FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2006

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 0-14237

FIRST UNITED CORPORATION

(Exact name of registrant as specified in its charter)

Maryland

(State or other jurisdiction of incorporation or organization)

52-1380770

(I.R.S. Employer Identification Number)

19 South Second Street, Oakland, Maryland

(Address of principal executive offices)

21550-0009

(Zip Code)

Registrant's telephone number, including area code: **(800) 470-4356**

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class:

Name of Each Exchange on Which Registered:

Common Stock, par value \$.01 per share

Nasdaq Stock Market

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosures of delinquent filers pursuant to Item 405 of Regulation S-K (Section 229.405 of this chapter) is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. (See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act). (check one):
Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the registrant's outstanding voting and non-voting common equity held by non-affiliates as of June 30, 2006:

\$ 126,572,358.

The number of shares of the registrant's common stock outstanding as of February 28, 2007: **6,146,443**

Documents Incorporated by Reference

Portions of the registrant's definitive proxy statement for the 2007 Annual Meeting of Shareholders to be filed with the SEC in March 2007 pursuant to Regulation 14A are incorporated by reference into Part III of this Annual Report on Form 10-K.

Forward-Looking Statements

This Annual Report of First United Corporation (the “Corporation” on a parent only basis and “we”, “our” or “us”, on a consolidated basis) filed on Form 10-K may contain forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. Readers of this report should be aware of the speculative nature of “forward-looking statements.” Statements that are not historical in nature, including those that include the words “anticipate,” “estimate,” “should,” “expect,” “believe,” “intend,” and similar expressions, are based on current expectations, estimates and projections about, among other things, the industry and the markets in which the Corporation operates, and they are not guarantees of future performance. Whether actual results will conform to expectations and predictions is subject to known and unknown risks and uncertainties, including risks and uncertainties discussed in this report; general economic, market, or business conditions; changes in interest rates, deposit flow, the cost of funds, and demand for loan products and financial services; changes in the Corporation’s competitive position or competitive actions by other companies; changes in the quality or composition of loan and investment portfolios; the ability to manage growth; changes in laws or regulations or policies of federal and state regulators and agencies; and other circumstances beyond the Corporation’s control. Consequently, all of the forward-looking statements made in this document are qualified by these cautionary statements, and there can be no assurance that the actual results anticipated will be realized, or if substantially realized, will have the expected consequences on the Corporation’s business or operations. For a more complete discussion of these and other risk factors, see Item 1A of Part I of this report. Except as required by applicable laws, the Corporation does not intend to publish updates or revisions of forward-looking statements it makes to reflect new information, future events or otherwise.

PART I

ITEM 1. BUSINESS

General

The Corporation is a Maryland corporation chartered in 1985 and a financial holding company registered under the federal Bank Holding Company Act of 1956, as amended (the “BHC Act”). The Corporation’s primary business is serving as the parent company of First United Bank & Trust, a Maryland trust company (the “Bank”), First United Insurance Group, LLC, a Maryland insurance agency (the “Insurance Group”), OakFirst Loan Center, Inc., a West Virginia finance company, and OakFirst Loan Center, LLC, a Maryland finance company, (together with OakFirst Loan Center, Inc. the “OakFirst Loan Centers”). OakFirst Loan Center, Inc. has one subsidiary, First United Insurance Agency, Inc., which is a Maryland insurance agency.

On March 31, 2006, the Bank liquidated its subsidiary First United Investment Trust. This entity was a Maryland real estate investment trust that held and serviced mortgage loans. Its assets were transferred to First United Bank & Trust.

At December 31, 2006, the Corporation had assets of approximately \$1.349 billion, net loans of approximately \$957 million, and deposits of approximately \$971 million. Shareholders’ equity at December 31, 2006 was approximately \$97 million.

The Corporation maintains an Internet site at www.mybankfirstunited.com on which it makes available, free of charge, its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and all amendments to the foregoing as soon as reasonably practicable after these reports are electronically filed with, or furnished to, the Securities and Exchange Commission (the “SEC”).

Banking Products and Services

The Bank operates 25 banking offices, one call center and 34 Automated Teller Machines (“ATM’s”) in the following Maryland Counties: Garrett, Allegany, Washington and Frederick; and in the following West Virginia Counties: Mineral, Berkeley, Hardy and Monongalia. The Bank is an independent community bank providing a complete range of retail and commercial banking services to businesses and individuals in its market areas. Services offered are essentially the same as those offered by the regional institutions that compete with the Bank and include checking, savings, and money market deposit accounts, business loans, personal loans, mortgage loans, lines of credit, and consumer-oriented financial services including IRA and employee benefit accounts. In addition, the Bank provides full brokerage services through a networking arrangement with PrimeVest Financial Services, Inc., a full service broker-dealer. The Bank also provides safe deposit and night depository facilities, and a complete line of insurance products and trust services. The Bank’s deposits are insured by the Federal Deposit Insurance Corporation (the “FDIC”).

[3]

Lending Activities--The majority of the Corporation's lending activities are conducted through the Bank.

The Bank's commercial loans are primarily secured by real estate, commercial equipment, vehicles or other assets of the borrower. Repayment is often dependent on the successful operation of the borrower and may be affected by adverse conditions in the local economy or real estate market. The financial condition and cash flow of commercial borrowers is therefore carefully analyzed during the loan approval process, and continues to be monitored by obtaining business financial statements, personal financial statements and income tax returns. The frequency of this ongoing analysis depends upon the size and complexity of the credit and collateral that secures the loan. It is also the Bank's general policy to obtain personal guarantees from the principals of the commercial loan borrowers.

Commercial real estate loans are primarily those secured by land for residential and commercial development, agricultural purpose properties, service industry buildings such as restaurants and motels, retail buildings and general purpose business space. The Bank attempts to mitigate the risks associated with these loans through low loan to value ratio standards, thorough financial analyses, and management's knowledge of the local economy in which the Bank lends.

The risk of loss associated with commercial real estate construction lending is controlled through conservative underwriting procedures such as loan to value ratios of 80% or less, obtaining additional collateral when prudent, and closely monitoring construction projects to control disbursement of funds on loans.

The Bank's residential mortgage portfolio is evenly distributed between variable and fixed rate loans. Many loans are booked at fixed rates in order to meet the Bank's requirements under the Community Reinvestment Act. Other fixed rate residential mortgage loans are originated in a brokering capacity on behalf of other financial institutions, for which the Bank receives a fee. As with any consumer loan, repayment is dependent on the borrower's continuing financial stability, which can be adversely impacted by job loss, divorce, illness, or personal bankruptcy. Residential mortgage loans exceeding an internal loan-to-value ratio require private mortgage insurance. Title insurance protecting the Bank's lien priority, as well as fire and casualty insurance, is also required.

Home equity lines of credit, included within the residential mortgage portfolio, are secured by the borrower's home and can be drawn on at the discretion of the borrower. These lines of credit are at variable interest rates.

The Bank also provides residential real estate construction loans to builders and individuals for single family dwellings. Residential construction loans are usually granted based upon "as completed" appraisals and are secured by the property under construction. Site inspections are performed to determine pre-specified stages of completion before loan proceeds are disbursed. These loans typically have maturities of six to 12 months and may have a fixed or variable rate. Permanent financing for individuals offered by the Bank includes fixed and variable rate loans with three, five or seven year adjustable rate mortgages.

A variety of other consumer loans are also offered to customers, including indirect and direct auto loans, and other secured and unsecured lines of credit and term loans. Careful analysis of an applicant's creditworthiness is performed before granting credit, and on-going monitoring of loans outstanding is performed in an effort to minimize risk of loss by identifying problem loans early.

An allowance for loan losses is maintained to provide for anticipated losses from the Corporation's lending activities. A complete discussion of the factors considered in determination of the allowance for loan losses is included in Item 7 of Part II of this report.

Additionally, the Corporation meets the lending needs of under-served customer groups within its market areas in part through OakFirst Loan Center, Inc., located in Martinsburg, West Virginia, and OakFirst Loan Center, LLC, located in Hagerstown, Maryland.

Deposit Activities—The Bank offers a full array of deposit products including checking, savings and money market accounts, regular and IRA certificates of deposit, Christmas Savings accounts, College Savings accounts, and Health Savings accounts. The Bank also offers the CDARS program to municipalities, providing them up to \$20 million of FDIC insurance. In addition, we offer our commercial customers packages which include Treasury Management, Cash Sweep and various checking opportunities.

[4]

Trust Services--The Bank's Trust Department offers a full range of trust services, including personal trust, investment agency accounts, charitable trusts, retirement accounts including IRA roll-overs, 401(k) accounts and defined benefit plans, estate administration and estate planning.

Information about the Corporation's income from and assets related to its banking business may be found in the consolidated statements of financial condition and the consolidated statements of income and the related notes thereto included in Item 8 of Part II of this annual report. At December 31, 2006, 2005 and 2004, the total market value of assets under the supervision of the Bank's Trust Department was approximately \$502 million, \$468 million and \$395 million, respectively. Trust Department revenues for these years may be found in Item 7 of Part II of this annual report under the caption "Other Operating Income".

Insurance Activities

The Corporation offers a full range of insurance products and services to customers in its market areas through the Insurance Group and First United Insurance Agency, Inc. Information about income from insurance activities for each of the years ended December 31, 2006, 2005 and 2004 may be found in Item 7 of Part II of this annual report under the caption "Other Operating Income".

COMPETITION

The banking business, in all of its phases, is highly competitive. Within their market areas, the Corporation and its affiliates compete with commercial banks, (including local banks and branches or affiliates of other larger banks), savings and loan associations and credit unions for loans and deposits, with consumer finance companies for loans, with insurance companies and their agents for insurance products, and with other financial institutions for various types of products and services. There is also competition for commercial and retail banking business from banks and financial institutions located outside our market areas.

The primary factors in competing for deposits are interest rates, personalized services, the quality and range of financial services, convenience of office locations and office hours. The primary factors in competing for loans are interest rates, loan origination fees, the quality and range of lending services and personalized services.

To compete with other financial services providers, the Corporation relies principally upon local promotional activities, personal relationships established by officers, directors and employees with its customers, and specialized services tailored to meet its customers' needs. In those instances in which the Corporation is unable to accommodate a customer's needs, it will arrange for those services to be provided by other financial services providers with which it has a relationship.

The following table sets forth deposit data for the Maryland and West Virginia Counties in which the Bank maintains offices as of June 30, 2006, the most recent date for which comparative information is available.

For further information about competition in our market areas, see the Risk Factor entitled “*We operate in a competitive environment*” in Item 1A of Part I of this annual report.

SUPERVISION AND REGULATION

The following is a summary of the material regulations and policies applicable to the Corporation and its subsidiaries and is not intended to be a comprehensive discussion. Changes in applicable laws and regulations may have a material effect on our business.

General

The Corporation is a financial holding company registered with the Board of Governors of the Federal Reserve System (the “FRB”) under the BHC Act and, as such, is subject to the supervision, examination and reporting requirements of the BHC Act and the regulations of the FRB.

The Bank is a Maryland trust company subject to the banking laws of Maryland and to regulation by the Commissioner of Financial Regulation of Maryland, who is required by statute to make at least one examination in

each calendar year (or at 18-month intervals if the Commissioner determines that an examination is unnecessary in a particular calendar year). The Bank also has offices in West Virginia, and the operations of these offices are subject to West Virginia laws and to supervision and examination by the West Virginia Division of Banking. As a member of the FDIC, the Bank is also subject to certain provisions of federal law and regulations regarding deposit insurance and activities of insured state-chartered banks, including those that require examination by the FDIC. In addition to the foregoing, there are myriad other federal and state laws and regulations that affect, impact or govern the business of banking, including consumer lending, deposit-taking, and trust operations.

[7]

All non-bank subsidiaries of the Corporation are subject to examination by the FRB, and, as affiliates of the Bank, are subject to examination by the FDIC and the Commissioner of Financial Regulation of Maryland. In addition, OakFirst Loan Center, Inc. is subject to licensing and regulation by the West Virginia Division of Banking, OakFirst Loan Center, LLC is subject to licensing and regulation by the Commissioner of Financial Regulation of Maryland, and the Insurance Group and First United Insurance Agency, Inc. are each subject to licensing and regulation by various state insurance authorities. Retail sales of insurance products by these insurance affiliates are also subject to the requirements of the Interagency Statement on Retail Sales of Nondeposit Investment Products promulgated in 1994 by the FDIC, the FRB, the Office of the Comptroller of the Currency, and the Office of Thrift Supervision.

Regulation of Financial Holding Companies

In November 1999, the federal Gramm-Leach-Bliley Act (the “GLBA”) was signed into law. GLBA revises the BHC Act and repeals the affiliation provisions of the Glass-Steagall Act of 1933, which, taken together, limited the securities, insurance and other non-banking activities of any company that controls an FDIC insured financial institution. Under GLBA, a bank holding company can elect, subject to certain qualifications, to become a “financial holding company.” GLBA provides that a financial holding company may engage in a full range of financial activities, including insurance and securities sales and underwriting activities, and real estate development, with new expedited notice procedures. Maryland law generally permits state-chartered banks, including the Bank, to engage in the same activities, directly or through an affiliate, as national banking associations. GLBA permits certain qualified national banking associations to form financial subsidiaries, which have broad authority to engage in all financial activities except insurance underwriting, insurance investments, real estate investment or development, or merchant banking. Thus, GLBA has the effect of broadening the permitted activities of the Corporation and the Bank.

The Corporation and its affiliates are subject to the provisions of Section 23A and Section 23B of the Federal Reserve Act. Section 23A limits the amount of loans or extensions of credit to, and investments in, the Corporation and its non-bank affiliates by the Bank. Section 23B requires that transactions between the Bank and the Corporation and its non-bank affiliates be on terms and under circumstances that are substantially the same as with non-affiliates.

Under FRB policy, the Corporation is expected to act as a source of strength to the Bank, and the FRB may charge the Corporation with engaging in unsafe and unsound practices for failure to commit resources to a subsidiary bank when required. In addition, under the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (“FIRREA”), depository institutions insured by the FDIC can be held liable for any losses incurred by, or reasonably anticipated to be incurred by, the FDIC in connection with (i) the default of a commonly controlled FDIC-insured depository institution or (ii) any assistance provided by the FDIC to a commonly controlled FDIC-insured depository institution in danger of default. Accordingly, in the event that any insured subsidiary of the Corporation causes a loss to the FDIC, other insured subsidiaries of the Corporation could be required to compensate the FDIC by reimbursing it for the estimated amount of such loss. Such cross guaranty liabilities generally are superior in priority to obligations of a financial institution to its shareholders and obligations to other affiliates.

Federal Banking Regulation

Federal banking regulators, such as the FRB and the FDIC, may prohibit the institutions over which they have supervisory authority from engaging in activities or investments that the agencies believe are unsafe or unsound banking practices. Federal banking regulators have extensive enforcement authority over the institutions they regulate to prohibit or correct activities that violate law, regulation or a regulatory agreement or which are deemed to be unsafe or unsound practices. Enforcement actions may include the appointment of a conservator or receiver, the issuance of a cease and desist order, the termination of deposit insurance, the imposition of civil money penalties on the institution, its directors, officers, employees and institution-affiliated parties, the issuance of directives to increase capital, the issuance of formal and informal agreements, the removal of or restrictions on directors, officers, employees and institution-affiliated parties, and the enforcement of any such mechanisms through restraining orders or other court

actions.

The Bank is subject to certain restrictions on extensions of credit to executive officers, directors, and principal shareholders or any related interest of such persons, which generally require that such credit extensions be made on substantially the same terms as are available to third parties dealing with the Bank and not involve more than the normal risk of repayment. Other laws tie the maximum amount that may be loaned to any one customer and its related interests to capital levels.

[8]

As part of the Federal Deposit Insurance Corporation Improvement Act of 1991 (“FDICIA”), each federal banking regulator adopted non-capital safety and soundness standards for institutions under its authority. These standards include internal controls, information systems and internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, and compensation, fees and benefits. An institution that fails to meet those standards may be required by the agency to develop a plan acceptable to meet the standards. Failure to submit or implement such a plan may subject the institution to regulatory sanctions. The Corporation, on behalf of the Bank, believes that the Bank meets substantially all standards that have been adopted. FDICIA also imposes new capital standards on insured depository institutions.

The Community Reinvestment Act (“CRA”) requires the FDIC, in connection with its examination of financial institutions within its jurisdiction, to evaluate the record of those financial institutions in meeting the credit needs of their communities, including low and moderate income neighborhoods, consistent with principles of safe and sound banking practices. These factors are also considered by all regulatory agencies in evaluating mergers, acquisitions and applications to open a branch or facility. As of the date of its most recent examination report, the Bank has a CRA rating of “Satisfactory”.

The Bank’s deposits are insured to a maximum of \$100,000 per depositor through the Deposit Insurance Fund, which is administered by the FDIC, and the Bank is required to pay semi-annual deposit insurance premium assessments to the FDIC. The Bank paid \$.2 million in FDIC premiums during 2006. The Deposit Insurance Fund was created pursuant to the Federal Deposit Insurance Reform Act of 2005, which was signed into law on February 8, 2006. Under this new law, (i) the current \$100,000 deposit insurance coverage will be indexed for inflation (with adjustments every five years, commencing January 1, 2011), and (ii) deposit insurance coverage for retirement accounts was increased to \$250,000 per participant subject to adjustment for inflation. In addition, the FDIC will be given greater latitude in setting the assessment rates for insured depository institutions which could be used to impose minimum assessments.

For a discussion of the regulatory capital requirements and related restrictions to which the Corporation and the Bank are subject, see the “Capital Requirements” discussion that immediately follows.

