

WESTAMERICA BANCORPORATION

Form 10-Q

November 02, 2012

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2012

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission file number: 001-9383

WESTAMERICA BANCORPORATION

(Exact Name of Registrant as Specified in Its Charter)

CALIFORNIA

(State or Other Jurisdiction of
Incorporation or Organization)

94-2156203

(I.R.S. Employer
Identification No.)

1108 FIFTH AVENUE, SAN RAFAEL, CALIFORNIA 94901

(Address of Principal Executive Offices) (Zip Code)

Registrant's Telephone Number, Including Area Code (707) 863-6000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes

No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes

No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting
company

(Do not check if a smaller reporting company)

Edgar Filing: WESTAMERICA BANCORPORATION - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes

No

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date:

Title of Class	Shares outstanding as of October 26, 2012
Common Stock, No Par Value	27,386,000

FORWARD-LOOKING STATEMENTS

This report on Form 10-Q contains forward-looking statements about Westamerica Bancorporation for which it claims the protection of the safe harbor provisions contained in the Private Securities Litigation Reform Act of 1995. Examples of forward-looking statements include, but are not limited to: (i) projections of revenues, expenses, income or loss, earnings or loss per share, the payment or nonpayment of dividends, capital structure and other financial items; (ii) statements of plans, objectives and expectations of the Company or its management or board of directors, including those relating to products or services; (iii) statements of future economic performance; and (iv) statements of assumptions underlying such statements. Words such as "believes", "anticipates", "expects", "intends", "targeted", "projected", "continue", "remain", "will", "should", "may" and other similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements.

These forward-looking statements are based on Management's current knowledge and belief and include information concerning the Company's possible or assumed future financial condition and results of operations. A number of factors, some of which are beyond the Company's ability to predict or control, could cause future results to differ materially from those contemplated. These factors include but are not limited to (1) the length and severity of current and potential future difficulties in the global, national and California economies and the effects of government efforts to address those difficulties; (2) liquidity levels in capital markets; (3) fluctuations in asset prices including, but not limited to stocks, bonds, real estate, and commodities; (4) the effect of acquisitions and integration of acquired businesses; (5) economic uncertainty created by terrorist threats and attacks on the United States, the actions taken in response, and the uncertain effect of these events on the national and regional economies; (6) changes in the interest rate environment; (7) changes in the regulatory environment; (8) competitive pressure in the banking industry; (9) operational risks including data processing system failures or fraud; (10) volatility of interest rate sensitive loans, deposits and investments; (11) asset/liability management risks and liquidity risks; (12) the effect of natural disasters, including earthquakes, fire, flood, drought, and other disasters, on the uninsured value of loan collateral, the financial condition of debtors and issuers of investment securities, the economic conditions affecting the Company's market place, and commodities and asset values, and (13) changes in the securities markets. The reader is directed to the Company's annual report on Form 10-K for the year ended December 31, 2011, for further discussion of factors which could affect the Company's business and cause actual results to differ materially from those expressed in any forward-looking statement made in this report. The Company undertakes no obligation to update any forward-looking statements in this report.

3 Federal Home Loan Bank ("FHLB")

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1: Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and pursuant to the rules and regulations of the Securities and Exchange Commission. The results of operations reflect interim adjustments, all of which are of a normal recurring nature and, in the opinion of Management, are necessary for a fair presentation of the results for the interim periods presented. The interim results for the three and nine months ended September 30, 2012 and 2011 are not necessarily indicative of the results expected for the full year. These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and accompanying notes as well as other information included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

The Company has evaluated events and transactions subsequent to the balance sheet date. Based on this evaluation, the Company is not aware of any events or transactions that occurred subsequent to the balance sheet date but prior to filing that would require recognition or disclosure in its consolidated financial statements.

Note 2: Accounting Policies

The Company's accounting policies are discussed in Note 1 to the audited consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011. Certain amounts in prior periods have been reclassified to conform to the current presentation.

Certain accounting policies underlying the preparation of these financial statements require Management to make estimates and judgments. These estimates and judgments may significantly affect reported amounts of assets and liabilities, revenues and expenses, and disclosures of contingent assets and liabilities. Management exercises judgment to estimate the appropriate level of the allowance for credit losses, the acquisition date fair value of purchased loans, and the evaluation of other than temporary impairment of investment securities, which are discussed in the Company's accounting policies.

Recently Adopted Accounting Standards

FASB ASU 2011-03, Reconsideration of Effective Control for Repurchase Agreements, was issued April 2011 addressing the accounting for repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. The amendments remove from the assessment of effective control (1) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (2) the collateral maintenance implementation guidance related to that criterion. The Company adopted the provisions of the Update in the first quarter of 2012 with prospective application to new transactions or existing transactions modified on or after January 1, 2012. The adoption of the Update did not have a material effect on the Company's financial statements at the date of adoption.

FASB ASU 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs, was issued May 2011 as a result of the FASB and International Accounting Standards Board's (IASB) goal to develop common requirements for measuring fair value and for disclosing information about fair value measurements in accordance with U.S. generally accepted accounting principles and International Financial Reporting Standards. The Company adopted the provisions of the Update in the first quarter of 2012 with prospective application, resulting in expanded fair value disclosure. The adoption of the Update did not have a material effect on the Company's financial statements at the date of adoption.

FASB ASU 2011-05, Presentation of Comprehensive Income, was issued June 2011 requiring that all changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. This Update also requires that reclassification adjustments for items that are reclassified from other comprehensive income to net income be presented on the face of the financial statements. The Company adopted the provisions of the Update in the first quarter of 2012 with retrospective application, resulting in the addition of a new financial statement titled "Consolidated Statements of Comprehensive Income".

FASB ASU 2011-12, Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05, was issued December 2011 updating and superseding certain pending paragraphs relating to the presentation on the face of the financial statements the effects of reclassifications out of accumulated other comprehensive income on the components of net income and other comprehensive income. This Update was effective concurrent with ASU 2011-05, Presentation of Comprehensive Income, and did not have a material effect on the Company's financial statements at the date of adoption.

FASB ASU 2011-08, Testing for Goodwill Impairment, was issued September 2011 giving an entity the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, an entity determines it is more likely than not that the fair value of a reporting unit is more than its carrying amount, then performing the two-step impairment test is unnecessary. However, if an entity concludes otherwise, then it is required to perform the first step of the two-step impairment test by calculating the fair value of the reporting unit and comparing the fair value with the carrying amount of the reporting unit. If the carrying amount of a reporting unit exceeds its fair value, then the entity is required to perform the second step of the goodwill impairment test to measure the amount of the impairment loss, if any. Under the amendments in this Update, an entity has the option to bypass the qualitative assessment for any reporting unit in any period and proceed directly to performing the first step of the two-step goodwill impairment test. An entity may resume performing the qualitative assessment in any subsequent period. The Company adopted the provisions of the Update in the first quarter of 2012. The adoption of the Update did not have a material effect on the Company's financial statements at the date of adoption.

Recently Issued Accounting Standards

FASB ASU 2011-11, Disclosures about Offsetting Assets and Liabilities, was issued December 2011 to require an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. An entity is required to apply the amendments for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented. The Update will not have a material effect on the Company's financial statements at the date of adoption.

FASB ASU 2012-06, Subsequent Accounting for an Indemnification Asset Recognized at the Acquisition Date as a Result of a Government-Assisted Acquisition of a Financial Institution, was issued October 2012 to provide guidance for consistently measuring an indemnification asset subsequent to acquisition. Subsequent accounting for changes in the measurement of the indemnification asset should be on the same basis as a change in the assets subject to indemnification. Any amortization of changes in value is limited to the shorter of the contractual term of the indemnification agreement or the remaining life of the indemnified assets. The amendments are effective for fiscal years, and interim periods within those years, beginning on or after December 15, 2012, with early adoption permitted. The amendments will not have a material effect on the Company's financial statements at the date of adoption.

Note 3: Investment Securities

Expected maturities of mortgage-backed securities can differ from contractual maturities because borrowers have the right to call or prepay obligations with or without call or prepayment penalties. In addition, such factors as prepayments and interest rates may affect the yield on the carrying value of mortgage-backed securities. At September 30, 2012 and December 31, 2011, the Company had no high-risk collateralized mortgage obligations as defined by regulatory guidelines.

An analysis of gross unrealized losses of investment securities available for sale follows:

Total	\$47,940	\$ (605)	\$9,167	\$ (66)	\$57,107	\$ (671)

The unrealized losses on the Company's investment securities were caused by market conditions for these types of investments. The Company evaluates securities on a quarterly basis including changes in security ratings issued by ratings agencies, changes in the financial condition of the issuer, and, for mortgage-related and asset-backed securities, delinquency and loss information with respect to the underlying collateral, changes in the levels of subordination for the Company's particular position within the repayment structure, and remaining credit enhancement as compared to expected credit losses of the security. During the second quarter 2012, the Company transferred one residential collateralized mortgage obligation with a carrying value of \$9,077 thousand from the held to maturity portfolio to the available for sale portfolio. The residential collateralized mortgage obligation was subsequently sold due to a decline in the credit worthiness from increased losses on subordinate tranches. Substantially all securities owned at September 30, 2012 continue to be investment grade rated by one or more major rating agencies.

The Company does not intend to sell any investments and has concluded that it is more likely than not that it will not be required to sell the investments prior to recovery of the amortized cost basis. Therefore, the Company does not

consider these investments to be other-than-temporarily impaired as of September 30, 2012.

The fair values of the investment securities could decline in the future if interest rates rise, the general economy deteriorates, credit ratings decline, the issuer's financial condition deteriorates, or the liquidity for securities declines. As a result, other than temporary impairments may occur in the future due to increased risk of default.

As of September 30, 2012, \$833,972 thousand of investment securities were pledged to secure public deposits and short-term funding needs, compared to \$903,807 thousand at December 31, 2011.

