FORM 10-K

x ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2012

..TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 0-12126

FRANKLIN FINANCIAL SERVICES CORPORATION

(Exact name of registrant as specified in its charter)

PENNSYLVANIA 25-1440803
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

20 South Main Street, Chambersburg, PA 17201-0819
(Address of principal executive offices) (Zip Code)

(717) 264-6116

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act

NONE

Securities registered pursuant to Section 12(g) of the Act:

Common Stock, par value \$1.00 per share

(Title of class)

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter periods that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act) Yes No

The aggregate market value of the 3,691,965 shares of the Registrant's common stock held by nonaffiliates of the Registrant as of June 30, 2012 based on the price of such shares was \$48,438,581.

There were 4,117,788 outstanding shares of the Registrant's common stock as of February 28, 2013.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the definitive annual proxy statement to be filed, pursuant to Reg. 14A within 120 days after December 31, 2012, are incorporated into Part III.

Part I

Item 1. Business

General

Franklin Financial Services Corporation (the “Corporation”) was organized as a Pennsylvania business corporation on June 1, 1983 and is a registered bank holding company under the Bank Holding Company Act of 1956, as amended (the “BHCA”). On January 16, 1984, pursuant to a plan of reorganization approved by the shareholders of Farmers and Merchants Trust Company of Chambersburg (“F&M Trust” or “the Bank”) and the appropriate regulatory agencies, the Corporation acquired all the shares of F&M Trust and issued its own shares to former F&M Trust shareholders on a share-for-share basis.

The Corporation’s common stock is thinly traded in the over-the-counter market. The Corporation’s stock is listed under the symbol “FRAF” on the OTC QB, a trading platform operated by OTC Markets Group for companies that are current in their reporting with a U.S. regulator. The Corporation’s Internet address is www.franklinfin.com. Electronic copies of the Corporation’s 2012 Annual Report on Form 10-K are available free of charge by visiting the “Investor Information” section of www.franklinfin.com. Electronic copies of quarterly reports on Form 10-Q and current reports on Form 8-K are also available at this Internet address. These reports are posted as soon as reasonably practicable after they are electronically filed with the Securities and Exchange Commission (SEC).

The Corporation conducts substantially all of its business through its direct banking subsidiary, F&M Trust, which is wholly owned. F&M Trust, established in 1906, is a full-service, Pennsylvania-chartered commercial bank and trust company, which is not a member of the Federal Reserve System. F&M Trust operates twenty-six community banking offices in Franklin, Cumberland, Fulton and Huntingdon Counties, Pennsylvania, and engages in general commercial, retail banking and trust services normally associated with community banks and its deposits are insured (up to applicable limits) by the Federal Deposit Insurance Corporation (the “FDIC”). F&M Trust offers a wide variety of banking services to businesses, individuals, and governmental entities. These services include, but are not necessarily limited to, accepting and maintaining checking, savings, and time deposit accounts, providing investment and trust services, making loans and providing safe deposit facilities. Franklin Future Fund Inc., a direct subsidiary of the Corporation, is a non-bank investment company that makes venture capital investments within the Corporation’s primary market area. During the first quarter of 2012, Franklin Realty Services Corporation (an inactive real-estate brokerage company and subsidiary of the Bank as of December 31, 2011) merged with Franklin Financial Properties Corp. (a subsidiary of the Corporation at December 31, 2011) with Franklin Financial Properties Corp. becoming the surviving entity and subsidiary of the Bank. Franklin Financial Properties Corp. is a “qualified real estate subsidiary” established to hold real estate assets used by F&M Trust in its banking operations.

F&M Trust is not dependent upon a single customer or a few customers for a material part of its business. Thus, the loss of any customer or identifiable group of customers would not materially affect the business of the Corporation or the Bank in an adverse manner. Also, none of the Bank's business is seasonal. The Bank's lending activities consist primarily of commercial real estate, construction and land development, agricultural, commercial and industrial loans, installment and revolving loans to consumers and residential mortgage loans. Secured and unsecured commercial and industrial loans, including accounts receivable and inventory financing, and commercial equipment financing, are made to small and medium-sized businesses, individuals, governmental entities, and non-profit organizations. F&M Trust also participates in Pennsylvania Housing Finance Agency programs and is a Small Business Administration approved lender.

The Bank classifies loans in this report by the type of collateral, primarily residential or commercial and agricultural real estate. Residential real estate loans may be further broken down into consumer or commercial purpose. Consumer purpose residential real estate loans represent traditional residential mortgages and home equity products. Both of these products are underwritten in generally the same manner; however, home equity products may present greater risk since many of these loans are secured by a second lien position where the Bank may or may not hold the first lien position. Commercial purpose residential real estate loans represent loans made to businesses, but are secured by residential real estate. These loans are underwritten as commercial loans and the repayment ability may be dependent on the business operation, despite the residential collateral. In addition to the real estate collateral, it is possible that personal guarantees or UCC filings on business assets provide additional security. In certain situations, the Bank acquires properties through foreclosure on delinquent loans. The Bank initially records these properties at the estimated fair value less cost to sell with subsequent adjustments to fair value recorded as needed.

Commercial and agricultural real estate loans are secured by properties such as hotels, warehouses, apartment buildings, retail sites, and farmland or agricultural related properties. These loans are highly dependent on the business operations for repayment. Compared to residential real estate, this collateral may be more difficult to sell in the event of a delinquency.

Construction loans are made to finance the purchase of land and the construction of residential and commercial buildings, and are secured by mortgages on real estate. These loans are primarily comprised of loans to consumers to build a home, and loans to contractors and developers to construct residential properties for resale or rental. Construction loans present various risks that include, but are not limited to: schedule delays, cost overruns, changes in economic conditions during the construction period, and the inability to sell or rent the property upon completion.

Commercial loans are made to businesses and government municipalities of various sizes for a variety of purposes including operations, property, plant and equipment, and working capital. These loans are highly dependent on the business operations for repayment and are generally secured by business assets and personal guarantees. As such this collateral may be more difficult to sell in the event of a delinquency. Commercial lending, including commercial real estate, is concentrated in the Bank's primary market, but also includes purchased loan participations originated primarily in south-central Pennsylvania.

Consumer loans are comprised of installment, indirect (primarily automobile) and unsecured personal lines of credit. While some of these loans are secured, the collateral behind the loans is often comprised of assets that lose value quickly (e.g. automobiles) and if repossessed, may not fully satisfy the loan in the event of default. Repayment of these loans is highly dependent on the borrowers' financial condition that can be affected by economic factors beyond their control and personal circumstances.

F&M Trust's Investment and Trust Services Department offers all of the personal and corporate trust services normally associated with trust departments including: estate planning and administration, corporate and personal trust fund management, pension, profit sharing and other employee benefit funds management, and custodial services. F&M Trust through licensed members of its Investment and Trust Services Department sells mutual funds, annuities and selected insurance products.

Economic factors affecting the country and community banks during 2012 were virtually unchanged from 2011. The economy showed small signs of improvement, but still struggled in many parts of the country. Unemployment and foreclosure rates remained at higher than normal levels, the U.S. Government continued to debate whether higher taxes or less spending would be the best remedy to revive the economy, the Federal Reserve continued to flood the market with cash to stimulate the economy with little or no results, and any increase to short-term rates is now tied to the unemployment rate dropping below 6.5%. This means short-term rates may be low for several more years. Many banks continue to see a compression of the net interest margin due to the low rate environment, and earnings pressure from nonperforming loans. A prolonged period of low rates is not beneficial to improving the margin. Commercial lending activity was slow in 2012 with fewer credit worthy customers and many banks chasing a small group of good credit customers. Consumer lending remained slow as consumers have reduced their borrowing. Residential mortgage lending picked up in 2012 as low rates fueled another round of refinance activity. The Bank stopped making indirect consumer loans in 2010 and this action has substantially decreased the balance of the consumer loan portfolio. For more economic information about the Corporation's market area, see the Economy discussion in Item 7, Management's Discussion and Analysis.

With short-term interest rates remaining at very low levels during 2012 and the continued financial uncertainty of the economy, consumers have moved deposits to short-term, liquid deposit products. As a result, the Bank has experienced a reduction in longer-term certificates of deposit and an increase in money management accounts. Until short-term rates increase and the economy begins to recover, the Bank expects that customers will continue to prefer shorter, liquid deposits and certificates of deposit will continue to decline.

The prolonged effect of a sluggish economy has resulted in a growing amount of nonperforming loans for the Bank. Commercial nonperforming loans have increased as businesses have seen their sales decline and real estate developers continue to experience slower residential property sales. Until business activity starts to recover and consumers feel confident in their employment situation, it is expected that nonperforming loans will not change significantly and remain at higher than normal levels.

Competition

The Corporation and its banking subsidiary operate in a highly competitive environment. The principal market of F&M Trust is in south central Pennsylvania, primarily the counties of Franklin, Cumberland, Fulton and Huntingdon. There are approximately 29 competing commercial banks that have offices within the Corporation's primary market area. These banks range from large regional banks to independent community banks. In addition, credit unions, savings and loan associations, mortgage banks, brokerage firms and other competitors with only an Internet site are present in the market. The Bank has 26 community offices and approximately 17% of the total deposits, ranking it third in its market region. The majority of the Bank's loan and deposit customers are in Franklin County. There are 6 commercial bank competitors in Franklin County and the Bank has approximately 29% of the deposit market share.

Because of increasing competition, profit margins in the traditional banking business of lending and gathering deposits have declined and many nonbanking institutions offer services similar to those offered by the Bank. Some competitors have access to resources (e.g., financial and technological) that are unavailable to the Bank, thereby creating a competitive disadvantage for the Bank in terms of product and service pricing and delivery. The Bank utilizes various strategies including its long history of local customer service and convenience as part of a relationship management culture, a wide variety of products and services and, to a lesser extent, the pricing of loans and deposits, to compete. F&M Trust is the largest financial institution headquartered in Franklin County and had total assets of approximately \$1.027 billion on December 31, 2012.

Staff

As of December 31, 2012, the Corporation and its banking subsidiary had 283 full-time equivalent employees. The officers of the Corporation are employees of the Bank. Most employees participate in pension, incentive compensation plans, 401(k) plan and employee stock purchase plans and are provided with group life and health insurance. Management considers employee relations to be excellent.

Supervision and Regulation

Various requirements and restrictions under the laws of the United States and under Pennsylvania law affect the Corporation and its subsidiaries.

General

The Corporation is registered as a bank holding company and is subject to supervision and regulation by the Board of Governors of the Federal Reserve System under the Bank Holding Act of 1956, as amended. The Corporation has also made an effective election to be treated as a "financial holding company." Financial holding companies are bank holding companies that meet certain minimum capital and other standards and are therefore entitled to engage in financially related activities on an expedited basis; see further discussion below. Bank holding companies are required to file periodic reports with and are subject to examination by the Federal Reserve Board. The Federal Reserve Board has issued regulations under the Bank Holding Company Act that require a bank holding company to serve as a source of financial and managerial strength to its subsidiary banks. As a result, the Federal Reserve Board, pursuant to such regulations, may require the Corporation to stand ready to use its resources to provide adequate capital funds to its Bank subsidiary during periods of financial stress or adversity.

The Bank Holding Company Act prohibits the Corporation from acquiring direct or indirect control of more than 5% of the outstanding shares of any class of voting stock, or substantially all of the assets of any bank, or from merging or consolidating with another bank holding company, without prior approval of the Federal Reserve Board. Additionally,

the Bank Holding Company Act prohibits the Corporation from engaging in or from acquiring ownership or control of more than 5% of the outstanding shares of any class of voting stock of any company engaged in a non-banking business, unless such business is determined by the Federal Reserve Board to be so closely related to banking as to be a proper incident thereto. Federal law and Pennsylvania law also require persons or entities desiring to acquire certain levels of share ownership (generally, 10% or more, or 5% or more for another bank holding company) of the Corporation to first obtain prior approval from the Federal Reserve and the Pennsylvania Department of Banking.

As a Pennsylvania bank holding company for purposes of the Pennsylvania Banking Code, the Corporation is also subject to regulation and examination by the Pennsylvania Department of Banking.

The Bank is a state chartered bank that is not a member of the Federal Reserve System, and its deposits are insured (up to applicable limits) by the Federal Deposit Insurance Corporation (FDIC). Accordingly, the Bank's primary federal regulator is the FDIC, and the Bank is subject to extensive regulation and examination by the FDIC and the Pennsylvania Department of Banking. The Bank is also subject to requirements and restrictions under federal and state law, including requirements to maintain reserves against deposits, restrictions on the types and amounts of loans that may be granted and the interest that may be charged thereon, and limitations on the types of investments that may be made and the types of services that may be offered. The Bank is subject to extensive regulation and reporting requirements in a variety of areas, including helping to prevent money laundering, to preserve financial privacy, and to properly report late payments, defaults, and denials of loan applications. The Community Reinvestment Act requires the Bank to help meet the credit needs of the entire community where the Bank operates, including low and moderate-income neighborhoods. The Bank's rating under the Community Reinvestment Act (CRA), assigned by the FDIC pursuant to an examination of the Bank, is important in determining whether the bank may receive approval for, or utilize certain streamlined procedures in, applications to engage in new activities. The Bank's present CRA rating is "satisfactory." Various consumer laws and regulations also affect the operations of the Bank. In addition to the impact of regulation, commercial banks are affected significantly by the actions of the Federal Reserve Board as it attempts to control the money supply and credit availability in order to influence the economy.

Capital Adequacy Guidelines

Bank holding companies are required to comply with the Federal Reserve Board's risk-based capital guidelines. The required minimum ratio of total capital to risk-weighted assets (including certain off-balance sheet activities, such as standby letters of credit) is 8%. At least half of the total capital is required to be "Tier 1 capital," consisting principally of common shareholders' equity less certain intangible assets. The remainder ("Tier 2 capital") may consist of certain preferred stock, a limited amount of subordinated debt, certain hybrid capital instruments and other debt securities, and a limited amount of the general loan loss allowance and deferred tax accounts. The risk-based capital guidelines are required to take adequate account of interest rate risk, concentration of credit risk, and risks of nontraditional activities.

In addition to the risk-based capital guidelines, the Federal Reserve Board requires a bank holding company to maintain a leverage ratio of a minimum level of Tier 1 capital (as determined under the risk-based capital guidelines) equal to 3% of average total consolidated assets for those bank holding companies which have the highest regulatory examination ratings and are not contemplating or experiencing significant growth or expansion. All other bank holding companies are required to maintain a ratio of at least 1% to 2% above the stated minimum. The Bank is subject to almost identical capital requirements adopted by the FDIC. In addition to FDIC capital requirements, the Pennsylvania Department of Banking also requires state chartered banks to maintain a 6% leverage capital level and 10% risk based capital, defined substantially the same as the federal regulations.

Basel III

The Basel Committee on Banking Supervision (the "Basel Committee") released in December 2010 revised final frameworks for the regulation of capital and liquidity of internationally active banking organizations. These new frameworks are generally referred to as "Basel III." Implementation of Basel III is to have commenced January 1, 2013 and be phased in over a multi-year period through January 1, 2019. On June 7, 2012 the U.S. banking agencies requested comment on three proposed rules that, taken together, would establish an integrated regulatory capital framework implementing the Basel III regulatory capital reforms in the U.S. As proposed, the U.S. implementation of Basel III would lead to significantly higher capital requirements and more restrictive leverage and liquidity ratios than those currently in place. Comments to the proposed rules were requested by September 7, 2012 in order to begin the gradual integration of the proposed rules on January 1, 2013. The U.S. banking agencies have delayed implementation of the proposed rules as they continue considering the comments received. At this point, we cannot determine the ultimate impact that any final rules, if adopted, would have upon the Corporation or the Bank or our earnings or financial position.

Prompt Corrective Action Rules

The federal banking agencies have regulations defining the levels at which an insured institution would be considered "well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized" and "critically undercapitalized." The applicable federal bank regulator for a depository institution could, under certain circumstances, reclassify a "well-capitalized" institution as "adequately capitalized" or require an "adequately capitalized" or "undercapitalized" institution to comply with supervisory actions as if it were in the next lower category. Such a reclassification could be made if the regulatory agency determines that the institution is in an unsafe or unsound condition (which could include unsatisfactory examination ratings). At December 31, 2012, the Corporation and the Bank each satisfied the criteria to be classified as "well capitalized" within the meaning of applicable regulations.

Regulatory Restrictions on Dividends

Dividend payments by the Bank to the Corporation are subject to the Pennsylvania Banking Code, the Federal Deposit Insurance Act, and the regulations of the FDIC. Under the Banking Code, no dividends may be paid except from "accumulated net earnings" (generally, retained earnings). The Federal Reserve Board and the FDIC have formal and informal policies which provide that insured banks and bank holding companies should generally pay dividends only out of current operating earnings, with some exceptions. The Prompt Corrective Action Rules, described above, further limit the ability of banks to pay dividends, because banks that are not classified as well capitalized or adequately capitalized may not pay dividends.

Dodd-Frank Wall Street Reform and Consumer Protection Act

On July 21, 2010, the President signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank). This legislation is one of the most comprehensive reform bills ever introduced to the financial services industry. Financial service providers from small community banks to the largest Wall Street firms will be affected by this legislation. Many aspects of this Act will take effect over several years and the Corporation continues to review the details of the Act. At this time, it is difficult to predict the extent to which each component of Dodd-Frank will affect the Corporation. However, it is likely that the Act will impose a greater regulatory burden on the Corporation and increase its cost of compliance. Some of the key provisions included in Dodd-Frank that are likely to affect the Corporation are:

Consumer Financial Protection Bureau (CFPB). The CFPB has been created to set rules and regulations regarding consumer lending activities. Banks with less than \$10 billion in assets are exempt from examination by the CFPB, but the CFPB can require community banks to submit any information it requests for review. The CFPB will also require new disclosure requirements for all banks.

FDIC Insurance. The insurance limit was increased to \$250,000 and unlimited FDIC insurance on certain non-interest bearing depository accounts was extended through December 31, 2012. In addition, the assessment base was changed from a deposit-based calculation to an asset-based calculation.

Corporate Checking. The prohibition against paying interest on corporate checking accounts was lifted effective July 21, 2011.

Debit Card Fees. The Durbin Amendment to Dodd-Frank requires that the amount of any interchange fee charged by a debit card issuer must be reasonable and proportional to the cost incurred by the issuer. The Federal Reserve is charged with establishing standards for reasonable and proportional fees. This price regulation applies only to banks with assets greater than \$10 billion. This amendment went into effect in July 2011 and to date, it appears that the Bank's debit card fees have been unaffected.

Mortgage Licensing. Residential mortgage loan originators must register with the Nationwide Mortgage Licensing System and Registry. This registry is a database created by the states to support the licensing of mortgage originators. Employees of agency-related institutions must register prior to originating residential mortgage loans. The Corporation complied with this requirement in 2011 and it will increase compliance costs for the Corporation.

Appraisals. New appraisal guidance sets forth the minimum regulatory standard for appraisals. It requires institutions to utilize strong internal controls to ensure reliable appraisals and evaluations to monitor and periodically update valuations of collateral for existing real estate loans. This is expected to increase compliance costs for the Corporation.

Compensation. At least once every three years, companies must conduct a non-binding shareholder vote (say-on-pay) to approve the compensation of the CEO and the company's "named executive officers". At least once every 6 years, shareholders must also vote on whether to hold the non-binding vote on executive compensation every 1, 2, or 3 years. Additionally, banking regulators have established guidance that prohibits incentive-based compensation arrangements that encourage inappropriate risks that could lead to material financial loss to the institution. Bank compensation plans will be required to be submitted to the appropriate regulator for review and monitoring of compliance. At the Corporation's 2012 annual meeting of shareholders, it was approved to vote on the "say-on-pay" question every year. This is expected to increase compliance costs for the Corporation.

The CFPB has issued an Ability-to-Repay rule to require mortgage lenders to consider consumers' ability to repay home loans before extending them credit. The rule describes certain minimum requirements for creditors to consider before making a loan. The CFPB has also defined criteria for loans call "Qualified Mortgages" that are presumed to meet the Ability-to-Repay rule. The rule is to be effective January 2014 and the Bank believes its current lending practices are in compliance with the new rule.

FDIC Insurance

The Bank is a member of the Deposit Insurance Fund (DIF), which is administered by the FDIC. The FDIC insures deposit accounts at the Bank, generally up to a maximum of \$250,000 for each separately insured depositor. In addition, The Dodd-Frank Act, signed July 21, 2010, extended unlimited FDIC insurance to non-interest bearing transaction accounts through December 31, 2012. A decision to extend the unlimited deposit insurance beyond the December 31, 2012 expiration date was debated in Congress, but no action was taken, thereby ending the program.

The FDIC charges a premium to depository institutions for deposit insurance. This rate is based on the risk category of the institution and the total premium is based on average total assets less average tangible equity. As of December 31, 2012, the Bank was in risk category 1 and its assessment rate was approximately 9 basis points of the assessment base.

On September 29, 2009, the FDIC adopted an Amended Restoration Plan to allow the DIF to return to its statutorily mandated minimum reserve ratio of 1.15 % within 8 years. At the same time, the FDIC adopted higher risk-based assessment rates effective beginning January 1, 2011. It also imposed a prepaid assessment on insured institutions payable December 30, 2009 that required insured institutions to prepay their estimated quarterly risk-based assessment for the fourth quarter of 2009 and for all of 2010, 2011 and 2012. The Bank paid an assessment of approximately \$4.0 million on December 30, 2009 and it was recorded as a pre-paid asset that will be recognized as quarterly premiums are incurred.

Dodd-Frank established a new minimum DIF ratio set at 1.35% of estimated insured deposits. The FDIC is required to attain this ratio by September 30, 2020 and its efforts to achieve this ratio could greatly influence future premium rates.

Insurance of deposits may be terminated by the FDIC upon a finding that an institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC. We do not currently know of any practice, condition or violation that might lead to termination of our deposit insurance.

In addition to the FDIC assessments, the Financing Corporation (“FICO”) is authorized to impose and collect, with the approval of the Federal Deposit Insurance Corporation, assessments for anticipated payments, issuance costs and custodial fees on bonds issued by the FICO in the 1980s to recapitalize the former Federal Savings and Loan Insurance Corporation. The bonds issued by the FICO are due to mature from 2017 to 2019. The Bank’s FICO assessment was approximately \$62 thousand in 2012 and was included in FDIC insurance expense.

New Legislation

Congress is often considering new financial industry legislation, and the federal banking agencies routinely propose new regulations. The Corporation cannot predict how any new legislation, or new rules adopted by the federal banking agencies, may affect its business in the future.

Selected Statistical Information

Certain statistical information is included in this report as part of Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Item 1A. Risk Factors

The following is a summary of the primary risks associated with the Corporation’s business, financial condition and results of operations, and common stock.

Risk Factors Relating to the Corporation

A focus on real estate related loans may increase the risk of substantial credit losses.

The Bank offers a variety of loan products, including residential mortgage, consumer, construction and commercial loans. The Bank requires real estate as collateral for many of its loans. At December 31, 2012, 76% of its loans were secured by real estate. Loans to fund residential real estate construction are 2% of total loans; loans secured by residential real estate are 26% of the total, and commercial, industrial and agricultural real estate loans total 48% of the total loan portfolio. These real estate loans are located primarily in the Bank’s market area of south central Pennsylvania. Real estate values tend to follow changes in general economic cycles. As a result, if a loan becomes delinquent as the result of an economic downturn and the Bank becomes dependent on the real estate collateral as a

source of repayment, it is likely that the value of the real estate collateral has also declined. A decline in real estate values means it is possible that the real estate collateral may be insufficient to cover the outstanding balance of a delinquent or foreclosed loan, resulting in a loss to the Bank. In addition, the real estate collateral is concentrated in a small market area of south central Pennsylvania. As a result, localized events that affect real estate prices and collateral values could have a more negative affect on the Bank as compared to other competitors with a more geographically diverse portfolio. As the Bank grows, it is expected that the percentage of real estate loans, specifically commercial real estate, will grow. Risk of loan default is unavoidable in the banking industry, and Management tries to limit exposure to this risk by carefully monitoring the amount of loans in specific industries and by exercising prudent lending practices and securing appropriate collateral. However, this risk cannot be eliminated and substantial credit losses could result in reduced earnings or losses.

The allowance for loan losses may prove to be insufficient to absorb inherent losses in our loan portfolio.

The Bank maintains an allowance for loan losses that Management believes is appropriate to provide for any inherent losses in the loan portfolio. The amount of the allowance is determined through a periodic review and consideration of several factors, including an ongoing review of the quality, size and diversity of our loan portfolio; evaluation of nonperforming loans; historical loan loss experience; and the amount and quality of collateral, including guarantees, securing the loan.

Although Management believes the loan loss allowance is adequate to absorb inherent losses in the loan portfolio, such losses cannot be predicted and the allowance may not be adequate. Excessive loan losses could have a material adverse effect on the Bank's financial condition and results of operations.

The Bank's lending limit is smaller than many of our competitors, which affects the size of the loans it can offer customers.

The Bank's lending limit is approximately \$13.8 million. Accordingly, the size of the loans that can be offered to potential customers is less than the size of loans that many of our competitors with larger lending limits can offer. This limit affects the Bank's ability to seek relationships with larger businesses in its market area. Loan amounts in excess of the lending limits can be accommodated through the sale of participations in such loans to other banks. However, there can be no assurance that the Bank will be successful in attracting or maintaining customers seeking larger loans or that it will be able to engage in participation of such loans or on terms favorable to the Bank.

There is strong competition in the Bank's primary market areas.

The Bank encounters strong competition from other financial institutions in its primary market area, which consists of Franklin, Cumberland, Fulton and Huntingdon County, Pennsylvania. In addition, established financial institutions not already operating in the Bank's primary market area may open branches there at future dates or can compete in the market via the Internet. In the conduct of certain aspects of banking business, the Bank also competes with savings institutions, credit unions, mortgage banking companies, consumer finance companies, insurance companies and other institutions, some of which are not subject to the same degree of regulation or restrictions as are imposed upon the Bank. Many of these competitors have substantially greater resources and lending limits and can offer services that the Bank does not provide. In addition, many of these competitors have numerous branch offices located throughout their extended market areas that provide them with a competitive advantage. No assurance can be given that such competition will not have an adverse effect on the Bank's financial condition and results of operations.

Changes in interest rates could have an adverse impact upon our results of operations.

The Bank's profitability is in part a function of the spread between interest rates earned on investments, loans and other interest-earning assets and the interest rates paid on deposits and other interest-bearing liabilities. Recently, interest rate spreads have generally narrowed due to changing market conditions and competitive pricing pressure. Interest rates are highly sensitive to many factors that are beyond the Bank's control, including general economic conditions and policies of various governmental and regulatory agencies and, in particular, the Board of Governors of the Federal Reserve System. Changes in monetary policy, including changes in interest rates, will influence not only the interest received on loans and investment securities and the amount of interest we pay on deposits and borrowings, but will

also affect the Bank's ability to originate loans and obtain deposits and the value of our investment portfolio. If the rate of interest paid on deposits and other borrowings increases more than the rate of interest earned on loans and other investments, the Bank's net interest income, and therefore earnings, could be adversely affected. Earnings could also be adversely affected if the rates on loans and other investments fall more quickly than those on deposits and other borrowings. While Management takes measures to guard against interest rate risk, there can be no assurance that such measures will be effective in minimizing the exposure to interest rate risk.

Risk Factors Relating to the Common Stock

There is a limited trading market for the Corporation's common stock.

There is currently only a limited public market for the Corporation's common stock. It is quoted on the OTCQB Market Tier of the OTC Markets under the symbol "FRAF" (www.otcm Markets.com/stock/FRAF/quote). Because it is thinly traded, you may not be able to resell your shares of common stock for a price that is equal to the price that you paid for your shares. The Corporation has no plans to apply to have its common stock listed for trading on any stock exchange or the NASDAQ market.

The Bank's ability to pay dividends to the Corporation is subject to regulatory limitations that may affect the Corporation's ability to pay dividends to its shareholders.

As a holding company, the Corporation is a separate legal entity from the Bank and does not have significant operations of its own. It currently depends upon the Bank's cash and liquidity to pay dividends to its shareholders. The Corporation cannot assure you that in the future the Bank will have the capacity to pay dividends to the Corporation. Various statutes and regulations limit the availability of dividends from the Bank. It is possible; depending upon the Bank's financial condition and other factors, that the Bank's regulators could assert that payment of dividends by the Bank to the Corporation would constitute an unsafe or unsound practice. In the event that the Bank is unable to pay dividends to the Corporation, the Corporation may not be able to pay dividends to its shareholders.

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

Edgar Filing: FRANKLIN FINANCIAL SERVICES CORP /PA/ - Form 10-K

The Corporation's headquarters is located in the main office of F&M Trust at 20 South Main Street, Chambersburg, Pennsylvania. This location also houses a community banking office as well as operational support services for the Bank. The Corporation owns or leases thirty-nine properties in Franklin, Cumberland, Fulton and Huntingdon Counties, Pennsylvania, for banking operations, as described below:

Property	Owned	Leased
Community Banking Offices	18	8
Remote ATM Sites	3	6
Other Properties	2	2

7

Item 3. Legal Proceedings

The nature of our business generates a certain amount of litigation involving matters arising in the ordinary course of business. However, in management's opinion, there are no proceedings pending to which the Corporation is a party or to which our property is subject, which, if determined adversely to the Corporation, would be material in relation to our shareholders' equity or financial condition. In addition, no material proceedings are pending nor are known to be threatened or contemplated against us by governmental authorities or other parties.

