SUMMARY INFORMATION ON THE CONSOLIDATED FINANCIAL STATEMENTS AT

MARCH 31, 2003

(Amounts in million of Argentine constant pesos or as expressly indicated)

1. General considerations

Telecom Argentina reached a consolidated net profit of \$907 million for the first quarter of fiscal year 2003 (1Q03). Comparatively, consolidated net loss for the first quarter of fiscal year 2002 (1Q02) was \$3,734 million.

EBITDA, gross profit/(loss), operating profit/(loss), and net income/(loss) for 1Q03 represented 53%, 25%, (3%) and 107% of net sales, respectively; compared with 45%, 40%, 5% and (272%), respectively, for 1Q02.

The Company has accounted for the effects of inflation adjustment adopted by Resolution No. 415/02 of the Comisión Nacional de Valores (CNV) following the method adopted by Technical Resolution 6 and modified by Technical Resolution 19, to restate the figures using the wholesale rate of inflation as from January 1, 2002 according to Decree No. 1,269/02.

However, the Government through Decree No. 664/03 stated that regulatory entities are not allowed to receive financial statements adjusted by inflation. Accordingly, the CNV through Resolution No. 441/03 decided to discontinue, as of March 1, 2003, the inflation adjustment method stated by Technical Resolution 6 and complementary regulations. Therefore, the Company has restated the figures corresponding to March 31, 2002 presented herein for comparative purposes in current pesos as of February 28, 2003 using the adjustment factor of 1.6647 which represents the wholesale rate of inflation for the period March 2002 to February 2003. Accordingly, the figures corresponding to 1Q03 include the effects of the adoption of inflationary accounting until February 28, 2003.

Moreover, the Company is providing additional information for a better understanding of the business including figures that have not been adjusted by inflation and which were used as the base for the information presented in constant pesos. This information, that is not required by the current accounting professional rules, can be found in Note 16 to the Consolidated Financial Statements as of March 31, 2003 as Relevant Additional Information .

2. Company activities

Consolidated net revenues

SUMMARY INFORMATION ON THE CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Consolidated net revenues for 1Q03 totaled \$851 million, a decrease of \$522 million or 38%, compared with \$1,373 million for 1Q02 as a result of the inflation adjustment of the figures as of March 31, 2002 and that the regulated rates were frozen after the pesification enforced by the Government. Revenues for 1Q03, without adjustment for inflation, would have reached \$850 million, an increase of \$104 million or 14% compared to 1Q02 (\$746 million). This increase is mainly as a consequence of the increases in non-regulated services.

In the basic telephony business, the main component of revenues, measured service, decreased by \$144 million or 41% to \$204 million during 1Q03 as compared to 1Q02 (\$348 million). Unadjusted figures would have shown an increase of \$16 million or 9%. Revenues from domestic long distance increased as a consequence of higher average rates prompted by the reduction in promotional discounts while revenues from local telephony decreased slightly mainly due to the fact that the lower number of lines had a negative impact on this segment. Lines in service as of March 31, 2003 reached approximately 3,560,000 compared with approximately 3,746,000 as of March 31, 2002.

Total traffic volume (Local and DLD) measured in minutes decreased by 3% for 1Q03 when compared to 1Q02. Additionally, the outgoing international long distance traffic, measured in minutes, decreased by 20%, compared to 1Q02.

Monthly basic charges decreased by \$119 million or 49%, to \$124 million for 1Q03 when compared to 1Q02. Unadjusted figures would have shown a decrease of \$8 million or 6% reaching \$123 million mainly due to the fact that rates were frozen after the pesification enforced by the Government and due to a lower average number of lines in service of approximately 225,000 lines.

Revenues from supplementary services decreased by \$18 million or 38% to \$29 million for 1Q03 when compared to 1Q02. Unadjusted figures would have shown an increase of \$4 million or 16% mainly due to lower discounts and a higher number of subscribers to some of these services, partially compensated by the pesification of rates enforced by the Government.

Revenues from installation fees paid by new customers remained at the same level of \$5 million for both 1Q03 and 1Q02. Unadjusted figures would have shown an increase of \$3 million or 150%, largely due to a higher number of lines connected (approximately 32,000 lines connected in 1Q03 as compared to 28,000 lines connected during 1Q02) and a higher average installation price (\$146 to \$86 per line, denominated in current pesos).

Revenues from public telephony decreased by \$25 million or 37% to \$43 million for 1Q03 when compared to 1Q02. Unadjusted figures would have shown an increase of \$7 million or 19%. The increase was a consequence of the higher traffic generated by public telephony telecommunication centers (Telecentros) and higher revenues received from public payphones and telephone cards.

Revenues generated by fixed interconnection services during 1Q03 decreased by \$19 million or 42% to \$26 million. Unadjusted figures would have shown an increase of \$2 million or 8%. Meanwhile, revenues generated by interconnection services provided to cellular operators

Edgar Filing: TELECOM ARGENTINA STET FRANCE TELECOM SA - Form 6-K

decreased by \$4 million or 31% to \$9 million. Unadjusted figures would have shown an increase of \$2 million or 29%.

Regarding the international telephony business, during 1Q03 revenues decreased by \$36 million or 40% to \$53 million when compared to 1Q02. Unadjusted figures would have shown an increase of \$4 million or 8%.

SUMMARY INFORMATION ON THE CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

mainly due to the revenues generated by Telecom's subsidiary Telecom USA, lower discounts and higher revenues derived from higher incoming traffic. These effects were partially offset by the freeze of regulated rates and lower outgoing traffic.

Revenues generated by the data transmission business totaled \$83 million, representing a decrease of \$29 million or 26%. Unadjusted figures would have shown an increase of \$22 million or 36%, as a consequence of higher revenues generated by the ground networks and lease of data circuits. Additionally, Internet dial-up measured services increased as a consequence of the higher number of Internet subscribers of other ISPs that use the special prefix 0610 and local numbers with 4004 numbering or similar to access Telecom's network. As of March 31, 2003 Internet minutes represented 31% of total traffic measured in minutes transported over the fixed-line network.

Internet revenues decreased by \$3 million or 18% to \$14 million during 1Q03. Unadjusted figures would have shown an increase of \$5 million or 56%, mainly due to the increase in ADSL high-speed access and dial-up monthly fees. As of March 31, 2003, the number of ADSL subscribers reached approximately 32,000. Furthermore, Internet dial-up customers reached approximately 148,000.

The revenues generated by the cellular business during 1Q03, decreased by \$120 million or 34% to \$237 million when compared to 1Q02. Unadjusted figures would have shown an increase of \$39 million or 20%.

SUMMARY INFORMATION ON THE CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.*Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer*

Unadjusted revenues of Telecom Personal in Argentina would have increased by \$49 million or 32% to \$201 million when compared to 1Q02. The increase was due to the higher number of subscribers, higher levels of traffic and higher sales of pre-paid cards. Furthermore, the average revenue per user increased by 27% (to \$28 per customer per month for 1Q03, denominated in current pesos). Total cellular subscribers of Telecom Personal in Argentina reached approximately 2,235,000, representing an increase of approximately 127,000 customers, or 6%, as compared to March 31, 2002. The customer base as of March 31, 2003, amounted to approximately 1,809,000 prepaid subscribers or 81% and approximately 426,000 post-paid subscribers or 19%.

Núcleo, the subsidiary that provides cellular and PCS services in Paraguay, generated \$36 million in revenues during 1Q03, which are consolidated into the revenues of Telecom Personal. This represented a decrease of \$41 million, or 53%, as compared to 1Q02. Unadjusted figures would have shown a decrease of \$10 million or 22%. The decrease can be mainly attributed to the slight decrease in the customer base and the lower average revenue per user. As of March 31, 2003, Núcleo had approximately 517,000 cellular and PCS customers, a decrease of approximately 25,000 customers, or 5%, as compared to March 31, 2002.

In the telephone directories publishing business, revenues from our affiliated company Publicom increased by \$1 million, reaching \$2 million. Unadjusted figures would have increased by \$2 million due to the publication of more important directories in 1Q03 compared with 1Q02.

SUMMARY INFORMATION ON THE CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Operating costs

The cost of services provided, administrative expenses, and selling expenses for 1Q03 decreased by \$429 million or 33% to \$875 million when compared to 1Q02 mainly as a result of the adjustment for inflation of figures as of March 31, 2002 and to cost reduction plans implemented by the Company.

Salaries and social security contributions decreased by \$88 million or 44% to \$112 million for 1Q03. Unadjusted figures would have shown a slight increase of \$3 million or 3%, primarily due to the increase in social security contributions since March 1, 2003 and higher salaries for unionized employees mandated by the Government. These increases were partially offset by the reduction in labor costs of unionized and non-unionized employees, which was part of the cost reduction plan launched during the FY 2001 and reductions in headcount. As of March 31, 2003, the headcount totaled 13,377 as compared to 14,387 as of March 31, 2002.

Expenses related to taxes (including turnover tax and tax on bank debits and credits) decreased by \$32 million or 34% to \$62 million for 1Q03. Unadjusted figures would have shown an increase in taxes of \$10 million or 19%, mainly due to the increase in the applicable rate in the turnover tax in the cellular activity.

Materials and supplies charges decreased by \$11 million or 26% to \$32 million for 1Q03. Unadjusted figures would have shown an increase of \$7 million or 30% reaching \$32 million mainly due to higher expenses associated with higher costs for the maintenance of the network, hardware and software due to the high imported materials content.

The allowance for doubtful accounts decreased by \$109 million or 94% to \$7 million for 1Q03. Unadjusted figures would have shown a decrease of \$55 million or 89%. The decrease was largely related to residential segments as a result of the decrease in customer lines.

Interconnection costs decreased by \$20 million or 42% to \$28 million for 1Q03. Unadjusted figures would have shown an increase of \$4 million or 15% reaching \$30 million mostly as a result of higher charges paid for local and long distance access, circuits rentals and termination charges for traffic related to 4004 services in the Internet business.

Service fees (including the fees for debt restructuring process) decreased by \$6 million, or 19%, to \$26 million for 1Q03. Unadjusted figures would have shown an increase of \$8 million or 44%, principally due to higher fees related to information systems and advisory services.

Management fees decreased by \$21 million, or 95%, to \$1 million for 1Q03. Unadjusted figures would have shown a decrease of \$10 million or 91%, as the Company and the Operators agreed to suspend certain provisions of both parties of the management contract, starting April 1^o, 2002.

Edgar Filing: TELECOM ARGENTINA STET FRANCE TELECOM SA - Form 6-K

As a consequence the accrual and the payment of the management fee have been suspended from such day and until the termination of the contract provided in its point 7.2. (October 2004).

Costs related to advertising decreased by \$8 million or 62% to \$5 million for 1Q03. Unadjusted figures would have shown a decrease of \$2 million or 29%. This is mainly due to lower media advertising and promotional and institutional campaigns expenses resulting from the cost control initiatives taken by the Company in line with the lower market requirements.

Cost of cellular handsets decreased by \$3 million or 60% to \$2 million for 1Q03. Unadjusted figures would have shown a decrease of \$2 million

SUMMARY INFORMATION ON THE CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

or 67% reaching \$1 million mainly due to the lower number of cellular handsets sold.

Commissions paid to vendors and card sales decreased by \$1 million or 7% to \$13 million for 1Q03. Unadjusted figures would have shown an increase of \$6 million or 86%, as a consequence of higher commissions paid for new cellular customers due to higher additions of subscribers to the customer base compared with 1Q02, and higher costs for distribution and prepaid cards sales.

Other expenses decreased by \$50 million or 39% for 1Q03, reaching \$78 million. Unadjusted figures would have shown an increase of \$5 million or 7% reaching \$76 million, mainly due to higher costs related to insurance policies as a consequence of the impact of the increase of the foreign exchange rate in this cost item.

SUMMARY INFORMATION ON THE CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Depreciation of fixed assets decreased by \$68 million or 13%, to \$449 million during 1Q03, as a consequence of lower depreciation of capitalized foreign currency exchange differences originated by financial debt and results from translation, compared with 1Q02. These effects were partially offset by the depreciation of new assets incorporated into cellular and data transmission activities during FY 2002.

Finally, amortization of intangible assets increased by \$3 million or 12% to \$28 million for 1Q03, mainly due to higher charges related to exclusivity rights and systems development in the cellular business, partially offset by the suspension of the amortization of PCS licenses.

	<hr/>	<hr/>

Financial and holding results

The gains resulting from financial and holding results reached \$961 million for 1Q03 as compared to the loss of \$5,474 million in 1Q02. The improvement can be largely attributed to the \$1,134 million gain arising from currency exchange differences derived from the appreciation of the Peso during the quarter, which affected the Company's net foreign currency monetary position. Additionally, as a consequence of the lower exchange rate, the interest on foreign currency liabilities decreased by \$78 million.

Other expenses, net

Other expenses, (net) decreased \$25 million or 52% to \$23 million 1Q03 compared with 1Q02 as a result of the inflation adjustment of figures of March 31, 2002, higher reserves for lawsuits and contingencies and higher severance and termination charges. These variations were partially offset by the decrease in the write-off of cellular handsets leased without charge (comodato).

Statements of cash flow (Unadjusted figures)

Cash flow from operating activities for 1Q03 decreased by \$122 million, mainly due to the exchange differences (\$399 million), partially offset by higher collections (\$128 million) and lower payments (\$21 million).

Meanwhile, cash flow applied to investing activities for 1Q03 decreased by \$178 million as compared to 1Q02 as a result of lower incorporation of fixed and intangible assets.

Funds allocated to financing activities decreased by \$99 million for the 1Q03 as a result of lower debt proceeds and payments due to Telecom s suspension of principal and interest payments on its debt obligations in 2Q02.

SUMMARY INFORMATION ON THE CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Net, financial debt

Net Financial Debt decreased by \$432 million or 5% to \$8,398 million for 1Q03 compared with 1Q02 (\$8,830 million in current pesos), mainly due to an increase in financial assets resulting from the higher level of cash being generated, but partially offset by the increased in financial debt due variations in the Euro/US\$ exchange rate, compared with 1Q02.

