Notes:

1 Basis of preparation

This interim financial report of China Southern Airlines Company Limited (the “Company”) and its subsidiaries (the “Group”) has been prepared in accordance with the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited, including compliance with International Accounting Standard 34 “Interim financial reporting” (“IAS 34”) adopted by the International Accounting Standards Board (“IASB”). It was authorised for issuance on 20 August 2007.

At 30 June 2007, the Group’s current liabilities exceeded its current assets by RMB31,917 million, which include current instalments of bank and other loans and obligations under finance leases of RMB27,343 million. The liquidity of the Group is primarily dependent on its ability to maintain adequate cash inflow from operations to meet its debt obligations as they fall due, and on its ability to obtain adequate external finance to meet its committed future capital expenditures. In preparing the interim financial report, the directors of the Company have considered the Group’s sources of liquidity and believe that adequate funding is available to fulfil the Group’s short term obligations and capital expenditure requirements. Accordingly, the interim financial report has been prepared on a basis that the Group will be able to continue as a going concern.

The interim financial report has been prepared in accordance with substantially the same accounting policies adopted in the 2006 annual financial statements. Please refer to Note 2 for the discussion of new and revised International Financial Reporting Standards (“IFRSs”) adopted by the Group in 2007.

The preparation of an interim financial report in conformity with IAS 34 requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

In preparing this interim financial report, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the 2006 annual financial statements.

The interim financial report contains condensed consolidated financial statements and selected explanatory notes. The notes include an explanation of events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since the 2006 annual financial statements. The condensed consolidated interim financial statements and notes thereon do not include all of the information required for a full set of financial statements prepared in accordance with IFRSs. IFRSs include International Accounting Standards ("IAS") and related interpretations.

The interim financial report is unaudited, but has been reviewed by KPMG in accordance with Hong Kong Standards on Review Engagements 2410, "Review of interim financial information performed by the independent auditor of the entity" issued by the Hong Kong Institute of Certified Public Accountants.

The financial information relating to the financial year ended 31 December 2006 that is included in the interim financial report as being previously reported information does not constitute the Group's annual financial statements prepared under IFRSs for that financial year but is derived from those financial statements. The Group's annual financial statements for the year ended 31 December 2006 are available at the Company's registered office. The independent auditor has expressed an unqualified opinion on those financial statements in the audit report dated 16 April 2007.

2 New and revised IFRSs

The IASB has issued a number of new and revised IFRSs that are effective or available for early adoption for the current accounting period of the Group. The Board of Directors has determined the accounting policies to be adopted in the preparation of the Group's annual financial statements prepared under IFRSs for the year ending 31 December 2007, on the basis of IFRSs currently in issue.

The IFRSs that will be effective or are available for voluntary early adoption in the annual financial statements prepared under IFRSs for the year ending 31 December 2007 may be affected by the issue of additional interpretation(s) or other changes announced by the IASB subsequent to the date of issuance of this interim financial report. Therefore the policies that will be applied in the Group's financial statements for that period cannot be determined with certainty at the date of issuance of this interim financial report.

The adoption of these new and revised IFRSs did not result in significant changes to the Group's accounting policies applied in this interim financial report for the periods presented.

3 Revenue and segment reporting

The Group operates principally as a single business segment for the provision of air transportation services.

Turnover comprises revenues from airline and airline-related business and is stated net of sales tax.

Geographic information about the Group's turnover and operating profit/(loss) are analysed as follows:

	For the six months ended 30 June			
	Domestic <i>RMB million</i>	Hong Kong and Macau <i>RMB million</i>	International <i>RMB million</i>	Total <i>RMB million</i>
2007				
Traffic revenue	19,165	571	4,350	24,086
Other operating revenue	470	-	-	470
Turnover	19,635	571	4,350	24,556
Operating profit/(loss)	512	(19)	(511)	(18)
2006				
Traffic revenue	16,017	674	3,532	20,223
Other operating revenue	381	-	-	381
Turnover	16,398	674	3,532	20,604
Operating profit/(loss)	266	(63)	(446)	(243)

4 Seasonality of operations

Owing to the summer holiday period in July and August, the Group on average experiences higher traffic demands in the second half of the year. As a result, the first half year typically reports lower revenues and results than the second half.