The Bank's customers are small businesses, professionals and consumers. Given the scale of these borrowers, corporate credit rating agencies do not evaluate the borrowers' financial condition. The Bank maintains a Loan Review Department which reports directly to the Board of Directors. The Loan Review Department performs independent evaluations of loans and assigns credit risk grades to evaluated loans using grading standards employed by bank regulatory agencies. Loans judged to carry lower-risk attributes are assigned a "pass" grade, with a minimal likelihood of loss. Loans judged to carry higher-risk attributes are referred to as "classified loans," and are further disaggregated, with increasing expectations for loss recognition, as "substandard," "doubtful," and "loss." If the Bank becomes aware of deterioration in a borrower's performance or financial condition between Loan Review examinations, assigned risk grades will be re-evaluated promptly. Credit risk grades assigned by the Loan Review Department are subject to review by the Bank's regulatory authority during regulatory examinations.

The following summarizes the credit risk profile by internally assigned grade:

Credit Risk Profile by Internally Assigned Grade

Total	3	\$	3,509	\$	3,447	\$ 1,794

- 20 -

No loans were modified that were considered troubled debt restructurings during the three months ended September 30, 2012. During the nine months ended September 30, 2012, the Company modified two loans with a carrying value totaling \$1,817 thousand that were considered troubled debt restructurings. During the three and nine months ended September 30, 2011, the Company modified one loan with a carrying value of \$3,183 thousand that was considered a troubled debt restructuring. The concessions granted in the restructuring completed during the first nine months of 2012 and 2011 largely consisted of modification of payment terms extending the maturity date to allow for deferred principal repayment.

During the three months ended September 30, 2012, no troubled debt restructurings defaulted. During the nine months ended September 30, 2012, a construction loan with a carrying value of \$3,068 thousand defaulted. During the three and nine months ended September 30, 2011, no troubled debt restructurings were in default.

The Company pledges loans to secure borrowings from the Federal Home Loan Bank (FHLB). At September 30, 2012, loans pledged to secure borrowing totaled \$46,168 thousand compared with \$69,145 thousand at December 31, 2011. The amount of loans pledged exceeds collateral requirements. The loans restricted due to collateral requirements approximate \$35,638 thousand and \$35,894 thousand at September 30, 2012 and December 31, 2011, respectively. The FHLB does not have the right to sell or repledge such loans.

There were no loans held for sale at September 30, 2012 and December 31, 2011.

Note 5: Concentration of Credit Risk

The Company's business activity is with customers in Northern and Central California. The loan portfolio is well diversified within the Company's geographic market, although the Company has significant credit arrangements that are secured by real estate collateral. In addition to real estate loans outstanding as disclosed in Note 4, the Company had loan commitments and standby letters of credit related to real estate loans of \$69,738 thousand and \$77,988 thousand at September 30, 2012 and December 31, 2011, respectively. The Company requires collateral on all real estate loans with loan-to-value ratios at origination generally no greater than 75% on commercial real estate loans and no greater than 80% on residential real estate loans.

Note 6: Goodwill and Identifiable Intangible Assets

The Company has recorded goodwill and other identifiable intangibles associated with purchase business combinations. Goodwill is not amortized, but is periodically evaluated for impairment. The Company did not recognize impairment during the nine months ended September 30, 2012 and 2011.

The carrying values of goodwill were (in thousands):

September 30, 2012	\$ 121,673
December 31, 2011	\$ 121,673

Identifiable intangibles are amortized to their estimated residual values over their expected useful lives. Such lives and residual values are also periodically reassessed to determine if any amortization period adjustments are indicated. During the nine months ended September 30, 2012 and 2011, no such adjustments were recorded.

The gross carrying amount of identifiable intangible assets and accumulated amortization was:

At September 30, 2012	At December 31, 2011
(In thousands)	

Edgar Filing: WESTAMERICA BANCORPORATION - Form 10-Q

	Gross Carrying Amount		Accumulated Amortization	Gross Carrying Amount		Accumulated Amortization
Core Deposit Intangibles	\$56,808	\$	(33,766)	\$ 56,808	\$	(30,070)
Merchant Draft Processing Intangible	10,300		(8,789)	10,300		(8,409)
Total Identifiable Intangible Assets	\$67,108	\$	(42,555)	\$ 67,108	\$	(38,479)

- 21 -

As of September 30, 2012, the current year and estimated future amortization expense for identifiable intangible assets was:

	Core Deposit Intangibles		Merchant Draft Processing Intangible	Total
	(In thousands)			
For the nine months ended September 30, 2012 (actual)	\$3,696	\$	380	\$4,076
Estimate for year ended December 31, 2012	4,868		500	5,368
2013	4,304		400	4,704
2014	3,946		324	4,270
2015	3,594		262	3,856
2016	3,292		212	3,504
2017	2,853		164	3,017

Note 7: Commitments and Contingent Liabilities

Loan commitments are agreements to lend to a customer provided there is no violation of any condition established in the agreement. Commitments generally have fixed expiration dates or other termination clauses. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future funding requirements. Loan commitments are subject to the Company's normal credit policies and collateral requirements. Unfunded loan commitments were \$322,990 thousand and \$348,621 thousand at September 30, 2012 and December 31, 2011, respectively. Standby letters of credit commit the Company to make payments on behalf of customers when certain specified future events occur. Standby letters of credit are primarily issued to support customers' short-term financing requirements and must meet the Company's normal credit policies and collateral requirements. Standby letters of credit outstanding totaled \$25,939 thousand and \$27,221 thousand at September 30, 2012 and December 31, 2011, respectively. The Company also had commitments for commercial and similar letters of credit of \$514 thousand and \$454 thousand at September 30, 2012 and December 31, 2011, respectively.

Due to the nature of its business, the Company is subject to various threatened or filed legal cases. Based on the advice of legal counsel, the Company does not expect such cases will have a material, adverse effect on its financial position or results of operations. Legal liabilities are accrued when obligations become probable and the amount is reasonably estimable. Legal costs related to covered assets are eighty percent indemnified under loss-sharing agreements with the FDIC if certain conditions are met.

Note 8: Fair Value Measurements

The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Available for sale investment securities are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets on a nonrecurring basis, such as certain loans held for investment and other assets. These nonrecurring fair value adjustments typically involve the lower-of-cost-or-fair value accounting of individual assets.

In accordance with the Fair Value Measurement and Disclosure topic of the Codification, the Company bases its fair values on the price that would be received to sell an asset or paid to transfer a liability in the principal market or most advantageous market for an asset or liability in an orderly transaction between market participants on the measurement date under current market conditions. A fair value measurement reflects all of the assumptions that market participants would use in pricing the asset or liability, including assumptions about the risk inherent in a

particular valuation technique, the effect of a restriction on the sale or use of an asset, and the risk of nonperformance.

The Company groups its assets and liabilities measured at fair value into a three-level hierarchy, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. When the valuation assumptions used to measure the fair value of the asset or liability are categorized within different levels of the fair value hierarchy, the asset or liability is categorized in its entirety within the lowest level of the hierarchy. These levels are:

- 22 -

Level 1 – Valuation is based upon quoted prices for identical instruments traded in active exchange markets, such as the New York Stock Exchange. Level 1 includes U.S. Treasury, equity securities and federal agency securities, which are traded by dealers or brokers in active markets. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Level 2 – Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market. Level 2 includes mortgage-backed securities, corporate securities, asset-backed securities, municipal bonds and residential collateralized mortgage obligations.

Level 3 – Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Company’s estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of option pricing models, discounted cash flow models and similar techniques.

When the Company changes its valuation assumptions for measuring financial assets and financial liabilities at fair value, either due to changes in current market conditions or other factors, it may need to transfer those assets or liabilities to another level in the hierarchy based on the new assumptions used. The Company recognizes these transfers at the end of the reporting period that the transfers occur. For the nine months ended September 30, 2012 and 2011, there were no transfers in or out of levels 1, 2 or 3.

Assets Recorded at Fair Value on a Recurring Basis

The table below presents assets measured at fair value on a recurring basis.

	Fair Value	Quoted Prices	Significant	Significant
		in Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
(In thousands)				
Investment securities available for sale:				
At September 30, 2012	\$ 738,462	\$ 92,129	\$ 646,333	\$ -
At December 31, 2011	\$ 638,753	\$ 125,101	\$ 513,652	\$ -

Assets Recorded at Fair Value on a Nonrecurring Basis

The Company may be required, from time to time, to measure certain assets at fair value on a nonrecurring basis in accordance with GAAP. These adjustments to fair value usually result from application of lower-of-cost-or-market accounting of individual assets. For assets measured at fair value on a nonrecurring basis that were recorded in the balance sheet at September 30, 2012 and December 31, 2011, the following table provides the level of valuation assumptions used to determine each adjustment and the carrying value of the related assets at period end.

	Fair Value	At September 30, 2012			Total Losses
		Level 1	Level 2	Level 3	
(In thousands)					
Non-covered other real estate owned	\$ 7,970	\$-	\$ 7,970	\$-	\$ (2,167)

Edgar Filing: WESTAMERICA BANCORPORATION - Form 10-Q

Covered other real estate owned	7,999	-	7,999	-	(102)
Originated impaired loans	5,021	-	2,021	3,000	(1,985)
Purchased covered impaired loans	8,190	-	3,730	4,460	(180)
Total assets measured at fair value on a nonrecurring basis	\$29,180	\$-	\$21,720	\$7,460	\$ (4,434)

At December 31, 2011

	Fair Value	Level 1	Level 2	Level 3	Total Losses
					(In thousands)
Non-covered other real estate owned	\$6,350	\$-	\$6,350	\$-	\$ (1,000)
Covered other real estate owned	10,695	-	10,695	-	(578)
Originated impaired loans	2,502	-	2,502	-	-
Total assets measured at fair value on a nonrecurring basis	\$19,547	\$-	\$19,547	\$-	\$ (1,578)

- 23 -

Level 2 – Valuation is based upon independent market prices or appraised value of the collateral, less 10% for selling costs, generally. Level 2 includes other real estate owned that has been measured at fair value subsequent to its initial classification as foreclosed assets and impaired loans collateralized by real property where a specific reserve has been established or a charge-off has been recorded.

