

WEST BANCORPORATION INC
Form 10-Q
November 02, 2007

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2007

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 0-49677

WEST BANCORPORATION, INC.
(Exact Name of Registrant as Specified in its Charter)

IOWA
(State of Incorporation)

42-1230603
(I.R.S. Employer Identification No.)

1601 22nd Street, West Des Moines, Iowa 50266

Telephone Number (515) 222-2300

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of November 2, 2007, there were 17,536,682 shares of common stock, no par value outstanding.

West Bancorporation, Inc.
 Notes to Consolidated Financial Statements
 (unaudited)
 (in thousands, except per share information)

1. Basis of Presentation

The accompanying consolidated statements of income for the three and nine months ended September 30, 2007 and 2006, the consolidated statements of stockholders' equity, comprehensive income, and cash flows for the nine months ended September 30, 2007 and 2006, and the consolidated balance sheets as of September 30, 2007 and December 31, 2006, include the accounts and transactions of the Company and its wholly-owned subsidiaries, West Bank and WB Capital Management Inc. All material intercompany balances and transactions have been eliminated in consolidation.

The accompanying consolidated financial statements have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. Although management believes that the disclosures are adequate to make the information presented not misleading, it is suggested that these interim consolidated financial statements be read in conjunction with the Company's most recent audited financial statements and notes thereto. In the opinion of management, the accompanying consolidated financial statements contain all adjustments (consisting of only normal recurring accruals) necessary to present fairly the financial position as of September 30, 2007, the results of cash flows for the nine months ended September 30, 2007 and 2006, and the results of operations for the three and nine months ended September 30, 2007 and 2006.

The results for these interim periods may not be indicative of results for the entire year or for any other period.

2. Earnings Per Common Share

Earnings per share represent income available to common shareholders divided by the weighted average number of shares outstanding during the period. The Company has no common equivalent shares that could cause dilution. The weighted average number of shares outstanding for the three months ended September 30, 2007 and 2006, was 17,536,682 and 17,536,765, respectively, and the weighted average number of shares outstanding for the nine months ended September 30, 2007 and 2006, was 17,536,682 and 17,536,878, respectively.

3. Commitments

In the normal course of business, the Company enters into commitments to extend credit such as loan commitments and standby letters of credit to meet the financing needs of its customers. These commitments expose the Company to varying degrees of credit and market risk and are subject to the same credit reviews as those loans recorded on the balance sheet. For additional information on credit extension commitments see Note 13 of the Company's 2006 consolidated financial statements. The Company's commitments as of the dates shown are approximately as follows:

	September 30, 2007	December 31, 2006
Commitments to extend credit	\$ 313,007	\$ 262,717
Standby letters of credit	21,906	22,301
	\$ 334,913	\$ 285,018

4. Segment Information

An operating segment is generally defined as a component of a business for which discrete financial information is available and whose operating results are regularly reviewed by the chief operating decision-maker. The Company's primary business segments are banking and investment advisory services. The banking segment generates revenue through interest and fees on loans, service charges on deposit accounts, interest on investment securities and fees for trust services. The banking segment includes West Bank and the Company, and related elimination entries between the two, as the holding company's operation is similar to the bank. The investment advisory segment consists of WB Capital Management Inc., and generates revenue by providing investment portfolio management services to individuals, retirement plans, corporations, foundations, endowments and public entities. Selected financial information on the Company's segments is presented below for the three and nine months ended September 30, 2007 and 2006.

	Three months ended September 30,

5. Income Taxes

The Company adopted the provisions of Financial Accounting Standards Board (FASB) Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, effective January 1, 2007. The Interpretation provides clarification on accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement of Financial Accounting Standard (SFAS) No. 109, *Accounting for Income Taxes*. The Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. As a result of the Company's evaluation of the implementation of FIN 48, no significant income tax uncertainties were identified. Therefore, the Company recognized no adjustment for unrecognized income tax benefits during the nine months ended September 30, 2007. Corporate tax returns for the years 2004 through 2006 remain open to examination by Federal and Iowa taxing authorities.

