Notes To Consolidated Financial Statements

September 30, 2003 (Unaudited)

(1) Summary of Significant Accounting Policies

The accompanying unaudited Consolidated Financial Statements herein have been prepared by 1st Constitution Bancorp (the Company), in accordance with accounting principles generally accepted in the United States of America and pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC). Certain information and footnote disclosures normally included in financial statements have been condensed or omitted pursuant to such rules and regulations. These consolidated Financial Statements should be read in conjunction with the audited financial statements and the notes thereto included in the Company's Form 10-KSB for the year ended December 31, 2002, filed with the SEC on March 20, 2003.

In the opinion of the Company, all adjustments (consisting only of normal recurring accruals) which are necessary for a fair presentation of the operating results for the interim periods have been included. The results of operations for periods of less than a year are not necessarily indicative of results for the full year.

Certain reclassifications have been made to the prior years' financial statements to conform with the classifications used in 2003.

Net Income Per Common Share

Basic net income per common share is computed by dividing net income by the weighted average number of shares outstanding during each period.

Diluted net income per common share is computed by dividing net income by the weighted average number of shares outstanding, as adjusted for the assumed exercise of potential common stock options, using the treasury stock method. Potential shares of common stock resulting from stock option agreements totaled 68,617 and 61,327 for the three months ended September 30, 2003 and September 30, 2002, respectively, and 73,837 and 61,327 for the nine months ended September 30, 2003 and September 30, 2002, respectively. All share amounts have been restated for the effect of a 5% stock dividend declared in 2002.

Stock-Based Compensation

Stock-based compensation is accounted for under the intrinsic value based method as prescribed by Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees. Included below are the pro forma disclosures required by SFAS No. 123, Accounting for Stock-Based Compensation, as amended by SFAS No. 148, Accounting for Stock-Based Compensation-Transaction and Disclosure which assumes the fair value based method of accounting had been adopted.

	Three months ended September 30,

(2) New Accounting Pronouncements

FASB Interpretation No. 46, *Consolidation of Variable Interest Entities* (FIN 46) was issued in January 2003. FIN 46 applies immediately to enterprises that hold a variable interest in variable interest entities created after January 31, 2003. It applies in the first fiscal year or interim period beginning after June 15, 2003 to enterprises that hold a variable interest in variable interest entities created before February 1, 2003. FIN 46 applies to public enterprises as of the beginning of the applicable interim or annual period, and it applies to nonpublic enterprises no later than the end of the applicable annual period. FIN 46 may be applied prospectively with a cumulative-effect adjustment as of the date on which it is first applied or by restating previously issued financial statements for one or more years with a cumulative-effect adjustment as of the beginning of the first year restated. FIN 46 provides guidance on the identification of entities controlled through means other than voting rights. FIN 46 specifies how a business enterprise should evaluate its interest in a variable interest entity to determine whether to consolidate that entity. A variable interest entity must be consolidated by its primary beneficiary if the entity does not effectively disperse risks among the parties involved.

Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10QSB

On October 9, 2003, the effective date was deferred until the end of the first interim or annual period ending after December 15, 2003, for certain interests held by a public entity in certain variable interest entities or potential variable interest entities created before February 1, 2003.

In its current form, FIN 46 may require the Company to de-consolidate its investment in 1st Constitution Capital Trust I in future financial statements. The potential de-consolidation of subsidiary trusts of bank holding companies formed in connection with the issuance of trust preferred securities, like 1st Constitution Capital Trust I, appears to be an unintended consequence of FIN 46. In July 2003, the Board of Governors of the Federal Reserve System instructed bank holding companies to continue to include the trust preferred securities in their Tier 1 capital for regulatory capital purposes until notice is given to the contrary. There can be no assurance that the Federal Reserve will continue to allow institutions to include trust preferred securities in Tier 1 capital for regulatory capital purposes. As of September 30, 2003, assuming the Company was not allowed to include the \$5.0 million in trust preferred securities issued by 1st Constitution Capital Trust I in Tier 1 capital, the Company would remain well capitalized.

Item 2. Management's Discussion and Analysis or Plan of Operation

The following discussion of the operating results and financial condition at September 30, 2003 is intended to help readers analyze the accompanying financial statements, notes and other supplemental information contained in this document. Results of operations for the three and nine month periods ended September 30, 2003 are not necessarily indicative of results to be attained for any other period.