Level 3 – Valuation is based upon estimated liquidation values of loan collateral, which includes business assets such as accounts receivable, inventory and fixed assets, ranging from 50 to 55 percent. The value of level 3 assets can also include a component of real estate, which is valued as described for level 2 inputs, when collateral for the impaired loan includes both business assets and real estate. Level 3 includes impaired loans where a specific reserve has been established or a charge-off has been recorded.

Disclosures about Fair Value of Financial Instruments

The following section describes the valuation methodologies used by the Company for estimating fair value of financial instruments not recorded at fair value in the balance sheet.

Cash and Due from Banks Cash and due from banks represent U.S. dollar denominated coin and currency, deposits at the Federal Reserve Bank and correspondent banks, and amounts being settled with other banks to complete the processing of customers' daily transactions. Collectively, the Federal Reserve Bank and financial institutions operate a market in which cash and due from banks transactions are processed continuously in significant daily volumes honoring the face value of the U.S. dollar.

Investment Securities Held to Maturity The fair values of investment securities were estimated using quoted prices as described above for Level 1 and Level 2 valuation.

Loans Loans were separated into two groups for valuation. Variable rate loans, except for those described below, which reprice frequently with changes in market rates were valued using historical cost. Fixed rate loans and variable rate loans that have reached their minimum contractual interest rates were valued by discounting the future cash flows expected to be received from the loans using current interest rates charged on loans with similar characteristics. Additionally, the allowance for loan losses of \$30,966 thousand at September 30, 2012 and \$32,597 thousand at December 31, 2011 and the fair value discount due to credit default risk associated with purchased covered and purchased non-covered loans of \$27,241 thousand and \$5,495 thousand, respectively at September 30, 2012 and purchased covered and purchased non-covered loans of \$46,282 thousand and \$10,211 thousand, respectively at December 31, 2011 were applied against the estimated fair values to recognize estimated future defaults of contractual cash flows. The Company does not consider these values to be a liquidation price for the loans.

FDIC Receivable The fair value of the FDIC receivable recorded in Other Assets was estimated by discounting estimated future cash flows using current market rates for financial instruments with similar characteristics.

Deposit Liabilities Deposits with no stated maturity such as checking accounts, savings accounts and money market accounts can be readily converted to cash or used to settle transactions at face value through the broad financial system operated by the Federal Reserve Bank and financial institutions. The fair value of deposits with no stated maturity is equal to the amount payable on demand. The fair values of time deposits were estimated by discounting estimated future contractual cash flows using current market rates for financial instruments with similar characteristics.

Short-Term Borrowed Funds The carrying amount of securities sold under agreement to repurchase and other short-term borrowed funds approximate fair value due to the relatively short period of time between their origination and their expected realization.

Federal Home Loan Bank Advances The fair values of FHLB advances were estimated by using redemption amounts quoted by the Federal Home Loan Bank of San Francisco.

Term Repurchase Agreement The fair value of the term repurchase agreement was estimated by using interpolated yields for financial instruments with similar characteristics.

Debt Financing The fair value of debt financing was estimated by using interpolated yields for financial instruments with similar characteristics.

The table below is a summary of fair value estimates for financial instruments and the level of the fair value hierarchy within which the fair value measurements are categorized, excluding financial instruments recorded at fair value on a recurring basis. The values assigned do not necessarily represent amounts which ultimately may be realized. In addition, these values do not give effect to discounts to fair value which may occur when financial instruments are sold in larger quantities. The carrying amounts in the following table are recorded in the balance sheet under the indicated captions.

Edgar Filing: WESTAMERICA BANCORPORATION - Form 10-Q

The Company has not included assets and liabilities that are not financial instruments, such as goodwill, long-term relationships with deposit, merchant processing and trust customers, other purchased intangibles, premises and equipment, deferred taxes and other assets and liabilities. The total estimated fair values do not represent, and should not be construed to represent, the underlying value of the Company.

	At September 30, 2012

Federal Home Loan Bank advances	26,023	26,532
Term repurchase agreement	10,000	10,242
Debt financing	15,000	15,222

The majority of the Company's standby letters of credit and other commitments to extend credit carry current market interest rates if converted to loans. No premium or discount was ascribed to these commitments because virtually all funding would be at current market rates.

Note 9: Borrowings and Debt Financing

Short-term borrowed funds of \$55,630 thousand represent securities sold under agreements to repurchase the securities. As the Company is obligated to repurchase the securities, the transfer of the securities is accounted for as a secured borrowing rather than a sale. The carrying amount of the securities approximates \$56,743 thousand. The short-term borrowed funds mature on an overnight basis.

Federal Home Loan Bank (“FHLB”) advances with carrying value of \$25,855 thousand are secured by residential real estate loans, the amount of such loans approximates \$35,638 thousand. The FHLB advances are due in full upon their maturity dates: \$5,000 thousand mature in December 2013 and \$20,000 thousand mature in January 2015. The FHLB advances may be paid off prior to such maturity dates subject to prepayment fees.

The \$10,000 thousand term repurchase agreement represents securities sold under an agreement to repurchase the securities. As the Company is obligated to repurchase the securities, the transfer of the securities is accounted for as a secured borrowing rather than a sale. The carrying amount of the related securities is approximately \$10,500 thousand. The term repurchase agreement matures in full in August 2014.

- 25 -

Debt financing of \$15,000 thousand is a note issued by Westamerica Bancorporation on October 31, 2003 which matures October 31, 2013. Interest of 5.31% per annum is payable semiannually on April 30 and October 31, with principal due at maturity.

Note 10: Earnings Per Common Share

The table below shows earnings per common share and diluted earnings per common share. Basic earnings per common share are computed by dividing net income applicable to common equity by the average number of common shares outstanding during the period. Diluted earnings per common share are computed by dividing net income applicable to common equity by the average number of common shares outstanding during the period plus the impact of common stock equivalents.

Add exercise of options reduced by the number of shares that could have been purchased with the proceeds of such exercise	52	65	52	140
Weighted average number of common shares outstanding - diluted (denominator)	27,565	28,498	27,821	28,879
Diluted earnings per common share	\$0.73	\$0.79	\$2.23	\$2.29

For the three months ended September 30, 2012 and 2011, options to purchase 1,995 thousand and 1,940 thousand shares of common stock, respectively, were outstanding but not included in the computation of diluted net income per share because the option exercise price exceeded the fair value of the stock such that their inclusion would have had an anti-dilutive effect.

For the nine months ended September 30, 2012 and 2011, options to purchase 2,021 thousand and 1,452 thousand shares of common stock, respectively, were outstanding but not included in the computation of diluted net income per share because their inclusion would have had an anti-dilutive effect.

The above financial summary has been derived from the Company's unaudited consolidated financial statements. This information should be read in conjunction with those statements, notes and the other information included elsewhere herein. Percentages under the heading "Financial Ratios" are annualized with the exception of the efficiency ratio.

1 Yields on securities and certain loans have been adjusted upward to a "fully taxable equivalent" ("FTE") basis, which is a non-GAAP financial measure, in order to reflect the effect of income which is exempt from federal income taxation at the current statutory tax rate.

2 The efficiency ratio is defined as noninterest expense divided by total revenue (net interest income on an FTE basis, which is a non-GAAP financial measure, and noninterest income).

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Westamerica Bancorporation and subsidiaries (the "Company") reported net income of \$20.0 million or \$0.73 diluted earnings per common share for the third quarter 2012 and net income of \$62.0 million or \$2.23 diluted earnings per common share for the nine months ended September 30, 2012. The nine months ended September 30, 2012 included a \$1.3 million loss realized from the sale of a collateralized mortgage obligation bond which reduced net income by \$750 thousand and a tax refund from an amended tax return which increased net income by \$968 thousand. These results compare to net income of \$22.4 million or \$0.79 diluted earnings per common share for the third quarter 2011 and net income of \$66.1 million or \$2.29 diluted earnings per common share for the nine months ended September 30, 2011. The nine months ended September 30, 2011 included \$2.1 million in litigation settlement accruals which decreased net income by \$1.2 million and expenses related to the integration of the former Sonoma Valley Bank ("Sonoma") of \$393 thousand after tax.

Net Income

Following is a summary of the components of net income for the periods indicated:

	For the Three Months		For the Nine Months	
	Ended September 30,			
	2012	2011	2012	2011
(In thousands, except per share data)				
Net interest income (FTE)	\$48,712	\$54,675	\$150,743	\$165,506
Provision for loan losses	(2,800)	(2,800)	(8,400)	(8,400)
Noninterest income	14,626	15,205	42,828	45,239
Noninterest expense	(29,269)	(31,383)	(88,651)	(97,014)
Income before taxes (FTE)	31,269	35,697	96,520	105,331
Income tax provision (FTE)	(11,247)	(13,265)	(34,529)	(39,248)
Net income	\$20,022	\$22,432	\$61,991	\$66,083
Average diluted common shares	27,565	28,498	27,821	28,879
Diluted earnings per common share	\$0.73	\$0.79	\$2.23	\$2.29
Average total assets	\$4,892,088	\$4,920,482	\$4,965,611	\$4,929,701
Net income applicable to common equity to average total assets (annualized)	1.63	% 1.81	% 1.67	% 1.79
Net income applicable to common equity to average common stockholders' equity (annualized)	14.68	% 16.44	% 15.23	% 16.24

Net income for the third quarter of 2012 was \$2.4 million or 10.7% less than the third quarter of 2011, the net result of declines in net interest income (fully taxable equivalent or "FTE") and lower noninterest income, partially offset by decreases in noninterest expense and income tax provision (FTE). A \$6.0 million or 10.9% decrease in net interest income (FTE) was mostly attributed to lower average balances of loans and lower yields on interest earning assets, partially offset by higher average balances of investments, lower average balances of interest-bearing liabilities and lower rates paid on interest-bearing deposits. The provision for loan losses remained the same, reflecting Management's evaluation of losses inherent in the loan portfolio not covered by loss-sharing agreements with the Federal Deposit Insurance Corporation ("FDIC") and purchased loan credit-default discounts.