Item 4. Mine Safety Disclosures

Market and Dividend Information

The Corporation's common stock is thinly traded in the over-the-counter market. It is quoted on the OTCQB Market Tier of the OTC Markets under the symbol "FRAF" (www.otcm Markets.com/stock/FRAF/quote). Current price information is available from account executives at most brokerage firms as well as the registered market makers of Franklin Financial Services Corporation common stock as listed below under Shareholders' Information.

The range of high and low bid prices is shown in the following table for the years 2012 and 2011, as well as cash dividends declared for those periods. The bids reflect interdealer quotations, do not include retail mark-ups, markdowns or commissions, and may not necessarily represent actual transactions. The closing price of Franklin Financial Services Corporation common stock recorded from an actual transaction on December 31, 2012 was \$14.00. The Corporation had 2,032 shareholders of record as of December 31, 2012.

Market and Dividend Information**Bid Price Range Per Share**

	2012		2011			
	High	Low	Dividends Declared	High	Low	Dividends Declared
<i>(Dollars per share)</i>

For limitations on the Corporation's ability to pay dividends, see "Supervision and Regulation – Regulatory Restrictions on Dividends" in Item 1 above.

The information related to equity compensation plans is incorporated by reference to the materials set forth under the heading "Executive Compensation – Compensation Tables" in the Corporation's Proxy Statement for the 2013 Annual Meeting of Shareholders.

Common Stock Repurchases:

The Corporation frequently authorizes the repurchase of its common stock through a stock repurchase plan. The common shares of the Corporation are purchased in the open market or in privately negotiated transactions. The Corporation uses the repurchased common stock (Treasury stock) for general corporate purposes including stock dividends and splits, employee benefit and executive compensation plans, and the dividend reinvestment plan. The Corporation did not repurchase any shares in 2012.

The following graph compares the cumulative total return to shareholders of Franklin Financial with the NASDAQ – Total U.S. Index (a broad market index prepared by the Center for Research in Security Prices at the University of Chicago Graduate School of Business) and with the Northeast OTC-BB and Pink Banks Index (an industry-specific index prepared by SNL Financial LC) for the five year period ended December 31, 2012, in each case assuming an initial investment of \$100 on December 31, 2007 and the reinvestment of all dividends.

Index	Period Ending

Shareholders' Information

Dividend Reinvestment Plan:

Franklin Financial Services Corporation offers a dividend reinvestment program whereby shareholders of the Corporation's common stock may reinvest their dividends in additional shares of the Corporation. Beneficial owners of shares of the Corporation's common stock may participate in the program by making appropriate arrangements through their bank, broker or other nominee. Information concerning this optional program is available by contacting the Corporate Secretary at 20 South Main Street, P.O. Box 6010, Chambersburg, PA 17201-6010, telephone 717-264-6116.

Dividend Direct Deposit Program:

Franklin Financial Services Corporation offers a dividend direct deposit program whereby shareholders of the Corporation's common stock may choose to have their dividends deposited directly into the bank account of their choice on the dividend payment date. Information concerning this optional program is available by contacting the Corporate Secretary at 20 South Main Street, P.O. Box 6010, Chambersburg, PA 17201-6010, telephone 717-264-6116.

Annual Meeting:

The Annual Shareholders' Meeting will be held on Tuesday, April 30, 2013, at the Orchard Restaurant & Banquet Facility, 1580 Orchard Drive, Chambersburg, PA. The Business Meeting will begin at 10:30 a.m. followed by a luncheon.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Application of Critical Accounting Policies:

Disclosure of the Corporation's significant accounting policies is included in Note 1 to the consolidated financial statements. These policies are particularly sensitive requiring significant judgments, estimates and assumptions to be made by Management. Senior management has discussed the development of such estimates, and related Management Discussion and Analysis disclosure, with the Audit Committee of the Board of Directors. The following accounting policies are the ones identified by management to be critical to the results of operations:

Allowance for Loan Losses – The allowance for loan losses is the estimated amount considered adequate to cover credit losses inherent in the loan portfolio at the balance sheet date. The allowance is established through the provision for loan losses, charged against income. In determining the allowance for loan losses, Management makes significant estimates and, accordingly, has identified this policy as probably the most critical for the Corporation.

Management performs a monthly evaluation of the adequacy of the allowance for loan losses by asset class. Consideration is given to a variety of factors in establishing this estimate including, but not limited to: current economic conditions, diversification of the loan portfolio, delinquency statistics, results of internal loan reviews, borrowers' actual or perceived financial and managerial strengths, the adequacy of the underlying collateral (if collateral dependent) and other relevant factors. This evaluation is inherently subjective, as it requires material estimates that may be susceptible to significant change, including the amounts and timing of future cash flows expected to be received on impaired loans.

The analysis has two components, specific and general allocations. Expected cash flow or collateral values discounted for market conditions and selling costs are used to establish specific allocations. The Bank's historical loan loss experience and other qualitative factors derived from economic and market conditions are used to establish general allocations for the remainder of the portfolio. The allowance for loan losses was \$10.4 million at December 31, 2012.

Management monitors the adequacy of the allowance for loan losses on an ongoing basis and reports its adequacy assessment quarterly to the Credit Risk Oversight Committee of the Board of Directors.

Mortgage Servicing Rights – In the past, the Bank originated fixed rate mortgages that it subsequently sold to the secondary market. However, the Bank retained the rights to service these loans for its customers. As required by FASB Accounting Standard Codification (ASC) Topic 860, "Transferred Financial Assets", upon the sale of mortgage

loans, the Bank capitalizes the value allocated to the servicing rights in other assets. The capitalized servicing rights are amortized against noninterest income in proportion to, and over the periods of, the estimated net servicing income of the underlying financial assets.

Capitalized servicing rights are carried at the lower of cost or market and are evaluated for impairment based upon the fair value of the rights as compared to amortized cost. The rights are deemed to be impaired when the fair value of the rights is less than the amortized cost. If impaired, the Bank records a charge against noninterest income from mortgage banking activities through a mortgage servicing rights valuation allowance. The amount charged to the valuation allowance can be reversed in future periods if the rights are determined to no longer be impaired. However, the amount of impairment reversed may not exceed the balance of the valuation allowance.

The fair value of the servicing rights is determined through a discounted cash flow analysis and calculated using a computer-pricing model. The pricing model is based on the objective characteristics of the mortgage servicing portfolio (e.g, loan balance and interest rate) and commonly used industry assumptions (e.g., prepayment speeds, discount rates). The assumptions take into account those that many active purchasers of servicing rights employ in their evaluations of portfolios for sale in the secondary market. The unique characteristics of the secondary servicing market often dictate adjustments to the assumptions over short periods of time. Subjective factors are also considered in the derivation of market values, including levels of supply and demand for servicing, interest rate trends, and perception of risk not incorporated into prepayment assumptions.

Financial Derivatives – As part of its interest rate risk management strategy, the Bank has entered into interest rate swap agreements. A swap agreement is a contract between two parties to exchange cash flows based upon an underlying notional amount. Under the swap agreements, the Bank pays a fixed rate and receives a variable rate from an unrelated financial institution serving as counter-party to the agreements. The swaps are designated as cash flow hedges and are designed to minimize the variability in cash flows of the Bank’s variable rate liabilities attributable to changes in interest rates. The swaps in effect convert a portion of a variable rate liability to a fixed rate liability.

The interest rate swaps are recorded on the balance sheet at fair value as an asset or liability. To the extent the swaps are effective in accomplishing their objectives, changes in the fair value are recorded in other comprehensive income. To the extent the swaps are not effective, changes in fair value are recorded in interest expense. Cash flow hedges are determined to be highly effective when the Bank achieves offsetting changes in the cash flows of the risk being hedged. The Bank measures the effectiveness of the hedges on a quarterly basis and it has determined the hedges are highly effective. Fair value is heavily dependent upon the market’s expectations for interest rates over the remaining term of the swaps.

Temporary Investment Impairment – Investment securities are written down to their net realizable value when there is impairment in value that is considered to be “other-than-temporary.” The determination of whether or not “other-than-temporary” impairment exists is a matter of judgment. Management reviews investment securities regularly for possible impairment that is “other-than-temporary” by analyzing the facts and circumstances of each investment and the expectations for that investment’s performance. “Other-than-temporary” impairment in the value of an investment may be indicated by the length of time and the extent to which market value has been less than cost; the financial

condition and near term prospects of the issuer; and whether the Corporation has the intent to sell or is likely to be forced to sell the investment prior to any anticipated recovery in market value.

Stock-based Compensation – The Corporation has two stock compensation plans in place consisting of an Employee Stock Purchase Plan (ESPP) and an Incentive Stock Option Plan (ISOP).

The Corporation accounts for stock compensation plans in accordance with FASB Accounting Standards Codification Topic 718, “Stock Compensation.” ASC Topic 718 requires compensation costs related to share-based payment transactions to be recognized in the financial statements (with limited exceptions). The amount of compensation cost is measured on the grant-date fair value of the equity or liability instruments issued. Compensation cost is recognized over the period that an employee provides services in exchange for the award.

The Corporation calculates the compensation cost of the options by using the Black-Scholes method to determine the fair value of the options granted. In calculating the fair value of the options, the Corporation makes assumptions regarding the risk-free rate of return, the expected volatility of the Corporation’s common stock, dividend yield and the expected life of the option. These assumptions are made independently for the ESPP and the ISOP and if changed, would change the compensation cost of the options and net income. Note 1 of the accompanying financial statements provides additional information about stock option expense.

GAAP versus Non-GAAP Presentations – The Corporation supplements its traditional GAAP measurements with Non-GAAP measurements. The Non-GAAP measurements include Return on Average Tangible Assets, Return on Average Tangible Equity, Tangible Book Value and Tangible Common Equity ratio. As a result of merger transactions, intangible assets (primarily goodwill, core deposit intangibles and customer list) were created. The Non-GAAP disclosures are intended to eliminate the effects of the intangible assets and allow for better comparisons to periods when such assets did not exist. However, not all companies use the same calculation methods for the same non-GAAP measurements and therefore may not be comparable. The following table shows the adjustments made between the GAAP and NON-GAAP measurements:

GAAP Measurement	Calculation
Return on Average Assets	Net Income / Average Assets
Return on Average Equity	Net Income / Average Equity
Book Value	Total Shareholders' Equity / Shares Outstanding
Common Equity Ratio	Total Shareholders' Equity / Total Assets

Non- GAAP Measurement	Calculation
Return on Average Tangible Assets	Net Income plus Intangible Amortization (net of tax) / Average Assets less Average Intangible Assets
Return on Average Tangible Equity	Net Income plus Intangible Amortization (net of tax) / Average Equity less Average Intangible Assets
Tangible Book Value	Total Shareholders' Equity less Intangible Assets / Shares outstanding
Tangible Common Equity Ratio	Total Shareholders' Equity less Intangible Assets / Total Assets less Intangible Assets

Results of Operations:

Management's Overview

The following discussion and analysis is intended to assist the reader in reviewing the financial information presented and should be read in conjunction with the consolidated financial statements and other financial data presented elsewhere herein.

Franklin Financial Services Corporation continued to deal with a sluggish real estate market in south central Pennsylvania and another year of low interest rates in 2012. The real estate market is still somewhat depressed and sales and prices have not begun to improve. This has had a negative effect on commercial and residential real estate projects in the Corporation's market area and this led to an increasing level of nonperforming loans and other real estate owned (OREO). Because of this, the provision for loan losses exceeded \$5 million for the year as the Bank addressed real estate related charge-offs. However, the provision for loan losses was \$2.3 million less than in 2011. While the provision expense declined during the year, tax equivalent net interest income declined by \$432 thousand,

noninterest income declined by \$749 thousand and noninterest expense increased by \$2.3 million. Overall, net income in 2012 was \$5.4 million, down \$1.2 million (18%) from 2011. Diluted earnings per share were \$1.32 in 2012 compared to \$1.66 in 2011. The Corporation took a proactive step in 2012 by reducing the quarterly dividend by \$.10 per share effective with the second quarter 2012 dividend. This action was taken as a preventive measure to preserve capital in a stressful economic environment. The 2012 dividend was \$.78 per share compared to \$1.08 per share the prior year. The balance sheet grew to \$1.027 billion at year-end from \$990.2 million the prior year. Loans balances declined by \$13.5 million while deposits grew by \$86.5 million in 2012. Shareholders' equity increased during the year due to retained earnings and an additional \$1.2 million investment by shareholders in the Corporation through the dividend reinvestment plan. Other key performance measurements are presented above in Item 6, Selected Financial Data.

A more detailed discussion of the areas that had the greatest effect on the reported results follows.

Net Interest Income

The most important source of the Corporation's earnings is net interest income, which is defined as the difference between income on interest-earning assets and the expense of interest-bearing liabilities supporting those assets. Principal categories of interest-earning assets are loans and securities, while deposits, securities sold under agreements to repurchase (Repos), short-term borrowings and long-term debt are the principal categories of interest-bearing liabilities. For the purpose of this discussion, balance sheet items refer to the average balance for the year and net interest income is adjusted to a fully taxable-equivalent basis. This tax-equivalent adjustment facilitates performance comparisons between taxable and tax-free assets by increasing the tax-free income by an amount equivalent to the Federal income taxes that would have been paid if this income were taxable at the Corporation's 34% Federal statutory rate. The components of net interest income are detailed in Tables 1, 2 and 3.

2012 versus 2011

Summary: The Corporation's 2012 net interest income was virtually flat compared to 2011. Tax equivalent net interest income for the year was \$33.9 million compared to \$34.4 million in 2011, a decline of 1.3%. Despite an increase of \$48.0 million in average earning assets for 2012 compared to 2011, the margin was negatively affected by the low interest rate environment that pushed asset yields down faster than liability costs. As a result, the net interest margin as a percentage of earning assets fell to 3.50% in 2012 compared to 3.73% in 2011. The larger balance sheet increased net interest income by \$248 thousand, but lower rates drove net interest income down by \$680 thousand, resulting in a net decline of \$432 thousand year over year.

Assets: Average interest earning assets for 2012 grew by 5.2% over the 2011 average. Despite the growth, lower yielding assets resulted in a decline of \$2.6 million in interest income compared to 2011. The assets produced a yield of 4.22% compared to 4.73% in 2011. The mix of assets and lower rates resulted in \$2.7 million less tax equivalent interest income than in 2011. Table 2 presents information on the affect that changes in volume (balance sheet size)

and the changes in rates have on tax-equivalent interest income. Table 3 presents information on the average balance and yields on average earning assets.

Throughout the year, the Bank experienced strong deposit growth, but loan balances were down slightly and average investments increased minimally. Therefore, interest-bearing deposits at banks (the Bank's lowest yielding asset class) absorbed the increase in funds and was \$48.9 million more in 2012 than in the prior year.

The investment portfolio increased by \$2.3 million on average with the allocation between taxable and nontaxable securities remaining fairly consistent. Low interest rates on new purchases have driven the yield on the portfolio down from 3.41% in 2011 to 2.96% in 2012. The Bank purchased \$43.7 million in new securities during the year, primarily in the municipal and U.S. Agency mortgage backed securities sectors. The Bank is buying primarily for collateral purposes and it expects the majority of future purchases to be in these same investment sectors.

The loan portfolio averaged \$761.5 million for 2012 and earned an average yield of 4.81%. Compared to 2011, the average balance declined by \$3.2 million and the yield fell by .28%. The increase in the average balance of the commercial loan portfolio was not enough to offset the continued decline of consumer related loan balances. The loan portfolio generated \$36.6 million of interest income, \$2.3 million less than in 2011. Lower rates in 2012 were responsible for \$2.0 million (85%) of the reduction in loan interest. In addition, the increase in the Bank's nonperforming loans negatively affected interest income.

Commercial loans increased by \$9.5 million over the 2011 average portfolio balance. Commercial lending activity was slow in 2012 and there was not a lot of opportunity to lend new dollars. New loans continued to be booked at lower rates and existing loans repriced downward. Approximately 83% of the commercial loan portfolio is variable rate tied to the “Prime” lending rate. With a forecast for an extended period of low rates, the use of floors has become more difficult to implement for the strongest credit customers with the negotiating power. The portfolio was also affected by several large municipal loans that refinanced via a bond issue at rates the Bank was unwilling to match. Like the overall loan portfolio, interest income from the commercial portfolio was negatively affected the most by lower rates in 2012.

For 2012, the average balance of the residential mortgage portfolio remained flat compared to the prior year after several years of declining balances. Mortgage lending was strong due to the low rates, and those consumers with good credit and equity in their homes, took advantage of refinancing opportunities. In 2012, the Bank held more of its mortgage production in its portfolio than in past years and this offset the amortization and pay-offs in the portfolio. The Bank did not retain all mortgages originated in 2012, only those identified as part of a selective retention program. The Bank expects to continue the selective retention program in 2013.

Consumer lending, including home equity products, continued to decline. Home equity products declined, on average by approximately \$12 million compared to 2011 and the yield fell by .58%. The Bank’s home equity loan products are fixed rate and the home equity line of credit products are variable rate. Both products have seen new production rates decline, but the lower volume was the largest factor contributing to the decline in interest income on these products.

Liabilities: Interest-bearing liabilities increased 5.1% to \$828.4 million on average for 2012. The cost of these funds fell from 1.16% in 2011 to .83% in 2012. Interest-bearing deposits increased 9.8% on average and the cost fell from .99% in 2011 to .70% in 2012. The cost of all interest-bearing liabilities decreased year over year and these rate reductions were the largest contributor to lower interest expense in 2012. Table 2 presents information on the affect that changes in volume (balances sheet size) and changes in rates have on interest expense. Table 3 presents information on the average balance and cost of interest-bearing liabilities.

The Money Management product continues to be the Bank’s largest funding source and it increased 18.4% on average over 2011. The rate on this product declined by .35% during the year and was the primary reason for the \$718 thousand decrease in interest expense. All customer segments in this product grew during the year with the balance of the fully-insured option product more than doubling.

The sweep repurchase product declined by more than \$8 million during the year and the rate fell by .10% to .15%. The balance of this product is highly dependent on the operating cash flow needs of its commercial users, but some money did move to the fully-insured Money Management product.

Long-term debt is comprised of advances from FHLB Pittsburgh. The Bank did not take any new advances during 2012. The decline in the average balance was primarily the result of the Bank pre-paying \$33.1 million of debt that had scheduled maturities in 2012 and 2013. FHLB advances are the highest cost liability of the Bank. If these funds are replaced, the cost is expected to be less than the current cost. The Bank does not expect to take any new advances from FHLB in 2013.

2011 versus 2010

Summary: In 2011, tax equivalent net interest income totaled \$34.4 million compared to \$31.9 million the prior year. Interest rates remained low throughout 2011 resulting in a decrease in interest income of \$824 thousand. However, this reduction was more than offset by a \$3.3 million reduction in interest expense. As a result, tax equivalent net interest income increased \$2.5 million in 2011. The Corporation's net interest margin as percentage of earning assets improved from 3.53% in 2010 to 3.73% in 2011 primarily due to lower rates on liabilities.

Assets: Average interest earning assets for 2011 were \$920.3 million, approximately \$16 million more than in 2010. The yield on assets declined again in 2011 as interest rates remained low throughout the year. Lower asset yields drove interest income down by more than the increase produced by higher asset balances. Consequently, tax-equivalent interest income declined \$824 thousand year over year.

The average balance of investment securities in 2011 declined by approximately \$5 million compared to the 2010 average balance. Interest income fell by approximately \$1 million as the cash flow from higher yielding investments was reinvested at lower rates. The Bank has not been actively increasing its investment purchases choosing rather to reinvest the funds into loans. Investment purchases throughout the year were made primarily to provide collateral needed for secured deposits and Repo accounts.

The loan portfolio grew in 2011 as average loans totaled \$764.6 million compared to \$753.6 million in 2010. For the second straight year, only the commercial loan portfolio showed an increase over the prior year. Like the investment portfolio, the low rate environment has continued to reduce the loan yield, dropping it to 5.09% in 2011 from 5.15% in 2010. Tax equivalent interest income on loans increased year over year primarily due to a larger loan portfolio.

Commercial loans were the only portfolio sector to grow in 2011. The yield on these loans was 4.83% in 2011 and remained fairly stable from 2010. Commercial lending has remained steady with both new financing opportunities as well as refinancing of existing customers.

Residential mortgage loans continued to run-off, decreasing approximately \$6 million from the 2010 average balance of \$66.1 to an average of \$60.5 million in 2011. The Bank retained fewer of the mortgages it originates and the mortgages retained in 2011 were not sufficient to counter the run-off in the existing portfolio. The yield on these loans

declined again in 2011, but the lower 2011 balance is the primary reason for the decline in interest income from mortgage loans.

Home equity loans and lines of credit declined for the second straight year in 2011. The yield on this product improved slightly due to a floor rate on some products. Lower volume was the main contributor to the decline in interest income from home equity products.

Liabilities: Average interest-bearing liabilities for 2011 declined slightly during the year to \$788.1 million compared to \$793.8 million in 2010. However, the reduction is due primarily to a significant decline in long-term debt that more than offset the increase in interest bearing deposits. Every deposit category, except time deposits, increased during the year. The Bank reduced the cost of deposits during the year and this had the biggest affect in reducing interest expense on deposits.

The Money Management product continued to grow and the average balance for 2011 increased by approximately \$37 million. The Bank was able to reduce the rate on this product throughout the year and the reduction in interest expense from lower rates more than offset the growth; therefore, resulting in a decrease in interest expense of \$424 thousand.

Time deposits (CDs) declined again for the second straight year. Time deposit balances are comprised of both retail and brokered CDs.

Repurchase balances held steady year over year after declining for three straight years. The interest expense and rate were unchanged from 2010.

Long-term debt is comprised of advances from FHLB Pittsburgh. The Bank did not take any new advances in 2011 and the lower balance is reflective of scheduled amortization, maturities and prepayments. The Bank prepaid \$15.6 million in advances during 2011.

Table 1. Net Interest Income

(Dollars in thousands)	2012	% Change	2011	% Change	2010	% Change
Interest income	\$39,142	(6.3)	\$41,791	(3.4)	\$43,284	(1.1)
Interest expense	6,890	(24.7)	9,154	(26.4)	12,443	(15.2)
Net interest income	32,252	(1.2)	32,637	5.8	30,841	6.0
Tax equivalent adjustment	1,683		1,730		1,061	
Tax equivalent net interest income	\$33,935	(1.3)	\$34,367	7.7	\$31,902	5.4

Table 2 identifies increases and decreases in tax equivalent net interest income to either changes in average volume or to changes in average rates for interest-earning assets and interest-bearing liabilities. Numerous and simultaneous balance and rate changes occur during the year. The amount of change that is not due solely to volume or rate is allocated proportionally to both. All nontaxable interest income has been adjusted to a tax-equivalent basis, using a tax rate of 34%.

Provision for Loan Losses

For 2012, the Bank recorded net charge-offs of \$4.6 million compared to \$6.6 million in 2011. The charge-offs were more than offset by the 2012 provision expense of \$5.2 million and as a result, the allowance for loan losses (ALL) increased \$656 thousand over year-end 2011. At December 31, 2012, the ALL was \$10.4 million or 1.38% of total loans compared to a ratio 1.27% at the end of 2011. Nonperforming assets increased during the year and Management is closely monitoring the credit quality of the portfolio in order to ensure that an appropriate ALL is maintained. As part of this process, Management performs a comprehensive analysis of the loan portfolio considering delinquencies trends and events, current economic conditions, and other relevant factors to determine the adequacy of the allowance for loan losses and the provision for loan losses. For more information, refer to the Loan Quality discussion and Tables 12 -17.

Noninterest Income

2012 versus 2011

Summary: Noninterest income totaled \$9.5 million compared to \$10.2 million in 2011, a decrease of 7.3%. Net expense on other real estate owned of \$582 thousand and a nonrecurring recovery of \$538 thousand in 2011 contributed to the majority of the decrease.

Investment and Trust Services: These fees are comprised of asset management fees, estate administration and settlement fees, employee benefit plans and commissions from the sale of insurance and investment products through the Bank's Personal Investment Centers. Asset management fees are recurring in nature and are affected by the market value of the assets. Asset management fees were flat year over year at \$3.2 million. Estate fees increased \$186 thousand compared to 2011, while fees generated from the Personal Investment Centers decreased slightly due to lower commissions on the sale of investments. Trust assets under management were \$520.4 million at year-end, compared to \$481.5 million in 2011. The Bank continues to actively pursue new investment and trust accounts as some larger competitors have implemented a minimum account size that has caused some of these customers to look elsewhere for service.

Loan service charges: For the fourth consecutive year, this category remained flat, producing fees of \$1.2 million in 2012 compared to \$1.2 million in 2011. Fees earned for originating mortgages increased by \$211 thousand, including an increase of \$106 thousand for mortgages originated to be sold in the secondary market. Commercial loan service charges decreased compared to 2011 due to less prepayment fees. Consumer loan fees, including a debt protection program, totaled \$136 thousand, down \$32 thousand from 2011.

Mortgage banking fees: Mortgage banking activities consist primarily of servicing mortgage loans originated and sold by the Bank. Fees from servicing mortgages declined by \$24 thousand as the portfolio of mortgages serviced for others (\$46.1 million) continues to pay down. Loans originated for the secondary market are done on a fee basis and these fees are recorded in loan service charges. For loans that were previously sold with servicing retained, mortgage servicing rights (MSR) are recorded and represent the Bank's rights to receive future fee income from servicing these loans. MSR are measured and carried at the lower of cost or market value and are amortized over the expected life of the asset. In 2012, the MSR amortization, net of impairment charges, was \$133 thousand compared to \$235 thousand in 2011. While the Bank does not expect to originate and sell mortgages with servicing retained in the future, it will retain the existing servicing portfolio until those loans are paid-off. See Note 9 of the accompanying consolidated financial statements for additional information on mortgage servicing rights.

Deposit fees: This category is comprised primarily of fees from overdrafts, an overdraft protection program, service charges, and account analysis fees. Total deposit fees fell by \$217 thousand during the year. Contributing to this decrease was a reduction of \$193 thousand in retail overdraft fees. In mid 2011, the Bank changed some of its overdraft processes so that it would be in compliance with new regulatory guidance and best practices, and these changes, while benefiting consumers, have reduced fee income. These changes included eliminating overdraft fees on items less than \$5 and expanded counseling on account usage to customers who habitually overdraw their account. Commercial account analysis fees and overdrafts increased slightly during the year to \$468 thousand. The Bank recorded \$949 thousand in fees from a retail and commercial overdraft protection program compared to \$912 thousand in 2011.

Debit card and other service charges and fees: Debit card income continues to be one of the best fee generators for the Bank. The Bank expects the upward trend in these fees to continue as more consumers and businesses have and use debit cards. Debit card fees are comprised of both a retail and business card program. The business debit card offers a cash back rewards program based on usage and it continues to grow in popularity. In total, debit card fees increased by approximately 13% in 2012 to \$1.2 million. In July 2011, components of the Durbin Act went into effect that restricted interchange fees charged by banks. This price regulation is intended only for banks with assets greater than \$10 billion. Even though the Bank is below the \$10 billion threshold, it was uncertain if this change would eventually filter down to community banks. At this time, it appears as if the two-tier interchange pricing system is working and there has been no affect on the Bank's debit card fees. Other fees and service charges increased \$250 thousand primarily due to ATM interchange fees that were netted against ATM operating expenses in prior periods and included in noninterest expense. Also included in this category are fees for wire transfers, ATM activity fees and safe deposit box rentals.

Other real estate owned gains (losses), net: This category shows the net gains or losses on the sale of, or write-downs on, other real estate owned. A net loss of \$582 thousand was recorded in 2012 compared to a net gain of \$22 thousand in 2011. Included in the 2012 total is a write-down of \$349 thousand in the fourth quarter of 2012 on Property 1 in Table 14 and a \$217 thousand loss on a sale during the third quarter of 2012. Based on the level of other real estate owned at year-end 2012, the Bank expects expenses in this category for 2013 to be similar to 2012.

Other: This category decreased due to a recovery of \$538 thousand in 2011 related to prior period legal expenses as a lawsuit was decided in the Bank's favor.

Securities gains and losses: In 2012, other-than-temporary-impairment charges of \$100 thousand were recorded on three private label mortgage backed securities that were considered other than temporarily impaired. The 2011 OTTI charges of \$240 thousand were recorded on three equity securities and two private label mortgage backed securities. Net securities gains were \$44 thousand in 2012 compared to \$157 thousand in 2011.

The following table presents a comparison of noninterest income for the years ended December 31, 2012 and 2011:

Table 4. Noninterest Income

(Dollars in thousands)	December 31		Change

Total noninterest income	\$9,451	\$10,200	\$(749)	(7.3)

2011 versus 2010

Summary: Noninterest income totaled \$10.2 million compared to \$9.4 million in 2010, an increase of 8.9%. Most categories of noninterest income increased over the prior year and the net loss on securities transactions (losses and impairment charges) was less in 2011 than in 2010.

Investment and Trust Services: Asset management fees increased 4.2% over 2010 primarily due to higher market values during the year. Estate fees were less than the prior year, while fees generated from the Personal Investment Centers increased primarily from commissions on the sale of investments. Trust assets under management were \$481.5 million at year-end, down slightly from the \$490.4 million in 2010.