5 Income tax expense

	Six months ended 30 June	
	2007 <i>RMB million</i>	2006 <i>RMB million</i>
PRC income tax	192	5
Deferred tax	30	6
Income tax expense	222	11

The statutory income tax rate in the PRC is 33%. The Company is taxed at a preferential rate of 18% and certain branches are taxed at rates ranging from 15% to 33%. The subsidiaries of the Group are taxed at rates ranging from 15% to 33%.

On 16 March 2007, the Fifth Plenary Session of the Tenth National People's Congress passed the Corporate Income Tax Law of the PRC ("new tax law") which will take effect on 1 January 2008. As a result of the new tax law, the statutory income tax rate currently adopted by the Company and its subsidiaries will change from 33% to 25% with effect from 1 January 2008 over a five-year transitional period. The existing preferential tax rates currently enjoyed by the Company and its subsidiaries will also be gradually migrated to the new standard rate of 25% over a five-year transitional period. As the detailed instruction for the transition to the new tax rate is yet to be issued, the Group

estimated that the applicable income tax rate under the preferential tax policy will be expired at the shorter of the existing preferential tax period and the five-year transitional period. The change in the carrying amount of the deferred tax assets and liabilities, as a result of the change in tax rate, is reflected in the interim financial report of the Group for the six months ended 30 June 2007.

In respect of the Group's overseas airline operations, the Group has either obtained exemptions from overseas taxation pursuant to the bilateral aviation agreements between the overseas governments and the PRC government, or has sustained tax losses in these overseas jurisdictions. Accordingly, no provision for overseas tax has been made for both the current and prior periods.

6 Profit/(loss) for the period

7 Dividends

The Board of Directors does not recommend the payment of an interim dividend for the six months ended 30 June 2007. No interim dividend was paid in respect of the six months ended 30 June 2006.

8 Earnings/(loss) per share

The calculation of basic earnings/(loss) per share for the six months ended 30 June 2007 is based on the profit attributable to equity shareholders of the Company of RMB168 million (six months ended 30 June 2006: loss of RMB825 million) and the weighted average number of shares in issue during the period of 4,374 million (six months ended 30 June 2006: 4,374 million).

The amount of diluted earnings/(loss) per share is the same as basic earnings/(loss) per share as there were no dilutive potential ordinary shares in existence during both the current and prior periods.

9 Property, plant and equipment, net

During the six months ended 30 June 2007, the Group acquired aircraft with an aggregate cost of RMB3,910 million (six months ended 30 June 2006: RMB395 million).

(e) Loans from and deposits placed with China Southern Airlines Group Finance Company Limited (“SA Finance”) (a PRC authorised financial institution controlled by CSAHC and an associate of the Group)

At 30 June 2007, loans from SA Finance amounted to RMB270 million (31 December 2006: RMB300 million). The loans are unsecured, interest bearing at floating interest rates as published by the People’s Bank of China (“PBOC”) and are repayable within one year. The loans are guaranteed by CSAHC (included in the amount as disclosed in Note (f) below).

At 30 June 2007, the Group’s deposits with SA Finance amounted to RMB875 million (31 December 2006: RMB629 million). The applicable interest rates were determined in accordance with the rates published by the PBOC.

(f) Guarantees from CSAHC and SA Finance

Certain bank loans were guaranteed by the following parties:

	At 30 June 2007 RMB million	At 31 December 2006 RMB million
CSAHC	1,297	1,484
SA Finance	4	5

(g) Transactions with other state-controlled entities

The Company is a state-controlled entity and operates in an economic regime currently dominated by entities directly or indirectly controlled by the PRC government (“state-controlled entities”) through its government authorities, agencies, affiliations and other organisations.

Other than those disclosed in this interim financial report, the Group conducts transactions with other state-controlled entities which include but are not limited to the following:

- Transportation services;
- Leasing arrangements;
- Purchase of equipment;
- Purchase of ancillary materials and spare parts;
- Ancillary and social services; and
- Financial services arrangement.

