Table of Contents**Operating Results and Financial Conditions****2005 Third Quarter in Review**

Looking back at the global economy in the third quarter of 2005, the U.S. economy continued to display growth despite concern over the economic impact of escalating crude oil prices, with private sector capital spending continuing to grow and employment conditions and capacity utilization remaining at stable levels. In Europe, such factors as an improved job market have resulted in a trend toward moderate recovery. As for Asia, while the rate of expansion in consumer spending and capital investment declined somewhat, China continued to achieve high economic growth and other Asian economies also enjoyed generally favorable performances. In Japan, the economy continued to recover gradually thanks to such factors as increased corporate investment and improved employment conditions, fueled by favorable corporate profits, and consumer spending remained robust.

As for the markets in which the Canon Group operates, within the camera segment demand for digital single-lens-reflex (SLR) cameras continued to grow significantly during the term. Sales of digital compact cameras also remained strong to realize healthy overall growth for the segment. Demand for network digital multifunction devices (MFDs) stayed strong as the office market moves toward multifunctionality, speed and color. Although sales of computer peripherals, including printers, grew for both multifunction and color models, the segment suffered amid a shift in demand toward high-performance low-priced machines. Demand for steppers, used in the production of semiconductors, tapered off because investment by chip manufacturers has entered a correction phase. Increased investment by manufacturers of liquid crystal displays (LCDs) fueled growth in the market for projection aligners, which are used in the production of LCD panels. The average value of the yen for the third quarter was ¥111.23 to the U.S. dollar and ¥135.73 to the euro, representing a year-on-year decrease of almost 1% against both currencies. Amid these conditions, Canon's consolidated net sales for the third quarter increased by 4.8% from the year-ago period to ¥878.5 billion (U.S.\$7,774 million), boosted by a favorable rise in sales of digital cameras and color network MFDs, along with an increase in sales of printers. Net income for the third quarter totaled ¥100.6 billion (U.S.\$890 million), a slight decrease of 1.1% year-on-year, mainly caused by such factors from the previous year as the gain realized from the return to the Japanese Government of the substitutional portion of the employees pension funds. With the ongoing production-reform efforts through the integration of manufacturing and development operations during the term and the timely launch of competitive new products amid the rising cost of crude oil and raw materials, Canon's gross profit ratio for the third quarter was 48.9%, the same level as the year-ago period. Selling, general and administrative expenses for the third quarter increased 13.8% year-on-year, mainly due to such factors as R&D expenditures for the development of future businesses and increased advertising and sales promotion spending, along with such factors as expenses related to Canon Expo 2005, a showcase of the company's latest products and future technologies that is held every 5 years, and a ¥13.8 billion expense deduction for the gain from the year-ago period realized from the return to the Japanese Government of the substitutional portion of the employees pension funds that the company and certain of its subsidiaries in Japan had operated. Consequently, operating profit in the third quarter totaled ¥143.6 billion (U.S.\$1,270 million), a year-on-year decrease of 9.3%. Other income (deductions) improved by ¥7.4 billion (U.S.\$66 million), mainly due to an increase in interest revenue and sales on securities. As a result, income before income taxes and minority interests in the third quarter totaled ¥155.3 billion (U.S.\$1,374 million), a year-on-year decrease of 4.5%. The effective tax rate during the third quarter was 1.4 points lower compared with the previous year due to such factors as the introduction of the corporation size-based enterprise tax in Japan, which reduced the statutory tax rate from 42% to 40%. Consequently, as stated earlier, net income for the third quarter of 2005 totaled ¥100.6 billion (U.S.\$890 million). Basic net income per share for the third quarter was ¥113.40 (U.S.\$1.00), a year-on-year decrease of ¥1.39 (U.S.\$0.01).

Table of Contents**Results by Product Segment**

In the business machine segment, demand for network digital MFDs, which are grouped in the office imaging products sub-segment, indicates a shift from monochrome machines to color models, as well as a trend toward higher-end features. Additionally, amid color network digital MFDs, the iR C3170/2570 and iR C3220/2620 series continued to sell well in both Japan and overseas markets. Among monochrome network digital MFDs, such mid-level models as the iR4570/3570/2870/2270 contributed to the realization of expanded sales. Overall, sales of office imaging products in the third quarter realized a year-on-year increase of 3.7%. In the field of computer peripherals, laser beam printers enjoyed a year-on-year increase in unit sales, with color models increasing more than 30% and monochrome machines also recording healthy growth. Sales in value terms also realized growth despite the effect of the shift in market demand toward lower priced models. Inkjet printers recorded an increase in unit sales of approximately 10%, with the PIXMA iP3000/4000 and, in markets outside of Japan, the PIXMA MP110/130 maintaining brisk sales. Additionally, newly introduced models in overseas market, including the PIXMA iP4200/1600 and high-speed all-in-one models such as the PIXMA MP500/450, contributed to a stronger product lineup, which also led the sales in value term to realize growth. As a result, sales of computer peripherals for the third quarter realized a year-on-year increase of 4.4%. Sales of business information products, however, decreased by 15.4% due to the intentional curtailing of personal computer sales in the Japanese market. Collectively, sales of business machines during the third quarter totaled ¥598.2 billion (U.S.\$5,294 million), a year-on-year increase of 3.1%. Despite active efforts to reduce costs and launch new products amid sever price competition, operating profit for the third quarter totaled ¥132.4 billion (U.S.\$1,171 million), a year-on-year decrease of 5.2%, mainly due to a delay in the introduction of new inkjet printer products.

