## Edgar Filing: NOMURA HOLDINGS INC - Form 6-K

Difference in recognition method with latest fiscal year: none

Note: Changes in the fair value of derivatives that are economically used to hedge non-trading assets and liabilities, but that do not meet the criteria in SFAS No. 133 to qualify as an accounting hedge, are reported as either net gain on trading, interest revenue, or interest expenses, depending on the nature of the transaction. Changes in the fair value of both the embedded derivative and related economic hedges are netted. Such amounts for the six months ended September 30, 2004 have been reclassified.

\* ROE for the six months ended September 30, 2005 and 2004 are calculated as follows:

Net income x 2

(Shareholders' equity at the beginning of period + Shareholders' equity at the end of period) / 2

Nomura provides investment, financing and related services in the capital markets on a global basis. In the global capital markets there exist various uncertainties due to, but not limited to, economic and market conditions. Nomura, therefore, releases its results on a more frequent quarterly basis, and does not present earnings forecasts.

| <b>Return on equity (ROE)</b>     | <b>4.9%</b>               | <b>7.4%</b>               |             | <b>5.2%</b>        |

Nomura Holdings, Inc. and its consolidated entities (Nomura) reported net revenue of 669.0 billion yen for the six months ended September 30, 2005, an increase of 80% from the same period last year, and non-interest expenses of 520.7 billion yen, an 85% year-on-year increase, due mainly to the consolidation of Millennium Retailing an investee company of Nomura Principal Finance into Nomura's consolidated financial statements. Income before income taxes rose 67% to 148.3 billion yen and net income increased 57% to 69.2 billion yen. As a result, ROE was 7.4%.

US GAAP consolidated financial results include the effect of consolidation/deconsolidation of certain private equity investee companies. Net revenue for business segments (segment total), which excludes these effects and unrealized gain (loss) on investments in equity securities held for relationship purposes, was 391.2 billion yen, an increase of 15% from the prior year. Non-interest expenses increased 8% to 272.3 billion yen, and income before income taxes increased 33% to 118.9 billion yen.

Domestic Retail income before income taxes increased 65% year-on-year to 71.7 billion yen on strong sales of newly launched investment trusts, foreign currency bonds, and MTNs. This represents the highest half-year level since Nomura started reporting quarterly financial results based on US GAAP in the fiscal year ended March 2002. Despite revenue growth in Fixed Income and Equity, Global Markets income before income taxes declined 9% year-on-year to 30.8 billion yen due to increased expenditure related to investment for key businesses. Although M&A/financial advisory fees come in at the highest level on a half-yearly basis since the fiscal year ended March 2002, a reduction in volume of equity finance compared to the same period last year caused Global Investment Banking income before income taxes to decline 18% year-on-year to 11.3 billion yen. Global Merchant Banking income before income taxes improved 3.8 billion yen compared to the prior year due to realized gains and unrealized gains/losses on private equity investments. Asset Management income before income taxes increased 145% year-on-year to 7.3 billion yen as a result of a rise in assets under management due to increases in newly launched funds and funds offering frequent distributions.

**Financial Position**

Total assets at September 30, 2005, were 36.07 trillion yen, an increase of 1.58 trillion yen compared to March 31, 2005, reflecting an increase in trading-related assets (trading assets and private equity investments, collateralized agreements and receivables arising from unsettled trades (included in receivables)). Total shareholders' equity at September 30, 2005, was 1.87 trillion yen, an increase of 0.7 billion yen compared to March 31, 2005, reflecting share repurchases. Total liabilities at September 30, 2005, were 34.20 trillion yen, an increase of 1.58 trillion yen compared to March 31, 2005, reflecting an increase in trading-related liabilities (trading liabilities and collateralized financing).

Cash and cash equivalents as at September 30, 2005, increased by 115.9 billion yen compared to March 31, 2005. Net cash used in operating activities amounted to 433.7 billion yen due to an increase in trading-related balances (net of trading-related assets and liabilities). Net cash used

## Edgar Filing: NOMURA HOLDINGS INC - Form 6-K

in investing activities was 17.2 billion yen, mainly due to a payment for purchase of office buildings, land, equipment and facilities. Net cash provided by financing activities was 563.2 billion yen as a result of an increase in short-term borrowings.

Nomura Holdings, Inc. and its consolidated entities ( Nomura ) reported net revenue of 382.2 billion yen for the three months ended September 30, 2005, an increase of 33% compared to the previous quarter, due to an increase in Domestic Retail revenue and a recovery in Global Markets revenue spurred on by an improved trading environment. Non-interest expenses increased 3% to 264.6 billion yen, income before income taxes increased 283% to 117.6 billion yen. Net income jumped 632% from the previous quarter to 60.9 billion yen. ROE for the second quarter was 13.1%.

Nomura engaged in private equity investment through its Global Merchant Banking division. Nomura's US GAAP consolidated financial information includes the effect of consolidation/deconsolidation of certain private equity investee companies. Total of business segments excludes these effects and gain (loss) on investments in equity securities held for relationship purposes. Net revenue of business segments for the three months ended September 30, 2005, increased 28% compared to the prior quarter to 219.8 billion yen. Non-interest expenses increased 3% to 138.3 billion yen. Income before income taxes grew 118% to 81.5 billion yen.

Domestic Retail income before income taxes for the three months ended September 30, 2005, increased 37% compared to the prior quarter to 41.4 billion yen, due to continued strong distribution of investment trusts and an increase in stock brokerage commissions. Global Markets income before income taxes rebounded from a 0.7 billion yen loss in the previous quarter to 31.5 billion yen due to an improved trading environment. These two segments contributed largely to overall growth. Global Investment Banking income before income taxes increased 320% to 9.1 billion yen, Global Merchant Banking booked 4.7 billion yen, and Asset Management grew 20% to 4 billion yen. All five business segments saw quarter-on-quarter gains in income before income taxes.