These transactions are conducted in the ordinary course of the Group’s business on terms comparable to those with other entities that are not state-controlled. The Group has established its buying, pricing strategy and approval process for purchases and sales of products and services. Such buying, pricing strategy and approval processes do not depend on whether the counterparties are state-controlled entities or not.

Having considered the potential for transactions to be impacted by related party relationships, the Group’s pricing strategy, buying and approval processes, and what information would be necessary for an understanding of the potential effect of the relationship on the financial statements, the directors of the Company are of the opinion that the following transactions with other state-controlled entities require disclosure:

(i) The Group's transactions with other state-controlled entities, including state-controlled banks in the PRC

(h) *Loan from a minority shareholder*

At 30 June 2007, loan from a minority shareholder amounted to RMB19 million (31 December 2006: RMB19 million). The loan is unsecured, interest free and repayable within five years.

16 Contingent liabilities

A writ of summons was issued on 30 May 2007 by two sales agents in Taiwan (the "plaintiffs") against the Company for the alleged breach of certain terms and conditions of a cooperative agreement (the "cooperative agreement"). The plaintiffs have made a claim against the Company for a total sum of approximately RMB107 million mainly in respect of the alleged non-payment of sales commission on air tickets sold in Taiwan during the period from 1 September 2004 to 31 August 2006. The plaintiffs have also claimed against the Company for an unspecified compensation for early termination of the cooperative agreement.

The directors of the Company consider that, given the nature of the claims and the preliminary status of the proceedings, it is not possible to estimate the eventual outcome of the claims with reasonable certainty at this stage. However, the directors of the Company are of the opinion that the claims are without merit and have instructed its

legal advisor to defend the claims vigorously. The directors of the Company consider that the outstanding claim should have no material adverse effect on the financial position of the Group.

17 Post balance sheet events

REVIEW AND PROSPECTS

In the first half of 2007, the Group continued to implement its strategy on scheduled flight network optimisation and hub development, as well as striving to enhance service quality so as to satisfy customer needs and meet the entrance requirements of the international airlines alliances. Meanwhile, the Group continued to strengthen budget management and cost controls; to rationalise the way of acquiring aircraft so as to maintain a healthy gearing level and reduce financing costs; and to optimise the management performance assessment system based on efficiency of operation, thereby elevating the overall operating level and performance benchmarks of the Group.

The reporting period was characterised by a persistent strong national economy, a stable increase of market demand and an appreciation of Renminbi against major currencies such as US dollar. With assuring flight safety as the premise, the Group recorded a total traffic turnover of 4,250 million tonne kilometres and carried 26.4 million passengers and handled 403,000 tonnes of cargo and mail, representing increases of 14.6%, 16.6% and 7.2% respectively as compared to the corresponding period of last year. The passenger load factor was 71.9%, representing an increase of 1.7% as compared to the corresponding period of last year. Operating revenue was RMB24,556 million for the first half year, representing an increase of 19.2% as compared to the corresponding period of last year while profit attributable to equity shareholders of the Company was RMB168 million as compared with a loss of RMB825 million for the corresponding period of last year.

During the reporting period, the Company has recorded 4,000,000 safety flying hours and was granted the Four Stars Award by Civil Aviation Administration of China for flight safety, which is the highest award in the civil aviation industry in the PRC.

An adjustment was made by the government on fuel surcharge on domestic routes at the beginning of the year: fuel surcharge was revised from RMB60 to RMB50 per passenger for flight distance under 800 km and from RMB100 to RMB80 per passenger for flight distance above 800 km (inclusive), which came into effect on 21 January 2007. However, jet fuel prices in the PRC in average were higher than those in the same period of last year. As a result of surging jet fuel prices and downward adjustments on fuel surcharges, the Group was subject to greater pressure on operating cost. To alleviate such pressure, the Company has strived to optimise its flight structure and deployment, enhance overall income level, adopt various measures to minimise fuel wastage and employ various financial derivative instruments.

