REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To Participants and Cameron Benefits Committee
Cameron International Corporation Retirement Savings Plan:

We have audited the accompanying statement of net assets available for benefits of the Cameron International Corporation Retirement Savings Plan (the "Plan"), as of December 31, 2012 and the related statement of changes in net assets available for benefits for the year ended December 31, 2012. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of the Plan for the year ended December 31, 2011 were audited by other auditors whose report dated June 27, 2012, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Plan is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2012, and the changes in its net assets available for benefits for the year ended December 31, 2012, in conformity with accounting principles generally accepted in the United States of America.

Our audit was performed for the purpose of forming an opinion on the financial statements taken as a whole. The accompanying supplemental schedule of assets (held at end of year) as of December 31, 2012 is presented for purposes of additional analysis and is not a required part of the basic financial statements, but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. This supplemental schedule is the responsibility of the Plan's management. This supplemental schedule has been subjected to the auditing procedures applied in the audit of the 2012 basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To Participants and Cameron Benefits Committee
Cameron International Corporation Retirement Savings Plan:

In our opinion, the accompanying statement of net assets available for benefits presents fairly, in all material respects, the net assets available for benefits of the Cameron International Corporation Retirement Savings Plan (the Plan) at December 31, 2011 in conformity with generally accepted accounting principles in the United States of America.

This financial statement is the responsibility of the Plan's management. Our responsibility is to express an opinion on this financial statement based on our audit. We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement and assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

Cameron International Corporation Retirement Savings Plan

Notes to Financial Statements

1. Description of the Plan

The Cameron International Corporation Retirement Savings Plan (the “Plan”) is a contributory, defined contribution plan sponsored by Cameron International Corporation (the “Company”) with cash or deferred provisions as described in Section 401(k) of the Internal Revenue Code (“IRC”). All employees of the Company and its affiliated subsidiaries (except those covered by a collective bargaining agreement) that have adopted the Plan are eligible to participate in the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”).

On January 19, 2012, the Company acquired Elco Filtration and Testing, Inc. (Elco) and sponsorship of the Elco Filtration and Testing Inc. 401(k) Profit Sharing and Trust was transferred to the Company on April 8, 2012. At this time, all participants in the Elco plan were eligible to receive benefits in accordance with the provisions of the Plan. Effective July 10, 2012, Elco’s plan assets totaling \$833,711 were transferred into the Plan.

Plan participants can elect to make pretax contributions to the Plan of 1% to 50% of their compensation each payroll period not to exceed the annual limit specified by section 402(g) of the IRC. The Company matches 100% of the employee contributions up to a maximum of 6% and provides an additional nondiscretionary retirement contribution equal to 3% of each eligible employee’s pay.

Participants are 100% vested in the Company’s matching contributions. Retirement and profit sharing contributions become 100% vested upon completion of three years of service. Contributions are allocated among the fund options based on employee elections. Amounts which are forfeited due to termination of employment reduce the future retirement contributions of the Company. In 2012, forfeited nonvested accounts totaling \$1,509,703 were used to reduce employer contributions.

Participants who attain age 50 during the Plan year and who have made the maximum permitted contributions to the Plan for such Plan year may also make additional “catch-up contributions” limited to a specified amount each year. Catch-up contributions are 100% vested and are eligible for safe harbor matching contributions to the extent the catch-up contributions fall within the Plan’s regular matching contribution formula.

Any participant who is receiving compensation other than severance pay from the Company and who has not had an outstanding loan from the Plan for at least one month may apply for a loan from the Plan. Any loan granted to such a participant shall be deemed an investment made for such participant’s benefit and shall be held and reflected in the separate accounts of such participant as a charge against their account for the principal amount of the loan. The interest rate charged on the loan is a fixed rate for the term of the loan as determined by the Company in the year of issuance. Loans may be made for up to five years, unless the loan is for the purchase of a primary residence, in which case the loan may extend for up to ten years from issuance.

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants would become 100% vested in their retirement and profit sharing contributions.

More detailed information about the Plan, including the funding, vesting and benefit provisions, is contained in the Summary Plan Description. A copy of this pamphlet is available at the Company’s corporate office.

2. Significant Accounting Policies

Accounting Principles

The accompanying financial statements of the Plan have been prepared on the accrual basis of accounting.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates that affect amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

As required under generally accepted accounting principles, the statements of net assets available for benefits present investment contracts at fair value as well as an additional line item showing an adjustment of fully benefit-responsive investment contracts from fair value to contract value. The statement of changes in net assets available for benefits is prepared on a contract value basis for the fully benefit-responsive investment contracts.

5

Contents

Employer matching, retirement and profit sharing contributions and employee contributions are recorded in the period in which the related employee services are rendered.

Benefit payments to participants are recorded upon distribution.

