’s results from and after March 1, 2006 are included in our consolidated operating results.

The Well Intervention segment consists of services that are designed to reduce the number and severity of critical well events and enhance production for oil and gas operators. The scope of these services includes training, contingency planning, well plan reviews, audits, inspection services and engineering services offered through our Safeguard programs and services offered in conjunction with our WELLSURE® risk management program. This segment also includes services performed by hydraulic workover and snubbing units that are used to enhance production of oil and gas wells. These units may also be used for underbalanced drilling, workover, completions and plug and abandonment services. A hydraulic unit is a specially designed rig used for moving tubulars in and out of a wellbore using hydraulic pressure. These units may be used for snubbing operations to service wells under pressure. When a unit is snubbing, it is pushing pipe or tubulars into the wellbore against wellbore pressures.

The Response segment consists of personnel, equipment and services provided during an emergency response such as a critical well event or a hazardous material response. These services include snubbing and other workover services provided during a response. These services are designed to minimize response time and mitigate damage while maximizing safety.

Information concerning segment operations for the three and six months ended June 30, 2007 and 2006 is presented below. Certain reclassifications have been made to the prior periods to conform to the current presentation.

Table of Contents

segments based upon relative revenues.

K. INCOME TAXES

Effective January 1, 2007, we adopted FASB Interpretation Number 48, "Accounting for Uncertainty in Income Taxes" (FIN 48), which is intended to clarify the accounting for income taxes by prescribing a minimum recognition threshold for a tax position before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. In accordance with the requirements of FIN 48, the Company evaluated all tax years still subject to potential audit under state, federal and foreign income tax law in reaching its accounting conclusions. As a result, the Company concluded it did not have any unrecognized tax benefits or any additional tax liabilities after applying FIN 48 as of the January 1, 2007 adoption date or as of the six months ended June 30, 2007. The adoption of FIN 48 therefore had no impact to the Company's consolidated financial statements. The Company recognizes interest and penalties related to uncertain tax positions in income tax expense. Tax years subsequent to 2005 remain open to examination by U.S. federal and state tax jurisdictions, tax years subsequent to 2003 remain open in Venezuela, and tax years subsequent to 2002 remain open in Algeria.

Table of Contents

We have determined that as a result of the acquisition of HWC we have experienced a change of control pursuant to limitations set forth in Section 382 of the IRS rules and regulations. As a result, we will be limited to utilizing approximately \$2.1 million of U.S. net operating losses (“NOL’s”) to offset taxable income generated by us during the tax year ended December 31, 2007 and expect similar dollar limits in future years until our U.S. NOL’s are either completely used or expire.

L. EQUITY OFFERING

On April 24, 2007, we concluded an underwritten public offering of 13 million shares of our common stock. The underwriters subsequently exercised their over-allotment option to purchase an additional 1.95 million shares of our common stock, which closed on April 26, 2007. We received proceeds from the offering, totaling approximately \$28.8 million, net of underwriting discounts and offering expenses. We have designated \$10 million of the net proceeds to fund international expansion opportunities in Algeria. Through June 30, 2007, we have spent \$2.1 million, with the remaining \$4.9 million to be spent in the third quarter of 2007 to purchase and deploy two hydraulic workover units and ancillary equipment. We utilized approximately \$10 million of the offering proceeds to expand our North American workover business with our acquisition of StassCo Pressure Control LLC on July 31, 2007. Approximately \$6.9 million is designated to expand into the rental tool business this year, including \$737,000 of expenditures made in the second quarter. The remainder of the offering proceeds are allocated to fund U.S. and other international expansion opportunities and for general corporate purposes.