SUMMARY INFORMATION ON THE CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Investment plan

Telecom has made investments in fixed assets for \$20,810 million since the start of operations on November 8, 1990, of which \$13 million corresponds to 1Q03. As of March 31, 2003, the net book value of fixed assets totaled \$9,222 million.

Of the total amount invested during 1Q03, \$7 million or 54% corresponds to basic telephony, data transmission and Internet (public telephony 14%, transmission 43% and outside plant 43%) and \$6 million or 46% to cellular telephony.

Recent developments

Debt restructuring process

On April 14, 2003, Telecom Argentina and its subsidiary Telecom Personal announced the commencement of cash tender offers for a portion of their financial debt instruments. The tender offers will be open to the holders of the notes and credit facility debt of Telecom Argentina and the credit facility debt of Telecom Personal.

The tender offers commenced on Wednesday, April 16, 2003 and will expire on Friday, May 16, 2003 at 5:00 PM Buenos Aires time, 4:00 PM New York City time and 5:00 PM Italian time. Telecom Argentina and Telecom Personal will conduct the tender offers pursuant to a modified Dutch auction using cash of up to the equivalent of US\$260 million and US\$45 million, respectively, with a price range of 43.5% to 50.0% of the outstanding principal amount of Telecom Argentina's and Telecom Personal's financial debt instruments, without giving effect to any accrued but unpaid interest. Offers may be submitted in price increments of 0.25%.

The purchase price for debt instruments accepted for purchase by Telecom pursuant to the terms and conditions set forth in the tender offer materials will be paid in the respective currency of such debt instruments. All holders whose debt instruments are accepted for purchase will receive the same purchase price (expressed as a percentage of principal amount of the tendered debt instruments), upon the terms and subject to the conditions described in the tender offer materials.

The closing of the tender offers will be subject to a number of conditions which are described in the tender offer materials. The tender offer materials also provide certain information relating to the status of the Companies' financial debt restructuring process.

Edgar Filing: TELECOM ARGENTINA STET FRANCE TELECOM SA - Form 6-K

The Companies have also announced they would each make interest payments on their financial debt obligations at the contractual rates, without giving effect to penalties or default rates, for the period through and including June 24, 2002. The Companies will also each make partial interest payments equivalent to 30% of the contractual rates, without giving effect to penalties or default rates, on their financial debt obligations for the period from June 25, 2002 through December 31, 2002. The partial interest payments would be paid on all financial debt obligations, independent of noteholders or creditors participation in the tender offers. The record date for the partial interest payments was April 30, 2003 and the payment date will be the expiration date of the tender offers. The Company reserve rights to make the interest payment if the tender offer is terminated prior to the expiration date.

The tender offers and the partial interest payments are the first steps of the Companies plans to restructure their outstanding financial indebtedness and their ongoing debt service obligations.

SUMMARY INFORMATION ON THE CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Summary of the resolutions passed by the General Ordinary and Extraordinary Shareholders Meeting held on April 30, 2003

Resolutions relating to the following matters were passed at General Ordinary and Extraordinary Shareholders Meeting held on April 30, 2003:

Approval of the financial documentation corresponding to the 14th fiscal year ended December 31, 2002.

Approval of the allocation to a new fiscal year of the entire loss in Unappropriated Retained Earnings as of December 31, 2002.

Consideration of the performance and the remuneration of the Board of Directors and the Surveillance Committee, holding office during the 14th fiscal year.

Determination and appointment of six, regular and alternate, directors to hold office during the 15th fiscal year.

Appointment of the regular and alternate members of the Surveillance Committee.

The appointment of Pistrelli, Henry Martin y Asociados SRL (a member of Ernst & Young Global) jointly with Price Waterhouse & Co, as the External Auditors of the financial statements corresponding to the 15th fiscal year.

The Board of Directors was granted ample powers to provide, whenever necessary or whenever the Board of Directors deems convenient, the Change of Ratio of the ADRs that represent shares of the Company, enabling it to determine the amount of shares that will represent each ADR and to determine all the terms and conditions of such change of ratio.

The NON ADHESION of Telecom Argentina to the Optional Statutory Regime of Compulsory Public Purchase Offer (Régimen Estatutario Optativo de Oferta Pública de Adquisición Obligatoria) as well as the consequent amendment of Section 1 of the Corporate Bylaws.

(3) Non current assets/Total assets

7. Outlook

The 1Q03 developed in a economically stable context, unlike the FY2002 context that was socially, politically and economically adverse. In spite of that, the Company is still affected by the pesification of the tariffs at the rate of US\$1 = \$1 and the lack of resolution of the tariff structure renegotiation, among other matters.

In the context of the debt restructuring, the Company has continued its conversations with its main financial creditors in order to find a definitive solution to its debt restructuring process. In this process, on April 14th, the Company announced the launching of a cash tender offers for a portion of its financial debt obligations and the intention of make partial interest payments on its financial debt obligations. The tender offers and the partial interest payments are the first steps of the Company plans to restructure their outstanding financial indebtedness and their ongoing debt service obligations.

In this uncertain and critical context, Telecom is still working hard to reduce its cost structure and adapt it to the new environment. Likewise, the Company has significantly reduced its investment program and has increased its efforts to generate a substantial reduction of its expenditure and increase cash inflows.

<i>BCBA/NYSE</i>	Buenos Aires and New York Stock Exchanges, respectively.
<i>PPP</i>	Share Ownership Program.
<i>EBITDA</i>	Earnings before Interest, Taxes, Depreciation and Amortization.
<i>OCI</i>	Other Comprehensive Income

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.*Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer***NOTE 1 TELECOM GROUP OPERATIONS**

Telecom Argentina was formed as a result of the privatization of ENTel, which had provided public telecommunication services in Argentina.

The Company obtained a license to operate in a designated Northern Zone, beginning operations on November 8, 1990, and provided public telecommunication services on an exclusive basis for seven years subsequent to this date, having the right to a three-year extension of this exclusivity period.

The Company filed the appropriate petition with the SC to extend the license exclusivity period. Acknowledging the Company's filing, the Argentine government established the standards for an orderly transition towards an openly competitive telecommunications market by October 10, 1999, the date at which the exclusivity period ended and the Company remained qualified to provide SBT nationally.

Likewise, the Company merged various companies under its ownership to provide the following services: international long distance in the Northern Zone, national telex, value added services, data transmission and Internet. In order to adapt to the new market demands, the Company expanded its corporate purpose. This expansion was opportunely approved by the SC and the CNV.

The Company achieves its business objective of providing services through integration with its subsidiaries. Activities carried out by these entities at March 31, 2003 are as follows:

<u>Activity</u>	<u>Subsidiary</u>	<u>Ownership by Telecom in capital stock and votes</u>	<u>Control is through the following</u>	<u>Date of incorporation</u>
Cellular telephone service	Personal	99.99%		
	Núcleo	67.50%		07.06.94
	Cable Insignia(a)	75.00%	Personal	02.03.98
Data transmission	Micro Sistemas(a)	99.99%	Personal	03.18.98
International telephone service	Telecom Argentina USA	100.00%		12.01.97
Directories edition	Publicom	99.99%		09.12.00
				06.11.92

(a) Companies not operative at March 31, 2003.

NOTE 2 REGULATORY FRAMEWORK

a) Regulatory bodies and practices

The Company and its telecommunication subsidiaries are regulated by the CNC, decentralized organism dependent on the SC, which is supervised by the Ministry of Economy. The SC is responsible for developing of sector policies, approving and administrating fundamental technical plans, assisting the Ministry of Economy in rate matters affecting the Company and the development of telecommunication regulations.

Some of the more pertinent regulations are:

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

The Privatization Regulations, which regulate the process of privatization, including the Pliego,

The Transfer Agreement,

Telecommunication licenses granted to the Company and to subsidiaries that provide telecommunication services,

Rate agreements and related decrees and regulations approved in Decree No. 764/2000.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

b) Licenses held at March 31, 2003

Company licenses

The Company holds licenses to provide the following services in Argentina for an indefinite period:

Fixed local telephone service,

Public telephone service,

Long distance, both national and international,

Point to point connections, both national and international,

Telex, both national and international,

Value added services, data transmission, video conferencing, broadcast signal transmission and community repeater.

Internet access.

Licenses of subsidiaries

Personal is licensed for an indefinite period, on a competitive market basis, to provide STM in the northern region of Argentina, and data transmission and value added services nationally. Additionally, Personal holds a license to provide SRMC in the AMBA, a license without expiration date to provide PCS service in Argentina and the register for the rendering of national and international long distance telephone service.

Núcleo, controlled by Personal, is licensed to provide STM service over Band B nationwide in Paraguay and PCS service in some areas of Paraguay.

c) **Causes of revocation of licenses**

SBT license

Some of the causes that could revoke the Company's license are:

- (i) the interruption of all or a substantial part of licensed service;
- (ii) a change in corporate business purpose (without a previous authorization of the appropriate regulatory bodies) or a change of corporate domicile outside of Argentina;
- (iii) any sale, encumbrance or transfer of assets that has the effect of reducing services provided, without the prior approval of the appropriate regulatory bodies.
- (iv) reduction of Nortel (see Note 6) ownership of the Company's capital stock to less than 51%, or the reduction to less than 51% of the collective ownership by Nortel shareholders who existed at the date of possession, without the prior approval of the appropriate regulatory bodies.
- (v) the assignment or delegation of the commitments of the Operators without the prior approval of the appropriate regulatory bodies.

If the Company's license is revoked, Nortel must transfer its shares in the Company to the regulatory bodies, in trust, for subsequent sale at public auction. Upon the sale of these shares, the regulatory bodies may renew the Company's license under conditions to be determined.

STM license

According to the STM Pliego, the following causes could revoke Personal's license:

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

- (i) repeated interruptions of the services described in the STM Pliego;
- (ii) a transference of the license and/or the rights and obligations related to that license, without previous authorization of the CNC;
- (iii) taxes constituted over the license;
- (iv) creditors meeting or bankruptcy of Personal;
- (v) the liquidation or dissolution of Personal, without previous authorization of the CNC.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

d) Decree to deregulate telecommunication services

Decree No. 764/2000 approved, among other items, three new regulations whose basic provisions are as follows:

General licensing regulation

Establishes a single license valid throughout Argentina for the provision of all telecommunication service, fixed or mobile, wired or wireless, national or international, with or without proprietary infrastructure. Service providers need not be exclusively devoted to the telecommunications business. There are no requirements for minimum investment or coverage. Radio broadcasting entities may apply for telecommunication licenses. The resale of services is authorized, subject to a license being received. Foreign companies are not restricted from entry.

National interconnection regulation

Establishes the basic regulation and general rules applicable to interconnection between networks of the different providers in competence. This regulation introduces important modifications respect to the National interconnection regulation approved in 1998, in which it could be mentioned a decrease in interconnection services index prices of approximately 50%.Increases the number of network components and functions on behalf of the dominant provider (the Company in the northern zone and Telefónica in the southern zone), and also details the interconnection obligation down to the local level, the rate setting process and the separation of the local loop. Introduces the interconnection method for numeric translation services known as NTS for the internet, audiotext and collect calls and the transfer of telephone numbers.

SU Regulation

Fixes the rate of contribution to the SU Fund at 1% of telecommunication services income. Establishes an Administrative Counsel to manage the SU Fund and oversee the specific programs of the SU. Adopts a play or pay mechanism to ensure compliance with SU Fund contributions, but establishes a contribution exemption mechanism for SBT licensees, which considers both net losses and the percentage market participation of other local telephone service providers. The Regulatory Authority has neither implemented the formation of the Fund nor the official programs to be subsidized.

At the end 2002, the SC created a work group which main purpose is the definition of the Net cost calculation for the SU services, and specifically the application of the Hybrid Cost Proxy Model, based on incremental costs in a theoretic network, like the definition and methodology of the calculation for Non-monetary benefits, in order to determined the costs to compensate the SU provision. This group has issued different documents which are under consultation through different opinion tribunal.

Telecom, in the responses at those consults, insists on the rule simplification, in order to make effective the SU working, denying the validity and application of concepts like the Non-monetary benefits, non-applicable to the argentine reality.

- e) **Regulation for the call by call selection of the providers for long distance services**

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

On December 28, 2001, the former Ministry of Infrastructure and Housing issued Resolution No. 613/01 which approved the rules for the call by call selection (SPM) of the providers for long distance services.

The call by call selection is a system that, allows users, in each call, to select the long distance provider who will make the communications, dialing before the phone number, the access code 17 (for national long distance calls) or 18 (for international long distance calls) and the three digits PQR for the provider s identification.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Subsequently, and considering the claims submitted against Resolution No. 613/01 by several carriers, the Ministry of Economy issued Resolution No. 75/03, introducing several changes to the Regulations. The main changes were as follows: to provide SPM is optional for long distance carriers; improvement in blockage modality for delinquency; the service connection is a request of the client and; simplify the obligations connected with service promotion and advertising.

As regards implementation terms, Resolution No. 75/03 sets forth that origin providers, both fixed and mobile, must have their equipment and networks available to provide the SPM service within 120 running days since February 6, 2003.

f) CPP for international calls

In January 2003 the SC determined that overseas calls terminated in cellular telephones would pay for Calling Party Pays (CPP) charges. In order to identify such calls, customers dialing from outside to cellular phones in our country, must add a prefix 9 , after the country code .

g) Rate structure

On November 28, 1991, the Company and Telefónica signed a rate agreement with the Argentine government, which was ratified by Decree No. 2585/91 and became effective on December 18, 1991. The principal features of the agreement, which modified the Transfer Agreement, are as follows:

- 1) Rates, measured in basic units or pulsos , are denominated in United States dollars and will be adjusted twice annually (April and October) to reflect changes in the overall IPC of the United States of America. Rate adjustments do not require prior regulatory body approval. Since year 2000, adjustments were not made as required by the SC.
- 2) Invoicing to customers will be in local currency.

Law No. 25561, of Public Emergency law and reform of the exchange rate , effective January 6, 2002, in Section 8 nullifies contract clauses providing for adjustments to the value of payments with reference to United States Dollars or other foreign currencies as well as any indexation clauses based on price indexes or similar mechanism. As a consequence, from that date on, the Company s tariffs were set in pesos at a US\$1 to \$1 exchange rate. Likewise, Decree No. 293/2002 started a process of renegotiation of contracts with the public Administration in which the rate structure is involved. Additional information on the process of renegotiation of tariffs and the SBT contract is given in Note 11.

Rate rebalancing

Edgar Filing: TELECOM ARGENTINA STET FRANCE TELECOM SA - Form 6-K

On December 1, 1999, SC Resolution No. 4269/99 ratified the application of methodology outlined by SC Resolution No. 1801/97. This verified the revenue differences of SBT licensees at the end of a two year period, which resulted from rate rebalancing in February 1997. Additionally, the impact of the rate rebalancing was determined to be an increase in revenues of approximately \$9.5 million. The future refunding of this amount has not so far been ruled upon by the Regulatory Bodies.

Price Cap

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

The Price Cap is an annually rate regulation system that includes increasing elements (such as the rate increments twice a year April and October) and reducing elements (such as the annually adjustments on the efficiency factor November).

On April 6, 2000, the Argentine government, Telefónica and the Company signed an agreement which established, for the application of the 2000 cap, a 6.75% reduction of revenues of licensees covered by the rate regulation (6% as set by the SC and 0.75% as determined by licensees) in the period November 2000/October 2001. The 6% reduction should be applied through the following:

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

1. the application of discounts for monthly basic charges to commercial and government clients and discount plans for local measured service and for Internet service to residential domestic customers, in force since March 2000;
2. the non application of the 110 service approved rate since January 2000 up to November 8, 2001;
3. the non application of the restatement of the pulse rate considering the variation of the IPC of the United States of America as it should be applied in April and October 2000.

The economic impact generated by 1. and 2. since January 2000 through November 2000 was discounted (considering a 12% annual rate) in three installments that would be each added to the 2000, 2001 and 2002 caps, respectively.

If in November 2000 the 6% reduction would not be reached, the regulatory body would determine in which items of the Rate structure should be applied the discounts in order to reach the agreed reduction.

At this date, the regulatory body has requested the Company all the information needed to audit the 2000 cap but the final opinion is still pending.

In April 2001, the Argentine government, Telefónica and the Company signed an agreement which established, for the application of the 2001 cap, a 5.6% efficiency factor for the period November 2001/October 2002, with the following additional discounts:

1. the non application of the 2001 pulse rate adjustments related to the variation of the IPC of the United States of America;
2. the second installment of the 2000 cap agreement mentioned above.

The surplus had to be applied as from November 8, 2001 but it is still pending because it was affected by a preliminary injunction stating not to carry out any tariff adjustments. The Company appealed this injunction arguing that if one part of the formula cannot be applied, the price cap system should be null. Finally, Law No. 25561 of Public Emergency prohibited the tariff adjustments explicitly.

Transfer of the tax on debits and credits on bank accounts and other transactions

On February 6, 2003 the Ministry of Economy, through Resolution No. 72/03, authorized the Company to increase the SBT tariffs, in accordance with that resolution, by the effect of the mentioned tax, which should be shown in the customers' bills in a detail. The amounts charged before Resolution No. 72/03 (approximately \$48 millions at the date of issuance of these consolidated financial statements) will be included in the tariffs renegotiation process, mentioned in Note 11.

NOTE 3 BASES OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1. Bases of presentation

The CPCECABA and the CNV approved RT 16, 17, 18, 19 and 20 of the FACPCE which establish new accounting and disclosure principles (the new accounting standards). These new RT fit in the project of harmonization of Argentine GAAP with IAS issued by the IASC and they

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

take effect as from the Telecom Group's fiscal year beginning January 1, 2003.

As the Board of Directors has intended:

- a) to adopt accounting principles consistent with IAS and
- b) minimize the differences to the U.S.GAAP

the management of the Company decided the early adoption of the new accounting standards from fiscal year 2002, in accordance with CNV Resolution No. 434. Additional information on the impact of these new accounting standards on the Company's financial condition and the results of operations is given in Note 3.1.c.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

So, the Company's consolidated financial statements have been prepared in accordance with Argentine GAAP (RT 4, 5, 6, 8, 9, 14, 16, 17, 18, 19 and 20 established by the FACPCE, modified by the CPCECABA and adopted by the CNV. The consolidated financial statements include certain reclassifications and disclosures to conform more closely to the form and content required by the SEC.

Where investments in subsidiaries are accounted for by the equity method, Argentine GAAP requires companies with a controlling financial interest in other companies to present both parent company and consolidated financial statements as primary and supplementary information, respectively. Because of the special purpose of these consolidated financial statements, the parent company's summarized financial information is included in Note 17. This approach has been adopted for the convenience of the reader of the financial statements.

In accordance with procedures defined in FACPCE RT 4, financial statements at March 31, 2003 and 2002 and at December 31, 2002 have been consolidated on a line by line basis for majority-owned subsidiaries Publicom, Personal, Núcleo, Cable Insignia, Micro Sistemas and Telecom Argentina USA.

The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

These consolidated financial statements are unaudited but, in the opinion of management, reflect all adjustments (consisting only of normal recurring adjustments) necessary to present the financial position and results of operations on a basis consistent with the audited fiscal year financial statements.

a) Financial statements used for consolidation

Financial statements at March 31, 2003 and 2002 and at December 31, 2002, for the three month periods/year ended at those dates have been used for the consolidation. Consequently, these periods coincide with those of the Company.

b) Foreign currency translation

The Group follows FACPCE RT 18 with the amendments introduced by the CPCECABA to translate the foreign corporations financial statements (Núcleo, Telecom Argentina USA, Latin American Nautilus and Intelsat Ltd.) into Argentine pesos for purposes of consolidation, total or in a line, considering that companies as companies non integrated.

According to this RT, the investments in these companies have been valued at exchange rate at period-end.

Exchange rates differences resulting from the translation of those financial statements are included in the Company's consolidated balance sheet in Temporary differences from translation.

c) Effect of the new accounting standards in the consolidated financial statements

The adoption of the new accounting standards in accordance with CNV Resolution No. 434, resulted in changes of valuation and disclosure criteria that have been recorded by the Group as of December 31, 2002 and March 31, 2002 as per the following detail:

Changes in the valuation criteria of assets and liabilities

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

1. **Accounting measurement of certain assets and liabilities at their current value.** RT 16, which establishes the notions of professional accounting standards, includes as one of the measurement criteria, the use of the discounted amount of the net cash flow to be received and disbursed for receivables and liabilities, respectively, (current value). As a result, RT 17 provides as general criteria the accounting measurement of certain receivables and liabilities in currency based on the calculation of its current value, using the internal rate of return determined at the time of measurement, except the company intends and finds it feasible to dispose of its assets or advance payment of its liabilities.
2. **Liabilities arising from refinancing.** RT 17 establishes that when an arms length debt is replaced with another one, the terms of which are substantially different from the original ones, the pre-existing account will be written off and a new debt will be acknowledged, the accounting measurement of which shall be made based on the best possible estimate of the sum payable, discounted using a rate evidencing the market assessments on the time value of money and the specific risks of the debt. In addition, the standard provides, without admitting any evidence to the contrary, that the terms are substantially different if the discounted value of the new debt differs at least by ten percent from the discounted value of the refinanced debt. In such regard, as stated in Note 7, the agreements entered into during FY 2002 by the TITAN Financial Trust are a refinancing, so that Personal accounted for this operation conformed with the new accounting standards, using a discount rate of 12% p.a. in US dollars.
3. **Derivative Financial Instruments.** RT 20 establishes the particular valuation and disclosure criteria for derivative instruments and hedging transactions. As per this standard, hedging derivative instruments must be acknowledged in financial statements as assets or liabilities at their current values as of the measurement date. In the case of a derivative instrument to protect cash flow risks, the change in its current value is charged, as per the CPCECABA s amendment, to a specific account called Temporary measurement differences of derivative instruments determined as an effective hedge included in the balance sheet and which shall be reclassified as income of the period when assets or liabilities subject matter of the hedge have an impact on such period s income. Instead, in the case of a derivative instrument to protect the risks of changes in the current value, changes in the current value are directly charged to income of the period. In both cases, the non-cash portion of derivative financial instruments is directly charged to income of the period when such event is known. As of March 31, 2003, the application of this standard did not give rise to any accounting effect for there were no current derivative instrument existing as of such date and comparative figures were not adequate since the transition standard establishes the non-correction of accounting balances of years prior to the first year of application.
4. **Temporary differences from translation.** RT 18 amended by CPCECABA establishes that the exchange differences arising from translation of financial statements issued in foreign currency shall be exposed as an additional chapter between liabilities and the stockholders equity called Temporary differences from translation instead of

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

their being acknowledged as income of the period or include in an specific account in the Shareholder's equity (criteria adopted by the IAS and adopted by the FACPCE).

5. **PCS license.** RT 17 amended by CPCECABA in item 5.13.3 establishes that if the useful life of an intangible asset is undefined, its depreciation may not be necessary, subject to comparisons of the accounting residuary value and its recoverable values. Therefore, the management of the Company decided to suspend the systematic depreciation of the PCS license as from year 2002 considering that the accounting residuary value of such license does not exceed the estimated recoverable value.

Changes in disclosure criteria

1. **Reclassification of costs directly associated with sales.** RT 19 establishes that only reimbursements and allowances may be deducted from sales. Therefore, turnover tax and other costs directly associated with sales were reclassified at operating costs.
2. **Goodwill.** RT 19 provides for the breakdown of the goodwill in a specific caption within the balance sheet separating it from the Intangible Assets caption. Depreciation of the caption must be set forth in the consolidated statement of operations as Depreciation of goodwill. In previous periods, the Company included it within Equity losses from related companies.

Other direct costs of sales	(8)
Subsidiaries	
Turnover tax	(13)
	<hr/>
Higher operating costs	(81)
	<hr/>
Net effect of reclassifications in the Consolidated statements of operations	

d) Accounting for inflation

The consolidated financial statements have been prepared in million of Argentine pesos of constant currency, recognizing the inflation effects. In order to prepare the accounting for inflation, it was used the mechanism established by RT 6, amended by RT 19, considering the Wholesale Internal Prices Index, as from January 1, 2002, according to National Government Decree No. 1269/02.

Nevertheless, the National Government, through Decree No. 664/03, ordered the Regulatory Bodies, subordinate to the National Government, to not receive financial statements in constant pesos. Therefore the CNV, through its Resolution No. 441/03, resolved to discontinue the application of the restatement in constant pesos established by RT 6 and its amendments from March 1, 2003. The Company has performed this CNV resolution.

Nevertheless, for the CPCECABA the RT 6 continues being in force despite of the low levels of inflation registered (0.74% for the period January February 03). The management of the Company has analyzed the effects for the discontinuation of the restatement in

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

constant pesos method from March 1, 2003 and considers that such effect has no significant incidence in its operations results and its financial position because in March 2003 the level of inflation was 0.6%.

The comparative figures in constant pesos corresponding to the three month period ended March 31, 2002, were adjusted using the wholesale internal prices index 1.6647, related to the period March 02 February 03.

Implicit financing costs have been segregated in the disclosure of assets and liabilities, where significant.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

e) Change in the accounting standards

In February 2003, the CPCECABA approved with some amendments the RT 21 of the FACPCE Equity method- Consolidated financial statements Disclosure about related companies which will be in force for the fiscal years beginning April 1°, 2003, admitting its early adoption. At the date of issuance of these consolidated financial statements, this RT has not been adopted by the CNV yet.

f) Financial instruments to hedge financial risk or reduce financing costs

During the period in which the Convertibility Law that fixed the exchange rate between Argentine peso and the dollar at \$ 1 = US\$ 1 was in force, as part of its risk management strategy, Telecom Group had decided to convert a significant portion of its debt obligations denominated in foreign currencies other than the U.S. dollar to the U.S. dollar in order to reach a natural hedge with its income fixed in dollars. Occasionally, the Group had also swapped the interest on debt in order to balance its financial payments between fixed and floating interest on debt.

However, due to the change in current macroeconomic conditions occurred at the beginning of year 2002, Telecom Group terminated all of its foreign currency and interest rate swap agreements during the second quarter of the year 2002 (see Note 7).

The Company and its subsidiaries do not invest in speculative derivative financial instruments.

g) Concentration of credit risk

The Company and some of its subsidiaries provide telecommunication services to residential, commercial and governmental clients, granting credit in accordance with regulations governing such services, generally without security. The fixed customer lines (pre-paid lines were not included) were 3,266,389 and 3,441,574 at March 31, 2003 and 2002, respectively, and the cellular customer lines (pre-paid lines were not included) were 426,687 and 647,214 at these dates, respectively, and represents a diverse customer base.

The risk of collectibility varies among customers largely due to the individual financial situation of the customer. The Group evaluates the risk of uncollectable accounts and provides an allowance for doubtful accounts receivable.

h) Cash and cash equivalents

In the Consolidated statements of cash flows, the Company includes as cash and cash equivalents all highly liquid investments purchased with an original maturity of three months or less.

i) Revenue recognition

Revenue is recognized as services are provided to customers. Revenue recognized may result in receivables not yet billed to customers.

However, in the case of revenues for installation fees, the Company recognizes them in the period in which the installation service is completed, jointly with the related costs. Considering that the installation costs are higher than the related revenues, it is considered that this criterion corresponds with U.S.GAAP (see Note 18), because U.S.GAAP requires the deferral of the installation fees and the related costs considering the estimated average useful life of

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

customers. However costs in excess of the related revenues cannot be deferred.