Revenue in the Other segment was minus 9.2 billion yen. Total income before income taxes for all segments rose 118% from the previous quarter to 81.5 billion yen.

| <b>Income (loss) before income taxes</b> | <b>30.3</b>                | <b>41.4</b>               | <b>36.7</b> |

Net revenue increased 20% quarter-on-quarter to 101.4 billion yen. Non-interest expenses were up 10% at 60 billion yen. Income before income taxes was 41.4 billion yen, up 37% compared to the prior quarter. Both net revenue and income before income taxes for the second quarter were the highest level since Nomura started reporting quarterly financial results based on US GAAP in the fiscal year ended March 2002.

Stock brokerage commissions grew on a recovery in the equities markets. Investment trust commissions rose to a new record level for the second consecutive quarter since the fiscal year ended March 2002, due to strong demand for the Nomura Global REIT Fund and AllianceBernstein Emerging Growth Stock Fund.

Domestic Retail client assets stood at 51.7 trillion yen as of September 30, 2005, up 5.2 trillion yen from June 30, 2005. As such, Nomura achieved its target of 50 trillion yen in Domestic Retail client assets eighteen months ahead of schedule.

Net revenue increased 56% quarter-on-quarter to 77.7 billion yen. Non-interest expenses declined 9% to 46.2 billion yen. Income before income taxes was 31.5 billion yen.

Fixed Income and Equity performed well due to an improved trading environment and a steady increase in client order flow.

In key business areas such as loan-related businesses, the amount of loans handled increased to 210 billion yen in the second quarter. In Europe, the Asset Finance Group saw results through advising on corporate buyouts and originating buyout financing deals. The Equity Derivatives Group built up momentum in fund derivatives.

Net revenue was 20.5 billion yen, up 60% from the three months ended June 30, 2005. Non-interest expenses increased 7% to 11.3 billion yen. Income before income taxes grew 320% to 9.1 billion yen.

Stock underwriting commissions recovered on a global offering by Central Japan Railway and J-REIT deals. MPO investment for the quarter totaled 77.7 billion yen from five deals including Ebara at 40 billion yen and a 31 billion yen deal for GMO Internet. In M&A, Nomura served as financial adviser in such deals as Square Enix's takeover of Taito and Canon's buy out of NEC Machinery and Anelva.

Nomura ranked number one in the 2005 (January to September) Equity & Equity-related and M&A league tables<sup>1</sup>.

|  | (A)                        | (B)                       | (B-A)/(A)   |
| Net revenue                              | 12.5                       | 13.8                      | 10.2        |
| Non-interest expenses                    | 9.2                        | 9.9                       | 6.8         |
| <b>Income (loss) before income taxes</b> | <b>3.3</b>                 | <b>4.0</b>                | <b>19.8</b> |

Net revenue increased 10% compared to the previous quarter to 13.8 billion yen. Non-interest expenses increased 7% to 9.9 billion yen. Income before income taxes grew 20% to 4 billion yen.

Revenue increased as assets under management grew through continued inflow of assets into Nomura's expanded lineup of funds offering frequent distributions. The newly launched Nomura Global REIT Fund reached 150 billion yen, contributing to growth in assets under management in the second quarter. Assets under management in funds for bank customers grew 62% from June 30, 2005, to 212 billion yen as of September 30.

Total assets under management were 20 trillion yen as of September 30, 2005, up 1.2 trillion yen from June 30, 2005. Nomura Asset Management's global balanced fund was selected by Japan Post as one of its funds for distribution starting in October.

Note: Reclassifications -

Certain reclassifications of amounts on private equity entities accounted for as consolidated subsidiaries have been made.

Changes in the fair value of derivatives that are economically used to hedge non-trading assets and liabilities, but that do not meet the criteria in SFAS No. 133 to qualify as an accounting hedge, are reported as either net gain on trading, interest revenue, or interest expenses, depending on the nature of the transaction. Changes in the fair value of both the embedded derivative and related economic hedges are netted.

**NOMURA HOLDINGS, INC.**

**NOTES TO THE CONSOLIDATED FINANCIAL INFORMATION**

**(UNAUDITED)**

**1. Summary of accounting policies:**

**Description of business**

Nomura Holdings, Inc. (the Company) and its broker-dealer, banking and other financial services subsidiaries provide investment, financing and related services to individual, institutional and government customers on a global basis. The Company and other entities in which it has a controlling financial interest are collectively referred to as Nomura.

**Basis of presentation**

The consolidated financial statements include the accounts of the Company and other entities in which it has a controlling financial interest. Because the usual condition for a controlling financial interest in an entity is ownership of a majority of the voting interest, the Company consolidates its wholly-owned and major owned subsidiaries. In accordance with Financial Accounting Standards Board (FASB) Interpretation No. 46, Consolidation of Variable Interest Entities (FIN 46) and the revised Interpretation, the Company also consolidates any variable interest entities for which Nomura is the primary beneficiary. Investments in entities in which Nomura has significant influence over operating and financial decisions (generally defined as 20 to 50 percent of voting interest) are accounted for using the equity method of accounting and are reported in *Investments in and advances to affiliated companies*. Investments in which Nomura has neither control nor significant influence are carried at fair value.

The accounting and financial reporting policies of the Company conform to accounting principles generally accepted in the United States (U.S. GAAP) as applicable to broker-dealers.

The Company's principal subsidiaries include Nomura Securities Co., Ltd., Nomura Securities International, Inc. and Nomura International plc.

All material intercompany transactions and balances have been eliminated on consolidation.

Certain reclassifications of previously reported amounts have been made to conform to the current year presentation.

**Use of estimates**

In presenting the consolidated financial statements, management makes estimates regarding certain financial instrument and investment valuations, the outcome of litigation, the recovery of the carrying value of goodwill, the allowance for loan losses, the realization of deferred tax assets and other matters that affect the reported amounts of assets and liabilities as well as the disclosure in the financial statements. Estimates, by their nature, are based on judgment and available information. Therefore, actual results may differ from estimates, which could have a material impact on the consolidated financial statements and, it is possible that such adjustments could occur in the near term.