M. SUBSEQUENT EVENT

On July 31, 2007, we acquired Rock Springs, Wyoming-based StassCo Pressure Control LLC (StassCo) for approximately \$10 million in cash. StassCo operates four hydraulic rig assist units in the Cheyenne basin in Wyoming.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-looking statements

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking information. Forward-looking information is based on projections, assumptions and estimates, not historical information. Some statements in this Form 10-Q are forward-looking and may be identified as such through the use of words like “may,” “may not,” “believes,” “do not believe,” “expects,” “do not expect,” “do not anticipate,” and other expressions. We may also provide oral or written forward-looking information on other materials we release to the public. Forward-looking information involves risks and uncertainties and reflects our best judgment based on current information. Actual events and our results of operations may differ materially from expectations because of inaccurate assumptions we make or by known or unknown risks and uncertainties. As a result, no forward-looking information can be guaranteed.

While it is not possible to identify all factors, the risks and uncertainties that could cause actual results to differ from our forward-looking statements include those contained in this 10-Q, our press releases and our Forms 10-Q, 8-K and 10-K filed with the United States Securities and Exchange Commission. We do not assume any responsibility to publicly update any of our forward-looking statements regardless of whether factors change as a result of new information, future events or for any other reason.

Overview

We provide a suite of integrated pressure control and related services to onshore and offshore oil and gas exploration and development companies, principally in North America, South America, North Africa, West Africa, and the Middle East. Our well intervention segment consists of services that are designed to enhance production for oil and gas operators and to reduce the number and severity of critical well events such as oil and gas well fires, blowouts, or other losses of control at the well. The scope of these services also includes training, contingency planning, well plan reviews, audits, inspection services, and engineering services. Our well intervention segment includes services performed by hydraulic workover and snubbing units that are used to enhance production of oil and gas wells. These units may be used for underbalanced drilling, workover, well completions and plugging and abandonment services. Our response segment consists of personnel, equipment and emergency services utilized during a critical well event.

Table of Contents

On March 3, 2006, we acquired the hydraulic well control business (HWC) of Oil States International, Inc. The transaction was effective for accounting and financial purposes as of March 1, 2006. As consideration for HWC, we issued approximately 26.5 million shares, or approximately 45%, of our common stock and subordinated promissory notes with an aggregate balance of \$15 million, adjusted to \$21.2 million during the quarter ended June 30, 2006, after a \$6.2 million adjustment for working capital acquired. Oil States International, Inc. sold 14.95 million shares of our common stock in April 2007 and now owns approximately 15% of the Company. As a result of the acquisition, we also provide hydraulic units for emergency well control situations and various well intervention solutions involving workovers, well drilling, well completions and plugging and abandonment services. Hydraulic units may be used for both routine and emergency well control situations in the oil and gas industry. A hydraulic unit is a specially designed rig used for moving tubulars in and out of a wellbore using hydraulic pressure. These units may also be used for snubbing operations to service wells under pressure. When a unit is snubbing, it is pushing pipe or tubulars into the wellbore against wellbore pressures.

The market for emergency well control services, or critical well events, is highly volatile due to factors beyond our control, including changes in the volume and type of drilling and workover activity occurring in response to fluctuations in oil and natural gas prices. Wars, acts of terrorism and other unpredictable factors may also increase the need for such services from time to time. As a result, we experience large fluctuations in our revenues from these services. Non-critical services, reported as our Well Intervention segment, provide more stable revenues and our strategy has been, and continues to be, to expand these product and service offerings to mitigate the revenue and earnings volatility associated with critical well event services.

Segment Information

Effective January 1, 2006, we redefined the segments in which we operate as a result of our acquisition of HWC. Our current business segments are “Well Intervention” and “Response”.

The Well Intervention segment consists of services that are designed to reduce the number and severity of critical well events and enhance production for oil and gas operators. The scope of these services includes training, contingency planning, well plan reviews, audits, inspection services and engineering services offered through our Safeguard programs and services offered in conjunction with our WELLSURE® risk management program. This segment also includes services performed by hydraulic workover and snubbing units that are used to enhance production of oil and gas wells. These units may also be used for underbalanced drilling, workover, well completions and plug and abandonment services.