Loan service charges: For the third consecutive year, this category remained flat at \$1.2 million in 2011 compared to \$1.1 million in 2010 and \$1.2 million in 2009. Nearly all loan origination fees that are not deferred were less than in 2010. Fees earned for originating mortgages for sale in secondary market declined by approximately \$25 thousand as fewer mortgages were closed. Commercial loan service charges increased by \$214 thousand due primarily to

prepayment fees. Consumer loan fees, including a debt protection program, totaled \$168 thousand and were nearly the same as fees collected in 2010.

Mortgage banking fees: Mortgage banking activities consist primarily of servicing mortgage loans originated and sold by the Bank. Fees from servicing mortgages declined as the portfolio of mortgages serviced for others (\$65.6 million) continues to pay down. No gain on the sale of mortgages was recorded in 2011 compared to \$32 thousand in 2010. Loans originated for the secondary market are done on a fee basis and these fees are recorded in loan service charges. For loans that were previously sold with servicing retained, mortgage servicing rights (MSR) are recorded and represent the Bank's rights to receive future fee income from servicing these loans. MSR are measured and carried at the lower of cost or market value and are amortized over the expected life of the asset. In 2011 the MSR amortization was \$203 thousand compared to \$267 thousand in 2010. Net impairment charges on MSR were \$32 thousand in 2011. In 2010, the Bank recorded a net impairment reversal of \$146 thousand on previously recorded MSR impairment charges. While the Bank does not expect to originate and sell mortgages with servicing retained in the future, it will retain the existing servicing portfolio until those loans are paid-off. See Note 9 of the accompanying consolidated financial statements for additional information on mortgage servicing rights.

Deposit fees: Total deposit fees fell by \$248 thousand during the year with nearly every fee category showing a reduction from 2010. A reduction in retail overdraft fees of \$178 thousand accounted for most of the decline in this category. The Bank changed some of its overdraft processes so that it would be in compliance with new regulatory guidance and best practices, and these changes contributed to some of this decline. These changes included eliminating overdraft fees on items less than \$5 and expanded counseling on account usage to customers who habitually overdraw their account. Commercial account analysis fees and overdrafts also dropped during the year. After experiencing a decline in 2010 in fees from the Bank's overdraft protection program, fees in 2011 from this program held steady compared to the prior year. In 2010, new regulations required consumers to opt-in to such programs. After an initial decline in fees due to this change, the activity and fees appear to have stabilized.

Debit card and other service charges and fees: Debit card fees are comprised of both a retail and business card program. The business debit card offers a cash back rewards program based on usage and it continues to grow in popularity. In total, debit card fees exceeded \$1 million in 2011, increasing more than 16%. In July 2011, components of the Durbin Act went into effect that restricted interchange fees charged by banks. This price regulation is intended only for banks with assets greater than \$10 billion. Even though the Bank is below the \$10 billion threshold, it was uncertain if this change would eventually filter down to community banks. It appears as if the two-tier interchange pricing system is working and there has been no affect on the Bank's debit card fees. Other fees and service charges are essentially unchanged from 2010 and are comprised of fees for wire transfers, ATM activity and safe deposit box rentals.

Other: This category increased by \$564 thousand in 2011 due to the recovery of previously incurred legal expenses of \$538 thousand as a prior lawsuit was decided in the Bank's favor.

Securities gains and losses: In 2011, other-than-temporary-impairment charges of \$240 thousand were recorded on three equity securities and two private label mortgage backed securities that were considered other than temporarily

impaired. The 2010 OTTI charges included \$406 thousand on the merger of First Chester County Corporation into Tower Bancorp, Inc. and \$335 thousand on two private label mortgage backed securities. Net securities gains were \$157 thousand in 2011 compared to net gains of \$673 thousand in 2010.

The following table presents a comparison of noninterest income for the years ended December 31, 2011 and 2010:

Table 4.1 Noninterest Income

(Dollars in thousands)	December 31		Change

Noninterest Expense

2012 versus 2011

Summary: Noninterest expense increased by 8.0% to \$30.6 million compared to \$28.3 million in 2011. Salary and benefit expense contributed \$1.4 million of the increase.

Salaries and benefits: This category is the largest noninterest expense category and increased by \$1.4 million, or approximately 9% in 2012. The largest contributors to this increase are salary expense and pension expense. Salary expense increased by \$882 thousand due primarily to normal changes in staffing levels and salary adjustments. Pension expense increased \$368 thousand over 2011 due to the continued low interest rate environment. The Bank took several actions in 2012 to reduce its future pension costs, and expects the 2013 pension cost to be approximately \$400 thousand less than 2012. See Note 15 of the accompanying consolidated financial statements for additional information on benefit plans. The expense for all other employee benefits remained consistent with 2011 levels, including health insurance, which increased only \$28 thousand over 2011.

Advertising: Advertising costs increased by \$66 thousand over 2011. Advertising and promotion efforts in 2012 focused on brand recognition in our various markets and a deposit acquisition campaign designed to take advantage of some local deposit market disruption. In 2012, a new community office opened in Mechanicsburg, PA and special promotional efforts were taken to announce and market its opening. In addition, the Bank released a new version of its website (www.fmtrustonline.com) and introduced a mobile banking application in early 2013. The expenses associated with these projects were recognized in 2012.

Legal and professional fees: This category consists of fees paid to outside legal counsel, consultants, and audit fees. These fees increased slightly over 2011. Internal and external audit fees remained flat over 2011 and consulting fees increased \$19 thousand, primarily due to external loan review services.

Data processing: The largest cost in this category is the expense associated with the Bank's core processing system and accounted for \$1.2 million of the total data processing cost of \$1.6 million. In July 2011, the Bank changed its core processing system to FIS and its IBS product.

Other: Other noninterest expense was \$4.0 million in 2012, representing just a 1.9% increase over 2011. The Bank continued to prepay FHLB debt in 2012 and incurred \$439 thousand in penalties compared to \$344 thousand in 2011. Prepaying these advances will help future earnings. Charitable donations to local organizations, loan collection, and the Bank's capital stock tax increased over 2011, while postage costs decreased. Loan collection and foreclosure expense was \$304 thousand in 2012 compared to \$288 thousand in 2011. As the Bank works through its problem loans, this expense is not expected to decline in 2013.

The following table presents a comparison of noninterest expense for the years ended December 31, 2012 and 2011:

Table 5. Noninterest Expense

(Dollars in thousands)	December 31		Change	
	2012	2011	Amount	%
Noninterest Expense				
Salaries and benefits	\$16,626	\$15,195	\$1,431	9.4
Net occupancy expense	2,024	2,006	18	0.9
Furniture and equipment expense	875	837	38	4.5
Advertising	1,401	1,335	66	4.9
Legal and professional fees	1,170	1,069	101	9.4
Data processing	1,642	1,462	180	12.3

Intangible amortization	435	446	(11)	(2.5)
FDIC insurance	1,093	1,084	9	0.8
ATM/debit card processing	630	332	298	89.8
Other	3,960	3,886	74	1.9
Total noninterest expense	\$30,601	\$28,333	\$2,268	8.0

2011 versus 2010

Summary: Noninterest expense increased by 7.2% to \$28.3 million in 2011 from \$26.4 million in 2010. Salary and benefit expense contributed the largest increase (\$1.6 million), but was partially offset by a reduction in legal and professional fees of \$436 thousand.

Salaries and benefits: This category is the largest noninterest expense category and increased 11.8% in 2011 to \$15.2 million. The \$1.6 million increase in this category is comprised of an increase in salaries of \$664 thousand and approximately \$1 million in employee benefits. The increase in salary expense is primarily the result of staffing levels and normal salary adjustments. Benefit costs moved up over 2010 due to increases of \$181 thousand in incentive compensation plans, \$282 thousand in health insurance and \$264 thousand for the pension plans. The low rate environment continues to affect the pension plan and as a result pension expense has increased. The Bank expects its 2012 pension expense to approximate the 2011 amount. See Note 15 of the accompanying consolidated financial statements for additional information on benefit plans.

Advertising: Advertising costs were unchanged at \$1.3 million in both 2011 and 2010. Advertising and promotion efforts continue to focus on brand recognition in our various markets and are less concentrated on specific product promotion. In 2011, a new remote ATM was opened and special promotional efforts were taken to announce and

market its opening.

Legal and professional fees: This category consists of fees paid to outside legal counsel, consultants, and audit fees. These fees declined significantly during the year, \$436 thousand (29.0%) less than the year before. The majority of the decrease occurred in the legal fee account that was \$358 thousand less than in 2010. Other professional fees in this category fluctuated slightly from the prior year. In past years, several lawsuits against the Corporation inflated legal expenses. In 2011, the Corporation recovered \$538 thousand in prior period legal fees upon resolution of a lawsuit. This fee was recorded in other income.

Data processing: The largest cost in this category is the expense associated with the Bank's core processing system and accounted for \$970 thousand of the total data processing cost of \$1.5 million. In 2011, the Bank changed its core processing system to FIS and its IBS product.

FDIC insurance: The expense for FDIC insurance decreased by \$94 thousand and totaled \$1.1 million for the year. In 2011, the FDIC changed its premium assessment base from a deposit-based calculation to an asset-based calculation. Based on the new method, the Bank's insurance expense decreased despite an increase in deposits.

Other: Other noninterest expense was \$3.9 million in 2011, increasing \$795 thousand from \$3.1 million in 2010. In 2011, the Bank prepaid three high-rate FHLB advances and incurred penalties of \$344 thousand. Increases were also recorded in charitable donations to local organizations, loan collection and foreclosure expense, and expenses related to a new reporting format required by the SEC. Loan collection and foreclosure expense was \$288 thousand in 2011.

The following table presents a comparison of noninterest expense for the years ended December 31, 2011 and 2010:

Table 5.1 Noninterest Expense

(Dollars in thousands)	December 31		Change

Total noninterest expense	\$28,333	\$26,423	\$1,910	7.2

Provision for Income Taxes

The Corporation recorded a Federal income tax expense of \$512 thousand in 2012 compared to \$411 thousand in 2011 and \$2.9 million in 2010. The effective tax rate for 2012, 2011 and 2010 was 8.7%, 5.9% and 27.8%, respectively. With pretax income \$1.1 million less than in 2011, the Corporation's tax-free income had a larger effect on income tax than it did in 2011. The 2012 tax-free benefit from tax-free assets was approximately 29% of pretax income compared to approximately 25% in 2011. In addition, a tax adjustment in 2011 artificially reduced the effective tax rate in 2011. During the second quarter of 2011, an internal review discovered that tax-exempt commercial loans booked in the fourth quarter of 2008, during 2009, 2010 and the first quarter of 2011 were not properly coded as tax-exempt in the Bank's core processing system. This resulted in the income from these loans being recorded as taxable income and the benefit of the tax-exempt status was not reflected in the Corporation's income tax calculation. After a thorough review of the affected loans to determine the unrecorded tax benefit, and consultation with the Corporation's internal and external audit firms, the Corporation deemed the adjustment to be immaterial to the consolidated financial statements for the current and prior years and therefore, no prior period adjustment was required. The Corporation recorded the past income tax benefits during the second quarter of 2011. The adjustment to income tax expense made in the second quarter was a credit of approximately \$660 thousand attributable to the years 2008, 2009 and 2010 and approximately \$95 thousand attributable to the first quarter of 2011. This adjustment is reflected in the 2011 income tax expense. Had the tax adjustment of \$660 thousand been allocated proportionally to the years it was generated, the effective tax rate for 2011 and 2010 would have been 15.3% and 24.1%, respectively. For a more comprehensive analysis of Federal income tax expense refer to Note 12 of the accompanying financial statements.

Financial Condition

One method of evaluating the Corporation's condition is in terms of its sources and uses of funds. Assets represent uses of funds while liabilities represent sources of funds. At December 31, 2012, total assets increased approximately 4% over the prior year to \$1.027 billion compared to \$990.2 million, at the end of 2011.

Interest Bearing Deposits in Other Banks:

This asset increased by \$40.0 million year over year and averaged \$72.1 million for the year. The large increase during the year is due to a significant growth in deposits coupled with a reduction in loans. At year-end, approximately \$10 million was held by other banks in the form of certificates of deposit or money market accounts. Approximately \$45 million was held at the Federal Reserve.

Investment Securities:

The investment portfolio serves as a mechanism to invest funds if funding sources out pace lending activity, to provide liquidity for lending and operations, and provide collateral for deposits and borrowings. The Corporation invests in taxable and tax-free debt securities, and equity securities as part of its investment strategy. The mix of taxable and tax-free debt securities are determined by the Bank's Investment Committee and investing decisions are made as a component of balance sheet management. Debt securities include U.S. Government Agencies, U.S. Government Agency mortgage-backed securities, non-agency mortgage-backed securities, state and municipal government bonds, corporate debt and trust preferred securities. The equity portfolio consists of bank stocks only and is considered to be longer-term with a focus on capital appreciation. Tables 6 - 9 provide additional detail about the investment portfolio. All securities are classified as available for sale and all investment balances refer to fair value.

The following table presents amortized cost and estimated fair value of investment securities by type at December 31 for the past three years:

Table 6. Investment Securities at Amortized Cost and Estimated Fair Value

	2012		2011		2010

Asset-backed securities	32	0.44 %	-	-	-	-	14	4.27 %	46	1.30 %
	\$4,739	3.27 %	\$15,073	4.75 %	\$24,600	4.41 %	\$86,975	2.13 %	\$131,387	2.90 %

As shown in Table 3, the average balance of the investment portfolio was \$134.7 million for the year, only slightly higher than the prior year average balance. As interest rates continue to remain low, cash flow was reinvested in the portfolio at lower rates and the yield on the portfolio continued to decline. The yield declined to 2.96% for 2012 compared to 3.41% in 2011. The taxable to tax-free mix of the portfolio remained essentially the same over the prior year. Likewise, U.S. Agency mortgage backed securities and municipal bonds continue to comprise the largest sectors by fair value of the portfolio, 83% in total. The Bank expects that the portfolio will continue to remain concentrated in these investment sectors. The portfolio produced \$35.7 million in cash flow in 2012 while \$43.7 million was invested into the portfolio during the year. The majority of the investment purchases were made to maintain collateral positions. For the year, the Corporation recorded net securities gains of \$44 thousand and other-than-temporary impairment charges of \$100 thousand.

Equities: The equity portfolio is comprised entirely of bank stocks with the Bank and the Corporation each holding separate portfolios. The stocks held in the portfolio range from community banks to large national banks.

Municipal Bonds: The Bank's municipal bond portfolio is well diversified geographically and is comprised primarily of tax-exempt general obligation bonds (68% of the portfolio). The portfolio holds one hundred eight separate issues within twenty-seven states. The largest dollar exposure is to issuers in the state of Texas (\$9.8 million / 19 issues) and Pennsylvania (\$7.1 million / 11 issues). The majority of the bonds have either private bond insurance or have some other type of credit enhancement. The portfolio contains eighteen taxable municipal bonds with a fair value of \$16.8 million. When purchasing municipal bonds, the Bank looks primarily to the underlying credit of the issuer as a sign of credit quality and then to any credit enhancement. Approximately \$51 million of the portfolio is rated "A" or higher by Moody. The Bank owns five issues for \$2.0 million that are not rated by a nationally recognized rating agency. The Bank holds eight Build America Bonds on which the issuer receives a federal interest subsidy for the interest payable on the bond. As Congress debated the "fiscal cliff" at the end of 2012, the federal spending cuts mandated to take effect in 2013, and which would have resulted in the end of this federal direct pay interest subsidy, were not implemented. However, action on this issue was simply delayed until March 2013 and if implemented, these cuts could trigger a call provision on the bonds at prices that may result in a loss to the Bank.

Corporate Bonds: There is one variable rate bond in the corporate bond portfolio in the financial services sector. This bond is rated A3 by Moody's.

Trust Preferred Bonds: The following table provides additional detail about the Bank's trust preferred securities at December 31, 2012. The holdings remain the same as at the prior year end, but the unrealized loss has declined from \$1.2 million to \$1.1 million. The credit ratings for each bond are similar to the rating one year prior. Trust preferred securities are typically issued by a subsidiary grantor trust of a bank holding company, which uses the proceeds of the equity issuance to purchase deeply subordinated debt issued by the bank holding company. Trust-preferred securities can reflect single entity issues or a group of entities (pooled trust preferred). Pooled trust preferred securities have been the subject of significant write-downs due in some cases from the default of one issuer in the pool that then impairs the entire pool. Because of recent financial conditions, most trust preferred securities have realized a significant decline in value, but market prices continue to improve slowly. All of the Bank's issues are single issuer, variable rate notes with long final maturities (2027-2028) that continue to pay dividends.

Table 8. Trust Preferred Securities

(Dollars in thousands)

			\$5,905	\$4,830	\$(1,075)				

Mortgage-backed Securities: This sector holds \$51.5 million or 39% of the total portfolio. The majority of this sector (\$49.1 million) is comprised of U.S. Government Agency MBS. In addition, the Bank holds six private label mortgage-backed securities (PLMBS) with a fair value of \$2.4 million and an amortized cost of \$2.5 million. The PLMBS bonds paid down by more than \$1 million in 2012 and one issue paid off during the year.

The Bank's PLMBS portfolio is comprised primarily of Alt-A loans. Alt-A loans are first-lien residential mortgages that generally conform to traditional "prime" credit guidelines; however, loan factors such as the loan-to-value ratio, loan documentation, occupancy status or property type cause these loans not to qualify for standard underwriting programs. The Alt-A product in the Bank's portfolio is comprised of fixed-rate mortgages that were originated between 2003 and 2006 and all were originally rated AAA. The bonds issued in 2006 are experiencing the highest delinquency and loss rates. All of these bonds originally had some type of credit support tranche to absorb any loss prior to losses at the senior tranche held by the Bank, but this has eroded completely on some bonds as they have started to experience losses. The Bank recorded other-than-temporary impairment charges of \$100 thousand on three PLMBS bonds in 2012. Based on the performance of some the PLMBS, it appears as if the underwriting standards that were represented in the offering, and resulted in the AAA rating, were not followed. As a result, the Bank purchased some securities based on these misrepresentations, and it is most likely that these securities would not have been purchased had all the information been reported correctly. The Bank is participating in a lawsuit against certain issuers related to these misrepresentations. The following table provides additional detail about the Bank's PLMBS at December 31, 2012.

Table 8.1 Private Label Mortgage Backed Securities

Impairment:

Table 9 reflects the temporary impairment in the investment portfolio (excluding restricted stock), aggregated by investment category, length of time that individual securities have been in a continuous unrealized loss position and the number of securities in each category as of December 31, 2012 and 2011.

The condition of the portfolio at year-end 2012 as measured by the dollar amount of temporarily impaired securities remained virtually unchanged from the prior year; however, the amount of unrealized losses is \$738 thousand less than one year ago. The sectors with the largest improvement in unrealized loss are PLMBS and Trust Preferred securities. Contributing to the improvement in PLMBS was an OTTI charge of \$100 thousand taken in 2012. Trust preferred securities continue to represent the largest component (62%) of the total portfolio unrealized loss.

For securities with an unrealized loss, Management applies a systematic methodology in order to perform an assessment of the potential for other-than-temporary impairment. In the case of debt securities, investments considered for other-than-temporary impairment: (1) had a specified maturity or repricing date; (2) were generally expected to be redeemed at par, and (3) were expected to achieve a recovery in market value within a reasonable period of time. In addition, the Bank considers whether it intends to sell these securities or whether it will be forced to sell these securities before the earlier of amortized cost recovery or maturity. Equity securities are assessed for other-than-temporary impairment based on the length of time of impairment, dollar amount of the impairment and general market and financial conditions relating to specific issues. The impairment identified on debt and equity securities and subject to assessment at December 31, 2012, was deemed to be temporary and required no further adjustments to the financial statements, unless otherwise noted.

The unrealized loss in the trust preferred sector declined by approximately \$200 thousand compared to the prior year-end and market prices continued to show improvement during 2012. All of the Bank's trust preferred securities are variable rate notes with long maturities (2027 – 2028) from companies that received money (and in some cases paid back) from the Troubled Asset Relief Program (TARP), continue to pay dividends and have raised capital. The credit ratings on this portfolio are similar to the prior year and no bonds have missed or suspended any payments. At December 31, 2012, the Bank believes it will be able to collect all interest and principal due on these bonds and no other-than-temporary-impairment charges were recorded. For additional detail on the Bank's trust preferred securities see Table 8.

The PLMBS sector continues to show a gross unrealized loss of \$123 thousand on five securities. The majority of this sector is comprised of "Alt-A" PLMBS. These bonds were all rated AAA at time of purchase but have since experienced rating declines. Some have experienced increased delinquencies and defaults, while others have seen the credit support increase as the bonds paid-down. The Bank monitors the performance of the Alt-A investments on a regular basis and reviews delinquencies, default rates, credit support levels and various cash flow stress test scenarios. In determining the credit related loss, Management considers all principal past due 60 days or more as a loss. If additional principal moves beyond 60 days past due, it will also be considered a loss. As a result of the analysis on PLMBS it was determined that three bonds contained losses that were considered other-than-temporary. Management determined \$100 thousand was credit related and therefore, recorded an impairment charge of \$100 thousand against earnings in 2012. The market for PLMBS continues to be weak and Management believes that this factor accounts for a portion of the unrealized losses that is not attributable to credit issues. Management continues to monitor these securities and it is possible that additional write-downs may occur if current loss trends continue. The Bank is participating in a class-action lawsuit against one PLMBS servicer that centers on defective warranties and representations made as part of the underwriting process. The resolution of this action is unknown at this time. For additional detail on the Bank's PLMBS see Table 8.1.

The Bank held \$3.6 million of restricted stock at the end of 2012. The restricted stock is comprised primarily of an investment in the Federal Home Loan Bank of Pittsburgh (FHLB). FHLB stock is carried at a cost of \$100 per share. In 2008, FHLB announced a capital restoration plan that resulted in it discontinuing paying dividends and repurchasing excess capital stock from its members. However, during 2012, FHLB repurchased \$1.5 million in stock as part of special repurchases and paid a small dividend. However, FHLB has not indicated that it has returned to its prior practice of repurchasing excess capital stock. As of December 31, 2012, the Bank held \$1.6 million in FHLB stock in excess of what it would have been required to hold prior to the suspension of the stock repurchase plan. FHLB stock is evaluated for impairment primarily based on an assessment of the ultimate recoverability of its cost. As a government sponsored entity, FHLB has the ability to raise funding through the U.S. Treasury that can be used to support its operations. There is not a public market for FHLB stock and the benefits of FHLB membership (e.g., liquidity and low cost funding) add value to the stock beyond purely financial measures. If FHLB stock were deemed to be impaired, the write-down for the Bank could be significant. Management intends to remain a member of the FHLB and believes that it will be able to fully recover the cost basis of this investment.

Loans:

Average gross loans for 2012 decreased by \$3.2 million to \$761.5 million compared to \$764.6 million in 2011. Commercial loans were the only loan category to show an increase in average balances during the year, but the increase was more than offset by a decline in average mortgage and consumer loans during the year. The yield on the portfolio declined again in 2012 after another year of low interest rates, dropping from 5.09% in 2011 to 4.81% in 2012. Table 3 presents detail on the 2012 average balances and yields earned on loans. The following table shows loans outstanding, by primary collateral, as of December 31 for the past 5 years.

Residential real estate: This category is comprised of consumer purpose loans secured by residential real estate and to a lesser extent, commercial purpose loans secured by residential real estate. The consumer purpose category represents traditional residential mortgage loans and home equity products (primarily junior liens and lines of credit). Total residential real estate loans increased slightly over 2011 as the result of an increase in both residential and commercial first lien mortgages. The Bank retained more consumer mortgages in its portfolio in 2012 than in 2011 when all production was sold in the secondary market. The loans that were retained were identified as part of a selective retention program designed to hold mortgages the Bank believes will have a shorter than average life. The Bank expects to continue the selective retention program in 2013 and for this balance to increase in 2013. However, if the volume of new mortgages booked is not sufficient to offset the amortization in the portfolio, the balance will decline again in 2013. In 2012, the Bank originated \$52.1 million in mortgages, including approximately \$13 million for a fee through a third party brokerage agreement. The Bank does not originate or hold any loans that would be considered sub-prime or Alt-A, and does not generally originate mortgages outside of its primary market area.

Home equity lending has continued to be slow and the Bank has seen both the fixed rate loan product and the variable rate line product decline again in 2012. Many consumers have seen equity in their homes disappear or have been reluctant to borrow due to uncertainty in the economy. Despite low rates, the Bank expects that home equity lending will not pick up significantly until the overall economy improves.

Commercial purpose loans in this category represent loans made for various business needs, but are secured with residential real estate. In addition to the real estate collateral, it is possible that additional security is provided by personal guarantees or UCC filings. These loans are underwritten as commercial loans and are not originated to be sold.

Residential real estate construction: The largest component of this category represents loans to residential real estate developers (\$12.1 million), while loans for individuals to construct personal residences totaled \$3.3 million at December 31, 2012. This category continued to decline again in 2012 as the residential real estate market for new construction is still slow. The Bank's exposure to residential construction loans is concentrated primarily in south central Pennsylvania. Real estate construction loans, especially land development loans, frequently provide an interest reserve in order to assist the developer during the development stage when minimal cash flow is generated. All real estate construction loans are underwritten in the same manner, regardless of the use of an interest reserve. At December 31, 2012, the Bank had \$8.9 million in residential real estate construction loans funded with an interest reserve and capitalized \$230 thousand of interest from these reserves on active projects in 2012. Real estate construction loans are monitored on a regular basis by either an independent third party inspector or the assigned loan officer depending on loan amount or complexity of the project. This monitoring process includes at a minimum, the submission of invoices and AIA documents of costs incurred by the borrower, on-site inspections, and a signature by the assigned loan officer for disbursement of funds.

Commercial loans: Commercial loans continue to be the largest loan category on the balance sheet; however, these loans declined 2% compared to the end of 2011. In 2012, the Bank approved approximately \$124 million in commercial loans and commitments with approximately \$106 million in new money advances. Low rates continue to make variable rate loans attractive to borrowers. However, in today's low rate environment, the extremely low rates squeeze loan profitability. As a result, the Bank continues to try to impose rate floors on most new and refinanced loans during the year. The competition for good quality loans continues to be strong with the best customers able to attract multiple offers. The Bank offers competitive products, but believes it is not always in the best long-term interest of the Bank to match every competitive offer.

Commercial real estate (CRE): This category includes commercial, industrial, farm and agricultural loans, where real estate serves as the primary collateral for the loan. This loan category increased only 1.4% over the prior year. The largest sectors (by collateral) in the commercial real estate category are: hotels and motels (\$44.0 million), office buildings (\$41.7 million), farm land (\$41.0 million) and shopping centers (\$25.7 million). New loan production was nearly offset entirely by amortizations and payoffs during the year. In addition, the Bank transferred \$3.6 million from this category to OREO in 2012 which also offset any growth in the portfolio.

Commercial (C&I): This category includes commercial, industrial, farm, agricultural, and municipal loans. Collateral for these loans may include business assets or equipment, personal guarantees, or other non-real estate collateral. C&I loans decreased \$16.0 million during 2012. This decline was driven primarily by a decrease in municipal loans of \$14.2 million due to two large accounts refinancing with a bond issue during the year. The largest sectors (by industry) are: municipal loans (\$43.4 million), manufacturing (\$28.3 million), retail trades (\$17.2 million), utilities (\$14.9 million) and construction (\$14.9 million).

The Bank is active in its market in pursuing commercial lending opportunities, but supplements in-market growth with purchased loan participations. The Bank purchases commercial loan participations in an effort to increase its commercial lending and diversify its loan mix, both geographically and by industry sector. Purchased loans are originated primarily within the south central Pennsylvania market and are purchased from only a few select counter parties. These loans usually represent an opportunity to participate in larger credits that are not available in market, with the benefit of lower origination and servicing costs. In 2012, the Bank purchased \$12.4 million of loan participations and commitments, with \$11.2 million secured by real estate collateral. The amount purchased in 2012 is less than the amount of participations purchased in 2011. At December 31, 2012, the Bank held \$142.9 million in purchased loan participations in its portfolio compared to \$152.9 million at the prior year-end. The Bank expects that commercial lending will continue to be the primary area of loan growth in the future via in-market and loan participation activity. To enhance these growth opportunities, the Bank continues to partner with two Small Business Development Centers at local universities and is a designated Small Business Administration lender.

Consumer loans: This category is comprised of direct, indirect (primarily automobile) and unsecured personal lines of credit and continues to show a downward trend in outstanding balances. This category declined by \$2.8 million from 2011. Most of the decrease occurred in the indirect lending portfolio. The Bank's indirect lending portfolio is \$1.4 million, down from approximately \$3.7 million at year-end 2011. The Bank exited this line of business in the first quarter of 2010 and no new originations have been booked since then. This portfolio also contains \$3.4 million of unsecured personal lines of credit and this balance is virtually unchanged from the prior year-end. With exiting the indirect lending business, the unwillingness of consumers to increase their debt, and the highly price competitive nature of consumer lending, the consumer portfolio is expected to continue to run-down throughout 2013.

The following table presents the stated maturities (or earlier call dates) of selected loans as of December 31, 2012. Residential mortgage and consumer loans are excluded from the presentation.