#### **Fair value of financial instruments**

Fair value of financial instruments is based on quoted market prices, broker or dealer quotations or an estimation by management of the amounts expected to be realized upon settlement under current market conditions. Fair value of exchange-traded securities and certain exchange-traded derivative contracts are generally based on quoted market prices or broker/dealer quotations. Where quoted market prices or broker/dealer quotations are not available, prices for similar instruments or valuation pricing models are considered in the determination of fair value. Valuation pricing models consider time value, volatility and other statistical measurements for the relevant instruments or for instruments with similar characteristics. These models also incorporate adjustments relating to the administrative costs of servicing future cash flow and market liquidity adjustments. These adjustments are fundamental components of the fair value calculation process.

Trading assets and trading liabilities, including derivative contracts, are recorded at fair value, and unrealized gains and losses are reflected in trading revenues. Fair values are based on quoted market prices or broker/dealer quotations where possible. If quoted market prices or broker/dealer quotations are not available or if the liquidation of Nomura's positions would reasonably be expected to impact quoted market prices, fair value is determined based on valuation pricing models that take into consideration time value and volatility factors underlying the financial instrument.

Valuation pricing models and their underlying assumptions impact the amount and timing of unrealized gains and losses recognized, and the use of different valuation pricing models or underlying assumptions could produce different financial results. Changes in the fixed income, equity, foreign exchange and commodity markets will impact Nomura's estimates of fair value in the future, potentially affecting trading revenues. To the extent financial contracts have extended maturity dates, Nomura's estimates of fair value may involve greater subjectivity due to the lack of transparent market data available upon which to base underlying modeling assumptions.

## **Table of Contents**

### **Private equity business**

The investments in Private equity business are accounted for at fair value, by the equity method of accounting or as consolidated subsidiaries depending on the attributes of each investment. The consolidated subsidiaries in Private equity business are referred to Private equity entities .

Changes in the fair value of private equity investments carried at fair value are recorded in *(Loss) gain on private equity investments* . The determination of fair value is significant to Nomura's financial condition and results of operations, and requires management to make judgments based on complex factors. As the underlying investments are mainly in non-publicly listed companies, there are no externally quoted market prices available. In calculating fair value, Nomura estimates the price that would be obtained between a willing buyer and a willing seller dealing at arm's length. Valuations are basically based on projected future cash flows to be generated from the underlying investment, discounted at a weighted average cost of capital. The cost of capital is estimated, where possible, by reference to quoted comparables with a similar risk profile. Cash flows are derived from detailed projections prepared by the management of each respective investment.

The product sales of private equity entities are recognized upon delivery which is considered to have occurred normally when the customer has taken title to the product and risk and rewards of ownership have been substantively transferred. If the sales contract contains a customer acceptance provision, then sales are recognized after customer acceptance occurs, and the corresponding cost of good sold is recorded concurrently with the product sales.

### **Transfers of financial assets**

Nomura accounts for the transfer of financial assets in accordance with Statement of Financial Accounting Standards ( SFAS ) No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities (SFAS 140). This statement requires that Nomura account for the transfer of financial assets, as a sale when Nomura relinquishes control over the asset. SFAS 140 deems control to be relinquished when the following conditions are met: (a) the assets have been isolated from the transferor (even in bankruptcy or other receivership), (b) the transferee has the right to pledge or exchange the assets received and (c) the transferor has not maintained effective control over the transferred assets.

In connection with its securitization activities, Nomura utilizes special purpose entities, or SPEs to securitize commercial and residential mortgage loans, government and corporate bonds and other types of financial assets. Nomura's involvement with SPEs includes structuring SPEs and acting as an administrator of SPEs and underwriting, distributing and selling debt instruments and beneficial interests issued by SPEs to investors. Nomura derecognizes financial assets transferred in securitizations provided that Nomura has relinquished control over such assets. Nomura may obtain an interest in the financial assets, including residual interests in the SPEs subject to prevailing market conditions. Any such interests are accounted for at fair value and included in *Securities inventory* within Nomura's consolidated balance sheets, with the change in fair value included in revenues.

### **Foreign currency translation**

The financial statements of the Company's subsidiaries outside Japan are measured using their functional currency. All assets and liabilities of foreign subsidiaries are translated into Japanese yen at exchange rates in effect at the balance sheet date; all revenue and expenses are translated at the average exchange rates for the respective years and the resulting translation adjustments are accumulated and reported as *Cumulative*

*translation adjustments* in shareholders' equity.

Foreign currency assets and liabilities are translated at exchange rates in effect at the balance sheet date and the resulting translation gains or losses are currently credited or charged to income.

#### **Fee revenue**

Commissions charged for executing brokerage transactions are accrued on a trade date basis and are included in current period earnings. Fees from investment banking include securities underwriting fees and other corporate financing services fees. Underwriting fees are recorded when services for underwriting are completed. All other fees are recognized when related services are performed. Asset management fees are accrued as earned.

#### **Trading assets and trading liabilities**

Trading assets and trading liabilities, including contractual commitments arising pursuant to derivative transactions, are recorded on the consolidated balance sheets on a trade date basis at fair value with the related gains and losses recorded in *Net gain on trading* in the consolidated statements of income.

## **Table of Contents**

### **Collateralized agreements and collateralized financing**

Repurchase and reverse repurchase transactions ( Repo transactions ) principally involve the buying or selling of Government and Government agency securities under agreements with customers to resell or repurchase these securities to or from those customers. Nomura takes possession of securities purchased under agreements to resell while providing collateral to counterparties to collateralize securities sold under agreements to repurchase. Nomura monitors the value of the underlying securities on a daily basis relative to the related receivables and payables, including accrued interest, and requests or returns additional collateral when deemed appropriate. Repo transactions are accounted for as collateralized agreements or financing transactions and are recorded on the consolidated balance sheets at the amount at which the securities will be repurchased or resold, as appropriate.

Repo transactions are presented on the accompanying consolidated balance sheets net-by-counterparty, where net presentation is consistent with Financial Accounting Standards Board Interpretation ( FIN ) No. 41, *Offsetting of Amounts Related to Certain Repurchase and Reverse Repurchase Agreements*.