6. Impact of New Financial Accounting Standards

In February 2007, The FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS No. 159 is an amendment of SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. SFAS No. 159 generally permits the measurement of selected eligible financial instruments at fair value at specified election dates. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. This Statement is expected to expand the use of fair value measurement, which is consistent with the FASB's long-term measurement objectives for accounting for financial instruments. This Statement is effective for the Company beginning January 1, 2008. The Company has evaluated this pronouncement and has concluded its operations are not applicable to the primary objective of the pronouncement. The Company's independent registered public accounting firm concurred with that assessment.

7. Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term are the allowance for loan losses and fair value of financial instruments.

8. Critical Accounting Policies

Management has identified its most critical accounting policy to be that related to the allowance for loan losses. The allowance for loan losses is established through a provision for loan losses charged to expense. Loans are charged against the allowance for loan losses when management believes that collectibility of the principal is unlikely. The Company has policies and procedures for evaluating the overall credit quality of its loan portfolio including timely identification of potential problem credits. On a quarterly basis, management reviews the appropriate level for the allowance for loan losses incorporating a variety of risk considerations, both quantitative and qualitative. Quantitative factors include the Company's historical loss experience, delinquency and charge-off trends, collateral values, known information about individual loans and other factors. Qualitative factors include the general economic environment in the Company's market area and the expected trend of those economic conditions. To the extent actual results differ from forecasts and management's judgment, the allowance for loan losses may be greater or less than future charge-offs.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

"SAFE HARBOR" STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT

The information contained in this report may contain forward-looking statements about the Company's growth and acquisition strategies, new products and services, and future financial performance, including earnings and dividends per share, return on average assets, return on average equity, efficiency ratio and capital ratio. Certain statements in this report constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are based upon certain underlying assumptions, risks and uncertainties. Because of the possibility of change in the underlying assumptions, actual results could differ materially from these forward-looking statements. Risks and uncertainties that may affect future results include: interest rate risk, competitive pressures, pricing pressures on loans and deposits, actions of bank and non-bank competitors, changes in local and national economic conditions, changes in regulatory requirements, actions of the Securities and Exchange Commission and/or the Federal Reserve Board, and customers' acceptance of the Company's products and services. The Company undertakes no obligation to revise or update such forward-looking statements to reflect current events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2007
(dollars in thousands)

OVERVIEW

The following discussion describes the consolidated operations of the Company, including its wholly-owned subsidiaries West Bank and WB Capital Management Inc. ("WB Capital"). Consolidated results of operations for the three and nine months ended September 30, 2007, are compared to the results for the same periods in 2006, and the consolidated financial condition of the Company at September 30, 2007, is compared to the December 31, 2006 position.

Net income for the three months ended September 30, 2007, declined slightly to \$4,947 compared to \$4,977 for the same period in 2006. The decline resulted from the combination of slightly lower net interest income, an increase in provision for loan losses, lower service charge income and slightly higher noninterest expense. Offsetting these reductions in income before taxes was a lower effective income tax rate for the three months ended September 30, 2007 compared to the same period in 2006. The effective income tax rate for 2007 was lower than in the same period of 2006 as the result of recognizing a Federal tax credit,

For the first nine months of 2007, net income increased to \$14,518, or \$0.83 per share, compared to \$14,404, or \$0.82 per share for the first nine months of 2006. The annualized return on average assets was 1.48 percent for both periods. The annualized return on average equity was 16.81 percent for the first nine months of 2007 compared to 18.16 percent for the first nine months of 2006. Net interest income for the first nine months of 2007 was \$350 lower than the previous year primarily as a result of rates paid on deposits increasing faster than the yield on earning assets. Year-to-date provision for loan losses declined \$200 compared to the prior year.

Year-to-date noninterest income was slightly lower than last year as an increase in service charges and net realized gains from sales of securities were offset by a decline in revenue from investment advisory fees. Realized gains on the sale of investment securities totaled \$2 in the first nine months of 2007 compared to realized losses of \$147 during the first nine months of 2006.