Capital Requirements

FDICIA established a system of prompt corrective action to resolve the problems of undercapitalized institutions. Under this system, the federal banking regulators are required to rate supervised institutions on the basis of five capital categories: “well capitalized,” “adequately capitalized,” “undercapitalized,” “significantly undercapitalized,” and “critical undercapitalized;” and to take certain mandatory actions (and are authorized to take other discretionary actions) with respect to institutions in the three undercapitalized categories. The severity of the actions will depend upon the category in which the institution is placed. A depository institution is “well capitalized” if it has a total risk based capital ratio of 10% or greater, a Tier 1 risk based capital ratio of 6% or greater, and a leverage ratio of 5% or greater and is not subject to any order, regulatory agreement, or written directive to meet and maintain a specific capital level for any capital measure. An “adequately capitalized” institution is defined as one that has a total risk based capital ratio of 8% or greater, a Tier 1 risk based capital ratio of 4% or greater and a leverage ratio of 4% or greater (or 3% or greater in the case of a bank with a composite CAMEL rating of 1).

FDICIA generally prohibits a depository institution from making any capital distribution, including the payment of cash dividends, or paying a management fee to its holding company if the depository institution would thereafter be undercapitalized. Undercapitalized depository institutions are subject to growth limitations and are required to submit capital restoration plans. For a capital restoration plan to be acceptable, the depository institution’s parent holding company must guarantee (subject to certain limitations) that the institution will comply with such capital restoration plan.

Significantly undercapitalized depository institutions may be subject to a number of other requirements and restrictions, including orders to sell sufficient voting stock to become adequately capitalized and requirements to reduce total assets and stop accepting deposits from correspondent banks. Critically undercapitalized depository institutions are subject to the appointment of a receiver or conservator, generally within 90 days of the date such institution is determined to be critically undercapitalized.

Further information about our capital resources is provided in the “Capital Resources” section of Item 7 of Part II of this annual report. Information about the capital ratios of the Corporation and of the Bank as of December 31, 2006 may be found in Note 2 to the Consolidated Financial Statements, which is included in Item 8 of Part II of this annual report.

[9]

USA PATRIOT ACT

Congress adopted the USA PATRIOT Act (the “Patriot Act”) on October 26, 2001 in response to the terrorist attacks that occurred on September 11, 2001. Under the Patriot Act, certain financial institutions, including banks, are required to maintain and prepare additional records and reports that are designed to assist the government’s efforts to combat terrorism. The Patriot Act includes sweeping anti-money laundering and financial transparency laws and required additional regulations, including, among other things, standards for verifying client identification when opening an account and rules to promote cooperation among financial institutions, regulators and law enforcement entities in identifying parties that may be involved in terrorism or money laundering.

Federal Securities Law

The shares of the Corporation’s common stock are registered with the Securities and Exchange Commission (the “SEC”) under Section 12(b) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and listed on the Nasdaq Stock Market’s Global Market. The Corporation is subject to information reporting requirements, proxy solicitation requirements, insider trading restrictions and other requirements of the Exchange Act, including the requirements imposed under the federal Sarbanes-Oxley Act of 2002. Among other things, loans to and other transactions with insiders are subject to restrictions and heightened disclosure, directors and certain committees of the Board must satisfy certain independence requirements, and the Corporation is generally required to comply with certain corporate governance requirements.

Governmental Monetary and Credit Policies and Economic Controls

The earnings and growth of the banking industry and ultimately of the Bank are affected by the monetary and credit policies of governmental authorities, including the FRB. An important function of the FRB is to regulate the national supply of bank credit in order to control recessionary and inflationary pressures. Among the instruments of monetary policy used by the FRB to implement these objectives are open market operations in U.S. Government securities, changes in the federal funds rate, changes in the discount rate of member bank borrowings, and changes in reserve requirements against member bank deposits. These means are used in varying combinations to influence overall growth of bank loans, investments and deposits and may also affect interest rates charged on loans or paid on deposits. The monetary policies of the FRB authorities have had a significant effect on the operating results of commercial banks in the past and are expected to continue to have such an effect in the future. In view of changing conditions in the national economy and in the money markets, as well as the effect of actions by monetary and fiscal authorities, including the FRB, no prediction can be made as to possible future changes in interest rates, deposit levels, loan demand or their effect on the business and earnings of the Corporation and its subsidiaries.

SEASONALITY

Management does not believe that our business activities are seasonal in nature. Deposit, loan, and insurance demand may vary depending on local and national economic conditions, but management believes that any variation will not have a material impact on our planning or policy-making strategies.

EMPLOYEES

At December 31, 2006, we employed approximately 463 individuals, of whom 352 were full-time employees.

ITEM 1A.

RISK FACTORS

The following factors should be considered carefully in evaluating an investment in shares of common stock of the Corporation.

[10]

Risks Relating to the Corporation and its Affiliates

The Corporation's future depends on the successful growth of its subsidiaries.

The Corporation's primary business activity for the foreseeable future will be to act as the holding company of the Bank and its other direct and indirect subsidiaries. Therefore, the Corporation's future profitability will depend on the success and growth of these subsidiaries. In the future, part of the Corporation's growth may come from buying other banks and buying or establishing other companies. Such entities may not be profitable after they are purchased or established, and they may lose money, particularly at first. A new bank or company may bring with it unexpected liabilities, bad loans, or bad employee relations, or the new bank or company may lose customers.

The majority of our business is concentrated in Maryland and West Virginia; a significant amount of our business is concentrated in real estate lending.

Because most of our loans are made to Western Maryland and Northeastern West Virginia borrowers, a decline in local economic conditions may have a greater effect on our earnings and capital than on the earnings and capital of larger financial institutions whose loan portfolios are geographically diverse. Further, we make many real estate secured loans, including construction and land development loans, all of which are in greater demand when interest rates are low and economic conditions are good. There can be no guarantee that good economic conditions or low interest rates will continue to exist. Moreover, the market values of the real estate securing our loans may deteriorate due to a number of unpredictable factors, which could cause us to lose money in the event a borrower failed to repay a loan and we were forced to foreclose on the property. Additionally, the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation, along with the other federal banking regulators, issued final guidance on December 6, 2006 entitled "Concentrations in Commercial Real Estate Lending, Sound Risk Management Practices" directed at institutions that have particularly high concentrations of commercial real estate loans within their lending portfolios. This guidance suggests that institutions whose commercial real estate loans exceed certain percentages of capital should implement heightened risk management practices appropriate to their concentration risk and may be required to maintain higher capital ratios than institutions with lower concentrations in commercial real estate lending. Based on our commercial real estate concentration as of December 31, 2006, we may be subject to further supervisory analysis during future examinations. Although we continuously evaluate our concentration and risk management strategies, we cannot guarantee that any risk management practices we implement will be effective to prevent losses relating to our commercial real estate portfolio. Management cannot predict the extent to which this guidance will impact our operations or capital requirements.

The Bank may experience loan losses in excess of its allowance.

The risk of credit losses on loans varies with, among other things, general economic conditions, the type of loan being made, the creditworthiness of the borrower over the term of the loan and, in the case of a collateralized loan, the value and marketability of the collateral for the loan. Management of First United Bank & Trust maintains an allowance for credit losses based upon, among other things, historical experience, an evaluation of economic conditions and regular reviews of delinquencies and loan portfolio quality. Based upon such factors, management makes various assumptions and judgments about the ultimate collectability of the loan portfolio and provides an allowance for loan losses based upon a percentage of the outstanding balances and for specific loans when their ultimate collectability is considered questionable. If management's assumptions and judgments prove to be incorrect and the allowance for loan losses is inadequate to absorb future losses, or if the bank regulatory authorities require us to increase the allowance for loan losses as a part of its examination process, our earnings and capital could be significantly and adversely affected. Although management uses the best information available to make determinations with respect to the allowance for loan losses, future adjustments may be necessary if economic conditions differ substantially from the assumptions used or adverse developments arise with respect to our non-performing or performing loans. Material additions to the allowance for loan losses could result in a material decrease in our net income and capital, and could have a material

adverse effect on our financial condition.

Interest rates and other economic conditions will impact our results of operations.

Our results of operations may be materially and adversely affected by changes in prevailing economic conditions, including declines in real estate values, rapid changes in interest rates and the monetary and fiscal policies of the federal government. Our profitability is in part a function of the spread between the interest rates earned on assets and the interest rates paid on deposits and other interest-bearing liabilities (i.e., net interest income), including advances from the Federal Home Loan Bank of Atlanta. Interest rate risk arises from mismatches (i.e., the interest sensitivity gap) between the dollar amount of repricing or maturing assets and liabilities and is measured in terms of the ratio of the interest rate sensitivity gap to total assets. More assets repricing or maturing than liabilities over a given time period is considered asset-sensitive and is reflected as a positive gap, and more liabilities repricing or maturing than assets over a given time period is considered liability-sensitive and is reflected as negative gap. An asset-sensitive position (i.e., a positive gap) could enhance earnings in a rising interest rate environment and could negatively impact earnings in a falling interest rate environment, while a liability-sensitive position (i.e., a negative gap) could enhance earnings in a falling interest rate environment and negatively impact earnings in a rising interest rate environment. Fluctuations in interest rates are not predictable or controllable. We have attempted to structure our asset and liability management strategies to mitigate the impact on net interest income of changes in market interest rates, but there can be no assurance that these attempts will be successful in the event of such changes.

[11]

The market value of our investments could decline.

As of December 31, 2006, we had classified 100% of our investment securities as available-for-sale pursuant to Statement of Financial Accounting Standards ("SFAS") No. 115 relating to accounting for investments. SFAS No. 115 requires that unrealized gains and losses in the estimated value of the available-for-sale portfolio be "marked to market" and reflected as a separate item in shareholders' equity (net of tax) as accumulated other comprehensive income. There can be no assurance that future market performance of our investment portfolio will enable us to realize income from sales of securities. Shareholders' equity will continue to reflect the unrealized gains and losses (net of tax) of these investments. Moreover, there can be no assurance that the market value of our investment portfolio will not decline, causing a corresponding decline in shareholders' equity.

Management believes that several factors will affect the market values of our investment portfolio. These include, but are not limited to, changes in interest rates or expectations of changes, the degree of volatility in the securities markets, inflation rates or expectations of inflation and the slope of the interest rate yield curve (the yield curve refers to the differences between shorter-term and longer-term interest rates; a positively sloped yield curve means shorter-term rates are lower than longer-term rates). Also, the passage of time will affect the market values of our investment securities, in that the closer they are to maturing, the closer the market price should be to par value. These and other factors may impact specific categories of the portfolio differently, and management cannot predict the effect these factors may have on any specific category.

We operate in a competitive environment.

We operate in a competitive environment, competing for loans, deposits, and customers with commercial banks, savings associations and other financial entities. Competition for deposits comes primarily from other commercial banks, savings associations, credit unions, money market and mutual funds and other investment alternatives. Competition for loans comes primarily from other commercial banks, savings associations, mortgage banking firms, credit unions and other financial intermediaries. Competition for other products, such as insurance and securities products, comes from other banks, securities and brokerage companies, insurance companies, insurance agents and brokers, and other non-bank financial service providers in our market area. Many of these competitors are much larger in terms of total assets and capitalization, have greater access to capital markets, and/or offer a broader range of financial services than those that we offer. In addition, banks with a larger capitalization and financial intermediaries not subject to bank regulatory restrictions have larger lending limits and are thereby able to serve the needs of larger customers.

In addition, current banking laws facilitate interstate branching, merger activity among banks, and expanded activities. Since September 1995, certain bank holding companies have been authorized to acquire banks throughout the United States. Since June 1, 1997, certain banks have been permitted to merge with banks organized under the laws of different states. As a result, interstate banking is now an accepted element of competition in the banking industry and the Corporation may be brought into competition with institutions with which it does not presently compete. Moreover, as discussed above, the GLBA revised the BHC Act in 2000 and repealed the affiliation provisions of the Glass-Steagall Act of 1933, which, taken together, limited the securities, insurance and other non-banking activities of any company that controls an FDIC insured financial institution. These laws may increase the competition we face in our market areas in the future, although management cannot predict the degree to which such competition will impact our financial conditions or results of operations.

The loss of key personnel could disrupt our operations and result in reduced earnings.

Our growth and profitability will depend upon our ability to attract and retain skilled managerial, marketing and technical personnel. Competition for qualified personnel in the financial services industry is intense, and there can be no assurance that we will be successful in attracting and retaining such personnel. Our current executive officers provide valuable services based on their many years of experience and in-depth knowledge of the banking industry. Due to the intense competition for financial professionals, these key personnel would be difficult to replace and an unexpected loss of their services could result in a disruption to the continuity of operations and a possible reduction in earnings.

The banking industry is heavily regulated; significant regulatory changes could adversely affect our operations.

Our operations will be impacted by current and future legislation and by the policies established from time to time by various federal and state regulatory authorities. The Corporation is subject to supervision by the FRB. The Bank is subject to supervision and periodic examination by the Maryland Commissioner of Financial Regulation, the West Virginia Division of Banking, and the FDIC. Banking regulations, designed primarily for the safety of depositors, may limit a financial institution's growth and the return to its investors by restricting such activities as the payment of dividends, mergers with or acquisitions by other institutions, investments, loans and interest rates, interest rates paid on deposits, expansion of branch offices, and the offering of securities or trust services. The Corporation and the Bank are also subject to capitalization guidelines established by federal law and could be subject to enforcement actions to the extent that either is found by regulatory examiners to be undercapitalized. It is not possible to predict what changes, if any, will be made to existing federal and state legislation and regulations or the effect that such changes may have on our future business and earnings prospects. Management also cannot predict the nature or the extent of the effect on our business and earnings of future fiscal or monetary policies, economic controls, or new federal or state legislation. Further, the cost of compliance with regulatory requirements may adversely affect our ability to operate profitably.

We may be adversely affected by recent legislation.

As discussed above the GLBA repealed restrictions on banks affiliating with securities firms and it also permitted bank holding companies that become financial holding companies to engage in additional financial activities, including insurance and securities underwriting and agency activities, merchant banking, and insurance company portfolio investment activities that are currently not permitted for bank holding companies. Although the Corporation is a financial holding company, this law may increase the competition we face from larger banks and other companies. It is not possible to predict the full effect that this law will have on us.

The Sarbanes-Oxley Act of 2002 requires management of publicly traded companies to perform an annual assessment of their internal controls over financial reporting and to report on whether the system is effective as of the end of the Company's fiscal year. Disclosure of significant deficiencies or material weaknesses in internal controls could cause an unfavorable impact to shareholder value by affecting the market value of our stock.

The Patriot Act reinforced the importance of implementing and following procedures required by the Bank Secrecy Act and money laundering issues. Non-compliance with this act or failure to file timely and accurate documentation could expose the company to adverse publicity as well as fines and penalties assessed by regulatory agencies.

We may be subject to claims and the costs of defensive actions.

Our customers may sue us for losses due to alleged breaches of fiduciary duties, errors and omissions of employees, officers and agents, incomplete documentation, our failure to comply with applicable laws and regulations, or many other reasons. Also, our employees may knowingly or unknowingly violate laws and regulations. Management may

not be aware of any violations until after their occurrence. This lack of knowledge may not insulate us from liability. Claims and legal actions may result in legal expenses and liabilities that may reduce our profitability and hurt our financial condition.

We may not be able to keep pace with developments in technology.

We use various technologies in conducting our businesses, including telecommunication, data processing, computers, automation, internet-based banking, and debit cards. Technology changes rapidly. Our ability to compete successfully with other financial institutions may depend on whether we can exploit technological changes. We may not be able to exploit technological changes, and any investment we do make may not make us more profitable.

[13]

Risks Relating to the Corporation's Common Stock

The Corporation's ability to pay dividends is limited.

The Corporation's ability to pay dividends to shareholders is largely dependent upon the receipt of dividends from the Bank. Both federal and state laws impose restrictions on the ability of the Bank to pay dividends. Federal law generally prohibits the payment of a dividend by a troubled institution. Under Maryland law, a state-chartered commercial bank may pay dividends only out of undivided profits or, with the prior approval of the Commissioner, from surplus in excess of 100% of required capital stock. If however, the surplus of a Maryland bank is less than 100% of its required capital stock, cash dividends may not be paid in excess of 90% of net earnings. In addition to these specific restrictions, bank regulatory agencies also have the ability to prohibit proposed dividends by a financial institution which would otherwise be permitted under applicable regulations if the regulatory body determines that such distribution would constitute an unsafe or unsound practice. Because of these limitations, there can be no guarantee that we will declare dividends in any fiscal quarter.

Shares of the Corporation's common stock are not insured.

Shares of the Corporation's common stock do not represent deposits and investments in these shares are not insured against loss by the government.

Shares of the Corporation's common stock are not heavily traded.

The shares of the Corporation's common stock are listed on the Nasdaq Global Market and are not heavily traded. Securities that are not heavily traded can be more volatile than stock trading in an active public market. Factors such as our financial results, the introduction of new products and services by us or our competitors, and various factors affecting the banking industry generally may have a significant impact on the market price of our common stock. Management cannot predict the extent to which an active public market for our securities will develop or be sustained in the future. In recent years, the stock market has experienced a high level of price and volume volatility, and market prices for the securities of many companies have experienced wide price fluctuations that have not necessarily been related to their operating performance. Therefore, our shareholders may not be able to sell their shares at the volumes, prices, or times that they desire.

The Corporation's Articles of Incorporation and By-Laws may discourage a corporation takeover.

The Amended and Restated Articles of Incorporation and By-Laws of the Corporation contain certain provisions designed to enhance the ability of the Board of Directors to deal with attempts to acquire control of the corporation. First, the Board of Directors is classified into three classes. Directors of each class serve for staggered three-year periods, and no director may be removed except for cause, and then only by the affirmative vote of either a majority of the entire Board of Directors or a majority of the outstanding voting stock. Second, the Board has the authority to classify and reclassify unissued shares of stock of any class or series of stock by setting, fixing, eliminating, or altering in any one or more respects the preferences, rights, voting powers, restrictions and qualifications of, dividends on, and redemption, conversion, exchange, and other rights of, such securities. The Board could use this authority, along with its authority to authorize the issuance of securities of any class or series, to issue shares having terms favorable to management to a person or persons affiliated with or otherwise friendly to management. In addition to the foregoing, Maryland law contains anti-takeover provisions, such as restrictions on "control share acquisitions" and "business combinations" with certain interested stockholders, that apply to the Corporation.

