Notes to Unaudited Condensed Consolidated Financial Statements

Note 1 - Basis of Presentation

The accompanying condensed consolidated financial statements are unaudited but in the opinion of management contain all the adjustments (consisting of those of a normal recurring nature) considered necessary to present fairly the consolidated financial position and the consolidated results of operations and consolidated cash flows for the periods presented in conformity with generally accepted accounting principles for interim consolidated financial information and the instructions to Form 10-Q and Article 8 of Regulation S-X. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. Operating results for the three and six months ended June 30, 2012 are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2012. It is suggested that these condensed financial statements be read in conjunction with the consolidated financial statements and notes thereto included in the Company's annual report on Form 10-K for the fiscal year ended December 31, 2011.

Principles of consolidation and nature of operations:

The condensed consolidated financial statements include the accounts of CTI Industries Corporation and its wholly-owned subsidiaries, CTI Balloons Limited, CTI Helium, Inc. and CTF International S.A. de C.V., its majority-owned subsidiaries CTI Mexico S.A. de C.V., Flexo Universal, S.A. de C.V. and CTI Europe gmbH, as well as the accounts of Venture Leasing S. A. de R. L. and Venture Leasing L.L.C (the "Company"). The last two entities have been consolidated as variable interest entities. All significant intercompany transactions and accounts have been eliminated in consolidation. The Company (i) designs, manufactures and distributes balloon products throughout the world and (ii) operates systems for the production, lamination, coating and printing of films used for food packaging and other commercial uses and for conversion of films to flexible packaging containers and other products.

Variable Interest Entities ("VIE's"):

The determination of whether or not to consolidate a variable interest entity under U.S. GAAP requires a significant amount of judgment concerning the degree of control over an entity by its holders of variable interest. To make these judgments, management has conducted an analysis of the relationship of the holders of variable interest to each other, the design of the entity, the expected operations of the entity, which holder of variable interests is most "closely associated" to the entity and which holder of variable interests is the primary beneficiary required to consolidate the

entity. Upon the occurrence of certain events, management reviews and reconsiders its previous conclusion regarding the status of an entity as a variable interest entity. Upon the adoption of amended accounting guidance applicable to variable interest entities on January 1, 2010, management continually reconsiders whether the Company is deemed to be a variable interest entity's primary beneficiary who consolidates such entity. There are two entities that have been consolidated as variable interest entities.

Use of estimates:

In preparing condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amount of revenue and expenses during the reporting period in the condensed consolidated financial statements and accompanying notes. Actual results may differ from those estimates. The Company's significant estimates include reserves for doubtful accounts, reserves for the lower of cost or market of inventory, reserves for deferred tax assets and recovery value of goodwill.

Earnings per share:

Basic earnings per share is computed by dividing net income by the weighted average number of shares of common stock outstanding during each period.

Diluted earnings per share is computed by dividing the net income by the weighted average number of shares of common stock and equivalents (stock options and warrants), unless anti-dilutive, during each period.

As of June 30, 2012 and 2011, shares to be issued upon the exercise of options aggregated 148,000 and 206,000, respectively. The number of anti-dilutive shares (not included in the determination of earnings on a diluted basis) for the three and six months ended June 30, 2012 and 2011, were 83,000 and 81,500, respectively, all of which were represented by options.

New Accounting Pronouncements:

The Company's significant accounting policies are summarized in Note 2 of the Company's consolidated financial statements for the year ended December 31, 2011. There were no significant changes to these accounting policies during the three and six months ended June 30, 2012.

In June 2011, the Financial Accounting Standards Board (FASB) issued an amendment on the presentation of other comprehensive income. Under this amendment, entities will be required to present the total of comprehensive income,

the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or two separate but consecutive statements. The current option to report other comprehensive income and its components in the statement of changes in equity has been eliminated. This amendment was effective for the Company for interim periods beginning after December 15, 2011, and retrospective application is required. The Company adopted this guidance in the first quarter of 2012 and has used a single continuous statement approach.

In May 2011, the FASB issued amended guidance on fair value measurement and related disclosures. The new guidance clarified the concepts applicable for fair value measurement of non-financial assets and requires the disclosure of quantitative information about the unobservable inputs used in a fair value measurement. This guidance was effective for the Company in the first quarter of 2012, and will be applied prospectively. This amendment did not have a material impact on the Company's financial statements.

