UNIVERSAL SECURITY INSTRUMENTS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Statement of Management

The condensed consolidated financial statements include the accounts of Universal Security Instruments, Inc. (USI or the Company) and its majority owned subsidiaries. Significant inter-company accounts and transactions have been eliminated in consolidation. In the opinion of the Company's management, the interim consolidated financial statements include all adjustments, consisting of only normal recurring adjustments, necessary for a fair presentation of the results for the interim periods. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States of America have been condensed or omitted. The interim condensed consolidated financial statements should be read in conjunction with the Company's March 31, 2012 audited financial statements filed with the Securities and Exchange Commission on Form 10-K. The interim operating results are not necessarily indicative of the operating results for the full fiscal year.

Use of Estimates

The preparation of the condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America (US-GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ materially from those estimates.

Joint Venture

The Company and its co-venturer, a Hong Kong corporation, each owns a 50% interest in a Hong Kong joint venture, Eyston Company Limited (the "Joint Venture"), that has manufacturing facilities in the People's Republic of China, for the manufacturing of security products. The following represents summarized balance sheet and income statement information of the Joint Venture as of and for the three months ended June 30, 2012 and 2011:

	2012	2011
Net sales	\$5,398,549	\$6,196,059
Gross profit	1,331,734	1,590,785
Net income	166,819	666,827
Total current assets	14,248,158	15,647,398
Total assets	33,001,260	33,092,428
Total current liabilities	4,112,479	4,453,568

During the three months ended June 30, 2012 and 2011, respectively, the Company purchased \$2,544,466 and \$2,550,055 of products from the Joint Venture. For the three month period ended June 30, 2012 and 2011, respectively, the Company has adjusted its earnings of the Joint Venture to reflect an increase of \$129,663 and an increase of \$106,035, respectively, to eliminate inter-Company profit in inventory

Income Taxes

We calculate our interim tax provision in accordance with the guidance for accounting for income taxes in interim periods. At the end of each interim period, we estimate the annual effective tax rate and apply that tax rate to our ordinary quarterly pre-tax income. The tax expense or benefit related to significant, unusual or extraordinary discrete events during the interim period is recognized in the interim period in which those events occurred. In addition, the effect of changes in enacted tax laws or rates or tax status is recognized in the interim period in which the change occurs.

The Company recognizes a liability or asset for the deferred tax consequences of temporary differences between the tax basis of assets or liabilities and their reported amounts in the financial statements. These temporary differences will result in taxable or deductible amounts in future years when the reported amounts of the assets or liabilities are recovered or settled. The deferred tax assets are reviewed periodically for recoverability and valuation allowances are provided, whenever it is more likely than not that a deferred tax asset will not be realized. The Company follows the financial pronouncement that gives guidance related to the recognition and measurement of a tax position taken or expected to be taken in a tax return and requires that we recognize in our financial statements the impact of a tax position, if that position is more likely than not to be sustained upon an examination, based on the technical merits of the position. Interest and penalties related to income tax matters are recorded as income tax expenses.

Financing Receivables

Management considers amounts due from the Company's factor to be "financing receivables". Trade accounts receivable, other receivables, and receivables from our Hong Kong Joint Venture are not considered by management to be financing receivables.

The Company sells the majority of its short-term receivables arising in the ordinary course of business to our factor. At the time a receivable is sold to our factor the credit risk associated with the credit worthiness of the debtor is assumed by the factor. The Company continues to bear any credit risk associated with delivery or warranty issues related to the products sold.

Management assesses the credit risk of both its trade accounts receivable and its financing receivables based on the specific identification of accounts that have exceeded credit terms. An allowance for uncollectible receivables is provided based on that assessment. Changes in the allowance account from one accounting period to the next are charged to operations in the period the change is determined. Amounts ultimately determined to be uncollectible are eliminated from the receivable accounts and from the allowance account in the period that the receivables' status is determined to be uncollectible.

Based on the nature of the factoring agreement and prior experience, no allowance for uncollectible financing receivables has been provided. At June 30, 2012, an allowance of \$75,000 has been provided for uncollectible trade accounts receivable.

Insurance Receivable

In June 2012, a railroad shipping accident resulted in the total loss of one shipping container of the Company's products. The Company has submitted a claim to its insurance carrier for the selling price of the goods lost. At June 30, 2012, the Company relieved inventory and recorded an insurance receivable for the cost of the goods lost. An insurance gain will be recorded at the time the ultimate amount is received from the insurance carrier.