Notes receivable from Plan participants consist of monies borrowed by participants from their account balances in the Master Trust funds. Repayments of principal and interest are allocated to the participants' account balances in the Master Trust funds based on the participants' current investment elections. Notes receivable from Plan participants are reported at their current outstanding principal balance, which approximates fair value.

Certain prior year amounts have been reclassified to conform to the current year presentation.

Investments

The Plan's investments are held in the Cameron International Corporation Master Trust ("Master Trust"). T. Rowe Price Trust Company serves as trustee of the Master Trust. The Plan participates in only certain investment accounts of the Master Trust. The fair value of the Plan's interest in the Master Trust is based on the specific interests that it has in each of the underlying participant-directed investment accounts.

The following is a summary of those investment accounts and the Plan's beneficial interest in those investment accounts as of December 31, 2012 and 2011.

	Beneficial Interest	
	at	
	December 31,	
	2012	2011

Managed Income Portfolio	–	100.00

Purchases and sales of securities by the Master Trust are recorded on a trade-date basis. Interest income is recorded as earned. Dividends are recorded as of the ex-dividend date.

Financial Accounting Standards Board Accounting Standards Codification Topic 820, Fair Value Measurements, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Level 2 measurements include observable inputs other than quoted prices in active markets for identical assets and liabilities.

6

Contents

Common stocks are valued at the closing price reported on the active market on which the individual securities are traded.

Mutual and money market funds are valued at the net asset value (NAV) of shares held by the Plan at year end.

Collective trusts are valued at the unit of participation value of shares held by the Plan at year end.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although management of the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The Plan's policy is to disclose transfers between levels based on valuations at the end of the reporting period. There were no transfers between Levels 1 and 2 as of December 31, 2012.

The following table sets forth by level, within the fair value hierarchy, the investments of the Master Trust as of December 31, 2012:

	Investments at Fair Value at December 31, 2012		
	Level 1	Level 2	Total
Master Trust Investments:			
Mutual funds:			
U.S. equity funds	\$ 338,951,813	–	\$ 338,951,813

Contents

The PRIMCO Stable Value Fund (“Stable Value Fund”) is a master trust investment account managed by AMVESCAP National Trust Company, an affiliate of INVESCO Institutional (N.A.), Inc., the trustee of the INVESCO Group Trust for Retirement Savings, a Common Collective Trust, in which the assets of multiple qualified plans are invested. The Stable Value Fund invests in actively managed synthetic bank and insurance company investment contracts (“SICs”) and in guaranteed investment contracts (“GICs”). These contracts have varying yields and maturity dates and are fully benefit responsive. These contracts are stated at contract value which represents cost plus accrued income. The fair value of the GICs has been estimated by discounting the related cash flows based on current yields of similar instruments with comparable durations. Individual assets of the SICs are valued at representative quoted market prices. The fair value of the wrap contracts for the SICs is determined using the market approach discounting methodology which incorporates the difference between current market level rates for contract level wrap fees and the wrap fee being charged. The difference is calculated as a dollar value and discounted by the prevailing interpolated swap rate as of period-end.

Although it is management’s intention to hold the investment contracts until maturity, certain investment contracts provide for adjustments to contract value for withdrawals made prior to maturity.

Risk and Uncertainties

The Master Trust provides for various investments which, in general, are exposed to interest rate, credit and overall market volatility risks. Due to the level of risk associated with certain investment securities, it is likely that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits and individual participant account balances.

3. Separate Investment Accounts of the Cameron International Corporation Master Trust

The purpose of the Master Trust is the collective investment of the assets of participating employee benefit plans of the Company. Master Trust assets are allocated among participating plans by assigning to each plan those transactions (primarily contributions, participant loan transactions, benefit payments and certain administrative expenses) which can be specifically identified and by allocating among all plans, in proportion to the fair value of the assets assigned to each plan, the income and expenses resulting from the collective investment of the assets. The Master Trust includes assets of other employee benefit plans in addition to this Plan.

8

Contents

Investment income (loss) and the net realized and unrealized appreciation (depreciation) in fair value of the investments held throughout the year or bought and sold during the year in the separate investment accounts of the Master Trust are as follows:

Administrative expenses paid by the Master Trust for the year ended December 31, 2012 totaled \$1,417,944, of which \$1,333,597 has been allocated to the Plan.

Stable Value Fund

Objectives of the Stable Value Fund

The Stable Value Fund's key objectives are to provide preservation of principal, maintain a stable interest rate, and provide daily liquidity at contract value for participant withdrawals and transfers in accordance with the provisions of the Plan.

Nature of Investment Contracts

To accomplish the objectives outlined above, the Stable Value Fund invests primarily in investment contracts such as GICs and SICs. In a traditional GIC, the issuer takes a deposit from the Stable Value Fund and purchases investments that are held in the issuer's general account. The issuer is contractually obligated to repay the principal and a specified rate of interest guaranteed to the Stable Value Fund.