Comparing the first nine months of 2012 to the first nine months of 2011, net income decreased \$4.1 million or 6.2%, primarily due to lower net interest income (FTE) and a \$1.3 million loss on sale of securities, partially offset by decreases in noninterest expense and income tax provision (FTE). The lower net interest income (FTE) was primarily

caused by a lower average volume of loans and lower yields on interest earning assets, partially offset by higher average balances of investments, lower average balances of interest-bearing liabilities and lower rates on interest-bearing liabilities. The provision for loan losses remained the same, reflecting Management's evaluation of losses inherent in the loan portfolio not covered by loss-sharing agreements with the FDIC and purchased loan credit-default discounts. Noninterest expense declined \$8.4 million primarily due to a \$2.1 million settlement accrual in the second quarter 2011 and reduced costs related to managing nonperforming assets.

- 28 -

Net Interest Income

Following is a summary of the components of net interest income for the periods indicated:

	For the Three Months		For the Nine Months	
	Ended September 30,		2011	
	2012	2011	2012	2011
	(In thousands)			
Interest and fee income	\$45,272	\$51,976	\$140,470	\$157,559
Interest expense	(1,382)	(2,071)	(4,413)	(6,527)
FTE adjustment	4,822	4,770	14,686	14,474
Net interest income (FTE)	\$48,712	\$54,675	\$150,743	\$165,506
Average earning assets	\$4,160,953	\$4,093,020	\$4,116,471	\$4,133,898
Net interest margin (FTE) (annualized)	4.67 %	5.32 %	4.89 %	5.35 %

Net interest income (FTE) decreased during the third quarter of 2012 by \$6.0 million or 10.9% from the same period in 2011 to \$48.7 million, mainly due to lower average balances of loans (down \$428 million) and lower yields on interest-earning assets (down 0.72%), partially offset by higher average balances of investments (up \$496 million), lower average balances of interest-bearing liabilities (down \$139 million) and lower rates paid on interest-bearing liabilities (down 0.08%).

Comparing the first nine months of 2012 with the first nine months of 2011, net interest income (FTE) decreased \$14.8 million or 8.9%, primarily due to a lower average volume of loans (down \$418 million) and lower yields on interest-earning assets (down 0.53%), partially offset by higher average balances of investments (up \$401 million) and lower rates paid on interest-bearing liabilities (down 0.10%).

Yields on interest-earning assets have declined due to relatively low interest rates prevailing in the market. Economic conditions, competitive pricing and underwriting, and deleveraging by businesses and individuals have reduced loan volumes, placing greater reliance on lower-yielding investment securities. Rates on interest-bearing deposits and borrowings have declined to offset some of the decline in asset yields.

In Management's judgment, economic conditions and competitive pricing create a cautious view toward commercial lending, and economic pressure on consumers has reduced demand for automobile and other consumer loans. As a result, the Company has not taken an aggressive posture relative to loan portfolio growth.

At September 30, 2012, purchased FDIC covered loans represented 19 percent of the Company's loan portfolio. Under the terms of the FDIC loss-sharing agreements, the FDIC is obligated to reimburse the Bank 80 percent of loan interest income foregone on covered loans. Such reimbursements are limited to the lesser of 90 days contractual interest or actual unpaid contractual interest at the time a principal loss is recognized with respect to the underlying loan.

Interest and Fee Income

Interest and fee income (FTE) for the third quarter of 2012 decreased \$6.7 million or 11.7% from the same period in 2011. The decrease was caused by lower average balances of loans and lower yields on interest earning assets, partially offset by higher average balances of investments.

The total average balances of loans declined due to decreases in the average balances of commercial real estate loans (down \$195 million), taxable commercial loans (down \$108 million), residential real estate loans (down \$49 million), consumer loans (down \$30 million), construction loans (down \$25 million) and tax-exempt commercial loans (down \$21 million). The average investment portfolio increased largely due to higher average balances of residential collateralized mortgage obligations (up \$293 million), municipal securities (up \$109 million) and corporate securities (up \$123 million), partially offset by a \$52 million decrease in average balances of securities of U.S. government sponsored entities.

The average yield on the Company's earning assets decreased from 5.52% in the third quarter of 2011 to 4.80% in the corresponding period of 2012. The composite yield on loans declined 0.30% to 5.70%. Lower yields on consumer loans (down 0.77%), taxable commercial loans (down 0.74%), construction loans (down 3.25%) and residential real estate loans (down 0.35%) were offset by higher yields on commercial real estate loans (up 0.29%). Nonperforming loans are included in average loan volumes used to compute loan yields; fluctuations in nonaccrual loan volumes impact loan yields. The yield on commercial real estate loans in the third quarter 2012 was elevated due to interest received on nonaccrual loans and discount accretion on purchased loans. The investment yields in general declined as newly purchased securities have yields at current market rates which are lower than yields on older dated securities. The investment portfolio yield decreased 0.86% to 3.72% primarily due to lower yields on municipal securities (down 0.57%), residential collateralized mortgage obligations (down 1.06%) and residential mortgage backed securities (down 0.99%).

Comparing the first nine months of 2012 with the first nine months of 2011, interest and fee income (FTE) was down \$16.9 million or 9.8%. The decrease resulted from a lower average volume of loans and lower yields on interest-earning assets, partially offset by higher average balances of investments. Average interest earning assets decreased \$17 million or 0.4% in the first nine months of 2012 compared with the first nine months of 2011 due to a \$418 million decrease in average loans and a \$401 million increase in average investments. The decrease in the average balance of the loan portfolio was attributable to decreases in average balances of commercial real estate loans (down \$177 million), taxable commercial loans (down \$122 million), construction loans (down \$35 million), residential real estate loans (down \$47 million), tax-exempt commercial loans (down \$18 million) and consumer loans (down \$19 million). The average investment portfolio increased mostly due to higher average balances of municipal securities (up \$114 million), residential collateralized mortgage obligations (up \$243 million) and corporate securities (up \$80 million), partially offset by a \$60 million decline in U.S. government sponsored entities.

The average yield on earning assets for the first nine months of 2012 was 5.03% compared with 5.56% in the first nine months of 2011. The loan portfolio yield for the first nine months of 2012 compared with the first nine months of 2011 was lower by 0.18% mostly due to lower yields on consumer loans (down 0.75%), residential real estate loans (down 0.35%) and tax-exempt commercial loans (down 0.35%), taxable commercial loans (down 0.11%) and construction loans (down 0.36%), partially offset by higher yields on commercial real estate loans (up 0.24%). Nonperforming loans are included in average loan volumes used to compute loan yields; fluctuations in nonaccrual loan volumes impact loan yields. The yield on commercial real estate loans in the first nine months of 2011 was elevated due to interest received on nonaccrual loans and discount accretion on purchased loans. The investment portfolio yield decreased 0.69% to 3.96% primarily due to lower yields on municipal securities (down 0.56%), residential collateralized mortgage obligations (down 1.34%), residential mortgage backed securities (down 0.66%) and securities of U.S. government sponsored entities (down 0.25%), partially offset by a 0.12% increase in yields on corporate securities which contain floating interest rate structures.

Interest Expense

Interest expense in the third quarter of 2012 decreased \$689 thousand or 33.3% compared with the same period in 2011 due to lower rates paid on interest-bearing deposits and a shift from higher costing deposits and financing to lower cost checking and savings accounts. Checking and savings deposits accounted for 83.5% of total deposits in the third quarter 2012 compared with 79.9% in the same quarter of 2011. Interest-bearing liabilities declined due to lower average balances of time deposits (down \$145 million), FHLB advances (down \$9 million), long-term debt (down \$6 million), and preferred money market savings (down \$52 million), partially offset by higher average balances of money market checking accounts (up \$49 million), money market savings (up \$26 million), regular savings (up \$32 million) and term repurchase agreement (up \$4 million). Lower average balances of long-term debt were attributable to the redemption of \$10 million of subordinated debt in August 2011. The average rate paid on interest-bearing liabilities decreased from 0.29% in the third quarter of 2011 to 0.21% in the same quarter of 2012. Rates on interest-bearing deposits decreased 0.09% to 0.16% primarily due to decreases in rates paid on time deposits less than \$100 thousand (down 0.18%), time deposits \$100 thousand or more (down 0.06%), preferred money market savings (down 0.11%), money market checking (down 0.07%), money market savings (down 0.05%) and regular savings (down 0.05%).

Comparing the first nine months of 2012 with the first nine months of 2011, interest expense declined \$2.1 million or 32.4%, due to lower average balances of interest-bearing liabilities and lower rates paid on interest-bearing deposits. Average interest-bearing deposits during the first nine months of 2012 fell \$39 million compared with the same period in 2011 primarily due to declines in the average balances of time deposits less than \$100 thousand (down \$49 million), time deposits \$100 thousand or more (down \$60 million) and preferred money market savings (down \$35 million), partially offset by increases in the average balance of money market checking accounts (up \$44 million), money market savings (up \$34 million) and regular savings (up \$27 million). Average balances of debt financing declined \$9 million while average balances of term repurchase agreement increased \$8 million. Rates paid on interest-bearing deposits averaged 0.17% during the first nine months of 2012 compared with 0.27% for the first nine months of 2011 mainly due to lower rates on money market savings (down 0.08%), preferred money market savings

Edgar Filing: WESTAMERICA BANCORPORATION - Form 10-Q

(down 0.12%), regular savings (down 0.05%), time deposits less than \$100 thousand (down 0.08%) and time deposits \$100 thousand and more (down 0.12%).