Net Income per Common Share

Basic earnings per common share are computed based on the weighted average number of common shares outstanding during the periods presented. Diluted earnings per common share is computed based on the weighted average number of common shares outstanding plus the effect of stock options and other potentially dilutive common stock equivalents. The dilutive effect of stock options and other potentially dilutive common stock equivalents is determined using the treasury stock method based on the Company's average stock price.

Diluted income per common share for the three months ended June 30, 2012 excludes 97,000 shares issuable upon the exercise of outstanding "out-of-the-money" stock options and 25,000 shares issuable upon the exercise of "in-the-money" stock options as their impact on our net loss is anti-dilutive. As a result, basic and diluted weighted average common shares outstanding are identical for the three month period ended June 30, 2012. A reconciliation of the weighted average shares of common stock utilized in the computation of basic and diluted earnings per share for the three month periods ended June 30, 2012 and 2011, is as follows:

	Three Months Ended June 30,	
	2012	2011
Weighted average number of common shares outstanding for basic EPS	2,326,662	2,387,887
Shares issued upon the assumed exercise of outstanding stock options	-	8,541
Weighted average number of common and common equivalent shares outstanding for diluted EPS	2,326,662	2,396,428

Shareholders' Equity

Stock Repurchase Program. In October 2011, the Company announced a stock buyback program and authorized the purchase of up to 100,000 shares of common stock. Shares may be purchased from time to time under this program in the open market, through block trades and/or in negotiated transactions.

From inception through June 30, 2012, a total of 63,138 shares were repurchased at an average price of \$5.40 per share.

Stock Options. In October 2011, the shareholders approved the Company's 2011 Non-Qualified Stock Option Plan (the "Plan"). Under the terms of the Plan, 120,000 shares are reserved for the granting of stock options, of which 97,000 have been issued as of June 30, 2012. Under the provisions of the Plan, a committee of the Board of Directors determines the option price and the dates exercisable. During December 2011, ninety-seven thousand (97,000) options were granted at an option price of \$5.51 per share. The grant date fair value of the options approximated \$171,000. Fifty percent of the options vest one year after issuance, with the remaining fifty percent vesting twenty-three months after issuance. The fair value of each stock option was estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions; no annual dividends, expected volatility of 57.7%, risk-free interest rate of 0.3% and expected lives of two years used for options granted during the fiscal year ended March 31, 2012.

In addition, in March 2009, 25,000 options were granted at \$3.25 for restricted shares of the Company's common stock. These options are fully vested with a right to exercise until March 2014.

For the period ended June 30, 2012, we recorded \$22,234 of stock-based compensation cost as general and administrative expense in our statement of operations. No forfeitures have been estimated.

As of June 30, 2012, the unrecognized compensation cost related to share-based compensation arrangements that we expect to vest is \$122,285 that will be recognized over the remaining period of eighteen months as the options vest. The aggregate intrinsic value of currently exercisable options was approximately \$46,000 at June 30, 2012.

Contingencies

From time to time, the Company is involved in various lawsuits and legal matters. It is the opinion of management, based on the advice of legal counsel, that the ultimate outcome of these matters will not have a material adverse effect on the Company's financial statements.

Recent Accounting Pronouncements Not Yet Adopted

Changes to accounting principles generally accepted in the United States of America (U.S. GAAP) are established by the Financial Accounting Standards Board (FASB) in the form of accounting standards updated (ASU's) to the FASB's Accounting Standards Codification.

The Company considers the applicability and impact of all ASU's. Recently issued ASU's were evaluated and determined to be either not applicable or are not expected to have a material impact on our consolidated financial statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

As used throughout this Report, "we," "our," "the Company" "USI" and similar words refers to Universal Security Instruments, Inc.

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains certain forward-looking statements reflecting our current expectations with respect to our operations, performance, financial condition, and other developments. These forward-looking statements may generally be identified by the use of the words "may", "will", "believes", "should", "expects", "anticipates", "estimates", and similar expressions. These statements are necessarily estimates reflecting management's best judgment based upon current information and involve a number of risks and uncertainties. We caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made, and readers are advised that various factors could affect our financial performance and could cause our actual results for future periods to differ materially from those anticipated or projected. While it is impossible to identify all such factors, such factors include, but are not limited to, those risks identified in our periodic reports filed with the Securities and Exchange Commission, including our most recent Annual Report on Form 10-K.

overview

We are in the business of marketing and distributing safety and security products which are primarily manufactured through our 50%-owned Hong Kong Joint Venture. Our financial statements detail our sales and other operational results only, and report the financial results of the Hong Kong Joint Venture using the equity method. Accordingly, the following discussion and analysis of the three month periods ended June 30, 2012 and 2011 relate to the operational results of the Company. A discussion and analysis of the Hong Kong Joint Venture's operational results for these periods is presented below under the heading "Joint Venture."