Year-to-date noninterest expense for the nine months ended September 30, 2007, was \$93 lower than the prior year. Reductions in salaries and benefits and gains from the sale of other real estate owned were partially offset by increased occupancy costs.

WB Capital's year-to-date net income was \$381 for the nine months ended September 30, 2007, slightly lower than the \$404 reported for the same period in 2006. Revenues were lower than a year ago because of a decision to reduce the fees on the Vintage mutual funds and a lower level of assets under management in certain categories. Operating expenses at WB Capital were \$325 lower during the first nine months of 2007 compared to the same 2006 period.

The Company has explored banking opportunities in areas of the country which are growing faster than our Iowa markets. The Board of Directors decided to investigate the greater Phoenix, Arizona metropolitan area. The Company will take a deliberate approach by first identifying an experienced leader in this market and then selecting locations.

RESULTS OF OPERATIONS

The following table shows selected financial results and measures for the three and nine months ended September 30, 2007, compared with the same periods in 2006:

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2007	2006	Change	Change-%	2007	2006	Change	Change-%
Net income	\$ 4,947	\$ 4,977	\$ (30)	-0.6%	\$ 14,518	\$ 14,404	\$ 114	0.8%
Average assets	1,295,973	1,315,308	(19,335)	-1.5%	1,308,022	1,301,735	6,287	0.5%
Average stockholders' equity	117,111	107,893	9,218	8.5%	115,451	106,042	9,409	8.9%
Return on assets	1.51%	1.50%	0.01%		1.48%	1.48%	0.00%	
Return on equity	16.76%	18.30%	-1.54%		16.81%	18.16%	-1.35%	
Efficiency ratio	43.60%	42.60%	1.00%		44.17%	43.70%	0.47%	
Dividend payout ratio	57.07%	56.38%	0.69%		57.98%	56.59%	1.39%	
Equity to assets ratio	9.04%	8.20%	0.84%		8.83%	8.15%	0.68%	

Definitions of ratios:

Return on assets – annualized net income divided by average assets.

Return on equity – annualized net income divided by average stockholders' equity.

Efficiency ratio – noninterest expense divided by noninterest income (excluding net securities gains) plus taxable equivalent net interest income.

Dividend payout ratio – dividends paid divided by net income.

Equity to assets ratio – average equity divided by average assets.

Net Interest Income

The following tables show average balances and related interest income or interest expense, with the resulting average yield or rate by category of interest-earning assets or interest-bearing liabilities. Interest income and the resulting net interest income are shown on a fully taxable basis.

Edgar Filing: WEST BANCORPORATION INC - Form 10-Q

Fluctuations in net interest income can result from the combination of changes in the balances of asset and liability categories and changes in interest rates. Net interest margin is a measure of the net return on interest-earning assets and is computed by dividing annualized tax-equivalent net interest income by the average of total interest-earning assets for the period. The net interest margin for the third quarter of 2007 was 3.32 percent, a 3 basis point increase compared to the same quarter last year and a 1 basis point decline from the second quarter of 2007.

The Company's tax-equivalent net interest income for the nine months ended September 30, 2007, declined \$483 compared to the nine months ended September 30, 2006. The net interest margin for the first nine months of 2007 declined to 3.30 percent compared to 3.36 percent for the same period in 2006. The relatively flat yield curve, where short-term interest rates are not significantly lower than long-term rates, continued to negatively impact the net interest margin. In addition, the Federal Reserve reduced the federal funds rates by 50 basis points in late September 2007. This caused the first market change in prime rate since June 2006. West Bank's prime interest rate was lowered accordingly. Approximately one half of the bank's loan portfolio is priced on a variable basis using the prime rate benchmark. Interest rates paid on deposits generally decline more gradually.