- 30 -

Net Interest Margin (FTE)

The following summarizes the components of the Company's net interest margin for the periods indicated:

	For the Three Months		For the Nine Months			
			Ended September 30,			
	2012	2011	2012	2011	2012	2011
Yield on earning assets (FTE)	4.80	% 5.52	% 5.03	% 5.56		
Rate paid on interest-bearing liabilities	0.21	% 0.29	% 0.21	% 0.31		
Net interest spread (FTE)	4.59	% 5.23	% 4.82	% 5.25		
Impact of all other net noninterest bearing funds	0.08	% 0.09	% 0.07	% 0.10		
Net interest margin (FTE)	4.67	% 5.32	% 4.89	% 5.35		

During the third quarter of 2012, the net interest margin (FTE) decreased 0.65% compared with the same period in 2011. Lower yields on earning assets were partially offset by lower rates paid on interest-bearing liabilities and resulted in a 0.64% decrease in net interest spread (FTE). The 0.08% net interest margin contribution of noninterest-bearing demand deposits resulted in the net interest margin (FTE) of 4.67%. During the first nine months of 2012, the net interest margin (FTE) decreased 0.46% compared with the first nine months of 2011. The net interest spread (FTE) in the first nine months of 2012 was 4.82% compared with 5.25% in the first nine months of 2011, the net result of a 0.53% decrease in earning asset yields, partially offset by lower cost of interest-bearing liabilities (down 0.10%).

Summary of Average Balances, Yields/Rates and Interest Differential

The following tables present, for the periods indicated, information regarding the Company's consolidated average assets, liabilities and shareholders' equity, the amount of interest income earned from average earning assets and the resulting annualized yields, and the amount of interest expense incurred on average interest-bearing liabilities and the resulting annualized rates. Average loan balances include nonperforming loans. Interest income includes proceeds from loans on nonaccrual status only to the extent cash payments have been received and applied as interest income and accretion of purchased loan discounts. Yields on securities and certain loans have been adjusted upward to reflect the effect of income which is exempt from federal income taxation at the current statutory tax rate (FTE).

	For the Three Months Ended September 30, 2012			
	Average Balance	Interest Income/ Expense (In thousands)	Yields/ Rates	
Assets				
Investment securities:				
Available for sale

Other assets	731,135			
Total assets	\$4,892,088			
Liabilities and shareholders' equity				
Deposits:				
Noninterest bearing demand	\$1,605,362	\$ -	-	%
Savings and interest-bearing transaction	1,882,110	301	0.06	%
Time less than \$100,000	258,631	359	0.55	%
Time \$100,000 or more	430,239	360	0.33	%
Total interest-bearing deposits	2,570,980	1,020	0.16	%
Short-term borrowed funds	61,794	15	0.10	%
Term repurchase agreement	10,000	25	0.97	%
Federal Home Loan Bank advances	25,889	122	1.87	%
Debt financing	15,000	200	5.35	%
Total interest-bearing liabilities	2,683,663	\$ 1,382	0.21	%
Other liabilities	60,355			

Shareholders' equity	542,708		
Total liabilities and shareholders' equity	\$4,892,088		
Net interest spread (1) (2)			4.59 %
Net interest income and interest margin (1) (3)	\$ 48,712		4.67 %

(1) Interest and rates calculated on a fully taxable equivalent basis using the current statutory federal tax rate.

(2) Net interest spread represents the average yield earned on earning assets minus the average rate incurred on interest-bearing liabilities.

(3) Net interest margin is computed by calculating the difference between interest income and expense (annualized), divided by the average balance of earning assets.

Summary of Changes in Interest Income and Expense due to Changes in Average Asset & Liability Balances and Yields Earned & Rates Paid

The following tables set forth a summary of the changes in interest income and interest expense due to changes in average asset and liability balances (volume) and changes in average interest rates for the periods indicated. Changes not solely attributable to volume or rates have been allocated in proportion to the respective volume and rate components.

Provision for Loan Losses

The Company manages credit costs by consistently enforcing conservative underwriting and administration procedures and aggressively pursuing collection efforts with debtors experiencing financial difficulties. The provision for loan losses reflects Management's assessment of credit risk in the loan portfolio during each of the periods presented.

The Company provided \$2.8 million and \$8.4 million for loan losses in the third quarter and first nine months of 2012, respectively, unchanged from comparable periods in 2011. The Company recorded purchased County Bank ("County") and Sonoma loans at estimated fair value upon the acquisition dates, February 6, 2009 and August 20, 2010, respectively. Such estimated fair values were recognized for individual loans, although small balance homogenous loans were pooled for valuation purposes. The valuation discounts recorded for purchased loans included Management's assessment of the risk of principal loss under economic and borrower conditions prevailing on the dates of purchase. The purchased County loans are "covered" by loss-sharing agreements the Company entered with the FDIC which mitigates losses during the term of the agreements. Any deterioration in estimated value related to principal loss subsequent to the acquisition dates requires additional loss recognition through a provision for loan losses. Of the total recorded provision, the Company provided \$1.6 million and \$2.5 million for purchased loans in the third quarter and first nine months of 2012, respectively, and \$428 thousand for the third quarter and first nine months of 2011. No assurance can be given future provisions for loan losses related to purchased loans will not be necessary. For further information regarding credit risk, the FDIC loss-sharing agreements, net credit losses and the allowance for loan losses, see the "Loan Portfolio Credit Risk" and "Allowance for Credit Losses" sections of this report.

Noninterest Income

The following table summarizes the components of noninterest income for the periods indicated.

	For the Three Months Ended		For the Nine Months Ended	
	2012	2011	September 30, 2012	2011
	(In thousands)			
Service charges on deposit accounts	\$6,847	\$7,430	\$ 20,969	\$ 22,529
Merchant processing services	2,411	2,358	7,333	6,921
Debit card fees	1,308	1,269	3,816	3,752
ATM processing fees	782	980	2,648	2,911
Other service fees	729	743	2,122	2,155
Trust fees	540	432	1,526	1,407
Check sale income	196	207	615	640
Safe deposit fees	196	188	586	525
Financial services commissions	175	111	540	257
Loss on sale of securities	-	-	(1,287)	-
Other noninterest income	1,442	1,487	3,960	4,142
Total	\$14,626	\$15,205	\$ 42,828	\$ 45,239

Noninterest income for the third quarter of 2012 declined by \$579 thousand from the same period in 2011. Service charges on deposits decreased \$583 thousand or 7.8% due to declines in fees charged on overdrawn and insufficient funds accounts (down \$576 thousand). ATM processing fees decreased \$198 thousand or 20.2% primarily due to a lower transaction volume at non-Westamerica Bank terminals.

In the first nine months of 2012, noninterest income decreased \$2.4 million compared with the first nine months of 2011. The decline in the first nine months of 2012 noninterest income is primarily due to a \$1.3 million loss realized from the sale of a collateralized mortgage obligation bond whose underlying support tranches began experiencing escalating losses, which began deteriorating the creditworthiness of the bond. Service charges on deposits decreased \$1.6 million or 6.9% due to declines in fees charged on overdrawn and insufficient funds accounts (down \$1.9 million), partially offset by higher deficit fees charged on analyzed accounts (up \$259 thousand) and higher fees charged on checking accounts (up \$130 thousand). ATM processing fees decreased \$263 thousand or 9.0% primarily due to a lower transaction volume at non-Westamerica Bank terminals. Merchant processing services income increased \$412 thousand or 6.0% mainly due to increased transactions. Financial services commissions increased \$283 thousand from improved sales activities.

Noninterest Expense

The following table summarizes the components of noninterest expense for the periods indicated.

	For the Three Months Ended		For the Nine Months Ended	
	2012	2011	September 30, 2012	2011
	(In thousands)			
Salaries and related benefits	\$14,294	\$14,401	\$ 43,833	\$ 44,388
Occupancy	3,901	4,010	11,609	12,085
Outsourced data processing services	2,156	2,165	6,318	6,743
Amortization of identifiable intangibles	1,336	1,477	4,076	4,505
Furniture and equipment	991	943	2,883	2,915
Professional fees	786	1,185	2,455	3,489
Courier service	772	840	2,350	2,535
Other real estate owned	679	700	912	1,835
Telephone	429	422	1,224	1,285
Loan expense	400	578	1,417	1,515
Postage	308	353	1,024	1,083
Stationery and supplies	274	272	764	919
Advertising/public relations	123	156	426	488
Operational losses	110	226	433	815
Settlements	-	-	-	2,100
Other noninterest expense	2,710	3,655	8,927	10,314
Total	\$29,269	\$31,383	\$ 88,651	\$ 97,014

Noninterest expense decreased \$2.1 million or 6.7% in the third quarter 2012 compared with the same period in 2011. Professional fees declined \$399 thousand or 33.7% due to lower legal fees. Loan expense decreased \$178 thousand or 30.8% primarily due to lower foreclosure expenses and appraisal fees. Operational losses declined \$116 thousand. Occupancy expense declined \$109 thousand mostly due to lower lease rates on bank premises. Salaries and related benefits decreased \$107 thousand or 0.7% primarily due to lower salaries resulting from employee attrition, partly offset by higher employee benefit costs.

In the first nine months of 2012, noninterest expense decreased \$8.4 million or 8.6% compared with the first nine months of 2011 mainly due to a \$2.1 million settlement accrual in 2011 and lower costs related to managing nonperforming assets. Additionally, the first quarter 2011 included \$679 thousand in expenses related to pre-integration costs for the acquired Sonoma, primarily outsourced data processing and personnel costs. Sonoma operations were fully integrated in February 2011. Professional fees declined \$1.0 million or 29.6% largely due to lower legal fees. Other real estate owned expense decreased \$923 thousand or 50.3% mainly due to higher gains on sale of foreclosed assets and lower maintenance costs, partially offset by higher writedowns. Salaries and related benefits decreased \$555 thousand or 1.3% primarily due to lower salaries resulting from employee attrition, partially offset by higher employee benefit costs. Occupancy expense declined \$476 thousand or 3.9% mostly due to lower lease rates on bank premises and lower maintenance expense. Operational losses declined \$382 thousand.

Provision for Income Tax

During the third quarter of 2012, the Company recorded income tax provision (FTE) of \$11.2 million compared with \$13.3 million for the third quarter of 2011. The current quarter provision represents an effective tax rate (FTE) of

36.0%, compared with 37.2% for the third quarter of 2011. The decline in the tax rate is attributable to a higher proportion of pre-tax income represented by tax exempt elements, such as interest earned on municipal loans and investment securities.