This discussion and analysis should be read in conjunction with Part II, Item 6 of the Company's Form 10-KSB (Management's Discussion and Analysis or Plan of Operation) for the year ended December 31, 2002, as filed with the Securities and Exchange Commission on March 20, 2003.

General

1st Constitution Bancorp (the "Company"), a bank holding company, was incorporated in February 1999 for the purpose of becoming the parent holding company of 1st Constitution Bank (the "Bank"), a full service commercial bank which began operations in August 1989. Constitution Capital Trust I, a subsidiary of the Company, was created to issue trust preferred securities to assist the Company to raise additional regulatory capital. The Bank operates six branches, and has two subsidiaries, 1st Constitution Investment Company, which manages an investment portfolio, and FCB Assets Holdings, Inc., which is used by the Bank to manage and dispose of repossessed real estate.

Forward-Looking Statements

This report contains forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. Such statements are not historical facts and include expressions about our confidence and strategies and our expectations about new and existing programs and products, relationships, opportunities, technology and market conditions. These statements may be identified by such forward-looking terminology as "expect," "believe," "anticipate," or by expressions of confidence such as "continuing" or "strong" or similar statements or variations of such terms. Such forward-looking statements involve certain risks and uncertainties. These include, but are not limited to, expected cost savings not being realized or not being realized within the expected time frame; income or revenues being lower than expected or operating costs higher; competitive pressures in the banking or financial services industries increasing significantly; business disruption related to program implementation or methodologies; weakening of general economic conditions nationally or in New Jersey; changes in legal and

regulatory barriers and structures; and unanticipated occurrences delaying planned programs or initiatives or increasing their costs or decreasing their benefits, as well as other risks and uncertainties detailed from time to time in filings of the Company with the U.S. Securities and Exchange Commission. Actual results may differ materially from such forward-looking statements. These forward-looking statements speak only as of the date of this document.

RESULTS OF OPERATIONS

Three Months Ended September 30, 2003 and September 30, 2002

Summary

The Company realized net income of \$852,833 for the three months ended September 30, 2003 as compared to \$689,824 reported for the same period in 2002. Net income per diluted share was \$0.55 for the three months ended September 30, 2003 compared to \$0.45 per diluted share for the three months ended September 30, 2002.

Earnings Analysis

Interest Income

Interest income decreased \$71,370, or 1.94%, to \$3,606,241 for the three months ended September 30, 2003 from \$3,677,611 for the three months ended September 30, 2002. This is primarily attributable to the declining interest rate environment that existed throughout 2002 and continued into the third quarter of 2003. Average interest earning assets increased \$26,944,469, or 11.5%, to \$262,202,370 for the three months ended September 30, 2003 from \$235,257,901 for the three months ended September 30, 2002. The decrease in interest income resulted from increases in earning asset volume offset by a decrease in the average yield earned on these assets. The average yield on earning assets decreased 71 basis points to 5.52% for the three months ended September 30, 2003 from 6.23% for the three months ended September 30, 2002.

Interest Expense

Interest expense decreased \$238,181, or 18%, to \$1,082,750 for the three months ended September 30, 2003 from \$1,320,931 for the three months ended September 30, 2002. The average cost of interest bearing liabilities decreased 82 basis points to 2.01% for the three months ended September 30, 2003 from 2.83% for the three months ended September 30, 2002, primarily as a result of a decrease in rates paid on deposits and short-term borrowed funds. Total average interest bearing liabilities increased by \$28,528,135, or 15.43%, to \$213,392,322 for the three months ended September 30, 2003 from \$184,864,187 for the three months ended September 30, 2002.

Net Interest Income

The net effect of the changes in interest income and interest expense for the three months ended September 30, 2003 compared to the three months ended September 30, 2002 was an increase of \$166,811, or 7.1%, in net interest income to \$2,523,491 for the three months ended September 30, 2003 from \$2,356,680 for the three months ended September 30, 2002. The net interest margin, on a fully taxable equivalent basis, decreased 13 basis points to 3.88% for the three months ended September 30, 2003 from 4.01% for the three months ended September 30, 2002. The decrease in the net interest margin was primarily the result of interest earning assets repricing faster than interest bearing liabilities in the decreasing rate environment that has continued through the first nine months of 2003.

Provision for Loan Losses

For each of the three months ended September 30, 2003 and September 30, 2002, the provision for loan losses was \$60,000. The comparable provisions were the result of stable loan portfolio growth combined with consistent levels of non-performing loans. The amount of the loan loss provisions and the level of the allowance for loan losses are critical accounting policies of the Company and are based upon a number of factors including Management's evaluation of potential losses in the portfolio after consideration of appraised collateral values, financial conditions and past credit history of the borrowers as well as prevailing economic conditions.