Securities borrowed and securities loaned are accounted for as financing transactions. Securities borrowed and securities loaned that are cash collateralized are recorded on the accompanying consolidated balance sheets at the amount of cash collateral advanced or received. Securities borrowed transactions generally require Nomura to provide the counterparty with collateral in the form of cash or other securities. For securities loaned transactions, Nomura generally receives collateral in the form of cash or other securities. Nomura monitors the market value of the securities borrowed or loaned and requires additional cash or securities, as necessary, to ensure that such transactions are adequately collateralized.

Nomura engages in Gensaki transactions which originated in the Japanese financial markets. Gensaki transactions involved the selling of commercial paper, certificates of deposit, Japanese government bonds and various other debt securities to an institution wishing to make a short-term investment, with Nomura agreeing to reacquire them from the institution on a specified date at a specified price. The repurchase price reflects the current interest rates in the money markets and any interest derived from the securities. There are no margin requirements for Gensaki transactions nor is there any right of security substitution. As such, Gensaki transactions are recorded as sales in the consolidated financial statements and the related securities and obligations to repurchase such Gensaki securities are not reflected in the accompanying consolidated balance sheets.

New Gensaki transactions ( Gensaki Repo transactions ) started in the Japanese financial markets in 2001. Gensaki Repo transactions contain margin requirements, rights of security substitution, or restrictions on the customer's right to sell or repledge the transferred securities. Accordingly, Gensaki Repo transactions are accounted for as collateralized agreements or financing transactions and are recorded on the consolidated balance sheets at the amount that the securities will be repurchased or resold.

*Other secured borrowings*, which consist primarily of secured borrowings from financial institutions in the inter-bank money market, are recorded at contractual amounts.

Secured loans to financial institutions in the inter-bank money market are included in the consolidated balance sheets in *Loans receivable*.

### **Derivatives**

## Trading

Nomura uses a variety of derivative financial instruments, including futures, forwards, swaps and options, in its trading activities and in the management of its interest rate, market price and currency exposures.

Those derivative financial instruments used in trading activities are valued at market or estimated fair value with the related gains and losses recorded in *Net gain on trading*. Unrealized gains and losses arising from Nomura's dealings in over-the-counter derivative financial instruments are presented in the accompanying consolidated balance sheets on a net-by-counterparty basis where net presentation is consistent with FIN No. 39, Offsetting of Amounts Related to Certain Contracts.

## Non-trading

In addition to its trading activities, Nomura, as an end user, uses derivative financial instruments to manage its interest rate and currency exposures or to modify the interest rate characteristics of certain non-trading assets and liabilities.

These derivative financial instruments are linked to specific assets or specific liabilities and are designated as hedges as they are effective in reducing the risk associated with the exposure being hedged, and they are highly correlated with changes in the market or fair value of the underlying hedged item, both at inception and throughout the life of the hedge contract. Nomura applies fair value hedge accounting to these hedging transactions, and the relating unrealized profit and losses are recognized together with those of the hedged assets and liabilities as interest revenue or expenses.

Certain derivatives embedded in debt instruments are bifurcated from the host contract, such as bonds and certificates of deposit, and accounted for at the fair value. Changes in the fair value of these embedded derivatives are reported in *Net gain on trading*. Derivatives used to economically hedge these instruments are also accounted for at fair value, and changes in the fair value of these derivatives are reported in *Net gain on trading*.

Derivatives that do not meet these criteria are carried at market or fair value and with changes in value included currently in earnings.

## **Table of Contents**

### **Allowance for loan losses**

Loans receivable consist primarily of margin transaction loans related to broker dealers ( margin transaction loans ), loans receivable in connection with banking/financing activities ( banking/financing activities loans ) and loans receivable from financial institutions in the inter-bank money market used for short-term financing ( inter-bank money market loans ).

Allowances for loan losses on margin transactions loans and inter-bank money market loans are provided for based primarily on historical loss experience.

Allowances for loan losses on banking/financing activities loans reflect management's best estimate of probable losses. The evaluation includes an assessment of the ability of borrowers to pay by considering various factors such as changes in the nature of the loan, volume of the loan, deterioration of pledged collateral, delinquencies and the current financial situation of the borrower.

### **Office buildings, land, equipment and facilities**

Office buildings, land, equipment and facilities, including those held by private equity entities, which consist mainly of office buildings, land and software, are stated at cost, net of accumulated depreciation and amortization, except for land, which is stated at cost. Significant renewals and additions are capitalized at cost. Maintenance, repairs and minor renewals are charged currently to income.

Depreciation is generally computed by the straight-line method and at rates based on estimated useful lives of each asset according to general class, type of construction and use. Amortization is generally computed by the straight-line method over the estimated useful lives.

### **Long-lived assets**

SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets provides guidance on the financial accounting and reporting for the impairment or disposal of long-lived assets. In accordance with SFAS No. 144, long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If the estimated future undiscounted cash flow is less than the carrying amount of the assets, a loss would be recognized to the extent the carrying value exceeded its fair value.

### **Investments in equity securities and non-trading debt securities**

Nomura's investments in equity securities consist of marketable and non-marketable equity securities that have been acquired for its operating purposes and other than operating purposes. For Nomura's operating purposes, it holds such investments for the long-term in order to promote existing and potential business relationships. In doing so, Nomura is following customary business practices in Japan which, through cross-shareholdings, provide a way for companies to manage their shareholder relationships. Such investments consist mainly of equity

## Edgar Filing: NOMURA HOLDINGS INC - Form 6-K

securities of various financial institutions such as Japanese commercial banks, regional banks and insurance companies. Nomura also holds equity securities such as stock exchange memberships for other than operating purposes.

Investments in equity securities for Nomura's operating purposes are recorded as *Investments in equity securities* in the consolidated balance sheets.

Investments in equity securities for other than operating purposes also includes investments in equity securities held by private equity entities, which are included in the consolidated balance sheets in *Other assets - Other*.

In accordance with U.S. GAAP for broker-dealers, investments in equity securities for Nomura's operating purposes and other than operating purposes are recorded at fair value and unrealized gains and losses are recognized currently in income.

Non-trading debt securities are recorded at market or fair value together with the related hedges and the related gains and losses are recorded in *Revenue - Other* in the consolidated statements of income.