Taxable-equivalent interest income and fees on loans increased \$2.8 million in the first nine months of 2007 compared to the same period in 2006, due to the combination of a higher volume of outstanding loans and increasing yields. Average loans were \$16.8 million higher than the first nine months of 2006 and the average yield on loans increased to 7.56 percent for the first nine months of 2007, compared to 7.29 percent for the same period in 2006. The yield on the Company's loan portfolio is affected by the mix of the portfolio, the effects of competition, the interest rate environment and the amount of non-accrual loans. The interest rate environment can influence the volume of new loan originations and the mix of variable rate versus fixed rate loans. Loan pricing in the Company's market areas remains very competitive.

Through September 30, 2007, the average balance of investment securities was \$16.0 million lower than in the first nine months of 2006, while the yield increased 7 basis points. There have been minimal purchases of investment securities during the first nine months of 2007 as yields on short-term investments have approximated those of longer-term investment securities.

The average rate paid on deposits for the first nine months of 2007 increased to 4.21 percent from 3.84 percent for the same period last year. This increase is primarily the result of an increase in market interest rates and the shift in funds from money market and savings accounts to a market rate interest-bearing checking account and certificates of deposits. Clients have made these transfers to maximize earnings. The reduction in average time deposits in the first nine months of 2007 compared to the same period in 2006 was primarily due to using fewer wholesale certificates of deposit as a source of funding loan growth.

The average rate paid on other borrowings increased only one basis point compared to the first nine months of 2006. The average balance of borrowings for the first nine months of 2007 was \$95.6 million higher than a year ago and the mix of borrowings has changed significantly since last year. Overnight borrowings in the form of federal funds purchased from correspondent banks and securities sold under agreements to repurchase averaged \$58.2 million more than in the first nine months of 2006. The average rate paid on those additional borrowings increased 46 basis points in 2007 compared to the first nine months of 2006. Average long-term borrowings increased \$33.0 million, while the rates paid on those additional borrowings declined 34 basis points compared to 2006.

Provision for Loan Losses and the Related Allowance for Loan Losses

The following table sets forth the activity in the Allowance for Loan Losses for the three and nine months ended September 30, 2007 and 2006, as well as common ratios related to the allowance for loan losses.

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2007	2006	Change	2007	2006	Change
Balance at beginning of period	\$ 8,779	\$ 8,440	\$ 339	\$ 8,494	\$ 7,615	\$ 879
Charge-offs	(390)	(721)	331	(876)	(821)	(55)
Recoveries	16	9	7	137	34	103
Net charge-offs	(374)	(712)	338	(739)	(787)	48
Provision charged to operations	500	450	50	1,150	1,350	(200)
Balance at end of period	\$ 8,905	\$ 8,178	\$ 727	\$ 8,905	\$ 8,178	\$ 727
Average loans outstanding	\$ 940,608	\$ 932,980	\$ 7,628	\$ 938,296	\$ 921,452	\$ 16,844
Ratio of net charge-offs during the period to average loans outstanding	0.04%	0.08%		0.08%	0.09%	
Ratio of allowance for loan losses to average loans outstanding	0.95%	0.88%		0.95%	0.89%	

The provision for loan losses represents charges made to earnings to maintain an adequate allowance for loan losses. The allowance for loan losses is management's best estimate of probable losses inherent in the loan portfolio as of the balance sheet date. Factors considered in establishing an appropriate allowance include: an assessment of the financial condition of the borrower; a realistic determination of value and adequacy of underlying collateral; the condition of the local economy and the condition of the specific industry of the borrower; an analysis of the levels and trends of loan categories; and a review of delinquent and classified loans.

Net charge-offs during the first nine months of 2007 were \$48 lower than in the same period in 2006. The majority of the charge-offs were for 1-4 family real estate and commercial loans. One commercial loan accounted for \$333 of the third quarter 2007 charge-offs. The net charge-off ratio for the nine months ended September 30, 2007, was 0.08 percent compared to 0.09 percent for the nine months ended September 30, 2006. Management considers this ratio to be good when compared to West Bank's peers which had net charge-offs averaging 0.13 percent for the first half of 2007 according to the June 2007 Bank Holding Company Performance Report prepared by the Federal Reserve Board's Division of Banking Supervision and Regulation. Significant efforts continue to be made to maximize recoveries.