Non-Interest Income

Total non-interest income increased \$363,651, or 114.4%, to \$681,482 for the three months ended September 30, 2003 from \$317,831 for the three months ended September 30, 2002. The increase was due primarily to increases of \$267,347 in gains on sale of loans held for sale, \$62,688 in income on Bank-owned life insurance and \$28,449 in other income. The declining interest rate environment that existed in 2002 and continues in 2003 greatly fueled the volume of mortgage loan originations and refinancing and subsequent secondary market mortgage loan sales.

Non-Interest Expense

Non-interest expense increased \$318,476, or 21.2%, to \$1,822,418 for the three months ended September 30, 2003, from \$1,503,942 for the three months ended September 30, 2002. Salaries and employee benefits increased \$238,378 for the three months ended September 30, 2003 compared to the three months ended September 30, 2002, primarily due to (a) increased staffing levels to support the significant increase in secondary mortgage loan sales plus (b) normal employee salary increases. Occupancy expense increased \$15,383 and other expenses increased \$64,715. Other expenses for 2002 included additional professional fee expenses associated with the Company's issuance of trust preferred securities during April 2002.

An important industry productivity measure is the efficiency ratio. The efficiency ratio is calculated by dividing total operating expenses by net interest income and other income. An increase in the efficiency ratio indicates that more resources are being utilized to generate the same or greater volume of income, while a decrease would indicate a more efficient allocation of resources. The Company's efficiency ratio for the three months ended September 30, 2003 was 59.3% compared to 57.2% for the three months ended September 30, 2002.

Nine Months Ended September 30, 2003 and September 30, 2002

Summary

The Company's net income increased \$443,611, or 23.2%, to \$2,355,717 for the nine months ended September 30, 2003 from \$1,912,106 for the nine months ended September 30, 2002. Net income per diluted share increased \$0.26, or 20.8%, to \$1.51 for the nine months ended September 30, 2003 from \$1.25 per diluted share for the nine months ended September 30, 2002.

Earnings Analysis

Interest Income

Total interest income increased \$74,323, or 0.70%, to \$10,667,085 for the nine months ended September 30 2003 from \$10,592,762 for the nine months ended September 30, 2002. The following table sets forth the Company's consolidated average balances of assets, liabilities and shareholders' equity as well as interest income and expense on related items, and the Company's average rates for each of the nine month periods ended September 30, 2003 and 2002, respectively.

Average Balance Sheets with Resultant Interest and Rates

	Nine months ended September 30, 2003			Nine months ended September 30, 2002		
	Average Balance	Interest	Average Rate	Average Balance	Interest	Average Rate
(yields on a tax-equivalent basis)						
Assets:

Net Interest Margin		\$ 7,438,043	3.94%		\$ 6,797,483	4.09%	

The current year modest increase in interest income on a tax-equivalent basis resulted from higher average balances in the securities and loan portfolios, which were partially offset by lower average yields earned on these portfolios. Average loans increased \$33,250,367, or 25.0%, to \$166,472,294 for the nine months ended September 30, 2003 from \$133,221,927 for the nine months ended September 30, 2002, while the yield on the portfolio decreased 74 basis points to 6.83% for the nine months ended September 30, 2003 from 7.57% for the nine months ended September 30, 2002. The lower loan yield reflected the lower interest rate environment that existed throughout 2002 and continued into the third quarter of 2003.

Average securities increased \$8,702,144, or 11.4%, from \$76,284,632 for the nine months ended September 30, 2002 to \$84,986,776 for the nine months ended September 30, 2003, while the yield on the securities portfolio decreased 156 basis points to 3.56% for the nine months ended September 30, 2003 from 5.12% for the nine months ended September 30, 2002.

Overall, the yield on the Company's total interest-earning assets decreased 70 basis points to 5.71% for the nine months ended September 30, 2003 from 6.41% for the nine months ended September 30, 2002.

Interest Expense

Total interest expense decreased \$511,417, or 13.3%, to \$3,338,157 for the nine months ended September 30, 2003 from \$3,849,574 for the nine months ended September 30, 2002. The decrease in interest expense for the current period resulted primarily from the impact of higher levels of interest-bearing liabilities priced at a significantly lower market interest rate level. The average rate paid on interest bearing liabilities for the nine months ended September 30, 2003 decreased 76 basis points to 2.19% from 2.95% for nine months ended September 30, 2002.