With regard to a SIC, the underlying investments are owned by the Stable Value Fund and held in trust for Plan participants. The Stable Value Fund purchases a wrapper contract from an insurance company or bank. The wrapper contract amortizes the realized and unrealized gains and losses on the underlying fixed income investments, typically

over the duration of the investments, through adjustments to the future interest crediting rate (which is the rate earned by participants in the Stable Value Fund for the underlying investments). The issuer of the wrapper contract provides assurance that the adjustments to the interest crediting rate do not result in a future interest crediting rate that is less than zero. An interest crediting rate less than zero would result in a loss of principal or accrued interest.

9

Contents

Calculating the Interest Crediting Rate in Wrapper Contracts

The key factors that influence future interest crediting rates for a wrapper contract include:

- The level of market interest rates
- The amount and timing of participant contributions, transfers and withdrawals into/out of the wrapper contract
- The investment returns generated by the fixed income investments that back the wrapper contract
- The duration of the underlying investments backing the wrapper contract

Wrapper contracts' interest crediting rates are typically reset on a monthly or quarterly basis. Over time, the interest crediting rate amortizes the Stable Value Fund's realized and unrealized market value gains and losses over the duration of the underlying investments.

Because changes in market interest rates affect the yield to maturity and the market value of the underlying investments, they can have a material impact on the wrapper contract's interest crediting rate. In addition, participant withdrawals and transfers from the Stable Value Fund are paid at contract value but funded through the market value liquidation of the underlying investments, which also impacts the interest crediting rate. The resulting gains and losses in the market value of the underlying investments relative to the wrapper contract value are represented on the Stable Value Fund's Statement of Net Assets as the "adjustment from fair value to contract value for fully benefit-responsive investment contracts". If the adjustment from fair value to contract value is positive for a given contract, this indicates that the wrapper contract value is greater than the market value of the underlying investments. The embedded market value losses will be amortized in the future through a lower interest crediting rate than would otherwise be the case. If the adjustment from fair value to contract value figure is negative, this indicates that the wrapper contract value is less than the market value of the underlying investments. The amortization of the embedded market value gains will cause the future interest crediting rate to be higher than it otherwise would have been.

All wrapper contracts provide for a minimum interest crediting rate of zero percent. In the event that the interest crediting rate should fall to zero and the requirements of the wrapper contract are satisfied, the wrapper issuers will pay to the Plan the shortfall needed to maintain the interest crediting rate at zero. This helps to ensure that participants' principal and accrued interest will be protected.

Events That Limit the Ability of the Stable Value Fund to Transact at Contract Value

In certain circumstances, the amount withdrawn from the wrapper contract would be payable at fair value rather than at contract value. These events include termination of the Plan, a material adverse change to the provisions of the Plan, if the Company elects to withdraw from a wrapper contract in order to switch to a different investment provider, or if the terms of a successor plan (in the event of the spin-off or sale of a division) do not meet the wrapper contract issuer's underwriting criteria for issuance of a clone wrapper contract.

Issuer-Initiated Contract Termination

Examples of events that would permit a wrapper contract issuer to terminate a wrapper contract upon short notice include the Plan's loss of its qualified status, uncured material breaches of responsibilities, or material and adverse changes to the provisions of the Plan. If one of these events was to occur, the wrapper contract issuer could terminate the wrapper contract at the market value of the underlying investments (or in the case of a traditional GIC, at the hypothetical market value based upon a contractual formula).

4. Income Tax Status

The Plan received a determination letter from the Internal Revenue Service dated November 24, 2009 stating that the Plan is qualified under Section 401(a) of the IRC and, therefore, the related trust is exempt from taxation. Subsequent to the issuance of this determination letter, the Plan was amended. Once qualified, the Plan is required to operate in conformity with the IRC to maintain its qualification. The Plan administrator believes the Plan is being operated in compliance with the applicable requirements of the IRC and, therefore, believes that the Plan, as amended, continues to be qualified, the related trust remains tax exempt, and the Plan is no longer subject to income tax examinations for years prior to 2008.

5. Subsequent Events

On November 15, 2012, the Company and Schlumberger announced their intent to create OneSubsea, a joint venture to manufacture and develop products, systems and services for the subsea oil and gas market. In connection with the formation of the joint venture, a new plan, One SubSea LLC Retirement Savings Plan (OneSubsea Plan) was established. Effective April 1, 2013, all the Company's Subsea division employees' existing balances in the Plan, totaling \$99,968,019, were transferred to the newly created OneSubsea Plan.

The Plan Sponsor has evaluated subsequent events through June 27, 2013, which is the date these financial statements were filed with U.S. Securities and Exchange Commission.

6. Reconciliation of Financial Statements to Form 5500

The following is a reconciliation of net assets available for benefits per the financial statements at December 31, 2012 and 2011 to the respective Forms 5500:
