NOTE 2 – RESTRUCTURING PLAN AND IMPLEMENTATION

During the first and second quarters of fiscal 2015, the Company conducted a thorough review and evaluation of its business operations and strategies, a forecast for the staffing industry, and the business environment in general. The Company concluded that it was imperative to take immediate action to reduce short and medium-term debt service obligations, consulting/advisory agreements, employment costs and other corporate commitments that were overburdening the Company’s working capital and ability to fund continuing business operations, raise additional equity capital and/or debt, and execute its business plan. As such, on September 3, 2014, the Company formally established a Restructuring Committee, comprised of a Chairman and four (4) others selected from its board of directors to evaluate and formalize a Restructuring Plan. The Restructuring Plan was presented and adopted by the board of directors on September 3, 2014. Management planned to pursue each of the initiatives of the Restructuring Plan, some of which were contingent upon third parties’ acceptance of the restructuring terms and may not be fully achieved.

Cost Reduction or Restructuring Goals and Key Initiatives:

Certain targeted initiatives have been and are being achieved through the following actions:

Short- and Medium-term debt service: The approved Restructuring Plan authorized management to approach existing debt holders with this proposal. The Company offered equity in the form of common stock and/or warrants in exchange for conversion or deferral of existing notes/obligations. The Company exchanged equity with a fair value in excess of the aggregate amount of debt being extinguished. Upon execution of all necessary agreements, the Company recognized a loss on the transaction. In accordance with ASC 470-40-2, the difference between the reacquisition price of debt and the net carrying amount of the extinguished debt shall be recognized currently in the period of extinguishment as losses or gains. Gains and losses shall not be amortized to future periods. The modification expense was measured at fair value on the date of the agreement and recorded in accordance with ASC 470-40-2; and

Notes payable and Other debt obligations: The Restructuring Plan offered a meaningful incentive to outstanding Notes payable holders to convert their principal and accrued interest to common stock and/or warrants rather than a cash payment; Note holders converted \$3,056,030 of principal and interest to 335,839 common stock shares and 369,423 warrants exercisable for a term of ten (10) years at \$12.50. This action is anticipated to reduce the Company's future cash outflows by approximately \$889,000 in the calendar year of 2015, and by a further \$2,313,000 in the calendar year of 2016.

Modification of Series A Bonds: The Restructuring Plan modified the terms of the Series A Bonds conversion price from \$15.00 to \$10.00 with the intention of providing a meaningful incentive for the Series A Bond holders to convert their principal and interest into common stock and/or warrants on or before the maturity date of October 15, 2014, rather than redeem for cash; Bondholders converted \$3,709,655 of principal and interest into 370,969 common stock shares and 185,486 warrants exercisable for a term of three (3) years at \$20.00. The Company recorded a modification expense of \$2,927,959 related to changing the conversion price of these bonds.

Modification of Series B Bonds: The Restructuring Plan modified the terms of the Series B Bonds conversion price from \$15.00 to \$12.00 with the intention of providing a meaningful incentive for the Series B Bond holders to convert their principal and interest into common stock by the maturity date of September 30, 2015, rather than redeem for cash. No Bondholders have elected to convert as of August 31, 2015. The Company recorded a modification expense of \$154,489 related to changing the conversion price of these bonds;

Earn-out liabilities: The Restructuring Plan offered a meaningful incentive to the Earn-out liability holders to convert their contingent future payments to common stock rather than cash payments. In conjunction with the sale of Cyber 360, effective January 1, 2015, the former shareholders of TRG were offered the opportunity and elected to convert their remaining Earn-out liability of \$1,134,050 into common stock shares at \$10.00 per share. As a result, the Company issued 113,405 common stock shares and recorded a gain on conversion of earn-out of \$485,835 on February 27, 2015.

Operational and Corporate commitments: The approved Restructuring Plan authorized management to cancel various on-going consulting and employment agreements and incur certain costs associated with this restructuring. In accordance with ASC 470-25-12, which states, *a liability for costs to terminate a contract before the end of its term shall be recognized when the entity terminates the contract in accordance with the contract terms*, these amounts were recorded in the operating section of the Statement of Operations on a line item titled Reorganization of Business Expenses and a liability for the amount owed on the balance sheet.

Consulting agreements: The Company cancelled various on-going consulting agreements. The measurement date to record the expense was the date upon which the Company decided to cancel the agreement. The Company expensed \$73,875 as a result of the cancellation of these agreements. This action is anticipated to reduce the Company's future cash outflows by approximately \$432,000 in the calendar year of 2015.

Employment: The Company severed employment with an employee. The measurement date to record the expense was the date upon which the Company agreed to separate employment; The Company expensed \$691,966 related to the aforementioned severed employment. This action is anticipated to increase the Company's future cash outflows by approximately \$50,000 during the calendar year of 2015, and thereafter to reduce the Company's future cash outflows by approximately \$624,000 annually in perpetuity.

Restructuring fees: The Company estimated the cost associated with this restructuring to be approximately \$175,000. U.S. GAAP does not allow for a general accrual for restructuring costs. Therefore, any such costs have been and will continue to be expensed as incurred. To date, these fees have totaled \$792,650 and are properly classified in Professional fees - Restructuring.

Discontinued Operations

On January 27, 2015, the board of directors of the Company met without any representation of the officers, former owners or Earn-out liability holders of Cyber 360 and discussed the possibility of discontinuing the Cyber 360 operations. Their independent decision was that they approved and authorized the discontinuance of Cyber 360 operations and to move immediately thereafter towards selling the Cyber 360 operations. Subsequently, the Company presented an arm's length transaction to some of the former TRG owners. On February 27, 2015, the Company entered into a Stock Purchase Agreement to sell Cyber 360 to some of the former TRG owners with an effective date of January 1, 2015 for an aggregate purchase price of \$1.00 and the settlement of the remaining earn-out obligation under the original purchase agreement. In connection with the sale, all agreements executed in connection with the original

acquisition of Cyber 360's business (previously known as The Revolution Group) in April 2013 ("Original Sale") and all obligations thereunder, except as set forth below, were terminated. As a result of the sale, the Company no longer owns Cyber 360, Inc. (FKA: Staffing 360 Group, Inc.), a Nevada corporation, or its subsidiary Cyber 360 Inc. (FKA: TRG), a Massachusetts corporation.

In connection with the sale and in full settlement of the remaining earn-out obligations, the Company issued 113,405 shares of the Company's common stock with a fair value of \$3.00 per share. These shares are entitled to customary piggy-back registration rights but are subject to a lock-up restriction until the earlier of February 27, 2016 or a sale, liquidation, merger or similar reorganization of the Company resulting in the exchange of all outstanding Company shares for other property.

In accordance with ASC 205-20, the results of the discontinued business have been presented as discontinued operations for the fiscal year ended May 31, 2015. Previously reported results for comparable periods in fiscal year 2014 have also been restated to reflect this reclassification.

The operational results of Cyber 360 are presented in the "Net income from discontinued operations" line item on the fiscal 2015 Condensed Consolidated Statements of Operations. The assets and liabilities of the discontinued business are presented on the fiscal 2015 Condensed Consolidated Balance Sheets as assets and/or liabilities from discontinued operations.

Other than consolidated amounts reflecting operating results and balances for both the continuing and discontinued operations, all remaining amounts presented in the accompanying condensed consolidated financial statements and notes reflect the financial results and financial position of the Company's continuing operations.

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Interim Financial Statements

These unaudited condensed consolidated financial statements as of and for the three (3) months ended August 31, 2015 and 2014, respectively, reflect all adjustments including normal recurring adjustments, which, in the opinion of management, are necessary to present fairly the financial position, results of operations and cash flows for the periods presented in accordance with the accounting principles generally accepted in the United States of America.

These interim unaudited condensed consolidated financial statements should be read in conjunction with the Company's consolidated financial statements and notes thereto for the years ended May 31, 2015 and 2014, respectively, which are included in the Company's May 31, 2015 Annual Report on Form 10-K filed with the United States Securities and Exchange Commission on July 31, 2015. The Company assumes that the users of the interim financial information herein have read, or have access to, the audited consolidated financial statements for the preceding period, and that the adequacy of additional disclosure needed for a fair presentation may be determined in that context. The results of operations for the three (3) months ended August 31, 2015 are not necessarily indicative of results for the entire year ending May 31, 2016.

Year End and Principles of Consolidation

These consolidated financial statements and related notes are presented in accordance with generally accepted accounting principles ("GAAP") in the United States, and are expressed in U.S. dollars. The Company's consolidated fiscal year-end is May 31. Some of the Company's subsidiaries have varying year-ends.

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. As described below, the Company consolidates PRS, an entity of which it owns 49%, since the Company is deemed to be the primary beneficiary of this entity. All significant inter-company transactions are eliminated.

Variable Interest Entities

Current accounting guidance provides a framework for identifying a Variable Interest Entity (“VIE”) and determining when a company should include the assets, liabilities, non-controlling interests, and results of activities of the VIE in its consolidated financial statements. In general, a VIE is an entity or other legal structure used to conduct activities or hold assets that either (1) has an insufficient amount of equity to carry out its principal activities without additional subordinated financial support, (2) has a group of equity owners that are unable to make significant decisions about its activities, or (3) has a group of equity owners that do not have the obligation to absorb losses or the right to receive returns generated by its operations. Generally, a VIE should be consolidated if a party with an ownership, contractual, or other financial interest in the VIE has the power to direct the VIE’s most significant activities and the obligation to absorb losses or right to receive benefits of the VIE that could be significant to the VIE. A variable interest holder that consolidates the VIE is called the primary beneficiary. Upon consolidation, the primary beneficiary generally must initially record all of the VIE’s assets, liabilities, and non-controlling interest at fair value and subsequently account for the VIE as if it were consolidated based on majority voting interest. On May 17, 2014, the Company purchased 49% of the issued and outstanding common stock of PRS. Pursuant to ASC 810, PRS is deemed to be a variable interest entity since the Company is the primary beneficiary of PRS. Accordingly, the Company consolidated the results of PRS from May 17, 2014 through August 31, 2015. As of August 31, 2015 the total assets and liabilities of PRS, which are consolidated, are \$2,088,608 and \$2,033,769, respectively. The total revenue and expenses consolidated for fiscal 2014 (since May 17, 2014) were \$300,879 and \$281,983, respectively, for fiscal 2015 were \$11,176,809 and \$10,253,656, respectively and for the three months ended August 31, 2015 are \$3,077,643 and \$2,761,450, respectively.

Non-controlling Interest

Non-controlling interest in our subsidiary is recorded in accordance with the provisions of ASC 810 “Consolidation”, and is reported as a component of equity, separate from the parent company’s equity. Purchase or sale of equity interests that does not result in a change of control is accounted for as equity transactions. Results of operations attributable to the non-controlling interest is included in our consolidated results of operations and, upon loss of control, the interest sold, as well as interest retained, if any, will be reported at fair value with any gain or loss recognized in earnings.

Use of Estimates

The preparation of consolidated financial statements in accordance with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses in the reporting period. We regularly evaluate our estimates and assumptions related to valuation, impairment testing, Earn-out liabilities, stock-based compensation and deferred income tax assets valuation allowances. We base our estimates and assumptions on current facts, historical experience and various other factors that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by us may differ materially and adversely from our estimates. To the extent there are material differences between our estimates and the actual results, our future results of operations will be affected. Significant estimates for the three months ended August 31, 2015 and fiscal year ended May 31, 2015, respectively, include the valuation of intangible assets, including goodwill, liabilities associated with earn-out obligations and testing our long-lived assets for impairment.

Cash and Cash Equivalents

The Company considers all highly liquid instruments with original maturities of three months or less when acquired, to be cash equivalents. The Company had no cash equivalents at August 31, 2015 or May 31, 2015.

Accounts Receivable

Accounts receivable are presented net of an allowance for doubtful accounts. The Company maintains allowances for doubtful accounts for estimated losses. The Company reviews the accounts receivable on a periodic basis and makes general and specific allowances when there is doubt as to the collectability of individual balances. In evaluating the collectability of individual receivable balances, the Company considers many factors, including the age of the balance, a customer's historical payment history, its current credit-worthiness and current economic trends. Accounts are written off after exhaustive efforts at collection. At August 31, 2015 and May 31, 2015, the Company had an allowance for doubtful accounts of \$278,125 and \$270,045, respectively.

Income Taxes

The Company is governed by the Income Tax Law of the United States. The Company utilizes ASC Topic 740, "Accounting for Income Taxes," which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred income taxes are recognized for the tax consequences in future years of differences between the tax bases of assets and liabilities and their financial reporting amounts at each period end based on enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

The Company applied the provisions of ASC 740-10-50, "Accounting for Uncertainty in Income Taxes", which provides clarification related to the process associated with accounting for uncertain tax positions recognized in the financial statements. Audit periods remain open for review until the statute of limitations has passed. The completion of review or the expiration of the statute of limitations for a given audit period could result in an adjustment to the Company's liability for income taxes. Any such adjustment could be material to the Company's results of operations for any given quarterly or annual period based, in part, upon the results of operations for the given period. As of the date of this filing, the Company is current on all corporate, federal and state tax returns.

The U.K. and Canadian domiciled entities file separate tax returns in their respective jurisdictions.

Foreign Currency Translation

Assets and liabilities of subsidiaries operating in foreign countries are translated into U.S. dollars using both the exchange rate in effect at the balance sheet date or historical rate, as applicable. Results of operations are translated using the average exchange rates prevailing throughout the year. The effects of exchange rate fluctuations on translating foreign currency assets and liabilities into U.S. dollars are included in a separate component of stockholders' equity (accumulated other comprehensive loss), while gains and losses resulting from foreign currency transactions are included in operations.

Amortization of Deferred Financing Costs

Costs incurred in connection with obtaining financing are deferred and amortized on a straight-line basis over the term of the related loan, which is not materially different than the effective interest method. During the three months ended August 31, 2015 such costs related to commissions, legal and due diligence fees totaling \$464,467. Amortization expense of deferred financing costs for the three (3) months ended August 31, 2015 and 2014 totaled \$151,516 and \$351,370, respectively.

Deferred finance costs also includes Original Issue Discounts (OID) amounting to \$474,000 associated with the issuance of convertible debt (See Note 5) which have been amortized over the loan term. During the three month

period ended August 31, 2015 amortization related to the OID amounted to \$56,529 and are included in amortization of debt discount in the statement of operations.

As of August 31, 2015, deferred finance costs amounted to \$1,882,036, net of accumulated amortization of \$1,170,442.

Business Combinations

In accordance with Accounting Standards Codification 805, "Business Combinations" ("ASC 805") the Company records acquisitions under the purchase method of accounting, under which the acquisition purchase price is allocated to the assets acquired and liabilities assumed based upon their respective fair values. The Company utilizes management estimates and, in some instances, may retain the services of an independent third-party valuation firm to assist in determining the fair values of assets acquired, liabilities assumed and contingent consideration granted. Such estimates and valuations require us to make significant assumptions, including projections of future events and operating performance.

Fair Value of Financial Instruments

In accordance with Accounting Standards Codification 820, “Fair Value Measurements and Disclosures” (“ASC 820”), the Company measures and accounts for certain assets and liabilities at fair value on a recurring basis. ASC 820 establishes a common definition for fair value to be applied to existing generally accepted accounting principles that require the use of fair value measurements, and establishes a framework for measuring fair value and standards for disclosure about such fair value measurements.

ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Additionally, ASC 820 requires the use of valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. These inputs are prioritized below:

- Level 1: Observable inputs such as quoted market prices in active markets for identical assets or liabilities
- Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data
- Level 3: Unobservable inputs for which there is little or no market data, which require the use of the reporting entity’s own assumptions.

The Company did not have any Level 2 or Level 3 assets or liabilities as of August 31, 2015 or May 31, 2015, with the exception of its convertible notes payable (See Note 5), notes payable (See Note 6), bonds payable (See Note 7 and Note 8) and its Earn-out liabilities (See Note 12).

Cash is considered to be highly liquid and easily tradable as of August 31, 2015 and May 31, 2015 and therefore classified as Level 1 within our fair value hierarchy.

Accounting Standards Codification 825-10-25, “Fair Value Option” (ASC 825-10-25) expands opportunities to use fair value measurements in financial reporting and permits entities to choose to measure many financial instruments and certain other items at fair value. The Company did not elect the fair value options for any of its qualifying financial instruments.

Convertible Instruments

The Company evaluates and accounts for conversion options embedded in its convertible instruments in accordance with accounting standards for “Accounting for Derivative Instruments and Hedging Activities.”

Accounting standards generally provides three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur, and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument. Professional standards also provide an exception to this rule when the host instrument is deemed to be conventional as defined under professional standards as “The Meaning of Conventional Convertible Debt Instrument.”

The Company accounts for convertible instruments (when it has determined that the embedded conversion options should not be bifurcated from their host instruments) in accordance with professional standards when “Accounting for Convertible Securities with Beneficial Conversion Features,” as those professional standards pertain to “Certain Convertible Instruments.” Accordingly, the Company records, when necessary, discounts to convertible notes for the intrinsic value of conversion options embedded in debt instruments based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note. Debt discounts under these arrangements are amortized over the term of the related debt to their earliest date of redemption. The Company also records when necessary deemed dividends for the intrinsic value of conversion options embedded in preferred shares based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note.

ASC 815-40 provides that, among other things, generally, if an event is not within the entity’s control could or require net cash settlement, then the contract shall be classified as an asset or a liability.

Revenue Recognition

Control Solutions International Inc.: CSI recognizes revenue primarily on a time and materials basis as the services are performed and amounts are earned. The Company considers amounts earned once evidence of an arrangement has been obtained, services are rendered, fees are fixed or determinable, and collectability is reasonably assured.

· Revenue earned in excess of billings is recorded as unbilled accounts receivable until billed. Billings in excess of revenue is recorded as advanced billings until revenue recognition criteria are met. Deposits and prepayments from

customers are carried as deferred revenue until the requirements for revenue recognition are met.

Reimbursements, including those relating to travel, other out-of-pocket expenses and third-party costs, are not included in revenue. They are applied to Cost of services resulting in Cost of services reflecting the net amount of expenses not reimbursed by clients.

Staffing 360 Solutions (UK) Limited: Staffing (UK) and its various subsidiaries, follow paragraph 605-10-S99-1 of the FASB Accounting Standards Codification for revenue recognition. The Company recognizes revenue when it is realized or realizable and earned. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, and (ii) the services have been rendered to the customer, and (iii) the sales price is fixed or determinable, and (iv) collectability is reasonably assured.

PeopleSERVE, Inc. and PeopleSERVE PRS, Inc.: PS recognizes revenue from the sale of staffing services as the services are performed, along with related labor costs and payroll taxes. The Company recognizes revenue for permanent employee placements when contractual contingencies, generally the passage of time, are satisfied. The Company's revenue recognition policies comply with ASC 605, "Revenue Recognition." The Company is the primary obligor in its transactions, and has responsibility for fulfillment, including the acceptability of services ordered and purchased by customers. In addition, the Company has all credit risk, retains substantially all risk and rewards of the services rendered, has sole discretion in staffing engagements and sets the billing rates of its consultants. Accordingly, the Company records all transactions at the gross revenue amount billed, consistent with the provisions of ASC 605. Typically, contracts require clients to pay for out-of-pocket expenses, principally travel related expenses. Accordingly, revenue includes amounts billed for these costs and the cost of revenue includes the corresponding actual costs. The Company provides certain customers a five percent (5.0%) discount on certain contracts if paid within thirty (30) days of the invoice date. Accounts receivable result from services provided to clients. The Company carries its accounts receivable at net realizable value. At the closing of the Company's fiscal period, a portion of receivables may not be invoiced. These unbilled receivables are typically billed within thirty (30) days of the close of the fiscal period.

Lighthouse Placement Services, LLC: Lighthouse recognizes revenue from the sale of staffing services as the services are performed, along with related labor costs and payroll taxes. The Company recognizes revenue for permanent employee placements when contractual contingencies, generally the candidate's first date of employment, are satisfied. The Company is the primary obligor in its transactions, and has responsibility for fulfillment, including the acceptability of services ordered and purchased by customers. In addition, the Company has all credit risk, retains substantially all risk and rewards of the services rendered, has sole discretion in staffing engagements and sets the billing rates of its consultants. Accordingly, the Company records all transactions at the gross revenue amount billed, consistent with the provisions of ASC 605. Typically, contracts require clients to pay for out-of-pocket expenses, principally travel related expenses. Accounts receivable result from services provided to clients. The Company carries its accounts receivable at invoice amount.

Stock-Based Compensation

The Company accounts for stock-based instruments issued to employees in accordance with ASC Topic 718. ASC Topic 718 requires companies to recognize in the statement of operations the grant-date fair value of stock options and other equity based compensation issued to employees. The Company accounts for non-employee share-based awards in accordance with ASC Topic 505-50.

Earnings (Loss) per Common Share

The Company utilizes the guidance per FASB Codification ASC 260 - Earnings per Share ("ASC 260"). Basic earnings per share are calculated by dividing income available to stockholders by the weighted average number of common stock shares outstanding during each period. Diluted earnings per share are computed using the weighted average number of common stock shares and dilutive common share equivalents outstanding during the period. Dilutive common stock share equivalents consist of common shares issuable upon the conversion of preferred stock, convertible notes and the exercise of stock options and warrants (calculated using the modified treasury stock method). Such securities, shown below, presented on a common share equivalent basis and outstanding as of August 31, 2015 and 2014 have been excluded from the per share computations, since its inclusion would be anti-dilutive:

	For the Three Months Ended August 31,	
	2015	2014
Convertible bonds - Series A	19,906	392,789
Convertible bonds - Series B	83,460	-
Convertible promissory notes	1,142,157	121,223
Convertible preferred shares	216,191	-
Warrants	1,637,903	844,622
Options	349,500	222,500
Total	3,449,117	1,581,134

Property and Equipment

Property and equipment are stated at cost. Depreciation is computed on the straight-line method. The depreciation and amortization methods are designed to amortize the cost of the assets over their estimated useful lives, in years, of the respective assets as follows:

Computers	3-5 years
Computer equipment	3-5 years
Network equipment	3-5 years
Software	3-5 years
Office equipment	3-7 years
Furniture and fixtures	3-7 years
Leasehold improvements	3-5 years

Amortization of leasehold improvements is computed using the straight-line method over the shorter of the life of the lease or the estimated useful life of the assets. Maintenance and repairs are charged to expense as incurred. Major improvements are capitalized. At the time of retirement or disposition of property and equipment, the cost and accumulated depreciation are removed from the accounts and any gains or losses are reflected in Other income/ (loss).

Long-Lived Assets

In accordance with ASC 360 - Property, Plant, and Equipment (“ASC 360”), the Company periodically reviews its long-lived assets, including goodwill and other intangible assets, for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be fully recoverable. The Company recognizes an impairment loss when the sum of expected undiscounted future cash flows will not be sufficient to recover an asset’s carrying amount. The amount of impairment is measured as the difference between the estimated fair value and the book value of the underlying asset.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in business combinations. ASC 350-30-35-4 requires that goodwill be tested for impairment at the reporting unit level (operating segment or one level below an operating segment) on an annual basis and between annual tests when circumstances indicate that the recoverability of the carrying amount of goodwill may be in doubt. Application of the goodwill impairment test requires judgment, including the identification of reporting units, assigning assets and liabilities to reporting units, assigning goodwill to reporting units, and determining the fair value. Significant judgments required to estimate the fair value of reporting units include estimating future cash flows, determining appropriate discount rates and other assumptions. Changes in these estimates and assumptions could materially affect the determination of fair value and/or goodwill impairment for each reporting unit. During fiscal years 2015 and 2014, the Company impaired \$0 and \$2,700,255, respectively, of goodwill associated with the Cyber 360 and CSI acquisitions.

In recording the purchase accounting for previous acquisitions, the Company estimated the fair value of identifiable intangible assets and goodwill. In fiscal 2014, the Company retained the services of an independent valuation consultant to test the previously estimated allocations. The valuation resulted in the revisions of the Company’s estimated allocations which were retroactively reflected in the Company’s consolidated financial statements for the fiscal year ended May 31, 2014. In fiscal 2015, the Company again retained the services of an independent valuation consultant to test the Goodwill and Intangible Assets values for the year ended May 31, 2015 and found there was no impairment in 2015.

Goodwill represents the excess of the purchase price over the estimated fair market value of identifiable net assets at the date of acquisition in a business combination. Other intangible assets are identifiable assets that lack physical substance, which are acquired as part of a business combination or other transaction. Intangible assets with definite lives are amortized on a straight-line basis over their useful lives. Goodwill and other intangible assets with indefinite lives are not amortized and are tested for impairment at least annually.

The Company has the option to perform a qualitative assessment for impairment of its goodwill and indefinite-lived intangible assets to determine if it is more likely than not that the fair value of a reporting unit or indefinite-lived intangible asset is below its carrying value. If the Company determines based on a qualitative assessment that it is more likely than not that the fair value of a reporting unit or indefinite-lived intangible asset is greater than its carrying value, then it would not be required to perform the two-step quantitative impairment test described below. If necessary, the Company will perform a quantitative assessment for impairment of its goodwill and indefinite-lived intangible assets using the two-step approach.

The first step of the quantitative impairment test requires that the Company determine the fair value of each reporting unit and then compare that fair value to the reporting unit's carrying amount. The Company uses the income approach to determine the fair value of its reporting units. The Company applies a valuation technique consistent with the income approach to measure the fair value of its indefinite-lived intangible assets. The income approach is based on the present value of estimated discounted cash flows and terminal value projected for each reporting unit. The income approach requires significant judgments, including the projected results of operations, the weighted-average cost of capital ("WACC") used to discount the cash flows and terminal value assumptions. The projected results of operations are based on the Company's best estimates of future economic and market conditions, including growth rates, estimated earnings and cash expenditures. The WACC is determined based on the Company's capital structure, cost of capital, inherent business risk profile and long-term growth expectations, as reflected in the terminal value.

The second step of the quantitative impairment test is performed if the first step indicates that impairment exists. The second step of the impairment assessment involves allocating the reporting unit's fair value to all of its recognized and unrecognized assets and liabilities in order to determine the implied fair value of the reporting unit's goodwill and intangible assets as of the assessment date. The implied fair value of the reporting unit's goodwill and other intangible assets is then compared to the carrying amount of goodwill and other intangible assets to quantify an impairment charge as of the assessment date.

Based upon the results of the independent valuation, the Company did not impair or adjust the goodwill and intangible totals for the fiscal year ended May 31, 2015. In addition, the Company did not record any adjustment or impairment of Goodwill during the three (3) months ended August 31, 2015.

Intangible Assets

In connection with the CSI Acquisition (See Note 14 - Acquisitions), the Company identified and recognized an intangible asset of \$912,000 representing trade name, customer relationships and employment agreements/non-competes. The assets were being amortized on a straight line basis over their estimated life of four (4) years, other than the trade name which was amortized over fifteen (15) years. CSI customer relationships were valued based on the discounted cash flow method applied to projected future cash flows as estimated by Company management. This method resulted in the sum of the future net cash flows discounted to its present day value. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on independent professional valuation services' calculations. Based upon the impairment analysis performed as of November 30, 2014, the Company impaired the trade name, customer relationships and employment agreements/non-competes in the amount of \$703,222. The intangible asset balance, net of impairment and accumulated amortization, at August 31, 2015 and May 31, 2015 was \$0 and \$0, respectively.

In connection with the acquisition of Staffing (UK) (See Note 14 - Acquisitions), the Company identified and recognized an intangible asset of \$10,050,000 representing trade name, customer relationships and employment agreements/non-competes. The assets are being amortized on a straight line basis over their estimated life of four (4) years, other than the trade name which is amortized over fifteen (15) years. Staffing (UK) customer relationships were valued based on an estimate of the discounted cash flow method applied to projected future cash flows as estimated by Company management. This method results in the sum of the future net cash flows discounted to its present day value. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on independent professional valuation services' calculations. At August 31, 2015 and May 31, 2015, the intangible asset balance, net of accumulated amortization, was \$7,462,604 and \$7,889,933, respectively.

In connection with the Poolia Acquisition (See Note 14 - Acquisitions), the Company identified and recognized an intangible asset of \$465,321 representing customer relationships and employment agreements/non-competes. The assets are being amortized on a straight line basis over their estimated life of four (4) years. Poolia customer relationships were valued based on an estimate of the discounted cash flow method applied to projected future cash flows as estimated by Company management. This method results in the sum of the future net cash flows discounted to its present day value. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on independent professional valuation services' calculations. At August 31, 2015 and May 31, 2015, the intangible asset balance, net of accumulated amortization, was \$290,826 and \$319,908, respectively.

In connection with the acquisition of PSI and PRS (See Note 14 - Acquisitions), the Company identified and recognized an intangible asset of \$2,999,100 representing trade name, customer relationships and employment agreements/non-competes. The assets are being amortized on a straight line basis over their estimated life of four (4) years, other than the trade name which is amortized over fifteen (15) years. PS customer relationships were valued using the discounted replacement cost approach. This method is based on acquisition costs invested to attract each

customer and relied on the actual selling costs incurred and allocated to new customer generation over the preceding four (4) years. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on independent professional valuation services' calculations. At August 31, 2015 and May 31, 2015, the intangible asset balance, net of accumulated amortization, is \$2,205,403 and \$2,359,022, respectively.

In connection with the acquisition of Lighthouse (See Note 14 - Acquisitions), the Company identified and recognized an intangible asset of \$2,269,403, representing trade name, customer relationships and employment agreements/non-competes. The assets are being amortized on a straight line basis over their estimated life of four (4) years, other than the trade name which is amortized over fifteen (15) years. The Lighthouse customer relationships were valued using the discounted replacement cost approach. This method is based on acquisition costs invested to attract each customer and relied on the actual selling costs incurred and allocated to new customer generation over the preceding four (4) years. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on management's calculations. At August 31, 2015 and May 31, 2015, the intangible asset balance, net of accumulated amortization, is \$2,193,586 and \$0, respectively.

Legal Proceedings

On May 22, 2014, NewCSI Inc. (“NCSI”), the former owners of CSI, filed a complaint in the United States District Court for the Western District of Texas, Austin Division, against the Company arising from the terms of the CSI Stock Purchase Agreement dated August 14, 2013. NCSI claims that the Company breached a provision of the CSI Stock Purchase Agreement (“SPA § 2.7”) which required the Company to calculate within 90 days after December 31, 2013 and pay to NCSI fifty percent (50%) of certain “Deferred Tax Assets”. The Complaint sought payment of the amount allegedly owed under SPA § 2.7 and acceleration of earn-out payments provided for in the CSI Stock Purchase Agreement of \$1,400,000, less amounts paid to date, and attorneys’ fees. The Company responded denying the material allegations and interposing numerous affirmative defenses. On October 8, 2014, NCSI filed a Motion of Summary Judgment (the “Motion”). On March 30, 2015, a Magistrate Judge of the District Court issued a Report and Recommendation that the District Court deny the Motion. The Recommendation became a final decision on April 13, 2015.

On December 31, 2014, NCSI filed an amended complaint to which NCSI added an additional count asserting an “Adjustment Event” had occurred requiring an acceleration of earn-out payments provided for in the CSI Stock Purchase Agreement of \$2,100,000, less amounts paid to date (\$1,670,635 at December 31, 2014), required should the Company or NCSI “be unable, or admit in writing, its inability to pay its debts as they become due.” The Company responded denying the material allegations and interposing numerous affirmative defenses. The Earn-out liability was fully expensed at the time of the acquisition and fully accrued for on the Company’s balance sheet as part of the purchase accounting at the time of the acquisition.

The final pretrial conference in this matter was held April 22, 2015. A jury was selected on May 14, 2015, and the trial was held May 18-20, 2015. On May 20, 2015, the jury rendered a verdict, finding that S360 had not complied with SPA § 2.7 and owed \$154,433, but that NCSI had not proved that S360 or NCSI had become unable to pay debts as they came due. The Court had held that it was not a question for the jury to decide if damages for breach of SPA § 2.7 should include accelerated earn-out payments.

On June 3, 2015, NCSI filed a Motion for Entry of Judgment as Matter of Law seeking entry of a judgment in the amount of \$154,433, plus accelerated earn-out payments in the amount of \$1,152,143, plus statutory interest. NCSI did not challenge the jury verdict on the ability to pay issue. Also on June 3, 2015, the Company filed a Motion for Entry of Judgment as a Matter of Law seeking entry of judgment against NCSI on the jury’s finding that the Company had not complied with SPA § 2.7, or, in the alternative, for a reduction of damages to \$54,452 and to hold that NCSI may not be awarded accelerated earn-out payments as that would result in an illegal penalty. As of July 1, 2015, the motions were fully briefed and submitted to the Court.

We believe that the Company acted in a manner consistent with our contractual rights, and we intend to aggressively defend the Company against this claim which we believe is not meritorious. Nevertheless, there can be no assurance that the outcome of this litigation will be favorable to the Company.

Restructuring Plan and Implementation:

During the first and second quarters of fiscal 2015, the Company conducted a thorough review and evaluation of its business operations and strategies, the forecast for the staffing industry, and the business environment in general. The Company concluded that it was imperative to take immediate action to reduce short and medium-term debt service obligations, consulting/advisory agreements, employment costs and other corporate commitments that were overburdening the Company's working capital and ability to fund continuing business operations, raise additional equity capital and/or debt, and execute its business plan. As such, on September 3, 2014, the Company formally established a Restructuring Committee, comprised of a Chairman and four (4) others selected from its board of directors to evaluate and formalize a Restructuring Plan. The Restructuring Plan was presented and adopted by the board of directors on September 3, 2014. Management planned to pursue each of the initiatives of the Restructuring Plan, some of which were contingent upon third parties' acceptance of the restructuring terms and may not be fully achieved.

Cost Reduction or Restructuring Goals and Key Initiatives:

Certain targeted initiatives have been and are being achieved through the following actions:

Short- and Medium-term debt service: The approved Restructuring Plan authorized management to approach existing debt holders with this proposal. The Company offered equity in the form of common stock and/or warrants in exchange for conversion or deferral of existing notes/obligations. The Company exchanged equity with a fair value in excess of the aggregate amount of debt being extinguished. Upon execution of all necessary agreements, the Company recognized a loss on the transaction. In accordance with ASC 470-40-2, the difference between the reacquisition price of debt and the net carrying amount of the extinguished debt shall be recognized currently in the period of extinguishment as losses or gains. Gains and losses shall not be amortized to future periods. The modification expense was measured at fair value on the date of the agreement and recorded in accordance with ASC 470-40-2; and

Notes Payable and Other Debt obligations: The Restructuring Plan offered a meaningful incentive to outstanding Notes Payable holders to convert their principal and accrued interest to common stock and/or warrants rather than a cash payment; Note holders converted \$3,056,030 of principal and interest into 335,839 common stock shares and 369,423 warrants exercisable for a term of ten (10) years at \$12.50. This action is anticipated to reduce the Company's future cash outflows by approximately \$889,000 in the calendar year of 2015, and by a further \$2,313,000 in the calendar year of 2016.

Modification of Series A Bonds: The Restructuring Plan modified the terms of the Series A Bonds conversion price from \$15.00 to \$10.00 with the intention of providing a meaningful incentive for the Series A Bond holders to convert their principal and interest into common stock and/or warrants on or before the maturity date of October 15, 2014, rather than redeem for cash; Bondholders converted \$3,709,655 of principal and interest into 370,969 common stock shares and 185,486 warrants exercisable for a term of three (3) years at \$20.00. The Company recorded a modification expense of \$2,927,959 related to changing the conversion price of these bonds.

Modification of Series B Bonds: The Restructuring Plan modified the terms of the Series B Bonds conversion price from \$15.00 to \$12.00 with the intention of providing a meaningful incentive for the Series B Bond holders to convert their principal and interest into common stock by the maturity date of September 30, 2015, rather than redeem for cash. No Bondholders have elected to convert as of August 31, 2015. The Company recorded a modification expense of \$154,489 related to changing the conversion price of these bonds and payment of amounts outstanding is due by October 30, 2015;

Earn-out Liabilities: The Restructuring Plan offered a meaningful incentive to the Earn-out liability holders to convert their contingent future payments to common stock rather than cash payments. In conjunction with the sale of Cyber 360, effective January 1, 2015, the former shareholders of TRG were offered the opportunity and elected to convert their remaining Earn-out liability of \$1,134,050 into common stock shares at \$10.00 per share. As a result, the Company issued 113,405 common stock shares and recorded a gain on conversion of earn-out of \$485,835 on February 27, 2015.

Operational and Corporate commitments: The approved Restructuring Plan authorized management to cancel various on-going consulting and employment agreements and incur certain costs associated with this restructuring. In accordance with ASC 470-25-12, which states, *a liability for costs to terminate a contract before the end of its term shall be recognized when the entity terminates the contract in accordance with the contract terms*. These amounts were recorded in the operating section of the Statement of Operations on a line item titled Reorganization of Business Expenses and a liability for the amount owed on the balance sheet.

Consulting Agreements: The Company cancelled various on-going consulting agreements. The measurement date to record the expense was the date upon which the Company decided to cancel the agreement. The Company expensed \$73,875 as a result of the cancellation of these agreements. This action is anticipated to reduce the Company's cash outflows by approximately \$432,000 in the calendar year of 2015.

Employment: The Company severed employment with an employee. The measurement date to record the expense was the date upon which the Company agreed to separate employment. The Company expensed \$691,966 related to the aforementioned severed employment. This action is anticipated to increase the Company's future cash outflows by approximately \$50,000 during the calendar year of 2015, and thereafter to reduce the Company's future cash outflows by approximately \$624,000 annually in perpetuity.

Restructuring Fees: The Company estimated the cost associated with this restructuring to be approximately \$175,000. U.S. GAAP does not allow for a general accrual for restructuring costs.