In September 2011, the FASB issued Accounting Standards Update No. 2011-08 (“ASU 2011-08”) Intangibles – Goodwill and Other (Topic 350). Under ASU 2011-08, an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, an entity determines it is more likely than not that the fair value of a reporting unit is greater than its carrying amount, then performing the two-step impairment test is unnecessary. However, if an entity concludes otherwise, then it is required to perform the first step of the two-step impairment test. Under ASU 2011-08, an entity has the option to bypass the qualitative assessment for any reporting unit in any period and proceed directly to performing the first step of the two-step goodwill impairment test. An entity may resume performing the qualitative assessment in any subsequent period. ASU 2011-08 is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of ASU 2011-08 in the three and six months ended June 30, 2012 did not have a material impact on our financial statements or related disclosures.

Note 2 - Stock-Based Compensation; Changes in Equity

We have adopted Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 718 which requires all share-based payments to employees, including grants of employee stock options, to be recognized in the condensed consolidated financial statements based on their grant-date fair values.

We have applied the Black-Scholes model to value stock-based awards. That model incorporates various assumptions in the valuation of stock-based awards relating to the risk-free rate of interest to be applied, the estimated dividend yield and expected volatility of our common stock. The risk-free rate of interest is the related U.S. Treasury yield curve for periods within the expected term of the option at the time of grant. The dividend yield on our common stock is estimated to be 1.14%. The expected volatility is based on historical volatility of the Company’s common stock.

The Company, at the discretion of the board, may issue options in excess of the total available, if options related to that stock plan are cancelled. In some cases, not all shares that are available to a stock plan are issued, as the Company is unable to issue options to a previous plan when a new plan is in place.

The Company’s net income for the three months ended June 30, 2012 and 2011 includes approximately \$22,000 and \$35,000, respectively of compensation costs related to share based payments. The Company’s net income for the six months ended June 30, 2012 and 2011 includes approximately \$44,000 and \$70,000, respectively of compensation costs related to share based payments. As of June 30, 2012 there is \$153,000 of unrecognized compensation expense related to non-vested stock option grants and stock grants. We expect approximately \$44,000 to be recognized over the remainder of 2012, \$59,000 to be recognized during 2013, and \$41,000 to be recognized during 2014, and \$9,000 to be recognized during 2015.

As of June 30, 2012, the Company had four stock-based compensation plans pursuant to which stock options were, or may be, granted. The Plans provide for the award of options, which may either be incentive stock options (“ISOs”) within the meaning of Section 422A of the Internal Revenue Code of 1986, as amended (the “Code”) or non-qualified options (“NQOs”) which are not subject to special tax treatment under the Code as well as for stock grants.

On April 12, 2001, the Board of Directors approved for adoption, effective December 27, 2001, the 2001 Stock Option Plan (“2001 Plan”). The 2001 Plan authorizes the grant of options to purchase up to an aggregate of 119,050, shares of the Company’s Common Stock. As of June 30, 2012, 139,958 shares (including cancelled shares re-issued under the Plan) have been granted and were fully vested at the time of grant. Options to purchase 7,500 remain outstanding.

On April 24, 2002, the Board of Directors approved for adoption, effective October 12, 2002, the 2002 Stock Option Plan (“2002 Plan”). The 2002 Plan authorizes the grant of options to purchase up to an aggregate of 142,860 shares of the Company’s Common Stock. As of June 30, 2012, 123,430 shares have been granted and were fully vested at the time of grant and 27,500 remain outstanding.

On April 30, 2007, the Board of Directors approved for adoption, effective October 1, 2007, the 2007 Stock Option Plan (“2007 Plan”). The 2007 Plan authorizes the grant of options to purchase up to an aggregate of 150,000 shares of the Company’s Common Stock. As of June 30, 2012, 165,750 options (including cancelled shares re-issued under the Plan) had been granted and 32,500 remain outstanding.

On April 10, 2009, the Board of Directors approved for adoption, and on June 5, 2009, the shareholders of the Corporation approved, a 2009 Stock Incentive Plan (“2009 Plan”). The 2009 Plan authorizes the issuance of up to 250,000 shares of stock or options to purchase stock of the Company. As of June 30, 2012, 82,000 options had been granted and 80,500 remain outstanding. During the second quarter 2012, 1,000 options were cancelled.