Although these provisions do not preclude a takeover, they may have the effect of discouraging a takeover attempt that would not be approved by the Board of Directors, but pursuant to which shareholders might receive a substantial premium for their shares over then-current market prices. As a result, shareholders who might desire to participate in

such a transaction might not have the opportunity to do so. Such provisions will also render the removal of the Board of Directors and of management more difficult and, therefore, may serve to perpetuate current management. Such provisions could potentially adversely affect the market price of our common stock.

[14]

ITEM 1B.

UNRESOLVED STAFF COMMENTS

None.

ITEM 2.

PROPERTIES

The headquarters of the Corporation and the Bank occupies approximately 29,000 square feet at 19 South Second Street, Oakland, Maryland. These premises are owned by the Corporation. The Bank owns 19 of its banking offices and leases six. The Corporation also leases three offices of non-bank subsidiaries. A banking office is currently under construction on a leased site in Washington County, Maryland. Total rent expense on the leased offices and properties was \$.42 million in 2006. In December of 2005, the Corporation purchased a 30,000 square foot building in Oakland, Maryland to house its operations center. Management expects that this site will be fully functional in March 2007.

ITEM 3.

LEGAL PROCEEDINGS

We are at times, in the ordinary course of business, subject to legal actions. Management, upon the advice of counsel, believes that losses, if any, resulting from current legal actions will not have a material adverse effect on our financial condition.

ITEM 4.

SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

[15]

PART II**ITEM MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS
5. AND ISSUER PURCHASES OF EQUITY SECURITIES**

Shares of the Corporation's common stock are listed on the Nasdaq Stock Market under the symbol "FUNC". As of February 28, 2007, the Corporation had 2,085 shareholders of record. The high and low sales prices for, and the cash dividends declared on, the shares of the Corporation's common stock for each quarterly period of 2006 and 2005 are set forth below.

2006	High	Low	Dividends Declared
1 st Quarter	\$ 22.83	\$ 20.29	\$.190
2 nd Quarter	23.35	20.29	.190
3 rd Quarter	22.00	20.31	.190
4 th Quarter	22.79	21.05	.195

2005	High	Low	Dividends Declared
1 st Quarter	\$ 21.70	\$ 19.81	\$.185
2 nd Quarter	20.30	18.94	.185
3 rd Quarter	20.85	19.25	.185
4 th Quarter	21.66	19.14	.190

Cash dividends are typically declared on a quarterly basis and are at the discretion of the Corporation's Board of Directors. Dividends to shareholders are generally dependent on the ability of the Corporation's subsidiaries, especially the Bank, to declare dividends to the Corporation. The ability of these entities to declare dividends are limited by federal and state banking laws and/or state corporate laws. Further information about these limitations may be found in Note 13 to the Consolidated Financial Statements and in Item 1A of Part I under the caption "*The Corporation's ability to pay dividends is limited*", each of which is incorporated herein by reference. There can be no guarantee that dividends will be declared in any fiscal quarter.

First United Corporation Stock Performance Graph

The following graph compares the yearly percentage change in the cumulative total return for First United Corporation common stock for the five years ended December 31, 2006. This data is compared to the NASDAQ Composite market index and the SNL \$1 billion to \$5 billion Bank Index during the same time period. Total return numbers are calculated as change in stock price for the period indicated with dividends being reinvested.

<i>Index</i>	<i>Period Ending</i>					
	12/31/01	12/31/02	12/31/03	12/31/04	12/31/05	12/31/06
First United Corporation	100.00	106.92	164.12	143.24	153.25	163.71
NASDAQ Composite	100.00	68.76	103.67	113.16	115.57	127.58
SNL \$1B-\$5B Bank Index	100.00	115.44	156.98	193.74	190.43	220.36

Equity Compensation Plan Information

At December 31, 2006, the Corporation had no equity compensation plan or arrangement in effect under which shares of common stock may be issued to its directors or officers.

Issuer Purchases of Securities

The Corporation did not purchase any shares of its common stock during the fourth quarter of 2006.

[17]

ITEM 6.**SELECTED FINANCIAL DATA**

The following table sets forth certain selected financial data for the five years ended December 31, 2006 and is qualified in its entirety by the detailed information and financial statements, including notes thereto, included elsewhere or incorporated by reference in this annual report.

(In thousands, except per share data)

	2006	2005	2004	2003	2002
Balance Sheet Data					
Total Assets	\$ 1,349,317	\$ 1,310,991	\$ 1,233,901	\$ 1,108,241	\$ 954,388

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS 7. OF OPERATIONS

This discussion and analysis should be read in conjunction with the audited consolidated financial statements and notes thereto for the year ended December 31, 2006, which appear in Item 8 of Part II of this annual report.

Overview

The Corporation is a financial holding company which, through the Bank and its non-bank subsidiaries, provides an array of financial products and services primarily to customers in four Western Maryland counties and four Northeastern West Virginia counties. Its principal operating subsidiary is the Bank, which consists of a community banking network of 25 branch offices located throughout its market areas. Our primary sources of revenue are interest income earned from our loan and investment securities portfolios and fees earned from financial services provided to customers.

Our 2006 net income was \$12.6 million, an increase of 4.1% over 2005. The increase in 2006 net income was due to strategic decisions implemented by management over the past few years, the Bank's ability to increase its net interest margin, a focus on controlling our operating costs and a reduction in the effective tax rate. 2006 proved to be a challenging year with an inverted interest rate yield curve, a slowed economy and intense competition for retail and commercial deposits.

Operations in 2006 were impacted by the following factors and strategic initiatives:

Slow Loan and Deposit Growth/Impact on Net Interest Margin -- Loan growth slowed significantly in 2006 as compared to 2005, resulting in a minimal net increase in the loan portfolio of \$3 million. Commercial loan production remained at a consistent level with 2005 but was offset by the increased payback of commercial development loans. Residential mortgage loan growth was tempered by management during 2006 as a result of strong customer preference for fixed rate loans. The Bank utilized the secondary market as an outlet for this type of lending to prevent excessive growth in the fixed rate portfolio. Management's preference for originating adjustable, prime-rate based loans has benefited us in the current rising interest rate environment. Although we experienced minimal increase in loan growth, interest income exceeded interest income generated in prior years due to the upward re-pricing of loans. For 2006, interest income on loans increased \$7.5 million (on a fully taxable equivalent basis) when compared with 2005. Interest income on investment securities in 2006 increased by \$3.7 million (on a fully taxable equivalent basis) due to an increase in the average yield on the portfolio and a \$45 million leverage strategy. (Additional information on the composition of interest income is available in Table 1 below).

Funding costs in 2006 increased as a result of the rising interest rate environment and the intense deposit competition in our market areas. The shift from core non-interest bearing accounts to certificates of deposit and higher yielding money market accounts continued during 2006. A large portion of the new time deposits received in 2006 were in denominations of \$100,000 or more, which typically require higher interest rates than core deposits. This reliance on higher rate time deposits and the general increase in interest rates throughout 2006 increased deposit interest expense by approximately \$8.2 million when compared to 2005. Net borrowings increased by \$15.4 million adding an additional \$1.7 million of interest expense over the prior year. The combination of slow loan and deposit growth, rising interest rates on our assets and liabilities, and the increased level of debt resulted in a minimal increase in net interest income on a tax equivalent basis of \$1.4 million (3%) in 2006 when compared to 2005.

The overall net interest margin increased during the year from 3.49% in 2005 to 3.52% in 2006. However, the 2006 net interest margin was negatively impacted by a \$45 million leverage strategy implemented in the latter half of 2006 in an attempt to produce additional net interest income.

Early Redemption of Long-Term Borrowings -- In May 2006, the Bank participated in a contemporaneous exchange of long-term FHLB advances. The Bank exchanged \$25 million of long-term advances having a weighted average rate of 5.01% for \$25 million of long-term advances having a weighted average rate of 4.69%. The exchange resulted in a net gain of \$.2 million which will be amortized over the life of the new borrowing.

Other Operating Income/Other Operating Expense -- Other operating income in 2006 decreased slightly when compared to 2005. The Bank experienced increases in service charge and Trust department income of \$.8 million and \$.4 million, respectively. Insurance commissions were down slightly in 2006 compared to 2005 due to lower contingency income from insurance companies and the closing of Oakfirst Life Insurance, Inc. early in 2005. Other income in 2005 included a \$.9 million gain on the prepayment of long-term debt. Operating expenses in 2006 increased by 2.4% when compared to 2005. This minimal increase was due primarily to increases in salaries and benefits, occupancy and other expenses and close monitoring of our operating expenses. 2005 operating expenses included a \$.4 million penalty recognized on the prepayment of long-term debt.

[19]

The Bank continued to invest in its core market areas during 2006. A new branch office was opened during the fourth quarter of 2006 in Morgantown, West Virginia and construction of another branch began on a newly leased site in Washington County, Maryland. This new retail branch is anticipated to open late in the first quarter of 2007. The Corporation purchased a 30,000 square foot building in Oakland, Maryland in December 2005 for \$3 million to house its operations center. This space will relieve congestion in the Corporation's headquarters as well as provide capacity for the Bank's anticipated growth. Management expects that this new facility will be ready for use in the first quarter of 2007.

The Corporation continued its tradition of paying dividends to shareholders during 2006 and, in fact, increased them to \$0.76 per share, a 2.7% increase from \$0.74 per share in 2005. The Corporation has paid quarterly cash dividends consistently since 1985, the year in which it was formed.

We will continue to face risks and challenges in the future, including: changes in local economic conditions in our core geographic markets; potential yield compression on loan and deposit products by existing competitors and potential new entrants in our markets; changes in interest rates; and changes to existing federal and state legislation and regulations over banks and financial holding companies. For a more complete discussion of these risk factors, see Item 1A of Part I of this annual report.

Critical Accounting Policies and Estimates

This discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent liabilities. (See Note 1 of the Notes to Consolidated Financial Statements included in Item 8 of Part II of this annual report.) On an on-going basis, management evaluates estimates, including those related to loan losses and intangible assets. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. Management believes the following critical accounting policies affect our more significant judgments and estimates used in the preparation of the consolidated financial statements.

Allowance for Loan Losses

One of our most important accounting policies is that related to the monitoring of the loan portfolio. A variety of estimates impact the carrying value of the loan portfolio, including the calculation of the allowance for loan losses, the valuation of underlying collateral, the timing of loan charge-offs and the placement of loans on non-accrual status. The allowance is established and maintained at a level that management believes is adequate to cover losses resulting from the inability of borrowers to make required payment on loans. Estimates for loan losses are arrived at by analyzing risks associated with the specific loans and the loan portfolio, current and historical trends in delinquencies and charge-offs, and changes in the size and composition of the loan portfolio. The analysis also requires consideration of the economic climate and direction, changes in lending rates, political conditions, legislation impacting the banking industry and economic conditions specific to Western Maryland and Northeastern West Virginia. Because the calculation of the allowance for loan losses relies on management's estimates and judgments relating to inherently uncertain events, actual results may differ from management's estimates.

The allowance for loan losses is also discussed below in this Item 7 under the caption "Allowance and Provision for Loan Losses" and in Note 4 to Consolidated Financial Statements contained in Item 8 of Part II of this annual report.

Goodwill and Other Intangible Assets

Statement of Financial Accounting Standards (SFAS) No. 142, Accounting for Goodwill and Other Intangible Assets, establishes standards for the amortization of acquired intangible assets and the non-amortization and impairment assessment of goodwill. We have \$2.1 million of core deposit intangible assets which are subject to amortization and \$11.9 million in goodwill primarily related to the Huntington National Bank branch acquisition that occurred in 2003, which is not subject to periodic amortization.

[20]

Goodwill arising from business combinations represents the value attributable to unidentifiable intangible elements in the business acquired. Our goodwill relates to value inherent in the banking business and the value is dependent upon our ability to provide quality, cost effective services in a highly competitive local market. This ability relies upon continuing investments in processing systems, the development of value-added service features and the ease of use of our services. As such, goodwill value is supported ultimately by revenue that is driven by the volume of business transacted. A decline in earnings as a result of a lack of growth or the inability to deliver cost effective services over sustained periods can lead to impairment of goodwill, which could adversely impact earnings in future periods. SFAS No. 142 requires an annual evaluation of goodwill for impairment. The determination of whether or not these assets are impaired involves significant judgments. Management has concluded that the recorded value of goodwill was not impaired as a result of the evaluation. However, future changes in strategy and/or market conditions could significantly impact these judgments and require adjustments to recorded asset balances.

Other-Than-Temporary Impairment of Investment Securities

Management systematically evaluates investment securities for impairment on a quarterly basis. Declines in the fair value of available for sale securities below their cost that are considered other than temporary declines are recognized in earnings as realized losses in the period in which the impairment determination is made. In estimating other-than-temporary impairment losses, management considers (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Corporation to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. Gains and losses on the sale of securities are recorded using the specific identification method.

Pension Plan Assumptions

Our pension plan costs are calculated using actuarial concepts, as discussed within the requirements of Statement of Financial Accounting Standards (SFAS) No. 87, Employers Accounting for Pensions SFAS No. 132 (R) and as amended by SFAS No. 158, "Employers' Accounting for Deferred Benefit Pension and Other Post Retirement Plans." Pension expense and the determination of our projected pension liability are based upon two critical assumptions; the discount rate and the expected return on plan assets. We evaluate each of these critical assumptions annually. Other assumptions impact the determination of pension expense and the projected liability including the primary employee demographics, such as retirement patterns, employee turnover, mortality rates, and estimated employer compensation increases. These factors, along with the critical assumptions, are carefully reviewed by management each year in consultation with our pension plan consultants and actuaries. Further information about our pension plan assumptions, the plan's funded status, and other plan information is included in Note 11 to Consolidated Financial Statements, which is included in Item 8 of Part II of this annual report.

Recent Accounting Pronouncements and Developments

Note 1 to the Consolidated Financial Statements included in Item 8, Part II of this annual report discusses new accounting pronouncements that when adopted, may have an effect on our consolidated financial statements.

CONSOLIDATED STATEMENT OF INCOME REVIEW

Net Interest Income

Net interest income is the largest source of operating revenue. Net interest income is the difference between the interest earned on interest-earning assets and the interest expense paid on interest-bearing liabilities. For analytical and discussion purposes, net interest income is adjusted to a taxable equivalent basis to facilitate performance comparisons between taxable and tax-exempt assets by increasing tax-exempt income by an amount equal to the federal income

taxes that would have been paid if this income were taxable at the statutorily applicable rate. The table below summarizes net interest income (on a taxable equivalent basis) for the years 2004-2006 (dollars in thousands).

[21]

Edgar Filing: FIRST UNITED CORP/MD/ - Form 10-K

	2006	2005	2004
Interest income	\$ 81,838	\$ 70,533	\$ 61,380
Interest expense	39,335	29,413	24,016
Net interest income	42,503	41,120	37,364
Net interest margin %	3.52%	3.49%	3.43%

Net interest income increased \$1.4 million (3%) in 2006 over the same period in 2005, due to an \$11.3 million (16%) increase in interest income offset by a \$9.9 million (34%) increase in interest expense. The increase in interest income resulted from an increase in average interest-earning assets of \$28.1 million (2%) during 2006 when compared to 2005. This increase is attributable to the growth that we experienced in our investment portfolio late in 2005 and throughout 2006. Emphasis on adjustable rate loan products and the rising interest rate environment contributed to the increase in the average rate on our average earning assets of 80 basis points, from 5.98% in 2005 to 6.78% in 2006 (on a fully tax equivalent basis). Interest expense increased during 2006 when compared to 2005 due to the higher interest rate environment, and an overall increase in average interest-bearing liabilities of \$32.3 million. Deposits have increased in 2006 by approximately \$16 million due to an increase in brokered certificates of deposit and a successful retail promotion of a nine month certificate of deposit. The combined effect of the increasing rate environment and the volume increases in our average interest-bearing liabilities resulted in an 83 basis point increase in the average rate paid on our average interest-bearing liabilities from 2.76% for 2005 to 3.59% for 2006. The net result of the aforementioned factors was a 3 basis point increase in the net interest margin at December 31, 2006 to 3.52% from 3.49% at December 31, 2005.

Comparing 2005 to 2004, net interest income increased \$3.8 million (10.1%) due primarily to the increase in interest income of \$9.2 million, offset by an increase in interest expense of \$5.4 million. Interest income from loans increased by \$8.3 million due to the \$93.5 million increase in the average balance of loans in 2005 and a slight increase of 26 basis points in the average yield on loans. The increase in total interest expense was due to increased interest expense on deposits of \$7.0 million (57.8%) offset by a decrease in interest expense on long-term borrowings of \$3.2 million (29.7%). Interest expense on deposits increased primarily due to a \$38.3 million increase in average balances and a 141 basis point increase in the average yield on time deposits over \$100,000. The decrease in interest expense on long-term borrowings was primarily due to the \$45.4 million decrease in the average balance coupled with the 50 basis point decrease in average yield on these borrowings.

As shown below, the composition of total interest income remained steady from 2004 to 2005. Loan interest income and fees decreased in 2006 when compared to 2005 as a percentage of total interest income due to the limited loan growth and the increase in investment securities as a percentage of interest earning assets during this time.

	% of Total Interest Income		
	2006	2005	2004
Interest and fees on loans	85%	88%	88%
Interest on investment securities	15%	12%	12%

Table 1 sets forth the average balances, net interest income and expense and average yields and rates for our interest-earning assets and interest-bearing liabilities for 2006, 2005 and 2004. Table 2 sets forth an analysis of volume and rate changes in interest income and interest expense of our average interest-earning assets and average interest-bearing liabilities for 2006, 2005 and 2004. Table 2 distinguishes between the changes related to average outstanding balances (changes in volume created by holding the interest rate constant) and the changes related to

average interest rates (changes in interest income or expense attributed to average rates created by holding the outstanding balance constant).

