September 30, 2009 and 2008

Notes to Unaudited Financial Statements

(Unaudited)

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) for interim financial information and with the rules and regulations of the U.S. Securities and Exchange Commission (“SEC”) to Form 10 and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. The results of operations realized during an interim period are not necessarily indicative of results to be expected for a full year. These financial statements should be read in conjunction with the financial statements of the Company for the year ended December 31, 2008 and notes thereto contained in the Company’s Annual Report Form 10-K as filed with the SEC on March 30, 2009.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements as well as the reported amount of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Cash Equivalents

The Company considers all highly liquid investments with maturities of three months or less at the time of purchase to be cash equivalents.

Fair Value of Financial Instruments

The Company follows paragraph 825-10-50-10 of the FASB Accounting Standards Codification for disclosures about fair value of its financial instruments and has adopted paragraph 820-10-35-37 of the FASB Accounting Standards Codification (“Paragraph 820-10-35-37”) to measure the fair value of its financial instruments. Paragraph 820-10-35-37 establishes a framework for measuring fair value in accounting principles generally accepted in the United States of America (U.S. GAAP), and expands disclosures about fair value measurements. To increase consistency and comparability in fair value measurements and related disclosures, Paragraph 820-10-35-37 establishes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three (3) broad levels. The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three (3) levels of fair value hierarchy defined by Paragraph 820-10-35-37 are described below:

- Level 1 Quoted market prices available in active markets for identical assets or liabilities as of the reporting date.
- Level 2 Pricing inputs other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date.
- Level 3 Pricing inputs that are generally observable inputs and not corroborated by market data.

The carrying amounts of the Company's financial assets and liabilities, such as cash and accrued expenses, approximate their fair values because of the short maturity of these instruments.

The Company does not have any assets or liabilities measured at fair value on a recurring or a non-recurring basis, consequently, the Company did not have any fair value adjustments for assets and liabilities measured at fair value at September 30, 2009 or 2008, nor gains or losses are reported in the statement of operations that are attributable to the change in unrealized gains or losses relating to those assets and liabilities still held at the reporting date for the interim period ended September 30, 2009 or 2008.

Revenue Recognition

The Company applies paragraph 605-10-S99-1 of the FASB Accounting Standards Codification for revenue recognition. The Company recognizes revenue when it is realized or realizable and earned less estimated future doubtful accounts. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the product has been shipped or the services have been rendered to the customer, (iii) the sales price is fixed or determinable, and (iv) collectability is reasonably assured.

Income Taxes

The Company accounts for income taxes under Section 740-10-30 of the FASB Accounting Standards Codification. Deferred income tax assets and liabilities are determined based upon differences between the financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to the extent management concludes it is more likely than not that the assets will not be realized. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the statements of operations in the period that includes the enactment date.

The Company adopted section 740-10-25 of the FASB Accounting Standards Codification (“Section 740-10-25”). Section 740-10-25 addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under Section 740-10-25, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent (50%) likelihood of being realized upon ultimate settlement. Section 740-10-25 also provides guidance on de-recognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures. The Company had no material adjustments to its liabilities for unrecognized income tax benefits according to the provisions of Section 740-10-25.

Net income (loss) per common share

Net income per common share is computed pursuant to section 260-10-45 of the FASB Accounting Standards Codification. Basic net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding during the period. Diluted net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock and potentially outstanding shares of common stock during each period. There were no potentially dilutive shares outstanding as of September 30, 2009 or 2008.

Recently issued accounting standards

In June 2003, the Securities and Exchange Commission (“SEC”) adopted final rules under Section 404 of the Sarbanes-Oxley Act of 2002 (“Section 404”), as amended by SEC Release No. 33-9072 on October 13, 2009. Commencing with its annual report for the fiscal year ending December 31, 2010, the Company will be required to include a report of management on its internal control over financial reporting. The internal control report must include a statement

- of management’s responsibility for establishing and maintaining adequate internal control over its financial reporting;
- of management’s assessment of the effectiveness of its internal control over financial reporting as of year end; and
- of the framework used by management to evaluate the effectiveness of the Company’s internal control over financial reporting.