### **Income taxes**

In accordance with SFAS No. 109, *Accounting for Income Taxes*, deferred tax assets and liabilities are recorded for the expected future tax consequences of tax loss carryforwards and temporary differences between the carrying amounts and the tax bases of the assets and liabilities based upon enacted tax laws and rates. Nomura recognizes deferred tax assets to the extent it believes that it is more likely than not that a benefit will be realized. A valuation allowance is provided for tax benefits available to Nomura that are not deemed more likely than not to be realized.

### **Stock-based compensation**

Nomura accounts for stock-based compensation in accordance with SFAS No. 123, *Accounting for Stock-Based Compensation*. Compensation cost is determined using option pricing models intended to estimate the fair value of the awards at the grant date, and it is recognized over the service period, which generally is equal to the vesting period.

## **Table of Contents**

### **Earnings per share**

In accordance with SFAS No. 128, *Earnings per Share*, the computation of basic earnings per share is based on the average number of shares outstanding during the year. Diluted earnings per share reflect the assumed conversion of all dilutive securities.

### **Cash and cash equivalents**

Nomura defines cash and cash equivalents as cash on hand and demand deposits with banks.

### **Goodwill, intangible assets and negative goodwill**

In June 2001, the FASB issued SFAS No. 141, *Business Combinations* and SFAS No. 142, *Goodwill and Other Intangible Assets*. SFAS No. 141 requires that any unamortized negative goodwill arising from business combinations completed before July 1, 2001 be written off and recognized as a cumulative effect of a change in accounting principle when SFAS No. 142 is adopted. SFAS No. 142 no longer permits the amortization of goodwill and intangible assets with indefinite lives. Instead these assets must be reviewed annually, or more frequently in certain circumstance, for impairment. Intangible assets that have determinable lives will continue to be amortized over their useful lives and reviewed for impairment.

Goodwill is the cost of acquired companies in excess of the fair value of identifiable net assets at acquisition date. Nomura periodically assesses the recoverability of goodwill by comparing the fair value of the businesses to which goodwill relates to the carrying amount of the businesses including goodwill. If such assessment indicates that the fair value is less than the related carrying amount, a goodwill impairment determination is made.

### **New accounting pronouncements**

In May 2005, the FASB issued SFAS No. 154, *Accounting Changes and Error Corrections*. SFAS No. 154 replace APB Opinion No. 20, *Accounting Changes*, and SFAS No. 3, *Reporting Accounting Changes in Interim Financial Statements*, and changes the requirements for the accounting for and reporting of a change in accounting principle. This statement applies to all voluntary changes in accounting principle, and to changes required by an accounting pronouncement in the unusual instance that the pronouncement does not include specific transition provision. This statement requires retrospective application to prior periods' financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change. This statement is effective for accounting changes and correction of errors made in fiscal years beginning after December 15, 2005.

In June 2005, the FASB ratified the consensus reached by the Emerging Issues Task Force on Issue 04-5( *EITF 04-5* ), *Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights*. EITF 04-5 presumes that a general partner controls a limited partnership, and should therefore consolidate a limited partnership, unless the limited partners have the substantive ability to remove the general partner without cause based on a simple majority vote or can otherwise

## Edgar Filing: NOMURA HOLDINGS INC - Form 6-K

dissolve the limited partnership, or unless the limited partners have substantive participating rights over decision making. The guidance is effective for existing partnership agreements for financial reporting periods beginning after December 15, 2005 and immediately for all new limited partnership agreements and any limited partnership agreements that are modified, Nomura is currently assessing the impact of the adoption of EITF 04-5.

**Table of Contents****2. Credit and investment commitments and guarantees:****Commitments**

In connection with its banking/financing activities, Nomura has provided to counterparties through subsidiaries, commitments to extend credit, which generally have a fixed expiration date. In connection with its investment banking activities, Nomura has entered into agreements with customers under which Nomura has committed to underwrite notes that may be issued by the customers. The outstanding commitments under these agreements are included in commitments to extend credit.

Nomura has commitments to invest in various partnerships, primarily in connection with its merchant banking activities, and also has commitments to provide financing for investments related to these partnerships. The outstanding commitments under these agreements are included in commitments to invest in partnerships.

Contractual amounts of these commitments were as follows:

|  | Millions of yen |           |
|--|-----------------|-----------|
|  | September 30,   | March 31, |
|  | 2005            | 2005      |
| Commitments to extend credit and to invest in partnerships | 228,690         | 192,590   |

**Guarantees**

Nomura enters into, in the normal course of its subsidiaries' banking/financing activities, various guarantee arrangements with counterparties in the form of standby letters of credit and other guarantees, which generally have a fixed expiration date. In addition, Nomura enters into certain derivative contracts that meet the accounting definition of a guarantee under FIN No. 45. Contractual amounts of these guarantees, other than derivative contracts, for which the fair values are recorded on the consolidated balance sheets at fair value, were as follows:

|  | Millions of yen |           |
|--|-----------------|-----------|
|  | September 30,   | March 31, |
|  | 2005            | 2005      |
| Standby letters of credit and other guarantees | 7,152           | 7,919     |

**3. Change in additional paid-in capital and retained earnings:**

|                                   | Millions of yen          |                  |                    |

## **Table of Contents**

### **Corporate Goals and Principles**

#### **Management Policy and Structure of Business Operations**

The vision of Nomura Group (the Company) is to solidify its position as a globally competitive Japanese financial institution.

Japan's financial market evolution has resulted in more internationalization and deregulation. The Company's management objective is to capture the securities business from a broader perspective, continue strengthening and expanding our domestic operations whilst, simultaneously, utilizing Nomura Group's comprehensive capabilities around the world to grow our business on a global scale.

One of the management's goal is to maintain an average consolidated ROE of 10 to 15% over the medium to long run.

In executing the business strategy, the Company focuses on business lines, which are linked globally, rather than individual legal entities. Nomura Group's business lines are comprised of Domestic Retail, Global Markets, Global Investment Banking, Global Merchant Banking and Asset Management. Global Markets consists of Global Fixed Income, Global Equity and Asset Finance.