The Company has developed new products based on new smoke and gas detection technologies, with what the Company believes are improved sensing technology and product features. The Company has applied for patents for these new products.

Results of Operations

Three Months Ended June 30, 2012 and 2011

Sales. Net sales for the three months ended June 30, 2012 were \$3,059,352 compared to \$3,201,302 for the comparable three months in the prior fiscal year, a decrease of \$141,950 (4.43%). The primary reason for the decrease in net sales volumes is the timing of orders received from customers.

Gross Profit Margin. Gross profit margin is calculated as net sales less cost of goods sold expressed as a percentage of net sales. Our gross profit margin was 32.0% and 27.3% of sales for the quarters ended June 30, 2012 and 2011, respectively. The increase in gross profit margin was primarily due to higher margins realized on sales of our next generation of products.

Expenses. Research and development expenses decreased from the comparable three months in the prior year, primarily due to the timing of expense incurred with testing facilities working on new products.

Selling, general and administrative expenses increased by \$258,529 from the comparable three months in the prior year. The increase in the dollar amount of these expenses was principally due to increased expenditures associated with advertising and promotion of our next generation of products of approximately \$202,000. As a percentage of net sales, these expenses increased to 44.5% for the three month period ended June 30, 2012 from 34.4% for the 2011 period. The increase in costs as a percentage was primarily due to those items discussed above.

Interest Expense and Income. Interest income was \$9,647 for the quarter ended June 30, 2012, compared to net interest income of \$5,174 for the quarter ended June 30, 2011. The increase in interest income, net of interest expense, is due to a decrease in interest expense paid to our factor.

Income Taxes. During the quarter ended June 30, 2012, the Company generated a net income tax benefit of \$181,734. For the corresponding 2011 period, the Company generated net income tax benefit of \$127,428. The provision for income taxes for the quarter ended June 30, 2012, as compared to the same quarter in the prior year, is determined principally by the loss from operations and the amount and timing of the unrealized earnings of and the payment of dividends by the Hong Kong Joint Venture. The income tax benefit for the three months ended June 30, 2012 and 2011 is derived from the estimated taxes resulting from the sum of taxable results from operations plus dividends received from the Hong Kong Joint Venture, less the benefit derived, if any, from the utilization of net operating losses available.

Net Income. We reported a net loss of \$362,588 for the quarter ended June 30, 2012, compared to net income of \$581 for the corresponding quarter of the prior fiscal year, a \$363,169 decrease. The reason for the decrease in net income is principally due to reduced earnings of the Joint Venture and increased expenditures for advertising and promotion of our next generation of new products.

Financial Condition and Liquidity

The Company has a Factoring Agreement with CIT Group, Inc. (CIT) which supplies both short-term borrowings and letters of credit to finance foreign inventory purchases. The maximum amount available under the Factoring Agreement is currently \$1,000,000. Based on specified percentages of our accounts receivable and inventory and letter of credit commitments, as of June 30, 2012 we had a borrowing availability of \$1,000,000 under the Factoring Agreement. We had no borrowings on the debt portion of the agreement as of June 30, 2012. The interest rate under the Factoring Agreement on the uncollected factored accounts receivable and any additional borrowings is equal to the prime rate of interest charged by our lender. At June 30, 2012, the prime rate was 3.25%. Borrowings are collateralized by all of our accounts receivable and inventory. The Company does not anticipate any changes in its ability to maintain its short-term or long-term liquidity.

Our factored accounts receivable as of the end of our last fiscal year was \$1,719,731, and was \$1,896,144 as of June 30, 2012. Our prepaid expenses as of the end of our last fiscal year were \$599,876, and were \$532,538 as of June 30, 2012.

Operating activities used cash of \$317,961 for the three months ended June 30, 2012. This was primarily due to an increase in inventories and prepaid expenses of \$170,472, an increase in accounts receivable and amounts due from factor of \$53,802, offset by an increase in accounts payable and accrued expenses of \$360,529 and the loss of the Joint Venture of \$14,052. For the same period last year, operating activities used cash of \$1,473,853, primarily as a result of increases in inventory and prepaid expenses and a decrease in accounts payable and accrued expenses.

Investing activities used cash of \$8,704 during the three months ended June 30, 2012, as a result of the purchase of assets. For the same period last year, investing activities used cash of \$1,125, primarily related to the purchase of assets held for investment.