Net Interest Income

The Company's net interest income increased \$585,740, or 8.7%, to \$7,328,928 for the nine months ended September 30, 2003 from \$6,743,188 for the nine months ended September 30, 2002. For the nine months ended September 30, 2003, interest income increased by \$74,323 compared to the same period in 2002, while interest expense decreased by \$511,417 compared to the same period in 2002. Although the loan and securities portfolios average balances increased during the first nine months of 2003, those assets earned lower rates of return in 2003 than during 2002.

The net interest margin (on a tax-equivalent basis), which is net interest income divided by average interest-earning assets, was 3.94% for the nine months ended September 30, 2003 compared to 4.09% for the nine months ended September 30, 2002. The principal factor causing

the decline in the net interest margin was the lower interest rate environment that existed throughout 2002 and continued through the third quarter of 2003.

Provision for Loan Losses

The provision for loan losses for the nine months ended September 30, 2003 and 2002 was \$180,000. The comparable provisions were the result of stable loan portfolio growth combined with lower levels of non-performing loans.

Non-Interest Income

Total non-interest income increased \$865,715, or 85.8%, to \$1,875,023 for the nine months ended September 30, 2003 from \$1,009,308 for the nine months ended September 30, 2002. The increase was due primarily to increases in gains on sales of loans held for sale and income on Bank-owned life insurance.

Gain on sale of loans held for sale represents the largest single source on non-interest income. Gain on sale of loans held for sale increased \$555,897, or 120.6%, to \$1,016,764 for the nine months ended September 30, 2003 from \$460,867 for the nine months ended September 30, 2002. The declining interest rate environment that existed in 2002 and continues in 2003 greatly fueled the volume of mortgage loan originations and refinancing and subsequent secondary market mortgage loan sales.

Service charges on deposit accounts increased \$65,661, or 18.08%, to \$428,774 for the nine months ended September 30, 2003 from \$363,113 for the nine months ended September 30, 2002. Service charge income increased in 2003 principally due to increases in income from overdraft fees and wire transfer service fees.

The other income component of non-interest income increased \$42,106, or 22.72%, to \$227,434 for the nine months ended September 30, 2003 from \$185,328 for the nine months ended September 30, 2002. Non-interest income also includes income from Bank Owned Life Insurance (BOLI) which amounted to \$202,051 for the nine months ended September 30, 2003. During the fourth quarter of 2002, the Company purchased \$6.0 million in tax-free BOLI assets which partially offset the cost of employee benefit plans and reduced the overall effective tax rate.

The Company also generates non-interest income from a variety of other fee-based services. These fees are monitored closely by management to reflect current charges amid the Company's competitive market.

Non-Interest Expense

Total non-interest expense increased \$837,035, or 18.4%, to \$5,379,367 for the nine months ended September 30, 2003 from \$4,542,332 for the nine months ended September 30, 2002.

The following table presents the major components of non-interest expense for the nine months ended September 30, 2003 and 2002.

Non-interest Expenses

	Nine months ended September 30,	
	2003	2002
Salaries and employee benefits	\$ 2,966,496	\$ 2,246,824
Occupancy expense	603,827	552,840
Equipment expense	332,626	336,230
Marketing	177,074	177,386
Computer services	368,328	382,626
Regulatory, professional and other fees	434,380	313,908
Office expense	232,036	215,595
All other expenses	264,600	316,923
	<u>\$ 5,379,367</u>	<u>\$ 4,542,332</u>

Salaries and employee benefits increased \$719,672, or 32.0%, to \$2,966,496 for the nine months ended September 30, 2003 from \$2,246,824 for the nine months ended September 30, 2002. This increase reflects the increase in commission levels due to the significant increase in secondary market mortgage loan sales plus normal employee salary increases.

The Company's ratio of non-interest expense to average assets was 2.92% for the nine months ended September 30, 2003 compared to 2.79% for the nine months ended September 30, 2002. The Company's efficiency ratio was 60.5% for the nine months ended September 30, 2003 compared to a ratio of 60.1% for the nine months ended September 30, 2002.

Financial Condition

September 30, 2003 Compared with December 31, 2002

Total consolidated assets at September 30, 2003 totaled \$276,439,897, compared to \$268,707,877 at December 31, 2002. The 2.87% increase in the Company's asset base during the nine months ended September 30, 2003 was primarily funded by an increase in interest bearing deposits. Total deposits increased by \$3,707,864, or 1.7%, to \$222,702,862 at September 30, 2003, compared to \$218,994,998 at December 31, 2002.

Cash and Cash Equivalents

Cash and cash equivalents at September 30, 2003 totaled \$25,912,979 compared to \$9,594,374 at December 31, 2002. Cash and cash equivalents at September 30, 2003 consisted of cash and due from banks of \$10,506,071 and Federal funds sold/short term investments of \$15,406,908. The corresponding balances at December 31, 2002 were \$9,542,010 and \$52,364, respectively. The balance of federal funds sold/short term investments at September 30, 2003 increased primarily due to increased deposit balances and cash inflows from prepayments and maturities in

the securities portfolios.

Securities

Securities represented 29.5% of total assets at September 30, 2003 and 33.2% at December 31, 2002. Total securities decreased \$7,606,800, or 8.5%, to \$81,593,979 at September 30, 2003 from \$89,200,779 at December 31, 2002.

Securities available for sale totaled \$75,137,161 at September 30, 2003, a decrease of \$6,891,705, or 8.4%, from December 31, 2002. During the first nine months of 2003, \$42,820,888 of securities available for sale were purchased (predominantly mortgage backed securities) and funded by calls and maturities of securities held to maturity, securities available for sale and short-term investments.

Securities held to maturity totaled \$6,456,818 at September 30, 2003, a decrease of \$715,095, or 10.0%, from December 31, 2002.

Loans

The loan portfolio, which represents the Company's largest asset, is a significant source of both interest and fee income. Elements of the loan portfolio are subject to differing levels of credit and interest rate risk. The Company's primary lending focus continues to be commercial loans, owner-occupied commercial mortgage loans and tenanted commercial real estate loans.

The following table sets forth the classification of loans by major category at September 30, 2003 and December 31, 2002.

Loan Portfolio Composition

Component	September 30, 2003		December 31, 2002	
	Amount	% of total	Amount	% of total
Construction loans	\$ 51,373,242	32.9%	\$ 32,342,880	21.4%
Residential real estate loans	8,328,665	5.3%	9,023,228	6.0%
Commercial and industrial loans	80,434,736	51.6%	89,415,759	59.2%
Loans to individuals	13,178,424	8.5%	14,851,742	9.8%
Lease financing	1,997,803	1.3%	4,773,528	3.2%
All other loans	600,662	0.4%	642,599	0.4%
	\$ 155,913,532	100.0%	\$ 151,049,736	100.0%

The loan portfolio increased at September 30, 2003 to \$155,913,532 from \$151,049,736 at December 31, 2002. The ability of the Company to enter into larger loan relationships and management's philosophy of relationship banking are key factors in the Company's strategy for loan growth. Strong competition from both bank and non-bank competitors could result in comparatively lower yields on new and established lending relationships. The ultimate collectability of the loan portfolio and the recovery of the carrying amount of real estate are subject to changes in the economic environment of the Company's marketplace and the real estate market.

Non-Performing Assets

Non-performing assets consist of non-performing loans and other real estate owned. Non-performing loans are composed of (1) loans on a non-accrual basis, (2) loans which are contractually past due 90 days or more as to interest and principal payments but have not been classified as non-accrual, and (3) loans whose terms have been restructured to provide a reduction or deferral of interest on principal because of a deterioration in the financial position of the borrower.

The Company's policy with regard to non-accrual loans varies by the type of loan involved. Generally, commercial loans are placed on a non-accrual status when they are 90 days past due unless these loans are well secured and in the process of collection or, regardless of the past due status of the loan, when management determines that the complete recovery of principal or interest is in doubt. Consumer loans are generally charged off after they become 90 days past due. Residential mortgage loans are not generally placed on a non-accrual status unless the value of the real estate has deteriorated to the point that a potential loss of principal or interest exists. Subsequent payments are credited to income only if collection of principal is not in doubt.

Nonaccrual loans were \$278,495 at September 30, 2003, compared to \$156,156 at December 31, 2002. As the table below demonstrates, despite the increase in non-performing assets at September 2003, loan quality and ratios remain strong. This was accomplished through quality loan underwriting, a proactive approach to loan monitoring and aggressive collection strategies.