Table 11. Maturities and Interest Rate Terms of Selected Loans

(Dollars in thousands)	Less than		Over	Total
	1 year	1-5 years	5 years	
Loans with fixed rates	\$20,229	\$33,837	\$40,936	\$95,002

Commercial, industrial and agricultural	58,183	46,280	62,271	166,734
	\$144,747	\$98,647	\$302,646	\$546,040

Loan Quality:

Management utilizes a risk rating scale ranging from 1 (Prime) to 9 (Loss) to evaluate loan quality. This risk rating scale is used primarily for commercial purpose loans. Consumer purpose loans are identified as either a pass or substandard rating. Substandard consumer loans are loans that are 90 days or more past due and still accruing. Loans rated 1 – 4 are considered pass credits. Loans that are rated 5 are pass credits, but have been identified as credits that are likely to warrant additional attention and monitoring. Loans rated 6 (Other Assets Especially Mentioned - OAEM) or worse begin to receive enhanced monitoring and reporting by the Bank. Loans rated 7 (Substandard) or 8 (Doubtful) exhibit the greatest financial weakness and present the greatest possible risk of loss to the Bank. Nonaccrual loans are rated no better than 7. The following factors represent some of the factors used in determining the risk rating of a borrower: cash flow, debt coverage, liquidity, management, and collateral. Risk ratings, for pass credits, are generally reviewed annually for term debt and at renewal for revolving or renewing debt. The Bank monitors loan quality by reviewing four measurements: (1) loans rated 6 (OAEM) or worse (collectively “watch list”), (2) delinquent loans, (3) other real estate owned (OREO), and (4) net-charge-offs. Management compares trends in these measurements with the Bank’s internally established targets, as well as its national peer group.

Watch list loans exhibit financial weaknesses that increase the potential risk of default or loss to the Bank. However, inclusion on the watch list, does not by itself, mean a loss is certain. The watch list includes both performing and nonperforming loans. Watch list loans totaled \$104.3 million at year-end compared to \$95.7 million at the prior year end. The watch list is comprised of \$32.7 million rated 6, \$68.8 million rated 7 and \$2.8 million rated 8. The loan, rated 8, represents one loan of a total \$8.1 million relationship (see Table 13, credit 8) and is secured by land for a

residential real estate development. When initially rated an 8 at September 30, 2012, there was not sufficient collateral to support the entire \$8.1 million relationship and the doubtful balance represented the potential collateral shortage. The Bank is in the process of negotiating additional collateral to fully secure the loan and has maintained the 8 rating. The Bank has no loans rated 9 (Loss). The Bank's Loan Management Committee reviews these loans and risk ratings on a quarterly basis in order to proactively identify and manage problem loans. In addition, a committee meets monthly to discuss possible workout strategies for OREO and all credits rated 7 or worse. Management also tracks other commercial loan risk measurements including high loan to value loans, concentrations, participations and policy exceptions and reports these to the Credit Risk Oversight Committee of the Board of Directors. The Bank also uses a third-party consultant to assist with internal loan review with a goal of reviewing 60% of commercial loans each year. The FDIC defines certain supervisory loan-to-value lending limits. The Bank's internal loan-to-value limits are all equal to, or have a lower loan-to-value limit, than the supervisory limits. At December 31, 2012, the Bank had loans of \$33.4 million that exceeded the supervisory limit.

Delinquent loans are a result of borrowers' cash flow and/or alternative sources of cash being insufficient to repay loans. The Bank's likelihood of collateral liquidation to repay the loans becomes more probable the further behind a borrower falls, particularly when loans reach 90 days or more past due. Management monitors the performance status of loans by the use of an aging report. The aging report can provide an early indicator of loans that may become severely delinquent and possibly result in a loss to the Bank. See Note 6 in the accompanying financial statements for a note that presents the aging of payments in the loan portfolio.

Nonaccruing loans generally represent Management's determination that the borrower will be unable to repay the loan in accordance with its contractual terms and that collateral liquidation may or may not fully repay both interest and principal. It is the Bank's policy to evaluate the probable collectability of principal and interest due under terms of loan contracts for all loans 90-days or more, nonaccrual loans, or impaired loans. Further, it is the Bank's policy to discontinue accruing interest on loans that are not adequately secured and in the process of collection. Upon determination of nonaccrual status, the Bank subtracts any current year accrued and unpaid interest from its income, and any prior year accrued and unpaid interest from the allowance for loan losses. Management continually monitors the status of nonperforming loans, the value of any collateral and potential of risk of loss. Nonaccrual loans are rated no better than 7 (Substandard).

Loan quality has declined during 2012, as measured by the balance of nonperforming loans (nonaccrual and loans past due 90-days or more). Nonperforming loans have increased by \$14.4 million with the majority of the increase coming in the commercial real estate sector. Table 13 identifies the most significant loans in nonaccrual status. These nonaccrual loans account for 82% of the total nonaccrual balance and credits 5 – 11 added \$20.4 million to nonaccrual during 2012. Also included in the nonaccrual total is \$11.4 million of loans classified as troubled debt restructurings (TDR). A TDR loan is maintained on nonaccrual status until a satisfactory repayment history is established. All of the Bank's TDR loans are in compliance with the modified terms and it is likely that some will be able to be returned to performing status in 2013. It is possible that other nonaccrual loans could be removed from nonaccrual status in 2013. However, it is also possible that other loans may become delinquent and nonperforming loans could remain at a high level due to lengthy workout periods on these loans. All loans on the watch list that are not on nonaccrual or past due 90 days more are considered potential problem loans. Potential problem loans at December 31, 2012 totaled \$67.3 million compared to \$73.1 million at December 31, 2011.

The following table presents a five year summary of nonperforming assets as of December 31 of each year:

Table 12. Nonperforming Assets

(Dollars in thousands)	December 31

Agricultural						\$ 2,666
	\$29,852	\$	-			

(1) Appraisal value, as reported, does not reflect the pay-off of any senior liens or the cost to liquidate the collateral, but does reflect only the Bank's share of the collateral if it is a participated loan.

Credit 1 was approved as a loan restructuring and was returned to accrual status in March 2013. Credit 2 was charged down by \$1.6 million in the first quarter of 2012 due to a reduced appraisal value. This credit is part of a participated loan and it is likely that the lead bank will begin foreclosure action in 2013. Credit 3 is in the process of foreclosure. Credit 4 is a TDR that is performing in accordance with the modified terms. This credit is part of a shared national credit and it is unlikely to return to accrual status until approved by the lead regulatory agency. Credit 5 is a TDR that is performing in accordance with the modified terms and is on nonaccrual until a satisfactory repayment history is established. Credit 6 was written down by \$259 thousand in 2012. Foreclosure action has been initiated on this credit. Credit 7 is exploring external financing to pay off its loan and is considering restructuring options from the Bank, but it is unknown if these efforts will be successful. Credit 8 is in the process of negotiation with the Bank for additional collateral and possible loan restructuring. Credit 9 is a TDR. Two plant facilities were sold through a court approved bankruptcy in January 2013. The Bank expects to receive a pay down on this credit from the sale, but the amount is unknown at this time. Credit 10 is a participated loan and the Bank is in discussion with the lead bank on a workout strategy. Credit 11 is a TDR and is performing in accordance with its modified terms.

In addition to monitoring nonaccrual loans, the Bank also closely monitors impaired loans and troubled debt restructurings (TDR). A loan is considered to be impaired when, based on current information and events, it is probable that the Bank will be unable to collect all interest and principal payments due according to the originally contracted terms of the loan agreement. Nonaccrual loans, excluding consumer purpose loans, and TDR loans are considered impaired and the Bank reviews all other loans rated 7 or worse for impaired status. Impaired loans totaled \$39.4 million at year-end compared to \$28.0 million at December 31, 2011. The increase in impaired loans occurred primarily in the commercial real estate category. The majority of the increase was the addition of credits 6 and 8 in the nonaccrual table as impaired loans. See Note 6 in the accompanying financial statements for a note that reports on impaired loans.

A loan is considered a troubled debt restructuring (TDR) if the creditor (the Bank), for economic or legal reasons related to the debtor's financial difficulties, grants a concession to the debtor that it would not otherwise consider. The Bank reviews all loans rated 5 or worse when it is providing a loan restructure, modification or new credit facility to determine if the action is a TDR. If a TDR loan is placed on nonaccrual status, it remains on nonaccrual status for at least six months to ensure performance. All TDR loans are in compliance with their modified terms. The largest TDR loans are referenced as credits 4, 5, 9 and 11 on Table 13. All of the TDR loans are commercial purpose loans except for three consumer loans totaling \$322 thousand. See Note 6 in the accompanying financial statements for a note that identifies TDR loans in the portfolio.

The Bank holds \$5.1 million of other real estate owned (OREO), comprised of ten properties compared to \$3.2 million and seven properties at December 31, 2011. The largest property (\$2.8 million, property 2 in Table 14 below) was added in 2012 and represents a failed residential real estate development in central Pennsylvania. During 2012, the Bank recorded losses on the sales of, or write-downs on OREO of \$582 thousand that is recorded in other income. Included in this total is a fourth quarter 2012 write-down of \$349 thousand on property number 1 in Table 14. A write-down of \$800 thousand was recorded on property number 2 through the allowance for loan losses shortly after acquisition. The following table provides additional information on significant other real estate owned properties:

Table 14. Other Real Estate Owned

December 31, 2012

(Dollars in thousands)	Date			Location	Last Appraisal
	Acquired	Balance	Collateral		
Property 1	2011	\$ 1,970	unimproved and improved real estate for residential development on four separate tracts totaling 150 acres	PA	Nov-12 \$2,141

Property 2	2012	2,758	1st, 2nd, and 3rd liens residential development land - four tracts with 294 acres	PA	Aug-12
		\$ 4,728			\$ 3,292

At December 31, 2012, the Bank had \$121 thousand of residential properties in the process of foreclosure compared to \$1.0 million at the end of 2011.

Allowance for Loan Losses:

Management performs a monthly evaluation of the adequacy of the allowance for loan losses (ALL). The ALL is determined by segmenting the loan portfolio based on the loan's collateral. The Bank further classifies the portfolio based on the primary purpose of the loan, either consumer or commercial. When calculating the ALL, consideration is given to a variety of factors in establishing this estimate including, but not limited to, current economic conditions, diversification of the loan portfolio, delinquency statistics, results of internal loan reviews, historical charge-offs, the adequacy of the underlying collateral (if collateral dependent) and other relevant factors. The Bank begins enhanced monitoring of all loans rated 6 (OAEM) or worse, and obtains a new appraisal or asset valuation for any loan rated 7 (substandard) or worse. Management, at its discretion, may determine that additional adjustments to the appraisal or valuation are required. Valuation adjustments will be made as necessary based on factors, including, but not limited to: the economy, deferred maintenance, industry, type of property/equipment, age of the appraisal, etc. and the knowledge Management has about a particular situation. In addition, the cost to sell or liquidate the collateral is also estimated and deducted from the valuation in order to determine the net realizable value to the Bank. When determining the allowance for loan losses, certain factors involved in the evaluation are inherently subjective and require material estimates that may be susceptible to significant change, including the amounts and timing of future cash flows expected to be received on impaired loans. Management monitors the adequacy of the allowance for loan losses on an ongoing basis and reports its adequacy quarterly to the Credit Risk Oversight Committee of the Board of Directors. Management believes that the allowance for loan losses at December 31, 2012 is adequate.

The analysis for determining the ALL is consistent with guidance set forth in generally accepted accounting principles (GAAP) and the Interagency Policy Statement on the Allowance for Loan and Lease Losses. The analysis has two components, specific and general allocations. The specific component addresses specific reserves established for impaired loans. A loan is considered to be impaired when, based on current information and events, it is probable that the Bank will be unable to collect all interest and principal payments due according to the originally contracted terms of the loan agreement. Collateral values discounted for market conditions and selling costs are used to establish specific allocations for impaired loans. However, it is possible that as a result of the credit analysis, a specific reserve is not required for an impaired loan. Despite an increase in impaired loans in 2012, the specific ALL allocation for these loans declined. The largest loans added to the impaired list are adequately secured and required no specific ALL. Charge-offs on impaired loans in 2012 were the primary reason for the decline in the specific ALL allocation. See the previous impaired loan discussion for a table that reports impaired loans and the specific reserve established for impaired loans.

The general allocation component addresses the reserves established for pools of homogenous loans. The general component includes a quantitative and qualitative analysis. When calculating the general allocation, the Bank segregates its loan portfolio into the following sectors based primarily on the type of supporting collateral: residential real estate, commercial, industrial or agricultural real estate; commercial and industrial (C&I non-real estate), and consumer. The residential real estate sector is further segregated by first lien loans, junior liens and home equity products, and residential real estate construction. The historical loss experience factor was 1.05% of gross loans at December 31, 2012, compared to .70% at the prior year-end. The increase is due primarily to the increase in charge-offs during the eight quarter historical review period. The quantitative analysis uses the Bank's eight quarter rolling historical loan loss experience adjusted for factors derived from current economic and market conditions that have been determined to have an effect on the probability and magnitude of a loss. The qualitative analysis utilizes a risk matrix that incorporates qualitative and environmental factors such as: loan volume, management, loan review process, credit concentrations, competition, and legal and regulatory issues. These factors are each risk rated from minimal to high risk and in total can add up to a qualitative factor of 37.5 basis points. At December 31, 2012, the qualitative factor was 21.5 basis points, compared to 18.5 basis points at December 31, 2011. These factors are determined on the basis of Management's observation, judgment and experience.

Real estate appraisals and collateral valuations are an important part of the Bank's process for determining potential loss on collateral dependent loans and thereby have a direct effect on the determination of loan reserves, charge-offs and the calculation of the allowance for loan losses. As long as the loan remains a performing loan, no further updates to appraisals are required. If a loan or relationship migrates to risk rating of 7 or worse, an evaluation for impairment status is made based on the current information available at the time of downgrade and a new appraisal or collateral valuation is obtained. We believe this practice complies with the regulatory guidance dated December 12, 2010.

In determining the allowance for loan losses, Management, at its discretion, may determine that additional adjustments to the fair value obtained from an appraisal or collateral valuation are required. Adjustments will be made as necessary based on factors, including, but not limited to the economy, deferred maintenance, industry, type of property or equipment etc., and the knowledge Management has about a particular situation. In addition, the cost to sell or liquidate the collateral is also estimated and deducted from the valuation in order to determine the net realizable value to the Bank. If an appraisal is not available, Management may make its best estimate of the real value of the collateral or use last known market value and apply appropriate discounts. If an adjustment is made to the collateral valuation, this will be documented with appropriate support and reported to the Loan Management Committee.

The following table shows, by loan segment, the activity in the ALL, the loans that were evaluated for the ALL under a specific reserve (individually) and those that were evaluated under a general reserve (collectively), and the amount of the allowance established in each category as of December 31, 2012:

Table 15. Allowance by Loan Segment

(Dollars in thousands)	Residential Real Estate 1-4 Family			Commercial Industrial & Agricultural Real Estate	Commercial Industrial & Agricultural	Consumer	Total
	First Liens	Junior Liens & Lines of Credit	Construction				
Allowance at December 31, 2011	\$ 1,049	\$ 308	\$ 1,222	\$ 5,257	\$ 1,651	\$ 236	\$ 9,723
Charge-offs	(251)	(71)	-	(3,298)	(861)	(236)	(4,717)

Allowance established for loans evaluated:							
Individually	\$ 20	\$ 3	\$ -	\$ 357	\$ 467	\$ -	\$ 847
Collectively	893	303	899	6,093	1,153	191	9,532
Allowance at December 31, 2012	\$ 913	\$ 306	\$ 899	\$ 6,450	\$ 1,620	\$ 191	\$ 10,379

The following table shows the allocation of the allowance for loan losses by loan category as of December 31 for each of the past five years:

Table 16. Allocation of the Allowance for Loan Losses

(Dollars in thousands)	2012	2011	2010	2009 (1)	2008
	Balance	% of Allowance	Balance	% of Allowance	Balance

Residential real estate 1-4 family										
First liens	\$913	9	\$1,049	11	\$600	7	\$550	6	\$1,324	18
Junior liens and lines of credit	306	3	308	3	352	4	278	3	-	-
Total	1,219	12	1,357	14	952	11	828	9	1,324	18
Residential real estate construction	899	9	1,222	13	2,596	29	3,087	35	-	-
Commercial, industrial and agricultural real estate	6,450	62	5,257	54	3,358	38	4,175	47	-	-
Commercial, industrial and agricultural	1,620	16	1,651	17	1,578	18	752	8	5,739	78
Consumer	191	2	236	2	317	4	95	1	294	4
	\$10,379	100	\$9,723	100	\$8,801	100	\$8,937	100	\$7,357	100

The allocation of the allowance for loan losses is based on estimates and is not intended to imply limitations on the usage of the allowance. The entire allowance is available to absorb any losses without regard to the category in which the loan is classified.

(1) In 2009, the Bank began allocating the allowance for loan losses according to the primary collateral of the loan, or if there was no collateral, by the primary purpose of the loan. In prior years the allocation was made by the primary purpose of the loan. This has resulted in a higher allocation for periods after 2009 in development and commercial real estate, that in prior periods was allocated to commercial, industrial and agricultural loans. Data for periods prior to 2009 using the current methodology is not available and therefore, comparisons by line item to periods prior to 2009 may not be accurate.

The percentage of the loans in each category to total gross loans as of December 31 for each of the past five years:

	2012	2011	2010	2009	2008
Residential real estate 1-4 family					
First liens	21 %	19 %	19 %	19 %	23 %
Junior liens and lines of credit	6 %	6 %	8 %	9 %	9 %
Total	27 %	25 %	27 %	28 %	32 %
Residential real estate construction	2 %	3 %	11 %	11 %	11 %
Commercial, industrial and agricultural real estate	48 %	47 %	40 %	38 %	34 %
Commercial, industrial and agricultural	22 %	24 %	20 %	20 %	20 %
Consumer	1 %	1 %	2 %	3 %	3 %
	100 %	100 %	100 %	100 %	100 %

The Bank added \$5.2 million to the ALL through the provision for loan loss expense in 2012 compared to \$7.5 million in the prior year. Net charge-offs totaled \$4.6 million for the year and as a result, the ALL increased by \$656 thousand. The net loan charge-off ratio decreased to .60% for the year compared to .86% for the prior year and the ALL coverage ratio increased to 1.38% compared to 1.27% at the prior year-end.

Charged-off loans usually result from: (1) a borrower being legally relieved of loan repayment responsibility through bankruptcy, (2) insufficient proceeds from the sale of collateral to repay a loan; or (3) the borrower and/or guarantor does not own other marketable assets that, if sold, would generate sufficient sale proceeds to repay a loan.

The Bank recorded net loan charge-offs of \$4.6 million in 2012, \$2.0 million less than in 2011, but still the second highest net charge-off level in the last five years. Gross charge-offs declined by \$2.3 million year over year with the decrease occurring in the residential real estate construction category. The largest gross charge-offs occurred in the commercial real estate sector for \$3.3 million in 2012. Within this sector, four charge-offs accounted for \$3.1 million of the total. One loan was charged down by \$1.6 million due to an annual appraisal update that resulted in a lower valuation for the second consecutive year. A second was written down by \$259 thousand based on appraisals and prior to starting foreclosure action. These two loans are Credits 2 and 6, respectively in Table 13. A third write-down (\$400 thousand) was taken on another loan that is also on nonaccrual status. The fourth charge-off mentioned was for \$800 thousand as the property was moved to OREO (Property 2, Table 14). The charge-offs in the C&I category consisted primarily of one for \$249 thousand (real estate related business) and one for \$305 thousand (restaurant).

If nonperforming loans remain at the current level, it is possible that net charge-offs will remain higher than historical averages.

Table 17. Historical Allowance for Loan Losses

(Dollars in thousands)	December 31				
	2012	2011	2010	2009	2008
Balance at beginning of year	\$9,723	\$8,801	\$8,937	\$7,357	\$7,361

Allowance as a percentage of loans	1.38 %	1.27 %	1.18 %	1.21 %	1.09 %

Goodwill:

The Bank has \$9.0 million of goodwill recorded on its balance sheet as the result of corporate acquisitions. Goodwill is not amortized, nor deductible for tax purposes. However, goodwill is tested for impairment at least annually in accordance with ASC Topic 350. Goodwill was tested for impairment as of August 31, 2012. The impairment test was

conducted following the step-one test under ASC Topic 350 rather than the qualitative assessment permitted under ASU 2011-08 that was effective for fiscal years beginning after December 15, 2011. The Corporation chose not to use the qualitative assessment method for the August 31, 2012 test primarily due to a lower level of earnings and the fact that the Corporation's stock price is trading below its book value. The Corporation uses several different weighted methods to determine the fair value of the reporting unit under the step-one test, including a dividend analysis, comparable sale transactions, and change of control premium estimates. As a result of the step-one test, the estimated fair value of the Corporation exceeded its carrying value by approximately 5% (compared to 12% in 2011) and Management determined goodwill was not impaired. The decline in the valuation excess compared to 2011 is primarily the result of the book value of the Corporation increasing more than the estimated value, even though both values increased over the prior year. If the step-one test fails, a more comprehensive step-two test is performed before a final determination of impairment is made. At December 31, 2012, Management subsequently considered certain qualitative factors affecting the Corporation and determined that it was not likely that the results of the prior test had changed and it determined that goodwill was not impaired at year end. If goodwill is determined to be impaired, an impairment write-down is charged to results of operations in the period in which the impairment is determined. For more information on Goodwill refer to Note 8 of the accompanying financial statements.

Deposits:

The Bank depends on deposits generated by its community banking offices as its primary source of funds. The Bank offers numerous deposit products including demand deposits, savings, money management accounts, and time deposits (certificates of deposits/CDs). Total deposits at December 31, 2012 were \$874.4 million, an increase of 11% over the year-end 2011 balance of \$788.0 million. The Bank heavily promoted its deposit products during the year and was able to take advantage of some disruption in the local deposit market. The Bank's core deposit accounts (non-brokered) increased 10.3% while brokered time deposits increased 23.1% over year-end 2011 balances. The largest retail dollar increases occurred in the money management account, and demand deposits recorded the largest retail deposit percentage increase for the second straight year. For 2012, total deposits averaged \$848.6 million at an average cost of .61% compared to \$778.1 million at a cost of .85% in 2011. In January 2013, the Bank introduced a fully FDIC insured product that is available as either a demand deposit account or as an interest-bearing checking account. This product is designed to replace the Bank's collateralized sweep repurchase product and to provide an option for accounts that were previously fully-insured under the Transaction Account Guarantee program that expired on December 31, 2012. Table 3 presents detail on the 2012 average balance and rates paid on deposits. The following table presents a comparison of deposits for the past five years.

Table 18. Deposits

(Dollars in thousands)	December 31		2011		2010		2009		2008	
	Balance	% Change	Balance	% Change	Balance	% Change	Balance	% Change	Balance	% Change
Noninterest-bearing checking	\$123,623	18.6	\$104,245	15.4	\$90,317	16.3	\$77,675	(10.7)	\$86,954	
Interest-bearing checking	135,454	15.3	117,479	13.0	103,918	6.4	97,636	13.2	86,241	
Money management	380,079	16.5	326,219	12.6	289,763	19.0	243,600	19.9	203,171	
Savings	57,165	10.5	51,728	7.5	48,138	2.5	46,986	2.1	46,006	
Retail time deposits	127,861	(13.3)	147,479	(8.6)	161,399	(22.2)	207,338	10.0	188,465	
Brokered time deposits	50,258	23.1	40,836	0.1	40,796	(37.4)	65,130	294.6	16,504	
Total deposits	\$874,440	11.0	\$787,986	7.3	\$734,331	(0.5)	\$738,365	17.7	\$627,341	

Noninterest-bearing checking: Noninterest-bearing demand deposit accounts represent a very valuable funding source to the Bank and increased 18.6% in 2012. Every demand deposit category showed an increase during the year with the largest increases coming from small business and commercial accounts.

Interest-bearing checking: This category saw an increase in both the ending and average balance for the year compared to 2011. The cost of these funds declined to .07% in 2012 compared to .09% in 2011. All account

categories in this product increased during the year.

Money management: This category continued its double digit percentage growth in 2012. Retail accounts increased by \$21 million, but the largest growth (\$46 million) came in the Bank's product that offers FDIC insurance on the entire balance. This product pays a lower rate than the standard product, but the full FDIC coverage offers added value. The product category is comprised primarily of municipal and commercial deposits and accounted for \$70 million of the outstanding money management balance at year-end. The cost of the money management product declined by .35% during the year. Despite rate reductions during the year, the yield remained competitive and consumers like the liquidity offered by the product. The Bank has seen some money move from CDs into this product during the year,

Savings: Savings accounts increased 10.5% during the year and represent the fifth consecutive year of growth. Retail savings accounts increased \$4.1 million and accounted for the largest growth category within this product.

Time deposits: Retail time deposits have declined for the third consecutive year, by approximately \$20 million from the 2011 ending balance. Retail time deposits greater than \$100,000 totaled \$32.1 million at year-end, down approximately \$5 million from the balance at the end of 2011. Consumers do not seem to be inclined to invest in longer maturity deposits as they want more liquid accounts and are afraid of missing out on the opportunity to take advantage of rising rates, whenever that may occur. As a result of this sentiment, the Bank has seen some maturing CDs migrate to the Money Management product and new CDs being written for short-terms. In 2013, 62% of the Bank's retail CDs will mature.

The Bank continues to use wholesale CDs as a funding source when good opportunities are available and the balance in this product increased approximately \$10 million year over year. In February 2012, the Bank issued \$23 million in brokered CDs as part of a plan to restructure FHLB debt that matured in 2012. These CDs replaced the FHLB debt at a substantially lower cost. No other wholesale funding was issued in 2012.

Included in the brokered CD total is \$8.2 million in CDs placed into the CDARS program that allows the Bank to offer full FDIC coverage to large depositors, but with the convenience to the customer of only having to deal with one bank. The Bank solicits these deposits from within its market and it believes they present no greater risk than any other local deposit. However, regulatory guidance requires that these deposits be classified as brokered deposits.

The Bank continues to review different methods of funding growth that include traditional deposits and other wholesale sources. Competition from other local financial institutions, internet banks and brokerages will continue to be a challenge for the Bank in its efforts to attract new and retain existing deposit accounts. This competition is not expected to lessen in the future.

The following table shows the maturity of outstanding time deposits of \$100,000 or more at December 31, 2012:

Table 19. Time Deposits of \$100,000 or More

(Dollars in thousands)	Retail Time Deposits	Brokered Time Deposits	Total Time Deposits
Maturity distribution:			
Within three months	\$ 7,700	\$ -	\$ 7,700
Over three through six months	6,061	-	6,061
Over six through twelve months	7,700	2,250	9,950
Over twelve months	10,680	865	11,545
Total	\$ 32,141	\$ 3,115	\$ 35,256

Borrowings:

Short-term Borrowings: In addition to deposits, the Bank uses securities sold under repurchase agreements (Repo), which are accounted for as collateralized financings, and borrowings from FHLB as additional funding sources. The Bank enters into Repo agreements as part of a cash management product offered to commercial and municipal customers. These are overnight borrowings by the Bank that are collateralized with U.S. Government and U.S. Agency securities. This product had an average balance of \$51.6 million in 2012, down \$8.6 million from the prior year average. The average cost of this product declined by .10% in 2012. The Bank is attempting to move its Repo customers into a fully-insured sweep deposit product that was introduced in January 2013. By moving accounts out of the Repo, the Bank can free up its investment collateral and improve its liquidity position by having less pledged collateral.

Short-term borrowings from the FHLB are in the form of a revolving term commitment. The short-term FHLB borrowings are used as overnight borrowings to fund the short-term liquidity needs of the Bank. These borrowings reprice on a daily basis and the interest rate fluctuates with short-term market interest rates. The following table provides additional information about short-term borrowings. At December 31, 2012, the available amount on this line of credit was \$35 million.

Table 20. Short-Term Borrowings and Securities Sold Under Agreements to Repurchase

(Dollars in thousands)	2012	2011	2010
	Short-Term Repurchase	Short-Term Repurchase	Short-Term Repurchase

	Borrowing Agreements		Borrowing Agreements		Borrowing Agreements	
Ending balance	\$-	\$ 42,209	\$-	\$ 53,103	\$-	\$ 51,164
Average balance	-	51,558	192	60,136	185	60,262
Maximum month-end balance	-	57,279	1,800	71,485	1,900	68,622
Weighted-average interest rate	-	0.15 %	0.74 %	0.25 %	0.66 %	0.25 %

Long-term Debt: Long-term debt is comprised entirely of FHLB term loans either payable at maturity or amortizing advances. All of the loans have fixed interest rates. These loans are used on an as needed basis to lock in term funding and are sometimes used to fund specific asset transactions. The Bank did not take any new FHLB advances in 2012, but prepaid \$33.1 million of advances that were scheduled to mature in 2012 and 2013. In 2011, the Bank paid off \$15.6 million of advances early. See Note 11 of the accompanying consolidated financial statements for more information.

Shareholders' Equity:

Shareholders' equity increased \$4.4 million to \$91.6 million at December 31, 2012. The Corporation added \$2.2 million to retained earnings after declaring \$3.2 million in dividends. The Dividend Reinvestment Plan (DRIP) added \$1.2 million in new capital during 2012. The Corporation declared regular cash dividends per share of \$.78 in 2012 versus \$1.08 in 2011. The regular quarterly cash dividend per share was reduced from \$.27 in the first quarter of 2012 to \$.17 for the remaining quarters of 2012 as part of a proactive capital management plan. The dividend payout ratio was 59.1% in 2012 compared to 65.1% in 2011. The Corporation made no repurchases of its stock in 2012 or 2011.