Financing activities used cash in the current fiscal period for the repurchase of the Company's common stock.

We believe that funds available under the Factoring Agreement, distributions from the Joint Venture, and our line of credit facilities provide us with sufficient resources to meet our requirements for liquidity and working capital.

Joint Venture

Net Sales. Net sales of the Joint Venture for the three months ended June 30, 2012 were \$5,398,549, compared to \$6,196,059, for the comparable period in the prior fiscal year. The decrease in net sales by the Joint Venture for the three month period was due to lower volumes of sales of smoke alarm products to non-affiliated customers in Europe.

Gross Margins. Gross margins of the Joint Venture for the three month period ended June 30, 2012 decreased to 24.7% from 25.7% for the 2011 corresponding period. The lower gross margins for the 2012 period was due to product mix of the Joint Venture's sales; since gross margins depend on sales volume of various products, with varying margins, lower sales of higher margin products and increased sales of lower margin products affect the overall gross margins.

Expenses. Selling, general and administrative expenses were \$1,186,151, for the three month period ended June 30, 2012, compared to \$1,030,078 in the prior year's respective periods. As a percentage of sales, expenses were 22.0% for the three month period ended June 30, 2012, compared to 16.6% for the three month period ended June 30, 2011. The increase in selling, general and administrative expenses, as a percent of sales, was primarily due to fixed costs that do not change in the same proportion as the reduction in sales.

Interest Income and Expense. Net interest income on assets held for investment was \$112,893 and \$100,586 for the three month period ended June 30, 2012 and 2011, respectively.

Net Income. For the reasons stated above, net income for the three months ended June 30, 2012 was \$166,819, compared to net income of \$666,827, in the comparable period last year.

Liquidity. Cash needs of the Joint Venture are currently met by funds generated from operations. During the three months ended June 30, 2012, working capital decreased by \$356,828 from \$10,492,507 on March 31, 2012 to \$10,135,679 on June 30, 2012.

Critical Accounting Policies

Management's discussion and analysis of our consolidated financial statements and results of operations are based on our Condensed Consolidated Financial Statements included as part of this document. The preparation of these consolidated financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. On an ongoing basis, we evaluate these estimates, including those related to bad debts, inventories, income taxes, and contingencies and litigation. We base these estimates on historical experiences, future projections and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily available from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect management's more significant judgments and estimates used in the preparation of its consolidated financial statements. For a detailed discussion on the application on these and other accounting policies, see Note A to the consolidated financial statements included in Item 8 of the Form 10-K for the year ended March 31, 2012. Certain of our accounting policies require the application of significant judgment by management in selecting the appropriate assumptions for calculating financial estimates. By their nature, these judgments are subject to an inherent degree of uncertainty and actual results could differ from these estimates. These judgments are based on our historical experience, terms of existing contracts, current economic trends in the industry, information provided by our customers, and information available from outside sources, as appropriate. Our

critical accounting policies include:

Revenue Recognition. We recognize sales upon shipment of products net of applicable provisions for any discounts or allowances. The shipping date from our warehouse is the appropriate point of revenue recognition since upon shipment we have substantially completed our obligations which entitle us to receive the benefits represented by the revenues, and the shipping date provides a consistent point within our control to measure revenue. Customers may not return, exchange or refuse acceptance of goods without our approval. We have established allowances to cover anticipated doubtful accounts based upon historical experience.

Inventories. Inventories are valued at the lower of cost or market. Cost is determined on the first-in first-out method. We have recorded a reserve for obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. Management reviews and updates the reserve quarterly.

Income Taxes. The Company recognizes a liability or asset for the deferred tax consequences of temporary differences between the tax basis of assets or liabilities and their reported amounts in the financial statements. These temporary differences will result in taxable or deductible amounts in future years when the reported amounts of the assets or liabilities are recovered or settled. The deferred tax assets are reviewed periodically for recoverability and valuation allowances are provided, whenever it is more likely than not that a deferred tax asset will not be realized. The Company follows the financial pronouncement that gives guidance related to the financial statement of recognition and measurement of a tax position taken or expected to be taken in a tax return and requires that we recognize in our financial statements the impact of a tax position, if that position is more likely than not to be sustained upon an examination, based on the technical merits of the position. Interest and penalties related to income tax matters are recorded as income tax expenses.

Financing Receivables. Management considers amounts due from the Company's factor to be "financing receivables". Trade accounts receivable, other receivables, and receivables from our Hong Kong Joint Venture are not considered by management to be financing receivables.