The income tax provision (FTE) was \$34.5 million for the first nine months of 2012 compared with \$39.3 million for the corresponding period of 2011. The first nine months of 2012 effective tax rate was 35.8% compared to 37.3% for the same period of 2011. The lower tax rate in the first nine months of 2012 was attributable to a \$968 thousand tax refund from an amended 2006 federal income tax return. This claim for tax refund was processed by the Internal Revenue Service in conjunction with the conclusion of an examination of the Company's 2008 federal income tax return. In addition, the decline in the tax rate is attributable to a higher proportion of pre-tax income represented by tax exempt elements, such as interest earned on municipal loans and investment securities.

Loan Portfolio Credit Risk

The risk that loan customers do not repay loans extended by the Bank is the most significant risk to the Company. The Company closely monitors the markets in which it conducts its lending operations and follows a strategy to control exposure to loans with high credit risk. The Bank's organization structure separates the functions of business development and loan underwriting; Management believes this segregation of duties avoids inherent conflicts of combining business development and loan approval functions. In measuring and managing credit risk, the Company adheres to the following practices.

- The Bank maintains a Loan Review Department which reports directly to the Board of Directors. The Loan Review Department performs independent evaluations of loans and assigns credit risk grades to evaluated loans using grading standards employed by bank regulatory agencies. Those loans judged to carry higher risk attributes are referred to as "classified loans." Classified loans receive elevated management attention to maximize collection.
- The Bank maintains two loan administration offices whose sole responsibility is to manage and collect classified loans.

Classified loans with higher levels of credit risk are further designated as "nonaccrual loans." Management places classified loans on nonaccrual status when full collection of contractual interest and principal payments is in doubt. Interest previously accrued on loans placed on nonaccrual status is charged against interest income, net of estimated FDIC reimbursements under loss-sharing agreements. The Company does not accrue interest income on nonaccrual loans. Interest payments received on nonaccrual loans are applied to reduce the carrying amount of the loan unless the carrying amount is well secured by loan collateral or covered by FDIC loss-sharing agreements. "Nonperforming assets" include nonaccrual loans, loans 90 or more days past due and still accruing, and repossessed loan collateral.

The Bank's commercial loan customers are primarily small businesses and professionals. As a result, average loan balances are relatively small, providing risk diversification within the overall loan portfolio. At September 30, 2012, the Bank's nonaccrual loans reflected this diversification: nonaccrual originated loans with a carrying value totaling \$13 million comprised twenty-six borrowers, nonaccrual purchased non-covered loans with a carrying value totaling \$10 million comprised thirteen borrowers, and nonaccrual purchased covered loans with a carrying value totaling \$21 million comprised thirty borrowers.

Management believes the overall credit quality of the loan portfolio is reasonably stable; however, classified and nonperforming assets could fluctuate from period to period. The performance of any individual loan can be affected by external factors such as the interest rate environment, economic conditions, and collateral values or factors particular to the borrower. No assurance can be given that additional increases in nonaccrual and delinquent loans will not occur in the future.

On February 6, 2009, the Bank purchased loans and repossessed loan collateral of the former County Bank from the FDIC. This purchase transaction included loss-sharing agreements with the FDIC wherein the FDIC and the Bank share losses on the purchased assets. The loss-sharing agreements significantly reduce the credit risk of these purchased assets. In evaluating credit risk, Management separates the Bank's total loan portfolio between those loans qualifying under the FDIC loss-sharing agreements (referred to as "purchased covered loans") and loans not qualifying under the FDIC loss-sharing agreements (referred to as "purchased non-covered loans" and "originated loans"). At September 30, 2012, purchased covered loans totaled \$418 million, or 19 percent of total loans, originated loans totaled \$1.7 billion, or 77 percent and purchased non-covered loans totaled \$83 million, or 4 percent of total loans.

Purchased covered loans and repossessed loan collateral qualify under loss-sharing agreements with the FDIC. Under the terms of the loss-sharing agreements, the FDIC absorbs 80 percent of losses and shares in 80 percent of loss recoveries on the first \$269 million in losses on purchased covered assets ("First Tier"), and absorbs 95 percent of losses

and shares in 95 percent of loss recoveries if losses on purchased covered assets exceed \$269 million (“Second Tier”). The loss-sharing agreement on covered residential real estate assets expires February 6, 2019 and the loss-sharing agreement on covered non-residential assets expires February 6, 2014 as to losses and February 6, 2017 as to loss recoveries.

The purchased covered assets are primarily located in the California Central Valley, including Merced County. This geographic area currently has some of the weakest economic conditions within California and has experienced significant declines in real estate values. Management expects higher loss rates on purchased covered assets than on originated assets.

The Bank recorded purchased covered assets at estimated fair value on the February 6, 2009 acquisition date. The credit risk discount ascribed to the \$1.2 billion acquired loan and repossessed loan collateral portfolio was \$161 million representing estimated losses inherent in the assets at the acquisition date. The Bank also recorded a related receivable from the FDIC in the amount of \$129 million representing estimated FDIC reimbursements under the loss-sharing agreements.

The maximum risk to future earnings if First Tier losses exceed Management's estimated \$161 million in recognized losses under the FDIC loss-sharing agreements is estimated to be \$12 million as follows (dollars in thousands):

First Tier Loss Coverage	\$ 269,000
Less: Recognized credit risk discount	161,203
Exposure to under-estimated risk within First Tier	107,797
Bank loss-sharing percentage	20 percent
First Tier risk to Bank, pre-tax	\$ 21,559
First Tier risk to Bank, after-tax	\$ 12,494

Management has judged the likelihood of experiencing losses of a magnitude to trigger Second Tier FDIC reimbursement as remote. The Bank's maximum after-tax exposure to Second Tier losses is \$9 million as of September 30, 2012, which would be realized only if all purchased covered assets at September 30, 2012 generated no future cash flows.

Purchased covered assets have declined since the acquisition date, and losses have been primarily offset against the estimated credit risk discount, although some losses exceeding the purchase date estimated credit risk discount have been provided for and charged-off against the related allowance for credit losses. Purchased covered assets totaled \$431 million at September 30, 2012, net of a credit risk discount of \$27 million, compared to \$554 million at December 31, 2011, net of a credit risk discount of \$46 million. Purchased covered assets are evaluated for risk classification without regard to FDIC indemnification such that Management can identify purchased covered assets with potential payment problems and devote appropriate credit administration practices to maximize collections. Classified purchased covered assets without regard to FDIC indemnification totaled \$130 million and \$168 million at September 30, 2012 and December 31, 2011, respectively. FDIC indemnification limits the Company's loss exposure to covered classified assets.

Allowance for Credit Losses

The Company's allowance for credit losses represents Management's estimate of credit losses inherent in the loan portfolio. In evaluating credit risk for loans, Management measures loss potential of the carrying value of loans. As described above, payments received on nonaccrual loans may be applied against the principal balance of the loans until such time as full collection of the remaining recorded balance is expected. Further, the carrying value of purchased loans includes fair value discounts assigned at the time of purchase under the provisions of FASB ASC 805, Business Combinations, and FASB ASC 310-30, Loans or Debt Securities with Deteriorated Credit Quality. The allowance for credit losses represents Management's estimate of credit losses in excess of these principal reductions.

The Company's allowance for credit losses is maintained at a level considered appropriate to provide for losses that can be estimated based upon specific and general conditions. These include conditions unique to individual borrowers, as well as overall credit loss experience, the amount of past due, nonperforming loans and classified loans, FDIC loss-sharing indemnification, recommendations of regulatory authorities, prevailing economic conditions and other factors. A portion of the allowance is specifically allocated to impaired loans whose full collectability of principal is uncertain. Such allocations are determined by Management based on loan-by-loan analyses. In the first quarter 2012, the Company lowered the dollar threshold for loans evaluated for impairment. The Company evaluates all nonaccrual loans with outstanding principal balances in excess of \$500 thousand for impairment. A second allocation is based in part on quantitative analyses of historical credit loss experience, in which historical originated criticized and classified credit balances are analyzed using a linear regression model to determine standard loss rates for originated loans. The results of this analysis are applied to originated criticized and classified loan balances to allocate the allowance to the

respective segments of the loan portfolio. In addition, originated loans with similar characteristics not usually criticized using regulatory guidelines are analyzed based on the historical loss rates and delinquency trends, grouped by the number of days the payments on these loans are delinquent. Given currently weak economic conditions, Management is applying further analysis to originated consumer installment loans. Current levels of originated consumer installment loan losses are compared to initial allowance allocations and, based on Management's judgment, additional allocations are applied, if needed, to estimate losses. For originated residential real estate loans, Management is comparing ultimate loss rates on foreclosed residential real estate properties and applying such loss rates to nonaccrual originated residential real estate loans. Based on this analysis, Management exercises judgment in allocating additional allowance if deemed appropriate to estimate losses on originated residential real estate loans. Last, allocations are made to originated non-criticized and non-classified commercial and commercial real estate loans based on historical loss rates and other statistical data.

Purchased loans were not underwritten using the Company's credit policies and practices. Thus, the historical loss rates for originated loans are not applied to estimate credit losses for purchased loans. Purchased loans were recorded on the date of purchase at estimated fair value; fair value discounts include a component for estimated credit losses. The Company evaluates all nonaccrual purchased loans with outstanding principal balances in excess of \$500 thousand for impairment; the impaired loan value is compared to the recorded investment in the loan, which has been reduced by the credit default discount estimated on the date of purchase. If Management's impairment analysis determines the impaired loan value is less than the recorded investment in the purchased loan, an allocation of the allowance for credit losses is established, net of estimated FDIC indemnification. For all other purchased loans, Management evaluates historical credit losses on purchased loans, credit default discounts on purchased loans, and other data to evaluate the likelihood of realizing the recorded investment in purchased loans. Management establishes allocations of the allowance for credit losses for any estimated deficiency.