The Board of Directors has in the past authorized the repurchase of the Corporation's \$1.00 par value common stock. The repurchased shares can be held as treasury shares available for issuance in connection with future stock dividends and stock splits, employee benefit plans, executive compensation plans, the Dividend Reinvestment Plan and other appropriate corporate purposes. The term of the repurchase plans is normally 1 year. The following table provides information regarding approved stock repurchase plans. For additional information on Shareholders' Equity refer to Note 18 of the accompanying consolidated financial statements. There was no stock repurchase plan in place during 2012. The stock repurchase plan, that was in place in 2011, and the related activity is shown below:

(Dollars in thousands)

Plan Approved	Expiration Date	Shares Authorized	Shares Repurchased Under Approved Plan			
			2012	2011	Total	Cost
July 8, 2010	July 8, 2011	100,000	-	-	-	-
Number of Treasury shares held at year-end			396,034	396,174		

The Corporation's dividend reinvestment plan (DRIP) allows for shareholders to purchase additional shares of the Corporation's common stock by reinvesting cash dividends paid on their shares or through optional cash payments. The Corporation has authorized common stock to be issued under the amended plan. During 2012, 84,122 shares of common stock were purchased through the dividend reinvestment plan at a value of \$1.2 million and 795,524 shares remain to be issued.

A strong capital position is important to the Corporation as it provides a solid foundation for the future growth of the Corporation, as well as instills confidence in the Bank by depositors, regulators and investors, and is considered essential by Management. The Corporation is currently exploring other sources of capital as part of its capital management plan for the Corporation and the Bank.

Common measures of adequate capitalization for banking institutions are capital ratios. These ratios indicate the proportion of permanently committed funds to the total asset base. Guidelines issued by federal and state regulatory authorities require both banks and bank holding companies to meet minimum leverage capital ratios and risk-based capital ratios.

The leverage ratio compares Tier 1 capital to average assets while the risk-based ratio compares Tier 1 and total capital to risk-weighted assets and off-balance-sheet activity in order to make capital levels more sensitive to the risk profiles of individual banks. Tier 1 capital is comprised of common stock, additional paid-in capital, retained earnings and components of other comprehensive income, reduced by goodwill and other intangible assets. Total capital is comprised of Tier 1 capital plus the allowable portion of the allowance for loan losses.

Current regulatory capital guidelines call for a minimum leverage ratio of 4.0% and minimum Tier 1 and total capital ratios of 4.0% and 8.0%, respectively. Well-capitalized banks are determined to have leverage capital ratios greater than or equal to 5.0% and Tier 1 and total capital ratios greater than or equal to 6.0% and 10.0%, respectively. Table 21 presents the capital ratios for the consolidated Corporation at December 31, 2012, 2011 and 2010. At year-end 2012, the Corporation and its banking subsidiary exceeded all regulatory capital requirements. The Corporation is not aware of any future events or transactions, outside its control, that are expected to significantly effect its capital position. The Bank did not participate in the Troubled Asset Relief Program (TARP) established by the Emergency Economic Stabilization Act of 2008 (EESA) that was designed to provide capital injections to banks through the purchase of preferred stock, and it did not participate in the Small Business Lending Fund created in 2011.

For additional information on capital adequacy refer to Note 2 of the accompanying consolidated financial statements.

Table 21. Capital Ratios

	December 31		
	2012	2011	2010
Total risk-based capital ratio	12.60%	12.14%	11.73%
Tier 1 risk-based capital ratio	11.36%	10.89%	10.54%
Tier 1 leverage ratio	8.29 %	8.40 %	8.16 %

Local Economy

The Corporation's primary market area includes Franklin, Fulton, Cumberland and Huntingdon County, PA. This area is diverse in demographic and economic makeup. County populations range from a low of approximately 15,000 in Fulton County to over 238,000 in Cumberland County. Unemployment in the Bank's market area has remained virtually unchanged over the past year and ranges from a low of 6.8% in Cumberland County to high of 10.0% in Fulton County. The market area has a diverse economic base and local industries include, warehousing, truck & rail shipping centers, light and heavy manufacturers, health-care, higher education institutions, farming and agriculture, and a varied service sector. The Corporation's primary market area is located in south central Pennsylvania and provides easy access to the major metropolitan markets on the east coast via trucking and rail transportation. Because of this, warehousing and distribution companies continue to find the area attractive. The local economy is not overly dependent on any one industry or business and Management believes that the Bank's primary market area continues to be well suited for growth as the recession eases. The following provides selected economic data for the Bank's primary market:

Economic Data

	December 31			
	2012		2011	
Unemployment Rate (seasonally adjusted)				
Market area range (1)	6.8%	10.0 %	6.7%	10 %
Pennsylvania	7.9	%	7.9	%
United States	7.8	%	9.0	%
Housing Price Index - year over year change				
PA, nonmetropolitan statistical area	0.8	%	-3.3	%
United States	-0.3	%	-4.5	%
Franklin County Building Permits - year over year change				
Residential, estimated	-42.5	%	-34.3	%
Multifamily, estimated	210.9	%	-73.4	%

(1) Franklin, Cumberland, Fulton and Huntingdon Counties

Unlike many companies, the assets and liabilities of the Corporation are financial in nature. As such, interest rates and changes in interest rates may have a more significant effect on the Corporation's financial results than on other types of industries. Because of this, the Corporation watches the actions of the Federal Reserve Open Market Committee (FOMC) as it makes decisions about interest rate changes. The FOMC continues to hold short-term rates at historic lows. The FOMC recently announced that it would hold short-term rates at the current levels until the unemployment rate falls to 6.5% and the inflation rate does not go above 2.5%. With the current unemployment rate hovering just under 8%, it is expected that the low rate environment will be ongoing well beyond 2013. A continued period of low rates will continue to have negative effects on the Bank's net interest margin as assets continue to be booked or repriced at lower rates, and liabilities rates can not be lowered significantly.

Liquidity

The Corporation must meet the financial needs of the customers that it serves, while providing a satisfactory return on the shareholders' investment. In order to accomplish this, the Corporation must maintain sufficient liquidity in order to respond quickly to the changing level of funds required for both loan and deposit activity. The goal of liquidity management is to meet the ongoing cash flow requirements of depositors who want to withdraw funds and of borrowers who request loan disbursements. The Bank regularly reviews its liquidity position by measuring its projected net cash flows (in and out) at a 30 and 90-day interval. The Bank stresses this measurement by assuming a level of deposit out-flows that have not historically been realized. In addition to this forecast, other funding sources are reviewed as a method to provide emergency funding if necessary. The objective of this measurement is to identify the amount of cash that could be raised quickly without the need to liquidate assets. The Bank also stresses its liquidity position utilizing different longer-term scenarios. The varying degrees of stress create pressure on deposit flows in its local market, reduce access to wholesale funding and limit access of funds available through brokered deposit channels. In addition to stressing cash flow, specific liquidity risk indicators are monitored to help identify risk areas. This analysis will help identify and quantify the potential cash surplus/deficit over a variety of time horizons to ensure the Bank has adequate funding resources. Assumptions used for liquidity stress testing are subjective. Should an evolving liquidity situation or business cycle present new data, potential assumption changes will be considered. The Bank believes it can meet all anticipated liquidity demands.

Historically, the Corporation has satisfied its liquidity needs from earnings, repayment of loans and amortizing investment securities, maturing investment securities, loan sales, deposit growth and its ability to access existing lines of credit. All investment securities are classified as available for sale; therefore, securities that are not pledged as collateral for borrowings are an additional source of readily available liquidity, either by selling the security or, more preferably, to provide collateral for additional borrowing. At December 31, 2012, the Bank had approximately \$120 million (fair value) in its investment portfolio pledged as collateral for deposits and Repos. Another source of available liquidity for the Bank is a line of credit with the FHLB. At December 31, 2012, the Bank had approximately \$35 million available on this line of credit and \$16 million of unsecured lines of credit at correspondent banks.

In December 2011, FHLB notified the Bank it was being placed on full collateral delivery status. This status means that the Bank's ability to borrow from FHLB is reduced to the value of the collateral physically delivered to FHLB.

Prior to this change, the Bank's borrowing capacity was determined by the value of all real estate loan collateral pledged to FHLB. This status is determined by an internal scorecard developed by the FHLB in its sole discretion. The Bank quickly responded to this request and delivered additional collateral above what was required by FHLB. At December 31, 2012, the Bank had an excess borrowing capacity of \$68.9 million, which includes the amount available on the line of credit. However, this amount is well below the available capacity prior to the collateral delivery requirement.

In addition to delivering the required collateral, the Bank has implemented a plan to address the reduced availability at FHLB. This plan includes, enhancing liquidity by prefunding FHLB maturities with longer term callable CDs, restructuring secured liabilities to free-up securities used as collateral, and delivering more collateral to FHLB and the Federal Reserve to increase borrowing capacity. With no additional borrowings from FHLB anticipated, every dollar paid-off increases the available funding capacity to increase. The Bank expects that it will remain on collateral delivery status throughout 2013 and that its plan is sufficient to overcome the temporary reduction in FHLB funding capacity.

The FHLB system has always been a major source of funding for community banks. The capital level of the Pittsburgh FHLB, and the entire FHLB system, has been strained due to the declining value of mortgage related assets. The Pittsburgh FHLB has already implemented steps to improve its capital position that included a suspension of its dividend and an end to its practice of redeeming members' stock. Both of these actions are not favorable to the Bank. There are no indicators that lead the Bank to believe the FHLB will discontinue its lending function. If that were to occur, it would have a negative effect on the Bank and it is unlikely that the Bank could replace the level of FHLB funding in a short time. Another action that may be considered by FHLB to increase its capital is to have a capital call on its member banks. This would require the member banks to invest more capital into the FHLB when most banks would prefer not make such an investment.

The Bank has established credit at the Federal Reserve Discount Window and as of year-end had the ability to borrow approximately \$54 million.

Off Balance Sheet Commitments

The Corporation's financial statements do not reflect various commitments that are made in the normal course of business, which may involve some liquidity risk. These commitments consist mainly of unfunded loans and letters of credit made under the same standards as on-balance sheet loans and lines of credit. Because these unfunded instruments have fixed maturity dates and many of them will expire without being drawn upon, they do not generally present any significant liquidity risk to the Corporation. Unused commitments and standby letters of credit totaled \$223.6 million and \$28.2 million, respectively, at December 31, 2012, compared to \$221.6 million and \$28.2 million, respectively, at December 31, 2011. See Note 19 of the accompanying consolidated financial statements for more information on commitments and contingencies.

Management believes that any amounts actually drawn upon can be funded in the normal course of operations. The Corporation has no investment in or financial relationship with any unconsolidated entities that are reasonably likely to have a material effect on liquidity.

The following table represents the Corporation's aggregate on and off balance sheet contractual obligations to make future payments as of December 31, 2012:

Table 22. Contractual Obligations

(Dollars in thousands)

	1 year and under	Years 2-3	Years 4-5	Over 5 years	Total
Time deposits	\$ 97,189	\$ 52,351	\$ 25,732	\$ 2,847	\$ 178,119
Long-term debt	8	12,015	17	370	12,410
Operating leases	638	1,124	957	5,954	8,673
Deferred compensation	62	122	118	198	500
Estimated future pension payments	799	1,720	1,864	4,902	9,285
Total	\$ 98,696	\$ 67,332	\$ 28,688	\$ 14,271	\$ 208,987

The Corporation is not aware of any known trends, demands, commitments, events or uncertainties which would result in any material increase or decrease in liquidity. The Corporation has also entered into an interest rate swap agreement as part of its interest rate risk management strategy. See Note 14 of the accompanying financial statements for more information on financial derivatives.

Market Risk

In the course of its normal business operations, the Corporation is exposed to certain market risks. The Corporation has no foreign currency exchange rate risk, no commodity price risk or material equity price risk. However, it is exposed to interest rate risk. All interest rate risk arises in connection with financial instruments entered into for purposes other than trading. Financial instruments, which are sensitive to changes in market interest rates, include fixed and variable-rate loans, fixed-income securities, derivatives, interest-bearing deposits and other borrowings.

Changes in interest rates can have an impact on the Corporation's net interest income and the economic value of equity. The objective of interest rate risk management is to identify and manage the sensitivity of net interest income and economic value of equity to changing interest rates in order to achieve consistent earnings that are not contingent upon favorable trends in interest rates.

The Corporation uses several tools to measure and evaluate interest rate risk. One tool is interest rate sensitivity or gap analysis. Gap analysis classifies assets and liabilities by repricing and maturity characteristics and provides

management with an indication of how different interest rate scenarios will impact net interest income. Table 23 presents a gap analysis of the Corporation's balance sheet at December 31, 2012. A positive gap in the under one-year time interval suggests that, all else being equal, the Corporation's near-term earnings would rise in a higher interest rate environment and decline in a lower rate environment. A negative gap suggests the opposite result. At December 31, 2012, the Corporation's cumulative gap position at one year was negative. However, the incremental benefit of future rate decreases has been reduced as the rates paid on the Bank's liabilities have been reduced greatly, leaving little room for future rate decreases. In addition certain liabilities may or may not be repriced with the same magnitude or at the same time as market rates. These circumstances are not captured by a gap analysis.

Another tool for analyzing interest rate risk is financial simulation modeling which captures the effect of not only changing interest rates but also other sources of cash flow variability including loan and securities prepayments and customer preferences. Financial simulation modeling forecasts both net interest income and the economic value of equity under a variety of different interest rate environments that cannot be captured with a gap analysis. The Corporation regularly measures the effects of yield curve rate changes, including rate ramps, shocks and yield curve twists. The magnitude of each change scenario may vary depending on the current interest rate environment. As part of this simulation, the effect of the rate change is held constant for year two of the simulation. In addition, different rate change scenarios and yield curve structures are utilized depending on the current level of interest rates.

As indicated in Table 24, the financial simulation analysis indicated that as of December 31, 2012, prospective net interest income over both a one and two-year time period increases with higher market interest rates. This suggests the balance sheet is asset sensitive. As market rates ramp up 2% over the first year, more assets reprice immediately and funding costs lag behind therefore, net interest income improves. In year two of rising rates, liability costs begin to catch up to the repriced assets and the increase in net interest income slows. In a falling rate environment, net interest income falls in year two. Due to the current level of interest rates, most liability costs will not be able to move by a full market rate decrease. However, asset yields have more room for downward movement. Therefore, if rates fall and remain low for a prolonged period, the more net interest income is negatively affected. This is clearly seen in year two when the reduction in net interest income occurs. The Corporation has established limits to the change in net interest income of 10% from the base scenario in year one.

Economic value of equity (EVE) is defined as the estimated discounted present value of assets minus the discounted present value of liabilities and is a surrogate for long-term earnings. EVE measures the degree to which the economic value of a bank changes under different rate scenarios. EVE focuses on a longer-term time horizon and captures all balance sheet cash flows and is more effective in considering embedded options. The discount rates used in the EVE calculation are based on market rates for like assets and liabilities and the balance sheet position is held constant in order to isolate the risk of interest rate changes. The Corporation established limits to the change in EVE sensitivity of 10% per 1% rate change. At December 31, 2012, the Corporation was within this limit for all scenarios except the down 1% scenario.

Computations of prospective effects of hypothetical interest rate changes are based on many assumptions, including relative levels of market interest rates, loan prepayments and deposit repricing. Certain shortcomings are inherent in the computation of discounted present value and, if key relationships do not unfold as assumed, actual values may differ from those presented. Further, the computations do not contemplate any actions Management could undertake in response to changes in market interest rates.

Table 23. Interest Rate Sensitivity Analysis

(Dollars in thousands)	1-90 Days	91-181 Days	182-365 Days	1-5 Years	Beyond 5 Years	Total
Interest-earning assets:						
Interest -bearing deposits in other banks	\$57,256	\$-	\$-	\$-	\$-	\$57,256
Investment securities and restricted stock (1)	27,812	6,300	8,152	53,508	41,127	136,899

Interest rate swaps (receive side)	20,000	-	-	-	-	20,000
Total interest-earning assets	428,946	28,297	122,501	233,706	154,351	967,801
Interest-bearing liabilities:						
Interest-bearing checking (3)	135,454	-	-	-	-	135,454
Money market deposit accounts (3)	380,079	-	-	-	-	380,079
Savings (3)	57,165	-	-	-	-	57,165
Time	26,240	28,123	42,826	78,083	2,847	178,119
Securities sold under agreements to repurchase	42,209	-	-	-	-	42,209
Short-term borrowings	-	-	-	-	-	-
Long-term debt (4)	3	2	3	12,032	370	12,410
Interest rate swaps (pay side)	-	10,000	-	10,000	-	20,000
Total interest-bearing liabilities	\$641,150	\$38,125	\$42,829	\$100,115	\$3,217	\$825,436
Interest rate gap	\$(212,204)	\$(9,828)	\$79,672	\$133,591	\$151,134	\$142,365
Cumulative interest rate gap	\$(212,204)	\$(222,032)	\$(142,360)	\$(8,769)	\$142,365	

(1) The maturity/repricing distribution of investment securities is based on the maturity date for nonamortizing, noncallable securities; probable exercise/non-exercise of call options for callable securities; and estimated amortization based on industry experience for amortizing securities.

(2) Distribution of loans is based on contractual repricing/repayment terms adjusted for expected prepayments based on historical patterns. Loans held for sale are included in the 1 - 90 day time period.

(3) Interest-bearing checking and Savings accounts are included in the first period in which the Bank has the opportunity to reprice the product. Depending on the direction and magnitude of an interest rate change, these products may or may not reprice within the indicated period and may or may not reprice in a complete correlation to the change in a market rate. The MMDA product is distributed in accordance with its contractual repricing terms.

(4) Long-term debt reflects Federal Home Loan Bank notes with fixed maturity and amortizing repayment schedules.

Table 24. Sensitivity to Changes in Market Interest Rates

(Dollars in thousands)	-1%	Unchanged	1%	2%
Change in net interest income, year one:	\$32,030	\$32,398	\$33,169	\$33,459
Percentage change	-1.1 %		2.4 %	3.27 %
Change in net interest income, year two:	\$31,704	\$32,737	\$33,625	\$34,809
Percent change	-3.2 %		2.7 %	6.33 %
Economic value of portfolio equity (EVE):	\$87,055	\$101,046	\$110,308	\$113,441
Percentage change	-13.8 %		9.2 %	12.3 %

Forward-Looking Statements

Certain statements appearing herein which are not historical in nature are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements refer to a future period or periods, reflecting management's current views as to likely future developments, and use words "may," "will," "expect," "believe," "estimate," "anticipate," or similar terms. Because forward-looking statements involve certain risks, uncertainties and other factors over which the Corporation has no direct control, actual results could differ materially from those contemplated in such statements. These factors include (but are not limited to) the following: general economic conditions, changes in interest rates, change in the Corporation's cost of funds, changes in government monetary policy, changes in government regulation and taxation of financial institutions, changes in the rate of inflation, changes in technology, the intensification of competition within the Corporation's market area, and other similar factors.

Impact of Inflation

The impact of inflation upon financial institutions such as the Corporation differs from its effect upon other commercial enterprises. Unlike most other commercial enterprises, virtually all of the assets of the Corporation are monetary in nature. As a result, interest rates have a more significant impact on the Corporation's performance than do the effects of general levels of inflation. Although inflation (and inflation expectations) may affect the interest rate environment, it is not possible to measure with any precision the impact of future inflation upon the Corporation.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

The information related to this item is included in Management's Discussion and Analysis of Financial Condition and Results of Operations.

Item 8. Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders

Franklin Financial Services Corporation

Chambersburg, Pennsylvania

We have audited the accompanying consolidated balance sheets of Franklin Financial Services Corporation and its subsidiaries (the “Corporation”) as of December 31, 2012 and 2011, and the related consolidated statements of income, comprehensive income, changes in shareholders’ equity and cash flows for each of the years in the three-year period ended December 31, 2012. These consolidated financial statements are the responsibility of the Corporation’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Franklin Financial Services Corporation and its subsidiaries as of December 31, 2012 and 2011, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2012, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Corporation’s internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 11, 2013 expressed an unqualified opinion.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Summary of Significant Accounting Policies

The accounting policies of Franklin Financial Services Corporation and its subsidiaries conform to generally accepted accounting principles and to general industry practices. A summary of the more significant accounting policies, which have been consistently applied in the preparation of the accompanying consolidated financial statements, follows:

Principles of Consolidation – The consolidated financial statements include the accounts of Franklin Financial Services Corporation (the Corporation) and its wholly-owned subsidiaries; Farmers and Merchants Trust Company of Chambersburg and Franklin Future Fund Inc. Farmers and Merchants Trust Company of Chambersburg is a commercial bank (the Bank) that has one wholly-owned subsidiary, Franklin Financial Properties Corp., which holds real estate assets that are leased by the Bank. Franklin Future Fund Inc. is a non-bank investment company that makes venture capital investments within the Corporation's primary market area. The activities of non-bank entities are not significant to the consolidated totals. All significant intercompany transactions have been eliminated in consolidation. Management has evaluated subsequent events for potential recognition and/or disclosure through the date these consolidated financial statements were issued.

Nature of Operations – The Corporation conducts substantially all of its business through its subsidiary bank, Farmers and Merchants Trust Company, which serves its customer base through twenty-six community-banking offices located in Franklin, Cumberland, Fulton and Huntingdon Counties, Pennsylvania. These counties are considered to be the Corporation's primary market area. The Bank is a community-oriented commercial bank that emphasizes customer service and convenience. As part of its strategy, the Bank has sought to develop a variety of products and services that meet the needs of both its retail and commercial customers. The Corporation and the Bank are subject to the regulations of various federal and state agencies and undergo periodic examinations by these regulatory authorities.

Use of Estimates in the Preparation of Financial Statements – The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, and the assessment of other than temporary impairment of investment securities and impairment of restricted stock, the value of mortgage servicing rights and derivatives, and the valuation allowance on the deferred tax asset.

Significant Group Concentrations of Credit Risk – Most of the Corporation’s activities are with customers located within its primary market area. Note 4 of the consolidated financial statements shows the types of securities in which the Corporation invests. Note 5 of the consolidated financial statements shows the types of lending in which the Corporation engages. The Corporation does not have any significant concentrations of any one industry or customer.

Statement of Cash Flows – For purposes of reporting cash flows, cash and cash equivalents include Cash and due from banks, Interest-bearing deposits in other banks and Federal funds sold. Generally, Federal funds are purchased and sold for one-day periods.

Investment Securities – Management classifies its securities at the time of purchase as available for sale or held to maturity. At December 31, 2012 and 2011, all securities were classified as available for sale, meaning that the Corporation intends to hold them for an indefinite period of time, but not necessarily to maturity. Available for sale securities are stated at estimated fair value, adjusted for amortization of premiums and accretion of discounts which are recognized as adjustments of interest income through call date or maturity. The related unrealized holding gains and losses are reported as other comprehensive income or loss, net of tax, until realized. Declines in the fair value of held-to-maturity and available-for-sale securities to amounts below cost that are deemed to be other-than-temporary are reflected in earnings as realized losses. In estimating the other-than-temporary impairment losses, management considers (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) determines if the Corporation does not intend to sell the security or it is not more likely than not that the Corporation will be required to sell the security before recovery of its amortized cost. When a determination is made that an other-than-temporary impairment exists but the Corporation does not intend to sell the debt security and it is not more likely than not that it will be required to sell the debt security prior to its anticipated recovery, the other-than-temporary impairment is separated into (a) the amount of the total other-than-temporary impairment related to a decrease in cash flows expected to be collected from the debt security (the credit loss) and (b) the amount of the total other-than-temporary impairment related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is recognized in earnings. The amount of the total other-than-temporary impairment related to all other factors is recognized in other comprehensive income. Realized securities gains and losses are computed using the specific identification method. Gains or losses on the disposition of investment securities are based on the net proceeds and the adjusted carrying amount of the specific security sold. Any decision to sell a security classified as available for sale would be based on various factors, including significant movement in interest rates, changes in maturity or mix of the Bank’s assets and liabilities, liquidity needs, regulatory capital considerations and other similar factors.

Restricted Stock– Restricted stock, which is carried at cost, consists of stock of the Federal Home Loan Bank of Pittsburgh (FHLB) and Atlantic Central Bankers Bank (ACBB). The Bank held \$3.6 million of restricted stock at the end of 2012. With the exception of \$30 thousand, this investment represents stock in the FHLB that the Bank is required to hold in order to be a member of FHLB and is carried at a cost of \$100 per share. Federal law requires a member institution of the FHLB to hold FHLB stock according to a predetermined formula. In December 2008, FHLB announced it would suspend dividends and the regular repurchase of excess capital stock from its members due to deterioration in its financial condition. As a result, the Bank may hold more FHLB stock than would have been previously required. Management evaluates the restricted stock for impairment in accordance with ASC Topic 320. Management’s determination of whether these investments are impaired is based on their assessment of the ultimate recoverability of their cost rather than by recognizing temporary declines in value. The determination of whether a decline affects the ultimate recoverability of their cost is influenced by criteria such as (1) the significance of the decline in net assets of the banks as compared to the capital stock amount for the banks and the length of time this

situation has persisted, (2) commitments by the banks to make payments required by law or regulation and (3) the impact of legislative and regulatory changes on institutions and, accordingly, on the customer base of the banks. As a government sponsored entity, FHLB has the ability to raise funding through the U.S. Treasury that can be used to support its operations. There is not a public market for FHLB or ACBB stock and the benefits of membership (e.g., liquidity and low cost funding) add value to the stock beyond purely financial measures. Management intends to remain a member of the FHLB and believes that it will be able to fully recover the cost basis of this investment. Management believes no impairment charge is necessary related to the FHLB or ACBB restricted stock as of December 31, 2012.

Financial Derivatives – The Corporation uses interest rate swaps, which it has designated as cash-flow hedges, to manage interest rate risk associated with variable-rate funding sources. All such derivatives are recognized on the balance sheet at estimated fair value in other assets or liabilities as appropriate. To the extent the derivatives are effective and meet the requirements for hedge accounting, changes in fair value are recognized in other comprehensive income with income statement reclassification occurring as the hedged item affects earnings. Conversely, changes in fair value attributable to ineffectiveness or to derivatives that do not qualify as hedges are recognized as they occur in the income statement’s interest expense account associated with the hedged item.

Interest rate derivative financial instruments receive hedge accounting treatment only if they are designated as a hedge and are expected to be, and are, effective in substantially reducing interest rate risk arising from the assets and liabilities identified as exposing the Corporation to risk. Those derivative financial instruments that do not meet the hedging criteria discussed below would be classified as trading activities and would be recorded at fair value with changes in fair value recorded in income. Derivative hedge contracts must meet specific effectiveness tests (i.e., over time the change in their fair values due to the designated hedge risk must be within 80 to 125 percent of the opposite change in the fair values of the hedged assets or liabilities). Changes in fair value of the derivative financial instruments must be effective at offsetting changes in the fair value of the hedged items due to the designated hedge risk during the term of the hedge. Further, if the underlying financial instrument differs from the hedged asset or liability, there must be a clear economic relationship between the prices of the two financial instruments. If periodic assessments indicate derivatives no longer provide an effective hedge, the derivatives contracts would be closed out and settled or classified as a trading activity.

Cash flows resulting from the derivative financial instruments that are accounted for as hedges of assets and liabilities are classified in the cash flow statement in the same category as the cash flows of the items being hedged.

Loans – Loans, that management has the intent and ability to hold for the foreseeable future or until maturity or payoff, are stated at the outstanding unpaid principal balances, net of any deferred fees. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the yield (interest income) of the related loans using the interest method. The Corporation is generally amortizing these amounts over the contractual life of the loan.

The accrual of interest is generally discontinued when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about further collectibility of principal or interest, even though the loan is currently performing. A loan may remain on accrual status if it is in the process of collection and is either guaranteed or well secured. When a loan is placed on nonaccrual status, unpaid interest credited to income in the current year is reversed and unpaid interest accrued in a prior year is charged against the allowance for loan losses. Payments received on nonaccrual loans are applied initially against principal, then interest income, late charges and any other expenses. Generally, loans are restored to accrual status when the obligation is brought current, has performed in accordance with the contractual terms for a reasonable period of time and the ultimate collectibility of the total contractual principal and interest is no longer in doubt. Consumer loans are typically charged off no later than 180 days past due. Past due status is based on contractual terms of the loans.

Loans Held for Sale – Mortgage loans originated and intended for sale in the secondary market at the time of origination are carried at the lower of cost or estimated fair value (determined on an aggregate basis). All sales are made without recourse. Gains or losses on sales of mortgage loans are recognized based on the difference between the selling price and the carrying value of the related mortgage loans sold. Loans held for sale at December 31, 2012 represent loans originated through a third-party brokerage agreement for a fee and present no price risk to the Bank.

Loan Servicing – Servicing assets are recognized as separate assets when rights are acquired through sale of financial assets. A portion of the cost of originating the loan is allocated to the servicing right based on relative fair value. Fair value is based on a valuation model that calculates the present value of estimated future net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the cost to service, the discount rate, prepayment speeds, default rates and losses. Capitalized servicing rights are reported in other assets and are amortized into noninterest income in proportion to, and over the periods of, the estimated future net servicing income of the underlying financial assets. Servicing rights are evaluated for impairment based upon the fair value of the rights as compared to amortized cost. For the purpose of computing impairment, mortgage servicing rights are stratified based on risk characteristics of the underlying loans that are expected to have the most impact on projected prepayments including loan type, interest rate and term. Impairment is recognized through a valuation allowance to the extent that fair value is less than the capitalized amount. If the Corporation later determines that all or a portion of the impairment no longer exists, a reduction of the allowance may be recorded as an increase to income. Servicing fee income is recorded for fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal or a fixed amount per loan and are recorded as income when earned. The amortization of mortgage servicing rights is netted against loan servicing fee income. Loans serviced by the Bank for the benefit of others totaled \$46.1 million, \$65.6 million and \$79.9 million at December 31, 2012, 2011 and 2010, respectively.