In addition, within Global Markets, together with Global Fixed Income and Global Equity, we have established Asset Finance as a new business line.

The Company has established these business lines to meet client requirements, with the objective to expand and strengthen our operations both at home and abroad. In order to achieve this, the Company has delegated appropriate executive authority to each of the respective business lines, with the aim to increase Nom Group's competitive position through the continuation of establishing a solid platform via linkages between the lines and enhancement of professional skills within each line.

#### **Business Line**

#### **Dividend Policy**

When determining the amount of any cash dividend, the Company will first consider the maintenance of capital sufficient to capture business opportunities as they may develop. The Company will then decide the target dividend amounts, taking into account the firm's dividend-on-equity ratio (DOE). Lastly, when the Company achieves a sufficient level of profit, it will decide the amount of the cash dividend taking into consideration the pay-out ratio. As for retained profits, the Company intends to invest in business areas where high profitability and growth may

reasonably be expected, including development and expansion of infrastructure, to maximize value for shareholders.

### **Current Challenges**

The business environment which the Company is facing, continues to change at a rapid pace on the back of further structural adjustments in the domestic money flows as well as deregulation taking place within the economy.

In this environment, the Company will continue to analyze markets, viewing the securities business from a wider perspective, accelerate its global operations to meet the diverse requirements of our customers on a prompt, flexible basis, with the ultimate objective in providing the best service for various types of investment advice.

## **Table of Contents**

In Domestic Retail, the Company will aim to shift personal financial assets away from bank savings to securities market, expanding and strengthen our customer base. For that purpose, we will continue to take a Core Value Formation strategy, in which we aim to serve products and services that our customers find to be of value. We will also continue our efforts to provide education to investors in order to expand the overall investor universe towards the securities market.

In Global Markets, the Company through close coordination between Domestic Retail and Global Investment Banking, will provide high value added solutions in the field of Global Fixed Income, Global Equity and Asset Finance, through the application of financial technology such as securitization and derivatives, provide liquidity, to financial products such as interest rates, foreign exchange, credit, equity and real estate related products.

In Global Investment Banking, the Company will fully utilize its network to provide high value added solutions to increase their shareholder value, such as M&A for capital structure changes or business expansion.

In Global Merchant Banking, the Company through co-work with other business lines, will try to maximize the value of our investments by improving rationality of companies and exit process, thus increasing the business area of Nomura Group.

In Asset Management, the Company will continue in maintaining a structure which can continuously add value by concentrating our operations, enhancing research capabilities improving our analysis. The Company also aims to increase its assets under management through increase a variety of investment opportunities they can offer and its sales channel to investor. In its defined contribution pension plan business, the Company will increase their customer base by offer their integrated services which include from consulting for plan implementation to offer individual product.

Nomura Group will aim to fully utilize its combined strengths on an expedient basis, continuing its efforts in the development of the Japanese economy and expansion of its financial market, while expanding our client horizon to strengthen our earnings base, for enhancing shareholder value.

## **Basic concept of corporate governance, and the status of its implementation**

(Basic concept of corporate governance)

The Company in conjunction with the domestic companies of the Nomura Group has adopted the Committee System since June 2003.

Under the Committee System, management oversight functions are separated from business operation functions and many of the powers to execute business activities are delegated to executive officers. The Company can make quicker management decisions on a consolidated basis. Under this corporate governance structure, the Company has maintained three committees: a Nomination Committee, an Audit Committee and a Compensation Committee, each of which has a majority of outside directors, aimed at strengthening management oversight and further improving transparency.

The Company has maintained Code of Ethics of Nomura Group concerning the basic principles of corporate governance and social responsibilities to guide all directors, officers and employees of the Nomura Group.

The Company has adopted procedures under which the Audit Committee shall discuss and approve proposals by the Chief Financial Officer regarding fees for the Company's independent accountant and the type of services to be provided.

(The status of corporate governance policy implementation)

1) The status of corporate governance regarding management decision-making, implementation and oversight, etc. in administrative organization

(1) The Committee System or the Statutory Auditor System

As described above, the Company has adopted the Committee System since June 2003.

(2) Appointment of outside directors

Board of Directors of the Company is comprised of eleven directors including four outside directors as defined under the Commercial Code of Japan.

(3) Overview of the Committees

(i) Nomination Committee

The Nomination Committee is authorized to determine the particulars of proposals concerning the election and dismissal of directors to be submitted to a general meeting of shareholders. This committee's current members are Junichi Ujiie (Chairman of the Board), Masaharu Shibata (outside director) and Hideaki Kubori (outside director). Junichi Ujiie is the Chairman of this committee.

## **Table of Contents**

### (ii) Audit Committee

The Audit Committee is authorized to audit the execution by directors and executive officers of their duties and determine the particulars of proposals concerning the election and dismissal of the independent auditor to be submitted to a general meeting of shareholders. This committee's current members are Haruo Tsuji (outside director), Koji Tajika (outside director) and Fumihide Nomura (non-executive director). Haruo Tsuji is the Chairman of this committee. All of the members are independent under the standards set forth in the Sarbanes-Oxley Act and Koji Tajika satisfies the requirements of audit committee financial expert under the Sarbanes-Oxley Act.

### (iii) Compensation Committee

The Compensation Committee is authorized to determine the particulars of the compensation for each director and executive officer. This committee's current members are Junichi Ujii (Chairman of the Board), Masaharu Shibata (outside director) and Hideaki Kubori (outside director). Junichi Ujii is the Chairman of this committee.

### (4) Allocation of full-time staff for the outside directors

Secretariat and Office of Audit Committee assist directors, including the outside directors, in execution of their operations.

### (5) Framework for operational execution

Thirty-two executive officers determine the matters delegated by resolutions of the Board of Directors and execute the business of the Company. Important matters of those delegated to executive officers are determined by the Board of Executive Officers or the Executive Management Board, each of which comprises the executive officers. The Board of Executive Officers composed of all thirty-two executive officers is authorized to determine the annual business plan and budget and the allocation of the management resources of the Nomura Group. The Executive Management Board consisting of ten executive officers including all representative executive officers is authorized to determine important matters concerning the management of the Nomura Group. The Commitment Committee is chaired by an executive officer appointed by the President & Chief Executive Officer and composed of six executive officers appointed by the chair of the Commitment Committee. The Commitment Committee is authorized to determine or discuss important matters regarding less liquid positions of the Nomura Group.