The Company sells the majority of its short-term receivables arising in the ordinary course of business to our factor. At the time a receivable is sold to our factor the credit risk associated with the credit worthiness of the debtor is assumed by the factor. The Company continues to bear any credit risk associated with delivery or warranty issues related to the products sold.

Management assesses the credit risk of both its trade accounts receivable and its financing receivables based on the specific identification of accounts that have exceeded credit terms. An allowance for uncollectible receivables is provided based on that assessment. Changes in the allowance account from one accounting period to the next are charged to operations in the period the change is determined. Amounts ultimately determined to be uncollectible are eliminated from the receivable accounts and from the allowance account in the period that the receivables' status is determined to be uncollectible.

Based on the nature of the factoring agreement and prior experience, no allowance for uncollectible financing receivables has been provided. At June 30, 2012, an allowance of \$75,000 has been provided for uncollectible trade accounts receivable.

Contingencies. From time to time, we are subject to lawsuits and other claims, related to patents and other matters. Management is required to assess the likelihood of any adverse judgments or outcomes to these matters, as well as potential ranges of probable losses. A determination of the amount of reserves required, if any, for these contingencies is based on a careful analysis of each individual issue with the assistance of outside legal counsel. It is the opinion of management, based on advice of legal counsel, that the ultimate outcome of these matters will not have a material adverse effect on the Company's financial statements.

Warranties. We generally provide warranties from one to ten years to the non-commercial end user on all products sold. The manufacturers of our products provide us with a one-year warranty on all products we purchase for resale. Claims for warranty replacement of products beyond the one-year warranty period covered by the manufacturers are immaterial and we do not record estimated warranty expense or a contingent liability for warranty claims.

recent accounting pronouncements not yet adopted

Changes to accounting principles generally accepted in the United States of America (U.S. GAAP) are established by the Financial Accounting Standards Board (FASB) in the form of accounting standards updated (ASU's) to the FASB's Accounting Standards Codification.

We consider the applicability and impact of all ASU's. Recently issued ASU's were evaluated and determined to be either not applicable or are not expected to have a material impact on our consolidated financial statements.

ITEM 4. CONTROLS AND PROCEDURES

We maintain a system of disclosure controls and procedures that is designed to provide reasonable assurance that information, which is required to be disclosed by us in the reports that we file or submit under the Securities and Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and is accumulated and communicated to management in a timely manner. Our Chief Executive Officer and Chief Financial Officer have evaluated this system of disclosure controls and procedures as of the end of the period covered by this quarterly report, and have concluded that the system is effective. There have been no changes in our internal control over financial reporting during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION**ITEM 1. LEGAL PROCEEDINGS**

From time to time, the Company is involved in various lawsuits and legal matters. It is the opinion of management, based on the advice of legal counsel, that these matters will not have a material adverse effect on the Company's financial statements.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table sets forth information with respect to purchases of common stock by the Company or any affiliated purchasers during the three months ended June 30, 2012:

Period	Total Number of Shares <u>Purchased</u>	Average Price Paid per <u>Share</u>	Total Number of Shares Purchased As Part of Publicly Announced Plans <u>Or Programs</u>	Maximum Number of Shares that May Yet be Purchased Under the Plans or <u>Programs</u>
April 2012	11,605	\$ 5.37	11,605	36,862
Total	11,605	\$ 5.37	11,605	36,862

In October 2011, the Company announced a stock buyback program and authorized the purchase of up to 100,000 shares of common stock. Shares may be purchased from time to time under this program in the open market, through block trades and/or in negotiated transactions. The program will terminate when 100,000 shares of common stock have been repurchased by the Company pursuant to the program (unless increased or decreased by the Board of Directors).

ITEM 6. EXHIBITSExhibit No.

- 3.1 Articles of Incorporation (incorporated by reference to the Company's Quarterly Report on Form 10-Q for the period ended December 31, 1988, File No. 1-31747)
- 3.2 Articles Supplementary, filed October 14, 2003 (incorporated by reference to Exhibit 3.1 to the Company's Current Report on Form 8-K filed October 31, 2002, file No. 1-31747)

- 3.3 Bylaws, as amended (incorporated by reference to Exhibit 3.3 to the Company's Current Report on Form 8-K filed July 13, 2011, File No. 1-31747)
- 10.1 2011 Non-Qualified Stock Option Plan (incorporated by reference to the Company's Proxy Statement with respect to the Company's 2011 Annual Meeting of Shareholders, filed July 26, 2011, File No. 1-31747)