- o Therefore, any such costs have been and will continue to be expensed as incurred. To date, these fees have totaled \$792,650 and are properly classified in Professional fees - Restructuring.

Results of Operations

The Company continues to aggressively pursue and acquire staffing companies. To date the Company has acquired seven (7) staffing companies. While two (2) of our acquisitions have under-performed from a GAAP perspective, and we have since divested Cyber360, we view our M&A program in its totality as a success. In the medium to long-term we will view this impairment as a cost of getting our growth program in place.

From a revenue perspective, the Company delivered \$35.9 million for the quarter. The Company believes the acquisitions consummated during calendar years 2014 and 2015 are performing as expected. We are confident that we can continue to grow these businesses and that they will allow us to attract further acquisitions in line with our stated Strategic Plan of achieving \$300 million of annualized revenue.

The Company is vigilant in managing its operations and has developed a "Pathway to Profitability" program that is monitored constantly. This Pathway to Profitability includes overhead control, operational reviews, cash management, adequate capitalization, and our merger & acquisition program. Young, growing companies often confront struggles such as integration, financing, etc. We have invested for our future in building a strong corporate team which allows stronger financial reporting, compliance and commercial management. This investment has contributed to our losses in the short-term but we believe we will not need material additions to it as we grow, both organically and through acquisition.

The following table sets forth the results of our operations for the quarters ended August 31, 2015 and 2014 and as a percentage of revenue:

Gross profit and gross margin

Our gross profit for the quarters ended August 31, 2015 and 2014 was \$6,320,453 and \$5,664,095, respectively, representing gross margin of 18% and 17% respectively. Gross margin as a percentage of revenue is unchanged compared to the full year ended May 31, 2015 and is approximately in line with our expectations for gross margin as a percentage of revenue if our business mix remains as it is currently.

Operating expenses

For the quarter ended August 31, 2015, operating expenses amounted to \$6,979,131 as compared to \$7,063,503 for the quarter August 31, 2014, a decrease of \$84,372. As well as decreasing slightly on an absolute basis, as a percentage of revenue, we saw an improvement from 22% for the quarter ended August 31, 2014 to 19% for the quarter ended August 31, 2015. As we continue to grow revenue and further leverage our existing support functions, we expect operating expenses as a percentage of revenue to continue to trend lower. For the quarters ended August 31, 2015 and 2014, operating expenses consisted of the following:

For the quarter ended August 31, 2015, the decrease in our operating expenses as compared to the quarter ended August 31, 2014 was primarily attributable to:

A decrease of \$30,002 in general and administrative expenses for the quarter ended August 31, 2015 as compared to the quarter ended August 31, 2014. The decrease is attributable to the implementation of the Company's business plan in acquiring Lighthouse during the quarter ended August 31, 2015 as well as the continuation of the Company's action to reduce short and medium-term debt service obligations, consulting/advisory agreements, employment costs and other corporate commitments. General and administrative expenses declined from 4.4% of revenue to 4.2% from the quarter ended August 31, 2014 to the quarter ended August 31, 2015, respectively. Excluding expenses attributable to Lighthouse, general and administrative expenses declined on an absolute basis.

An increase in compensation of \$344,530. The increase is primarily attributable to the implementation of the Company's business plan in acquiring Lighthouse during the quarter ended August 31, 2015, coupled with increased commissions on higher gross margin. For the quarters ended August 31, 2014 and 2015, compensation expense declined slightly as a percentage of revenue from 11.7% to 11.6% and is approximately in line with our expectation as the Company continues to grow.

A decrease of \$115,258 in director and consulting fees to related parties incurred for administrative overhead services and business development services is primarily attributable to the Company's review of and subsequent decrease in related party consulting agreements primarily related to investor relations and raising capital.

An increase of \$42,305 in depreciation and amortization expense for the quarter ended August 31, 2015 as compared to the quarter ended August 31, 2014. Amortization expense relates to the amortization of intangible assets related to the acquisitions of Control Solutions International on November 4, 2013, Staffing UK on January 3, 2014, Poolia on February 28, 2014, PeopleSERVE, Inc. and PeopleSERVE PRS, Inc. on May 17, 2014, and Lighthouse Placement Services LLC on July 8, 2015. The Company's intangible assets are being amortized on a straight line basis over the estimated life of four (4) years except for Trade Names which are being amortized over fifteen (15) years. Depreciation expense relates to the fixed assets of the Company's subsidiaries and the fixed assets the Company acquired.

A decrease of \$325,947 in professional fees in the quarter ended August 31, 2015 as compared to the quarter ended August 31, 2014. The decrease primarily relates to the Company's review of and subsequent decrease in most professional fee categories, as well as a decrease in professional fees related to acquisitions in the quarter ended August 31, 2015. For the quarters ended August 31, 2015 and 2014, professional fees declined as a percentage of

revenue from 2.8% to 1.6%.

Other Expenses

For the quarters ended August 31, 2015 and 2014, we incurred interest and financing expense of \$1,027,992 and \$3,341,033, respectively, relating to interest for convertible notes and other notes payable, accounts receivable financing, amortization of beneficial conversion feature, debt discount and deferred financing costs.

Net Loss

As a result of the factors described above, our net losses for the quarters ended August 31, 2015 and 2014 were \$1,691,233 and \$4,625,806, respectively, or a net loss per common share of \$(0.38) and \$(2.39) (basic and diluted), respectively.

Liquidity and Capital Resources

Liquidity is the ability of a company to generate funds to support its current and future operations, satisfy its obligations, and otherwise operate on an ongoing basis. Historically, we funded our operations through promissory notes, bonds, convertible notes, private placement offerings and from advances from our majority shareholders/officers/directors.

As of August 31, 2015, the Company had a working capital deficiency of \$7,566,749, and had an accumulated deficit of \$36,134,337 and for the quarter ended August 31, 2015 has a net loss and net cash provided by (used in) operations of \$1,691,233 and \$576,497, respectively. In addition, the Company owes the State of Connecticut approximately \$419,000 in past due SUTA tax. The Company has also accrued approximately \$60,000 in penalties and interest.

Our primary uses of cash have been for professional fees related to our operations and financial reporting requirements and for the payment of compensation and benefits and consulting fees to related parties. All funds received have been expended in growing the business, implementing our business plan and funding operations. The following trends are reasonably likely to result in a material decrease in our liquidity over the near to long term:

- An increase in working capital requirements to finance targeted acquisitions,

- Addition of administrative and sales personnel as the business grows,
- Increases in advertising, public relations and sales promotions for existing and new brands as we expand within existing markets or enter new markets,
- The costs associated with being a public company, and
- Capital expenditures to add technologies.