Furthermore, in the following fiscal year, it is required to file the auditor’s attestation report separately on the Company’s internal control over financial reporting on whether it believes that the Company has maintained, in all material respects, effective internal control over financial reporting.

In June 2009, the FASB approved the “FASB Accounting Standards Codification” (the “Codification”) as the single source of authoritative nongovernmental U.S. GAAP to be launched on July 1, 2009. The Codification does not change current U.S. GAAP, but is intended to simplify user access to all authoritative U.S. GAAP by providing all the authoritative literature related to a particular topic in one place. All existing accounting standard documents will be superseded and all other accounting literature not included in the Codification will be considered non-authoritative. The Codification is effective for interim and annual periods ending after September 15, 2009. The adoption did not have a material impact on the Company’s financial position, results of operations or cash flows.

In August 2009, the FASB issued the FASB Accounting Standards Update No. 2009-04 “Accounting for Redeemable Equity Instruments - Amendment to Section 480-10-S99” which represents an update to section 480-10-S99, distinguishing liabilities from equity, per EITF Topic D-98, Classification and Measurement of Redeemable Securities. The Company does not expect the adoption of this update to have a material impact on its consolidated financial position, results of operations or cash flows.

In August 2009, the FASB issued the FASB Accounting Standards Update No. 2009-05 “Fair Value Measurement and Disclosures Topic 820 – Measuring Liabilities at Fair Value”, which provides amendments to subtopic 820-10, Fair Value Measurements and Disclosures – Overall, for the fair value measurement of liabilities. This Update provides clarification that in circumstances in which a quoted price in an active market for the identical liability is not available, a reporting entity is required to measure fair value using one or more of the following techniques: 1. A valuation technique that uses: a. The quoted price of the identical liability when traded as an asset b. Quoted prices for similar liabilities or similar liabilities when traded as assets. 2. Another valuation technique that is consistent with the principles of topic 820; two examples would be an income approach, such as a present value technique, or a market approach, such as a technique that is based on the amount at the measurement date that the reporting entity would pay to transfer the identical liability or would receive to enter into the identical liability. The amendments in this Update also clarify that when estimating the fair value of a liability, a reporting entity is not required to include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of the liability. The amendments in this Update also clarify that both a quoted price in an active market for the identical liability when traded as an asset in an active market when no adjustments to the quoted price of the asset are required are Level 1 fair value measurements. The Company does not expect the adoption of this update to have a material impact on its consolidated financial position, results of operations or cash flows.

In September 2009, the FASB issued the FASB Accounting Standards Update No. 2009-08 “Earnings Per Share – Amendments to Section 260-10-S99”, which represents technical corrections to topic 260-10-S99, Earnings per share, based on EITF Topic D-53, Computation of Earnings Per Share for a Period that includes a Redemption or an Induced Conversion of a Portion of a Class of Preferred Stock and EITF Topic D-42, The Effect of the Calculation of Earnings per Share for the Redemption or Induced Conversion of Preferred Stock. The Company does not expect the adoption of this update to have a material impact on its consolidated financial position, results of operations or cash flows.

In September 2009, the FASB issued the FASB Accounting Standards Update No. 2009-09 “Accounting for Investments-Equity Method and Joint Ventures and Accounting for Equity-Based Payments to Non-Employees”. This Update represents a correction to Section 323-10-S99-4, Accounting by an Investor for Stock-Based Compensation Granted to Employees of an Equity Method Investee. Additionally, it adds observer comment Accounting Recognition for Certain Transactions Involving Equity Instruments Granted to Other Than Employees to the Codification. The Company does not expect the adoption to have a material impact on its consolidated financial position, results of operations or cash flows.