The allowance for loan losses represented 915 percent of non-accrual loans and loans past due more than 90 days at September 30, 2007, compared to 1,307 percent at December 31, 2006. The ratio has declined due to the increase in non-accrual loans.

The adequacy of the allowance for loan losses is evaluated quarterly by management and reviewed by the West Bank Board of Directors. This evaluation focuses on specific loan reviews, changes in the type and volume of the loan portfolio given the current and forecasted economic conditions, and historical loss experience. Any one of the

following conditions may result in the review of a specific loan: concern about whether the customer's cash flow or net worth is sufficient to repay the loan; delinquency status; criticism of the loan in a regulatory examination; the suspension of interest accrual; or other reasons, including when the loan has other special or unusual characteristics that suggest special monitoring is warranted.

While management uses available information to recognize losses on loans, further reduction in the carrying amounts of loans may be necessary based on changes in local economic conditions. In addition, regulatory agencies, as an integral part of their examination process, periodically review the estimated losses on loans. Such agencies may require the Company to recognize additional losses based on their judgment about information available to them at the time of their examinations.

There has been a significant amount of publicity in the national media regarding sub-prime single-family mortgages and increases in foreclosure rates. West Bank has not and does not originate sub-prime single-family mortgages. In addition, West Bank does not directly invest in sub-prime mortgages in its investment portfolio and the amount, if any, of sub-prime mortgages securing mortgage backed securities owned by West Bank is not a material amount of the investment portfolio. While the foreclosure rate in Iowa has been increasing, the Company does not expect this to have a material impact on its operations. For several years, the majority of mortgage loans originated by West Bank have been sold in the secondary market and not retained on the Company's books. West Bank has owned a portfolio of single-family loans for several years that may from time to time result in foreclosures, but the number of foreclosures is not expected to be material.

West Bank does have a significant portion of its loan portfolio in construction and commercial real estate loans. The slowdown in the real estate market has resulted in fewer new loans in these categories. West Bank believes these loans are adequately secured but it is difficult to predict the consequences from any further downturn in the real estate market. See also the discussion of nonperforming assets later in this report.

Noninterest Income

The following table shows the variance from the prior year in the noninterest income categories shown in the Consolidated Statements of Income. In addition, accounts within the "Other income" category that represent significant variances are shown.

	Three Months Ended September 30,

Total noninterest income	\$ 11,954	\$ 11,991	\$ (37)	-0.31%

Year-to-date service charges on deposit accounts increased primarily because of implementing pricing changes for return check charges in the third quarter of 2006. However, return check charges have declined in the third quarter of 2007 compared to the same quarter of last year, as some customers are more closely monitoring their account balances.

Investment advisory fees are fees earned by WB Capital. The decline in investment advisory fees in 2007 compared to 2006 was due to a reduction in certain fee schedules and a lower level of assets under management in certain categories.

The Company recognized losses from the sale of investment securities in the first nine months of 2006 as lower yielding investments were sold with the proceeds being reinvested at higher yields. Through September 30, 2007, debit card usage fees continued to increase as a result of higher usage of this convenient payment method. Meanwhile, check printing income declined as customers continue to increase utilization of all forms of electronic payments, thus reducing the frequency of ordering checks. Year-to-date revenue from Visa/MasterCard increased as a result of the fees earned on an additional volume of cards issued, along with a rate increase in July 2006 on lower performing merchants. The volume of originations of residential mortgages sold into the secondary market has begun to increase because one staff member has been assigned full-time to this line of business since May 2007. As a result, the average income per residential loan increased approximately 22 basis points in the first nine months of 2007 compared to the prior year. Year-to-date other loan fees are lower than in 2006 as the prior year included a one-time fee for the origination of a loan on behalf of an insurance company.

Noninterest Expense

The following table shows the variance from the prior year in the noninterest expense categories shown in the Consolidated Statements of Income. In addition, accounts within the "Other expenses" category that represent significant variances are shown.