Non-Performing Assets and Loans

	<u>September 30,</u> <u>2003</u>	<u>December 31,</u> <u>2002</u>
Non-Performing loans:		
Loans 90 days or more past due and still accruing	\$ 83,394	\$ 2,156
Non-accrual loans	278,495	156,156
	<u>361,889</u>	<u>158,312</u>
Total non-performing loans	361,889	158,312
Other real estate owned	61,209	9,492
	<u>423,098</u>	<u>167,804</u>
Total non-performing assets	\$ 423,098	\$ 167,804
	<u>0.23%</u>	<u>0.10%</u>
Non-performing loans to total loans	0.23%	0.10%
Non-performing assets to total assets	0.15%	0.06%

The Company had no restructured loans at September 30, 2003 and December 31, 2002. Impaired loans totaled \$261,849 at September 30, 2003 and \$151,114 at December 31, 2002.

Allowance for Loan Losses

The allowance for loan losses is maintained at a level sufficient to absorb estimated credit losses in the loan portfolio as of the date of the financial statements. The allowance for loan losses is a valuation reserve available for losses incurred or inherent in the loan portfolio and other extensions of credit. The determination of the adequacy of the allowance for loan losses is a critical accounting policy of the Company.

Management utilizes a systematic and documented allowance adequacy methodology for loan losses that requires specific allowance assessment for all loans, including real estate mortgages and consumer loans. This methodology assigns reserves based upon credit risk ratings for all loans. The reserves are based upon various factors, including historical performance, and the current economic environment. Management continually reviews the process used to determine

the adequacy of the allowance for loan losses. Allocations to the allowance for loan losses, both specific and general, are determined after this review. Loans are classified based on internal reviews and evaluations performed by the lending staff. These evaluations are, in turn, examined by the Company's internal loan review specialist. A formal loan review function, independent of loan origination, is used to identify and monitor risk classifications.

The allowance for loan losses increased \$81,360, or 4.87%, to \$1,751,242 at September 30, 2003 from \$1,669,882 at December 31, 2002. The ratio of the allowance for loan losses to total loans was 1.12% at September 30, 2003 and 1.11% at December 31, 2002, respectively. The quality of the loan portfolio remained strong and it is management's belief that the allowance for loan losses is adequate in relation to credit risk exposure levels.

The following table presents, for the periods indicated, an analysis of the allowance for loan losses and other related data.

Allowance for Loan Losses

	September 30, 2003	September 30, 2002
Balance, beginning of period	\$ 1,669,882	\$ 1,414,495
Provision charged to operating expenses	180,000	180,000
Loans charged off	(98,640)	(8,182)
Recoveries	0	20,946
Net (charge offs) / recoveries	(98,640)	12,765
Balance, end of period	\$ 1,751,242	\$ 1,607,260
Loans:		
At period end	\$ 155,913,532	\$ 140,443,133
Average during the period	166,472,294	133,221,927
Net charge offs to average loans outstanding	(0.06%)	0.01%
Allowance for loan losses to:		
Total loans at period end	1.12%	1.14%
Non-performing loans	483.92%	666.87%

Deposits

Deposits, which include demand deposits (interest bearing and non-interest bearing), savings and time deposits, are a fundamental and cost-effective source of funding. The Company offers a variety of products designed to attract and retain customers, with the Company's primary focus being on building and expanding long-term relationships.

Total deposits increased \$3,707,864, or 1.7%, to \$222,702,862 at September 30, 2003 from \$218,994,998 at December 31, 2002. This increase in total deposits was primarily the result of a \$2,084,353 increase in non-interest bearing deposits to \$41,894,104.

Other Borrowings

Other Borrowings are mainly comprised of fixed rate convertible advances from the Federal Home Loan Bank (FHLB) and overnight funds purchased. These borrowings are primarily used to fund asset growth not supported by deposit generation. FHLB advances are fully secured by marketable securities and qualifying one-to-four family mortgage loans. The balance of other borrowings at September 30, 2003 consisted of fixed rate term FHLB borrowings of \$15,500,000 and overnight funds purchased of \$6,000,000. The balance of other borrowings at December 31, 2002 was \$18,000,000 consisting of FHLB borrowings of \$15,500,000 and overnight funds purchased of \$2,500,000.