A summary of the Company’s stock option activity and related information is as follows:

Note 9 - Derivative Instruments; Fair Value

The following table represents information about the Company's assets and liabilities measured at fair value on a recurring basis as of June 30, 2012, and indicate the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value:

Description	Amount as of			
	6/30/2012	Level 1	Level 2	Level 3
Interest Rate Swap 2011	\$ (5,000)	\$ -	\$ (5,000)	\$ -
	\$ (5,000)	\$ -	\$ (5,000)	\$ -

The Company is exposed to certain market risks including the effect of changes in interest rates. The Company uses derivative instruments to manage financial exposures that occur in the normal course of business. It does not hold or issue derivatives for speculative trading purposes. The Company is exposed to non-performance risk from the counterparties in its derivative instruments. This risk would be limited to any unrealized gains on current positions. To help mitigate this risk, the Company transacts only with counterparties that are rated as investment grade or higher and all counterparties are monitored on a continuous basis. The fair value of the Company's derivatives reflects this credit risk.

On July 1, 2011, we entered into a swap agreement with BMO Capital Markets with respect to \$6,780,000 of our loan balances with Harris. This swap agreement limits the Company's exposure to interest rate fluctuations on the Company's floating rate loans. The swap agreement has the effect of fixing the interest rate on the loan balances covered by the swap at 4.65% per annum. The swap agreement is a derivative financial instrument and we determine and record the fair market value of the swap agreement each quarter. The value is recorded on the balance sheet of the Company and the amount of the unrealized gain or loss for each period is recorded as interest income or expense.

For the three and six months ended 2012 and 2011, sales of pouch products in these categories have been as follows:

Most of our sales of zippered pouches have been of branded products to a principal customer, although we have had limited sales of our ZipVac® pouch line as well.

During 2010, we introduced a line of open-top pouches and rolls for use with existing vacuum sealing machines which we have sold under the ZipVac® label as well as on a private label basis. In the first quarter 2012, we introduced and began to market and sell a branded line of vacuum sealing machines and associated open-top bags and rolls. We had limited initial sales of products in that line during the second quarter 2012 and those revenues are included in the revenues indicated for open-top bags or rolls. As indicated in the chart, we have experienced increasing levels of sales of this product line during the six months ended June 30, 2012.

During the six months ended June 30, 2012 revenues from the sale of latex balloons increased by 16.0% compared to the prior year period from \$4,821,000 to \$5,591,000. The increase is attributable to increased sales in Mexico by Flexo Universal, our subsidiary there, as well as increased sales to various customers in the United States.

Films. During the three months ended June 30, 2012 revenues from the sale of laminated film products decreased by 26.4% compared to the prior year period from \$1,606,000 to \$1,182,000. During the six months ended June 30, 2012 revenues from the sale of laminated film products decreased by 15.1% compared to the prior year period from \$3,350,000 to \$2,843,000. The decrease is attributable to a decrease in sales to a principal customer. Approximately 86.3% of the sales of laminated film products during the six months ended June 30, 2012 were to a principal customer.

Sales to a limited number of customers continue to represent a large percentage of our net sales. The table below illustrates the impact on sales of our top three and ten customers for the three and six months ended June 30, 2012 and 2011.

During the six months ended June 30, 2012, financing activities included payment of \$470,000 on long-term debt obligations and \$914,000 on the revolving line of credit.

Liquidity and Capital Resources. At June 30, 2012, the Company had cash balances of \$261,000 compared to cash balances of \$494,000 for the same period in 2011 and there was \$1,200,000 available to advance under the Company's revolving line of credit.

At June 30, 2012, the Company had a working capital balance of \$5,730,000 compared to a working capital balance of \$5,746,000 at December 31, 2011.

The Company's liquidity is dependent significantly on its bank financing and the Company relies on its revolving line of credit to maintain liquidity. On April 29, 2010, the Company entered into a Credit Agreement with Harris N.A. ("Harris") replacing and paying off the Company's credit line with RBS Citizens N.A. (formerly Charter One Bank). Under the Credit Agreement, Harris agreed to provide loans and credits to the Company in the aggregate maximum amount of \$14,417,000. The arrangement includes:

- i. A revolving credit up to a maximum amount of \$9,000,000 based upon a borrowing base of 85% of eligible receivables and 60% of eligible inventory (up to a maximum of \$5,000,000);
- ii. A mortgage loan in the principal amount of \$2,333,350, amortized over 25 years, the principal balance due on April 29, 2013;
- iii. A term loan in the principal amount of \$583,333 maturing in monthly principal installments of \$58,333; and
- iv. An equipment loan commitment in the amount of up to \$2,500,000 providing for loan advances from time to time until April 29, 2012 based upon 100% of the purchase price of equipment purchased, the loans to be amortized on a five year basis commencing April 29, 2012, the balance due on April 29, 2013.