For services paid for by the customers but not yet provided to them, the Company records a liability.

Both services provided for but not billed and services paid for but not rendered, are estimated using technical measurement information systems.

j) Net income (losses) and dividends per share

The Company calculates net income (losses) and dividends per share on the basis of 984,380,978 common shares outstanding with a \$1 nominal value and one vote per share.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

3.2. Principal valuation criteria

- a) **Balances in foreign currency:** at exchange rates existing at each period-end. Exhibit G shows details of foreign currency balances. Foreign exchange gains or losses expressed in constant pesos, net of the effect of the inflation, were credited to or charged against net income of each period, as appropriate.

As the devaluation of the peso had been significant, the CPCECABA issued Resolution No. 3/02, subsequently adopted by CNV Resolution No. 398, that required for the capitalization of foreign currency exchange differences by debt, originated in the devaluation of the Argentine peso as from January 6, 2002.

The Company calculated the capitalization following the methodology described in these resolutions. The financial results capitalized (devolved) are detailed in Note 4.s and Exhibit A.

- b) **Cash and banks in pesos:** at nominal value plus accrued interest at each period-end, where applicable.

As part of the credit collection from the public sector, the Company has received bonds to cancel the credits for services rendered to the different provincial governments. Notwithstanding the foregoing, because of the economic crisis affecting the national and provincial public sector, the fall of the price of such bonds has been very significant and it is not expected to suffer any changes in the short term. Consequently, despite the intention to hold the provincial bonds until their maturity date, the management of the Company decided to value since December 31, 2001, the holding of these bonds at their estimated sales price. Likewise, those public bonds received as part of the collection of the particular clients, have been valued as follows:

- a) *at its nominal value without accruing any interests-*: for the holding of bonds that the Company applies for their value and in the short term in order to cancel its tax and commercial liabilities. At March 31, 2003 the Group holds \$12 million of bonds with these characteristics, which were included in Cash and Banks.
- b) *at its estimated sale price*: for the holding of bonds that cannot be applied in the short term in order to cancel tax and commercial liabilities. At March 31, 2003 the Group holds \$26 million of bonds with these characteristics, which were included in Cash and Banks. The results from holding these kind of bonds were a loss of \$3 million, that are included in Financial and holding results in the Consolidated statement of operations.
- c) **Trade accounts and other receivables in currency and liabilities originated in the sale or purchase of goods and services and in financial transactions:** at its accounting measurement, as a result of the discounted value of the cash flows that will be generated by assets and liabilities by using the internal rate of return at the moment of the initial measurement. This measurement does not significantly differs from the nominal value plus accrued interest at each period-end.

Premiums or discounts are amortized on a straight-line basis over the debt period. Legal fees, commissions and other bond issuance costs corresponding to debt issuance are capitalized as Intangible

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

assets and amortized over the term of the corresponding debt. Amortization is classified within Financial and holding results in the Consolidated statement of operations.

- d) **Other receivables and liabilities in currency not included in c) above (except for deferred tax assets and liabilities and retirement benefits):** at its accounting measurement, as a result of the discounted value of the cash flows that will be generated by assets and liabilities by using the internal rate of return at the moment of the measurement. This measurement does not significantly differs from the nominal value plus accrued interest at each period-end.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

e) Investments:

Public bonds to be held to maturity: at cost plus amortized discount earned using the internal rate of return at date of purchase.

Other public bonds: at market value less estimated sales costs.

Equity investments:

subsidiaries in the unconsolidated financial statements: at VPP based upon subsidiaries financial statements and using comparable accounting criteria as are used for the Company's consolidated financial statements.

related companies: at VPP based upon related companies financial statements and using comparable accounting criteria as are used for the Company's consolidated financial statements. In those companies where their financial statements closing date is different than that of the Company, financial statements with a closing date of no more than three months are used for consolidation purposes.

The management of the Company is not aware of any event that modifies its financial position or the results of its operations or significantly affects the valuation of its investments in subsidiaries or related companies and the corresponding results at March 31, 2003, since the approval date of their financial statements.

Investment in Intelsat Ltd.: at acquisition cost or VPP, the least.

Capital contributions: at nominal value restated as detailed in Note 3.1.d.

Investments in foreign companies were valued at exchange rates existing at each period-end. Foreign exchange gains or losses are accounted for in the Temporary differences from translation caption of the Consolidated balance sheets. Investments are detailed in Exhibit C and D.

f) Inventories: at each period-end replacement cost. Inventories have been recorded at amounts, which do not exceed their net realizable value.

The sales prices of cellular handsets are influenced by a marketing strategy to achieve higher market penetration by reducing customer access costs, without losing sight of the overall cellular business profitability. As a result, on occasion, the management of the Company decides to sell handsets at prices lower than replacement cost. As these sales price policies are the result of decisions of the management of the Company, promotional prices are not used to calculate the net realizable value of such inventories.

g) Other assets:

Deferred printing costs: at cost restated as detailed in Note 3.1.d, which is expensed as directories are issued.

Raw materials: at each period-end replacement cost, net of the allowance for obsolescence. Raw materials, taken as a whole, are not valued in excess of recoverable value.

h) Fixed assets:

Transferred from ENTel: at the transfer price, restated as detailed in Note 3.1.d less accumulated depreciation at period-end. At March 31, 2003, title transfer of 4.73% of these assets

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

remains to be completed; the Company is in full possession of these assets and they are integrated into the economic activity of the Company.

Acquired subsequent to November 8, 1990: at acquisition cost, restated as detailed in Note 3.1.d less accumulated depreciation.

The cost of fixed assets which construction over a prolonged period of time is financed includes capitalized interest on associated third party financing. These costs are detailed in Note 4.s.

Fixed asset acquisitions financed by leases are recorded at the estimated price which would have been paid on a cash basis, with the unpaid amount discounted using the internal rate of return at the moment of the initial measurement (including the purchase price option), recorded as a liability. At March 31, 2003 the Company holds capital leases in the amount of 2, which due dates are within fiscal year 2003. A summary by major class of fixed assets covered by capital leases at March 31, 2003 is as follows:

	<u>Book value</u>	<u>Lease terms</u>	<u>Amortization period</u>
Computer equipment	37	3 to 4 years	2, 3 and 6 years
Accumulated depreciation	(29)		
Net value	8		

Fixed assets, whose operating condition warrants replacement earlier than the end of the useful life, are depreciated based on the remaining useful life assigned in accordance with the Company's investment plan.

Fixed assets are depreciated using the straight-line method over the estimated useful lives of each asset class.

The recoverable value of the fixed assets depends on the capacity to generate net cash flows sufficient to absorb the net book value during the periods it is estimated these assets will be useful for the Group.

The management of the Company periodically evaluates the recoverable value of such fixed assets by the preparation of economic-financial projections considering alternative scenarios based on macroeconomic, financial and telecommunications market hypothesis, which are considered probable or conservative. Notwithstanding the foregoing, the devaluation of the Argentine peso and the pesificación of the public services tariffs and the contracts between private parties executed before January 6, 2002, set forth a significant change in the rules for all of the economic factors of the country.

Despite the already mentioned difficulties and considering section 9 of mentioned Law No. 25561 which states that the National Government shall consider the profitability of the public services companies in order to assess the recoverable value of the fixed assets, the management of the Company have adopted for their projection of incoming cash flows the modification of its tariffs which allows it to recompose the economic-financial equation of the Company in a non-regulated and competitive market, with reasonable levels of profitability to pay its shareholders and financial creditors. Additionally, the economic financial projections include the satisfactory results of the Group's financial debt restructuring described in Note 12.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Based upon the described methodology regarding the recoverable value of the assets and the expected results of the processes of renegotiations of the Company's tariffs and the financial debt of the Group, the management of Telecom considers that fixed asset and intangible assets, taken as a whole, are not valued in excess of recoverable value.

Fixed assets activity is detailed in Exhibit A.

i) **Intangible assets:** at acquisition cost, restated as detailed in Note 3.1.d less accumulated amortization at period-end.

The cost of intangible assets developed over a prolonged period of time includes capitalized interest on associated third party financing. These costs are detailed in Note 4.s.

Intangible assets are depreciated using the straight-line method over the estimated useful lives of each asset class, except for PCS license, as follows:

System development costs	60 months
Debt issue costs	Initial debt term
Usage rights	180 months
Exclusivity rights	Contract term
Websites	24 months
Trademarks and patents	180 months

The Company has suspended the amortization of the PCS license as from FY 2002 in accordance with the new accounting standards, because it is an intangible with non-defined useful life, which accounting value does not exceed its estimated recoverable value at period-end.

Intangible assets activity is detailed in Exhibit B.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

j) Goodwill: at acquisition cost, restated as detailed in Note 3.1.d less accumulated amortization at period-end. Goodwill is depreciated using the straight-line method over a sixty month period.

k) Dismissal indemnities and termination payments are charged to Other expenses when a termination decision is made.

l) Taxes payable:

Tax on minimum presumed income: the Telecom Group has estimated tax loss carryforward by the end of fiscal year 2002. Consequently, for the three month period ended March 31, 2003, a credit for tax on minimum presumed income was recorded and has been included in Non-current Other receivables, because it was estimated that the payments for this tax will be recoverable within the legal term of prescription.

Turnover Tax: for the three month periods ended March 31, 2003 and 2002, turnover tax as an overall percent of applicable revenues was 3.64% and 3.13%, respectively.

m) Other liabilities:

Retirement benefits: represent obligations for accrued and unpaid benefits stipulated in collective bargaining agreements. Accruals are actuarially determined based upon existing information at each period-end.

n) Reserves:

Asset reserves: have been provided for doubtful accounts receivable, other receivables for the recoverability of the deferred net assets and for inventories whose realization is not assured based upon period-end analyses.

Liability reserves: have been provided for contingencies based upon management estimates and the opinion of legal counsel.

Activity in these reserves is detailed in Exhibit E.

o) Shareholders equity accounts: they are restated as described in Note 3.1.d, except Capital stock, at nominal value. The restatement is included in Adjustment to capital stock.

p) Statement of operations accounts: they are restated as follows:

Edgar Filing: TELECOM ARGENTINA STET FRANCE TELECOM SA - Form 6-K

charges by consumption and non monetary assets depreciation (fixed and intangible assets) were recorded considering the restated amounts;

financial results in constant pesos are disclosed net of the effect of the inflation generated by the corresponding assets and liabilities;

equity results from related companies, at the VPP based upon the financial statements of the companies detailed in Exhibit C, as indicated in Note 3.2.e.

other results at cost restated as described in Note 3.1.d.

NOTE 4 DETAILS OF PRINCIPAL CONSOLIDATED FINANCIAL STATEMENTS CAPTIONS

NOTE 5 SUPPLEMENTARY CONSOLIDATED CASH FLOW INFORMATION

The Group uses the indirect method of reconciling net income to cash flows provided by operating activities.

Funds in excess of daily cash needs are invested in short term investments with maturities of less than three months and, as a result, such investments are not presented in the Consolidated statements of cash flows.

The reconciliation of cash and cash equivalents with cash and cash equivalents balances included in the Consolidated balance sheets is as follows:

	<u>March 31,</u>		<u>December 31,</u>	
	<u>2003</u>	<u>2002</u>	<u>2002</u>	<u>2001</u>
Cash and banks	114	189	89	129
Short term investments	1,635	599	1,326	332
Total of cash and cash equivalents in the Consolidated balance sheets	1,749	788	1,415	461
Less:				
a) National and provincial public bonds (Note 4.a)	(38)	(110)	(36)	(32)
b) Short term investments with maturities of more than three months	(55)		(65)	
Argentina 2004 Bond (Exhibit C)				
Total of cash and cash equivalents in the Consolidated statements of cash flows	1,656	678	1,314	429

Additional information on the funds provided by operating activities, segregating the financial and holding results included, is as follows:

	<u>Three month periods ended March 31,</u>	
	<u>2003</u>	<u>2002</u>
Foreign currency exchange (losses) gains on cash or cash equivalents	(129)	300
Results on exposure to inflation of funds at beginning of period	(10)	(105)
Collected interests	24	13

Subtotal	(115)	208
Net cash provided by operating activities	449	542

NOTE 6 TRANSACTIONS AND BALANCES WITH RELATED COMPANIES AND PARTIES AND CONTROLLING COMPANY AS DEFINED UNDER LAW No. 19550 SECTION 33

a) Controlling company

Nortel, headquartered at Alicia Moreau de Justo 50, 11th floor, Ciudad Autónoma de Buenos Aires, holds 51% of the Company's Class A shares and 8.47% of the Company's Class B shares (representing 3.74168% of the Company's shares), which places it in control of the Company under Law No. 19550, Section 33. Ownership of Nortel is equally divided between the Operators.

b) Related parties

Related parties are those legal entities or individuals other than the controlling company or related companies defined under Law No. 19550, Section 33, and which are related to the Operators.

c) Management Contract. Suspension of certain services and payment of the Management Fee until the Contract maturity.

In accordance with point 3.1.3 of the Pliego, the Company, at the beginning of its operations, entered into a management agreement with the Operators, approved by Decree No. 2332/90 as appendix of the Transfer Agreement. The Management Contract would be automatically renewed as long as the Company continued to provide services during the exclusivity period.

Under this contract, the Operators committed to provide the Company with their experience, technology and operating skills in the area of public telecommunications services including, between other provisions, the selection and hiring of qualified management personnel and technical assistance when required by the Company.

In August 1999, the parties ratified a new five years management contract (the Contract) effective since the expiration date of the

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

previous contract with terms and conditions substantially equivalent to the original contract, renewable for a subsequent five year period (since the maturity of the exclusivity period of the license, which was on October 9, 1999) upon agreement by all parties.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.*Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer*

In October 2001, considering the Argentine economic recession, the Operators granted the Company a temporary decrease of the fee set forth in Point 2.7 of the Contract (Management Fee), from 3% to 1.25%, without affecting the services to be provided by the Operators or the clauses of the Contract. This decrease was effective during the period extending from October 1, 2001 to March 31, 2002.

