PROSPECTUS SUPPLEMENT  
(To Prospectus dated November 6, 2013)

(Proposed Holding Company for WaterStone Bank SSB)  
Up to 25,300,000 Shares of Common Stock

This supplements the prospectus of Waterstone Financial, Inc. dated November 6, 2013 and should be read together with the prospectus.

Reflecting continued difficult conditions in the mortgage banking industry, Waterstone Mortgage Corporation, the mortgage banking subsidiary of Waterstone-Federal and WaterStone Bank, had an operating loss for the two months ended November 30, 2013, and we expect Waterstone Mortgage Corporation to have an operating loss for the quarter ending December 31, 2013. The operating loss was primarily due to decreased loan originations, combined with decreased hedging income and increased costs associated with the recent expansion of Waterstone Mortgage Corporation. As a result, we have been and will continue to take actions to reduce Waterstone Mortgage Corporation's operating costs, including reducing non-loan originator staff. Despite the operating losses for Waterstone Mortgage Corporation for the two months ended November 30, 2013, Waterstone-Federal had consolidated pre-tax income for the two months ended November 30, 2013 of \$1.5 million.

## RECENT OPERATING RESULTS

During the two-months ended November 30, 2013, Waterstone Mortgage Corporation had a pre-tax loss of \$112,000. The pre-tax loss included a \$1.5 million operating loss, which was offset by a \$1.4 million gain on the sale of mortgage servicing rights. An increase in market interest rates beginning in the spring of 2013 has contributed to a decrease in mortgage loan origination volumes nationally as well as at Waterstone Mortgage Corporation. Loans originated for sale in the secondary market by Waterstone Mortgage Corporation totaled \$210.4 million for the two months ended November 30, 2013, compared to \$441.5 million for three months ended September 30, 2013, resulting in average monthly originations of \$105.2 million for the two months ended November 30, 2013 compared to average monthly originations of \$147.2 million for the quarter ended September 30, 2013. The decrease in loan origination volumes primarily reflected a decrease in demand for refinanced loans in a rising interest rate environment. Loan origination volumes were further affected by the federal government shutdown in October 2013, as described in “Risk Factors—Risks Related to Our Business—The recent federal government shutdown is expected to result in reduced loan originations and related gains on sale during the fourth quarter of 2013, and any future federal government shutdown could negatively affect our financial condition and results of operations” included in the prospectus.

Waterstone Mortgage Corporation’s pre-tax income was further negatively impacted by a significant decrease in hedging income on interest rate risk management activities. Waterstone Mortgage Corporation commits to sell fixed amounts of loans to third parties, and makes certain investments to mitigate the interest rate risk associated with those sales. During the quarter ended September 30, 2013, Waterstone Mortgage Corporation earned \$1.2 million in pre-tax income, or an average of \$394,000 per month, on such activities, compared to \$269,000 of pre-tax income, or an average of \$134,000 per month, for the two months ended November 30, 2013.

In addition to the decline in mortgage banking revenue, our mortgage banking expenses increased due to start-up costs related to new mortgage company branch offices added in October and November, and during the quarter ended September 30, 2013. These costs have partially offset the reduction in compensation and benefits expense that occurred at Waterstone Mortgage Corporation resulting from decreased loan commissions paid to our loan originators because of decreased loan originations during this period. As part of our strategy of increasing mortgage banking revenue during periods of rising interest rates and declining mortgage refinance activity, we added new mortgage company branch offices to increase total loan origination volume. This strategy resulted in start-up costs primarily comprised of recruiting fees or bonuses for office managers and loan officers, salary guarantees for up to three months during which time the new office builds its production pipeline, and office occupancy and improvement costs. We added one office during the two months ended November 30, 2013 and six offices during the three months ended September 30, 2013. New branch office start-up costs included in noninterest expense totaled \$579,000 for the two months ended November 30, 2013 and \$325,000 for the three months ended September 30, 2013.

The above effects were partially offset by the sale in November 2013 of mortgage servicing rights related to \$254.0 million of loans receivable, which resulted in gain on sale of \$1.4 million.

On a consolidated basis, Waterstone Federal had pre-tax net income of \$1.5 million for the two months ended November 30, 2013, due to unconsolidated pre-tax net income of WaterStone Bank of \$1.5 million for the period.

We expect that Waterstone Mortgage Corporation will incur an operating loss for the month of December 2013, due to continued lower loan origination volumes and the costs related to its recent expansion. We also expect that these expansion costs and the effects of the interest rate environment on our origination volume will continue to negatively affect Waterstone Mortgage Corporation's operating results for the first quarter of 2014. As a result, Waterstone Mortgage Company may incur an operating loss in the first quarter of 2014 and subsequent periods. In its efforts to offset recent operating losses, Waterstone Mortgage Corporation intends to continue to reduce expenses, primarily through non-loan originator staff reductions and the consolidation of certain operations.

Financial information provided in this Prospectus Supplement for the two months ended November 30, 2013 and the quarter ended September 30, 2013 is unaudited.