Trust Preferred Securities

On April 12, 2002, the Company, through its wholly owned subsidiary, 1ST Constitution Capital Trust I, a statutory business trust, issued \$5.0 million of floating rate Trust Preferred Securities in a pooled institutional placement transaction. The Trust has no independent assets or operations, and exists for the sole purpose of issuing the Trust Preferred Securities and investing the proceeds thereof in an equivalent amount of junior subordinated debentures issued by the Company. The junior subordinated debentures, which are the sole assets of the Trust, are unsecured obligations of the Company, and are subordinate and junior in right of payment to all present and future senior and subordinated indebtedness and certain other financial obligations of the Company. The principal amount of subordinated debentures held by the Trust equals the aggregate liquidation amount of its Trust Preferred Securities and its common securities. The junior subordinated debentures bear interest at the same rate, and will mature on the same date, as the corresponding Trust Preferred Securities. The Company fully and unconditionally guarantees the Trust's obligations under the Trust Preferred Securities. The Trust Preferred Securities mature April 22, 2032 and have a current rate of 4.99%. The Trust Preferred Securities are redeemable in whole or in part prior to maturity after April 22, 2007.

Shareholders' Equity and Dividends

Shareholders' equity at September 30, 2003 totaled \$22,601,869, an increase of \$1,607,027, or 7.7%, compared to December 31, 2002. Book value per common share increased \$0.93, or 6.52%, to \$15.19 at September 30, 2003 compared to \$14.26 at December 31, 2002.

The Company's stock is listed for trading on the Nasdaq National Market System under the symbol "FCCY".

The table below presents the actual capital amounts and ratios of the Company for the periods indicated:

Capital Ratios

	<u>Amount</u>	<u>Ratio</u>
As of September 30, 2003 -		
Total capital to risk weighted assets	\$ 24,440,124	15.77%
Tier 1 capital to risk weighted assets	22,688,882	14.84%
Tier 1 capital to average assets	22,688,882	10.34%
As of December 31, 2002 -		
Total capital to risk weighted assets	\$ 26,849,002	14.75%
Tier 1 capital to risk weighted assets	25,179,120	13.84%
Tier 1 capital to average assets	25,179,120	9.64%

The minimum regulatory capital requirements for financial institutions require institutions to have a Tier 1 capital to average assets ratio of 4.0%, a Tier 1 capital to risk weighted assets ratio of 4.0% and a total capital to risk weighted assets ratio of 8.0%. To be considered well capitalized, an institution must have a minimum Tier 1 leverage ratio of 5.0%. At September 30, 2003, the ratios of the Company exceeded the ratios required to be considered well

capitalized. It is management's goal to monitor and maintain adequate capital levels to continue to support asset growth and continue its status as a well-capitalized institution.

Liquidity

At September 30, 2003, the amount of liquid assets remained at a level management deemed adequate to ensure that contractual liabilities, depositors withdrawal requirements, and other operational and customer credit needs could be satisfied.

Liquidity measures the ability to satisfy current and future cash flow needs as they become due. Liquidity management refers to the Company's ability to support asset growth while satisfying the borrowing needs and deposit withdrawal requirements of customers. In addition to maintaining liquid assets, factors such as capital position, profitability, asset quality and availability of funding affect a bank's ability to meet its liquidity needs. On the asset side, liquid funds are maintained in the form of cash and cash equivalents, Federal funds sold, investment securities held to maturity maturing within one year, securities available for sale and loans held for sale. Additional asset-based liquidity is derived from scheduled loan repayments as well as investment repayments of principal and interest from mortgage-backed securities. On the liability side, the primary source of liquidity is the ability to generate core deposits. Short-term borrowings are used as supplemental funding sources when growth in the core deposit base does not keep pace with that of earning assets.

The Company has established a borrowing relationship with the FHLB and its correspondent banks which further supports and enhances liquidity.

The Consolidated Statements of Cash Flows present the changes in cash from operating, investing and financing activities. At September 30, 2003, the balance of cash and cash equivalents was \$25,912,979.

Net cash provided by operating activities totaled \$9,647,558 for the nine months ended September 30, 2003 compared to \$8,156,917 for the nine months ended September 30, 2002. The primary sources of funds are net income from operations adjusted for provision for loan losses, depreciation expenses, and net proceeds from sales of loans held for sale.

Net cash provided by investing activities totaled \$1,528 for the nine months ended September 30, 2003 compared to \$34,474,177 used in investing activities for the nine months ended September 30, 2002. The change in 2003 was the result of a higher volume of securities maturities and prepayments and a lesser volume of loan portfolio growth for the nine months ended September 30, 2003. During 2003, the continuing decline in market interest rates and the corresponding high volume of mortgage loan refinancing activity resulted in a significant increase in prepayments of the Company's mortgage-backed securities.

Net cash provided by financing activities was \$6,669,519 for the nine months ended September 30, 2003 compared to \$31,225,555 for the nine months ended September 30, 2002. The current period amount resulted primarily from an increase in other borrowings partially offset by a modest decrease in deposits during the nine months ended September 30, 2003 compared to the nine months ended September 30, 2002.