The Group continued to push forward its implementation of the “dual-hub” operating strategy. Through building Beijing and Guangzhou as its regional hubs, the Company strived to enlarge its service network to provide better air transportation solutions for its existing and potential customers. During the reporting period, the Group launched 56 new flight routes, including 9 international flight routes. On 16 June 2007, Chongqing Airlines, a joint venture established by the Group and Chongqing Development and Investment Co., Ltd., was formally established, in which the Company holds 60% of its equity interests. The first flight of Chongqing Airlines was launched in July 2007, which added new momentum to the Group’s development in the central and western regions of the PRC. With a view to achieving economies of scale of its air cargo transportation, the Group is actively seeking cooperation with members of the SkyTeam Alliance to increase the proportion of air cargo in the overall transportation business. An Airbus A300-600 aircraft, the first passenger aircraft being converted into cargo aircraft, will also come into operation for cargo transportation during the year.

To enhance the quality of service, the Group, while improving its flight punctuality rates and inflight services, is the first among its peers to offer premium services such as boarding registration through internet and mobile phone, which was well received by its customers.

During the reporting period, various preparation work for admission to the SkyTeam Alliance has progressed smoothly, and the Company aims to be admitted by the end of this year. The membership will facilitate the Company to benefit from the rapid growth in air transportation demand as a result of the development of the global economy, thereby leading the Group to become an international airline with promising growth.

For the period under review, the Group's total traffic revenue was RMB24,086 million, an increase of RMB3,863 million or 19.1% from the same period last year. Meanwhile, the Group's total traffic volume increased by 14.6% to 4,250 million RTKs. The aggregate utilisation rate of the Group's Boeing and Airbus aircraft was 9.39 hours per day for the period under review, a decrease of 0.14 hours or 1.5% from the same period last year.

Passenger revenue for the period under review was RMB22,392 million, up 20.2% from the same period last year, representing 93.0% of the Group's total traffic revenue. Passenger traffic volume increased by 17.8% to 37,787 million RPKs.

Domestic passenger revenue was RMB18,357 million, up 20.1% from the same period last year. Domestic passenger revenue accounted for 82.0% of overall passenger revenue. Passenger capacity, in terms of ASKs, increased by 15.7% while passenger traffic volume, in terms of RPKs, increased by 18.7% from the same period last year, resulting in an increase in passenger load factor of 1.8 percentage points to 73.9%. During the reporting period, the passenger yield per RPK increased by 1.8% from RMB0.57 to RMB0.58.

On Hong Kong and Macau routes, the Group recorded passenger revenue of RMB540 million, a decrease of 12.3% from same period last year. Hong Kong and Macau passenger revenue accounted for 2.4% of total passenger revenue. Passenger capacity, in terms of ASKs, decreased by 28.2% while passenger traffic volume, in terms of RPKs decreased by 26.1% from the same period last year, resulting in an increase in passenger load factor of 1.8 percentage points to 62.4%. The passenger yield per RPK increased by 18.2% to RMB0.91.

Passenger revenue for the Group's international routes amounted to RMB3,495 million, an increase of 28.0% from the same period last year. International passenger revenue accounted for 15.6% of total passenger revenue. Passenger capacity, in terms of ASKs, increased by 24.5% while passenger traffic volume, in terms of RPKs, increased by 20.1% from the same period last year, resulting in a decrease in passenger load factor of 2.3 percentage points to 63.3%. The passenger yield per RPK increased by 6.9% to RMB0.62.

Cargo and mail revenue was RMB1,694 million, an increase of 6.1% from the same period last year. Cargo and mail revenue accounted for 7.0% of total traffic revenue. Cargo and mail volume grew by 4.5% to 883 million RTKs from the same period last year, mainly due to the increasing traffic demand. The overall yield per cargo and mail tonne kilometre increased by 1.6% to RMB1.92.

Total operating expenses increased by 17.9% to RMB24,574 million from the same period last year, primarily due to the increase in fuel cost, landing and navigation fees, maintenance expenses, aircraft operating lease charge and depreciation resulting from the increase in traffic volume and fleet expansion during the period under review.