Later on, considering the seriousness and extension of the crisis that affected to Argentina and its impact over Telecom's situation, the Board of Directors agreed with the Operators to suspend temporarily except for the provisions of the section referred to as Management and Know-how on highly qualified personnel to assist in the management from April 1, 2002 to December 31, 2002 the rights and obligations of the parties provided for in section II of the Contract, which included the suspension of the accrual and collection of the Management Fee. The latter notwithstanding the special services required by Telecom pursuant to what is specifically provided in the Contract. Likewise, France Cables et Radio S.A. and Telecom Italia SpA. stated that, as the Operators pursuant to Decree No. 62/90, as amended and supplemented confirmed their intention to provide Telecom with all the reasonable support and cooperation in order to help Telecom overcome its present difficulties, exclusively recovering travelling and hotel expenses related to their involvement in these matters.

Considering that there was an extension of the causes that motivated the agreement before mentioned, Telecom required the Operators to extend all its terms until the Contract maturity, provided in Point 7.2 of mentioned contract (October, 2004), which has been accepted by the Operators.

f) Information on companies of the Telecom Group**Merger with Internacional**

Telintar, a company dissolved and then merged with Internacional, that was then merged into the Company as from October 1, 1999, presented to the DGI in April 1995 a claim for the refund of income and asset taxes of approximately \$6 million. As the DGI has yet to rule on the company's claim, the corresponding requested refund has not been recorded.

Sale of shares of Multibrand

On March 21, 2003, the Company transferred to Shell Compañía Argentina de Petróleo S.A., in the amount of \$3,000, its interest in the related company Multibrand (300 shares of \$10 nominal value per share).

- (b) The series was issued at LIBOR plus 3.125%.
- (c) 6 month LIBOR for Itl plus 1.5%.
- (d) They were originally issued in Italian Lira.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Use of financing proceeds

Series C was applied to restructure liabilities and working capital in Argentina. As a result of the repurchase of obligations in 1997 (US\$72 million) and retirement of obligations on November 15, 1999 (US\$1,873,000), the principal balance outstanding is US\$126,127,000.

Series E was applied to restructure liabilities.

Series F, H, I, K, 1 & 2 were used to restructure liabilities and for working capital in Argentina.

Global debt programs

Global program B

The period for debt instruments permitted to be issued under this program ended August 10, 1999. At March 31, 2003 the Company has six series of bonds outstanding under this program.

Global programs C and D

The Company has two programs for the issue and re-issue of corporate bonds not convertible into shares: one for short-term debt up to US\$200 million (**C**) and one for medium term debt up to US\$1,500 million (**D**). At March 31, 2003 the Company has two series of bonds outstanding under program D.

Characteristics of corporate bonds

Shareholders granted the Board of Directors the authority to set the terms of debt instruments within each program: amount, interest rate, series price and currency denomination.

Debt instruments corresponding to corporate bonds and indebtedness programs have been assessed by two businesses which rate risk within Argentina.

Terms and conditions of corporate bonds establish certain commitments by the Company, in case that:

- a) The Company permits certain liens on assets or revenues in order to offer security for certain debt obligations without offering equal coverage to corporate bonds outstanding.
- b) The Company and its subsidiaries may merge or consolidate with any outside party, selling or otherwise disposing of assets which may be considered integral to the provision of telecommunication services.

Banks loans

Syndicated loans to Telecom

Titan financial trust

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Personal issued two promissory notes dated August 23, 2000 for US\$30 million each, with maturity dates on August 23, 2002 and August 25, 2003, respectively, in favor of Bank of America N.A., Buenos Aires Branch, which were part of the TITAN Telecom Personal 2000 Class I Financial Trust constituted under the zero coupon regime by the mentioned entity according to Law No. 24441 of the Argentine Republic. Simultaneously, Personal and the trustee executed an early cancellation agreement under which Personal, given certain events, agreed to the notes' early cancellation at their current value and to bear the early termination costs arising from the forward purchase agreements that, under the Trust agreement, trustee should contract as coverage of the dollar revenue coming from the notes' collection and the disbursements in pesos deriving from its payment obligation under the debt securities.

Subsequently, Personal notified trustee of the occurrence of a fact that constituted an event of default under the terms of the early cancellation agreement. This situation resulted in the submission of a refinancing proposal modifying the Trust's terms and conditions. Such proposal was accepted by Trustee.

Pursuant to Decree No. 992/02 in relation to the re-organization of the financial system, under which liabilities in dollars of forward contracts were converted into pesos at a rate of US\$1= \$1.40, Personal notified its intention of suspending the negotiations and the execution of the documentation provided for in the proposal. These facts gave rise to controversies between the parties resulting in the execution of an arbitration agreement.

On November 28, 2002 an arbitration court issued a final and unappealable award for the parties providing that after the passing of Decree No. 992/02, Personal was legally bound to carry out the transactions set forth in the proposal, award which has been duly and timely complied with.

In fulfillment of the award, on December 13, 2002, the parties executed an agreement providing for the termination of the early cancellation agreement and the forward contracts with retroactive effect as of June 13, 2002. By virtue of this, Personal undertook the obligation to bear the forward contracts termination costs for an approximate amount of US\$27 million instrumented in four promissory notes denominated in US dollars and governed by the law of the State of New York (the "BofA Promissory Notes"), payable in 18 consecutive quarterly installments after a grace period running from June 13, 2002 to and including December 31, 2003, plus interest at LIBOR plus an annual 3% interest rate payable quarterly as from the expiration of the grace period. Likewise, it was agreed to replace the original promissory notes by a new promissory note for an approximate amount of US\$27 million under the terms and conditions set forth by the law of the State of New York (the "Holders Promissory Note") payable on June 13, 2008 plus interest at LIBOR plus an annual 3% interest rate accruing as of June 13, 2002 that will be quarterly paid as from the expiration of the grace period. The agreement provides that LIBOR plus 3% shall not exceed a 10% annual interest rate.

It should be noted that this debt is not excluded from the financial debt total restructuring that the Telecom Group is carrying out together with its creditors.

Other bank loans

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

In addition, the Group is indebted under bank loans for 1,584 (principal and exchange rate differences), bearing an average annual rate of 4.98%, of which 844 belong to the Company.

Fixed asset acquisitions

Loans received from banks and other financial institutions for varying amounts and maturity dates bear an average annual interest rate of 4.55%. Some of the more pertinent are:

Ceded by ENTel to Telecom

L. Istituto Centrale Per Il Credito a Medio Termine (Mediocredito Centrale) granted the Argentine government a loan credit of approximately Euro 103 million to finance a project for the digitalization of the Argentine telephone network.

The Argentine government ceded to the Company rights to this loan credit for approximately Euro 50 million. Reimbursement of the principal used will be made in thirty semi-annual, equal installments bearing an annual interest rate of 1.75%. The Argentine government continues to be the debtor obligated to repay the Mediocredito Centrale. The Company is obligated to comply with the loan credit's terms and, should it fail to make defined loan installment payments, has authorized the Argentine government to settle such debts with amounts owed the Company for telecommunication services rendered to the government after the date of non-compliance. At March 31, 2003 the balance owed is 127 (principal plus accrued interest), which approximates Euro 39 million.

Japan Bank loan to Telecom

On June 29, 1998, the Company signed a loan agreement with Japan Bank for International Cooperation under which it borrowed Yen 11,652 million on September 9, 1998 with repayment due on June 15, 2010. At March 31, 2003 the balance owed is 295 (principal plus accrued interest).

Inventory acquisitions

Loans received from banks and other financial institutions for varying amounts and maturity dates bear an average annual interest rate of 4.07%.

Derivative financial instruments

As described in Note 3.1.g, Telecom Group had entered into foreign currency swap and interest rate swaps to hedge the different risks exposed in relation to its debts. However, in connection with its decision to suspend the payments on its financial debts described in Note 12, Telecom Argentina initiated discussions with its counterparts to mutually unwind and terminate its interest rate and currency swap obligations, as payments under such hedges were not consistent with the decision to suspend the payments on its financial debt obligations. In addition, as the Argentine peso is no longer pegged to the U.S. dollar, such hedges no longer served their intended purpose. As a consequence, during 2Q02, Telecom Group mutually agreed with its swap counterparts to unwind all interest rate and currency swap agreements.

NOTE 8 CAPITAL STOCK

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

The Company's shares are publicly quoted and traded on the BCBA and the NYSE. Only Class B shares are effectively traded, as Nortel owns all Class A shares and Class C shares are dedicated to the PPP.

Class B shares began trading on the BCBA on March 30, 1992 and on the NYSE, under the symbol TEO, on December 9, 1994 in the form of American Depositary Receipts (ADR or ADS) upon SEC approval of the Exchange Offer. Under provisions of the Exchange Offer, holders of the Company's ADRs which are restricted under Rule 144-A and holders of Global Depositary Receipts issued under Regulation S were permitted to exchange them for unrestricted ADR, equivalent to 5 Class B shares. As from July 15, 1997 Class B shares are traded through the International Quotation System of the Mexican Stock Exchange.

Month end market quotations on the BCBA have been as follows:

<u>Month</u>	<u>1999</u>	<u>2000</u>	<u>2001</u>	<u>2002</u>	<u>2003</u>
	<u>Price per share (in Argentine pesos as of each date)</u>				
January	4.80	7.41	4.48	2.68	2.14
February	5.39	8.37	3.25	2.34	2.60
March	5.44	6.94	3.13	1.79	2.17
April	6.85	5.55	3.15	1.15	3.16
May	5.69	4.94	3.14	0.74	
June	5.50	5.52	3.09	0.60	
July	5.39	5.12	1.97	0.68	
August	5.63	4.70	1.97	0.74	
September	5.42	4.35	1.71	0.70	
October	5.50	3.54	1.25	0.99	
November	5.85	2.96	1.26	1.59	
December	6.88	3.04	1.81	1.69	

Share ownership program

The PPP, established by the Argentine government, included 10% of the Company's shares, representing the Class C shares transferred to the former employees of ENTel by the government in December 1992. These shares were pledged to guarantee the balance of the sales price owed by the Company's shareholders to the Argentine government. Prepayment of the balance owed was approved by Decree No. 1623/99 and made by the PPP in March 2000, thereby releasing the pledge.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Shares held by the Guaranty and Repurchase Fund (the Fund) of the PPP were restricted from sale until an injunction was released. Once the injunction is lifted, the Fund may sell an amount of shares necessary to cancel the debt owed to former employees participating in the PPP. Shares then remaining in the Fund will be distributed in accordance with the decision of the majority of employees at a special meeting convened in accordance with Decree No. 584/93 Section 15.

The Shareholders Meeting of March 14, 2000 approved the conversion of 52,505,360 Class C shares affected to the PPP into Class B shares to facilitate their sale. In May 2000 participating PPP shareholders sold 50,663,377 shares nationally and internationally as approved by the CNV and as registered with the SEC. As of December 31, 2002, 52,415,411 Class C shares have been converted into Class B shares.

On September 17, 2002, the Judicial Inspector of the PPP required Telecom to take the necessary steps to convert 15,000,000 Class C shares held by the Fund into Class B shares since the precautionary measures that affected them had been raised. Telecom replied that a conversion requires a Shareholders Meeting and further proposed to obtain judicial authorization so that said Meeting should consider the conversion of all Class C shares into Class B shares in order to avoid holding successive Meetings every time any shares held by the Fund were released from precautionary measures. The PPP Inspector informed that he had not gotten the judicial authorization yet. The Company is considering this matter.

Transfer of Telecom's listed shares and Corporate bonds to a reduced trading panel

As long as the negative retained earnings absorb the totality of reserves and more than fifty per cent of the adjusted capital stock, the BCBA resolved to trade Telecom's listed shares in a reduced trading panel, according to the provisions of Section 38 incises b) and c) of the Rules to List in the BCBA. By the same causes and as a consequence of the suspension of payments of its financial debt, it has also been transferred to a reduced trading panel the trading of the Company's Corporate bonds, according to the provisions of Section 39 incises a) and c) of the above mentioned Rules.

ADRs listing in NYSE

Under NYSE rules, the ADRs average closing price of a security cannot be less than US\$1.00 over a 30-day trading period. Consequently, on July 29, 2002, Telecom was notified by the NYSE in order to meet the minimum share price criteria, by bringing its share price and average share price back above \$1.00 within six months of receipt of the notification; if not, the ADRs would be delisted. The Company replied to the NYSE informing that the necessary actions would be taken in the corresponding terms, in order to meet the NYSE standards.

However, the NYSE had requested Telecom to inform if the measures to correct the minimum average share price would be adopted by the Board of Directors within six month of receipt of the notification or if the issue would be discussed in the next Shareholders Meeting.

Edgar Filing: TELECOM ARGENTINA STET FRANCE TELECOM SA - Form 6-K

After ratifying its intention of adopting the provisions necessary to meet the minimum price criterion set forth by the NYSE and, thus, maintain Telecom s ADRs listing in the market, the NYSE was informed that the issue would be submitted to the Shareholders consideration including it in the Agenda of the next Annual Shareholders Meeting.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

In the meantime, Telecom's share price increased and ADRs met once again NYSE's standards on minimum price per ADR, so the Board proposed the Shareholders' Meeting to grant it the powers to order an increase in the number of shares evidenced by each Telecom ADR (the Ratio Change), if it were necessary. The mentioned Shareholders' Meeting approved the Board's proposal, granting power to make the Ratio Change and establish the terms and conditions of the operation when it were necessary, or if the Board deemed it convenient.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Causes of mandatory reduction of capital stock

Due to the significant reduction in Telecom's shareholders' equity as a consequence of the losses reported in fiscal year 2002, because of the economical and social crisis that took place in the Argentine Republic and that have absorbed the totality of reserves and more than fifty per cent of the adjusted capital stock, at the date of issuance of these consolidated financial statements, the Company would be under the provisions of section 206 of the Argentine Corporation Law referring to the mandatory reduction of capital stock.