	Three Months Ended September 30,			
	2007	2006	Change	Change-%

16

The decline in year-to-date salaries and benefits resulted from a reduction in full-time equivalent employees due to certain positions that were eliminated and other positions experiencing turnover, and a reduction in certain benefit expenses. Several business development staff members were hired prior to the end of September 2007.

Year-to-date occupancy expenses were higher in 2007 due to the relocation of one of the Des Moines metropolitan branches to a rented facility in a higher traffic location during the third quarter of 2006 and additional space rented for certain West Bank operational departments. The Company continues to market excess space available in the facility in which WB Capital is located in West Des Moines. There were savings realized by relocating the Cedar Rapids office of WB Capital to the Coralville bank office during the second quarter of 2007.

Marketing expenses in 2007 have been lower than during the first nine months of 2006 due to the timing of several initiatives which are in process. Business development costs during the same time period increased due to continued efforts to increase and expand current and new customer relationships.

Year-to-date insurance expense increased as the Company's director's and officer's policy renewed in the third quarter of 2007 at a premium which was significantly higher than at the renewal date three years ago. Professional fees declined in the first nine months of 2007 due to lower legal fees and 2006 expense included acquisition costs of Investors Management Group. Legal fees in 2006 were higher because of one non-accrual loan and the cost of defending a lawsuit which was dismissed in the fourth quarter of 2006.

Director fees increased for the nine months ended September 30, 2007, compared to the same period in 2006 as the result of an increase in quarterly retainer and meeting fees. In the current tight job market, recruitment fees were paid to executive search firms in the third quarter of 2007 related to the hiring of several business development personnel. The loss on disposal of fixed assets in 2007 is primarily related to relocating the Cedar Rapids office of WB Capital. Other real estate owned expense has declined as a result of selling several other real estate properties at gains. One sale of farmland in eastern Iowa resulted in a gain of \$272, of which \$22 was recorded in the third quarter of 2007.

Income Tax Expense

The Company incurred income tax expense of \$6.5 million for the nine months ended September 30, 2007, compared to \$6.7 million for the nine months ended September 30, 2006. The effective income tax rate as a percent of income before taxes for the nine months ended September 30, 2007 and 2006, were 31.1 and 31.9 percent, respectively. The lower effective rate in 2007 is primarily due to West Bank investing in a qualified community development entity which qualified for a Federal New Market Tax credit. The reduction in tax expense for the third quarter of 2007 for this credit was \$163 and an additional \$54 will be recognized in the fourth quarter.

The Company adopted the provisions of Financial Accounting Standards Board (FASB) Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, effective January 1, 2007. The Interpretation provides clarification on accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement of Financial Accounting Standard (SFAS) No. 109, *Accounting for Income Taxes*. The Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. As a result of the Company's evaluation of the implementation of FIN 48, no significant income tax uncertainties were identified. Therefore, the Company recognized no adjustment for unrecognized income tax benefits during the nine months ended September 30, 2007.

FINANCIAL CONDITION

Total assets approximated \$1.3 billion as of September 30, 2007, and December 31, 2006. The 2.3 percent increase was primarily due to increased loan volumes.

Investment Securities

Investment securities available for sale declined approximately \$14.5 million from December 31, 2006, to \$242.3 million. The decline was primarily the result of maturities within the portfolio. On a quarterly basis, the investment securities portfolio is reviewed for other-than-temporary impairment. As of September 30, 2007, existing unrealized losses are considered to be temporary in nature due to market interest rate fluctuations and accordingly, no impairment adjustment has been recorded.

Loans and Non-performing Assets

Loans outstanding increased approximately \$39 million from December 31, 2006, to September 30, 2007. The increase was primarily attributable to growth in commercial and commercial real estate construction loans. Offsetting these increases was a decline of approximately \$12 million in residential construction loans as that market has softened. West Bank has new loans in process which should result in similar loan growth in the fourth quarter of 2007.

The following table sets forth the amount of non-performing loans and assets held by the Company and common ratio measurements of those items.