In September 2009, the FASB issued the FASB Accounting Standards Update No. 2009-12 “Fair Value Measurements and Disclosures Topic 820 – Investment in Certain Entities That Calculate Net Assets Value Per Share (or Its Equivalent)”, which provides amendments to Subtopic 820-10, Fair Value Measurements and Disclosures-Overall, for the fair value measurement of investments in certain entities that calculate net asset value per share (or its equivalent). The amendments in this Update permit, as a practical expedient, a reporting entity to measure the fair value of an investment that is within the scope of the amendments in this Update on the basis of the net asset value per share of the investment (or its equivalent) if the net asset value of the investment (or its equivalent) is calculated in a manner consistent with the measurement principles of Topic 946 as of the reporting entity’s measurement date, including measurement of all or substantially all of the underlying investments of the investee in accordance with Topic 820. The amendments in this Update also require disclosures by major category of investment about the attributes of investments within the scope of the amendments in this Update, such as the nature of any restrictions on the investor’s ability to redeem its investments at the measurement date, any unfunded commitments (for example, a contractual commitment by the investor to invest a specified amount of additional capital at a future date to fund investments that will be made by the investee), and the investment strategies of the investees. The major category of investment is required to be determined on the basis of the nature and risks of the investment in a manner consistent with the guidance for major security types in U.S. GAAP on investments in debt and equity securities in paragraph 320-10-50-1B. The disclosures are required for all investments within the scope of the amendments in this Update regardless of whether the fair value of the investment is measured using the practical expedient. The Company does not expect the adoption to have a material impact on its consolidated financial position, results of operations or cash flows.

Management does not believe that any other recently issued, but not yet effective accounting pronouncements, if adopted, would have a material effect on the accompanying financial statements.

NOTE 2 STOCKHOLDERS’ EQUITY (DEFICIT)

On March 30, 2009, the Company effectuated a 1 for 3.5 reverse stock split of its outstanding shares of common stock. All share and per share amounts in these financial statements have been adjusted to give retroactive effect to the reverse stock split.

On June 18, 2009, the majority shareholder contributed \$35,000 to the Company for working capital.

NOTE 3 CONCENTRATION OF RISK

For the nine months ended September 30, 2008, four unrelated customers (High Impact Litigation (11.81%), the Visual Advantage (9.45%), Legal Wizard (10.66%), and Trial Exhibits, Inc. (65.72%) comprised 97.64% of total revenues

NOTE 4 SUBSEQUENT EVENTS

The Company has evaluated all events that occurred after the balance sheet date through November 13, 2009, the date when the financial statements were issued. The Management of the Company determined that there were no reportable events that occurred during that subsequent period to be disclosed or recorded.

12

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

Information set forth herein contains "forward-looking statements" which can be identified by the use of forward-looking terminology such as "believes," "expects," "may," "should" or "anticipates" or the negative thereof or other variations thereon or comparable terminology, or by discussions of strategy. We cannot assure you that the future results covered by the forward-looking statements will be achieved. We caution readers that important factors may affect our actual results and could cause such results to differ materially from forward-looking statements made by or on behalf of us. These factors include our lack of historically profitable operations, dependence on key personnel, the success of our business, our ability to manage anticipated growth and other factors identified in our filings with the U.S. Securities and Exchange Commission, press releases and/or other public communications.

The following discussion and analysis provides information which our management believes to be relevant to an assessment and understanding of our results of operations and financial condition. This discussion should be read together with our financial statements and the notes to financial statements, which are included in this report. Because of the nature of a relatively new and growing company such as ours, the reported results will not necessarily reflect the future.

Operations

We were founded as an unincorporated business in January 2004 and became a C corporation in the state of Nevada on February 1, 2005. At September 30, 2009, we had one employee, Justin Craig, our founder and president. Mr. Craig devotes his full time to us.

We are a digital medical illustrator and animator providing digital displays and enhancements to companies that assist attorneys to prepare or enhance exhibits for trials involving medical issues. Approximately 85% of our work is ultimately used by plaintiff counsel and 15% is used by defense counsel.

Our customers are almost always companies that assist attorneys to prepare or enhance a wide range of exhibits for trials. We perform the digital medical imaging that is needed by these companies. There are a limited number of these companies.

Customers originally hear of our services from word of mouth. Generally, they continue with us and expand or decrease the amount of work that they send to us based on the quality and timing of our output. We retain rights to the digital images that we produce. These digital images form a library for us. We can sell some of these digital images to users who need generic types of images for their purposes. This enables us to generate revenue without doing additional work. The longer that we are in operation, the larger our library becomes.

