2.1 Jackson National Life

In general, the debt securities of Jackson are purchased with the intention and the ability to hold them for the longer-term.

The majority of Jackson's debt securities are classified as available-for-sale under IAS 39. Under this classification realised losses from defaults, sales of impaired and deteriorating bonds and write-downs are recorded in the income statement. Changes in unrealised appreciation and depreciation are recorded as a movement directly in shareholders' equity.

Jackson continues to review its investments on a case-by-case basis to determine whether any decline in fair value represents an other-than-temporary impairment and therefore requiring an accounting write-down.

The defaults, losses on sales of impaired and deteriorating bonds (net of recoveries) and write-downs for 2008 were as follows:

	Defaults	Losses on sales of impaired and deteriorating bonds (net of recoveries)	Write-downs
	£m	£m	£m

3 Jackson National Life - securities in an unrealised loss position

For Jackson's securities classified as available-for-sale under IAS 39, at 31 December 2008 there was a net unrealised loss position of £2,897 million. This amount comprised £281 million of gross unrealised gains and £3,178 million of gross unrealised losses on individual securities. Included within the gross unrealised losses is £1,938 million for securities which are valued at less than 80 per cent of book value, of which 91 per cent have been at this level for less than 6 months.

IFRS requires securities to be carried at fair value, being the amount for which the security would be exchanged between knowledgeable, willing parties in an arm's length transaction. The best evidence of fair value is quoted prices in an active market, but if the market is not active then a valuation technique is used to establish fair value.

Due to market illiquidity for certain structured securities resulting in the markets not being active since the third quarter of 2008 Jackson have valued the majority of non-agency residential mortgage-backed securities (RMBS), commercial mortgage-backed securities and asset backed securities using valuation techniques in accordance with the requirement of IAS39. The techniques include discounted cash flow models and where available, observable market data and other factors that are likely to affect the fair value of the securities are used. Previously, when markets were deemed active for these securities, independent pricing services or broker bid prices were used to fair value these holdings.

PRUDENTIAL PLC - NEW BUSINESS SCHEDULES

BASIS OF PREPARATION

The new business schedules are provided as an indicative volume measure of transactions undertaken in the reporting period that have the potential to generate profits for shareholders. The amounts shown are not, and not intended to be, reflective of premium income recorded in the IFRS income statement.

The format of the schedules is consistent with the distinction between insurance and investment products as applied for previous financial reporting periods. Products categorised as "insurance" refer to those classified as contracts of long-term insurance business for regulatory reporting purposes, i.e. falling within one of the classes of insurance specified in part II of Schedule 1 to the Regulated Activities Order under FSA regulations.

The details shown for insurance products include contributions for contracts that are classified under IFRS 4 "Insurance Contracts" as not containing significant insurance risk. These products are described as investment contracts or other financial instruments under IFRS. Contracts included in this category are primarily certain unit-linked and similar contracts written in UK Insurance Operations, and Guaranteed Investment Contracts and similar funding agreements written in US Operations.

New business premiums for regular premium products are shown on an annualised basis. Department of Work and Pensions rebate business is classified as single recurrent business. Internal vesting business is classified as new business where the contracts include an open market option.

Investment products referred to in the tables for funds under management are unit trusts, mutual funds and similar types of retail fund management arrangements. These are unrelated to insurance products that are classified as investment contracts under IFRS 4, as described in the preceding paragraph, although similar IFRS recognition and measurement principles apply to the acquisition costs and fees attaching to this type of business.