The Credit Agreement includes various representations, warranties and covenants of the Company, including various financial covenants.

In connection with the Credit Agreement, the Company executed and delivered to Harris, a Term Loan Note, a Mortgage Loan Note, an Equipment Note and a Revolving Note, as well as a form of Mortgage, Security Agreement, Pledge Agreement (pursuant to which shares of capital stock of the Registrant's Mexico subsidiary were pledged as security for the loans), Patent Security Agreement and Trademark Security Agreement. Two officers and principal shareholders of the Company, John H. Schwan and Stephen M. Merrick each executed Limited Guaranties of the loans and also executed Subordination Agreements with respect to obligations of the Company to them.

On April 29, 2010, Harris advanced a total of \$11,963,518 under these loans on behalf of the Company for the pay-off of all outstanding loan and lease financing balances of the Company to RBS Citizens N.A. and RBS Asset Finance.

Under the terms of the Credit Agreement, in order to obtain advances under the revolving line of credit and the equipment loan, the Company is required to meet various financial covenants including a senior leverage ratio, fixed charge coverage ratio and tangible net worth. As of June 30, 2012, we were in compliance with these covenants.

The Credit Agreement provides that the outstanding balance of all loans under the agreement will bear interest with reference to a base rate or, at the option of the Company, with reference to an adjusted LIBOR. At June 30, 2012, the effective rate on the outstanding loan balances was 4.0%.

Edgar Filing: CTI INDUSTRIES CORP - Form 10-Q

As of June 30, 2012, the outstanding balances on the loans with Harris were: (i) revolving line of credit, \$6,243,000, (ii) mortgage loan, \$2,131,000, and (iii) equipment loan, \$1,272,000.

On July 1, 2011, we entered into a swap agreement with BMO Capital Markets with respect to \$6,780,000 of our loan balances with Harris. This swap agreement is designated as a cash flow hedge to hedge the Company's exposure to interest rate fluctuations on the Company's floating rate loans. The swap agreement has the effect of fixing the interest rate on the loan balances covered by the swap at 4.65% per annum. The swap agreement is a derivative financial instrument and we will determine and record the fair market value of the swap agreement each quarter. This value will be recorded on the balance sheet of the Company and the amount of the unrealized gain or loss for each period will be recorded as interest income or expense.

On July 17, 2012, the Company entered into Amendment Number 3 to the Credit Agreement among the Company and BMO Harris Bank N.A. ("BMO Harris") pursuant to which (i) the amount of the loan commitment on the revolver loan of BMO Harris was increased from \$9 million to \$12 million, (ii) BMO Harris consented to a transaction among the Company and BMO Private Equity (U.S.), Inc. ("BMO Equity") and (iii) the term of credit and loans to the Company provided in the Credit Agreement and BMO Harris was extended to July 17, 2017.

Also, on July 17, 2012, the Company entered into a Note and Warrant Purchase Agreement with BMO Equity pursuant to which (i) BMO Equity advanced to the Company the sum of \$5 million and (ii) the Company issued to BMO Equity a warrant to purchase up to Four Percent (4%) of the outstanding shares of common stock of the Company on a fully-diluted basis (140,048 shares of common stock of the Company) at the price of One Cent (\$0.01) per share. The term of the loan provided for in this Agreement is five and a half years. Interest is payable on the outstanding balance of the loan at the rate of 11.5% per annum.

The Note and Warrant Purchase Agreement includes provisions for:

- (i) a closing fee of \$100,000
- (ii) payment of the principal amount in five and a half years with optional prepayment subject to certain prepayment premiums;
- (iii) security for the note obligations in all assets of the Company junior to the security interest of BMO Harris;
- (iv) various representations and warranties and covenants of the Company;
- (v) financial covenants including an applicable senior leverage ratio, fixed charge coverage ratio and tangible net worth amount.

Management believes that the funds provided by this new financing arrangement as well as internally generated funds will be sufficient for the Company to meet its working capital needs for at least the next 12 months.

In recent years, sales in the metalized balloon product line have historically been seasonal with approximately 40% occurring in the period from December through March and 24% being generated in the period from July through October.