NOTES:

--The above table reflects the average rates earned or paid stated on a tax equivalent basis assuming a tax rate of 35% for 2006 and 2005 and 34% for 2004. The fully taxable equivalent adjustments for the years ended December 31, 2006, 2005, and 2004 were \$1,569, \$776, and \$698, respectively.

--The average balances of non-accrual loans for the years ended December 31, 2006, 2005 and 2004, which were reported in the average loan balances for these years, were \$2,705, \$3,203, and \$4,400, respectively.

--Net interest margin is calculated as net interest income divided by average earning assets.

--The average yields on investments are based on amortized cost.

(1) The change in interest income/expense due to both volume and rate has been allocated to volume and rate changes in proportion to the relationship of the absolute dollar amounts of the change in each.

Provision for Loan Losses

The provision for loan losses in 2006 increased by \$.1 million over 2005, due primarily to an increase in the level of non-accrual loans and changes in the qualitative factors used in the quarterly evaluation of the adequacy of the allowance for loan losses. These changes were offset by a decrease in net charge-offs as a percentage of average loans to .11% in 2006 from .15% in 2005 and minimal loan growth in 2006.

The provision for loan losses decreased to \$1.1 million in 2005, compared to \$2.5 million in 2004. This decrease was due primarily to the decrease in net charge-offs as a percentage of average loans to .15% in 2005 from .20% in 2004 and a decrease in specific allocations as compared to 2004.

Other Operating Income

The following table shows the major components of other operating income for the past three years (in thousands) and the percentage changes during these years:

	2006	2005	2004	2006 VS. 2005 %	2005 VS. 2004 %
				CHANGE	CHANGE
Service charges on deposit accounts	\$ 4,630	\$ 4,260	\$ 3,824	8.7%	11.4%
Other service charge income	1,637	1,203	925	36.1%	30.1%
Trust department income	3,671	3,260	3,153	12.6%	3.4%
Brokerage commission	501	613	720	(18.3%)	(14.9%)
Insurance commissions	1,573	1,599	1,448	(1.6%)	10.4%
Security gains (losses)	4	(125)	703	*	*
Bank owned life insurance (BOLI)	848	819	626	3.5%	30.8%
Gain on prepayment of long term borrowings	--	868	--		
Other income	1,177	1,591	1,572	(26.0%)	1.2%
Total other operating income	\$ 14,041	\$ 14,088	\$ 12,971	(.33%)	8.6%

* not meaningful

As the table above illustrates, other operating income decreased slightly in 2006 by \$.05 million when compared to 2005. This is compared to a \$1.1 million (8.6%) increase in 2005 from 2004.

Service charges on deposit accounts and other service charge income increased in 2006 versus 2005 and in 2005 versus 2004. These increases are due primarily to increased customer usage of an account overdraft product. Service charge related income constitutes 45%, 39%, and 37% of other operating income in 2006, 2005, and 2004, respectively.

Trust department income is directly affected by the performance of the equity and bond markets, and by the amount of assets under management. Trust income has increased steadily during the past three years as a result of successful business development efforts in this area, resulting in increases in the average market value of assets under management in the Trust Department. Average assets under management were \$502 million, \$468 million and \$395 million for years 2006, 2005 and 2004, respectively.

Brokerage commissions have steadily declined over the past three years. Less emphasis on this type of business and slower annuity sales have contributed to this decline. Insurance premium income also declined slightly in 2006 due to the closing of the Corporation's reinsurance company, Oakfirst Life Insurance, Inc., in 2005 and lower contingency income. Contingency income is received from the insurance carriers based upon claims histories and varies from year to year. First United Insurance Group purchased a book of business in Morgantown, WV during the latter half of 2006. Because premium payment schedules are more heavily weighted in the first six months of the year, management expects to realize the full benefit of this purchase in 2007.

Securities gains (losses) are the most variable component of other operating income. During 2006, the Bank recorded a minimal gain in the securities portfolio compared to the recorded losses in the securities portfolio of \$.1 million in 2005. Net securities gains for 2004 of \$.7 million resulted primarily from the sale of investments held by the Bank's

Delaware subsidiary, First United Securities, Inc. (“FUS”), in order to utilize certain net operating loss carry-forwards in that subsidiary prior to its liquidation in May 2004.

[25]

Other Operating Expense

Other operating expense for 2006 increased \$.8 million (2.4%) over 2005, compared to a decrease of \$1.3 million (3.7%) over 2004. The following table shows the major components of other operating expense for the past three years (in thousands) and the percentage changes during these years:

	2006	2005	2004	2006 VS. 2005 %	2005 VS. 2004 %
				CHANGE	CHANGE
Salaries and employee benefits	\$ 19,084	\$ 18,428	\$ 16,907	3.6%	9.0%
Other expenses	9,900	9,676	10,360	2.3%	(6.6%)
Equipment	3,011	3,067	2,952	(1.8%)	3.9%
Expenses related to prepayment of long-term borrowings	--	437	2,728	--	(84.0%)
Occupancy	2,043	1,642	1,642	24.4%	--
Data processing	1,452	1,404	1,380	3.4%	1.7%
Total other operating expense	\$ 35,490	\$ 34,654	\$ 35,969	2.4%	(3.7%)

Salaries and employee benefits represent approximately 54% of total other operating expenses in 2006, compared to 53% and 47% in 2005 and 2004, respectively. Salaries and wages increased by \$.7 million in 2006 over 2005, and \$1.5 million in 2005 over 2004. The increase in both periods is directly related to increased staffing to support our growth objectives and routine merit pay increases. The higher increase in 2005 over 2004 was attributable to increases in performance based incentives resulting from high loan and deposit growth.

Other expenses increased by \$.2 million in 2006 when compared to 2005 due to increases in marketing, insurance, and contribution expenses. We experienced cost savings in 2006 associated with corporate restructurings that occurred during 2005. Comparing 2005 to 2004, other expenses decreased by \$.7 million due to reduced professional fees associated with various compliance costs in 2005, such as the Sarbanes-Oxley Act.

There were no expenses related to prepayment of long-term borrowings in 2006. Expenses related to early redemption of long-term borrowings consisted of \$.4 million and \$1.8 million in early payment penalties in 2005 and 2004, respectively, and a \$.9 million write-off of unamortized issuance costs related to the early redemption of subordinated debentures in 2004.

Occupancy and equipment expenses increased by \$.3 million from 2005 to 2006 and \$.1 million from 2004 to 2005. These increases relate to the growth and expansion of the Bank's retail network.

Applicable Income Taxes

Income tax expense amounted to \$5.7 million in 2006, compared to \$6.5 million in 2005 and \$3.5 million in 2004. The resulting effective tax rates were 31.3%, 35.0% and 31.5% for 2006, 2005 and 2004, respectively. The decrease in the effective tax rate for 2006 reflects the effects of management's efforts during late 2005 and early 2006 to restructure the composition of the investment portfolio to include more tax exempt municipal securities. The increase in the effective tax rate in 2005 over 2004 was due primarily to corporate restructurings in February 2004 and May 2004.

CONSOLIDATED BALANCE SHEET REVIEW**Overview**

Our total assets reached \$1.35 billion at December 31, 2006, representing an increase of \$40 million (3.0%) from year-end 2005.

The 2006 year-end total interest-earning asset mix shows a consistent percentage of loans as a percentage of total assets over the past three years, as illustrated below:

	Year End		
	Percentage of Total		
	Assets		
	2006	2005	2004
Net loans	71%	73%	73%
Investments	20%	18%	17%

The year-end total liability mix shows greater reliance on deposits as a source of funding during the three year period and reduced reliance on borrowings, as illustrated below:

	Year End		
	Percentage of Total		
	Liabilities		
	2006	2005	2004
Total deposits	78%	78%	74%
Total borrowings	21%	21%	25%

Loan Portfolio

Through the Bank and the OakFirst Loan Centers, we are actively engaged in originating loans to customers primarily in Garrett, Allegany, Washington, and Frederick Counties in Maryland; Mineral, Hardy, Berkeley, Monongalia Counties in West Virginia; and the surrounding regions of West Virginia and Pennsylvania. We have policies and procedures designed to mitigate credit risk and to maintain the quality of our loan portfolio. These policies include underwriting standards for new credits as well as continuous monitoring and reporting policies for asset quality and the adequacy of the allowance for loan losses. These policies, coupled with ongoing training efforts, have provided effective checks and balances for the risk associated with the lending process. Lending authority is based on the type of the loan, and the experience of the lending officer.

Commercial loans are collateralized primarily by real estate, and to a lesser extent, by equipment and vehicles. Unsecured commercial loans represent an insignificant portion of total commercial loans. Residential mortgage loans are collateralized by the related property. Any residential mortgage loan exceeding a specified internal loan-to-value ratio requires private mortgage insurance. Installment loans are typically collateralized, with loan-to-value ratios which are established based on the financial condition of the borrower. We will also make unsecured consumer loans to qualified borrowers meeting our underwriting standards. Additional information about our loans and underwriting policies can be found in Item 1 of Part I of this annual report under the caption "Banking Products and Services".

Table 3 sets forth the composition of our loan portfolio. Historically, our policy has been to make the majority of our loan commitments in our market areas. We had no foreign loans in our portfolio as of December 31 for all of the periods presented.

[27]

Summary of Loan Portfolio
(Dollars in thousands)

Commercial	\$ 408,361	\$ 404,681	\$ 373,893	\$ 307,523	\$ 242,470
Real Estate - Mortgage	359,601	337,559	319,033	264,730	233,887
Consumer Installment	181,574	193,275	199,862	201,419	173,578
Real Estate - Construction	14,120	25,446	18,196	16,093	11,072
Lease Financing	--	--	466	2,260	4,819
Total Loans	\$ 963,656	\$ 960,961	\$ 911,450	\$ 792,025	\$ 665,826

During 2006, gross loans increased by \$3 million, or .3% over 2005. This growth was focused in our commercial (\$4 million) and residential mortgage (\$22 million) loan portfolios, offset by a decline in installment (\$12 million) and residential - construction (\$11 million) loan portfolios, and remains consistent with management's objectives over the past several years. Continued efforts were made to increase the percentage of loans in the portfolio with adjustable interest rates. At year-end 2006, adjustable interest rate loans maturing within one to five years were 53% of total loans, compared to 59% at year-end 2005.

Commercial loans increased 1% in 2006, following an 8% increase in 2005. Origination of new commercial loans remained high in 2006, similar to 2005, as our lenders continued to identify new customer opportunities and expand existing customer relationships in all of our market areas, while maintaining existing standards of credit worthiness. However, during both 2005 and 2006, new loan volume was offset by high levels of repayment, which stifled growth as compared to prior years. Most new commercial loans were priced on a variable rate basis, resetting monthly, which proved to be very popular with business borrowers. Commercial loans secured by real estate were 82% of total commercial loans at the end of 2006, compared to 80% in 2005 and 81% in 2004.

Residential mortgage loans increased by \$22 million, or 7%, in 2006 when compared to 2005. This follows a 6% increase in 2005 over 2004. Growth in the mortgage loan portfolio during 2006 was primarily in fixed rate mortgages due to the flat interest rate yield curve. This loan product was utilized to satisfy the requirements of the Community Reinvestment Act. Actual residential mortgage growth in 2005 of \$50 million over 2004 (16%) was offset by \$31 million in loan sales during the fourth quarter of 2005. The loans selected for sale were identified through an extensive analysis of the mortgage portfolio and included primarily adjustable rate products that management believed presented limited opportunities for improved yields in the next few years. Proceeds from the loan sale were invested in the Bank's investment portfolio, primarily in higher yielding tax-exempt municipal securities.

Fixed-interest rate loans make up 59% of the total loan portfolio at the end of 2006, compared to 33% of total loans at the end of 2005 and 67% at the end of 2004.

Consumer installment loans in 2006 decreased by \$11.7 million, or 6%, when compared to 2005. This decrease reflects management's continued shift toward more commercial loans with less emphasis on the highly competitive consumer loan market. Specifically, less focus was placed on generating new indirect auto loans during 2006 and 2005. Indirect auto loans comprise the largest percentage of installment loans, 85% at the end of 2006, and 84% and 78% at the end of 2005 and 2004, respectively. The remaining lease financing portfolio was repaid in 2005 and we discontinued this line of business.

[28]

The following table sets forth remaining maturities, based upon contractual dates, for selected loan categories as of December 31, 2006 (in thousands):

Maturities of Loan Portfolio at December 31, 2006

Table 4

	Maturing Within One Year	After One But Within Five Years	Maturing After Five Years	Total
Commercial	\$ 229,467	\$ 161,633	\$ 17,261	\$ 408,361
Real Estate - Mortgage	80,183	136,425	142,993	359,601
Installment	10,244	16,937	154,393	181,574
Real Estate - Construction	--	14,120	--	14,120
Total Loans	\$ 319,894	\$ 329,115	\$ 314,647	\$ 963,656

**Classified by Sensitivity to Change in
Interest Rates**

Fixed-Interest Rate Loans	\$ 45,375	\$ 92,123	\$ 291,246	\$ 428,744
Adjustable-Interest Rate Loans	274,519	236,992	23,401	534,912
Total Loans	\$ 319,894	\$ 329,115	\$ 314,647	\$ 963,656

It is our policy to place a loan in non-accrual status, except for consumer loans, whenever there is substantial doubt about the ability of a borrower to pay principal or interest on the outstanding credit. Management considers such factors as payment history, the nature of the collateral securing the loan, and the overall economic situation of the borrower when making a non-accrual decision. Management closely monitors the status of all non-accrual loans. A non-accruing loan is restored to accrual status when principal and interest payments have been brought current, it becomes well secured, or is in the process of collection and the prospects of future contractual payments are no longer in doubt. Generally, consumer installment loans are not placed on non-accrual status, but are charged off after they are 120 days contractually past due. Table 5 sets forth the historical amounts of non-accrual, past-due and restructured loans (in thousands) for the past five years:

Risk Elements of Loan Portfolio

Table 5

	2006	2005	2004	2003	2002
Non-Accrual Loans	\$ 3,190	\$ 2,393	\$ 3,439	\$ 2,774	\$ 1,847
Accruing Loans Past Due 90 Days or More	619	989	1,105	1,236	1,458
Restructured Loans	522	532	544	554	565

Interest income not recognized as a result of placing loans on a non-accrual status was \$.2 million, \$.05 million and \$.4 million during 2006, 2005 and 2004, respectively.

Allowance for Loan Losses

An allowance for loan losses is maintained to absorb losses from the loan portfolio. The allowance for loan losses is based on management's continuing evaluation of the quality of the loan portfolio, assessment of current economic conditions, diversification and size of the portfolio, adequacy of collateral, past and anticipated loss experience, and the amount of non-performing loans.

We use the methodology outlined in FDIC Statement of Policy on Allowance for Loan and Lease Losses. The starting point for this methodology is to segregate the loan portfolio into two pools, non-homogeneous (i.e., commercial) and homogeneous (i.e., consumer and residential mortgage) loans. Each loan pool is analyzed with general allowances and specific allocations being made as appropriate. For general allowances, the previous eight quarters of loss activity are used in the estimation of losses in the current portfolio. These historical loss amounts are modified by the following qualitative factors: levels of and trends in delinquency rates and non-accrual loans; trends in volumes and terms of loans; effects of changes in lending policies; experience, ability, and depth of management; national and local economic trends and conditions; and concentrations of credit in the determination of the general allowance. The qualitative factors are updated each quarter by information obtained from internal, regulatory, and governmental sources. Specific allocations of the allowance for loan losses are made for those loans on the "Watchlist" in which the collateral value is less than the outstanding loan balance with the allocation being the dollar difference between the two. The Watchlist represents loans, identified and closely monitored by management, which possess certain qualities or characteristics that may lead to collection and loss issues. Allocations are not made for loans that are cash secured, for the Small Business Administration and Farm Service Agency guaranteed portion of loans, or for loans that are sufficiently collateralized.

[29]

The allowance for loan losses is based on estimates, and actual losses will vary from current estimates. These estimates are reviewed quarterly, and as adjustments, either positive or negative, become necessary, a corresponding increase or decrease is made in the allowance for loan losses. The methodology used to determine the adequacy of the allowance for loan losses is consistent with prior years. An estimate for probable losses related to unfunded lending commitments, such as letters of credit and binding but unfunded loan commitments is also prepared. This estimate is computed in a manner similar to the methodology described above, adjusted for the probability of actually funding the commitment.

The balance of the allowance for loan losses increased to \$6.5 million at year-end 2006, from \$6.4 million at year-end 2005. Several factors contributed to the \$.1 million increase in the balance of the allowance in 2006, including: a 33% increase in the balance of non-accrual loans (from \$2.4 million in 2005 to \$3.2 million in 2006); changes to the qualitative factors which are reviewed quarterly; offset by a decrease in impaired loans from \$.2 million in 2005 to \$.1 million in 2006; and a decrease in the percentage of net charge-offs to average outstanding loans from .15% to .11%, due to a decline in the amount of commercial and installment loan charge-offs during 2006. At December 31, 2006, the balance of the allowance was equal to .68% of total loans, which was six times the amount of net charge-offs for the year.

The balance of the allowance for loan losses decreased to \$6.4 million at year-end 2005, from \$6.8 million at year-end 2004. Several factors contributed to the \$.4 million decrease in the balance of the allowance in 2005, including: a 29% decrease in the balance of non-accrued loans (from \$3.4 million in 2004 to \$2.4 million in 2005); a decrease in impaired loans from \$.6 million in 2004 to \$.2 million in 2005; and a decrease in the percentage of net charge-offs to average outstanding loans from .20% to .15%, due to a decline in the amount of commercial and installment loan charge-offs during 2005. At December 31, 2005, the balance of the allowance was equal to .67% of total loans, which was four times the amount of net charge-offs for the year.

As a result of management's evaluation of the loan portfolio using the factors and methodology described above, the allowance for loan losses is considered adequate as of December 31, 2006.

[30]

Table 6 presents the activity in the allowance for loan losses by major loan category for the past five years.