However, the National Government through Decree No. 1269/02, has suspended the application of sections 206 and 94, incise 5 of the Argentine Corporation Law until December 10, 2003. Section 94 incise 5 sets forth as a cause of dissolution of a company the loss of capital stock. This situation arises when the Company reports a negative shareholders' equity.

NOTE 9 INCOME TAX: ADOPTION OF THE DEFERRAL METHOD**Income tax**

The composition of the income tax recorded in the consolidated statement of operations is the following:

	Three month periods ended March 31,	
	2003	2002
Deferred income tax benefit (expense)	(364)	2,039
Restatement in constant pesos		375
Deferred income tax (expense) related to the restatement in constant pesos of fixed assets, intangible assets and other assets(*)	48	(706)
Subtotal	(316)	1,708
Use (increase) of allowances for net deferred tax assets	317	(9)(**)
Total income tax	1(***)	1,699

(*) Corresponds to the temporary differences originated in the restatement in constant pesos of fixed assets, intangible assets and other assets.

(**) Corresponds to Núcleo.

(***) Corresponds to Publicom.

Deferred income tax

Telecom group has accounted for income taxes under the deferral method according to the FACPCE RT 17.

Deferred income tax at each period-end has been determined based upon the temporary differences between the financial and tax bases of assets and liabilities. Deferred tax assets arise largely from asset realization allowances not deductible for tax purposes, from tax loss carryforwards and from tax basis of foreign currency exchange differences generated by debts in foreign currency. Deferred tax liabilities principally arise from differences in fixed and intangible assets valuation as compared to the tax basis of such assets, substantially due to differences in depreciation and the tax treatment of financial results capitalized in those captions (interests and foreign exchange differences) and the accounting for inflation.

To account for these differences, it is used the liability method of accounting. Under this method, deferred income taxes are established for all temporary differences, recognizing their variations in Income tax in the consolidated statement of operations. In these aspects, RT 17 is substantially consistent with SFAS 109 and with IAS 12.

In accordance with Argentine GAAP related to income taxes accounted for by the deferral method, the recoverability of tax credit carryforwards against future income must be evaluated and requires a careful analysis of their

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

recoverability. Deferred tax credit recoverable value depends on the existence of future profits subject to income tax sufficient to be used before the legal lapse of the right.

The National Government, through Decree No. 2568/02 dated December 11, 2002, stated that net losses from exchange differences of assets and liabilities in foreign currency in existence up to January 6, 2002 must be determined considering the exchange rate of US\$1=\$1.40 and should be deductible for income tax purpose only at a rate of 20% per year starting in fiscal year 2002. Consequently, the difference between the \$1.40 rate and the exchange rate at year 2002 end (\$3.37) should be entirely deducted for income tax purpose in fiscal year 2002.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.
Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

This Decree nullified the interpretation of the Company and its fiscal counsel, which considered that the whole exchange difference would be deferred in the period 2002 – 2006. As a consequence of this and considering the five year prescription period for tax loss carryforward, the probabilities to obtain enough taxable profits in the period 2003 – 2007 in order to use the tax credit carryforwards existing at December 31, 2002 and the deductible exchange differences for the next four fiscal years, have diminished. So, the management of the Company has decided to record a reserve at December 31, 2002, in addition to the existing reserve of Núcleo, for the total net deferred tax credits of Telecom and Personal.

Regarding the recoverability of tax credit on minimum presumed tax of \$100 million, as the prescription period is ten years, the Board of Directors of Telecom estimates that its recoverability is probable based on the economic-financial projections.

The following summarizes the composition of the deferred income taxes:

	Consolidated balance sheets at	
	March 31, 2003	December 31, 2002
	<u> </u>	<u> </u>
<u>Net current deferred tax assets (liabilities)</u>		
Allowance for doubtful accounts receivable	95	96
Capital leases	(1)	(1)
Reserves	3	3
Fixed assets	(354)	(349)
Intangible assets	(34)	(29)
Capitalized financial results on fixed and intangible assets, net of depreciation	(74)	(79)
Income tax loss carryforward	348	281
Foreign currency exchange differences originated in the devaluation of the peso		64
Others	20	18
	<u> </u>	<u> </u>
Total net current deferred tax assets	3	4
	<u> </u>	<u> </u>
<u>Net non current deferred tax assets (liabilities)</u>		
Reserves	54	49
Retirement benefits	2	2
Fixed assets	(1,369)	(1,447)
Intangible assets	(27)	(38)

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Accounting for the restatement in constant pesos of non monetary assets under the deferred tax method. Impact of Resolution M.D. No. 11/2003 issued by the CPCECABA (the Resolution)

Currently, there are two alternative criteria followed by accountants to report deferred tax asset and liabilities (RT17, section 5.19.6.3) generated by the restatement in constant pesos of non-monetary assets.

The first one is proposed by the FACPCE, and is in line with the NIC and the U.S. GAAP and consistent with RT10 that was replaced by the above mentioned RT17. This criterion is grounded on its recent Project No.3 of Interpretation Accounting for Income Tax under which the differences between the adjusted per inflation book and fiscal value should be reported as a temporary difference.

Taking into account the provisions of RT17, section 5.19.6.3.1, the exceptions expressly included, the theoretical support and the international rules that were used as a basis for the restatement of the Argentine GAAP, during the fiscal year ended December 31, 2002, the Company has followed the criterion of considering the difference between the book value (adjusted per inflation) and the fiscal value of its non-monetary assets as a temporary difference. This standpoint was subsequently ratified by the mentioned FACPCE's interpretation in 2003.

However, the Resolution issued by the CPCECABA dated April 2, 2003, has construed that the effect of restating fixed assets in constant pesos does not constitute a change of valuation of such assets, but rather an adjustment of the numerical manner of reporting them into a uniform unit measure. Therefore, this resolution has provided that such effect should be considered as a permanent difference. This criterion seems to be lined up with the comparison method between the accounting and the fiscal income and, therefore, inconsistent with the liability method of accounting set forth by the NIC and the U.S. GAAP.

Prior to issuing these financial statements, Telecom consulted the CNV to establish its opinion on this matter and be able to apply it to the financial statements ended March 31, 2003. At the date of issuance of these consolidated financial statements, the CNV has not answered the inquiry.

Consequently, and until Telecom obtains an answer, the Management of Telecom has decided to continue to consider the difference that arises between non-monetary assets adjusted book value and fiscal value as a temporary difference, all pursuant to the NIC and the U.S. GAAP.

In any event, since the Management of Telecom considers it unlikely that it will recover its net deferred tax assets, the impact of applying the Resolution is only limited to an disclosure problem within the caption Other credits in the consolidated balance sheet and in the Income Tax caption in the consolidated statements of operations as of March 31, 2003, as follows:

Net deferred tax assets (Other receivables)

	Net deferred tax assets	Allowance for net deferred tax assets	Total net deferred tax assets, net of allowance
	<u> </u>	<u> </u>	<u> </u>
Consolidated balance sheets	257	(243)	14
<u>Estimated effect of Resolution No. 11/03:</u>			
Elimination of tax effect related to the restatement in constant pesos of fixed assets, intangible assets and other assets	1,276		1,276
Increase of allowances for net deferred tax assets		(1,276)	(1,276)
	<u> </u>	<u> </u>	<u> </u>
Adjusted balances	1,533	(1,519)	14
	<u> </u>	<u> </u>	<u> </u>

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Income tax (Consolidated statements of operations)

<u>(loss) profit</u>	<u>Actual criterion</u>	<u>Effect of Resolution No. 11/03</u>	<u>Adjusted amounts</u>
Deferred income tax	(364)		(364)
Deferred income tax related to the restatement in constant pesos of fixed assets, intangible assets and other assets	48	(48)	
Subtotal	(316)	(48)	(364)
Use of allowances for net deferred tax assets	317	48	365
Total income tax	1		1

As indicated above, if there is a change in the projections related to the recoverability of deferred tax credits, the new rule established by the Resolution will have a significant impact on the financial situation and the Group's operating result.

NOTE 10 COMMITMENTS AND CONTINGENCIES

- Purchase commitments**

At March 31, 2003, the Group had entered into purchase contracts with domestic and foreign vendors totaling 33 for: switching and PCS network transmission equipment, construction of network, the repair and/or installation of public telephones, infrastructure works and other services. In general, the contracts have been or are expected to be financed, directly or indirectly, by domestic and foreign vendors.

- Contingencies**

In the normal course of operations, the Company is involved in various legal, fiscal and regulatory proceedings. Such operations are influenced by the development of the legal and regulatory framework of the Argentine telecommunications market.

Some of these proceedings relate to claims of former employees of ENTel, who claim the Company together with ENTel are jointly responsible for various labor claims arising prior to the Company's assumption of operations. In the Transfer Agreement, ENTel and the Argentine government have expressly assumed the obligation to compensate the Company regarding any costs it might experience as a result of such labor claims. Under the Debt Consolidation Law, ENTel and the Argentine government may discharge their above-described obligations to the Company by the issuance of bonds to the Company. At December 31, 2002 pending amounts claimed in legal proceedings total 15.

In November 1995 the Company, Telefónica, Telintar and the Argentine government were served notice of a complaint by a consumer group, Consumidores Libres Cooperativa Limitada de Provisión de Servicios Comunitarios . The suit, entered before the National Court of Federal Administrative Disputes No 7, seeks to declare null and void all regulations and rate agreements since the Transfer Agreement, in order to reduce SBT rates charged by licensees, so that licensees realize a rate of return of not more than 16% annually on fixed assets as described in Point 12.3.2 of the List of Conditions. Additionally, the claim requested return of amounts earned in excess of this rate of return. The Court of Appeals rejected some claims and deferred decisions on others until a formal decision is made, being in an evidentiary phase currently.

Court Room No. 4 of the Court of Appeals, has issued a preliminary injunction ordering the Government and the joint defendant companies, in which Telecom is included, not to carry out the tariffs changes

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

established by section 2 of the agreements approved by Decree No. 2585/91 until a final resolution is issued in the case. This preliminary injunction affects the current tariff regime in Argentina because it suspends the abilities of the telecom companies to increase the tariffs charged based upon the IPC in the USA, one of the terms of the Price Cap formula included in the section 2 of the above mentioned agreement. On October 15, 2001, the Company was served notice about this preliminary injunction and has filed an extraordinary appeal before the Argentine Supreme Court of Justice.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

In addition, the recent enactment of Law No. 25561 has adopted an analogous decision by suspending US dollars or foreign currency adjustments clauses adopted under public contracts executed by the National Government, including works and public services.

On October 30, 2002, the CNC, through Resolution No. 1144/02, required the Company not to invoice the municipal taxes increase to its customers and to reimburse them the amounts billed for that concept. The Company has filed an appeal against this resolution.

Although the outcome of the above mentioned contingencies may not be predicted with certainty, the management of the Company and its legal counsel believe that the resolution of such matters will not have a material adverse impact on either Company operations or financial position.

NOTE 11 RENEGOTIATION OF CONTRACTS WITH THE PUBLIC ADMINISTRATION

From the enactment of Law No. 25561, US dollars or foreign currency adjustments clauses and indexation clauses based on foreign price indexes, as well as any other indexing mechanism adopted under public contracts executed by the National Government, including works and public services, have been suspended. The applicable tariffs to that date were converted into pesos at the exchange rate of \$1 to US\$1.

Moreover, the National Government is entitled to renegotiate such contracts under the following criteria:

the impact of the tariffs upon the competitiveness of the economy and the income distribution;

the quality of the services and plans of investments, if they are contractually foreseen;

the client's interests and the possibility to access of the services;

the security of the systems;

the profitability of the business.

Decree No. 293/2002 entitled the Ministry of Economy and Infrastructure to renegotiate all these contracts and created the Contracts Renegotiation Commission to give the Ministry the proper counsel. The mentioned decree stated that the public services contracts subject to the renegotiations include the telecommunication area of basic telephone, which is the service rendered by Telecom Argentina.

Edgar Filing: TELECOM ARGENTINA STET FRANCE TELECOM SA - Form 6-K

Then, Decree No. 370/2002 set forth the constitution of such Commission and Resolution No. 20/2002 of the Ministry of Economy approved the Rules for the Renegotiation of Works and Public Services Contracts, including the list of the contracts affected by these rules. The proposals of renegotiations should be filed with the National Government within a term of 120 days from March 1, 2002, conformed with Decree No. 293/02, Section 2. This term has been extended by the Decree No. 1839/02 and Resolution No. 62/03 for 180 additional working days.

In order to comply with said renegotiation procedure, the Company duly filed with the Contracts Renegotiation Committee information on the impact caused by the economic emergency on its financial position, more specifically on income and the pre-existing mechanisms to adjust tariffs, on operating costs, on indebtedness, on payment commitments with the National Government and on future and on going investments. In addition, Telecom filed economic-financial information for the last

three fiscal years and projected information for the years 2002 and 2003.

Resolution No. 38/2002 of the Ministry of Economy establishes that the Public Administration Bodies, including Regulatory Bodies, should not modify, directly or indirectly, the prices and tariffs of the public services in the meantime of the renegotiation process related to work in progress contracts and public services.

**NOTE 12 SUSPENSION OF PAYMENTS OF FINANCIAL DEBT OF THE TELECOM GROUP. TENDER OFFER AND
PROPOSED RESTRUCTURING PLAN**

As a consequence of the devaluation and the volatility of the Argentine peso, the conversion into pesos of the Company's tariffs and the macroeconomic and regulatory uncertainties occurred during fiscal year 2002, the Board of Directors, on their meetings held on March 27, 2002 and June 24, 2002, resolved the suspension of principal and interest payments of all its financial debt and its controlled companies' financial debt in Argentina. Notwithstanding this, the Company has continued meeting its obligations related to commercial activity in the ordinary course of business.