Edgar Filing: Medical Design Studios, Inc. - Form 10-Q

Comparison of the Nine Months ended September 30, 2009 and 2008

A summary of operations follows:

	2009	2008
Revenue	\$ 112,238	\$ 129,875
Operating Expenses:		
Selling, general and administrative	44,824	45,951
Compensation	67,931	88,273
Total operating expenses	112,755	134,224
Loss from operations	(517)	(4,349)
Other income:		
Recovery of bad debt	10,000	-
	10,000	-
Income (loss) before income taxes	\$ 9,483	\$ (4,349)

Revenue – For the nine months ended September 30, 2008, four unrelated customers (High Impact Litigation (11.81%), The Visual Advantage (9.45%), Legal Wizard (10.66%), and Trial Exhibits, Inc. (65.72%)) comprised 97.64% of total revenues.

Compensation relates entirely to Justin Craig.

Selling, general and administrative consist of:

	2009	2008
Automobile	\$ 1,384	\$ 759
Computer supplies	2,183	1,309
Depreciation	5,248	5,454
Dues	518	220
Employee benefits	19,662	9,418
Entertainment	583	692
Internet expenses	390	260
Office expense	7,073	3,000
Outside services	1,800	8,098
Rent	3,600	2,400
Repairs and maintenance	246	1,043
Salaries	-	1,200
Taxes	138	92
Telephone	1,587	818
Travel	412	1,188
Bad debts		10,000
Total	\$ 44,824	\$ 45,951

Other

As a corporate policy, we will not incur any cash obligations that we cannot satisfy with known resources, of which there are currently none except as described in "Liquidity" below. We believe that the perception that many people have of a public company make it more likely that they will accept restricted securities from a public company as consideration for indebtedness to them than they would from a private company. We have not performed any studies of this matter. Our conclusion is based on our own observations. However, we cannot assure you that we will be successful in any of those efforts even as a public entity. Additionally, issuance of restricted shares would necessarily dilute the percentage of ownership interest of our stockholders.

Liquidity

On June 18, 2009, our majority shareholder, Vision Opportunity Master Fund, Ltd., contributed \$35,000 to our capital to support our working capital needs.

Private capital, if desired, will be sought from former business associates of our founder or private investors referred to us by those business associates. To date, we have not sought any funding source and have not authorized any person or entity to seek out funding on our behalf. If a market for our shares ever develops, of which we cannot assure you, we may use restricted shares of our common stock to compensate employees/consultants and independent contractors wherever possible. We believe that operations are generating sufficient cash to continue operations for the next 12 months provided that our costs of being a public company remain equal to or below the maximum estimate provided below.

In becoming a public company, we have incurred and will continue to incur additional significant expenses for legal, accounting and related services. As a public entity, subject to the reporting requirements of the Securities Exchange Act of 1934, we incur ongoing expenses associated with professional fees for accounting, legal and a host of other expenses for annual reports and proxy statements. We estimate that these costs will range up to \$50,000 per year for the next few years and will be higher if our business volume and activity increases but lower during the first year of being public because our overall business volume will be lower, and we will not yet be subject to all the requirements of Section 404 of the Sarbanes-Oxley Act of 2002. These obligations will reduce our ability and resources to fund other aspects of our business. We hope to be able to use our status as a public company to increase our ability to use noncash means of settling obligations and compensate independent contractors who provide professional services to us, although we cannot assure you that we will be successful in any of those efforts. We will reduce the compensation levels paid to management if there is insufficient cash generated from operations to satisfy these costs.

We hope to be able to use our status as a public company to enable us to use non-cash means of settling obligations and compensate persons and/or firms providing services or products to us, although we cannot assure you that we will be successful in any of those efforts. We believe that the perception that many people have of a public company makes it more likely that they will accept restricted securities from a public company as consideration for indebtedness to them than they would from a private company. We have not performed any studies of this matter.