Table 7 presents management's allocation of the allowance for loan losses by major loan category in comparison to that loan category's percentage of total loans. Changes in the allocation over time reflect changes in the composition of the loan portfolio risk profile and refinements to the methodology of determining the allowance. Specific allocations in any particular category may be reallocated in the future as needed to reflect current conditions. Accordingly, the entire allowance is considered available to absorb losses in any category.

Investment Securities

Our entire security portfolio is categorized as available-for-sale. Investment securities classified as available-for-sale are held for an indefinite period of time and may be sold in response to changing market and interest rate conditions or for liquidity purposes as part of our overall asset/liability management strategy. Available-for-sale securities are reported at market value, with unrealized gains and losses excluded from earnings and reported as a separate component of other comprehensive income included in shareholders' equity, net of applicable income taxes. We do not currently purchase securities with the intent to resell and, therefore, do not own any securities classified as trading securities. For additional information, see Notes 1 and 3 of the Notes to Consolidated Financial Statements, which are included in Item 8 of Part II of this annual report.

The following sets forth the composition of our securities portfolio by major category as of the indicated dates (in thousands):

	December 31 (fair value)					
	2006	As % of Total	2005	As % of Total	2004	As % of Total
Securities						
Available-for-Sale:						
U.S. government and agencies	\$ 97,490	37%	\$ 107,019	47%	\$ 102,294	48%
Mortgage-backed securities	50,829	19%	63,938	28%	74,386	35%
Obligation of states and political subdivisions	68,432	26%	57,661	25%	22,461	11%
Corporate and other debt	46,521	18%	1,077	--	11,520	6%
Other securities	--	--	400	--	--	--
Total	\$ 263,272	100%	\$ 230,095	100%	\$ 210,661	100%

Total investment securities increased \$33 million (14%) in 2006 when compared to the year-end balance in 2005. This increase is attributable to an investment leverage strategy utilized during 2006. The Bank purchased \$45 million of

investment grade corporate bonds with a quarterly adjustable rate and funded with three month brokered certificates of deposit. U.S. Government agencies decreased \$10 million and tax exempt municipal bonds increased by \$11 million while mortgage-backed securities declined by \$13 million due to maturities and repayments.

Total investment securities increased \$19 million (9%) in 2005 compared to the year-end balance in 2004. This increase was attributable to investment of the proceeds from the mortgage loan sale that occurred during the fourth quarter of 2005. U.S. Government agencies increased \$5 million and tax exempt municipal bonds increased by \$35 million while mortgage-backed securities declined by \$10 million due to maturities and repayments. The significant increase in municipal bonds is part of management's strategy to generate additional tax-exempt income.

At December 31, 2006, the securities available for sale balance included a net unrealized loss of \$1.2 million, which represents the difference between fair value and amortized cost. The comparable amount at December 31, 2005 was a net unrealized loss of \$3.2 million.

[32]

The fair value of securities available for sale decreases whenever interest rates increase and vice versa. The impact on bond prices of rising interest rates at the end of 2005 and throughout 2006 is reflected in the unrealized net loss position of the investment portfolio at year-end 2006. Further increases in interest rates after December 31, 2006, if sustained, will adversely impact the fair value of securities available for sale in 2007 in comparison to the 2006 year-end balance. Net unrealized gains/losses on available-for-sale securities are included in accumulated comprehensive income, net of tax, which is a component of shareholders' equity.

We manage our investment portfolios utilizing policies which seek to achieve desired levels of liquidity, manage interest rate sensitivity, meet earnings objectives, and provide required collateral support for deposit activities and cash management overnight investment products. Excluding the U.S. Government sponsored agencies, we had no concentration of investment securities from any single issue that exceeded 10% of shareholders' equity.

Table 8 sets forth the contractual or estimated maturities of the components of our securities portfolio as of December 31, 2006 and the weighted average yields on a tax-equivalent basis.

Investment Security Maturities, Yields, and Fair Values at December 31, 2006
(Dollars in thousands)

Deposits

Table 9 sets forth the average deposit balances by major category for 2006, 2005 and 2004:

Average Deposit Balances
(Dollars in thousands)

Table 9

	2006		2005		2004	
	Average Balance	Avg. Yield	Average Balance	Avg. Yield	Average Balance	Avg. Yield
	\$ 107,595	--	\$ 112,860	--	\$ 94,871	--

Non-interest-bearing demand deposits						
Interest-bearing demand deposits	285,250	2.25%	293,129	1.67%	279,217	.97%
Savings deposits	47,779	.97%	58,964	.41%	63,471	.37%
Time deposits less than \$100	229,829	3.67%	264,503	2.28%	209,708	2.36%
Time deposits \$100 or more	273,305	4.41%	187,412	4.24%	149,113	2.83%
Total	\$ 943,758		\$ 916,868		\$ 796,380	

[33]

Total deposits increased \$15.5 million in 2006, or 2% when compared to 2005. This compares to a \$105 million (12%) increase during 2005. On an average balance basis, total deposits increased \$27 million (3%) in 2006 versus 2005, following a \$120 million (15%) increase in 2005.

The increase in deposits resulted primarily from the Bank's utilization of brokered certificates of deposit to fund the purchase of corporate bonds combined with the successful promotion of a 9-month certificate of deposit offered during most of 2006. These increases were offset by the decline in non-interest bearing and interest bearing demand deposits and savings accounts. The Bank also chose to allow high-priced, volatile customer deposits to decline in order to allocate these resources to customers with full banking relationships.

The increase in deposits in 2005 resulted primarily from the Bank's successful promotion of a 13-month certificate of deposit early in 2005, its purchase of brokered certificates of deposit, and the movement of \$30 million in trust money market funds into the Bank during the second quarter of 2005. At December 31, 2006 and 2005, brokered certificates of deposit amounted to \$178.0 million and \$165.0 million, respectively, or 18% of total deposits at both year-ends.

The following table sets forth the maturities of time deposits of \$100,000 or more (in thousands):

**Maturity of Time Deposits of \$100,000 or More
(Dollars in thousands)**

Table 10

	December 31, 2006
Maturities	
3 Months or Less	\$ 209,325
3-6 Months	87,536
6-12 Months	96,148
Over 1 Year	86,608
Total	\$ 479,617

The Bank has opted to maintain relatively short maturities in its time deposits of \$100,000 or more in anticipation of stable or lower interest rates in the future.

Borrowed Funds

The following shows the composition of the Corporation's borrowings at December 31 (in thousands):

	2006	2005	2004
Securities sold under agreements to repurchase	\$ 74,879	\$ 90,939	\$ 86,914
Short-term FHLB advances	24,500	31,000	23,319
Total short-term borrowings	99,379	121,939	110,233
Long-term FHLB advances	130,401	92,444	139,486
Junior subordinated debentures	35,929	35,929	35,929

Edgar Filing: FIRST UNITED CORP/MD/ - Form 10-K

Total long-term borrowings		166,330		128,373		175,415
Total borrowings	\$	265,709	\$	250,312	\$	285,648
Average balance (from Table 1)	\$	260,519	\$	260,349	\$	287,940

[34]

Total borrowings increased \$15 million (6%) in 2006 compared to 2005. The average balance of total borrowings increased slightly by \$.2 million (.06%) in 2006 when compared to 2005, following a \$28 million (10%) decrease in 2005 when compared to 2004. Securities sold under agreements to repurchase declined by \$16 million during 2006. These borrowings consist of overnight sweep accounts for our business customers and municipalities. Growth of \$14 million in this area was offset by the loss of \$30 million from a local County government. During 2006, the Bank took advantage of replacing short-term money with more attractive long-term advances offered by the Federal Home Loan Bank of Atlanta.

During 2005, higher-rate long term borrowings were repaid early and replaced with lower cost short-term borrowings. This strategy, in conjunction with continued emphasis on increasing low cost in-house deposits, was one of the contributing factors to the increase in net interest income and net interest margin in 2005.

Management will continue to closely monitor interest rates within the context of its overall asset-liability management process. See the "Interest Rate Sensitivity" section of this Item 7 for further discussion on this topic.

At December 31, 2006, we had additional borrowing capacity with the FHLB totaling \$18.0 million and an additional \$25 million of unused lines of credit with various financial institutions. See Note 8 to Consolidated Financial Statements, included in Item 8 of Part II of this annual report, for further details about our borrowings and additional borrowing capacity, which is incorporated herein by reference.

Capital Resources

The Bank and the Corporation are subject to risk-based capital regulations, which were adopted and monitored by federal banking regulators. These guidelines are used to evaluate capital adequacy and are based on an institution's asset risk profile and off-balance sheet exposures, such as unused loan commitments and stand-by letters of credit. The regulatory guidelines require that a portion of total capital be Tier I capital, consisting of common shareholders' equity, qualifying portion of trust issued preferred securities, and perpetual preferred stock, less goodwill and certain other deductions. The remaining capital, or Tier II capital, consists of elements such as subordinated debt, mandatory convertible debt, remaining portion of trust issued preferred securities, and grandfathered senior debt, plus the allowance for loan losses, subject to certain limitations.

Under the risk-based capital regulations, banking organizations are required to maintain a minimum 8% (10% for well capitalized banks) total risk-based capital ratio (total qualifying capital divided by risk-weighted assets), including a Tier I ratio of 4% (6% for well capitalized banks). The risk-based capital rules have been further supplemented by a leverage ratio, defined as Tier I capital divided by average assets, after certain adjustments. The minimum leverage ratio is 3% (5% for well capitalized banks) for banking organizations that do not anticipate significant growth and have well-diversified risk (including no undue interest rate risk exposure), excellent asset quality, high liquidity and good earnings. Other banking organizations not in this category are expected to have ratios of at least 4-5%, depending on their particular condition and growth plans. Higher capital ratios could be required if warranted by the particular circumstances or risk profile of a given banking organization. In the current regulatory environment, banking organizations must stay well capitalized in order to receive favorable regulatory treatment on acquisition and other expansion activities and favorable risk-based deposit insurance assessments. The Corporation's capital policy establishes guidelines meeting these regulatory requirements, and takes into consideration current or anticipated risks as well as potential future growth opportunities.

At December 31, 2006, the Corporation's total risk-based capital ratio was 12.95%, which was well above the regulatory minimum of 8%. The Corporation's total risk-based capital ratio for year-end 2005 was 12.66%. As of December 31, 2006, the most recent notification from the regulators categorizes the Corporation as well capitalized under the regulatory framework for prompt corrective action. See Note 2 to Consolidated Financial Statements, included in Item 8 of Part II of this annual report, for additional information regarding regulatory capital ratios.

Total shareholders' equity increased \$4.9 million to \$96.9 million at December 31, 2006, from \$92.0 million at year-end 2005. The return on average equity (ROE) for 2006 decreased to 13.07% from 13.61% for 2005. While net income increased in 2006 compared to 2005, capital grew at a faster pace causing the decrease in ROE.

Cash dividends of \$.76 per share were paid during 2006, compared with \$.74 and \$.72 paid in 2005 and 2004, respectively. This represents a dividend payout ratio (cash dividends per share divided by net income per share) of 37.04%, 37.19%, and 57.48% for 2006, 2005, and 2004, respectively.

[35]

Liquidity

The Asset and Liability Management Committee of the Corporation seeks to assess and manage the risks associated with fluctuating interest rates while maintaining adequate liquidity. This is accomplished by formulating and implementing policies that take into account the sources and uses of funds, maturity and repricing distributions of assets and liabilities, pricing strategies, and marketability of assets.

The objective of liquidity management is to maintain sufficient funds to satisfy the needs of depositors and borrowers. The principal sources of asset liquidity are cash and due from banks, interest-bearing deposits in banks, federal funds and investment securities available-for-sale that are not pledged. At December 31, 2006, such liquid assets totaled \$117 million. While much more difficult to quantify, liability liquidity is enhanced by a stable core deposit base, access to credit lines at other financial institutions, and the Corporation's ability to renew maturing deposits. The Corporation's ability to attract deposits and borrow funds depends primarily on continued rate competitiveness, profitability, capitalization and overall financial condition.

When appropriate, we take advantage of external sources of funds, such as advances from the FHLB, lines of credit at other financial institutions and brokered funds. These external sources often provide attractive interest rates and flexible maturity dates that better enable us to match funding dates and pricing characteristics with contractual maturity dates and pricing parameters of earning assets. At December 31, 2006, our available borrowing capacity through the FHLB and other financial institutions was approximately \$43 million.

We actively manage our liquidity position under the direction of the Asset and Liability Management Committee of the Corporation's Board of Directors. Monthly reviews by management and quarterly reviews by this Committee under prescribed policies and procedures are intended to ensure that we will maintain adequate levels of available funds. Management believes that we have adequate liquidity available to respond to current and anticipated liquidity demands, which will include completing the renovations to the facility acquired for its operations center. Additionally, liquidity needs for future branch expansion will be evaluated as such opportunities arise. Management anticipates opening additional branches or expanding current facilities in its existing market footprint annually or bi-annually for the next several years.

At the holding company level, the Corporation uses cash to pay dividends to shareholders and to service its junior subordinated debt. The main sources of funding for the holding company include dividends from the Bank and access to the capital markets. As discussed in Note 12 of the Notes to Consolidated Financial Statements, included in Item 8 of Part II of this annual report, the Bank is subject to significant regulation and, among other things, may be limited in its ability to pay dividends or transfer funds to the holding company. Accordingly, consolidated cash flows as presented in the Consolidated Statements of Cash Flows may not represent cash immediately available to the holding company. During 2006, the Bank declared and paid dividends of \$6.3 million. As of December 31, 2006, the amount of additional dividends that the Bank could have paid to the Corporation without regulatory approval was \$13.1 million.

Interest Rate Sensitivity

Our primary market risk is interest rate fluctuation. Interest rate risk results primarily from the traditional banking activities that we engage in, such as gathering deposits and extending loans. Many factors, including economic and financial conditions, movements in interest rates and consumer preferences affect the difference between the interest earned on our assets and the interest paid on our liabilities. Interest rate sensitivity refers to the degree that earnings will be impacted by changes in the prevailing level of interest rates. Interest rate risk arises from mismatches in the repricing or maturity characteristics between interest-bearing assets and liabilities. Management seeks to minimize fluctuating net interest margins, and to enhance consistent growth of net interest income through periods of changing interest rates. Management uses interest sensitivity gap analysis and simulation models to measure and manage these

risks. The interest rate sensitivity gap analysis assigns each interest-earning asset and interest-bearing liability to a time frame reflecting its next repricing or maturity date. The differences between total interest-sensitive assets and liabilities at each time interval represent the “interest sensitivity gap” for that interval. A positive gap generally indicates that rising interest rates during a given interval will increase net interest income, as more assets than liabilities will reprice. A negative gap position would benefit us during a period of declining interest rates.

In order to manage interest sensitivity risk, management formulates guidelines regarding asset generation and pricing, funding sources and pricing, and off-balance sheet commitments. These guidelines are based on management’s outlook regarding future interest rate movements, the state of the regional and national economy, and other financial and business risk factors. Management uses computer simulations to measure the effect on net interest income of various interest rate scenarios. Key assumptions used in the computer simulations include cash flows and maturities of interest rate sensitive assets and liabilities, changes in asset volumes and pricing, and management’s capital plans. This modeling reflects interest rate changes and the related impact on net interest income over specified periods. Management has not historically used derivative financial instruments to manage its interest rate sensitivity. At December 31, 2006, the static gap analysis prepared by management indicated that we become liability sensitive over the next year. In computing the effect on net interest income of changes in interest rates, management has assumed that any changes would immediately affect earnings. Normally, when an organization is liability sensitive there is a negative impact to net interest income when interest rates increase. Based on the simulation analysis performed at December 31, 2006 and 2005, management estimated the following changes in net interest income, assuming the indicated rate changes:

[36]

	(Dollars in thousands)	
	2006	2005
+200 basis point increase	\$ (3,658)	\$ 322
+100 basis point increase	\$ (1,612)	\$ 286
-100 basis point decrease	\$ 663	\$ (1,228)

This estimate is based on assumptions that may be affected by unforeseeable changes in the general interest rate environment and any number of unforeseeable factors. Rates on different assets and liabilities within a single maturity category adjust to changes in interest rates to varying degrees and over varying periods of time. The relationships between lending rates and rates paid on purchased funds are not constant over time. Management can respond to current or anticipated market conditions by lengthening or shortening the Corporation's sensitivity through loan repricings or changing its funding mix. The rate of growth in interest-free sources of funds will influence the level of interest-sensitive funding sources. In addition, the absolute level of interest rates will affect the volume of earning assets and funding sources. As a result of these limitations, the interest-sensitive gap is only one factor to be considered in estimating the net interest margin.

Impact of Inflation - Our assets and liabilities are primarily monetary in nature, and as such, future changes in prices do not affect the obligations to pay or receive fixed and determinable amounts of money. During inflationary periods, monetary assets lose value in terms of purchasing power and monetary liabilities have corresponding purchasing power gains. The concept of purchasing power is not an adequate indicator of the impact of inflation on financial institutions because it does not incorporate changes in interest rates, which are an important determination of the Corporation's earnings.

Contractual Obligations, Commitments and Off-Balance Sheet Arrangements

The following table presents, as of December 31, 2006, significant fixed and determinable contractual obligations to third parties by payment date and amounts and expected maturities of significant commitments. Commitments to extend credit and letters of credit are legally binding, conditional agreements generally having fixed expiration or termination dates. These commitments generally require customers to maintain certain credit standards and are established based on management's credit assessment of the customer. The commitments may expire without being drawn upon. Therefore, the total commitment does not necessarily represent future funding requirements. Further discussion of the nature of certain obligations and commitments is included in the Notes to the Consolidated Financial Statements referenced in the table below, which are included in Item 8 of Part II of this annual report.