As a result of our current and future potential financings, we believe that we will be able to implement our business plan and pursue the acquisition of a broad spectrum of staffing agencies primarily in the accounting and finance, IT, engineering, administration and light industrial sectors. Financing transactions may include the issuance of equity or debt securities, obtaining credit facilities, or other financing mechanisms. However, the trading price of our common stock and a downturn in the U.S. equity and debt markets could make it more difficult to obtain financing through the issuance of equity or debt securities. Even if we are able to raise the funds required, it is possible that we could incur unexpected costs and expenses, fail to collect amounts owed to us, or experience unexpected cash requirements that would force us to seek alternative financing. Furthermore, if we issue additional equity or debt securities, stockholders may experience additional dilution or the new equity securities may have rights, preferences or privileges senior to those of existing holders of our common stock. Currently, dilutive common share equivalents totaling 3,282,817 consist of shares issuable upon the conversion of existing convertible notes, convertible Preferred Stock and the exercise of stock options and warrants.

Our liquidity may be negatively impacted by the significant costs associated with our public company reporting requirements, costs associated with newly applicable corporate governance requirements, including requirements under the Sarbanes-Oxley Act of 2002 and other rules implemented by the Securities and Exchange Commission. We expect all of these applicable rules and regulations to significantly increase our legal and financial compliance costs and to make some activities more time consuming and costly.

Critical Accounting Policies and Estimates

Our significant accounting policies are fully described in Note 3 to our unaudited consolidated financial statements for the fiscal quarter ended February 28, 2015 contained herein.

Recent Accounting Pronouncements

Accounting standards that have been issued or proposed by FASB that do not require adoption until a future date are not expected to have a material impact on the financial statement presentation or disclosure upon adoption.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Smaller reporting companies are not required to provide the information required by this item.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures.

We carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act (defined below)). Based upon that evaluation, our principal executive officer and principal financial officer concluded that, as of the end of the period covered in this report, our disclosure controls and procedures were not effective to ensure that information required to be disclosed in reports filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized and reported within the required time periods and is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Our management, including our principal executive officer and principal financial officer, does not expect that our disclosure controls and procedures or our internal controls will prevent all error or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Due to the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. Accordingly, management believes that the financial statements included in this report fairly present in all material respects our financial condition, results of operations and cash flows for the periods presented.

Change in Internal Control over Financial Reporting.

In addition, our management with the participation of our Principal Executive Officer and Principal Financial Officer have determined that no change in our internal control over financial reporting occurred during or subsequent to the quarter ended August 31, 2015 that has materially affected, or is (as that term is defined in Rules 13(a)-15(f) and 15(d)-15(f) of the Securities Exchange Act of 1934) reasonably likely to materially affect, our internal control over financial reporting.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the registrant's financial reporting.

In its assessment of the effectiveness of internal control over financial reporting as of August 31, 2015, the Company determined that there were control deficiencies that constituted material weaknesses, as described below:

- 1) Inadequate segregation of duties, and
- 2) Inadequate procedures to test internal controls.

As of the date of filing of this Report, the Company does not intend to remedy the foregoing and therefore such material weaknesses in our control environment and financial reporting process will continue. A system of controls, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the system of controls are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

PART II-OTHER INFORMATION

Item 1. Legal Proceedings

Legal Proceedings

On May 22, 2014, NewCSI Inc. (“NCSI”), the former owners of CSI, filed a complaint in the United States District Court for the Western District of Texas, Austin Division, against the Company arising from the terms of the CSI Stock Purchase Agreement dated August 14, 2013. NCSI claims that the Company breached a provision of the CSI Stock Purchase Agreement (“SPA § 2.7”) which required the Company to calculate within 90 days after December 31, 2013 and pay to NCSI fifty percent (50%) of certain “Deferred Tax Assets”. The Complaint sought payment of the amount allegedly owed under SPA § 2.7 and acceleration of earn-out payments provided for in the CSI Stock Purchase Agreement of \$1,400,000, less amounts paid to date, and attorneys’ fees. The Company responded denying the material allegations and interposing numerous affirmative defenses. On October 8, 2014, NCSI filed a Motion of Summary Judgment (the “Motion”). On March 30, 2015, a Magistrate Judge of the District Court issued a Report and Recommendation that the District Court deny the Motion. The Recommendation became a final decision on April 13, 2015.

On December 31, 2014, NCSI filed an amended complaint to which NCSI added an additional count asserting an “Adjustment Event” had occurred requiring an acceleration of earn-out payments provided for in the CSI Stock Purchase Agreement of \$2,100,000, less amounts paid to date (\$1,670,635 at December 31, 2014), required should the Company or NCSI “be unable, or admit in in writing, its inability to pay its debts as they become due.” The Company

responded denying the material allegations and interposing numerous affirmative defenses. The Earn-out liability was fully expensed at the time of the acquisition and fully accrued for on the Company's balance sheet as part of the purchase accounting at the time of the acquisition.

The final pretrial conference in this matter was held April 22, 2015. A jury was selected on May 14, 2015, and the trial was held May 18-20, 2015. On May 20, 2015, the jury rendered a verdict, finding that the Company had not complied with SPA § 2.7 and owed \$154,433, but that NCSI had not proved that the Company or NCSI had become unable to pay debts as they came due. The Court had held that it was not a question for the jury to decide if damages for breach of SPA § 2.7 should include accelerated earn-out payments.

On June 3, 2015, NCSI filed a Motion for Entry of Judgment as Matter of Law seeking entry of a judgment in the amount of \$154,433, plus accelerated earn-out payments in the amount of \$1,152,143, plus statutory interest. NCSI did not challenge the jury verdict on the ability to pay issue. Also on June 3, 2015, the Company filed a Motion for Entry of Judgment as a Matter of Law seeking entry of judgment against NCSI on the jury's finding that the Company had not complied with SPA § 2.7, or, in the alternative, for a reduction of damages to \$54,452 and to hold that NCSI may not be awarded accelerated earn-out payments as that would result in an illegal penalty. As of July 1, 2015, the motions were fully briefed and submitted to the Court.

We believe that the Company acted in a manner consistent with our contractual rights, and we intend to aggressively defend the Company against this claim which we believe is not meritorious. Nevertheless, there can be no assurance that the outcome of this litigation will be favorable to the Company.