Allowance for Loan Losses – The allowance for loan losses is established through provisions for loan losses charged against income. Loans deemed to be uncollectible are charged against the allowance for loan losses, and subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is maintained at a level considered adequate to provide for losses that can be reasonably anticipated. Management's periodic evaluation of the adequacy of the allowance is based on the Bank's past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions and other relevant factors. This evaluation is inherently subjective, as it requires material estimates that may be susceptible to significant change, including the amounts and timing of future cash flows expected to be received on impaired loans.

A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines

the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis for commercial and commercial real estate loans either by the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

The Corporation's allowance for possible loan losses consists of two elements: (1) specific valuation allowances established for probable losses on specific loans and (2) historical valuation allowances calculated based on historical loan loss experience for similar loans with similar characteristics and trends, adjusted, as necessary to reflect the impact general economic conditions and other qualitative risk factors both internal and external to the Corporation.

Large groups of smaller balance homogeneous loans are collectively evaluated for impairment using historical charge-offs as the starting point in estimating loss. Accordingly, the Corporation may not separately identify individual consumer and residential loans for impairment disclosures.

Premises and Equipment – Premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation is computed using the straight-line method over the estimated useful lives of the related assets or the lease term for lease hold improvements, whichever is shorter. When assets are retired or sold, the asset cost and related accumulated depreciation are eliminated from the respective accounts, and any resultant gain or loss is included in net income.

The cost of maintenance and repairs is charged to operating expense as incurred, and the cost of major additions and improvements is capitalized.

Intangible Assets – The Bank has \$9.0 million of goodwill recorded on its balances sheet as the result of corporate acquisitions. Goodwill is not amortized, nor deductible for tax purposes. However, goodwill is tested for impairment at least annually in accordance with ASC Topic 350. Goodwill was tested for impairment as of August 31, 2012. The impairment test was conducted following the step-one test under ASC Topic 350 rather than the qualitative assessment permitted under ASU 2011-08 that was effective for fiscal years beginning after December 15, 2011. The Corporation chose not to use the qualitative assessment method for the August 31, 2012 test primarily due to a lower level of earnings and the fact that the Corporation's stock price is trading below its book value. The Corporation uses several different weighted methods to determine the fair value of the reporting unit under the step-one test, including a dividend analysis, comparable sale transactions, and change of control premium estimates. As a result of the step-one test, the estimated fair value of the Corporation exceeded its carrying value by approximately 5% (compared to 15% in 2011) and Management determined goodwill was not impaired. The decline in the valuation excess compared to 2011 is primarily the result of the book value of the Corporation increasing more than the estimated value, even though both values increased over the prior year. If the step-one test fails, a more comprehensive step-two test is performed before a final determination of impairment is made. At December 31, 2012, Management subsequently considered certain qualitative factors affecting the Corporation and determined that it was not likely that the results of the prior test had changed and it determined that goodwill was not impaired at year end. If goodwill is determined to be impaired, an impairment write-down is charged to results of operations in the period in which the impairment is determined. For more information on Goodwill refer to Note 8 of the accompanying financial statements. The customer list is amortized over 10 years using the sum-of-the-years digits method.

Bank Owned Life Insurance – The Bank invests in bank owned life insurance (“BOLI”) as a source of funding for employee benefit expenses. The Bank purchases life insurance coverage on the lives of a select group of employees. The Bank is the owner and beneficiary of the policies and records the investment at the cash surrender value of the underlying policies. Income from the increase in cash surrender value of the policies is included in noninterest income.

Other Real Estate Owned (OREO) – Foreclosed real estate (OREO) is comprised of property acquired through a foreclosure proceeding or an acceptance of a deed in lieu of foreclosure. Balances are initially reflected at the estimated fair value less any estimated disposition costs, with subsequent adjustments made to reflect further declines in value. Any losses realized upon disposition of the property, and holding costs prior thereto, are charged against income. All properties are actively marketed to potential buyers.

Transfers of Financial Assets – Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Corporation, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Corporation does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Federal Income Taxes – Deferred income taxes are provided on the liability method whereby deferred tax assets are recognized for deductible temporary differences and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance, when in the opinion of management, it is more likely than not that some portion or all deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted through the provision for income taxes for the effects of changes in tax laws and rates on the date of enactment. ASC Topic 740 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Benefits from tax positions should be recognized in the financial statements only when it is more-likely-than-not that the tax position will be sustained upon examination by the appropriate taxing authority that would have full knowledge of all relevant information. A tax position that meets the more-likely-than-not recognition threshold is measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. ASC Topic 740, “Income Taxes” also provides guidance on the accounting for and disclosure of unrecognized tax benefits, interest and penalties.

Advertising Expenses – Advertising costs are expensed as incurred.

Treasury Stock – The acquisition of treasury stock is recorded under the cost method. The subsequent disposition or sale of the treasury stock is recorded using the average cost method.

Investment and Trust Services – Assets held in a fiduciary capacity are not assets of the Corporation and therefore are not included in the consolidated financial statements. Trust assets under management at December 31, 2012 were \$520.4 million and \$481.5 million at the prior year-end. Revenue from investment and trust services is recognized on the accrual basis.

Off-Balance Sheet Financial Instruments – In the ordinary course of business, the Bank has entered into off-balance sheet financial instruments consisting of commitments to extend credit and letters of credit. Such financial instruments are recorded on the balance sheet when they are funded. The amount of any liability for the credit risk associated with off-balance sheet financial instruments is recorded in other liabilities and was not material to the financial position of the Corporation at December 31, 2012 or 2011.

Stock-Based Compensation – The Corporation accounts for stock based compensation in accordance with the ASC Topic 718, “Stock Compensation.” ASC Topic 718 requires compensation costs related to share-based payment transactions to be recognized in the financial statements (with limited exceptions). The amount of compensation cost is measured based on the grant-date fair value of the equity or liability instruments issued. Compensation cost is recognized over the period that an employee provides services in exchange for the award. Compensation expense was

\$0 in 2012, 2011 and 2010.

Pension – The provision for pension expense was actuarially determined using the projected unit credit actuarial cost method. The funding policy is to contribute an amount sufficient to meet the requirements of ERISA, subject to Internal Revenue Code contribution limitations.

In accordance with ASC Topic 715, "Compensation – Retirement Benefits", the Corporation recognizes the plan's over-funded or under-funded status as an asset or liability with an offsetting adjustment to Accumulated Other Comprehensive Income (AOCI). ASC Topic 715 requires the determination of the fair value of a plan's assets at the company's year-end and the recognition of actuarial gains and losses, prior service costs or credits, transition assets or obligations as a component of AOCI. These amounts were previously netted against the plan's funded status in the Corporation's consolidated Balance Sheet. These amounts will be subsequently recognized as components of net periodic benefit costs. Further, actuarial gains and losses that arise in subsequent periods that are not initially recognized as a component of net periodic benefit costs will be recognized as a component of AOCI. Those amounts will subsequently be recorded as component of net periodic benefit costs as they are amortized during future periods.

Earnings per share – Earnings per share are computed based on the weighted average number of shares outstanding during each year. The Corporation’s basic earnings per share are calculated as net income divided by the weighted average number of shares outstanding. For diluted earnings per share, net income is divided by the weighted average number of shares outstanding plus the incremental number of shares added as a result of converting common stock equivalents, calculated using the treasury stock method. The Corporation’s common stock equivalents consist of stock options.

A reconciliation of the weighted average shares outstanding used to calculate basic earnings per share and diluted earnings per share follows:

(Dollars in thousands, except per share data)	2012	2011	2010
Weighted average shares outstanding (basic)	4,072	3,962	3,887
Impact of common stock equivalents	2	1	1
Weighted average shares outstanding (diluted)	4,074	3,963	3,888
Anti-dilutive options excluded from calculation	87	70	74
Net income	\$5,365	\$6,569	\$7,612
Basic earnings per share	\$1.32	\$1.66	\$1.96
Diluted earnings per share	\$1.32	\$1.66	\$1.96

Reclassifications – Certain prior period amounts may have been reclassified to conform to the current year presentation. Such reclassifications did not affect reported net income.

Segment Reporting – The Bank acts as an independent community financial services provider and offers traditional banking and related financial services to individual, business and government customers. Through its community office and automated teller machine network, the Bank offers a full array of commercial and retail financial services, including the taking of time, savings and demand deposits; the making of commercial, consumer and mortgage loans; and the providing of safe deposit services. The Bank also performs personal, corporate, pension and fiduciary services through its Investment and Trust Services Department and Personal Investment Center.

Management does not separately allocate expenses, including the cost of funding loan demand, between the commercial, retail, mortgage banking and trust operations of the Bank. As such, discrete information is not available and segment reporting would not be meaningful.

Comprehensive Income – Comprehensive income is reflected in the Consolidated Statements of Comprehensive Income and includes net income and unrealized gains or losses, net of tax, on investment securities and derivatives and the change in plan assets and benefit obligations on the Bank’s pension plan, net of tax.

Recent Accounting Pronouncements:

Testing Indefinite-Lived Intangible Assets for Impairment. In July, 2012, the FASB issued ASU 2012-02, “Testing Indefinite-Lived Intangible Assets for Impairment.” Similar to ASU 2011-08, “Intangibles – Goodwill and Other (Topic 250) – Testing Goodwill for Impairment”, ASU 2012-20 addresses the growing cost and complexity of performing an analysis to evaluate indefinite-lived intangible assets (other than goodwill) for impairment. Rather than requiring a purely quantitative impairment test, the ASU provides entities with the option to first examine qualitative factors, such as economic conditions and cash flow trends, to make this determination. Entities are required by the guidance to consider both positive and negative impacts of such factors before determining whether it is more-likely-than-not (i.e. greater than 50% probability) that the indefinite-lived asset is impaired. It should be noted that the qualitative portion of the analysis is optional for all issuers. This ASU is effective for impairment tests performed during fiscal years beginning after September 15, 2012, and may be early adopted if the entity’s financial statements for the most recent fiscal or interim period have not yet been issued. The Corporation adopted this ASU in 2012.

Comprehensive Income (Topic 220): Reporting of Reclassified Out of Accumulated Other Comprehensive Income. The ASU requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. The amendments are effective prospectively for reporting periods beginning after December 15, 2012. The Corporation does not believe the amendments will have a material impact on its financial statements.

Note 2. Regulatory Matters

The Bank is limited as to the amount it may lend to the Corporation, unless such loans are collateralized by specific obligations. State regulations also limit the amount of dividends the Bank can pay to the Corporation and are generally limited to the Bank’s accumulated net earnings, which were \$64.5 million at December 31, 2012. In addition, dividends paid by the Bank to the Corporation would be prohibited if the effect thereof would cause the Bank’s capital to be reduced below applicable minimum capital requirements. The Corporation and the Bank are subject to various regulatory capital requirements administered by federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Corporation’s financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank’s assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgements by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Corporation and the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier 1 capital (as defined) to average assets (as defined). Although not adopted in regulation form, the Pennsylvania Department of Banking utilizes capital standards requiring a minimum leverage capital ratio of 6% and a risk-based capital ratio of 10%, defined substantially the same as those by the FDIC. Management believes, as of December 31, 2012, that the Corporation and the Bank met all capital adequacy requirements to which it is subject.

As of December 31, 2012, the most recent notification from the FDIC categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the table. There are no conditions or events since that notification that management believes have changed the institution's category.

The table that follows presents the total risk-based, Tier 1 risk-based and Tier 1 leverage requirements for the Corporation and the Bank as defined by the FDIC. Actual capital amounts and ratios are also presented.

(Dollars in thousands)	As of December 31, 2012						
	Actual		Minimum to be Adequately Capitalized		Minimum to be Well Capitalized		
	Amount	Ratio	Amount	Ratio	Amount	Ratio

Bank	77,656	7.89 %	39,356	4.00 %	\$49,195	5.00 %	

Note 3. Restricted Cash Balances

The Bank is required to maintain reserves against its deposit liabilities in the form of vault cash and/or balances with the Federal Reserve Bank. Deposit reserves that the Bank was required to hold were approximately \$838 thousand and \$815 thousand at December 31, 2012 and 2011, respectively and were satisfied by the Bank's vault cash.

Note 4. Investments

The investment portfolio serves as a mechanism to invest funds if funding sources out pace lending activity, to provide liquidity for lending and operations, and provide collateral for deposits and borrowings. The Corporation invests in taxable and tax-free debt securities, and equity securities as part of its investment strategy. The mix of taxable and tax-free debt securities are determined by the Bank's Investment Committee and investing decisions are made as a component of balance sheet management. Debt securities include U.S. Government Agencies, U.S. Government Agency mortgage-backed securities, non-agency mortgage-backed securities, state and municipal government bonds, corporate debt and trust preferred securities. The equity portfolio consists of bank stocks only and is considered to be longer-term with a focus on capital appreciation. All securities are classified as available for sale and all investment balances refer to fair value.

Equities: The equity portfolio is comprised entirely of bank stocks with the Bank and the Corporation each holding separate portfolios. The stocks held in the portfolio range from community banks to large national banks. In 2012, no other-than-temporary impairment charges were recorded against the equity portfolio.

Municipal Bonds: The Bank's municipal bond portfolio is well diversified geographically and is comprised primarily of tax-exempt general obligation bonds (68% of the portfolio). The portfolio holds one hundred eight separate issues within twenty-seven states. The largest dollar exposure is to issuers in the state of Texas (\$9.8 million / 19 issues) and Pennsylvania (\$7.1 million / 11 issues). The majority of the bonds have either private bond insurance or have some other type of credit enhancement. The portfolio contains eighteen taxable municipal bonds with a fair value of \$16.8 million. When purchasing municipal bonds, the Bank looks primarily to the underlying credit of the issuer as a sign of credit quality and then to any credit enhancement. Approximately \$51 million of the portfolio is rated "A" or higher by Moody's. The Bank owns five issues for \$2.0 million that are not rated by a nationally recognized rating agency. The Bank holds eight Build America Bonds on which the issuer receives a federal interest subsidy for the interest payable on the bond. Congress is still debating the "fiscal cliff", which includes the federal spending cuts mandated to take effect in 2013. If these cuts are implemented, it would end the federal direct pay interest subsidy and could trigger a call provision on the bonds at prices that may result in a loss to the Bank.

Corporate Bonds: There is one variable rate bond in the corporate bond portfolio in the financial services sector. This bond is rated A3 by Moody.

Trust Preferred Bonds: The holdings remain the same as at the prior year end, but the unrealized loss has declined from \$1.3 million to \$1.1 million. The credit ratings for each bond are similar to the rating one year prior. Trust preferred securities are typically issued by a subsidiary grantor trust of a bank holding company, which uses the proceeds of the equity issuance to purchase deeply subordinated debt issued by the bank holding company. Trust-preferred securities can reflect single entity issues or a group of entities (pooled trust preferred). Pooled trust preferred securities have been the subject of significant other than temporary impairment write-downs due in some cases from the default of one issuer in the pool that then impairs the entire pool. Because of the financial crisis of 2008, most trust preferred securities have realized a significant decline in value, but market prices continue to improve slowly. All of the Bank's issues are single issuer, variable rate notes with long final maturities (2027-2028) that continue to pay dividends.

Mortgage-backed Securities: This sector holds \$51.5 million or 39% of the total portfolio. The majority of this sector (\$49.1 million) is comprised of U.S. Government Agency MBS. In addition, the Bank holds six private label mortgage-backed securities (PLMBS) with a fair value of \$2.4 million and an amortized cost of \$2.5 million. The PLMBS bonds paid down by more than \$1 million in 2012 and one issue paid off during the year.

The Bank's PLMBS portfolio is comprised primarily of Alt-A loans. Alt-A loans are first-lien residential mortgages that generally conform to traditional "prime" credit guidelines; however, loan factors such as the loan-to-value ratio, loan documentation, occupancy status or property type cause these loans not to qualify for standard underwriting programs. The Alt-A product in the Bank's portfolio is comprised of fixed-rate mortgages that were originated between 2003 and 2006 and all were originally rated AAA. The bonds issued in 2006 are experiencing the highest delinquency and loss rates. All of these bonds originally had some type of credit support tranche to absorb any loss prior to losses at the senior tranche held by the Bank, but this has eroded completely on some bonds as they have started to experience losses. The Bank recorded other-than-temporary impairment charges of \$100 thousand on three PLMBS bonds in 2012. Based on the performance of some the PLMBS, it appears as if the underwriting standards that were represented in the offering, and resulted in the AAA rating, were not followed. As a result, the Bank purchased some securities based on these misrepresentations, and it is most likely that these securities would not have been purchased had all the information been reported correctly. The Bank is participating in a lawsuit against certain issuers related to these misrepresentations.

The amortized cost and estimated fair value of investment securities available for sale as of December 31, 2012 and 2011 is as follows:

(Dollars in thousands)	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
2012				
Equity securities	\$ 2,104	\$ 92	\$ (255)	\$ 1,941
U.S. Government agency securities	12,657	156	(4)	12,809

Asset-backed securities	66	-	(18)	48
	\$ 123,874	\$ 3,893	\$ (2,466)	\$ 125,301

At December 31, 2012 and 2011, the fair value of investment securities pledged to secure public funds, trust balances, repurchase agreements, deposit and other obligations totaled \$119.8 million and \$112.1 million, respectively.

The amortized cost and estimated fair value of debt securities at December 31, 2012, by contractual maturity are shown below. Actual maturities may differ from contractual maturities because of prepayment or call options embedded in the securities.

(Dollars in thousands)	Amortized cost	Fair value
Due in one year or less	\$ 4,727	\$ 4,739
Due after one year through five years	14,114	14,895

Due after five years through ten years	21,490	22,560
Due after ten years	37,690	37,701
	78,021	79,895
Mortgage-backed securities	50,660	51,492
	\$ 128,681	\$ 131,387

The composition of the net realized securities gains (losses) for the years ended December 31, 2012, 2011 and 2010 is as follows:

(Dollars in thousands)	2012	2011	2010
Gross gains realized	\$ 45	\$ 195	\$ 846
Gross losses realized	(1)	(38)	(173)
Net gains realized	\$ 44	\$ 157	\$ 673
Tax provision applicable to net securities gains	\$ 15	\$ 53	\$ 229

Impairment:

The condition of the portfolio at year-end 2012 as measured by the dollar amount of temporarily impaired securities remained virtually unchanged from the prior year; however, the amount of unrealized losses is \$738 thousand less than one year ago. The sectors with the largest improvement in unrealized loss are PLMBS and Trust Preferred securities. Contributing to the improvement in PLMBS was an OTTI charge of \$100 thousand taken in 2012. Trust preferred securities continue to represent the largest component (62%) of the total portfolio unrealized loss.

For securities with an unrealized loss, Management applies a systematic methodology in order to perform an assessment of the potential for other-than-temporary impairment. In the case of debt securities, investments considered for other-than-temporary impairment: (1) had a specified maturity or repricing date; (2) were generally expected to be redeemed at par, and (3) were expected to achieve a recovery in market value within a reasonable period of time. In addition, the Bank considers whether it intends to sell these securities or whether it will be forced to sell these securities before the earlier of amortized cost recovery or maturity. Equity securities are assessed for other-than-temporary impairment based on the length of time of impairment, dollar amount of the impairment and general market and financial conditions relating to specific issues. The impairment identified on debt and equity securities and subject to assessment at December 31, 2012, was deemed to be temporary and required no further adjustments to the financial statements, unless otherwise noted. The table below reflects the temporary impairment in the investment portfolio (excluding restricted stock), aggregated by investment category, length of time that individual securities have been in a continuous unrealized loss position and the number of securities in each category as of December 31, 2012 and 2011.

(Dollars in thousands)	December 31, 2012

The unrealized loss in the trust preferred sector declined by approximately \$200 thousand compared to the prior year-end as market prices continued to show improvement during 2012. All of the Bank's trust preferred securities are variable rate notes with long maturities (2027 – 2028) from companies that received money (and in some cases paid back) from the Troubled Asset Relief Program (TARP), continue to pay dividends and have raised capital. The credit ratings on this portfolio are similar to the prior period and no bonds have missed or suspended any payments. At December 31, 2012, the Bank believes it will be able to collect all interest and principal due on these bonds and no other-than-temporary-impairment charges were recorded. For additional detail on the Bank's trust preferred securities see the following table.

Trust Preferred Securities

(Dollars in thousands)

Deal Name	Single Issuer or Pooled	Class	Amortized Cost	Fair Value	Gross Unrealized Gain (Loss)	Lowest Credit Rating Assigned	Number of Banks Currently Performing	Deferrals and Defaults as % of Original Collateral	Expected Deferral/ Defaults as a Percentage of Remaining Performing Collateral

Fleet Cap Tr V	Single	Preferred Stock	973	764	(209)	BB	1	None	None
			\$5,905	\$4,830	\$(1,075)				

The PLMBS sector continues to show a gross unrealized loss of \$123 thousand on five securities. The majority of this sector is comprised of "Alt-A" PLMBS. These bonds were all rated AAA at time of purchase but have since experienced rating declines. Some have experienced increased delinquencies and defaults, while others have seen the credit support increase as the bonds paid-down. The Bank monitors the performance of the Alt-A investments on a regular basis and reviews delinquencies, default rates, credit support levels and various cash flow stress test scenarios. In determining the credit related loss, Management considers all principal past due 60 days or more as a loss. If additional principal moves beyond 60 days past due, it will also be considered a loss. As a result of the analysis on PLMBS it was determined that three bonds contained losses that were considered other-than-temporary. Management determined \$100 thousand was credit related and therefore, recorded an impairment charge of \$100 thousand against earnings in 2012. The market for PLMBS continues to be weak and Management believes that this factor accounts for a portion of the unrealized losses that is not attributable to credit issues. Management continues to monitor these securities and it is possible that additional write-downs may occur if current loss trends continue. The Bank is participating in a class-action lawsuit against one PLMBS servicer that centers on defective warranties and representations made as part of the underwriting process. The resolution of this action is unknown at this time. For additional detail on the Bank's PLMBS see the following table.

Private Label Mortgage Backed Securities

(Dollars in thousands)

The following table represents the cumulative credit losses on securities recognized in earnings as of December 31, 2012.

(Dollars in thousands)

	Twelve Months Ended December 31, 2012
Balance of cumulative credit losses on securities, January 1, 2012	\$ 390
Additions for credit losses recorded which were not previously recognized as components of earnings	100
Balance of cumulative credit losses on securities, December 31, 2012	\$ 490

The Bank held \$3.6 million of restricted stock at the end of 2012. The restricted stock is comprised primarily of an investment in the Federal Home Loan Bank of Pittsburgh (FHLB). FHLB stock is carried at a cost of \$100 per share. In 2008, FHLB announced a capital restoration plan that resulted in it indefinitely suspending paying dividends and repurchasing excess capital stock from its members. However, during 2012, FHLB repurchased \$1.5 million in stock as part of special repurchases and paid a small dividend. However, FHLB has not indicated that it has returned to its prior practice of repurchasing excess capital stock. As of December 31, 2012, the Bank held \$1.6 million in FHLB stock in excess of what it would have been required to hold prior to the suspension of the stock repurchase plan. FHLB stock is evaluated for impairment primarily based on an assessment of the ultimate recoverability of its cost. As a government sponsored entity, FHLB has the ability to raise funding through the U.S. Treasury that can be used to support its operations. There is not a public market for FHLB stock and the benefits of FHLB membership (e.g., liquidity and low cost funding) add value to the stock beyond purely financial measures. If FHLB stock were deemed to be impaired, the write-down for the Bank could be significant. Management intends to remain a member of the FHLB and believes that it will be able to fully recover the cost basis of this investment.

Note 5. Loans

The Bank reports its loan portfolio based on the primary collateral of the loan. It further classifies these loans by the primary purpose, either consumer or commercial. The Bank's mortgage loans include long-term loans to individuals and businesses secured by mortgages on the borrower's real property. Construction loans are made to finance the purchase of land and the construction of residential and commercial buildings thereon, and are secured by mortgages on real estate. Commercial loans are made to businesses of various sizes for a variety of purposes including construction, property, plant and equipment, and working capital. Commercial loans also include loans to government municipalities. Commercial lending is concentrated in the Bank's primary market, but also includes purchased loan participations. Consumer loans are comprised of installment, home equity and unsecured personal lines of credit. However, the Bank discontinued its indirect lending activities in 2010.

A summary of loans outstanding, by primary collateral, at the end of the reporting periods is as follows:

(Dollars in thousands)	December 31, 2012	December 31, 2011
Residential Real Estate 1-4 Family		
Consumer first liens	\$ 93,790	\$ 86,767
Consumer junior liens and lines of credit	35,494	40,290
Total consumer	129,284	127,057

New loans made	8,358	3,854
Repayments	(2,304)	(1,055)
Balance at end of year	\$16,925	\$10,871

Note 6. Loan Quality

Management utilizes a risk rating scale ranging from 1 (Prime) to 9 (Loss) to evaluate loan quality. This risk rating scale is used primarily for commercial purpose loans. Consumer purpose loans are identified as either pass or substandard. Substandard consumer loans are loans that are 90 days or more past due and still accruing or on nonaccrual. Loans rated 1 – 4 are considered pass credits. Loans that are rated 5 are pass credits, but have been identified as credits that are likely to warrant additional attention and monitoring. Loans rated 6 (Other Assets Especially Mentioned - OAEM) or worse begin to receive enhanced monitoring and reporting by the Bank. Loans rated 7 (Substandard) or 8 (Doubtful) exhibit the greatest financial weakness and present the greatest possible risk of loss to the Bank. Nonaccrual loans are rated no better than 7. The following factors represent some of the factors used in determining the risk rating of a borrower: cash flow, debt coverage, liquidity, management, and collateral. Risk ratings, for pass credits, are generally reviewed annually for term debt and at renewal for revolving or renewing debt. The Bank monitors loan quality by reviewing four measurements: (1) loans rated 6 (OAEM) or worse (collectively “watch list”), (2) delinquent loans, (3) other real estate owned (OREO), and (4) net-charge-offs. Management compares trends in these measurements with the Bank’s internally established targets, as well as its national peer group.

Watch list loans exhibit financial weaknesses that increase the potential risk of default or loss to the Bank. However, inclusion on the watch list, does not by itself, mean a loss is certain. The watch list includes both performing and nonperforming loans. Watch list loans totaled \$104.3 million at year-end compared to \$93.5 million at the prior year end. The watch list is comprised of \$32.7 million rated 6, \$68.8 million rated 7 and \$2.8 million rated 8. The loan, rated 8, represents one loan of a total \$8.1 million relationship (see Table 13, credit 8) and is secured by land for a residential real estate development. When initially rated an 8 at September 30, 2012, there was not sufficient collateral to support the entire \$8.1 million relationship and the doubtful balance represented the potential collateral shortage. The Bank is in the process of negotiating additional collateral to fully secure the loan and has maintained the 8 rating. The Bank has no loans rated 9 (Loss). The Bank’s Loan Management Committee reviews these loans and risk ratings on a quarterly basis in order to proactively identify and manage problem loans. In addition, a committee meets monthly to discuss possible workout strategies for OREO and all credits rated 7 or worse. Management also tracks other commercial loan risk measurements including high loan to value loans, concentrations, participations and policy exceptions and reports these to the Credit Risk Oversight Committee of the Board of Directors. The Bank also uses a third-party consultant to assist with internal loan review with an overarching goal of reviewing 60% of commercial loans each year. The FDIC defines certain supervisory loan-to-value lending limits. The Bank’s internal loan-to-value limits are all equal to, or have lower loan-to-value limits, than the supervisory loan to value limits. At December 31, 2012, the Bank had loans of \$33.4 million that exceeded the supervisory limit.

The following table reports on the credit rating for those loans in the portfolio that are assigned an individual credit rating as of December 31, 2012 and 2011:

(Dollars in thousands)	Pass	OAEM	Substandard	Doubtful	Total

Delinquent loans are a result of borrowers' cash flow and/or alternative sources of cash being insufficient to repay loans. The Bank's likelihood of collateral liquidation to repay the loans becomes more probable the further behind a borrower falls, particularly when loans reach 90 days or more past due. Management monitors the performance status of loans by the use of an aging report. The aging report can provide an early indicator of loans that may become severely delinquent and possibly result in a loss to the Bank. The following table presents the aging of payments in the loan portfolio as of December 31, 2012 and 2011:

(Dollars in thousands)

Nonaccruing loans generally represent Management's determination that the borrower will be unable to repay the loan in accordance with its contractual terms and that collateral liquidation may or may not fully repay both interest and principal. It is the Bank's policy to evaluate the probable collectability of principal and interest due under terms of loan contracts for all loans 90-days or more past due, nonaccrual loans or impaired loans. Further, it is the Bank's policy to discontinue accruing interest on loans that are not adequately secured and in the process of collection. Upon determination of nonaccrual status, the Bank subtracts any current year accrued and unpaid interest from its income, and any prior year accrued and unpaid interest from the allowance for loan losses. Management continually monitors the status of nonperforming loans, the value of any collateral and potential of risk of loss. Nonaccrual loans are rated no better than 7 (Substandard).