Flight operations expenses increased by 19.7% to RMB13,226 million from the same period last year. Of these expenses, fuel cost was RMB8,598 million, up 21.4% from the same period last year, mainly as a result of increases in fuel consumption and fuel prices. Aircraft operating lease charges increased by 27.0% to RMB1,801 million, mainly attributable to additional rental payments for new aircraft under operating leases. Air catering expenses increased by 9.9% to RMB608 million, primarily as a result of an increase in number of passengers carried during the period under review.

Maintenance expenses increased by 38.7% to RMB2,361 million, mainly due to an increase in general repair as a result of increase in flying hours during the period under review.

Aircraft and traffic servicing expenses increased by 16.0% to RMB3,974 million from the same period last year, reflecting primarily an increase in number of landing and takeoffs.

Promotion and sales expenses increased by 7.2% to RMB1,565 million from the same period last year, primarily as a result of an increase in traffic volume.

General and administrative expenses increased by 20.4% to RMB839 million from the same period last year, due mainly to an increase in the scale of operations.

As compared with the same period last year, depreciation and amortisation expenses increased by 3.8% to RMB2,546 million, reflecting primarily the effect of scheduled aircraft delivered during the second half of 2006 and the period under review.

Interest expense increased by 12.7% to RMB1,132 million in the period under review, primarily reflecting an increase in the balance of loan borrowings and average interest rate.

The Group recorded a net exchange gain of RMB1,266 million, mainly resulted from Renminbi appreciation during the period under review. Such amount represents mainly unrealised translation exchange gain on period end foreign currency denominated liabilities.

As a result of the aforementioned factors, for the six months ended 30 June 2007, the Group recorded a net profit attributable to equity shareholders of the Company of RMB168 million, as compared to a net loss attributable to equity shareholders of the Company of RMB825 million for the same period last year.

LIQUIDITY, FINANCIAL RESOURCES AND CAPITAL STRUCTURE

As at 30 June 2007, the Group's current liabilities exceeded its current assets by RMB31,917 million, which include current instalments of bank and other loans and obligations under finance leases of RMB27,343 million. The liquidity of the Group is primarily dependent on its ability to maintain adequate cash inflow from operations to meet its debt obligations as they fall due, and on its ability to obtain adequate external finance to meet its committed future capital expenditures. In preparing the interim financial report, the directors of the Company have considered the Group's sources of liquidity and believe that adequate funding is available to fulfil the Group's short term obligations and capital expenditure requirements.

As at 30 June 2007, the Group's borrowings totalled RMB51,642 million, an increase of RMB2,404 million from RMB49,238 million as at 31 December 2006. The majority of such borrowings were denominated, to a large extent, in United States dollars and, to a smaller extent, in Japanese yen, Renminbi and Hong Kong dollars, with 24.3% of the total balance being fixed interest rate borrowings. Of such borrowings, RMB27,343 million, RMB5,822 million, RMB3,964 million, RMB2,109 million and RMB12,404 million will be repayable in the twelve months ending 30 June 2008, 2009, 2010, 2011, 2012 and thereafter respectively. As at 30 June 2007, cash and cash equivalents of the Group totalled RMB3,551 million, an increase of RMB1,287 million from RMB2,264 million as at 31 December 2006. Of such balance, 28.4% was denominated in foreign currencies. Net debts (total borrowings net of cash and cash equivalents) increased by 2.4% to RMB48,091 million from RMB46,974 million as at 31 December 2006.

As at 30 June 2007, total equity attributable to equity shareholders of the Company amounted to RMB10,356 million, an increase of RMB168 million from RMB10,188 million as at 31 December 2006, reflecting the profit attributable to equity shareholders of the Company recorded for the period under review. Total equity as at 30 June 2007 amounted to RMB12,347 million (As at 31 December 2006: RMB12,121 million).

Ratio of net debt to total equity of the Group as at 30 June 2007 and as at 31 December 2006 were both 3.9 times.

FINANCIAL RISK MANAGEMENT POLICY

Foreign currency risk

The Renminbi is not freely convertible into foreign currencies. All foreign exchange transactions involving Renminbi must take place either through the People's Bank of China ("PBOC") or other institutions authorised to buy and sell foreign exchange or at a swap centre.