The securities portfolio is also a source of liquidity, providing cash flows from maturities and periodic repayments of principal. During the nine months ended September 30, 2003, maturities

and prepayments of investment securities totaled \$48,246,951. Another source of liquidity is the loan portfolio, which provides a steady flow of payments and maturities.

Interest Rate Sensitivity Analysis

The largest component of the Company's total income is net interest income, and the majority of the Company's financial instruments are composed of interest rate-sensitive assets and liabilities with various terms and maturities. The primary objective of management is to maximize net interest income while minimizing interest rate risk. Interest rate risk is derived from timing differences in the repricing of assets and liabilities, loan prepayments, deposit withdrawals, and differences in lending and funding rates. Management actively seeks to monitor and control the mix of interest rate-sensitive assets and interest rate-sensitive liabilities.

The Company continually evaluates interest rate risk management opportunities, including the use of derivative financial instruments. Management believes that hedging instruments currently available are not cost-effective, and therefore has focused its efforts on increasing the Company's spread by attracting lower-cost retail deposits.

Market Risk Analysis

To measure the impacts of longer-term asset and liability mismatches beyond two years, the Company utilizes Modified Duration of Equity and Economic Value of Portfolio Equity (EVPE) models. The modified duration of equity measures the potential price risk of equity to changes in interest rates. A longer modified duration of equity indicates a greater degree of risk to rising interest rates. Because of balance sheet optionality, an EVPE analysis is also used to dynamically model the present value of asset and liability cash flows, with rates ranging up or down 200 basis points. The economic value of equity is likely to be different as interest rates change. Results falling outside prescribed ranges require action by management. At September 30, 2003 and December 31, 2002, the Company's variance in the economic value equity as a percentage of assets with an instantaneous and sustained parallel shift of 200 basis points is within the negative 3.00% guideline, as shown in the tables below.

The market capitalization of the Company should not be equated to the EVPE, which only deals with the valuation of balance sheet cash flows using conservative assumptions. Calculated core deposit premiums may be less than what is available in an outright sale. The model does not consider potential premiums on floating rate loan sales, the impact of overhead expense, non-interest income, taxes, industry market price multiples and other factors reflected in the market capitalization of a company.

The following table sets forth certain information relating to the Company's financial instruments that are sensitive to changes in interest rates, categorized by expected maturity or repricing and the instruments fair value at September 30, 2003 and December 31, 2002.

Market Risk Analysis

Change in Rates	September 30, 2003			December 31, 2002		
	Flat	-200bp	+200bp	Flat	-200bp	+200bp
Economic Value of Portfolio Equity	\$ 27,645,000	\$ 24,895,000	\$ 24,904,000	\$ 25,681,000	\$ 22,917,000	\$ 22,645,000

Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10QSB

Change	(2,750,000)	(2,741,000)	(2,764,000)	(3,036,000)
Change as a % of assets	(0.99%)	(0.99%)	(1.03%)	(1.13%)

Item 3. Controls and Procedures.

The Company's Chief Executive Officer and Chief Financial Officer, with the assistance of other members of the Company's management, have evaluated the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-QSB. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective.

The Company's Chief Executive Officer and Chief Financial Officer have also concluded that there have not been any changes in the Company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 6. Exhibits and Reports on Form 8-K.

(a) Exhibits

- 3(i) * Certificate of Incorporation of the Company (conformed copy)
- 3(ii) Bylaws of the Company (incorporated by reference to Exhibit 3(ii) to the Company's Form 10-QSB filed with the SEC on May 14, 2003)
- 31.1 * Certification of Robert F. Mangano, Chief Executive Officer of the Company, pursuant to Securities Exchange Act Rule 13a-14(a).
- 31.2 * Certification of Joseph M. Reardon, Chief Financial Officer of the Company, pursuant to Securities Exchange Act Rule 13a-14(a).
- 32 * Certifications pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of The Sarbanes-Oxley Act of 2002, signed by Robert F. Mangano, Chief Executive Officer of the Company, and Joseph M. Reardon, Chief Financial Officer of the Company.

* Filed herewith

(b) Reports on Form 8-K

During the period covered by this report, no Current Reports on Form 8-K were filed by the Company with the Commission. On July 18, 2003, the Company furnished the Commission with information regarding earnings and other financial results for the quarter ended June 30, 2003, pursuant to Items 9 and 12 of Form 8-K.