	September 30, 2007	December 31, 2006	Change
Non-accrual loans	\$ 880	\$ 495	\$ 385
Loans past due 90 days and still accruing interest	93	155	(62)
Total non-performing loans	973	650	323
Other real estate owned	325	2,002	(1,677)
Total non-performing assets	\$ 1,298	\$ 2,652	\$ (1,354)
Non-performing loans to total loans	0.10%	0.07%	0.03%
Non-performing assets to total loans	0.14%	0.29%	-0.15%
Non-performing assets to total assets	0.10%	0.21%	-0.11%

Total non-performing assets have declined 51 percent since the end of 2006. The balance of loans in non-accrual status grew to \$880 at September 30, 2007, from \$605 at June 30, 2007, and consisted of loans to nine different borrowers. One loan accounted for \$333 of the increase in non-accrual loans from the balance of \$495 at December 31, 2006. Other real estate owned declined significantly since December 31, 2006, as a result of selling farmland in the second quarter of 2007 which had a carrying value of \$1.6 million.

Reference is also made to the information and discussion earlier in this report under the heading "Provision for Loan Losses and the Related Allowance for Loan Losses."

Deposits

Total deposits were \$858 million as of September 30, 2007, a decline of 7.3 percent compared to December 31, 2006 balances. The savings category of deposits which includes money market accounts, which are liquid accounts and therefore pay relatively lower interest rates, declined approximately \$14.5 million compared to the end of the prior year. A portion of those funds moved into the time certificates of deposit category as customers attempted to increase

interest earned on those funds. Other time deposits increased \$45.2 million in 2007 primarily due to an increase in the level of brokered certificates of deposit. Time deposits in excess of \$100,000 declined \$83.6 million in 2007 as West Bank reduced its reliance on public unit deposit funding and increased its borrowings as described below.

Borrowings

The balance of federal funds purchased and securities sold under agreement to repurchase was \$131.1 million at September 30, 2007, up from \$109.3 million at December 31, 2006. The increase was primarily in federal funds purchased, which includes funds sold to West Bank by approximately 25 banks throughout Iowa as part of the correspondent bank services provided by West Bank. The balance of federal funds purchased from correspondent banks throughout Iowa will fluctuate depending upon the loan demand and investment strategy of those banks. The amount of funds sold to West Bank by these banks is at a higher level than has been the case at this time of year in prior years. West Bank also purchases federal funds from regional and national correspondent banks as necessary for short-term liquidity needs. The balance of other short-term borrowings consisted of a \$50 million one-week advance from the Federal Home Loan Bank of Des Moines ("FHLB") and Treasury, Tax and Loan option notes. The rate on the FHLB advance was approximately 66 basis points lower than the rate charged by regional and national correspondent banks at that date. Long-term borrowings increased \$17.9 million compared to December 31, 2006, as the result of debt repayments which were offset by a January 2007 10-year FHLB advance of \$30 million, which has a rate of 4.32 percent. The FHLB advance is callable after three years.

Liquidity and Capital Resources

The objective of liquidity management is to ensure the availability of sufficient cash flows to meet all corporate financial commitments and to capitalize on opportunities for profitable business expansion. The Company's principal source of funds is deposits, which include demand, money market, savings and certificates of deposit. Other sources include principal repayments on loans, proceeds from the maturity and sale of investment securities, federal funds purchased, repurchase agreements, advances from the FHLB, and funds provided by operations. Liquidity management is conducted on both a daily and a long-term basis. Investments in liquid assets are adjusted based on expected loan demand, projected loan maturities and payments, expected deposit flows, and the objectives set by the Company's asset-liability management policy. The Company had liquid assets (cash and cash equivalents) of \$34.8 million as of September 30, 2007, compared with \$35.7 million as of December 31, 2006. Securities available for sale may be sold prior to maturity to meet liquidity needs, to respond to market changes, or to adjust the Company's interest rate risk position. West Bank had additional borrowing capacity available from the FHLB of approximately \$56.8 million at September 30, 2007, and the Company has a \$2.5 million unsecured line of credit through a large regional correspondent bank. In addition, West Bank has \$95 million available through unsecured federal funds lines of credit with correspondent banks. West Bank had borrowed \$18.2 million on those lines of credit at September 30, 2007. The combination of high levels of potentially liquid assets, cash flows from operations and additional borrowing capacity provided strong liquidity for the Company at September 30, 2007.