[37]

Contractual Obligations (in millions)	Note Reference	Total	Payments Due by Period			
			Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
Long term debt	8					
FHLB Advances		\$ 130.4	\$ 19.8	\$ 26.5	\$ 82.00	\$ 2.10
Junior subordinated debt		35.9	--	--	--	35.9
Operating leases	5	1.9	.4	.8	.7	--
Data processing and telecommunications services	5	3.3	1.4	1.9	--	--
Time Deposits	7	533.2	453.7	66.2	12.6	.7
Pension/SERP	11	10,984.0	532.0	1,198.0	1,597.0	7,657.0

Commitments (in millions)	Note Reference	Total	Commitment Expiration by Period			
			Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
Loan commitments	4	\$ 119.8	\$ 9.0	\$ 19.1	\$ 3.4	\$ 88.3
Letters of credit	4	7.2	7.2	--	--	--

At December 31, 2006, our off-balance sheet arrangements were limited to loan commitments and letters of credit discussed above.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information called for by this item is incorporated herein by reference to Item 7 of Part II of this annual report under the caption "Interest Rate Sensitivity".

[38]

Item 8. Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
First United Corporation
Oakland, Maryland

We have audited the accompanying consolidated statements of financial condition of First United Corporation and subsidiaries as of December 31, 2006, and the related consolidated statements of income, changes in shareholders' equity, and cash flows for the year then ended. These consolidated financial statements are the responsibility of the First United Corporation's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit. The consolidated financial statements of First United Corporation for the years ended December 31, 2005 and 2004 were audited by other auditors, whose report dated March 9, 2006, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the 2006 consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of First United Corporation and its subsidiaries as of December 31, 2006, and the consolidated results of their operations and their cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the consolidated financial statements, the Corporation changed its method of accounting for its defined benefit pension plans in 2006.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of First United Corporation's internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 9, 2007, expressed an unqualified opinion on management's assessment of internal control over financial reporting and an unqualified opinion on the effectiveness of internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Shareholders and Board of Directors
First United Corporation

We have audited the accompanying consolidated balance sheet of First United Corporation and subsidiaries (the Company) as of December 31, 2005, and the related consolidated statements of income, changes in shareholders' equity, and cash flows for each of the two years in the period ended December 31, 2005. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of First United Corporation and subsidiaries at December 31, 2005, and the consolidated results of their operations and their cash flows for each of the two years in the period ended December 31, 2005, in conformity with U.S. generally accepted accounting principles.

[44]

First United Corporation and Subsidiaries
Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies

Business

First United Corporation (“Corporation”) is a registered financial holding company that was incorporated under the laws of Maryland. It is the parent company of First United Bank & Trust (“Bank”), First United Insurance Group, LLC, (“Insurance Group”) a full-service insurance agency, OakFirst Loan Center, Inc. and OakFirst Loan Center, LLC, both consumer finance companies. The Bank provides a complete range of retail and commercial banking services to a customer base serviced by a network of 25 offices and 34 automated teller machines. This customer base includes individuals, businesses and various governmental units. The Insurance Group is a full-services insurance agency. The Corporation and its subsidiaries principally operate in four Western Maryland counties and four West Virginia counties.

Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles that require management to make estimates and assumptions that affect the reported amounts of certain assets and liabilities at the date of the financial statements as well as the reported amount of revenues and expenses during the reporting period. Actual results could differ from these estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses and the valuation of deferred tax assets. For purposes of comparability, certain prior period amounts have been reclassified to conform with the 2006 presentation.

The Corporation determines whether it should consolidate other entities or account for them on the equity method of accounting depending on whether it has a controlling financial interest in an entity of less than 100% of the voting interest of that entity by considering the provisions of Accounting Research Bulletin 51 (ARB 51), “Consolidated Financial Statements”, or a controlling financial interest in a variable interest entity (“VIE”) by considering the provisions of FASB Interpretation No. 46R (“FIN 46R”), “Consolidation of Variable Interest Entities”. Under FIN 46, a VIE is a corporation, partnership, trust or any other legal structure used for business purposes that either (a) does not have equity investors with voting rights or (b) has equity investors that does not provide sufficient financial resources for the entity to support its activities. Under FIN 46R, an entity that holds a variable interest in a VIE is required to consolidate the VIE if the entity is subject to a majority of the risk of loss from the VIE’s activities, is entitled to receive a majority of the entity’s residual returns or both. ARB 51 is considered for entities in which the total equity investment at risk is sufficient to enable the entity to finance itself independently and provides the equity holders with the obligation to absorb losses, the right to receive residual returns and the right to make financial and operating decisions.

As discussed further in Note 8, the Corporation formed statutory trusts for the purpose of issuing securities which qualify as regulatory capital. These trusts are considered VIEs and are not consolidated, based on the criteria established in FIN 46. The Corporation’s investment in non-consolidated VIEs is accounted for using the equity method of accounting.

Principles of Consolidation

The consolidated financial statements of the Corporation include the accounts of the Bank, the Insurance Group, OakFirst Loan Center, Inc., and OakFirst Loan Center, LLC. All significant inter-company accounts and transactions have been eliminated.

Significant Concentrations of Credit Risk

Most of the Corporation's activities are with customers located in Western Maryland and Northeastern West Virginia. Note 3 discusses the types of securities in which the Corporation invests and Note 4 discusses the types of lending in which the Corporation engages. The Corporation does not have any significant concentrations in any one industry or customer.

[45]

Investments

Securities available-for-sale: All securities purchased have been classified as available-for-sale, and as such are stated at fair value, with the unrealized gains and losses, net of tax, reported as a separate component of accumulated other comprehensive income (loss) in shareholders' equity.

The amortized cost of debt securities classified as available-for-sale is adjusted for amortization of premiums to the first call date, if applicable, or to maturity, and for accretion of discounts to maturity, or in the case of mortgage-backed securities, over the estimated life of the security. Such amortization and accretion is included in interest income from investments. Interest and dividends are included in interest income from investments. Management systematically evaluates the securities for impairment on a quarterly basis. Declines in the fair value of available for sale securities below their cost that are considered other than temporary declines are recognized in earnings as realized losses in the period in which the impairment determination is made. In estimating other-than-temporary impairment losses, management considers (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Corporation to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. Gains and losses on the sale of securities are recorded using the specific identification method.

Loans

Loans and leases that management has the intent and ability to hold for the foreseeable future or until maturity or full repayment by the borrower are reported at their outstanding unpaid principal balance.

Interest and Fees on Loans

Interest on loans and leases (other than those on non-accrual status) is recognized based upon the principal amount outstanding. Loan fees in excess of the costs incurred to originate the loan are recognized as income over the life of the loan utilizing either the interest method or the straight-line method, depending on the type of loan. Generally, fees on loans with a specified maturity date, such as residential mortgages, are recognized using the interest method. Loan fees for lines of credit are recognized on the straight-line method.

A loan is considered to be past due when a payment has not been received for 30 days after its contractual due date. It is the Corporation's general policy to discontinue the accrual of interest on loans (including impaired loans), except for consumer loans, when circumstances indicate that collection of principal or interest is doubtful. After a loan is placed on non-accrual status, interest is not recognized and cash payments received are applied to the principal balances. A non-accruing loan is restored to accrual status when principal and interest payments have been brought current, it becomes well secured, or is in the process of collection and the prospects of future contractual payments are no longer in doubt.

Generally, consumer installment loans are not placed on non-accrual status, but are charged off after they are 120 days contractually past due. Loans other than consumer loans are charged-off based on an evaluation of the facts and circumstances of each individual loan.

Allowance for Loan Losses

The allowance for loan losses is maintained at a level believed by management to be sufficient to absorb estimated losses inherent in the loan portfolio. Loans deemed uncollectible are charged against the allowance, while recoveries are credited to it. Management's determination of the adequacy of the loan loss reserve is based upon the impact of economic conditions on the borrower's ability to repay, past collection experience, the risk characteristics of the loan

portfolio, estimated fair value of underlying collateral for collateral dependent loans, and such other factors which, in management's judgment, deserve current recognition.

The Corporation utilizes the methodology outlined in the FDIC Statement of Policy on Allowance for Loan and Lease Losses. The starting point for this methodology is to segregate the loan portfolio into two pools, non-homogeneous (i.e. commercial) and homogeneous (i.e. mortgage, consumer) loans. Each loan pool is analyzed with general allowances and specific allocations being made as appropriate. For general allowances, the previous eight quarters of loss activity are used in the estimation of losses in the current portfolio. These historical loss amounts are modified by the following qualitative factors: levels of and trends in delinquency and non-accruals; trends in volumes and terms of loans; effects of changes in lending policies, experience, ability, and depth of management, national and local economic trends and conditions; and concentrations of credit in the determination of the general allowance. The qualitative factors are updated each quarter by the gathering of information from internal, regulatory, and governmental sources. Specific allocations are made for those loans on the Watchlist in which the collateral value is less than the outstanding loan balance with the allocation being the dollar difference between the two. The Watchlist represents loans, identified and closely monitored by management, which possess certain qualities or characteristics that may lead to collection and loss issues. Allocations are not made for loans that are cash secured, for the Small Business Administration or Farm Service Agency guaranteed portion of loans, or for loans that are sufficiently collateralized.

[46]

A loan is considered impaired when, based on current information and events, it is probable that the Corporation will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis for commercial and construction loans. Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Corporation does not separately identify individual consumer and residential loans for impairment disclosures, unless such loans are the subject of a restructuring agreement.

Premises and Equipment

Land is carried at cost. Premises and equipment are carried at cost, less accumulated depreciation. The provision for depreciation for financial reporting has been made by using the straight-line method based on the estimated useful lives of the assets, which range from 18 to 32 years for buildings and three to 20 years for equipment. Accelerated depreciation methods are used for income tax purposes.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the cost of an acquisition over the fair value of the net assets acquired in business combinations. In accordance with SFAS No. 142, and SFAS No. 147, which applies specifically to branch purchases that qualify as business combinations, goodwill is not amortized but is subject to an annual impairment test.

Core deposit intangible assets represent the present value of future net income to be earned from acquired deposits and are being amortized using the straight-line method over their estimated life of 7.2 years.

Bank-Owned Life Insurance (BOLI)

BOLI policies are recorded at their cash surrender values. Changes in the cash surrender values are recorded as other operating income.

Income Taxes

The Corporation accounts for income taxes using the liability method. Under the liability method, the deferred tax liability or asset is determined based on the difference between the financial statement and tax bases of assets and liabilities (temporary differences) and is measured at the enacted tax rates that will be in effect when these differences reverse. Deferred tax expense is determined by the change in the net liability or asset for deferred taxes adjusted for changes in any deferred tax asset valuation allowance.

Statement of Cash Flows

Cash and cash equivalents are defined as cash and due from banks in the consolidated statement of cash flows.

Earnings Per Share

Earnings per share is computed by dividing net income by the weighted average number of common shares outstanding. The Corporation does not have any common stock equivalents.

[47]

Trust Assets and Income

Assets held in an agency or fiduciary capacity are not assets of the Corporation and, accordingly, are not included in the accompanying consolidated statements of financial condition. Income from the Bank's Trust department represents fees charged to customers and is recorded on an accrual basis.

Business Segments

As defined by SFAS No. 131, "Disclosure about Segments of an Enterprise and Related Information," the Corporation has two operating segments, community banking and insurance. Because the operating activities of the insurance segment are immaterial to the consolidated financial statements, no separate segment disclosures for insurance operations have been made.

Variable Interest Entities

In 2003, the FASB issued Interpretations No. 46 (FIN 46 and FIN 46 R), "Consolidation of Variable Interest Entities", which clarified the application of Accounting Research Bulletin No. 51, "Consolidated Financial Statements" to certain VIEs, commonly referred to as special-purpose entities (SPEs), in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties.

In 1999, the Corporation issued approximately \$23.7 million in mandatorily redeemable junior subordinated debentures to First United Capital Trust, a Delaware business trust ("Capital Trust"), the common stock of which was owned by the Corporation. Capital Trust concurrently issued approximately \$23.0 million in mandatorily redeemable preferred securities to third-party investors. The Corporation's investment in Capital Trust was considered a SPE. In accordance with the requirements of FIN 46 and FIN 46R, the Corporation reported \$23.7 million of junior subordinated debentures as long-term borrowings and its \$0.7 million equity interest in the Capital Trust as an "Other Asset" at December 31, 2003. On September 30, 2004, the Corporation exercised its option to redeem the \$23.7 million of junior subordinated debentures and, at the same time, Capital Trust redeemed the related preferred securities. Capital Trust was thereafter dissolved.

In March 2004, the Corporation issued approximately \$30.9 million of junior subordinated debentures to First United Statutory Trust I ("FUST I") and First United Statutory Trust II (collectively with FUST I, the "Trusts"). The Trusts are Connecticut statutory business trusts, with all outstanding common stock owned by the Corporation, that issued mandatorily redeemable preferred capital securities to third party investors. The Trusts are considered SPEs. In accordance with FIN 46R, the Corporation reported the \$30.9 million of junior subordinated debentures as long-term borrowings and its \$0.9 million equity interest in the Trusts as "Other Assets" at December 31, 2006, 2005 and 2004.

These debentures and preferred securities are discussed in detail in Note 8.

Recent Accounting Pronouncements

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities-Including an amendment of FASB Statement No. 115." SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value. Unrealized gains and losses on items for which the fair value option has been elected will be recognized in earnings at each subsequent reporting date. SFAS No. 159 is effective for the Corporation January 1, 2008. Management is evaluating the impact that the adoption of SFAS No. 159 will have on our consolidated financial statements.

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 158, "Employers Accounting for Defined Benefit Pension and other Post Retirement Plans." Effective December 31, 2006, the Corporation adopted the provisions of this statement which resulted in the recognition of the funded status of its defined benefits pension plan as an asset, and its supplemental executive retirement plan as a liability on the Consolidated Statements of Financial Condition, and the recognition of unrecognized net actuarial losses, prior service costs and a net transition asset totaling \$4.9 million as a separate component of accumulated other comprehensive loss, net of tax. Additional disclosures have also been added as required by SFAS No. 158. Refer to Note 11 for these disclosures and further discussion of the Corporation's pension plan obligations.

[48]

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" ("SFAS No. 157"). SFAS No. 157 was issued to define fair value, establish a framework for measuring fair value in accordance with generally accepted accounting principles (GAAP), and expand fair value disclosure requirements. Prior to issuance of SFAS No. 157, different definitions of fair value existed within GAAP and there was limited guidance available on applying existing fair value definitions. SFAS No. 157 does not require any new fair value measurements. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Management does not expect the adoption of SFAS No. 157 to have a material impact on the Corporation's consolidated financial statements.

In June 2006, the FASB issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" ("FIN No. 48") to clarify the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes." FIN No. 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return, and provides guidance on derecognition, classification, interest and penalties, interim period accounting, and disclosures. FIN No. 48 requires companies to determine whether it is *more likely than not* that a tax position will be sustained upon examination (including appeals and litigation) based upon its technical merits. If a tax position meets the more likely than not recognition threshold, it is measured to determine the benefit amount to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. FIN No. 48 is effective for fiscal years beginning after December 15, 2006, with earlier application encouraged. Management does not anticipate that the adoption of FIN No. 48 will have a material impact on the Corporation's consolidated financial statements.

In June 2006, the Emerging Issues Task Force (EITF) released Issue No. 06-4, "Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements" ("EITF 06-4"). This EITF consensus opinion was ratified by the FASB on September 20, 2006. EITF 06-4 requires employers who have entered into a split-dollar life insurance arrangement with an employee that extends to post-retirement periods, to recognize a liability and related compensation costs in accordance with SFAS No. 106, "Accounting for Post Retirement Benefit Obligations" or Accounting Principles Board Opinion No. 12, "Omnibus Opinion." The effective date of EITF No. 06-4 is for fiscal years beginning after December 15, 2006, and the opinion may be adopted through either a cumulative effect adjustment to retained earnings at the beginning of the year of adoption, or through retrospective application to prior periods. Management has not yet completed all of the analysis required to determine the impact of this new accounting standard on the Corporation's consolidated financial statements.

In March 2006, the FASB issued Statement of Financial Accounting Standards No. 156, "Accounting for Servicing of Financial Assets" ("SFAS No. 156"). SFAS No. 156 amends Statement of Financial Accounting Standards No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities," with respect to the accounting for separately recognized servicing assets and servicing liabilities. SFAS No. 156 requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract in each of several specific situations. SFAS No. 156 also requires all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable, and permits an entity to choose either of two accepted measurement methods for each class of separately recognized servicing assets and servicing liabilities. Further, SFAS No. 156 permits, at its initial adoption, a one-time reclassification of available-for-sale securities to trading securities by entities with recognized servicing rights. Lastly, the Statement requires separate presentation of servicing assets and servicing liabilities subsequently measured at fair value and additional disclosures for all separately recognized servicing assets and servicing liabilities. SFAS No. 156 is effective for fiscal years beginning after September 15, 2006. Management does not expect the adoption of SFAS No. 156 to have a material impact on the Corporation's consolidated financial statements.

2. Regulatory Capital Requirements

The Corporation and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Corporation and the Bank must meet specific capital guidelines that involve quantitative measures of its assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

[49]

Quantitative measures established by regulation to ensure capital adequacy require the Corporation and the Bank to maintain certain minimum amounts of capital and ratios of total and Tier I capital to risk-weighted assets, and of Tier I capital to average assets (leverage). Management believes, as of December 31, 2006, that the Corporation and the Bank meet all capital adequacy requirements to which it is subject.

As of December 31, 2006, the most recent notification from the regulators categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, total risk-based, Tier I risk-based, and Tier I leverage ratios must not fall below the percentages shown in the following table. Management is not aware of any condition or event which has caused the well capitalized position to change.