The Response segment consists of personnel, equipment and services provided during an emergency response such as a critical well event or a hazardous material response. These services include snubbing and other workover services provided during a response which are designed to minimize response time and mitigate damage while maximizing safety.

Intercompany transfers between segments were not material. Our accounting policies for the operating segments are the same as those described in Note A, “Basis of Presentation” and as disclosed in our annual report on Form 10-K for the year ended December 31, 2006. For purposes of this presentation, operating expenses and depreciation and amortization have been charged to each segment based upon specific identification of expenses and an allocation of remaining non-segment specific expenses pro rata between segments based upon relative revenues. Selling, general and administrative and corporate expenses have been allocated between segments in proportion to their relative revenue. Business segment operating data from continuing operations is presented for purposes of management discussion and analysis of operating results. HWC’s operating results from and after March 1, 2006 are included in our consolidated operating results.

Results of operations

The following discussion and analysis should be read in conjunction with the unaudited condensed consolidated financial statements and notes thereto and the other financial information included in this report and contained in our periodic reports previously filed with the SEC.

Table of Contents

Information concerning operations in different business segments for the three and six months ended June 30, 2007 and 2006 is presented below. Certain reclassifications have been made to the prior periods to conform to the current presentation.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006

Response	1,328	178	1,682	714
	\$ 630	\$ 4,653	\$ 2,048	\$ 6,595

(1) Operating expenses and depreciation and amortization have been charged to each segment based upon specific identification of expenses and an allocation of remaining non-segment specific expenses pro rata between segments based upon relative revenues.

(2) Selling, general and administrative expenses have been allocated pro rata between segments based upon relative revenues and includes foreign exchange translation gains and losses.

Comparison of the Three Months Ended June 30, 2007 with the Three Months Ended June 30, 2006*Revenues*

Well Intervention revenues were \$18,343,000 for the quarter ended June 30, 2007, compared to \$22,806,000 for the quarter ended June 30, 2006, representing a decrease of \$4,463,000, or 19.6%, in the current quarter. The decrease was primarily the result of approximately \$4,100,000, or 23.0%, reduction of hydraulic workover revenues due to lower activity levels in the US and Venezuela. There was also a decrease in the Gulf of Mexico remediation work of \$848,000. The decreases were offset by a Safeguard revenue increase of \$986,000, or 29.9%, for the quarter ended June 30, 2007 compared to the prior year second quarter.

Table of Contents

Response revenues were \$3,612,000 for the quarter ended June 30, 2007, compared to \$666,000 for the quarter ended June 30, 2006, an increase of \$2,946,000, or 442.3% in the current quarter. The increase includes \$2,423,000 response revenue in Venezuela.

Cost of Sales

Well Intervention cost of sales were \$12,723,000 for the quarter ended June 30, 2007, compared to \$12,663,000 for the quarter ended June 30, 2006, an increase of \$60,000, or 0.5%, in the current quarter. The dollar increase was the result of the change in the revenue mix from quarter to quarter and semi-fixed costs related to the lower hydraulic workover activity. This increase can also be attributed to higher cost related to hydraulic workover in the Middle East and Safeguard.

Response cost of sales were \$1,115,000 for the quarter ended June 30, 2007, compared to \$145,000 for the quarter ended June 30, 2006, an increase of \$970,000, or 669.0%. During the current quarter, cost of sales represented 30.8% of revenues compared to 21.8% of revenues in the prior year quarter. This 9.0% increase was primarily due to an increase in third party equipment rental expense in the current quarter.

Operating Expenses

Consolidated operating expenses were \$4,527,000 for the quarter ended June 30, 2007, compared to \$3,461,000 for the quarter ended June 30, 2006, an increase of \$1,066,000, or 30.8%, in the current quarter. This increase is primarily due to support personnel costs which include start up expenses of \$640,000 for the operations in North Texas, Middle East and North Africa in the hydraulic workover and Safeguard businesses.