Within the camera segment, the continued strong demand for digital SLR cameras has fueled robust growth, with the EOS DIGITAL REBEL XT, launched in the first half, recording particularly strong sales along with continued healthy sales of the EOS 20D, launched in last year. This, in turn, has led to expanded sales of interchangeable lenses for SLR cameras. Sales of compact-model digital cameras also continued to expand apace, with healthy demand for the PowerShot SD400 and PowerShot A520, launched in the first half, as well as the PowerShot SD550 and PowerShot SD450, introduced in the third quarter. As a result, unit sales of digital cameras for the third quarter increased more than 30% from the year-ago period. In the field of digital video camcorders, newly introduced models such as the Optura 600, the Optura S1, and the DC20/10 recorded strong performances. Consequently, camera sales overall continued to enjoy growth of 23.1%, achieving total sales of ¥203.2 billion (U.S.\$1,798 million). The operating profit ratio for the camera segment increased 6.0 points influenced by such factors as increased sales, cost reduction efforts, expanded sales of newly introduced models, and sales growth for such high valued-added products as digital SLR cameras. As a result, the operating profit for the period totaled ¥48.8 billion (U.S.\$432 million), a year-on-year increase of 63.9%.

In the optical and other products segment, sales of steppers, used for the production of semiconductors, decreased substantially due to a drop in unit sales. While unit sales of aligners used in the production of LCDs decreased, sales in value terms remained at the same level as the previous year due to the rise in selling prices in line with the shift toward next-generation models capable of accommodating larger size LCD panels. As a result, third-quarter sales for the segment totaled ¥77.2 billion (U.S.\$683 million), a year-on-year decrease of 17.3%. While efforts were made to reduce costs, operating profit for the segment declined year-on-year by 9.8% to ¥9.2 billion (U.S.\$82 million), mainly due to the decrease in sales volume.

Cash Flow

In the nine months ended September 30, 2005, although Canon maintained the growth in sales and increased cash proceeds from sales, combined with an increase in net income, cash flow from operating activities totaled ¥368.7 billion (U.S.\$3,263 million), a decrease of ¥18.6 billion (U.S.\$165 million) due to an increased corporate tax payment accompanying the increase in profit last year.

Cash flow from investing activities totaled ¥288.4 billion (U.S.\$2,552 million), a year-on-year increase of ¥113.3 billion (U.S.\$1,002 million), caused by combination of such factors as a ¥271.0 billion (U.S.\$2,398 million) in capital expenditure, which was used mainly to expand production capabilities in both Japan and overseas regions as well as to bolster the company's R&D-related infrastructure, and also an acquisition of the stock of ANELVA

Corporation.

Cash flow from financing activities recorded an outlay of ¥75.0 billion (U.S.\$664 million), mainly resulting from continued repayment of loans and an increase in the dividend payout.

Consequently, cash and cash equivalents remained at a high level, totaling ¥903.1 billion (U.S.\$7,992 million), an increase of ¥15.3 billion (U.S.\$136 million), including the impact of currency exchange from the end of the previous year.

Table of Contents

Outlook

Regarding the outlook for the global economy in the fourth quarter and thereafter, although prospects remain uncertain due to rising oil prices and the damage caused by catastrophic hurricanes in the United States, which could adversely affect consumer spending and exchange rate trends, the global economy is likely to continue its course toward recovery.

In the businesses in which Canon is involved, demand in the digital-camera market is expected to continue enjoying growth, particularly in overseas markets. As for network digital MFDs and laser beam printers, while stable demand is projected for full-color models, severe price competition and shifting demand toward lower priced models is expected to adversely affect sales. Within the semiconductor-production equipment market, demand for steppers has been tapering off, which is expected to result in sluggish sales. In the market for projection aligners used in the production of LCDs, demand for LCD production equipment is expected to show continued growth.

The company has revised upward its forecasts for the 2005 fiscal year and now anticipates consolidated net sales of ¥3,740.0 billion (U.S.\$33,097 million), consolidated income before income taxes and minority interests of ¥614.0 billion (U.S.\$5,434 million), and consolidated net income of ¥384.0 billion (U.S.\$3,398 million). The company also projects non-consolidated net sales of ¥2,464.0 billion (U.S.\$21,805 million), non-consolidated ordinary profit of ¥435.0 billion (U.S.\$3,850 million), and non-consolidated net income of ¥286.0 billion (U.S.\$2,531 million). Although uncertainty surrounds several factors that could affect currency exchange rates, significant changes in rates are not anticipated. The company's forecasts for the remainder of 2005 are based on currency exchange assumptions of ¥112.00 to the U.S dollar and ¥135.00 to the euro.

Notes: 1. The primary products included in each of the product segments are as follows:

Business machines:

Office imaging products: Office network digital multifunction devices (MFDs) / Color network digital MFDs /

Office copying
machines /
Personal-use
copying
machines /
Full-color
copying
machines / etc.

Computer
peripherals:
Laser beam
printers / Single
function inkjet
printers / Inkjet
multifunction
peripherals /
Image scanners
/ etc.

Business
information
products:
Computer
information
systems /
Micrographic
equipment /
Personal
information
products / etc.

Cameras: SLR
cameras /
Compact
cameras /
Digital cameras
/ Digital video
camcorders /
etc.

Optical and
other products:
Semiconductor
production
equipment /
Mirror
projection mask
aligners for
LCD panels /
Broadcasting

equipment /
Medical
equipment /
Components /
etc.

2. The principal
countries and
regions included
in each regional
category are as
follows:

Americas:
United States of
America,
Canada, Latin
America /
Europe:
England,
Germany,
France,
Netherlands /
Other Areas:
Asian regions,
China, Oceania

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.