The remainder of the allowance is considered to be unallocated. The unallocated allowance is established to provide for probable losses that have been incurred as of the reporting date but not reflected in the allocated allowance. The unallocated allowance addresses additional qualitative factors consistent with Management's analysis of the level of risks inherent in the loan portfolio, which are related to the risks of the Company's general lending activity. Included in the unallocated allowance is the risk of losses that are attributable to national or local economic or industry trends which have occurred but have not yet been recognized in loan chargeoff history (external factors). The external factors evaluated by the Company include: economic and business conditions, external competitive issues, and other factors. Also included in the unallocated allowance is the risk of losses attributable to general attributes of the Company's loan portfolio and credit administration (internal factors). The internal factors evaluated by the Company include: loan review system, adequacy of lending Management and staff, loan policies and procedures, problem loan trends, concentrations of credit, and other factors. By their nature, these risks are not readily allocable to any specific loan category in a statistically meaningful manner and are difficult to quantify with a specific number. Management assigns a range of estimated risk to the qualitative risk factors described above based on Management's judgment as to the level of risk, and assigns a quantitative risk factor from the range of loss estimates to determine the appropriate level of the unallocated portion of the allowance. Management considers the \$33.7 million allowance for credit losses to be adequate as a reserve against credit losses inherent in the loan portfolio as of September 30, 2012.

See Note 4 to the unaudited consolidated financial statements for additional information related to the loan portfolio and allowance for credit losses.

Asset/Liability and Market Risk Management

Asset/liability management involves the evaluation, monitoring and management of interest rate risk, market risk, liquidity and funding. The fundamental objective of the Company's management of assets and liabilities is to maximize its economic value while maintaining adequate liquidity and a conservative level of interest rate risk.

Interest Rate Risk

Interest rate risk is a significant market risk affecting the Company. Interest rate risk results from many factors. Assets and liabilities may mature or re-price at different times. Assets and liabilities may re-price at the same time but by different amounts. Short-term and long-term market interest rates may change by different amounts. The timing and amount of cash flows of various assets or liabilities may shorten or lengthen as interest rates change. In addition, interest rates may have an impact on loan demand, demand for various deposit products, credit losses, and other sources of earnings such as account analysis fees on commercial deposit accounts and correspondent bank service charges.

The Federal Open Market Committee's October 24, 2012 press release stated "the Committee also decided today to keep the target range for the federal funds rate at 0 to ¼ percent and currently anticipates that exceptionally low levels

for the federal funds rate are likely warranted at least through mid-2015". In this context, Management's most likely earnings plan for the twelve months ended September 30, 2013 assumes interest rates remain relatively stable and yields on newly originated or refinanced loans and on purchased investment securities will reflect current interest rates, which are lower than yields on older dated loans and investment securities.

In adjusting the Company's asset/liability position, Management attempts to manage interest rate risk while enhancing the net interest margin and net interest income. At times, depending on expected increases or decreases in general interest rates, the relationship between long and short term interest rates, market conditions and competitive factors, Management may adjust the Company's interest rate risk position in order to manage its net interest margin and net interest income. The Company's results of operations and net portfolio values remain subject to changes in interest rates and to fluctuations in the difference between long and short term interest rates.

Management's interest rate risk management is currently biased toward stable interest rates in the near-term, and ultimately, rising interest rates. Management continues to monitor the interest rate environment as well as economic conditions and other factors it deems relevant in managing the Company's exposure to interest rate risk.

The Company does not currently engage in trading activities or use derivative instruments to control interest rate risk, even though such activities may be permitted with the approval of the Company's Board of Directors.

Market Risk - Equity Markets

Equity price risk can affect the Company. As an example, any preferred or common stock holdings, as permitted by banking regulations, can fluctuate in value. Management regularly assesses the extent and duration of any declines in market value, the causes of such declines, the likelihood of a recovery in market value, and its intent to hold securities until a recovery in value occurs. Declines in value of preferred or common stock holdings that are deemed "other than temporary" could result in loss recognition in the Company's income statement.

Fluctuations in the Company's common stock price can impact the Company's financial results in several ways. First, the Company has regularly repurchased and retired its common stock; the market price paid to retire the Company's common stock can affect the level of the Company's shareholders' equity, cash flows and shares outstanding. Second, the Company's common stock price impacts the number of dilutive equivalent shares used to compute diluted earnings per share. Third, fluctuations in the Company's common stock price can motivate holders of options to purchase Company common stock through the exercise of such options thereby increasing the number of shares outstanding. Finally, the amount of compensation expense associated with share based compensation fluctuates with changes in and the volatility of the Company's common stock price.

Market Risk - Other

Market values of loan collateral can directly impact the level of loan charge-offs and the provision for loan losses. The financial condition and liquidity of debtors issuing bonds and debtors whose mortgages or other obligations are securitized can directly impact the credit quality of the Company's investment portfolio requiring the Company to recognize other than temporary impairment charges. Other types of market risk, such as foreign currency exchange risk and commodity price risk, are not significant in the normal course of the Company's business activities.

Liquidity and Funding

The Company's routine sources of liquidity are operating earnings, investment securities, consumer and other loans, deposits, and other borrowed funds. During the first nine months of 2012, operating activities provided \$90 million to pay \$31 million in shareholder dividends and \$39 million applied to repurchase Company common stock. During the first nine months of 2011, the Company's operating activities generated \$87 million in liquidity providing funds to pay common shareholders \$31 million in dividends and fund \$45 million in stock repurchases.

During the first nine months of 2012, investment securities provided \$275 million in liquidity from paydowns, maturities and sales, and loans provided \$296 million in liquidity from scheduled payments, payoffs and maturities, net of loan fundings. Securities of \$622 million were purchased. During the first nine months of 2011, investment securities provided \$267 million in liquidity from paydowns and maturities, and loans provided \$241 million in liquidity from scheduled payments and maturities, net of loan fundings. Additionally, deposit growth increased cash \$60 million. First nine months of 2011 liquidity provided funds to purchase securities of \$457 million and to reduce short-term borrowings by \$22 million.

At September 30, 2012, the Company's assets included \$368 million in cash and amounts due from other banks from daily transaction settlements. The Bank maintains cash balances for its branches of approximately \$50 million to meet the routine needs of its customers. Further, the Bank must maintain approximately \$30 million at the Federal Reserve Bank (FRB) to meet its reserve requirement; this reserve requirement is reduced by cash held for branches. Excluding

cash for branch needs and cash required at the FRB, cash and amounts due from other banks of approximately \$290 million provided excess liquidity, equivalent to seven percent of total deposits.

The Company projects \$243 million in additional liquidity from investment security paydowns and maturities during the twelve months ending September 30, 2013. At September 30, 2012, \$677 million in residential collateralized mortgage obligations (“CMOs”) and residential mortgage backed securities (“MBSs”) were held in the Company's investment portfolios. None of the CMOs or MBSs are backed by sub-prime mortgages. The residential CMOs and MBSs provided \$45 million in liquidity from paydowns during the three months ended September 30, 2012. At September 30, 2012, indirect automobile loans totaled \$406 million, which were experiencing stable monthly principal payments of approximately \$16 million during the third quarter of 2012.

The Company held \$1.9 billion in total investment securities at September 30, 2012. Under certain deposit, borrowing and other arrangements, the Company must hold and pledge investment securities as collateral. At September 30, 2012, such collateral requirements totaled approximately \$834 million. At September 30, 2012, \$738 million of the Company's investment securities were classified as "available-for-sale", and as such, could provide additional liquidity if sold, subject to the Company's ability to meet continuing collateral requirements. In addition, at September 30, 2012, the Company had customary lines for overnight borrowings from other financial institutions in excess of \$700 million, under which \$-0- was outstanding. Additionally, the Company has access to borrowing from the Federal Reserve. Management expects the Company could access additional long-term debt financing if desired. In Management's judgment, the Company's liquidity position is strong and asset liquidations or additional long-term debt are considered unnecessary to meet the ongoing liquidity needs of the Company.

Management will monitor the Company's cash levels throughout the remainder of 2012 and 2013. Loan demand from credit-worthy borrowers will be dictated by economic and competitive condition. The Company aggressively solicits non-interest bearing demand deposits and money market checking deposits, which are the least sensitive to changes in interest rates. The growth of these deposit balances is subject to heightened competition, the success of the Company's sales efforts, delivery of superior customer service, new regulations and market conditions. The Company does not aggressively solicit higher-costing time deposits; as a result, Management anticipates such deposits will decline. Changes in interest rates, most notably rising interest rates, could impact deposit volumes. Depending on economic conditions, interest rate levels, and a variety of other conditions, deposit growth may be used to fund loans, reduce borrowings or purchase investment securities. However, due to concerns such as uncertainty in the general economic environment, competition and political uncertainty, loan demand and levels of customer deposits are not certain. Shareholder dividends are expected to continue subject to the Board's discretion and continuing evaluation of capital levels, earnings, asset quality and other factors.

The Company performs liquidity stress tests on a periodic basis to evaluate the sustainability of its liquidity. Under the stress testing, the Company assumes outflows of funds increase beyond expected levels. Measurement of such heightened outflows considers the composition of the Company's deposit base, including any concentration of deposits, non-deposit funding such as short-term borrowings and Federal Home Loan Bank advances, and unfunded lending commitments. The Company evaluates its stock of highly liquid assets to meet the assumed higher levels of outflows. Highly liquid assets include cash and amounts due from other banks from daily transaction settlements, reduced by branch cash needs and FRB reserve requirement, and investment securities based on regulatory risk-weighting guidelines. Based on the results of the most recent liquidity stress test, Management is satisfied with the liquidity condition of the Bank and the Company. However, no assurance can be given the Bank or Company will not experience a period of reduced liquidity.

Westamerica Bancorporation ("Parent Company") is a separate entity and apart from Westamerica Bank ("Bank") and must provide for its own liquidity. In addition to its operating expenses, the Parent Company is responsible for the payment of dividends declared for its shareholders, and interest and principal on outstanding debt. The \$15 million note issued by the Parent Company, as described in Note 9 to the unaudited financial statements, matures October 31, 2013. Substantially all of the Parent Company's revenues are obtained from subsidiary dividends and service fees. Payment of dividends to the Parent Company by the Bank is limited under California and Federal laws. The Company believes that regulatory dividend restrictions will not have an impact on the Parent Company's ability to meet its ongoing cash obligations.