Selling, General and Administrative Expenses

Consolidated selling, general and administrative expenses (SG&A) and other operating expenses were \$1,564,000 for the quarter ended June 30, 2007, compared to \$1,094,000 for the quarter ended June 30, 2006, an increase of \$470,000, or 43.0%, in the current quarter. During the current quarter, SG&A and other operating expenses represented 7.1% of revenues compared to 4.7% of revenues in the prior year quarter. The increase in total SG&A expense was primarily due to increases in salaries and benefits, advertising and trade show expenses, investor relations expenses, and director expenses. The increases were offset by decreases in professional fees and bonus expense.

Depreciation and Amortization

Consolidated depreciation and amortization expense decreased by \$60,000 in the quarter ended June 30, 2007 compared to the quarter ended June 30, 2006 due to certain assets being fully depreciated prior to the end of the second quarter of 2007.

Interest Expense and Other Expenses, net,

Net interest and other expenses decreased by \$545,000 in the quarter ended June 30, 2007 compared to the prior year quarter. Interest expense decreased by \$293,000 as a result of paying down debt with proceeds from the public offering and the capitalization of interest expense. The interest income increase of \$252,000 was due to earnings from funds received from the underwritten public offering of 14.95 million shares of our common stock in April 2007.

Income Tax Expense

Income taxes for the quarter ended June 30, 2007 totaled \$109,000, or 28.5% of pre-tax income compared to the quarter ending June 30, 2006 total of \$1,229,000, or 31.8% of pre-tax income. The decrease in the quarter-to-date effective tax rate is largely due to the higher portion of 2007 net income before taxes from foreign sources with lower tax rates. The decrease in tax expense for the quarter ended June 30, 2007 compared to the prior year quarter is due to a decrease in net income before tax and the decrease in the effective tax rate.

Table of Contents

Comparison of the Six Months Ended June 30, 2007 with the Six Months Ended June 30, 2006

Revenues

Well Intervention revenues were \$39,186,000 for the six months ended June 30, 2007, compared to \$32,837,000 for the six months ended June 30, 2006, an increase of \$6,349,000, or 19.3% in the current period. The increase was primarily the result of an additional revenue of \$5,309,000 due to the inclusion of six months of hydraulic workover revenue in the current year compared to four months of hydraulic workover revenue in the prior year. Safeguard revenues increased \$3,304,000, or 46.8%, in the first six months of 2007 compared to the same period in 2006, due to an increase in international revenues, primarily in Algeria. These increases were offset by a decrease in the Gulf of Mexico remediation work of \$2,096,000.

Response revenues were \$5,025,000 for the six months ended June 30, 2007, compared to \$2,155,000 for the six months ended June 30, 2006, an increase of \$2,870,000, or 133.2%, in the current period. The increase was primarily due to \$2,423,000 of response revenue in Venezuela.

Cost of Sales

Well Intervention cost of sales were \$26,523,000 for the six months ended June 30, 2007, compared to \$17,672,000 for the six months ended June 30, 2006, an increase of \$8,851,000, or 50.1%, in the current period. The increase was primarily the result of an additional cost of sales of \$7,197,000 due to the inclusion of six months of hydraulic workover cost of sales in the current year compared to four months in the prior year. The dollar increase was also the result of the change in the revenue mix and semi-fixed costs related to the lower hydraulic workover activity. This increase can also be attributed to higher cost related to hydraulic workover business in the Middle East and Safeguard.

Response cost of sales were \$1,310,000 for the six months ended June 30, 2007, compared to \$436,000 for the six months ended June 30, 2006, an increase of \$874,000, or 200.5%, in the current period. During the six months ended June 30, 2007, cost of sales represented 26.0% of revenues compared to 20.2% of revenues in the prior year. The 5.8% increase was primarily due to an increase in third party equipment rental expense in the current year.