Loan quality has declined during 2012, as measured by the balance of nonperforming loans (nonaccrual and loans past due 90-days or more). Nonperforming loans have increased by \$14.4 million with the majority of the increase coming in the commercial real estate sector. The nonaccrual table that follows identifies the most significant loans in nonaccrual status. These nonaccrual loans account for 82% of the total nonaccrual balance and credits 5 – 11 added \$20.4 million to nonaccrual during 2012. Also included in the nonaccrual total is \$11.4 million of loans classified as troubled debt restructurings (TDR). A TDR loan is maintained on nonaccrual status until a satisfactory repayment history is established. All of the Bank's TDR loans are in compliance with the modified terms and it is likely that some will be able to be returned to performing status in 2013. It is possible that other nonaccrual loans could be removed from nonaccrual status in 2013. However, it is also possible that other loans may become delinquent and nonperforming loans could remain at a high level due to lengthy workout periods on these loans.

All loans on the watch list that are not on nonaccrual or past due 90 days or more are considered potential problem loans. These loans are rated 6 or 7 due to a financial weakness that has the potential to increase the risk of loss to the Bank. However, due to the performing status or other mitigating factors such as collateral or personal guarantees, the loans remain on an accruing status. Potential problem loans at December 31, 2012 totaled \$67.3 million compared to \$71.0 million at December 31, 2011.

The following table presents a summary of nonperforming assets as of December 31, of each year:

(Dollars in thousands)	2012		2011	
	Balance	% of Loan Segment	Balance	% of Loan Segment

Agricultural						\$ 2,666
	\$29,852	\$ -				

(1) Appraisal value, as reported, does not reflect the pay-off of any senior liens or the cost to liquidate the collateral, but does reflect only the Bank's share of the collateral if it is a participated loan.

Credit 1 was approved as a loan restructuring and was returned to accrual status in March 2013. Credit 2 was charged down by \$1.6 million in the first quarter of 2012 due to a reduced appraisal value. This credit is part of a participated loan and it is likely that the lead bank will begin foreclosure action in 2013. Credit 3 is in the process of foreclosure. Credit 4 is a TDR that is performing in accordance with the modified terms. This credit is part of a shared national credit and it is unlikely to return to accrual status until approved by the lead regulatory agency. Credit 5 is a TDR that is performing in accordance with the modified terms and is on nonaccrual until a satisfactory repayment history is established. Credit 6 was written down by \$259 thousand in 2012. Foreclosure action has been initiated on this credit. Credit 7 is exploring external financing to pay off its loan and is considering restructuring options from the Bank, but it is unknown if these efforts will be successful. Credit 8 is in the process of negotiating with the Bank for additional collateral and possible loan restructuring. Credit 9 is a TDR. Two plant facilities were sold through a court approved bankruptcy in January 2013. The Bank expects to receive a pay down on this credit from the sale, but the amount is unknown at this time. Credit 10 is a participated loan and the Bank is in discussion with the lead bank on a workout strategy. Credit 11 is a TDR and is performing in accordance with its modified terms.

Interest not recognized on nonaccrual loans was \$800 thousand, \$319 thousand and \$535 thousand for the years ended December 31, 2012, 2011 and 2010, respectively. In addition to monitoring nonaccrual loans, the Bank also closely monitors impaired loans and troubled debt restructurings. A loan is considered to be impaired when, based on current

information and events, it is probable that the Bank will be unable to collect all interest and principal payments due according to the originally contracted terms of the loan agreement. Nonaccrual loans, excluding consumer purpose loans, and TDR loans are considered impaired and the Bank reviews all other loans rated 7 or worse for impaired status. Impaired loans totaled \$39.4 million at year-end 2012 compared to \$28.0 million at December 31, 2011. The increase in impaired loans occurred primarily in the commercial real estate category. The majority of the increase was the addition of credits 6 and 8 from the nonaccrual table as impaired loans. See the following table for additional information on impaired loans.

A loan is considered a troubled debt restructuring if the creditor (the Bank), for economic or legal reasons related to the debtor's financial difficulties, grants a concession to the debtor that it would not otherwise consider. The Bank reviews all loans rated 5 or worse when it is providing a loan restructure, modification or new credit facility to determine if the action is a TDR. If a TDR loan is placed on nonaccrual status, it remains on nonaccrual status for at

least six months to ensure performance. All TDR loans are in compliance with their modified terms. The largest TDR loans are referenced as credits 4, 5, 9 and 11 on the nonaccrual table above. All of the TDR loans are commercial purpose loans except for three consumer loans totaling \$322 thousand. The following table identifies TDR loans as of December 31, 2012 and 2011:

(Dollars in thousands)	Troubled Debt Restructurings		Troubled Debt Restructurings That Have Defaulted on Modified Terms YTD

Twelve Months Ended December 31, 2011				
Maturity	1	\$ 263	\$ 263	\$ 246
Rate	3	2,950	2,950	88
Payment	5	6,115	4,247	4,186
	9	\$ 9,328	\$ 7,460	\$ 4,520

The Bank holds \$5.1 million of other real estate owned, comprised of ten properties compared to \$3.2 million and seven properties at December 31, 2011. The largest property (\$2.8 million, property 2 in table below) was added in 2012 and represents a failed residential real estate development in central Pennsylvania. During 2012, the Bank recorded losses on the sales of, or write-downs on OREO of \$582 thousand that is recorded in other income. Included in this total is a fourth quarter 2012 write-down of \$349 thousand on property number 1 shown in table below. A write-down of \$800 thousand was recorded on property number 2 through the allowance for loan losses shortly after acquisition.

The following table provides additional information on significant other real estate owned properties.

December 31, 2012

(Dollars in thousands)	Date Acquired	Balance	Collateral	Last Location	Appraisal
------------------------	---------------	---------	------------	---------------	-----------

Property 1	2011	\$ 1,970	unimproved and improved real estate for residential development on four separate tracts totaling 150 acres	PA	Nov-12	\$2,141
Property 2	2012	2,758	1st, 2nd, and 3rd liens residential development land - four tracts with 294 acres	PA	Aug-12	\$3,292
		\$ 4,728				

At December 31, 2012, the Bank had \$121 thousand of residential properties in the process of foreclosure compared to \$1.0 million at the end of 2011.

Allowance for Loan Losses:

Management performs a monthly evaluation of the adequacy of the allowance for loan losses (ALL). The ALL is determined by segmenting the loan portfolio based on the loan's collateral. The Bank further classifies the portfolio based on the primary purpose of the loan, either consumer or commercial. When calculating the ALL, consideration is given to a variety of factors in establishing this estimate including, but not limited to, current economic conditions, diversification of the loan portfolio, delinquency statistics, results of internal loan reviews, historical charge-offs, the adequacy of the underlying collateral (if collateral dependent) and other relevant factors. The Bank begins enhanced monitoring of all loans rated 6 (OAEM) or worse, and obtains a new appraisal or asset valuation for any loan rated 7 (substandard) or worse. Management, at its discretion, may determine that additional adjustments to the appraisal or valuation are required. Valuation adjustments will be made as necessary based on factors, including, but not limited to: the economy, deferred maintenance, industry, type of property/equipment, age of the appraisal, etc. and the knowledge Management has about a particular situation. In addition, the cost to sell or liquidate the collateral is also estimated and deducted from the valuation in order to determine the net realizable value to the Bank. If an appraisal is not available, Management may make its best estimate of the real value of the collateral or use last known market value and apply appropriate discounts. If an adjustment is made to the collateral valuation, this will be documented with appropriate support and reported to the Loan Management Committee. When determining the allowance for loan losses, certain factors involved in the evaluation are inherently subjective and require material estimates that may be susceptible to significant change, including the amounts and timing of future cash flows expected to be received on impaired loans. Management monitors the adequacy of the allowance for loan losses on an ongoing basis and reports its adequacy quarterly to the Credit Risk Oversight Committee of the Board of Directors. Management believes that the allowance for loan losses at December 31, 2012 is adequate.

The analysis for determining the ALL is consistent with guidance set forth in generally accepted accounting principles (GAAP) and the Interagency Policy Statement on the Allowance for Loan and Lease Losses. The analysis has two components, specific and general allocations. The specific component addresses specific reserves established for impaired loans. A loan is considered to be impaired when, based on current information and events, it is probable that the Bank will be unable to collect all interest and principal payments due according to the originally contracted terms of the loan agreement. Collateral values discounted for market conditions and selling costs are used to establish specific allocations for impaired loans. However, it is possible that as a result of the credit analysis, a specific reserve is not required for an impaired loan. Despite an increase in impaired loans in 2012, the specific ALL allocation for these loans declined. The largest loans added to the impaired list are adequately secured and required no specific ALL. Charge-offs on impaired loans in 2012 were the primary reason for the decline in the specific ALL allocation. See the previous impaired loan discussion for a table that reports impaired loans and the specific reserve established for impaired loans.

The general allocation component addresses the reserves established for pools of homogenous loans. The general component includes a quantitative and qualitative analysis. When calculating the general allocation, the Bank segregates its loan portfolio into the following sectors based primarily on the type of supporting collateral: residential real estate, commercial, industrial or agricultural real estate; commercial and industrial (C&I non-real estate), and consumer. The residential real estate sector is further segregated by first lien loans, junior liens and home equity products, and residential real estate construction. The quantitative analysis uses the Bank's eight quarter rolling historical loan loss experience adjusted for factors derived from current economic and market conditions that have been determined to have an effect on the probability and magnitude of a loss. The historical loss experience factor was 1.05% of gross loans at December 31, 2012, compared to .70% at the prior year-end. The increase is due primarily to the increase in charge-offs during the eight quarter historical review period. The qualitative analysis utilizes a risk matrix that incorporates qualitative and environmental factors such as: loan volume, management, loan review process, credit concentrations, competition, and legal and regulatory issues. These factors are each risk rated from minimal to high risk and in total can add up to a qualitative factor of 37.5 basis points. At December 31, 2012, the qualitative factor was 21.5 basis points, compared to 18.5 basis points at December 31, 2011. These factors are determined on the basis of Management's observation, judgment and experience.

Real estate appraisals and collateral valuations are an important part of the Bank's process for determining potential loss on collateral dependent loans and thereby have a direct effect on the determination of loan reserves, charge-offs and the calculation of the allowance for loan losses. As long as the loan remains a performing loan, no further updates to appraisals are required. If a loan or relationship migrates to risk rating of 7 or worse, an evaluation for impairment status is made based on the current information available at the time of downgrade and a new appraisal or collateral valuation is obtained. We believe this practice complies with the regulatory guidance dated December 12, 2010.

In determining the allowance for loan losses, Management, at its discretion, may determine that additional adjustments to the fair value obtained from an appraisal or collateral valuation are required. Adjustments will be made as necessary based on factors, including, but not limited to the economy, deferred maintenance, industry, type of property or equipment etc., and the knowledge Management has about a particular situation. In addition, the cost to sell or liquidate the collateral is also estimated and deducted from the valuation in order to determine the net realizable

value to the Bank.

The following table shows, by loan segment, the activity in the ALL, for the years ended December 31, 2012, 2011 and 2010:

(Dollars in thousands)	Residential Real Estate 1-4 Family			Commercial Industrial & Agricultural	Commercial Industrial & Agricultural	Consumer	Total
	First Liens	Junior Liens & Lines of Credit	Construction	Real Estate			
Allowance at December 31, 2009	\$ 550	\$ 278	\$ 3,087	\$ 4,175	\$ 752	\$ 95	\$8,937
Charge-offs	(107)	(165)	(982)	(1,736)	(232)	(452)	(3,674)

Charge-offs	(251)	(71)	-	(3,298)	(861)	(236)	(4,717)
Recoveries	1	25	-	13	21	88	148
Provision	114	44	(323)	4,478	809	103	5,225
Allowance at December 31, 2012	\$ 913	\$ 306	\$ 899	\$ 6,450	\$ 1,620	\$ 191	\$10,379

The following table shows, by loan segment, the loans that were evaluated for the ALL under a specific reserve (individually) and those that were evaluated under a general reserve (collectively), and the amount of the allowance established in each category as of December 31, 2012 and 2011:

(Dollars in thousands)	Residential Real Estate 1-4 Family			Commercial Industrial & Agricultural	Commercial Industrial & Agricultural	Consumer	Total
	First Liens	Junior Liens & Lines of Credit	Construction	Real Estate			
December 31, 2012							
Loans evaluated for allowance:							
Individually	\$ 3,583	\$ 692	\$ 557	\$ 30,949	\$ 3,583	\$ -	\$ 39,364
Collectively	151,016	41,596	14,875	332,925	163,151	10,652	714,215
Total	\$ 154,599	\$ 42,288	\$ 15,432	\$ 363,874	\$ 166,734	\$ 10,652	\$ 753,579
Allowance established for loans evaluated:							
Individually	\$ 20	\$ 3	\$ -	\$ 357	\$ 467	\$ -	\$ 847
Collectively	893	303	899	6,093	1,153	191	9,532
Allowance at December 31, 2012	\$ 913	\$ 306	\$ 899	\$ 6,450	\$ 1,620	\$ 191	\$ 10,379
December 31, 2011							
Loans evaluated for allowance:							
Individually	\$ 3,899	\$ 162	\$ 43	\$ 21,622	\$ 2,308	\$ -	\$ 28,034
Collectively	137,998	47,974	21,239	337,352	180,386	13,427	738,376
Total	\$ 141,897	\$ 48,136	\$ 21,282	\$ 358,974	\$ 182,694	\$ 13,427	\$ 766,410
Allowance established for loans evaluated:							
Individually	\$ 495	\$ 3	\$ -	\$ 1,591	\$ 870	\$ -	\$ 2,959
Collectively	554	305	1,222	3,666	781	236	6,764
Allowance at December 31, 2011	\$ 1,049	\$ 308	\$ 1,222	\$ 5,257	\$ 1,651	\$ 236	\$ 9,723

The following table shows the allocation of the allowance for loan losses by loan category as of December 31, 2012 and 2011:

(Dollars in thousands)	2012		2011	
	Balance	% of Allowance	Balance	% of Allowance
Residential real estate 1-4 family				
First liens	\$913	9	\$1,049	11
Junior liens and lines of credit	306	3	308	3
Total	1,219	12	1,357	14
Residential real estate construction	899	8	1,222	13
Commercial, industrial and agricultural real estate	6,450	62	5,257	54
Commercial, industrial and agricultural	1,620	16	1,651	17
Consumer	191	2	236	2
	\$10,379	100	\$9,723	100

The percentage of the loans in each category to total gross loans at December 31, 2012 and 2011 is as follows:

	2012		2011	
Residential real estate 1-4 family				
First liens	21	%	19	%
Junior liens and lines of credit	6	%	6	%
Total	27	%	25	%
Residential real estate construction	2	%	3	%
Commercial, industrial and agricultural real estate	48	%	47	%
Commercial, industrial and agricultural	22	%	24	%
Consumer	1	%	1	%
	100	%	100	%

The allocation of the allowance for loan losses is based on estimates and is not intended to imply limitations on the usage of the allowance. The entire allowance is available to absorb any losses without regard to the category in which the loan is classified.

The Bank added \$5.2 million to the allowance for loan losses (ALL) through the provision for loan loss expense in 2012 compared to \$7.5 million in the prior year. Net charge-offs totaled \$4.6 million for the year and as a result, the ALL increased by \$656 thousand. The increase in provision expense was due to a higher level of loan charge-offs and Management's intention to ensure adequate ALL coverage for future losses due to weakening credit quality. The net loan charge-off ratio decreased to .60% for the year compared to .86% for the prior year and the ALL coverage ratio increased to 1.38% compared to 1.27% at the prior year-end.

Charged-off loans usually result from: (1) a borrower being legally relieved of loan repayment responsibility through bankruptcy, (2) insufficient proceeds from the sale of collateral to repay a loan; or (3) the borrower and/or guarantor does not own other marketable assets that, if sold, would generate sufficient sale proceeds to repay a loan.

The Bank recorded net loan charge-offs of \$4.6 million in 2012, \$2.0 million less than in 2011, but still the second highest net charge-off level in the last five years. Gross charge-offs declined by \$2.3 million year over year with the decrease occurring in the residential real estate construction category. The largest gross charge-offs occurred in the commercial real estate sector for \$3.3 million in 2012. Within this sector, four charge-offs accounted for \$3.1 million of the total. One loan was charged down by \$1.6 million due to an annual appraisal update that resulted in a lower valuation for the second consecutive year. A second was written down by \$259 thousand based on appraisals and prior to starting foreclosure action. These two loans are Credits 2 and 6, respectively in the nonaccrual table previously presented. A third write-down (\$400 thousand) was taken on another loan that is also on nonaccrual status. The fourth charge-off mentioned was for \$800 thousand as the property was moved to OREO (Property 2 of the other real estate owned table previously presented). The charge-offs in the C&I category consisted primarily of one loan for \$249 thousand (real estate related) and one loan for \$305 thousand (restaurant). If nonperforming loans remain at the current level, it is possible that net charge-offs will remain higher than historical averages.

Note 7. Premises and Equipment

Premises and equipment consist of:

(Dollars in thousands)	Estimated Life	December 31	
		2012	2011
Land		\$3,033	\$3,028
Buildings and leasehold improvements	15 - 30 years, or lease term	23,526	22,296
Furniture, fixtures and equipment	3 - 10 years	15,053	13,991
Total cost		41,612	39,315
Less: Accumulated depreciation		(24,575)	(23,274)
Net premises and equipment		\$17,037	\$16,041

The following table shows the amount of depreciation and rental expense for the years ended December 31:

	2012	2011	2010
Depreciation expense	\$1,301	\$1,293	\$1,226
Rent expense on leases	\$472	\$406	\$383

The Corporation leases various premises and equipment for use in banking operations. Some of these leases provide renewal options of varying terms. The rental cost of these optional renewals is not included below. At December 31, 2012, future minimum payments on these leases are as follows:

(Dollars in thousands)	
2013	\$638
2014	604
2015	520
2016	491
2017	466
2018 and beyond	5,954
	\$8,673

Note 8. Goodwill and Intangible Assets

The following table summarizes the changes in goodwill:

(Dollars in thousands)	For the years ended December 31	
	2012	2011
Beginning balance	\$ 9,016	\$ 9,016
Goodwill acquired	-	-
Adjustment to goodwill	-	-
Ending balance	\$ 9,016	\$ 9,016

The following table summarizes the other intangible assets at December 31:

	Core Deposit		Customer List	
	2012	2011	2012	2011
Gross carrying amount	\$3,252	\$3,252	\$589	\$589
Accumulated amortization	(2,349)	(1,987)	(369)	(296)
Net carrying amount	\$903	\$1,265	\$220	\$293

The following table shows the amortization expense for the years ended December 31:

(Dollars in thousands)	2012	2011	2010
Amortization expense	\$435	\$446	\$457

Core deposit intangibles are amortized over the estimated life of the acquired core deposits. At December 31, 2012 the remaining life was 2.5 years. The customer list intangible is amortized over the estimated life of the acquired customer list. At December 31, 2012, the remaining life was 5.9 years. The following table shows the expected amortization expense for intangible assets:

(Dollars in thousands)	
2013	\$424
2014	414
2015	223
2016	31

2017	21
2018	10
	\$1,123

Note 9. Mortgage Servicing Rights

Activity pertaining to mortgage servicing rights and the related valuation allowance follows:

(Dollars in thousands)	For the Years Ended		
	December 31		
	2012	2011	2010
Cost of mortgage servicing rights:			
Beginning balance	\$730	\$933	\$1,190
Originations	-	-	10
Amortization	(272)	(203)	(267)
Ending balance	\$458	\$730	\$933
Valuation allowance:			
Beginning balance	\$(362)	\$(330)	\$(476)
Valuation charges	(16)	(81)	(48)
Valuation reversals	155	49	194
Ending balance	\$(223)	\$(362)	\$(330)
Mortgage servicing rights cost	\$458	\$730	\$933
Valuation allowance	(223)	(362)	(330)
Carrying value	\$235	\$368	\$603
Fair value	\$235	\$368	\$603
Fair value assumptions:			
Weighted average discount rate	10.50%	10.00%	10.00%
Weighted average prepayment speed	21.74%	21.85%	15.55%

The value of mortgage servicing rights is greatly affected by changes in mortgage interest rates and the resulting changes in prepayment speeds. The following chart shows the changes in fair value under different rate scenarios:

(Dollars in thousands)	2012	2011	2010
Changes in fair value:			
Rates + 1%	\$40	\$87	\$321
Rates (1)%	\$(23)	\$(36)	\$(142)

Note 10. Deposits

Deposits are summarized as follows:

(Dollars in thousands)	December 31	
	2012	2011
Noninterest-bearing checking	\$ 123,623	\$ 104,245
Interest-bearing checking	135,454	117,479
Money management	380,079	326,219
Savings	57,165	51,728
Total interest-bearing checking and savings	572,698	495,426
Retail time deposits	127,861	147,479
Brokered time deposits	50,258	40,836
Total time deposits	178,119	188,315
Total deposits	\$ 874,440	\$ 787,986
Overdrawn deposit accounts reclassified as loans	\$ 128	\$ 232

The following table shows the maturity of outstanding time deposits of \$100,000 or more at December 31, 2012:

(Dollars in thousands)	Retail Time Deposits	Brokered Time Deposits	Total Time Deposits
Maturity distribution:			
Within three months	\$ 7,700	\$ -	\$ 7,700
Over three through six months	6,061	-	6,061
Over six through twelve months	7,700	2,250	9,950
Over twelve months	10,680	865	11,545
Total	\$ 32,141	\$ 3,115	\$ 35,256

At December 31, 2012 the scheduled maturities of time deposits are as follows:

(Dollars in thousands)	Retail Time Deposits	Brokered Time Deposits	Total Time Deposits
2013	\$ 79,939	\$ 17,250	\$ 97,189
2014	24,797	10,265	35,062

2015	9,227	8,062	17,289
2016	13,895	9,360	23,255
2017	-	2,477	2,477
2018 and beyond	3	2,844	2,847
	\$ 127,861	\$ 50,258	\$ 178,119

Note 11. Securities Sold Under Agreements to Repurchase, Short-Term Borrowings and Long-Term Debt

The Bank's short-term borrowings are comprised of securities sold under agreements to repurchase and a line-of-credit with the Federal Home Loan Bank of Pittsburgh (Open Repo Plus). Securities sold under agreements to repurchase are overnight borrowings between the Bank and its commercial and municipal depositors. These accounts reprice weekly. Open Repo Plus is a revolving term commitment used on an overnight basis. The term of this commitment may not exceed 364 days and it reprices daily at market rates. As of December 31, 2012, the available amount on this line of credit was \$35 million. These borrowings are described below:

(Dollars in thousands)	December 31 2012		2011			
	Repurchase Agreements	FHLB Open Repo	Repurchase Agreements	FHLB Open Repo		
Ending balance	\$42,209	\$ -	\$53,103	\$ -		
Weighted average rate at year end	0.15 %	-	0.25 %	-		
Range of interest rates paid at year end	0.15 %	-	0.25 %	-		
Maximum month-end balance during the year	\$57,279	\$ -	\$71,485	\$ 1,800		
Average balance during the year	\$51,558	\$ -	\$60,136	\$ 192		
Weighted average interest rate during the year	0.15 %	-	0.25 %	0.74 %		

The collateral for securities sold under agreements to repurchase consists of U.S. Government and U.S. Government agency securities with a fair value of \$54.1 million and \$62.7 million, respectively, at December 31, 2012 and 2011.

A summary of long-term debt at the end of the reporting period follows:

(Dollars in thousands)	December 31	
	2012	2011
Loans from the Federal Home Loan Bank	\$12,410	\$48,336

The loans from the FHLB are comprised of term loans payable at maturity and amortizing advances. These loans have fixed interest rates ranging from 3.70% to 5.60% (weighted average rate of 3.90%) and final maturities ranging from November 2014 to November 2039. All borrowings from the FHLB are collateralized by FHLB stock, mortgage-backed securities and first mortgage loans.

The scheduled amortization and maturities of the FHLB borrowings at December 31, 2012 are as follows:

(Dollars in thousands)

2013	\$8
2014	2,007
2015	10,008
2016	8
2017	9
2018 and beyond	370
	\$12,410

The Corporation's maximum borrowing capacity with the FHLB at December 31, 2012 was \$81.3 million, which includes the \$35 million line of credit. The total amount available to borrow at year-end was approximately \$68.9 million.

Note 12. Federal Income Taxes

The temporary differences which give rise to significant portions of deferred tax assets and liabilities are as follows:

(Dollars in thousands)	December 31	
	2012	2011
Deferred Tax Assets		
Allowance for loan losses	\$3,529	\$3,306
Deferred compensation	1,102	1,084
Purchase accounting	63	75
Deferred loan fees and costs, net	160	160
Capital loss carryover	887	887
Other than temporary impairment of investments	512	478
Accumulated other comprehensive loss	2,087	2,643
AMT Credit	968	-
Other	703	536
	10,011	9,169
Valuation allowance	(1,232)	(1,232)
Total gross deferred tax assets	8,779	7,937
Deferred Tax Liabilities		
Core deposit intangibles	307	430
Depreciation	179	163
Joint ventures and partnerships	62	61
Pension	2,615	674
Mortgage servicing rights	80	125
Customer list	75	100
Total gross deferred tax liabilities	3,318	1,553
Net deferred tax asset	\$5,461	\$6,384

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. Based on the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is more likely than not that the Bank will realize the benefits of these deferred tax assets.

The components of the provision for Federal income taxes attributable to income from operations were as follows:

Edgar Filing: FRANKLIN FINANCIAL SERVICES CORP /PA/ - Form 10-K

(Dollars in thousands)	For the Years Ended December 31		
	2012	2011	2010
Current tax expense	\$ 145	\$ 502	\$ 3,177
Deferred tax expense (benefit)	367	(91)	(240)
Income tax provision	\$ 512	\$ 411	\$ 2,937

For the years ended December 31, 2012, 2011, and 2010, the income tax provisions are different from the tax expense which would be computed by applying the Federal statutory rate to pretax operating earnings. A reconciliation between the tax provision at the statutory rate and the tax provision at the effective tax rate is as follows:

(Dollars in thousands)	For the Years Ended December 31		
	2012	2011	2010
Tax provision at statutory rate	\$ 1,998	\$ 2,373	\$ 3,587
Income on tax-exempt loans and securities	(1,251)	(1,167)	(701)
Nondeductible interest expense relating to carrying tax-exempt obligations	43	63	42
Dividends received exclusion	(17)	(20)	(12)
Income from bank owned life insurance	(217)	(226)	(218)
Valuation allowance	-	32	272
Other, net	(44)	(644)	(33)
Income tax provision	\$ 512	\$ 411	\$ 2,937
Effective income tax rate	8.7 %	5.9 %	27.8 %

During the second quarter of 2011, an internal review discovered that tax-exempt commercial loans booked in the fourth quarter of 2008, during 2009, 2010 and the first quarter of 2011 were not properly coded as tax-exempt in the Bank's core processing system. This resulted in the income from these loans being recorded as taxable income and the benefit of the tax-exempt status was not reflected in the Corporation's income tax calculation. After a thorough review of the affected loans to determine the unrecorded tax benefit, and consultation with the Corporation's internal and external audit firms, the Corporation deemed the adjustment to be immaterial to the consolidated financial statements for the current and prior years and therefore, no prior period adjustment was required. The Corporation recorded the past income tax benefits during the second quarter of 2011. The adjustment to income tax expense made in the second quarter was a credit of approximately \$660 thousand attributable to the years 2008, 2009 and 2010 and approximately \$95 thousand attributable to the first quarter of 2011. This adjustment is reflected in the 2011 income tax expense. The second quarter tax adjustment of \$660 thousand is reflected in the other, net line item of the reconciliation of the tax provision shown above. Had the tax adjustment of \$660 thousand been allocated proportionally to the years it was generated, the effective tax rate for 2011 and 2010 would have been 15.3% and 24.1%, respectively.

At December 31, 2012, the Corporation had a capital loss carryover of \$2.6 million. This loss carryover can only be offset with capital gains for federal income tax purposes. The tax benefit of this carryover is \$887 thousand and the Corporation has recorded a valuation allowance of \$887 thousand against the capital loss carryover.

The Corporation recognizes interest accrued related to unrecognized tax benefits and penalties in income tax expense for all periods presented. The Corporation is no longer subject to U.S. Federal examinations by tax authorities for the years before 2009.

Note 13. Accumulated Other Comprehensive Loss

The components of accumulated other comprehensive loss included in shareholders' equity are as follows:

	December 31	
	2012	2011
(Dollars in thousands)		
Net unrealized gains on securities	\$2,543	\$1,427
Tax effect	(865)	(485)
Net of tax amount	1,678	942
Net unrealized losses on derivatives	(1,103)	(1,738)
Tax effect	375	590
Net of tax amount	(728)	(1,148)
Accumulated pension adjustment	(7,576)	(7,462)

Tax effect	2,576	2,537
Net of tax amount	(5,000)	(4,925)

Total accumulated other comprehensive loss \$(4,050) \$(5,131)

Note 14. Financial Derivatives

As part of managing interest rate risk, the Bank has entered into interest rate swap agreements as vehicles to partially hedge cash flows associated with interest expense on variable rate deposit accounts. Under the swap agreements, the Bank receives a variable rate and pays a fixed rate. Such agreements are generally entered into with counterparties that meet established credit standards and most contain collateral provisions protecting the at-risk party. The Bank considers the credit risk inherent in these contracts to be negligible. Interest rate swap agreements derive their value from underlying interest rates. These transactions involve both credit and market risk. The notional amounts are amounts on which calculations, payments, and the value of the derivative are based. The notional amounts do not represent direct credit exposures. Direct credit exposure is limited to the net difference between the calculated amounts to be received and paid, if any. Such difference, which represents the fair value of the swap, is reflected on the Corporation's balance sheet.