Capital Resources

The Company has historically generated high levels of earnings, which provides a means of raising capital. The Company's net income as a percentage of average common equity ("return on common equity" or "ROE") was 14.7% (annualized) in the first nine months of 2012, 16.1% in 2011 and 18.1% in 2010. The Company also raises capital as employees exercise stock options, which are awarded as a part of the Company's executive compensation programs to reinforce shareholders' interests in the Management of the Company. Capital raised through the exercise of stock

options totaled \$3 million in the first nine months of 2012, \$14 million in 2011 and \$17 million in 2010.

The Company paid dividends totaling \$31 million in the first nine months of 2012, \$42 million in 2011 and \$42 million in 2010, which represent dividends per share of \$1.11, \$1.45 and \$1.44, respectively. The Company's earnings have historically exceeded dividends paid to shareholders. The amount of earnings in excess of dividends gives the Company resources to finance growth and maintain appropriate levels of shareholders' equity. In the absence of profitable growth opportunities, the Company has repurchased and retired its common stock as another means to return capital to shareholders. The Company repurchased and retired 836 thousand shares of common stock valued at \$39 million in the first nine months of 2012, 1.3 million shares valued at \$61 million in 2011 and 533 thousand shares valued at \$29 million in 2010.

- 45 -

The Company's shareholders' equity remained the same at \$559 million at September 30, 2012 compared with December 31, 2011. In the nine months ended September 30, 2012, the Company earned \$62 million in net income, raised \$3 million from issuance of stock in connection with exercises of employee stock options, paid \$31 million in dividends, and repurchased \$39 million in common stock.

The Company performs capital stress tests on a periodic basis to evaluate the sustainability of its capital. Under the stress testing, the Company assumes various scenarios such as deteriorating economic and operating conditions, unanticipated asset devaluations, and significant operational lapses. The Company measures the impact of these scenarios on its earnings and capital. Based on the results of the most recent stress tests, Management is satisfied with the capital condition of the Bank and the Company. However, no assurance can be given the Bank or Company will not experience a period of reduced earnings or a reduction in capital from unanticipated events and circumstances.

Capital to Risk-Adjusted Assets

The following summarizes the ratios of capital to risk-adjusted assets for the Company on the dates indicated:

	At September 30,		At December 31,		Minimum Well-capitalized by Regulatory Requirement		Regulatory Definition	
	2012	2011	2011	2011				
Tier I Capital	14.96 %	14.11 %	14.54 %	14.54 %	4.00 %	4.00 %	6.00 %	6.00 %
Total Capital	16.22 %	15.41 %	15.83 %	15.83 %	8.00 %	8.00 %	10.00 %	10.00 %
Leverage ratio	8.58 %	8.44 %	8.38 %	8.38 %	4.00 %	4.00 %	5.00 %	5.00 %

The following summarizes the ratios of capital to risk-adjusted assets for the Bank on the dates indicated:

	At September 30,		At December 31,		Minimum Well-capitalized by Regulatory Requirement		Regulatory Definition	
	2012	2011	2011	2011				
Tier I Capital	14.30 %	13.99 %	13.84 %	13.84 %	4.00 %	4.00 %	6.00 %	6.00 %
Total Capital	15.78 %	15.49 %	15.32 %	15.32 %	8.00 %	8.00 %	10.00 %	10.00 %
Leverage ratio	8.15 %	8.32 %	7.93 %	7.93 %	4.00 %	4.00 %	5.00 %	5.00 %

FDIC-covered assets are generally included in the 20% risk-weighted category for regulatory capital measurements due to loss sharing agreements, which expire on February 5, 2019 as to the residential real estate covered assets and on February 5, 2014 as to non-residential real estate covered assets. Subsequent to such dates, previously FDIC-indemnified assets will generally be included in the 100% risk-weight category.

On June 7, 2012, the Federal Reserve Board invited comment on three proposed rules intended to improve the quality and increase the quantity of capital in the banking industry. The proposals' provisions which would most affect the regulatory capital requirements of the Company and the Bank:

- Redefine the type of capital which qualifies as regulatory capital in a manner which is more restrictive than current rules,
 - Introduce a new "Common Equity Tier 1" capital measurement,
 - Establish higher minimum levels of capital,
 - Introduce a "capital conservation buffer,"

Increase the risk-weighting of certain assets and commitments, in particular construction loans, loans on nonaccrual status, loans 90 days or more past due, short-term credit commitments, and deferred tax assets, and

- Alter the risk-weightings on residential real estate loans based on loan quality (underwriting standards and terms) and the loan-to-value ratio determined at time of origination or subsequent restructuring or modification.

Under the proposals, any bank subject to the rules which is unable to maintain its “capital conservation buffer” will be restricted in the payment of shareholder distributions, as an example dividends and share repurchases, and restricted in the payment of discretionary executive compensation. The proposals have phase-in schedules for the various provisions; the higher minimum capital requirements are fully phased-in by January 1, 2015 and the “capital conservation buffer” and changed risk-weightings are fully phased-in by January 1, 2019.

These proposals do not supersede the Federal Deposit Insurance Corporation Improvement Act (FDICIA) requiring federal banking agencies to take prompt corrective action (PCA) to resolve problems of insured depository institutions. The proposals would revise the PCA thresholds to incorporate the proposed regulatory capital minimums, including the newly proposed “common equity tier 1” ratios.

Management has evaluated the capital structure and assets for the Company and the Bank as of September 30, 2012 assuming (1) the Federal Reserve’s proposed rules were currently fully phased-in and (2) the FDIC indemnification of the Bank’s purchased covered assets had expired, causing an increase in risk-weightings on such assets. Based on this evaluation, the Company and the Bank currently maintain capital in excess of all the proposed regulatory ratios, as follows:

	Proposed Minimum Capital Requirement		"Well-capitalized" Under PCA Proposal		Proposed Minimum Plus "Capital Conservation Buffer"		Proforma Measurements as of September 30, 2012 Assuming New Proposals Fully Phased-in and Covered Asset Indemnification Expired			
							Company		Bank	
Capital Measurement:										
Leverage	4.00	%	5.00	%	4.00	%	8.83	%	8.40	%
Common Equity Tier 1	4.50	%	6.50	%	7.00	%	13.69	%	13.06	%
Tier I Capital	6.00	%	8.00	%	8.50	%	13.69	%	13.06	%
Total Capital	8.00	%	10.00	%	10.50	%	14.78	%	14.17	%

The Company and the Bank intend to maintain regulatory capital in excess of the highest regulatory standard. The Company and the Bank routinely project capital levels by analyzing forecasted earnings, credit quality, securities valuations, shareholder dividends, asset volumes, share repurchase activity, stock option exercise proceeds, and other factors. Based on current capital projections, the Company and the Bank expect to maintain regulatory capital levels exceeding the highest effective regulatory standard and pay quarterly dividends to shareholders. No assurance can be given that changes in capital management plans will not occur.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company does not currently engage in trading activities or use derivative instruments to control interest rate risk, even though such activities may be undertaken with the approval of the Company's Board of Directors. Interest rate risk and asset valuation risk, as discussed above are the most significant market risks affecting the Company. Other types of market risk, such as foreign currency exchange risk, equity price risk and commodity price risk, are not significant in the normal course of the Company's business activities.

Item 4. Controls and Procedures

The Company's principal executive officer and principal financial officer have evaluated the effectiveness of the Company's “disclosure controls and procedures,” as such term is defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended, as of September 30, 2012. Based upon their evaluation, the principal executive officer and principal financial officer concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time period specified in the Securities and Exchange Commission’s rules and forms and are effective in ensuring that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is accumulated and communicated to Management, including the chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure. The evaluation did not identify any change in the Company's internal control

over financial reporting that occurred during the quarter ended September 30, 2012 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

- 47 -

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Due to the nature of its business, the Company is subject to various threatened or filed legal cases resulting from loan collection efforts, transaction processing for deposit accounts, employment practices and other routine business activities. The Company establishes a liability for contingent litigation losses for any legal matter when payments associated with the claims become probable and the costs can be reasonably estimated. Legal costs related to covered assets are eighty percent indemnified under loss-sharing agreements with the FDIC if certain conditions are met.

Item 1A. Risk Factors

The Company's Form 10-K as of December 31, 2011 includes detailed disclosure about the risks faced by the Company's business; such risks have not materially changed since the Form 10-K was filed.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

- (a) Previously reported on Form 8-K.
 (b) None
 (c) Issuer Purchases of Equity Securities

The table below sets forth the information with respect to purchases made by or on behalf of the Company or any "affiliated purchaser" (as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934), of common stock during the quarter ended September 30, 2012.

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share (In thousands, except per share data)	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs*	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
July 1 through July 31	90	\$ 45.99	90	1,967
August 1 through August 31	80	45.93	80	1,887
September 1 through September 30	100	47.77	100	1,787
Total	270	\$ 46.63	270	1,787

* Includes 2 thousand, 4 thousand and 1 thousand shares purchased in July, August and September, respectively, by the Company in private transactions with the independent administrator of the Company's Tax Deferred Savings/Retirement Plan (ESOP). The Company includes the shares purchased in such transactions within the total number of shares authorized for purchase pursuant to the currently existing publicly announced program.

The Company repurchases shares of its common stock in the open market to optimize the Company's use of equity capital and enhance shareholder value and with the intention of lessening the dilutive impact of issuing new shares to meet stock performance, option plans, and other ongoing requirements.

Shares were repurchased during the period from July 1 through July 25, 2012 pursuant to a program approved by the Board of Directors on July 28, 2011 authorizing the purchase of up to 2 million shares of the Company's common stock from time to time prior to September 1, 2012. Shares were repurchased during the period from July 26, 2012 through September 30, 2012 pursuant to a replacement program approved by the Board of Directors on July 26, 2012 authorizing the purchase of up to 2 million shares of the Company's common stock from time to time prior to September 1, 2013.

Item 3. Defaults upon Senior Securities

None

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None

Item 6. Exhibits

The exhibit list required by this item is incorporated by reference to the Exhibit Index filed with this report.