The Internal Controls Committee is authorized to determine basic matters concerning establishment of internal control and procedures relating to the business management structure of the Nomura Group. The Internal Controls Committee is consisted of four executive officers including the President & Chief Executive Officer and two non-executive directors, the Chairman of the Audit Committee and an Audit Mission Director.

### (6) Internal control / Internal audit, audit by Audit Committee and financial audit

The Audit Committee is composed entirely of non-executive part-time directors and has central responsibilities for management audit functions under the Board of Directors. In order to facilitate audit functions, the following measures have been undertaken:

## Edgar Filing: NOMURA HOLDINGS INC - Form 6-K

1. Two non-executive but full-time directors (Audit Mission Directors) who are familiar with the business and organization of the Nomura Group, are assigned by the Board of Directors. They thus supplement the audit conducted by the Audit Committee, maintain the merits of the previous statutory audit system. The duty of an Audit Mission Director is to conduct operational supervision including daily inspections and investigations, such as attending important committee meetings.

2. The Nomura Group has established an Internal Audit Division that is independent from other business and business support lines. The Head of Internal Audit supervises internal audit operations of the Company and its subsidiaries. The Internal Audit Division is directed by the Internal Controls Committee, members of which include a director belonging to the Audit Committee and an Audit Mission Director. Further, internal audit results are reported not only to the executive management but also to the Audit Committee and Audit Mission Directors.

## Table of Contents

3. The Company has appointed Ernst & Young ShinNihon as the company's independent auditors. The Company strives to ensure proper account processing and transparent management for financial reporting under the review of the independent auditors. The Audit Committee hears the report and explanation from the independent auditors and oversees appropriateness of the method and result of the audit performed by the independent auditors. The Audit Committee also examines the financial statements (including the consolidated financial statements) and supplementary schedules. The Audit Committee has the authority to pre-approve audit or non-audit services provided by the company's independent auditors as required by the U.S. auditor independent rules. Internal Audit Division meets the independent auditors on regular and adhoc base when necessary in order to exchange information on audit plan and audit result reciprocally.

### (7) Risk Management Structure

The Company has an independent global risk management unit headquartered in Tokyo to support risk management which takes place at each level of Nomura's business. The global risk management unit also monitors and manages market, credit, event and market liquidity risks with regard to Nomura's trading and investment portfolios on a worldwide basis.

Nomura's Executive Management Board is responsible for establishing global risk policies, and monitoring and managing the various risks that the Company faces in the business activities.

Nomura's Board of Executive Officers and Executive Management Board also determine Nomura's strategic direction and allocate resources and capital to each of Nomura's businesses. The Executive Management Board reviews Nomura's business plans, budgets and risk-adjusted performance to ensure proper diversification of risks and revenues. The Board of Executive Officers is made up of all of Nomura's Executive Officers. The Executive Management Board is made up of Representative Executive Officers and some of Nomura's Executive Officers appointed by Nomura's Board of Directors. Nomura's President and Chief Executive Officer is the Chairman of both of the organizations.

In addition to the above structure, the Commitment Committee was set up in order to control risks relating to the less liquid asset investments etc. Nomura's Commitment Committee is made up of the Executive Officers assigned by the Chairman of the Committee, while such Chairman is appointed by the President and Chief Executive Officer.

Nomura's global risk management headquartered in Tokyo provides risk information to the Executive Management Board and quantifies risk for each of Nomura's businesses.

The Company has made a significant commitment to the development and continuous enhancement of an appropriate risk management system and procedures. This system enables the Company to produce various analyses of global-based exposure to counterparties under the unified obligor identification, as well as to calculate risk amounts, including Value-at-Risk amounts, based upon Nomura's position and sensitivity data sets provided from Nomura's regional risk management. The system, which senior management, global risk manager and regional risk managers access, integrates global market data, counterparty, position, exposure and other risk information worldwide. This enables the Company to achieve more efficient risk monitoring and more effective risk control.

2) Summary of personal, capital, dealing and other conflicts of interest between the Company, its outside directors and outside auditors

None

3) Implementation to expand company corporate governance in the recent year

The Company provides a forum for its outside directors where they discuss its corporate governance practices or procedures such as functions of the Board of Directors. Such forum was held three times during the year ended March 31, 2005.

**Table of Contents**

For the purpose of disclosure of corporate information, the Disclosure Committee met eight times during the year ended March 31, 2005 to discuss matters relating to the annual securities report (yuka-shoken-hokokusho) and Form 20-F (annual report to be filed with the U.S. Securities and Exchange Commission). Also, the Disclosure Committee makes arrangements for documentation and evaluation of effectiveness of the Company's internal control over financial reporting under Section 404 of the Sarbanes-Oxley Act that will apply to the Company from the year ended March 31, 2007.

## **Table of Contents**

### **Risk Factors**

You should carefully consider the risks described below before making an investment decision. If any of the risks described below actually occurs, our business, financial condition or results of operations could be adversely affected. In that event, the trading prices of our shares could decline, and you may lose all or part of your investment. Additional risks not currently known to us or that we now deem immaterial may also harm us and affect your investment.

#### **Market fluctuations could harm our businesses**

Our businesses are materially affected by conditions in the financial markets and economic conditions in Japan and elsewhere around the world. Market downturns can occur not only as a result of purely economic factors, but also as a result of war, act of terrorism, natural disasters or other similar events. A sustained market downturn can adversely affect our business and can result in substantial losses. Even in the absence of a prolonged market downturn, we may incur substantial losses due to market volatility.

#### *Our brokerage and asset management revenues may decline*

A market downturn could result in a decline in the revenues we receive from commissions because of a decline in the volume of brokered securities transactions that we execute for our customers. Also, in most cases, we charge fees for managing our clients' portfolios that are based on the value of their portfolios. A market downturn that reduces the value of our clients' portfolios, increases the amount of withdrawals or reduces the amount of new investments in these portfolios would reduce the revenue we receive from our asset management businesses.