Our conclusion is based on our own beliefs. Issuing shares of our common stock to such persons instead of paying cash to them would increase our chances to expand our business. Having shares of our common stock may also give such persons a greater feeling of identity with us which may result in referrals. However, these actions, if successful, will result in dilution of the ownership interests of existing stockholders, may further dilute common stock book value, and that dilution may be material. Such issuances may also serve to enhance our existing management's ability to maintain control of our company because the shares may be issued to parties or entities committed to supporting existing management.

As part of our overall plan to augment financial resources and consider other attractive business opportunities, our principal shareholders have entered into discussions with unnamed, unaffiliated third parties with respect to a potential merger transaction which could result in the discontinuance of our current operations, change of control/ownership and new management. There can be no assurance that a merger or other significant transaction will be consummated with any such third parties or, if consummated, that we or our shareholders would realize any benefits from it.

Off Balance Sheet Arrangements

We have no off balance sheet arrangements as defined in Item 303(a)(4)(ii) of Regulation S-K, obligations under any guarantee contracts or contingent obligations. We also have no other commitments, other than the costs of being a public company that will increase our operating costs or cash requirements in the future.

Seasonality

We have not noted a significant seasonal impact in our business.

Recent Accounting Pronouncements

In June 2003, the U.S. Securities and Exchange Commission adopted final rules under Section 404 of the Sarbanes-Oxley Act of 2002, as amended by SEC Release No. 33-9072 on October 13, 2009. Commencing with our annual report for the year ended December 31, 2010, we will be required to include a report of management on our internal control over financial reporting. The internal control report must include a statement.

§ of management's responsibility for establishing and maintaining adequate internal control over our financial reporting;

§ of management's assessment of the effectiveness of our internal control over financial reporting as of year end; and

§ of the framework used by management to evaluate the effectiveness of our internal control over financial reporting.

Furthermore, in the following fiscal year, management is required to file the registered accounting firm's attestation report separately on our internal control over financial reporting on whether it believes that we have maintained, in all material respects, effective internal control over financial reporting.

In June 2009, the FASB approved the "FASB Accounting Standards Codification" (the "Codification") as the single source of authoritative nongovernmental U.S. GAAP to be launched on July 1, 2009. The Codification does not change current U.S. GAAP, but is intended to simplify user access to all authoritative U.S. GAAP by providing all the authoritative literature related to a particular topic in one place. All existing accounting standard documents will be superseded and all other accounting literature not included in the Codification will be considered non-authoritative. The Codification is effective for interim and annual periods ending after September 15, 2009. The adoption did not have a material impact on the Company's financial position, results of operations or cash flows.

In August 2009, the FASB issued the FASB Accounting Standards Update No. 2009-04 "Accounting for Redeemable Equity Instruments - Amendment to Section 480-10-S99" which represents an update to section 480-10-S99, distinguishing liabilities from equity, per EITF Topic D-98, Classification and Measurement of Redeemable Securities. The Company does not expect the adoption of this update to have a material impact on its consolidated financial position, results of operations or cash flows.

In August 2009, the FASB issued the FASB Accounting Standards Update No. 2009-05 "Fair Value Measurement and Disclosures Topic 820 – Measuring Liabilities at Fair Value", which provides amendments to subtopic 820-10, Fair Value Measurements and Disclosures – Overall, for the fair value measurement of liabilities. This Update provides clarification that in circumstances in which a quoted price in an active market for the identical liability is not available, a reporting entity is required to measure fair value using one or more of the following techniques: 1. A valuation technique that uses: a. The quoted price of the identical liability when traded as an asset b. Quoted prices for similar liabilities or similar liabilities when traded as assets. 2. Another valuation technique that is consistent with the principles of topic 820; two examples would be an income approach, such as a present value technique, or a market approach, such as a technique that is based on the amount at the measurement date that the reporting entity would pay to transfer the identical liability or would receive to enter into the identical liability. The amendments in this Update also clarify that when estimating the fair value of a liability, a reporting entity is not required to include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of the liability. The amendments in this Update also clarify that both a quoted price in an active market for the identical liability when traded as an asset in an active market when no adjustments to the quoted price of the asset are required are Level 1 fair value measurements. The Company does not expect the adoption of this update to have a material impact on its consolidated financial position, results of operations or cash flows.