The Corporation is exposed to credit-related losses in the event of nonperformance by the counterparty to these agreements. The Corporation controls the credit risk of its financial contracts through credit approvals, limits and monitoring procedures, and does not expect the counterparty to fail its obligations.

The primary focus of the Corporation's asset/liability management program is to monitor the sensitivity of the Corporation's net portfolio value and net income under varying interest rate scenarios to take steps to control its risks. On a quarterly basis, the Corporation simulates the net portfolio value and net interest income expected to be earned over a twelve-month period following the date of simulation. The simulation is based upon projection of market interest rates at varying levels and estimates the impact of such market rates on the levels of interest-earning assets and interest-bearing liabilities during the measurement period. Based upon the outcome of the simulation analysis, the Corporation considers the use of derivatives as a means of reducing the volatility of net portfolio value and projected net income within certain ranges of projected changes in interest rates. The Corporation evaluates the effectiveness of entering into any derivative instrument agreement by measuring the cost of such an agreement in relation to the reduction in net portfolio value and net income volatility within an assumed range of interest rates.

During 2008, the Bank entered into two swap transactions. Each swap has a notional amount of \$10 million with one maturing in 2013 and one in 2015. According to the terms of each transaction, the Bank pays fixed-rate interest payments and receives floating-rate payments. The variable rate is indexed to the 91-day Treasury Bill auction (discount) rate and resets weekly. The swaps were entered into to hedge the Corporation's exposure to changes in cash flows attributable to the effect of interest rate changes on variable-rate liabilities. At December 31, 2012, the fair value of the swaps was negative \$1.1 million and was recognized in accumulated other comprehensive loss, net of tax. The fair value of assets pledged as collateral for the swaps was \$2.2 million at December 31, 2012 and \$2.3 million at December 31, 2011.

The Board of Directors has given Management authorization to enter into additional derivative activity including interest rate swaps, caps and floors, forward-rate agreements, options and futures contracts in order to hedge interest rate risk. The Bank is exposed to credit risk equal to the positive fair value of a derivative instrument, if any, as a positive fair value indicates that the counterparty to the agreement is financially liable to the Bank. To limit this risk, counterparties must have an investment grade long-term debt rating and individual counterparty credit exposure is limited by Board approved parameters. Management anticipates continuing to use derivatives, as permitted by its Board-approved policy, to manage interest rate risk.

Information regarding the interest rate swaps as of December 31, 2012 follows:

(Dollars in thousands)		Amount Expected to be Expensed into Earnings within the next 12 Months		
Notional Amount	Maturity Date	Interest Rate Fixed	Variable	%
\$ 10,000	5/30/2013	3.60%	0.09	% \$ 205
\$ 10,000	5/30/2015	3.87%	0.09	% \$ 378

Fair Value of Derivative Instruments in the Consolidated Balance Sheets were as follows as of December 31, 2012:

Fair Value of Derivative Instruments (Dollars in thousands)		Balance Sheet	
Date	Type	Location	Fair Value
December 31, 2012	Interest rate contracts	Other liabilities	\$ 1,103
December 31, 2011	Interest rate contracts	Other liabilities	\$ 1,738

The Effect of Derivative Instruments on the Statement of Income for the years ended December 31, 2012, 2011 and 2010 follows:

Note 15. Benefit Plans

The Bank has a 401(k) plan covering substantially all employees of F&M Trust who have completed one year and 1,000 hours of service. In 2012, employee contributions to the plan were matched at 100% up to 4% of each participant's deferrals plus 50% of the next 2% of deferrals from participants' eligible compensation. Under this plan, the maximum amount of employee contributions in any given year is defined by Internal Revenue Service regulations. In addition, a 100% discretionary profit sharing contribution of up to 2% of each employee's eligible compensation is possible provided net income targets are achieved. The Personnel Committee of the Corporation's Board of Directors approves the established net income targets annually. The related expense for the 401(k) plan, and the profit sharing plan as approved by the Board of Directors, was approximately \$425 thousand in 2012, \$394 thousand in 2011, and \$368 thousand in 2010.

The Bank has a noncontributory pension plan covering substantially all employees of F&M Trust who meet certain age and service requirements. Benefits are based on years of service and the employee's compensation using a career average formula for all employees. The pension plan was closed to new participants on April 1, 2007. The change to a career average formula in 2008 affected future pension benefits for some employees more than others, primarily long-term employees. In an attempt to minimize the affect of the change on these employees the Bank added the following benefits: (1) an additional annual contribution over 10 years to the 401(k) plan for pension participants that were deemed to have a significant expected shortfall as a result of the change to a career average formula; and (2) contributions to a non-qualified deferred compensation plan for current or potential highly-compensated employees that were deemed to have a significant expected shortfall as a result of the change to a career average formula. The annual contribution to the non-qualified plan ranges from 1% to 9% of the covered employee's salary depending on such factors as the employee's length of service and time to retirement. Any contribution made to the non-qualified plan is in lieu of the additional contribution made to the 401(k) plan identified as change number 1 above. The expense associated with the additional plans described above was \$42 thousand in both 2012 and 2011, and \$46 thousand in 2010. The Bank's funding policy is to contribute annually the amount required to meet the minimum funding requirements of the Employee Retirement Income Security Act of 1974. Contributions are intended to provide not only for the benefits attributed to service to date but also for those expected to be earned in the future. However, due to the low rate environment, the funding status of the pension plan, and the Bank's excess cash position earning a low return, the Bank made an additional contribution, above the required minimum contribution, of \$6.0 million to the pension plan in December 2012. This action brought the plan to a fully funded status and will significantly reduce future pension expense. In 2012, the Bank changed the source of the discount rate used to calculate the benefit obligation, to the Citigroup Above Median Pension Discount Curve from the Citigroup Pension Discount Curve and Liability Index. The new curve represents bonds that are more like the pension plan assets in terms of duration and quality, and generally results in a higher discount rate.

The low interest rate environment has negatively affected pension plan returns and as a result, the Bank continues to incur a significant pension expense, \$1.1 million in 2012, \$705 thousand in 2011, and \$441 thousand in 2010. Due to the additional \$6.0 million pension contribution, the Bank expects that its pension expense for 2013 will be reduced by more than \$400 thousand.

Pension plan asset classes include cash, fixed income securities and equities. The fixed income portion is comprised of Government Bonds, Corporate Bonds and Taxable Municipal Bonds; the equity portion is comprised of financial institution equities and individual corporate equities across a broad range of sectors. Investments are made on the basis of sound economic principles and in accordance with established guidelines. Target allocations of fund assets measured at fair value are as follows: fixed income, a range of 60%-90%, equities, a range of 10% to 30% and cash as needed. The cash balance at year-end is high due to the additional contribution of \$6.0 million and is expected to be invested by the end of the first quarter of 2013. The allocation as of December 31, 2012 is shown in a table within this note. The Bank has manages its pension portfolio in order to closely align the duration of the assets with the duration of the pension liability.

On a regular basis, the Pension and Benefits Committee (the “Committee”) monitors the allocation to each asset class. Due to changes in market conditions, the asset allocation may vary from time to time. The Committee is responsible to direct the rebalancing of Plan assets when allocations are not within the established guidelines and to ensure that such action is implemented. The Bank has currently begun a process of reallocating pension assets in an attempt to more closely match the structure of pension liabilities. This has and will continue to result in a smaller allocation of equity investments and a higher allocation of longer duration bonds. Once completed, the new allocation should reduce large fluctuations in projected benefit obligations.

Specific guidelines for fixed income investments are that no individual bond shall have a rating of less than an A as rated by Standard and Poor’s and Moody’s at the time of purchase. If the rating subsequently falls below an A rating, the Committee, at its next quarterly meeting, will discuss the merits of retaining that particular security. Allowable securities include obligations of the U.S. Government and its agencies, CDs, commercial paper, corporate obligations and insured municipal bonds.

General guidelines for equities are that a diversified common stock program is used and that diversification patterns can be changed with the ongoing analysis of the outlook for economic and financial conditions. Specific guidelines for equities include a sector cap and an individual stock cap. The guidelines for the sector cap direct that because the Plan sponsor is a bank, a significantly large exposure to the financial sector is permissible; therefore, there is no sector cap for financial equities. All other sectors are limited to 25% of the equity component. The individual stock cap guidelines direct that no one stock may represent more than 5% of the total equity portfolio.

The Committee revisits and determines the expected long-term rate of return on Plan assets annually. The policy of the Committee has been to take a conservative approach to all Plan assumptions. The expected long-term rate of return was reduced to 7% and it is likely that this rate will continue to decline in future years. This rate is reviewed annually and historical investment returns play a significant role in determining what this rate should be.

The following table sets forth the plan's funded status, based on the December 31, 2012, 2011 and 2010 actuarial valuations.

(Dollars in thousands)	For the Years Ended December 31		
	2012	2011	2010
Change in projected benefit obligation

Total assets	\$11,658	\$3,264	\$8,071	\$323

The following table sets forth a summary of the changes in the fair value of the Plan's level 3 investments for the year ended December 31, 2012:

		Deposits in Immediate
	Cash Value of Life Insurance	Participation Guarantee Contract
Balance - January 1, 2012	\$ 83	\$ 240
Unrealized gain (loss) relating to investments held at the reporting date	4	3
Purchases, sales, issuances and settlement, net	-	(16)
Balance - December 31, 2012	\$ 87	\$ 227
Balance - January 1, 2011	\$ 122	\$ 227
Unrealized gain (loss) relating to investments held at the reporting date	5	4

Purchases, sales, issuances and settlement, net	(44)	9
Balance - December 31, 2011	\$ 83		\$ 240

Contributions

The Bank does not expect to make a pension contribution in 2013.

Estimated future benefit payments at December 31, 2012 (in thousands)

2013	\$799
2014	865
2015	855
2016	932
2017	932
2018-2022	4,902
	\$9,285

Note 16. Stock Purchase Plans

In 2004, the Corporation adopted the Employee Stock Purchase Plan of 2004 (ESPP), replacing the ESPP of 1994 that expired in 2004. Under the ESPP of 2004, options for 250,000 shares of stock can be issued to eligible employees. The number of shares that can be purchased by each participant is defined by the plan and the Board of Directors sets the option price. However, the option price cannot be less than 90% of the fair market value of a share of the Corporation's common stock on the date the option is granted. The Board of Directors also determines the expiration date of the options; however, no option may have a term that exceeds 1 year from the grant date. ESPP options are exercisable immediately upon grant. Any shares related to unexercised options are available for future grant. As of December 31, 2012, there are 200,791 shares available for future grants. The Board of Directors may amend, suspend or terminate the ESPP at any time. The grant price of the 2012 ESPP options was set at 95% of the stock's fair value at the time of the award. There was no compensation expense recognized in 2012, 2011 or 2010 for the ESPP.

In 2002, the Corporation adopted the Incentive Stock Option Plan of 2002 (ISOP). The plan had a 10 year life with regard to awarding options and expired in 2012. However, awards granted prior to expiration of the plan will continue to be exercisable in accordance with the plan. Under the ISOP, options for 250,000 shares of stock were authorized to be issued to selected Officers, as defined in the plan. The number of options available to be awarded to each eligible Officer is determined by the Board of Directors, but is limited with respect to the aggregate fair value of the options as defined in the plan. The exercise price of the option was equal to the fair value of a share of the Corporation's common stock on the date the option is granted. The options have a life of 10 years and may be exercised only after the optionee has completed 6 months of continuous employment with the Corporation or its Subsidiary immediately following the grant date, or upon a change of control as defined in the plan. As of December 31, 2012 there are no shares available for future grants under the plan. If awards were granted, the Corporation used the "simplified" method for estimating the expected term of the ISO award. The risk-free interest rate was the U.S. Treasury rate commensurate with the expected average life of the option at the date of grant.

The ESPP and ISOP options outstanding at December 31, 2012 are all exercisable. The ESPP options expire on June 30, 2013 and the ISOP options expire 10 years from the grant date. The following table summarizes the stock option activity:

(Dollars in thousands except share and per share data)

	ESPP Options	Weighted Average Price Per Share	Aggregate Intrinsic Value
Balance Outstanding at December 31, 2009	26,415	\$ 16.61

Incentive Stock Option Plan	26,200	\$25.37 - \$27.68	27.51	2.4
ISOP Total/Average	62,324		\$ 23.93	3.6

Note 17. Deferred Compensation Agreement

The Corporation has entered into deferred compensation agreements with four directors that provides for the payment of benefits over a ten-year period, beginning at age 65. At inception, the present value of the obligations under these deferred compensation agreements amounted to approximately \$600 thousand, which is being accrued over the estimated remaining service period of these officers and directors. These obligations are partially funded through life insurance covering these individuals. Expense associated with the agreements was \$20 thousand for 2012, \$20 thousand for 2011 and \$22 thousand for 2010.

The Corporation has two deferred compensation agreements it recorded as part of its acquisition of Fulton Bancshares Corporation in 2006 and no expense for these plans was recognized in 2012.

Note 18. Shareholders' Equity

The Board of Directors regularly authorizes the repurchase of the Corporation's \$1.00 par value common stock. The repurchased shares will be held as Treasury shares available for issuance in connection with future stock dividends and stock splits, employee benefit plans, executive compensation plans, the Dividend Reinvestment Plan and other appropriate corporate purposes. The term of the repurchase plans is normally 1 year.

The following table provides information regarding approved stock repurchase plans.

(Dollars in thousands)

Plan Approved	Expiration Date	Shares Authorized	Shares Repurchased Under Approved Plan			
			2012	2011	Total	Cost
July 8, 2010	July 8, 2011	100,000	-	-	-	-
Number of Treasury shares held at year-end			396,034	396,174		

The Corporation's dividend reinvestment plan (DRIP) allows for shareholders to purchase additional shares of the Corporation's common stock by reinvesting cash dividends paid on their shares or through optional cash payments. The Corporation has authorized one million (1,000,000) shares of its currently authorized common stock to be issued under the amended plan. During 2012, 84,122 shares of common stock were purchased through the dividend reinvestment plan at a value of \$1.2 million and 795,524 shares remain to be issued.

Note 19. Commitments and Contingencies

In the normal course of business, the Bank is a party to financial instruments that are not reflected in the accompanying financial statements and are commonly referred to as off-balance-sheet instruments. These financial instruments are entered into primarily to meet the financing needs of the Bank's customers and include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk not recognized in the consolidated balance sheet.

The Corporation's exposure to credit loss in the event of nonperformance by other parties to the financial instruments for commitments to extend credit and standby letters of credit is represented by the contract or notional amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as they do for on-balance-sheet instruments.

Unless noted otherwise, the Bank does not require collateral or other security to support financial instruments with credit risk. The Bank had the following outstanding commitments as of December 31:

(Dollars in thousands)	2012	2011
Financial instruments whose contract amounts represent credit risk		
Commercial commitments to extend credit	\$182,060	\$179,369
Consumer commitments to extend credit (secured)	36,303	37,113
Consumer commitments to extend credit (unsecured)	5,275	5,077
	\$223,638	\$221,559

Standby letters of credit

\$28,157 \$28,191

81

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses with the exception of home equity lines and personal lines of credit and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Bank, is based on management's credit evaluation of the counterparty. Collateral for most commercial commitments varies but may include accounts receivable, inventory, property, plant, and equipment, and income-producing commercial properties. Collateral for secured consumer commitments consists of liens on residential real estate.

Standby letters of credit are instruments issued by the Bank, which guarantee the beneficiary payment by the Bank in the event of default by the Bank's customer in the nonperformance of an obligation or service. Most standby letters of credit are extended for one-year periods. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank holds collateral supporting those commitments for which collateral is deemed necessary primarily in the form of certificates of deposit and liens on real estate. Management believes that the proceeds obtained through a liquidation of such collateral would be sufficient to cover the maximum potential amount of future payments required under the corresponding guarantees. The current amount of the liability as of December 31, 2012 and 2011 for guarantees under standby letters of credit issued is not material.

Most of the Bank's business activity is with customers located within its primary market and does not involve any significant concentrations of credit to any one entity or industry.

In the normal course of business, the Corporation has commitments, lawsuits, contingent liabilities and claims. However, the Corporation does not expect that the outcome of these matters will have a material adverse effect on its consolidated financial position or results of operations.

Note 20. Fair Value Measurements and Fair Values of Financial Instruments

Management uses its best judgment in estimating the fair value of the Corporation's financial instruments; however, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Corporation could have realized in a sales transaction on the dates indicated. The estimated fair value amounts have been measured as of their respective year-ends and have not been re-evaluated or updated for purposes of these financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each year-end.

FASB ASC Topic 820, “Financial Instruments”, requires disclosure of the fair value of financial assets and liabilities, including those financial assets and liabilities that are not measured and reported at fair value on a recurring and nonrecurring basis. The Corporation does not report any nonfinancial assets at fair value. FASB ASC Topic 820 establishes a fair value hierarchy that prioritizes the inputs to valuation methods used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC Topic 820 are as follows:

Level 1: Valuation is based on unadjusted, quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market. There may be substantial differences in the assumptions used for securities within the same level. For example, prices for U.S. Agency securities have fewer assumptions and are closer to level 1 valuations than the private label mortgage backed securities that require more assumptions and are closer to level 3 valuations.

Level 3: Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Corporation’s assumptions regarding what market participants would assume when pricing a financial instrument.

An asset’s or liability’s level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The following methods and assumptions were used to estimate the fair values of the Corporation’s financial instruments at December 31, 2012 and 2011.

Cash and Cash Equivalents: For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Investment securities: The fair value of investment securities is determined in accordance with the methods described under FASB ASC Topic 820 as discussed below.

Restricted stock: The carrying value of restricted stock approximates its fair value based on redemption provisions for the restricted stock.

Loans held for sale: The fair value of loans held for sale is determined by the price set between the Bank and the purchaser prior to origination. These loans are usually sold at par.

Net loans: The fair value of fixed-rate loans is estimated for each major type of loan (e.g. real estate, commercial, industrial and agricultural and consumer) by discounting the future cash flows associated with such loans using rates currently offered for loans with similar terms to borrowers of comparable credit quality. The model considers scheduled principal maturities, repricing characteristics, prepayment assumptions and interest cash flows. The discount rates used are estimated based upon consideration of a number of factors including the treasury yield curve, expense and service charge factors. For variable rate loans that reprice frequently and have no significant change in credit quality, carrying values approximate the fair value.

Accrued Interest Receivable: The carrying amount is a reasonable estimate of fair value.

Mortgage servicing rights: The fair value of mortgage servicing rights is based on observable market prices when available or the present value of expected future cash flows when not available. Assumptions such as loan default rates, costs to service, and prepayment speeds significantly affect the estimate of future cash flows. Mortgage servicing rights are carried at the lower of cost or fair value.

Deposits, Securities sold under agreements to repurchase and Long-term debt: The fair value of demand deposits, savings accounts, and money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-rate certificates of deposit and long-term debt is estimated by discounting the future cash flows using rates approximating those currently offered for certificates of deposit and borrowings with similar remaining maturities. Other borrowings consist of a line of credit with the FHLB at a variable interest rate and securities sold under agreements to repurchase, for which the carrying value approximates a reasonable estimate of the fair value.

Accrued interest payable: The carrying amount is a reasonable estimate of fair value.

Derivatives: The fair value of the interest rate swaps is based on other similar financial instruments and is classified as Level 2.

The following information regarding the fair value of the Corporation's financial instruments should not be interpreted as an estimate of the fair value of the entire Corporation since a fair value calculation is only provided for a limited portion of the Corporation's assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Corporation's disclosures and those of other companies may not be meaningful.

The fair value of the Corporation's financial instruments are as follows:

(Dollars in thousands)	December 31, 2012		Level 1	Level 2	Level 3
	Carrying Amount	Fair Value			
Financial assets:					
Cash and cash equivalents	\$77,834	\$77,834	\$77,834	\$-	\$-

Recurring Fair Value Measurements

For financial assets measured at fair value on a recurring basis, the fair value measurements by level within the fair value hierarchy used at December 31, 2012 and 2011 are as follows:

(Dollars in Thousands)	Fair Value at December 31, 2012			
	Level 1	Level 2	Level 3	Total
Asset Description				
Equity securities	\$1,941	\$-	\$ -	\$1,941
Obligations of U.S. Government agencies	-	12,809	-	12,809
Obligations of state and political subdivisions	-	61,216	-	61,216
Corporate debt securities	-	994	-	994
Trust Preferred Securities	-	4,830	-	4,830
Agency mortgage-backed securities	-	49,066	-	49,066
Private-label mortgage-backed securities	-	2,426	-	2,426
Asset-backed securities	-	46	-	46
Total assets	\$1,941	\$131,387	\$ -	\$133,328
Liability Description				
Interest rate swaps	\$-	\$1,103	\$ -	\$1,103
Total liabilities	\$-	\$1,103	\$ -	\$1,103

(Dollars in Thousands)	Fair Value at December 31, 2011			
	Level 1	Level 2	Level 3	Total
Asset Description				
Equity securities	\$1,759	\$-	\$ -	\$1,759
Obligations of U.S. Government agencies	-	13,229	-	13,229
Obligations of state and political subdivisions	-	45,081	-	45,081
Corporate debt securities	-	2,414	-	2,414
Trust Preferred Securities	-	4,618	-	4,618
Agency mortgage-backed securities	-	55,285	-	55,285
Private-label mortgage-backed securities	-	2,867	-	2,867
Asset-backed securities	-	48	-	48
Total assets	\$1,759	\$123,542	\$ -	\$125,301
Liability Description				
Interest rate swaps	\$-	\$1,738	\$ -	\$1,738
Total liabilities	\$-	\$1,738	\$ -	\$1,738

The Corporation used the following methods and significant assumptions to estimate the fair values for financial assets measured at fair value on a recurring basis.

Investment securities: Level 1 securities represent equity securities that are valued using quoted market prices from nationally recognized markets. Level 2 securities represent debt securities that are valued using a mathematical model based upon the specific characteristics of a security in relationship to quoted prices for similar securities.

Interest rate swaps: The interest rate swaps are valued using a discounted cash flow model that uses verifiable market environment inputs to calculate the fair value. This method is not dependent on the input of any significant judgments or assumptions by Management.

Nonrecurring Fair Value Measurements

For financial assets measured at fair value on a nonrecurring basis, the fair value measurements by level within the fair value hierarchy used at December 31, 2012 and 2011 are as follows:

(Dollars in Thousands)

Asset Description	Fair Value at December 31, 2012			
	Level 1	Level 2	Level 3	Total
Impaired loans (1)	\$ -	\$ -	\$ 9,235	\$ 9,235
Other real estate owned (1)	-	-	5,127	5,127
Mortgage servicing rights	-	-	235	235
Total assets	\$ -	\$ -	\$ 14,597	\$ 14,597

(Dollars in Thousands)

Asset Description	Fair Value at December 31, 2011			
	Level 1	Level 2	Level 3	Total
Impaired loans (1)	\$-	\$-	\$13,705	\$13,705
Other real estate owned (1)	-	-	3,224	3,224
Mortgage servicing rights	-	-	368	368
Total assets	\$ -	\$ -	\$ 17,297	\$ 17,297

(1) Includes assets directly charged-down to fair value during the year-to-date period.

The Corporation used the following methods and significant assumptions to estimate the fair values for financial assets measured at fair value on a nonrecurring basis.

Impaired loans: Impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on customized discounting criteria.

Other real estate: The fair value of other real estate, upon initial recognition, is estimated using Level 2 inputs within the fair value hierarchy based on observable market data and Level 3 inputs based on customized discounting criteria. In connection with the measurement and initial recognition of the foregoing assets, the Corporation recognizes charge-offs through the allowance for loan losses.

Mortgage servicing rights: The fair value of mortgage servicing rights, upon initial recognition, is estimated using a valuation model that calculates the present value of estimated future net servicing income. The model incorporates Level 3 assumptions such as cost to service, discount rate, prepayment speeds, default rates and losses.

The Corporation did not record any liabilities at fair value for which measurement of the fair value was made on a nonrecurring basis at December 31, 2012. For financial assets and liabilities measured at fair value on a recurring basis, there were no transfers of financial assets or liabilities between Level 1 and Level 2 during the period ending December 31, 2012.

The following table presents additional quantitative information about Level 3 assets measured at fair value on a nonrecurring basis:

Quantitative Information about Level 3 Fair Value Measurements at December 31, 2012				
(Dollars in Thousands)	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
Asset Description				
Impaired loans (1)	\$9,235	Appraisal	Appraisal Adjustments (2) Cost to sell	0% - 100% (11%)
Other real estate owned (1)	5,127	Appraisal	Appraisal Adjustments (2) Cost to sell	5% - 25% (7%)
Mortgage servicing rights	235	Discounted Cash Flow (3)		8% (8%)

(1) Includes assets directly charged-down to fair value during the year-to-date period.

(2) Qualitative adjustments are discounts specific to each asset and are made as needed.

(3) Valuation and inputs are determined by a third-party pricing service without adjustment.

Note 22. Quarterly Results of Operations (unaudited)

The following is a summary of the quarterly results of consolidated operations of Franklin Financial for the years ended December 31, 2012 and 2011:

(Dollars in thousands, except per share)	Three months ended			
	2012 March 31	June 30	September 30	December 31
Interest income	\$9,951	\$10,002	\$ 9,728	\$ 9,463
Interest expense	1,967	1,811	1,692	1,422
Net interest income	7,984	8,191	8,036	8,041
Provision for loan losses	1,950	825	825	1,625
Other noninterest income	2,563	2,472	2,236	2,236
Securities gains (losses)	-	21	(27) (50
Noninterest expense	7,010	7,597	7,355	8,640
Income before income taxes	1,587	2,262	2,065	(38
Federal income tax expense (benefit)	218	356	318	(382
Net Income	\$1,369	\$1,906	\$ 1,747	\$ 344
Basic earnings per share	\$0.34	\$0.47	\$ 0.43	\$ 0.08
Diluted earnings per share	\$0.34	\$0.47	\$ 0.43	\$ 0.08
Dividends declared per share	\$0.27	\$0.17	\$ 0.17	\$ 0.17

(Dollars in thousands, except per share)	Three months ended			
	2011 March 31	June 30	September 30	December 31
Interest income	\$10,300	\$10,493	\$ 10,403	\$ 10,595
Interest expense	2,405	2,408	2,287	2,054
Net interest income	7,895	8,085	8,116	8,541
Provision for loan losses	900	1,767	2,775	2,082
Other noninterest income	2,511	2,481	2,275	3,017
Securities (losses) gains	11	(55) 138	(178
Noninterest expense	7,022	7,433	6,996	6,883
Income before income taxes	2,495	1,311	758	2,415
Federal income tax expense (benefit)	646	(447) (301) 512
Net Income	\$1,849	\$1,758	\$ 1,059	\$ 1,903
Basic earnings per share	\$0.47	\$0.45	\$ 0.27	\$ 0.47
Diluted earnings per share	\$0.47	\$0.45	\$ 0.27	\$ 0.47
Dividends declared per share	\$0.27	\$0.27	\$ 0.27	\$ 0.27

Due to rounding, the sum of the quarters may not equal the amount reported for the year.

Net income for the quarter ended December 31, 2012 was \$344,000 compared to 2011 fourth quarter earnings of \$1,903,000. On a per share basis, diluted earnings were \$0.08 for the quarter ended December 31, 2012 compared to \$0.47 for the same period in 2011. Earnings in the fourth quarter were significantly impacted by a tightening in net interest margin, lower non-interest income and increased nonrecurring expenses. The nonrecurring expenses were related to a variety of items including legal expenses and penalties on the prepayment of high interest rate FHLB debt.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Controls and Procedures

The Corporation carried out an evaluation, under the supervision and with the participation of the Corporation's management, including the Corporation's Chief Executive Officer and Chief Financial Officer, of the effectiveness of its disclosure controls and procedures, as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based upon the evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer concluded that as of December 31, 2012, the Corporation's disclosure controls and procedures are effective. Disclosure controls and procedures are controls and procedures that are designed to ensure that information required to be disclosed in the Corporation's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

The management of the Corporation is responsible for establishing and maintaining adequate internal control over financial reporting. The Corporation's internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management Report on Internal Control Over Financial Reporting

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2012, using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control – Integrated Framework*. Based on this assessment, management concluded that, as of

December 31, 2012, the Corporation's internal control over financial reporting is effective based on those criteria.

There were no changes during the fourth quarter of 2012 in the Corporation's internal control over financial reporting which materially affected, or which are reasonably likely to affect, the Corporation's internal control over financial reporting.

The Corporation's independent registered public accounting firm has audited the effectiveness of the Corporation's internal control over financial reporting as of December 31, 2012. Their report is included herein.

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders

Franklin Financial Services Corporation

Chambersburg, Pennsylvania

We have audited Franklin Financial Services Corporation and its subsidiaries' (the "Corporation") internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Corporation's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Corporation's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A corporation's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. A corporation's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the corporation; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the corporation are being made only in accordance with authorizations of management and directors of the corporation; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the corporation's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Franklin Financial Services Corporation and its subsidiaries as of December 31, 2012 and 2011 and the related consolidated statements of income, consolidated statements of comprehensive income, changes in shareholders' equity and cash flows for each of the years in the three-year period ended December 31, 2012, and our report dated March 11, 2013 expressed an unqualified opinion.