Operating Expenses

Consolidated operating expenses were \$8,986,000 for the six months ended June 30, 2007, compared to \$6,331,000 for the six months ended June 30, 2006, an increase of \$2,655,000, or 41.9% in the current period. The increase was primarily the result of an additional \$1,418,000 due to the inclusion of six months of hydraulic workover operating expense in the current year compared to four months in the prior year as well as additional support personnel costs which include start up expenses of \$840,000 for the operations in North Texas, Middle East and North Africa in the hydraulic workover and Safeguard businesses.

Selling, General and Administrative Expenses

Consolidated selling, general and administrative expenses (SG&A) were \$2,634,000 for the six months ended June 30, 2007, compared to \$1,930,000 for the six months ended June 30, 2006, an increase of \$704,000, or 36.5%, in the current period. During the six months ended June 30, 2007, SG&A expense represented 6.0% of revenues compared to 5.5% of revenues in the prior year. This increase in total SG&A expense is primarily due to salaries and benefits, advertising and trade show expenses, and director expenses. The increases were offset by decreases in professional fees and bonus expense.

Table of Contents

Depreciation and Amortization

Consolidated depreciation and amortization expense increased by \$682,000 between the six months ended June 30, 2007 and 2006. The increase was primarily due to an additional \$704,000 resulting from the inclusion of six months of hydraulic workover depreciation in the current year compared to four months of hydraulic workover depreciation in the prior year and partially offset by certain assets being fully depreciated prior to June 30, 2007.

Interest Expense and Other Expenses, net,

Net interest and other expenses decreased by \$369,000 in the six months ended June 30, 2007 compared to the prior year period. The interest expense decrease was primarily due to capitalized interest expense of \$240,000 in 2007. The interest income increase of \$270,000 was due to earnings from funds received from the underwritten public offering of 14.95 million shares of our common stock in April 2007.

Income Tax Expense

Income taxes for the six months ended June 30, 2007 were \$330,000, or 30.9% of pre-tax income compared to the six months ending June 30, 2006 of \$1,936,000, or 36.9% of pre-tax income. The decrease in the year-to-date effective rate for the six months ended June 30, 2007 compared to six months ended June 30, 2006 is due to the higher portion of 2007 net income before taxes from foreign sources with lower tax rates. The decrease in tax expense for the six months ended June 30, 2007 compared to the prior year period is due to a decrease in net income before tax and the decrease in the effective tax rate.

Liquidity and Capital Resources

Liquidity

At June 30, 2007, we had working capital of \$50,707,000, including an unrestricted cash balance of \$29,583,000. We ended the period with stockholders' equity of \$69,194,000. For the six months ended June 30, 2007, we generated operating income of \$2,048,000 and net cash provided by operating activities was \$4,840,000 compared to \$3,689,000 in the six months ended June 30, 2006. Net cash used by investing activities was \$6,274,000, which included \$6,552,000 in capital expenditures.

In early April 2007, we were notified by an existing customer in Qatar that as a result of changes to its well completion plans, it would no longer require snubbing services. As a consequence, the customer no longer requires the services of a rig assist unit that we had procured and deployed to the region. Under the terms of our contract with the customer, the customer has the option to either obtain ownership of the unit by paying us a lump cash sum of \$4.2 million, which is approximately equal to our costs for procuring the rig assist unit and transporting it, or to make installment payments to us over a period of 24 months totaling approximately \$4.0 million, in which case we would retain ownership of the unit. We are negotiating with the customer with the objective of retaining ownership of the unit and resolving all amounts subject to reimbursement in exchange for a lump cash sum at a discount to the \$4.0 million that we would be entitled to receive over 24 months under this option; however, we have not yet concluded an agreement in this regard.