In September 2009, the FASB issued the FASB Accounting Standards Update No. 2009-08 "Earnings Per Share – Amendments to Section 260-10-S99", which represents technical corrections to topic 260-10-S99, Earnings per share, based on EITF Topic D-53, Computation of Earnings Per Share for a Period that includes a Redemption or an Induced Conversion of a Portion of a Class of Preferred Stock and EITF Topic D-42, The Effect of the Calculation of Earnings per Share for the Redemption or Induced Conversion of Preferred Stock. The Company does not expect the adoption of this update to have a material impact on its consolidated financial position, results of operations or cash flows.

In September 2009, the FASB issued the FASB Accounting Standards Update No. 2009-09 “Accounting for Investments-Equity Method and Joint Ventures and Accounting for Equity-Based Payments to Non-Employees”. This Update represents a correction to Section 323-10-S99-4, Accounting by an Investor for Stock-Based Compensation Granted to Employees of an Equity Method Investee. Additionally, it adds observer comment Accounting Recognition for Certain Transactions Involving Equity Instruments Granted to Other Than Employees to the Codification. The Company does not expect the adoption to have a material impact on its consolidated financial position, results of operations or cash flows.

In September 2009, the FASB issued the FASB Accounting Standards Update No. 2009-12 “Fair Value Measurements and Disclosures Topic 820 – Investment in Certain Entities That Calculate Net Assets Value Per Share (or Its Equivalent)”, which provides amendments to Subtopic 820-10, Fair Value Measurements and Disclosures-Overall, for the fair value measurement of investments in certain entities that calculate net asset value per share (or its equivalent). The amendments in this Update permit, as a practical expedient, a reporting entity to measure the fair value of an investment that is within the scope of the amendments in this Update on the basis of the net asset value per share of the investment (or its equivalent) if the net asset value of the investment (or its equivalent) is calculated in a manner consistent with the measurement principles of Topic 946 as of the reporting entity’s measurement date, including measurement of all or substantially all of the underlying investments of the investee in accordance with Topic 820. The amendments in this Update also require disclosures by major category of investment about the attributes of investments within the scope of the amendments in this Update, such as the nature of any restrictions on the investor’s ability to redeem its investments at the measurement date, any unfunded commitments (for example, a contractual commitment by the investor to invest a specified amount of additional capital at a future date to fund investments that will be made by the investee), and the investment strategies of the investees. The major category of investment is required to be determined on the basis of the nature and risks of the investment in a manner consistent with the guidance for major security types in U.S. GAAP on investments in debt and equity securities in paragraph 320-10-50-1B. The disclosures are required for all investments within the scope of the amendments in this Update regardless of whether the fair value of the investment is measured using the practical expedient. The Company does not expect the adoption to have a material impact on its consolidated financial position, results of operations or cash flows.

Management does not believe that any other recently issued, but not yet effective accounting pronouncements, if adopted, would have a material effect on the accompanying consolidated financial statements.

Critical Accounting Policies

The preparation of financial statements and related notes requires us to make judgments, estimates, and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities.

An accounting policy is considered to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, and if different estimates that reasonably could have been used, or changes in the accounting estimates that are reasonably likely to occur periodically, could materially impact the financial statements.

Financial Reporting Release No. 60 requires all companies to include a discussion of critical accounting policies or methods used in the preparation of financial statements. There are no critical policies or decisions that rely on judgments that are based on assumptions about matters that are highly uncertain at the time the estimate is made.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not required

ITEM 4T. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures.

An evaluation was carried out under the supervision and with the participation of the our management, including our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”) (in this case the same person), of the effectiveness of our disclosure controls and procedures as of September 30, 2009. Based on that evaluation, our CEO/CFO has concluded that our disclosure controls and procedures are ineffective to provide reasonable assurance that: (i) information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including our CEO/CFO, as appropriate to allow timely decisions regarding required disclosure by us; and (ii) information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

(b) Changes in Internal Controls.

During the quarter ended September 30, 2009, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

None

ITEM 1A. RISK FACTORS