(Dollars in thousands)	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
December 31, 2006						
Total Capital (to Risk Weighted Assets)						
Consolidated	\$ 130,863	12.95%	\$ 80,737	8.00%	N/A	N/A
First United Bank	113,770	11.40%	79,827	8.00%	99,785	10.00%
Tier 1 Capital (to Risk Weighted Assets)						
Consolidated	119,332	11.81%	40,368	4.00%	N/A	N/A

[50]

3. Investment Securities

The following table shows a comparison of amortized cost and fair values of securities available-for-sale (in thousands):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2006				
U.S. government and agencies	\$ 98,007	\$ 125	\$ 642	\$ 97,490
Mortgage-backed securities	51,955	26	1,152	50,829
Obligations of states and political subdivisions	67,892	705	165	68,432
Corporate and other debt securities	46,602	103	184	46,521
Totals	\$ 264,456	\$ 959	\$ 2,143	\$ 263,272
December 31, 2005				
U.S. government and agencies	\$ 108,301	\$ 6	\$ 1,288	\$ 107,019
Mortgage-backed securities	65,647	33	1,742	63,938
Obligations of states and political subdivisions	58,041	784	1,164	57,661
Corporate and other debt securities	1,381	96	--	1,477
Totals	\$ 233,370	\$ 919	\$ 4,194	\$ 230,095

Proceeds from sales and calls of securities available-for-sale and the realized gains and losses are as follows (in thousands):

	2006	2005	2004
Proceeds	\$ 548	\$ 27,684	\$ 14,008
Realized gains	4	93	712
Realized losses	--	(218)	(9)

[51]

The following table shows the Corporation's securities available-for-sale with gross unrealized losses and fair value, aggregated by investment category and length of time that individual securities have been in a continuous unrealized position, at December 31, 2006 and 2005 (in thousands):

	December 31, 2006			
	Less than 12 months		12 months or more	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. government agencies	\$ 25,878	\$ (127)	\$ 56,609	\$ (515)
Mortgage-backed securities	3,212	(7)	45,470	(1,145)
Obligations of states and political subdivisions	9,844	(35)	15,234	(130)
Corporate securities	33,680	(184)	--	--
	\$ 72,614	\$ (353)	\$ 117,313	\$ (1,790)

	December 31, 2005			
	Less than 12 months		12 months or more	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. government agencies	\$ 61,312	\$ (718)	\$ 42,005	\$ (570)
Mortgage-backed securities	42,321	(1,163)	17,812	(579)
Obligations of states and political subdivisions	36,596	(1,164)	--	--
	\$ 140,229	\$ (3,045)	\$ 59,817	\$ (1,149)

The Corporation does not believe any individual unrealized loss as of December 31, 2006 represents an other-than-temporary impairment. The unrealized losses on our investment securities are primarily attributable to changes in interest rates. The \$1.1 million in unrealized losses reported for mortgage-backed securities at December 31, 2006 relates primarily to securities issued by the Federal National Mortgage Association (FNMA), the Federal Home Loan Mortgage Corporation, and the Government National Mortgage Association (GNMA). All of our investments in states and other political subdivisions are of the highest investment grade as determined by the major rating agencies. The \$.2 million in unrealized losses reported for corporate and other debt at December 31, 2006 relates to Preferred Term Securities (PreTSLs). The Corporation has both the intent and ability to hold the securities in its investment portfolio for the period of time necessary to recover its amortized cost.

The amortized cost and estimated fair value of securities available-for-sale by contractual maturity at December 31, 2006 are shown in the following table. Actual maturities will differ from contractual maturities because the issuers of the securities may have the right to call or prepay obligations with or without call or prepayment penalties.

Contractual Maturity	(in thousands)	
	Amortized Cost	Fair Value
Due in one year or less	\$ 34,622	\$ 34,460
Due after one year through five years	45,037	45,002
Due after five years through ten years	19,209	19,254
Due after ten years	113,633	113,727
	212,501	212,443
Mortgage-backed securities	51,955	50,829

\$	264,456	\$	263,272
----	---------	----	---------

[52]

At December 31, 2006 and 2005, investment securities with a fair value of \$146 million and \$153 million, respectively, were pledged as permitted or required to secure public and trust deposits and securities sold under agreements to repurchase as required or permitted by law.

4. Loans

The Corporation, through the bank, is active in originating loans to customers primarily in Western Maryland and Northeastern West Virginia. The following table is a summary of the loan portfolio and loan commitments by principal categories (in thousands):

	December 31, 2006		December 31, 2005	
	Loans	Loan Commitments	Loans	Loan Commitments
Commercial	\$ 408,361	\$ 72,861	\$ 404,681	\$ 110,000
Real Estate - Mortgage	359,601	40,557	337,559	39,350
Consumer Installment	181,574	66	193,275	42
Real Estate - Construction	14,120	6,312	25,446	11,701
Commercial letters of credit	--	7,200	--	5,086
Total	\$ 963,656	\$ 126,996	\$ 960,961	\$ 166,179

Loan commitments are made to accommodate the financial needs of the Corporation's customers. Letters of credit commit the Corporation to make payments on behalf of customers when certain specified future events occur. Letters of credit are issued to customers to support contractual obligations and to insure job performance. Commitments to extend credit generally have fixed expiration dates, may require payment of a fee, and contain cancellation clauses in the event of an adverse change in the customer's credit quality. Historically, most letters of credit expire unfunded, and therefore, cash requirements are substantially less than the total commitment. Loan commitments and letters of credit have credit risk essentially the same as that involved in extending loans to customers and are subject to normal credit policies. Collateral is obtained based on management's credit assessment of the customer. The Corporation considers letters of credit to be guarantees and the amount of liability related to such guarantees was not significant at December 31, 2006 and 2005.

In the ordinary course of business, executive officers and directors of the Corporation, including their families and companies in which certain directors are principal owners, were loan customers of the Bank. Pursuant to the Bank's lending policies, such loans were made on the same terms, including collateral, as those prevailing at the time for comparable transactions with unrelated persons and do not involve more than the normal risk of collectibility. Changes in the dollar amount of loans outstanding to officers, directors and their associates were as follows for the years ended December 31 (in thousands):

	2006
Balance at January 1	\$ 17,685
Loans or advances	13,169
Repayments	(5,532)
Balance at December 31	\$ 25,322

Activity in the allowance for loan losses is summarized as follows (in thousands):

Edgar Filing: FIRST UNITED CORP/MD/ - Form 10-K

		2006		2005		2004
Balance at January 1	\$	6,416	\$	6,814	\$	5,974
Gross credit losses		(1,575)		(1,890)		(2,205)
Recoveries		524		414		511
Net credit losses		(1,051)		(1,476)		(1,694)
Provision for loan losses		1,165		1,078		2,534
Balance at December 31	\$	6,530	\$	6,416	\$	6,814

[53]

Non-accruing loans were \$3.2 million, \$2.4 million, and \$3.4 million at December 31, 2006, 2005 and 2004, respectively. Interest income not recognized as a result of placing loans on a non-accrual status was \$.2 million, \$.05 million and \$.4 million during 2006, 2005 and 2004, respectively. Accruing loans past due 90 days or more were \$.6 million, \$.9 million and \$1.1 million at the end of 2006, 2005 and 2004, respectively.

Total impaired loans amounted to \$.1 million and \$.2 million at December 31, 2006 and 2005, respectively. Specific allocations of the allowance for loan losses for impaired loans were equal to these same amounts.

In December 2005, the Bank sold \$31.1 million of its residential mortgage loans. The loans were sold without recourse and the Bank will continue to service these loans. No gain or loss was recognized on the sale. Loan servicing rights of \$0.3 million were recorded as part of this transaction and are being amortized over the weighted average remaining life of the loans sold.

5. Premises and Equipment

The composition of premises and equipment at December 31 is as follows (in thousands):

	2006	2005
Land	\$ 8,910	\$ 9,232
Land Improvements	190	135
Premises	20,700	16,987
Furniture and Equipment	27,610	26,533
	57,410	52,887
Less accumulated depreciation	(27,558)	(25,838)
Total	\$ 29,852	\$ 27,049

The Corporation recorded depreciation expense of \$2.5 million in 2006 and 2005 and \$2.4 million in 2004.

Pursuant to the terms of noncancelable operating lease agreements for banking and subsidiaries' offices and for data processing and telecommunications equipment in effect at December 31, 2006, future minimum rent commitments under these leases for each of the next five years are as follows: \$1.8, \$1.7, \$1.0, \$.4, and \$.3 million. The leases contain options to extend for periods from 1 to 5 years, not included in the aforementioned amounts.

Total rent expense amounted to \$.6 million in 2006 and \$.5 million in each of 2005 and 2004.

6. Goodwill and Other Intangible Assets

Goodwill resulted from the acquisition of four branch offices and a banking center from The Huntington National Bank in July 2003 and an insurance agency in April 1999. The Corporation performed its annual impairment test as of December 31, 2006 and determined that goodwill was not impaired. There can be no assurance that goodwill impairment will not occur in the future. The Corporation will continue to evaluate goodwill for impairment on an annual basis and as events occur or circumstances change.

The significant components of goodwill and acquired intangible assets at December 31 are as follows (in thousands):

2006				2005			
Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted Average Remaining	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted Average Remaining

Edgar Filing: FIRST UNITED CORP/MD/ - Form 10-K

				Life				Life
Goodwill	\$ 11,900	\$ --	\$ 11,900		\$ 11,900	\$ --	\$ 11,900	
Core deposit intangible assets	4,040	(1,907)	2,133	3.8	4,040	(1,349)	2,691	4.8
Total	\$ 15,940	\$ (1,907)	\$ 14,033		\$ 15,940	\$ (1,349)	\$ 14,591	

[54]

Amortization expense relating to the core deposit intangible asset acquired in 2003 pursuant to the Huntington National Bank branch acquisition was \$.6 million in 2006, 2005 and 2004. Future estimated annual amortization expense is presented below (in thousands):

2007	\$ 558
2008	558
2009	558
2010	459

7. Deposits

The aggregate amount of time deposits with a minimum denomination of \$100,000 was \$479.6 and \$264.8 million at December 31, 2006 and December 31, 2005, respectively.

The following is a summary of the scheduled maturities of all time deposits as of December 31, 2006 (in thousands):

2007	\$ 453,690
2008	49,085
2009	17,478
2010	9,655
2011	2,620
Thereafter	696

8. Borrowed Funds

The following is a summary of short-term borrowings at December 31 with original maturities of less than one year (dollars in thousands):

	2006	2005	2004
Short-term FHLB advance, Daily borrowings, interest rate of 5.50% (at December 31, 2006)	\$ 4,500	\$ 31,000	\$ --
Short-term FHLB advance, Interest rate of 5.44% (at December 31, 2006) maturing in May 2007	20,000	--	23,319
	2006	2005	2004
Securities sold under agreements to repurchase:			
Outstanding at end of year	\$ 74,879	\$ 90,939	\$ 86,914
Weighted average interest rate at year end	3.96%	2.56%	2.14%
Maximum amount outstanding as of any month end	84,380	93,632	91,209
Average amount outstanding	78,032	85,846	78,352
Approximate weighted average rate during the year	3.80%	2.68%	1.44%

[55]

The following is a summary of long-term borrowings at December 31 with original maturities exceeding one year (dollars in thousands):

	2006	2005
FHLB advances, bearing interest at rates ranging from 3.15% to 5.40% at December 31	\$ 130,401	\$ 92,444
Junior subordinated debt, bearing interest at rates ranging from 6.02% to 8.14% at December 31	35,929	35,929
	\$ 166,330	\$ 128,373

The contractual maturities of long-term borrowings are as follows:

	December 31				2005
	Fixed Rate	Floating Rate	Total		
	(in thousands)				
Due in 2006	\$ --	\$ --	\$ --	\$ 7,044	
Due in 2007	14,800	5,000	19,800	19,800	
Due in 2008	1,000	--	1,000	1,000	
Due in 2009	25,500	--	25,500	12,500	
Due in 2010	1,000	--	1,000	--	
Due in 2011	51,000	30,000	81,000	--	
Thereafter	27,720	10,310	38,030	88,029	
Total long-term debt	\$ 121,020	\$ 45,310	\$ 166,330	\$ 128,373	

In addition to the above, the Corporation has \$7.6 million of letters of credit with the Federal Home Loan Bank of Atlanta ("FHLB") at December 31, 2006. These letters of credit are pledged to secure public deposits.

The Corporation has a borrowing capacity agreement with the FHLB in an amount equal to 29% of the Bank's assets. At December 31, 2006, the available line of credit equaled \$388 million. This line of credit, which can be used for both short or long-term funding, can only be utilized to the extent of available collateral. The line is secured by certain qualified mortgage and commercial loans and investment securities, as follows:

1-4 family mortgage loans	\$ 140,019
Commercial loans	7,513
Multifamily loans	2,865
Investment securities	30,050
	\$ 180,447

The collateralized line of credit totaled \$150 million at December 31, 2006, of which \$18 million was available for additional borrowings.

The Corporation also has various unsecured lines of credit totaling \$25.0 million with various financial institutions to meet daily liquidity requirements. As of December 31, 2006, the Corporation had no borrowings under these credit facilities.

Repurchase Agreements--The Corporation has retail repurchase agreements with customers within its local market areas. Repurchase agreements generally have maturities of one to four days from the transaction date. These borrowings are collateralized with securities owned by the company and held in safekeeping at independent correspondent banks.

[56]

FHLB Advances--The FHLB advances consist of various borrowings with maturities generally ranging from 5 to 10 years with initial fixed rate periods of one, two or three years. After the initial fixed rate period the FHLB has one or more options to convert each advance to a LIBOR based, variable rate advance, but the Corporation may repay the advance in whole or in part, without a penalty, if the FHLB exercises its option. At all other times, the Corporation's early repayment of any advance could be subject to a prepayment penalty.

In May 2006, the Bank exchanged \$25 million of long-term FHLB advances, yielding 5.01% for \$25 million of long-term FHLB advances, yielding 4.69%. The exchange netted a gain of \$.2 million of which will be amortized over 5 years into interest expense.

In December 2005, the Bank prepaid \$25 million of long-term FHLB advances, resulting in a net early redemption gain of \$.4 million. The prepayment was funded in part by a \$15 million brokered certificate of deposit which matured in April of 2006. The remaining \$10 million was funded through daily borrowings. Funds for the repayment of the brokered CD and daily borrowings were provided from scheduled maturities in the investment portfolio. In December 2004, the Bank refinanced \$21.5 million of long-term FHLB advances, resulting in an early redemption penalty of \$1.8 million (included in other operating expense).

Subordinated Debt--In 1999, Capital Trust issued 9.375% preferred securities with an aggregate liquidation amount of \$23.0 million (\$1,000 per preferred share) to third-party investors. The proceeds were used to purchase an equal amount of 9.375% junior subordinated debentures of the Corporation. An additional \$.7 million of junior subordinated debentures was purchased by Capital Trust from the proceeds of the sale of 100% of the Trust's common securities to the Corporation. The junior subordinated debentures represented the sole assets of Capital Trust, and payments of the junior subordinated debentures by the Corporation were the sole source of cash flow for Capital Trust. The preferred securities qualified as regulatory Tier 1 capital of the Corporation. On September 30, 2004, the Corporation exercised its right to redeem the junior subordinated debentures at the same time Capital Trust redeemed the preferred securities. In conjunction with this early redemption, the Corporation expensed \$.9 million of remaining unamortized issuance costs (included in other operating expenses) related to the junior subordinated debentures.

In March 2004, the Trusts issued preferred securities with an aggregate liquidation amount of \$30.9 million to third-party investors. The proceeds of issuance of the preferred securities were used to purchase an equal amount of junior subordinated debentures of the Corporation, as follows:

\$20.6 million--6.02% fixed rate for five years payable quarterly, converting to floating rate based on three-month LIBOR plus 275 basis points, maturing in 2034, redeemable five years after issuance at the Corporation's option.

\$10.3 million--floating rate payable quarterly based on three-month LIBOR plus 275 basis points (8.14% at December 31, 2006) maturing in 2034, redeemable five years after issuance at the Corporation's option.

The debentures represent the sole assets of the Trusts, and payments of the debentures by the Corporation are the only sources of cash flow for the Trusts.

In December 2004, the Corporation issued an additional \$5.0 million of debentures. The debentures have a fixed rate of 5.88% for the first five years, payable quarterly, and then converts to a floating rate based on three month LIBOR plus 185 basis points. The debentures mature in 2014, but are redeemable five years after issuance at the Corporation's option.

The Corporation has the right to defer interest on all of the foregoing debentures for up to 20 quarterly periods, in which case distributions on the preferred securities will also be deferred. Should this occur, the Corporation may not pay dividends or distributions on, or repurchase, redeem or acquire any shares of its common stock.