The Company's total stockholders' equity increased to \$120.0 million at September 30, 2007, from \$113.8 million at December 31, 2006. Total equity increased due to earnings, less dividend payments equal to approximately 58 percent of year-to-date earnings, and a reduction in accumulated other comprehensive loss due to improvements in market values of investment securities held for sale. Total stockholders' equity was 9.25 and 8.97 percent of total assets as of September 30, 2007, and December 31, 2006, respectively. No material capital expenditures or material changes in the capital resource mix are anticipated at this time.

Quantitative measures established by regulation to ensure capital adequacy require the Company and West Bank to maintain minimum amounts and ratios (set forth in the following table) of total and Tier 1 capital to risk-weighted assets and of Tier 1 capital to average assets. Management believes the capital levels of the Company and West Bank met all capital adequacy requirements to which they were subject at September 30, 2007.

	Regulatory requirements to be:		Actual Regulatory Capital Ratios as of:	
	Adequately Capitalized	Well-Capitalized	September 30, 2007	December 31, 2006
Total risk-based capital as % of risk-weighted assets:				
Consolidated	8.0%	n/a	11.5%	11.2%
West Bank	8.0%	10.0%	11.0%	11.8%
Tier 1 capital as % of risk-weighted assets:				
Consolidated	4.0%	n/a	10.6%	10.4%
West Bank	4.0%	6.0%	9.3%	9.0%
Tier 1 capital as % average assets:				
Consolidated	4.0%	n/a	9.0%	8.5%
West Bank	4.0%	5.0%	7.8%	7.3%

On April 18, 2007, the Company's Board of Directors authorized \$5 million to be used during the following 12 months for the buy-back of Company common stock. No repurchases took place during the nine months ended September 30, 2007, under the current or previous authorizations.

Market Risk Management

Market risk is the risk of earnings volatility that results from adverse changes in interest rates and market prices. The Company's market risk is primarily interest rate risk arising from its core banking activities of lending and deposit taking. Interest rate risk is the risk that changes in market interest rates may adversely affect the Company's net interest income. Management continually develops and implements strategies to mitigate this risk. The analysis of the Company's interest rate risk was presented in the Form 10-K filed with the Securities and Exchange Commission on March 9, 2007 and is incorporated herein by reference. The Company has not experienced any material changes to its market risk position since December 31, 2006. Management does not believe the Company's primary market risk exposures and how those exposures were managed in the first nine months of 2007 changed when compared to 2006.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

The information appearing above under the heading "Market Risk Management" is incorporated herein by reference.

Item 4. Controls and Procedures

a. Evaluation of disclosure controls and procedures. As of the end of the period covered by this report, an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rule 240.13a-15(f)) as of the end of the period covered by this report was performed under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that the Company's current disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms.

b. Changes in internal controls over financial reporting. There were no changes in the Company's internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II – OTHER INFORMATION

Item 1. Legal Proceedings

The Company and its subsidiaries from time to time are party to various legal actions arising in the normal course of business. Management believes, as of the date of this Form 10-Q, that there is no threatened or pending proceeding against the Company or its subsidiaries which, if determined adversely, would have a material adverse effect on the business or financial position of the Company or its subsidiaries.

Item 1A. Risk Factors

Management of the Company does not believe there have been any material changes in the risk factors that were disclosed in the Form 10-K filed with the Securities and Exchange Commission on March 9, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the first nine months of 2007, there were no purchases of the Company's common shares under the \$5 million stock buy-back plan approved by the Board of Directors on April 18, 2007, or the previous stock buy-back plan approved in April 2006.

Item 6. Exhibits

The following exhibits are filed as part of this report:

Exhibits

- 3.1 Restated Articles of Incorporation of the Company(1)
- 3.2 By-laws of the Company(1)