As a result of these decisions, as of March 31, 2003, the Telecom Group had debt due of approximately \$3,415 (corresponding US\$651 million, Euro 253 million, Yen 5,143 million and \$192 million) to principal debt due and accrued interest due of US\$56 million, Euro 47 million, Yen 277 million and \$16 million). At the date of issuance of these consolidated financial statements, the Telecom Group has debt due of approximately \$4,474 (corresponding US\$688 million, Euro 503 million, Yen 5,143 million and \$192 million) to principal debt due and accrued interest due of US\$65 million, Euro 83 million, Yen 282 million and \$18 million) considering the exchange rates at March 31, 2003.

The executed loan agreements and the agreements related to the issuance of Corporate bonds include clauses providing for various events of default, including:

Failure to pay principal or interest on the loan at maturity;

Failure to pay principal or interest of any other debt contracted either by Telecom or any of its material subsidiaries that equals or exceeds an aggregate of US\$20 million (cross default clauses);

Telecom's written admission of its inability to meet the commitments at maturity;

Any final judgement providing for the payment of an aggregate equal or exceeding US\$20 million;

Telecom or any of its material subsidiaries filing petition for bankruptcy relief or reorganization proceedings, or request for approval of an out of court agreement with creditors.

Under the terms of most loan agreements and the agreements related to the issuance of Corporate bonds executed, the occurrence of any of the above mentioned events entitles grantors (whether banks or holders), their agents or trustees, to consider as due and payable the total principal disbursed and interest accrued pending at the date of such event. The parties, their agents or trustees, may elect to exercise this right.

Edgar Filing: TELECOM ARGENTINA STET FRANCE TELECOM SA - Form 6-K

In the case of any event of default, most of the agreements also provide for economic penalties payable through interest additional to the ordinary loan interest. The additional interest varies between an annual average of 2 and 5 %.

At the date of issuance of these consolidated financial statements, some creditors of Telecom and Personal with claims exceeding an aggregate of US\$20 million have exercised their rights to accelerate their maturity.

The Board of Directors has taken and will continue to take the pertinent measures to preserve the Company's value and maximize the cash flow. Telecom, jointly with its legal and financial advisors, has

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

developed a comprehensive restructuring plan for all its financial debt and the debt of its subsidiaries in Argentina, as described below. Likewise, the subsidiary Núcleo is entering into a renegotiation process for its financial debt with its financial creditors (Note 20).

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Tender offer and proposed restructuring plan

On April 14, 2003 and on April 16, 2003 and jointly with Personal and Publicom, the Company announced the commencement of cash tender offers for a portion of their financial debt obligations, up to the equivalent of US\$260 million in Telecom, US\$45 million in Personal and US\$2 million in Publicom. The tender offers will be conducted pursuant to a modified Dutch auction with a price range of 43.5% to 50.0% of the outstanding principal amount of the financial debt instruments, without giving effect to any accrued but unpaid interest. The tender offers will be open to the holders of all financial debt obligations, including banks and bondholders and will expire on May 16, 2003.

As part of the process, the companies would each make interest payments on their financial debt obligations at the contractual rates (without giving effect to penalties or default rates) for the period through and including June 24, 2002 and would also each make partial interest payments equivalent to 30% of the contractual rates (without giving effect to penalties or default rates) on their financial debt obligations for the period from June 25, 2002 through December 31, 2002. The partial interest payments would be paid on all financial debt obligations, independent of noteholders or creditors participation in the tender offers. The record date for the partial interest payments was April 30, 2003 and the payment date will be the expiration date of the tender offers.

Telecom and Personal entered into financial trusts with the funds required for the cash payment of the tender offers and the payment of interests. Additional information on these trusts is given in Note 13.

In addition to the tender offer, the Company worked with its financial advisors to develop a comprehensive proposal to restructure the outstanding financial indebtedness that was not accepted for purchase pursuant to the tender offer.

Basically, the proposal consists in the exchange of outstanding debt instruments for new debt obligations that would be denominated in the same currency as the debt instruments being exchanged, permitting the Company's creditors to elect the alternative preferred by them (Options A and B), subject to certain limits on the maximum aggregate principal amount of debt subscribing to each option, as follows:

<u>New senior debt instruments</u>	<u>Mandatory amortization</u>	<u>Annual interest rate</u>	<u>Annual interest rate cap (as a %)</u>	<u>Option A (in US\$ million)</u>	<u>Option B (in US\$ million)</u>	<u>Total in US\$ million</u>
Senior Debt 1(*)	From years 2004 through 2008	LIBOR plus 2,5%	6	415	396	811
Senior Debt 2	From years 2010 through 2015	LIBOR plus 0,5%	3	922		922
Senior Debt 3(*)	Year 2015	LIBOR plus 0,5%	3	121	711	121
						711

Non-voting preferred
shares of Telecom

Total restructured debt	1,458 (**)	1,107(**)	2,565
--------------------------------	-------------------	------------------	--------------

(*) Senior Debt 1 and 3 would be mandatorily prepayable based on excess cash, with Senior Debt 3 prepayable in full prior to any prepayments on Senior Debt 1.

(**) The amounts have been translated into U.S. dollars at the exchange rates in effect as of December 31, 2002.

These options must be subscribed only in the following proportion: 60%

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

of the debt to the first option and 40% to the second option in Telecom and 45% and 55%, respectively, in Personal. In the event that any option is oversubscribed, the oversubscriptions will be allocated into the undersubscribed option.

The proposal also contains prepayment clauses for Senior Debt 1 and 3 if the present uncertainties could be overcome. This means that the Company commits to prepay its debt if its financial situation improves.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

If the restructuring proposal is realized under the mentioned conditions, the Company would increase its capital stock by over 30%. This percentage of Telecom shares granted to the creditors would be non-voting preferred shares convertible at the holders' option into voting ordinary shares of Telecom in a term to be arranged. It is proposed that the conversion of preferred shares into ordinary shares would be subject to the execution of a shareholders' agreement with Nortel, the terms of which have not been decided yet.

This proposal is subject to the appropriate approvals of the Shareholders and telecommunications service Regulatory Bodies.

Valuation and disclosure of debt as of March 31, 2003

Argentine GAAP does not provide for specific rules on disclosure of current and non current liabilities for the above situation.

In valuation matters, the Group has estimated additional costs for economic penalties of approximately \$43 million as of March 31, 2003, which have been included in Debt in the consolidated balance sheets. At the date of issuance of these consolidated financial statements, the modality and opportunity of payment of capital and accrued compensatory interest are the main subjects of the debt restructuring process. As a result, in view of the special circumstances outside the Company's control that led the Group to the suspension of principal and interest payments of all its financial debt, the Company's legal counsel believe that the Company would have a remote probability of accruing any additional cost at the end of this process.

In disclosure matters, as from March 2002, the Company classified its debt considering the original maturities the above mentioned debt restructuring process because had been announced and no creditor had exercised right of acceleration of maturities.

As some creditors have exercised these rights at the date of issuance of the consolidated financial statements at June 30, 2002, the management of the Company decided, as from that date, to disclose debt with an original non-current maturity as current debt. This was done considering the enforceability of liabilities by creditors, notwithstanding the fact that they have not been realized. Therefore, there are no accounting differences between the Company's accounting policies and U.S.GAAP (SFAS 78).

However, as described in Note 3.1.c, the new accounting standards provide specific valuation criteria for debt originated in refinancing, which have been applied to the TITAN Financial trust debt for \$123 million (equivalent to US\$41 million), that have been reported as non-current debt according to the terms of the new agreements.

NOTE 13 FINANCIAL TRUSTS CONSTITUTED BY THE TELECOM GROUP FOR THE PAYMENT OF DEBT

SERVICES ABOARD

Through Communication A 3872 the BCRA had provided that individuals and corporations of the private non-financial sector may operate in the single and free exchange market for an amount equivalent to up to 5% of the matured and outstanding principal debt as foreign securities and financial loans in relation to original debt prior to February 10, 2002 and outstanding or not refinanced to date, with original maturity dates or refinancing not later than December 31, 2002, if the following conditions, among others, apply:

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Foreign currency purchased in the single and free exchange market will be allocated to the creation of a trust to be managed by a local banking entity acting as trustee.

The beneficiary of the trust fund is the individual or corporation that creates it.

Each beneficiary may constitute only one trust fund.

Trust funds may only be invested at market values in foreign assets that are securities issued by foreign governments, foreign corporations stock listed internationally and not related with the beneficiary, parent or controlling company, and/or in certificates deposited in foreign banks that shall not be internationally rated below A by any of the risk rating agencies registered with the BCRA. Foreign currency deposits in custody accounts with local banks will also be accepted. The beneficiary shall carry out investment options pursuant to the terms of the trust agreement.

Profits and capital gains coming from these investments will form part of the trust.

Trust funds will only be released for the following purposes:

1. for their admission and settlement in the local foreign exchange market with the BCRA's prior approval, and/or
2. to be applied abroad in the settlement of the beneficiary's external debt with respect to foreign securities and financial loans taken before February 10, 2002 restructured under the general guidelines issued by the BCRA or that have been specifically approved by it.

In compliance of this communication, the Company and Personal entered into trust agreements, as follows:

Trustee	Telecom		Personal	Consolidated	
	US\$	Euro	US\$	US\$	Euro
	In million				
Banco Soci�t� G�n�rale S.A.

NOTE 16 RELEVANT ADDITIONAL INFORMATION

The information described in this note is not required by Argentine GAAP, so that it is additional information.

The management of the Company considers useful this information in order to facilitate the analysis and understanding of the main business variables and, particularly, the way in which the restatement in constant pesos process has impacted in sales, operating costs, EBITDA, financial and holding results and the different captions of the consolidated statement of cash flows.

So that, the historical amounts, which have been used to determine the figures in constant pesos at March 31, 2003 and 2002, are as follows:

NOTE 18 DIFFERENCES BETWEEN ARGENTINE AND U.S.GAAP

To facilitate the use of financial information by both local and foreign investors, the Company has included in these consolidated financial statements, as additional information, a summary of the principal differences between Argentine and U.S.GAAP. In addition, in recent years and to the extent permitted by GAAP, the Company has attempted to reduce the differences of criteria in order to facilitate the analysis of its financial results by both local and foreign investors.

However, the remaining differences between Argentine and U.S.GAAP are grouped as follows:

1. ***Differences related to measurement unit***

Restatement of Financial Statements for Wholesale Price Index changes

As described in Note 3.1.d, the accompanying financial statements have been prepared in million of Argentine pesos of constant currency, recognizing the inflation effects until February 28, 2003. However, in general, U.S.GAAP does not allow for the restatement of financial statements in units of constant currency.

Under U.S.GAAP, account balances and transactions are stated in units of currency of the period in which the transactions were originated. This accounting criterion is known as the historical-cost-based method. U.S.GAAP only allows for the restatement of financial statements in countries with highly inflationary economies as defined by U.S.GAAP.

Notwithstanding the above, the SEC does not require for those companies that prepare its financial statements under local standards

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

(as Telecom), the elimination of the restatement in constant pesos in the reconciliation of Argentine GAAP to U.S.GAAP.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

2. *Differences related to the disclosure criteria*

Other expenses, net in the Consolidated statements of operations

Under U.S.GAAP, termination benefits and reserves for contingencies, included in the financial statement caption Other expenses, net , would have been reclassified as a deduction from Operating profit.

Reclassification of Deferred tax assets and liabilities in the Consolidated balance sheets

The Company has classified its deferred tax balances as current or non current, considering the moment that the temporary differences will be realized and the expected moment that deferred tax assets related to carryforwards will be used. However, under U.S.GAAP, deferred tax assets and liabilities shall be classified as current or non current based on the classification of the related asset or liabilities for financial reporting, while deferred tax assets related to carryforwards shall be classified according to their expected reversal date.

3. *Differences related to valuation criteria*

Valuation of assets and liabilities in foreign currency as of December 31, 2001

As a result of the Argentine economic situation, from December 21, 2001 the Argentine foreign currency exchange market was suspended until January 10, 2002.

In that respect, Argentine GAAP required that the companies recognized their assets and liabilities denominated in U.S. dollars using the exchange rate \$1 to US\$1 as of December 31, 2001. However, U.S.GAAP required that companies use the first subsequent exchange rate after the balance sheet date to adjust the valuation of its assets and liabilities in foreign currency at such date. This situation has provoked a difference in the timing of the recording of such losses between fiscal years 2001 and 2002.

Capitalization of foreign currency exchange differences related to debt for fixed assets acquisitions

As described in Note 3.2.a, the cost of those assets which acquisition is carried out with loans existing as of January 6, 2002, includes financial interest generated by such loans and the capitalization of the foreign currency exchange differences originated by the devaluation of the Argentine peso as of such date. Under U.S.GAAP, this capitalization is not permitted.

Valuation of inventories and raw materials

As described in Note 3.2.f and 3.2.g, inventories and raw materials included in Other assets, have been valued at their replacement cost at each period-end. Under U.S.GAAP, these assets should be valued at the lower of cost or net realizable value.

Valuation of debt due to TITAN Financial Trust

As stated in Note 7, the financial debt due to the new TITAN Financial Trust, under local accounting standards, was valued at its current value, which arises from discounting the total amount payable at a 12% rate p.a. Under U.S.GAAP, this valuation criterion at its current value is not allowed, since debts must be valued at their nominal value by adding, when applicable, accrued interest at each period end.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Foreign currency translation

Under Argentine GAAP and as indicated in Note 3.1.b., the equity investments of the Company in foreign companies have been translated into Argentine pesos at the exchange rate at each period end, in accordance with FACPCE RT 18. Likewise, and according to that RT, the results generated by the mentioned translation have been recognized in the caption Temporary differences from translation in the consolidated balance sheets.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Notwithstanding, SFAS 52 requires the functional currency definition corresponding to equity investments in foreign companies and, if corresponds, the measurement of these investments in functional currency, before the translation of the assets and liabilities of the foreign companies into exchange rate at year/period end.