The Group has significant exposure to foreign currency as substantially all of the Group's lease obligations and bank loans are denominated in foreign currencies. Depreciation or appreciation of the Renminbi against foreign currencies affects the Group's results significantly because the Group's foreign currency payments generally exceed its foreign currency receipts. The Group is not able to hedge its foreign currency exposure effectively other than by retaining its foreign currency denominated earnings and receipts to the extent permitted by the State Administration of Foreign Exchange, or subject to certain restrictive conditions, entering into forward foreign exchange contracts with authorised PRC banks.

The exchange rate of Renminbi to US dollar was set by the PBOC and had fluctuated within a narrow band prior to 21 July 2005. Since then, a managed floating exchange rate regime based on market supply and demand with reference to a basket of foreign currencies has been used and US dollar exchange rate has gradually declined against the Renminbi.

Jet fuel price risk

The Group allows for the judicious use of approved derivative instruments such as swaps and options with approved counter-parties and within approved limits to manage the risk of surge of jet fuel price. In addition, counter-party credit risk is generally restricted to any gains on changes in fair value at any time, and not the principal amount of the instrument. Therefore, the possibility of material loss arising in the event of non-performance by counter-party is considered to be unlikely.

CHARGES ON ASSETS

As at 30 June 2007, certain aircraft of the Group with an aggregate carrying value of approximately RMB33,299 million (31 December 2006: RMB30,075 million) were mortgaged under certain loan and lease agreements.

CAPITAL AND INVESTING COMMITMENTS

As at 30 June 2007, the Group had capital commitments of approximately RMB58,773 million. Of such amounts, RMB56,480 million was related to the acquisition of aircraft and flight equipment and RMB2,293 million for other projects.

As at 30 June 2007, the Group was committed to make capital contributions of approximately RMB83 million and RMB720 million to a jointly controlled entity and a subsidiary respectively.

CONTINGENT LIABILITIES

A writ of summons was issued on 30 May 2007 by two sales agents in Taiwan (the “plaintiffs”) against the Company for the alleged breach of certain terms and conditions of a cooperative agreement (the “cooperative agreement”). The plaintiffs have made a claim against the Company for a total sum of approximately RMB107 million mainly in respect of the alleged non-payment of sales commission on air tickets sold in Taiwan during the period from 1 September 2004 to 31 August 2006. The plaintiffs have also claimed against the Company for an unspecified compensation for early termination of the cooperative agreement.

The directors of the Company consider that, given the nature of the claims and the preliminary status of the proceedings, it is not possible to estimate the eventual outcome of the claims with reasonable certainty at this stage. However, the directors of the Company are of the opinion that the claims are without merit and have instructed its legal advisor to defend the claims vigorously. The directors of the Company consider that the outstanding claim should have no material adverse effect on the financial position of the Group.

PROSPECTS FOR THE SECOND HALF OF THE YEAR

In view of the stable growth of the PRC economy, it is anticipated that in the second half of 2007, domestic airlines will continue to benefit from the increasing market demand. However, persistent high oil prices and increasing market competition, as well as anticipated macro-economic control measures of the PRC government, will affect the operation of the industry to a certain extent. The Group will continue to appropriately implement its overall development strategies, proactively adjust itself to market needs, modify its flight network and capacity deployment, reinforce the market forecasting and revenue analysis of each route, and strengthen its sales and marketing efforts. The Group will strive to enhance its service quality whilst continuously improving its passenger load factor and yield, thereby achieving all operating targets for the year and benefiting from the stable economic growth of the PRC.

DIVIDENDS

The Board does not propose to declare an interim dividend for the year 2007.

STRUCTURE OF SHARE CAPITAL

As at 30 June 2007, the share capital of the Company comprised 4,374,178,000 shares, of which approximately 50.30% or 2,200,000,000 State-owned Shares were held by China Southern Air Holding Company (“CSAHC”), approximately 22.86% or 1,000,000,000 A Shares were held by the PRC investors and approximately 26.84% or 1,174,178,000 H Shares were held by Hong Kong and overseas investors.