[57]

9. Other Comprehensive Income

A summary of the activity in accumulated other comprehensive income follows (in thousands):

	For the Year Ending December 31		
	2006	2005	2004
Accumulated unrealized (losses)/gains on securities available for sale at January 1, net of tax	\$ (1,980)	\$ 437	\$ 1,605
Net unrealized gains/(losses) for the period, net of tax expense (benefit) of \$683 in 2006, (\$1,345) in 2005, and (\$382) in 2004	1,268	(2,498)	(710)
Reclassification of (gains)/losses occurring during the period, net of tax (expense) benefit of \$1 in 2006, (\$44) in 2005, and \$245 in 2004	(3)	81	(458)
Effect on other comprehensive income for the period	1,265	(2,417)	(1,168)
Accumulated unrealized gains/(losses) on securities available for sale at December 31, net of tax	\$ (715)	\$ (1,980)	\$ 437
Accumulated unrealized losses for pension obligation at January 1, net of tax	\$ 0	\$ 0	\$ 0
Prior service costs, net of tax of \$46	(85)	0	0
Net transition asset, net of tax benefit of \$116	216	0	0
Net actuarial loss, net of tax of \$1,632	(3,032)	0	0
Cumulative effect of change in accounting for pension obligation	(2,901)	0	0
Accumulated unrealized losses for SERP obligation at January 1, net of tax	0	0	0
Prior service costs, net of tax of \$252	(467)	0	0
Net actuarial loss, net of tax of \$800	(1,497)	0	0
Accumulated unrealized losses for SERP obligation at December 31, net of tax	\$ (1,964)	\$ 0	\$ 0
TOTAL ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS) AT DECEMBER 31, NET OF TAX	\$ (5,580)	\$ (1,980)	\$ 437

10. Income Taxes

The provision for income taxes consists of the following for the years ended December 31 (in thousands):

	2006	2005	2004
Current Tax Provision:			
Federal	\$ 5,179	\$ 4,321	\$ 4,486
State	1,094	978	838
	\$ 6,273	\$ 5,299	\$ 5,324
Deferred taxes (benefit) :			

Edgar Filing: FIRST UNITED CORP/MD/ - Form 10-K

Federal	\$	(469)	\$	1,105	\$	(1,798)
State		(61)		144		(19)
	\$	(530)	\$	1,249	\$	(1,817)
Income tax expense for the year	\$	5,743	\$	6,548	\$	3,507

[58]

The reconciliation between the statutory federal income tax rate and effective income tax rate is as follows:

	2006	2005	2004
Federal statutory rate	35.0%	35.0%	35.0%
Tax-exempt income on securities and loans	(5.6)	(2.7)	(4.1)
Tax-exempt BOLI income	(1.6)	(1.5)	(2.0)
State income tax, net of federal tax benefit	3.5	3.9	4.4
Other	--	.3	(1.8)
	31.3%	35.0%	31.5%

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Corporation's temporary differences as of December 31 are as follows (in thousands):

	2006	2005
Deferred tax assets:		
Allowance for loan losses	\$ 2,583	\$ 2,538
Deferred loan fees	225	173
Deferred compensation	513	558
State tax loss carry forwards	722	658
Unrealized loss on investment securities available-for-sale	468	1,295
Pension/SERP	608	--
Other	81	88
Total deferred tax assets	5,200	5,310
Valuation allowance	(722)	(658)
Total deferred tax assets less valuation allowance	4,478	4,652
Deferred tax liabilities:		
Amortization of goodwill and core deposit intangible	(524)	(363)
Depreciation	(943)	(1,176)
Pension	--	(2,459)
Other	(406)	(371)
Total deferred tax liabilities	(1,873)	(4,369)
Net deferred tax assets	\$ 2,605	\$ 283

State income tax expense amounted to \$1.0 million, \$1.1 million and \$.8 million during 2006, 2005 and 2004, respectively. The state tax loss carry forwards included in deferred tax assets will expire commencing in 2019.

11. Employee Benefit Plans

The Corporation sponsors a noncontributory defined benefit pension plan (Plan) covering substantially all full-time employees who qualify as to age and length of service. The benefits are based on years of service and the employees' compensation during the last five years of employment. The Corporation's funding policy is to make annual contributions in amounts sufficient to meet the current year's minimum funding requirements.

During 2001, the Corporation established an unfunded supplemental executive retirement plan (SERP) to provide senior management personnel with supplemental retirement benefits in excess of limits imposed on qualified plans by federal tax law. Concurrent with the establishment of the SERP, the Corporation acquired bank owned life insurance

(BOLI) policies on the senior management personnel and officers of the Corporation. The benefits resulting from the favorable tax treatment accorded the earnings on the BOLI are intended to provide a source of funds for the future payment of the SERP benefits as well as other employee benefit costs.

The benefit obligation activity for both the pension plan and SERP was calculated using an actuarial measurement date of January 1. Plan assets and the benefit obligations were calculated using an actuarial measurement date of December 31. The following table summarizes benefit obligation and funded status, plan asset activity, components of net pension cost, and weighted average assumptions for the Corporation's pension and SERP plans (in thousands):

[59]

	Pension		SERP	
	2006	2005	2006	2005
Change in Benefit Obligation				
Obligation at the beginning of the year	\$ 18,423	\$ 16,718	\$ 3,662	\$ 2,442
Service cost	809	799	138	90
Interest cost	1,048	1,035	200	134
Change in assumptions	(591)	--	--	--
Actuarial losses	1	318	722	912
Benefits paid	(509)	(447)	(26)	(26)
Plan amendments	--	--	--	110
Obligation at the end of the year	19,181	18,423	4,696	3,662
Change in Plan Assets				
Fair value at the beginning of the year	19,276	14,434	--	--
Actual return on plan assets	1,707	507	--	--
Employer contribution	1,000	4,782	26	26
Benefits paid	(509)	(447)	(26)	(26)
Fair value at the end of the year	21,474	19,276	--	-
Funded Status	\$ 2,293	\$ 853	\$ 4,696	\$ 3,662

Reconciliation of funded status to the amounts reported in the statement of financial condition:

	2006	2005	2006	2005
Funded Status	\$ 2,293	\$ 853	\$ (4,696)	\$ (3,662)
Unrecognized net actuarial loss	-	5,595	--	1,695
Unrecognized prior service cost	-	142	--	832
Unrecognized net transition asset	-	(371)	--	--
Amount included in other assets, related to pension plan at year end	\$ 2,293	\$ 6,219	\$ (4,696)	\$ (1,135)

	Pension			SERP		
	2006	2005	2004	2006	2005	2004
Components of Net Pension Cost						
Service cost	\$ 809	\$ 799	\$ 718	\$ 138	\$ 90	\$ 179
Interest cost	1,048	1,035	938	200	134	100
Expected return on assets	(1,586)	(1,406)	(1,183)	--	--	--
Amortization of transition asset	(39)	(39)	(39)	--	--	--
Amortization of recognized loss	220	189	151	121	53	--

Amortization of prior service cost	10	10	10	113	103	103
Net pension expense included in employee benefits	\$ 462	\$ 588	\$ 595	\$ 572	\$ 380	\$ 382

Weighted Average Assumptions used to determine benefit obligations:

Discount rate for benefit obligations	6.00%	6.15%	6.15%	5.50%	5.50%	5.50%
Discount rate for net pension cost	6.15%	6.15%	6.25%	--	--	--
Expected long-term return on assets	8.00%	8.25%	8.25%	--	--	--
Rate of compensation increase	3.00%	4.00%	4.00%	4.00%	4.00%	4.00%

The accumulated benefit obligation for the pension plan was \$16.0 million and \$14.1 million at December 31, 2006 and 2005, respectively. The accumulated benefit obligation for the SERP was \$3.7 million and \$2.8 million at December 31, 2006 and 2005, respectively.

[60]

The expected long-term rate of return on Plan assets for the pension plan was determined by considering historical and future expected returns of the asset classes invested in by the Plan trustees, and the allocation strategy currently in place among those classes. The asset allocations for the defined benefit pension plan as of December 31, 2006 and 2005, by asset category, are as follows:

ASSET CATEGORY	Percentage of Plan Assets	
	2006	2005
Equity securities	63%	62%
Debt securities	32	32
Cash and cash equivalents	5	6
Total	100%	100%

The investment objective for the defined benefit pension plan is to maximize total return with tolerance for average risk. Asset allocation favors equities, with a target allocation of approximately 55% equities securities, 40% fixed income securities, and 5% cash. Due to volatility in the market, the target allocation is not always desirable and asset allocations will fluctuate between the acceptable ranges. A core equity position of large cap stocks will be maintained. However, more aggressive or volatile sectors will be meaningfully represented in the asset mix in pursuit of higher returns. Higher volatility investment strategies such as credit risk, structured finance, and international bonds will be appropriate strategies in conjunction with the core position.

It is management's intent to give the investment managers flexibility with respect to investment decisions and their timing within the overall guidelines. However, certain investments require specific review and approval by management. Management is also informed of anticipated changes in nonproprietary investment managers, significant modifications of any previously approved investment, or the anticipated use of derivatives to execute investment strategies.

The following summarizes the number of Corporation shares and the fair value of such shares that are included in Plan assets at December 31, 2006 and 2005, as well as dividends paid to the Plan for such years (dollars in thousands):

	2006	2005
Number of shares held	3,000	3,839
Number of shares purchased	0	33
Number of shares sold	839	11,099
Fair value	\$ 66	\$ 82
Dividends paid	\$ 2	\$ 6
Percentage of total plan assets	.31%	.42%

Estimated Cash Flows related to the Plan are as follows (in thousands):

Estimated future benefit payments:

	Pension Plan		SERP
2007	\$	456	\$ 76
2008		476	70

2009	586	66
2010	654	66
2011	811	66
2012-2016	6,391	1,266
	\$ 9,374	\$ 1,610

The Corporation estimates that it will contribute the minimum required contribution of \$1 million to the pension plan in 2007.

[61]

Amounts included in accumulated other comprehensive loss as of December 31, 2006, net of tax, are as follows (in thousands):

	Pension	SERP
Unrecognized net actuarial loss	\$ 3,032	\$ 1,497
Unrecognized prior service costs	85	467
Net transition asset	(216)	--
	\$ 2,901	\$ 1,964

The estimated costs that will be amortized from accumulated other comprehensive loss into net periodic pension cost during the next fiscal year are as follows (in thousands):

	Pension	SERP
Prior service cost	\$ 10	\$ 113
Net transition asset	(39)	--
Net actuarial loss	283	203
	\$ 254	\$ 316

The combined incremental effect of applying SFAS No. 158 on individual line items in the statement of financial condition at December 31, 2006 for the defined benefit plan and SERP was as follows (in thousands):

	Before application of Statement No. 158	Reclassification	After application of Statement No. 158
Accrued Interest Receivable and other assets	\$ 23,544	\$ (1,844)	\$ 21,700
Total Assets	1,351,161	(1,844)	1,349,317
Accrued Interest Payable and other liabilities	11,181	3,021	14,202
Total Liabilities	1,249,440	3,021	1,252,461
Accumulated Other Comprehensive Income/(Loss)	(715)	(4,865)	(5,580)
Shareholders' Equity	101,721	(4,865)	96,856

401(K) Profit Sharing Plan

The First United Bank & Trust 401(k) Profit Sharing Plan ("the 401(k) Plan") is a defined contribution plan that is intended to qualify under section 401(k) of the Internal Revenue Code. The 401(k) Plan covers substantially all employees of the Corporation. Eligible employees can elect to contribute to the plan through payroll deductions. Contributions up to 6% of an employee's base salary are matched on a 50% basis by the Corporation. Expense charged to operations for the 401(k) Plan was \$.5 million, \$.4 million, and \$.4 million in 2006, 2005 and 2004, respectively.

Supplemental Executive Retirement Plan

The Corporation expects to fund the projected benefit payments annually from operations.

[62]

12. Federal Reserve Requirements

The Bank is required to maintain cash reserves with the Federal Reserve Bank of Richmond based principally on the type and amount of its deposits. During 2006, the daily average amount of these required reserves was approximately \$1.9 million.

13. Restrictions on Subsidiary Dividends, Loans or Advances

Federal and state banking regulations place certain restrictions on the amount of dividends paid and loans or advances made by the Bank to the Corporation. The total amount of dividends that may be paid at any date is generally limited to the retained earnings of the Bank, and loans or advances are limited to 10 percent of the Bank's capital stock and surplus on a secured basis. In addition, dividends paid by the Bank to the Corporation would be prohibited if the effect thereof would cause the Bank's capital to be reduced below applicable minimum capital requirements. At December 31, 2006, the Bank could have paid additional dividends of \$13.1 million to the Corporation without regulatory approval.

14. Commitments and Contingent Liabilities

The Corporation and its subsidiaries are at times, and in the ordinary course of business, subject to legal actions. However, to the knowledge of management, the Corporation is not currently subject to any such legal actions.

Loan and letter of credit commitments are discussed in Note 4.

15. Fair Value of Financial Instruments

As required by SFAS No. 107, "Disclosures about Fair Value of Financial Instruments," presented in the following table is fair value information about financial instruments, whether or not recognized in the statement of financial condition, for which it is practicable to estimate that value. Fair value is best determined by values quoted through active trading markets. Active trading markets are characterized by numerous transactions of similar financial instruments between willing buyers and willing sellers. Because no active trading market exists for various types of financial instruments, many of the fair values disclosed were derived using present value discounted cash flow or other valuation techniques. As a result, the Corporation's ability to actually realize these derived values cannot be assumed.

The fair values disclosed under SFAS No. 107 may vary significantly between institutions based on the estimates and assumptions used in the various valuation methodologies. The derived fair values are subjective in nature and involve uncertainties and significant judgment. Therefore, they cannot be determined with precision. Changes in the assumptions could significantly impact the derived estimates of fair value. SFAS No. 107 excludes disclosure of non financial assets such as buildings as well as certain financial instruments such as leases. Accordingly, the aggregate fair values presented do not represent the underlying value of the Corporation.

[63]

The actual carrying amounts and estimated fair values of the Corporation's financial instruments that are included in the statement of financial condition at December 31 are as follows (in thousands):

	2006		2005	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial Assets:				
Cash and cash equivalents	\$ 23,325	\$ 23,325	\$ 24,610	\$ 24,610
Interest-bearing deposits in banks	2,463	2,463	5,001	5,001
Investment securities	263,272	263,272	230,095	230,095
Federal Home Loan Bank stock	9,620	9,620	8,050	8,050
Loans, net	957,126	943,173	954,545	949,622
Accrued interest receivable	6,249	6,249	6,114	6,114
Financial Liabilities:				
Deposits	971,381	967,849	955,854	952,350
Borrowed funds	265,709	265,400	250,312	253,744
Accrued interest payable	5,110	5,110	4,129	4,129
Off Balance Sheet Financial Instruments	--	--	--	--

The following methods and assumptions were used by the Corporation in estimating its fair value disclosures for financial instruments:

Cash and cash equivalents: The carrying amounts as reported in the statement of financial condition for cash and due from banks approximate their fair values.

Interest-bearing deposits in banks: The carrying amount of interest-bearing deposits approximates their fair values.

Investment securities: Fair values of investment securities are based on quoted market values.

Federal Home Loan Bank stock: The carrying value of Federal Home Loan stock approximates fair value based on the redemption provisions of the Federal Home Loan Bank.

Loans: For variable rate loans and leases that reprice frequently or "in one year or less," and with no significant change in credit risk, fair values are based on carrying values. Fair values for fixed rate loans and leases and loans and leases that do not reprice frequently are estimated using a discounted cash flow calculation that applies current interest rates being offered on the various loan products.

Deposits: The fair values disclosed for demand deposits (e.g., interest and non-interest checking, savings, and certain types of money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). The carrying amounts for variable rate certificates of deposit approximate their fair values at the reporting date. Fair values for fixed rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on the various certificates of deposit to the cash flow stream.

Borrowed funds: The fair value of the Corporation's Federal Home Loan Bank borrowings and junior subordinated debt is calculated based on the discounted value of contractual cash flows, using rates currently existing for borrowings with similar remaining maturities. The carrying amounts of federal funds purchased and securities sold under agreements to repurchase approximate their fair values.

Accrued Interest: The carrying amount of accrued interest receivable and payable approximates their fair values.

Off-Balance-Sheet Financial Instruments: In the normal course of business, the Corporation makes commitments to extend credit and issues standby letters of credit. The Corporation expects most of these commitments to expire without being drawn upon, therefore the commitment amounts do not necessarily represent future cash requirements. Due to the uncertainty of cash flows and difficulty in the predicting the timing of such cash flows, fair values were not estimated for these instruments. The Corporation did not have any derivative financial instruments at December 31, 2006 or 2005.

[64]

16. Parent Company Financial Information (Parent Company Only)

Condensed Statements of Financial Condition (in thousands)

	December 31

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

The Corporation maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Corporation's reports filed under the Securities Exchange Act of 1934 with the SEC, such as this annual report, is recorded, processed, summarized and reported within the time periods specified in those rules and forms, and that such information is accumulated and communicated to the Corporation's management, including the Chief Executive Officer ("CEO") and the Chief Financial Officer ("CFO"), as appropriate, to allow for timely decisions regarding required disclosure. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, a control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate.

An evaluation of the effectiveness of these disclosure controls as of December 31, 2006 was carried out under the supervision and with the participation of the Corporation's management, including the CEO and the CFO. Based on that evaluation, the Corporation's management, including the CEO and the CFO, has concluded that the Corporation's disclosure controls and procedures are, in fact, effective at the reasonable assurance level.

During the fourth quarter of 2006, there was no change in the Corporation's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting.

As required by Section 404 of the Sarbanes-Oxley Act of 2002, management has performed an evaluation and testing of the Corporation's internal control over financial reporting as of December 31, 2006. Management's report on the Corporation's internal control over financial reporting and the related attestation report of the Corporation's registered public accounting firm are included on the following pages.

[68]

Management's Report on Internal Control Over Financial Reporting

The Board of Directors and Shareholders
First United Corporation

The Corporation's management is responsible for establishing and maintaining adequate internal control over financial reporting. This internal control system was designed to provide reasonable assurance to management and the Board of Directors as to the reliability of the Corporation's financial reporting and the preparation and presentation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States, as well as to safeguard assets from unauthorized use or disposition.

An internal control system, no matter how well designed, has inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation and may not prevent or detect misstatements in the financial statements or the unauthorized use or disposition of the Corporation's assets. Also, projections of any evaluation of effectiveness of internal controls to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies and procedures may deteriorate.

Management assessed the effectiveness of the Corporation's internal control over financial reporting as of December 31, 2006, based on the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control--Integrated Framework. Based on this assessment and on the foregoing criteria, management has concluded that, as of December 31, 2006, the Corporation's internal control over financial reporting is effective.

Beard Miller Company LLP, an independent registered public accounting firm, has audited the Consolidated Financial Statements of the Corporation for the year ended December 31, 2006, appearing elsewhere in this annual report, and has issued an attestation report on management's assessment of the effectiveness of the Corporation's internal control over financial reporting as of December 31, 2006, as stated in their report, which is included herein.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders
First United Corporation
Oakland, Maryland

We have audited management's assessment, included in the accompanying Management's Report on Internal Control Over Financial Reporting, that First United Corporation maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). First United Corporation's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Corporation's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that First United Corporation maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Also in our opinion, First United Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial condition and the related consolidated statements of income, changes in shareholders' equity, and cash flows of First United Corporation as of and for the year ended December 31, 2006, and our report dated March 9, 2007 expressed an unqualified opinion.