On June 26, 2007, one of our hydraulic workover units and its auxiliary equipment was lost as a consequence of the sinking of a third party service vessel off the coast of the Republic of Congo. We believe that substantially all of our costs to replace the lost unit and its auxiliary equipment, estimated to be approximately \$2.5 million, will be offset by recoveries under insurance policies. As a consequence of the loss of the unit, our customer exercised its contractual right to terminate the contract for the unit. However, we have entered into a nonbinding letter of intent for a new three

year agreement with the customer pursuant to which we will effectively receive standby personnel payments from July 1, 2007 until delivery of the replacement unit and, thereafter, daily day rates slightly higher than under the terminated agreement. The customer has also agreed to reimburse us for our costs to mobilize the replacement equipment. As a consequence, we expect our revenue losses to be limited to the day rate we would have been paid for the under the prior contract (approximately \$230,000 per month) until the commencement of operations under the new contract, which is expected to occur on or about October 1, 2007.

Table of Contents

On April 24, 2007, we concluded an underwritten public offering of 13 million shares of our common stock. The underwriters subsequently exercised their over-allotment option to purchase an additional 1.95 million shares of our common stock, which closed on April 26, 2007. We received proceeds from the offering, totaling approximately \$28.8 million, net of underwriting discounts and offering expenses. We intend to use \$10 million of the net proceeds to fund international expansion opportunities in Algeria. Through June 30, 2007, we have spent \$2.1 million and expect to spend \$4.9 million in the third quarter of 2007 to purchase and deploy two hydraulic workover units and ancillary equipment. We utilized approximately \$10 million of the offering proceeds to expand our North American workover business with our acquisition of StassCo Pressure Control LLC on July 31, 2007. We expect to utilize approximately \$6.9 million this year expanding into the rental tool business, including \$737,000 of expenditures made in the second quarter. We intend to use the remainder of the offering proceeds to fund U.S. and other international expansion opportunities and for general corporate purposes.

We generate our revenues by providing oilfield services centered on the prevention, emergency response and remediation of well blowouts and fires around the world. The market for emergency well control services, or critical well events, is highly volatile due to factors beyond our control, including changes in the volume and type of drilling and work-over activity occurring in response to fluctuations in oil and natural gas prices. Wars, acts of terrorism and other unpredictable factors may also increase the need for such services from time to time. As a result, we experience large fluctuations in our revenues from these services. Non-critical services, reported as our Well Intervention segment, provide more stable revenues and our strategy has been, and continues to be, to expand our product and service offerings to mitigate the revenue and earnings volatility associated with critical well event services. The addition of HWC has generated additional Well Intervention service revenue in key markets and we expect that it will afford us an opportunity to expand our presence in the snubbing market.

We operate internationally, giving rise to exposure to market risks from changes in foreign currency exchange rates to the extent that transactions are not denominated in U.S. Dollars. We typically endeavor to denominate our contracts in U.S. Dollars to mitigate exposure to fluctuations in foreign currencies. On June 30, 2007, we had \$2,992,000 of cash and \$10,928,000 in accounts receivable attributable to our Venezuelan operations. Of this cash, \$2,257,000 was denominated in U.S. Dollars and resided in a U.S. bank; the remaining \$735,000 was denominated in Bolivars and resided in a Venezuelan bank. Venezuela trade accounts receivables of \$2,883,000 were denominated in Bolivars and are subject to market risks. The remaining \$8,045,000 accounts receivables are denominated in U.S. Dollars.

The Venezuelan government implemented a foreign currency control regime on February 5, 2003. This has resulted in currency controls that restrict the conversion of the Venezuelan currency, the Bolivar, to U.S. Dollars. HWC has registered with the control board (CADIVI) in order to have a portion of total receivables in U.S dollar payments made directly to a United States bank account. Venezuela is also on the U.S. government's "watch list" for highly inflationary economies. Management continues to monitor the situation closely.

Effective January 1, 2006, and related to the acquisition of HWC, we changed our functional currency in Venezuela from the Venezuelan Bolivar to the U.S. Dollar. This change allows us to have one consistent functional currency after the acquisition. Accumulated other comprehensive loss reported in the consolidated statements of stockholders' equity before January 1, 2006 totaled \$1.2 million and consisted solely of the cumulative foreign currency translation adjustment in Venezuela prior to changing our functional currency. In accordance with SFAS No. 52, "Foreign Currency Translation," the currency translation adjustment recorded up through the date of the change in functional currency will only be adjusted in the event of a full or partial disposition of our investment in Venezuela.

Table of Contents**Disclosure of on and off balance sheet debts and commitments**

Description	Future Commitments (000's)			
	Total	Less than 1 year	1-3years	3-5 years
Long and short term debt and notes payable				
Term loan	\$ 6,837	\$ 1,940	\$ 3,880	\$ 1,017
Revolving credit facility	—	—	—	—
Subordinated debt (a)	\$ 21,166	—	—	\$ 21,166
Future minimum lease payments	\$ 2,555	\$ 541	\$ 1,016	\$ 998
Total commitments	\$ 30,558	\$ 2,481	\$ 4,896	\$ 23,181

(a) Includes \$15,000,000 of notes issued to Oil States Energy Services, Inc. and an additional \$6,166,000 adjustment for working capital acquired at March 1, 2006, in connection with the acquisition.

Credit Facilities/Capital Resources

In conjunction with the acquisition of HWC on March 3, 2006, we entered into a Credit Agreement (the "Credit Agreement") with Wells Fargo Bank, National Association, which established a revolving credit facility capacity totaling \$10.3 million, subject to an initial borrowing base of \$6.0 million, and a term credit facility totaling \$9.7 million. The term credit facility is payable monthly over a period of sixty months and is payable in full on March 3, 2010, subject to extension under certain circumstances to March 3, 2011. The revolving credit facility is due and payable in full on March 3, 2010, subject to a year to year renewal thereafter. We utilized initial borrowings under the Credit Agreement totaling \$10.5 million to repay senior and subordinated debt in full and to repurchase all of our outstanding shares of preferred stock and for transaction related costs. The loan balance outstanding on June 30, 2007 was \$6.8 million on the term credit facility, zero on the revolving credit facility. The revolving credit facility borrowing base was \$6.4 million at June 30, 2007, leaving \$5.5 million available to be drawn under the facility. The borrowing base is subject to \$0.9 million outstanding under letters of credit. We believe that cash on hand, cash from operations and amounts available under our credit facilities will be sufficient to meet our liquidity needs in the coming twelve months.

At our option, borrowings under the Credit Agreement bear interest at either (i) Wells Fargo's prime commercial lending rate plus a margin ranging, as to the revolving credit facility up to 1.00%, and, as to the term credit facility from 0.50% to 1.50% or (ii) the London Inter-Bank Market Offered Rate plus a margin ranging, as to the revolving credit facility, from 2.50% to 3.00% per annum, and, as to the term credit facility, from 3.00% to 3.50%, which margin increases or decreases based on the ratio of the outstanding principal amount under the Credit Agreement to our consolidated EBITDA. The interest rate applicable to borrowing under the revolving credit facility and the term credit facility at June 30, 2007 was 8.25 % and 8.75%, respectively. Fees on unused commitments under the revolving credit facility are due monthly and range from 0.25% to 0.50% per annum, based on the ratio of the outstanding principal amount under the Credit Agreement to our consolidated EBITDA.

Substantially all of our assets are pledged as collateral under the Credit Agreement. The Credit Agreement contains various restrictive covenants and compliance requirements, including: (1) maintenance of a minimum book net worth through December 31, 2006 equal to 90% of the pro forma book net worth calculated on March 1, 2006, but in no event less than \$25 million, or, for each fiscal year thereafter, equal to the greater of the minimum book net worth required for the preceding fiscal year or 85% of book net worth on the last day of the preceding fiscal year (for these purposes "book net worth" means the aggregate of our common and preferred stockholders' equity on a consolidated

basis); (2) maintenance of a minimum ratio of our consolidated EBITDA less unfinanced capital expenditures to principal and interest payments required under the Credit Agreement, on a trailing twelve month basis, of 1.50 to 1.00; (3) notice within five (5) business days of making any capital expenditure exceeding \$500,000; and (4) limitation on the incurrence of additional indebtedness, except for indebtedness arising under the subordinated promissory notes issued in connection with the HWC acquisition. We were in compliance with these covenants at June 30, 2007.

Table of Contents

The \$15 million of unsecured subordinated debt issued to Oil States Energy Services, Inc., in connection with the HWC acquisition was adjusted to \$21.2 million during the quarter ended June 30, 2006, after a \$6.2 million adjustment for working capital acquired. The note bears interest at a rate of 10% per annum, and requires a one-time principal payment on September 9, 2010.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The nature of our Response revenue stream is unpredictable from quarter to quarter and from country to country such that any history of geographic split does not represent a trend. During the first six months of 2007, foreign revenues were 80% of total revenue. Revenue generated by Venezuela and Algeria during the first six months of 2007 was 23% and 25%, respectively. The remaining foreign revenues were primarily generated by Congo, Dubai, and Egypt; however, none of these areas generated more than 11% of total revenue. Revenue generated by both Venezuela and Algeria during the first six months of 2006 was 24% and 19%, respectively. See “Liquidity and Capital Resources – Liquidity” for more information regarding our foreign currency risks.

Our debt consists of both fixed-interest and variable-interest rate debt; consequently, our earnings and cash flows, as well as the fair values of its fixed-rate debt instruments, are subject to interest-rate risk. We have performed sensitivity analyses on the variable-interest rate debt to assess the impact of this risk based on a hypothetical 10% increase in market interest rates.

We have a term loan and a revolving line of credit that are subject to the risk of loss associated with movements in interest rates. As of June 30, 2007, we had floating rate obligations totaling approximately \$6.8 million. See “Liquidity and Capital Resources – Credit Facilities/Capital Resources” for more information. These floating rate obligations expose us to the risk of increased interest expense in the event of increases in short-term interest rates. If the floating interest rate was to increase by 10% from the June 30, 2007 levels, our interest expense would increase by a total of approximately \$68,000 annually.

Item 4. Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) under the Securities and Exchange Act of 1934, as amended (the “Exchange Act”), as of June 30, 2007. Our Chief Executive Officer and Chief Financial Officer concluded, based upon their evaluation, that our disclosure controls and procedures are effective to ensure that the information required to be disclosed in reports that we file under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms.

PART II

Item 1. Legal Proceedings

We are involved in or threatened with various legal proceedings from time to time arising in the ordinary course of business. We do not believe that any such proceedings will have a material adverse effect on our operations or financial position.

Table of Contents

Item 1A. Risk Factors

See Risk Factors under Item 1A included in the Company's Form 10-K for the year ended December 31, 2006 and form 10-Q for the quarter ended March 31, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None

Item 3. Default Upon Senior Securities

None

Item 4. Submissions of Matters to a Vote of Security Holders

On June 20, 2007 we convened our annual meeting of the stockholders in Houston, Texas. At the meeting, the stockholders were asked to elect three Class I directors for a term of three years or until their successors have been duly elected and qualified.

The voting was as follows:

Proposal I: Election of Class I Directors.

	FOR	WITHHELD	ABSTAINING	BROKER NON-VOTES
W . R i c h a r d Anderson	66,189,727	947,197		
Robert S. Herlin	66,421,062	715,862		
Robert G. Croyle	66,308,207	828,717		

Each of the directors was elected by the holders of more than a plurality of the shares present, in person or by proxy, at the annual meeting.

Also continuing to serve their terms as directors of the Company after the annual meeting were E.J. DiPaolo, K. Kirk Krist, Douglas E. Swanson, Jerry L. Winchester and Cindy B. Taylor.