This measurement is required if the functional currency is different from the currency of the country in which a parent company has the investment and generates exchange rate differences that are recognized as income/expense. Likewise, SFAS 52 states that the results from translation from functional currency to reporting currency, the Argentine peso for the Company, have to be recognized in a Reserve of shareholders' equity.

Other monetary receivables and liabilities, valued at net present value

As indicated in Note 3.1.c, the new accounting standards anticipate the valuation of other receivables and liabilities, at the net present value, using a discount rate which reflects the time value of the money and the specific risks of those receivables and liabilities. Under U.S.GAAP, the criteria for valuation at net present value is not permitted, because the balances in the balance sheet and the transactions are expressed at historical cost.

Revenue recognition

As described in Note 3.1.i, the Company recognizes its revenues as services are provided to customers. Therefore, revenues for installation fees are recognized in the period that the installation service is completed, jointly with the related costs.

Nevertheless, the Staff Accounting Bulletin (SAB) 101, Revenue recognition of the SEC requires the deferring of the installation fees and the related costs considering the estimated average useful life of customers, except when the cost is higher than the revenue, in which case the excess cannot be deferred.

Since the Company's installation costs exceed the related revenues, the Company believes such difference of criterion has no impact on the reconciliation of net income and shareholders' equity to U.S.GAAP. Additionally, the effect for U.S.GAAP purposes of recording the related deferred asset and liability is not significant for the periods presented.

Recoverability of tax credits

The recoverable value of tax credits depends on the existence of sufficient taxable income within the carryforward period available under the tax law. In that respect, as indicated in Note 9, the management of Telecom considers that, as a consequence of the Decree No. 2568/02, which established the deferral of the initial exchange rate difference (\$1.40 by US\$1) for the income tax, the probable recoverability of deferred tax

credits of Telecom and Personal have been significantly affected, generating an uncertainty about the possibility of recoverability.

Therefore, as required by Argentine GAAP, and with a prudent criteria, the management of Telecom has decided to record a valuation allowance, in addition to the amount in its controlled company Núcleo, the total of net deferred tax credits corresponding to Telecom and Personal as from December 31, 2002.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

However, SFAS 109 states more specific and strict rules to evaluate tax credits. Under this pronouncement, an enterprise must use judgment in considering the relative impact of negative and positive evidence to determine if a total or partial valuation allowance is needed or not. For example, negative evidence includes: a) unsettled circumstances that, if unfavorably resolved, would adversely affect future operations and profit levels on a continuing basis in future years; and b) a carryforward period that is so brief that it would limit realization of tax benefits if a significant deductible temporary difference is expected to reverse in single year.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

Nevertheless, the economic-financial projections as evidence of the probable tax credits recoverability of Publicom and the tax credits related to the minimum presumed income tax of the Group, considering the complex macroeconomic context and the uncertainties that affect the Group business, under U.S.GAAP, they would not be considered sufficient positive evidence for the recoverability of these assets. Likewise, if following the provisions of SFAS 109 and adopting a prudent position, the management of Telecom has considered a valuation allowance for the total amount of tax credits before mentioned.

NOTE 19 RESTRICTIONS ON UNAPPROPRIATED RETAINED EARNINGS

Under Law No. 19550, the Company's by-laws and CNV regulations, 5% of the Company's net income for the year, plus or minus any prior year adjustments and subject to coverage of accumulated losses, if any, must be allocated to a legal reserve until such reserve reaches 20% of capital stock plus adjustment to capital stock.

NOTE 20 EVENTS SUBSEQUENT TO MARCH 31, 2003

As approved by the Ordinary and Extraordinary Annual Shareholders Meeting held on April 30, 2003.

1. Amendment of the Bylaws.

Decree No. 677/01 provided that corporations with shares that fall under the public offer regime must, in certain cases such as changes in control, purchase of significant interests, withdrawal from public offer, etc. make public offer of purchase and/or conversion of shares in the proportions and under the conditions set forth for each case by CNV Resolution No. 401/2002, that regulates this issue in Decree No. 677/01.

However, Decree No. 677/01, itself, provides that corporations may choose not to adhere to this regime if it is so resolved by the Extraordinary Shareholders Meeting incorporating to the Bylaws a clause providing that the corporation is a Corporation Not Adhered to the Optional Statutory Regime of Compulsory Purchase Public Offer.

The issue was discussed by the Annual Shareholders Meeting held on April 30, 2003, which approved by majority vote that Telecom would NOT ADHERE to the mentioned Regime. The Meeting likewise resolved to amend section 1 of the Bylaws for the purposes of incorporating the related clause.

2. Cash dividends

The Board of Directors resolved to carry forward the total unappropriated retained earnings for the fiscal year ended December 31, 2002.

Refinancing agreement in Núcleo

On April 1, 2003, Núcleo has signed a refinancing agreement of its financial debt with banks for approximately US\$14 millions.

Dissolution of Cable Insignia

On April 25, 2003 the Annual Shareholders Meeting of Cable Insignia, determined that that company should cease trading as a consequence of the transfer of its license for PCS service, and resolved to dissolve the company in advance.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

REPORT ON LIMITED REVIEW

OF INTERIM FINANCIAL STATEMENTS

To the Directors and Shareholders of

Telecom Argentina STET-France Telecom S. A.

1. We have performed a limited review of the accompanying consolidated balance sheet of Telecom Argentina STET-France Telecom S.A. (Telecom) as of March 31, 2003 and the related consolidated statements of income, changes in shareholders' equity and cash flows for the three-month period then ended. These financial statements and those mentioned in point 10 of this report are the responsibility of the Company's management.
2. Our review was limited to the application of the procedures established by Technical Pronouncement No. 7 of the Argentine Federation of Professional Councils in Economic Sciences for limited reviews of interim financial statements which consist mainly of the application of analytical procedures to the amounts disclosed in the financial statements and inquiries made of Company staff responsible for the preparation of the information included in the financial statements and of its subsequent analysis. These reviews are substantially less in scope than an audit, the objective of which is to express an opinion on the financial statements under review. Accordingly, we do not express such an opinion.
3. As indicated in Note 3.1.d) to the accompanying consolidated financial statements and in accordance with the regulations of the corporate control authorities, the Company has not recognized on its books the effects of changes in the purchasing power of the currency arising as from March 1, 2003, as required by the professional accounting standards in effect in the Autonomous City of Buenos Aires, Argentina. The effects of not having recognized those changes were not material in relation to the accompanying financial statements.
4. As a consequence of the economic crisis in Argentina which has affected the operations of the Company and its subsidiaries as from late 2001, the Government issued certain measures which mainly affected fiscal 2002. The future evolution of the economic crisis may require that the Government modify some measure adopted or issue additional regulations. Consequently, the financial statements mentioned in point 1 of this report must be read in the light of these circumstances.
5. As mentioned in Notes 3.2.h), 11 and 12 to the accompanying consolidated financial statements, the Law on Public Emergency and Exchange System Reform suspended the clauses establishing restatement in dollars or other foreign currencies, or other indexation clauses in the contracts entered into with the Public Administration. Thus, the Company's tariffs were set in pesos at the exchange rate of \$1 per US\$1 subject to renegotiation, as established in the regulations issued for such purposes, while part of its costs and debts are denominated in foreign currency. Consequently, the Company's operating conditions have been altered, adversely affecting its economic and financial equation. The consequences of these circumstances were reflected in the negative results and in the reduction of Telecom's equity recording during the year ended December 31, 2002 and in the matters mentioned in point 6 of this report. Recoverability of the fixed assets, intangible assets, goodwill and tax credits (minimum notional income tax) of Telecom and its subsidiaries at March 31, 2003 depends on the evolution of these conditions and the fulfillment of the premises used for the preparation of the economic and financial projections prepared based on information available at that date.

6. During the first half of 2002, the Board of Directors of Telecom decided to suspend payment of principal and interest on its total financial debt and on that of its subsidiaries in Argentina. At the date of this report the Telecom Group has a total unpaid principal debt amounting to US\$ 692 million, Euros 503 million, Yen 5,143 million and \$ 192 million and interest amounting to US\$ 65 million, Euros 83 million, Yen 282 million and \$ 18 million, as mentioned in Note 12 to the accompanying consolidated financial statements. As indicated in that note, the Company is developing a plan for the restructuring of its total debt and that of its subsidiaries, and has made a tender offer for the acquisition of part of its debt instruments.

CONSOLIDATED FINANCIAL STATEMENTS AT MARCH 31, 2003

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

7. The accompanying consolidated financial statements of Telecom at March 31, 2003 were prepared considering the continuity of the normal course of business of the Company and its subsidiaries, applying assets and liabilities valuation and classification criteria corresponding to a going concern and, therefore, they do not contemplate possible adjustments related to the recoverability and classification of assets and/or the sufficiency and classification of liabilities that may be required if the uncertainties described above are not resolved in favor of the Company.
8. Our report on limited review of the financial statements of Personal at March 31, 2003, issued on May 9, 2003 includes observations regarding: a) the recoverability of fixed assets, intangible assets and tax credits (minimum notional income tax) depends on the fulfillment of the premises used to prepare the economic and financial projections; b) the suspension of principal and interest payments decided by the Board of Directors of Telecom, the exercise by certain creditors of Personal and its subsidiary Núcleo of their right to request accelerated repayment of loans and the restructuring of the total financial debt and c) the financial statements were prepared considering the continuity of the normal course of business of the Company and its subsidiary Núcleo, applying assets and liabilities valuation and classification criteria applicable to a going concern and, therefore, they do not contemplate the possible adjustments related to the recoverability and classification of assets and/or the sufficiency and classification of liabilities, that might be required if the uncertainties described above are not resolved in favor of the Company.
9. The report on limited review of the financial statements of Publicom at March 31, 2003, issued on May 9, 2003, includes observations regarding: a) the recoverability of fixed assets, intangible assets and tax credits depends on the fulfillment of the premises used to prepare the economic and financial projections; b) the suspension of principal and interest payments decided by the Board of Directors of Telecom, the exercise by certain creditors of Publicom of their right to request accelerated repayment of loans and the restructuring of the total financial debt and c) the financial statements were prepared considering the continuity of the normal course of business of the Company, applying assets and liabilities valuation and classification criteria applicable to a going concern and, therefore, they do not contemplate the possible adjustments related to the recoverability and classification of assets and/or the sufficiency and classification of liabilities, which might be required if the uncertainties described above are not resolved in favor of the Company.
10. In connection with the consolidated balance sheet of Telecom at December 31, 2002 and the consolidated statements of changes in shareholders' equity, of income and of cash flows for the three-month period ended on March 31, 2002, presented for comparative purposes, we report that:
 - (a) Henry Martin, Lisdero y Asociados, in its capacity as member firm of Ernst & Young (HML), issued an audit report on March 10, 2003 on the consolidated financial statements of Telecom at December 31, 2002, with unquantified qualifications due to uncertainties related to: 1) the effects of the economic crisis on the evaluations and estimates made by Management, 2) the impact of the elimination of adjustment clauses in public services contracts and their renegotiation, and the new exchange regime on the Company's economic and financial position, 3) noncompliance with the payments of some bank and financial debts, 4) the continuity of the normal course of business of the Company and its subsidiaries and 5) the unquantified qualifications due to uncertainties included in audit reports issued on March 7, 2003 by Price Waterhouse & Co. on the financial statements of Personal and Publicom at December 31, 2002. We have not audited any financial statement at any date and for any period after December 31, 2002.
 - (b) on June 6, 2002, HML issued a report on limited review on the consolidated financial statements of Telecom, for the three-month period ended on March 31, 2002, including certain paragraphs due to uncertainties related to the situations mentioned in point (a) above. Furthermore, an observation was included due to the lack of recognition of the effects of changes in the purchasing power of the currency. As indicated in Note 3.1.d) to the consolidated financial statements, the accompanying financial statements at March 31, 2002 for comparative purposes have been adjusted for inflation.

TELECOM ARGENTINA STET-FRANCE TELECOM S.A.

Corporation non adhered to the Optional Statutory Regime of Compulsory Public Purchase Offer

11. Based on our review, we have not become aware of any significant changes having to be made to the financial statements mentioned in point 1 of this report for them to be disclosed in conformity with professional accounting standards in effect in the Autonomous City of Buenos Aires, Argentina, and pertinent regulations of the Corporations Law and National Securities Commission. This statement must be read considering the uncertainties described in points 5 to 9 of this report, the outcome of which cannot be determined at the date of this report.
12. The Board of Directors of Telecom presents in Note 18 to the accompanying consolidated financial statements a description of the main differences between the professional accounting standards applied by Telecom and its subsidiaries for the preparation of its consolidated financial statements and the professional accounting standards in effect in the United States of America. The information included in that note is not required by the professional accounting standards in effect in Argentina.
13. Amounts shown in Note 16 to the accompanying consolidated financial statements represent additional information to that required by the professional accounting standards in force in Argentina. That note presents: a) certain amounts used as basis for the preparation of information in constant currency, b) the amounts, disclosed on a global basis, corresponding to changes in internal wholesale price indices between January 1, 2003 and February 28, 2003 and c) total values adjusted for inflation, which agree with those presented in the financial statements of Telecom at March 31, 2003 mentioned in point 1 of this report.
14. In compliance with current regulations, we report that:
 - a) the financial statements mentioned in point 1 of this report have been transcribed to the Inventory and Balance Sheet book.
 - b) the financial statements of Telecom at March 31, 2003 arise from accounting records carried in all formal respects in accordance with current regulations;
 - c) we have read the Summary of Activity on the financial statements on which, as regards those matters that are within our competence, we have no observations to make other than those indicated in points 5 to 9;
 - d) at March 31, 2003, the debt corresponding to withholdings and contributions to the Integrated Retirement and Survivors Benefit System according to the Company's accounting records amounts to \$6,140,205, none of which was claimable at that date.