#### *Our investment banking revenues may decline*

Unfavorable financial or economic conditions would likely reduce the number and size of transactions for which we provide securities underwriting, financial advisory and other investment banking services. Our investment banking revenues, which include fees from these services, are directly related to the number and size of the transactions in which we participate and would therefore decrease if there is a sustained market downturn.

#### *We may incur significant losses from our trading and investment activities*

We maintain large trading and investment positions in the fixed income and equity markets, both for our own account and for the purpose of facilitating our customers' trades. Our positions consist of various types of asset, including financial derivatives transactions in the interest rate, credit, equity, currency, commodity, real estate and other markets. Market fluctuations can adversely affect the value of these assets. To the extent that we own assets, or have long positions, a market downturn could result in losses if the value of these long positions decreases. Furthermore, to the extent that we have sold assets we do not own, or have short positions, a market upturn could expose us to potentially unlimited losses as we attempt to cover our short positions by acquiring assets in a rising market. We utilize various hedging techniques to mitigate these position risks. We can incur losses if the markets move in a way we have not anticipated, as a result of specific events such as the

## Edgar Filing: NOMURA HOLDINGS INC - Form 6-K

terrorist attack on September 11, 2001 or the Russian economic crisis in 1998. Also, we face losses if the level of market volatility differs from our expectation, which may occur particularly in the emerging markets. In addition, we commit capital to take relatively large position for underwriting or warehousing assets to facilitate certain capital market transactions. We may incur significant losses from these activities.

### *Holding large and concentrated positions of securities and other assets may expose us to large losses*

Concentration of risk can expose us to large losses in our businesses such as market-making, block trading, underwriting and acquiring newly-issued convertible bonds through third-party allotment. We have committed substantial amounts of capital to these businesses. This often requires us to take large positions in the securities of a particular issuer or issuers in a particular industry, country or region. For example, we previously held a large inventory for commercial mortgage-backed securities in our U.S. operations, the value of which seriously deteriorated after bond investors took flight from these investments in August 1998.

### *Extended market decline can reduce liquidity and lead to material losses*

Extended market decline can reduce the level of market activity. If we cannot properly close out our associated positions, in particular over-the-counter derivatives, we may incur substantial losses due to the difficulty of monitoring prices in a less liquid market.

### *Our hedging strategies may not prevent losses*

We use a variety of instruments and strategies to hedge our exposure to various types of risk. If our hedging strategies are not effective, we may incur losses. We base many of our hedging strategies on historical trading patterns and correlations. For example, if we hold a long position in an asset, we may hedge this position by taking a short position in an asset where the short position has, historically, moved in a direction that would offset a change in value in the long position. However, historical trading patterns and correlations may not continue, and these hedging strategies may not be fully effective in mitigating our risk exposure in all market environments or against all types of risk.

## **Table of Contents**

*Our risk management policies and procedures may not be fully effective in managing market risk*

Our policies and procedures to identify, monitor and manage risks may not be fully effective. Some of our methods of managing risk are based upon observed historical market behavior. This historical market behavior may not continue in future periods. As a result, we may suffer losses by being unable to predict future risk exposures that could be significantly greater than the historical measures indicate. Other risk management methods that we use also rely on our evaluation of information regarding markets, clients or other matters, which information is publicly available or otherwise accessible by us. This information may not be accurate, complete, up-to-date or properly evaluated, in which case we may be unable to properly assess our risks.

*Market risk may increase the other risks that we face*

In addition to the potentially adverse effects on our businesses described above, market risk could exacerbate other risks that we face. For example, the risks associated with new products through financial engineering/innovation may be increased by market risk. Also, if we incur substantial trading losses, our need for liquidity could rise sharply while our access to cash may be impaired. Furthermore, if there is a market downturn, our customers and counterparties could incur substantial losses of their own, thereby weakening their financial condition and, as a result, increasing our credit risk exposure to them. Our liquidity risk and credit risk are described below.

### **Liquidity risk could impair our ability to fund operations and jeopardize our financial condition**

Liquidity, or having ready access to cash, is essential to our businesses. In addition to maintaining a readily available cash position, we seek to enhance our liquidity through repurchase and securities lending transactions, access to long-term debt, diversification of our short-term funding sources such as commercial paper, and by holding a portfolio of highly liquid assets. We bear the risk that we may lose liquidity under certain circumstances, including the following:

*We may be unable to access the debt capital markets*

We depend on continuous access to the debt capital markets to finance our day-to-day operations. An inability to raise money in the long-term or short-term debt markets, or to engage in repurchase agreements and securities lending, could have a substantial negative effect on our liquidity. For example, lenders could refuse to extend the credit necessary for us to conduct our business because of their assessment of our long-term or short-term financial prospects:

- if we incur large trading losses,
- if the level of our business activity decreases due to a market downturn, or
- if regulatory authorities take significant action against us.

Our ability to borrow in the debt markets also could be impaired by factors that are not specific to us, such as a severe disruption of the financial markets or negative views about the prospects for the investment banking, securities or financial services industries generally. For example, in 1998 and 1999, as a result of concerns regarding asset quality and the failure of several large Japanese financial institutions, some international

## Edgar Filing: NOMURA HOLDINGS INC - Form 6-K

lenders charged an additional risk premium to Japanese financial institutions for short-term borrowings in the interbank market and restricted the availability of credit they were willing to extend. This additional risk premium, commonly known as "Japan premium", may be imposed again.

*In particular, we may be unable to access the short-term debt markets*

We depend primarily on the issuance of short-term bonds payable and short-term bank loans as a principal source of unsecured short-term funding of our operations. Our liquidity depends largely on our ability to refinance these borrowings on a continuous basis. Investors who hold our outstanding commercial paper and other short-term debt instruments have no obligation to purchase new instruments when the outstanding instruments mature. We may be unable to obtain short-term financing from banks to make up any shortfall.

*We may be unable to sell assets*

If we are unable to borrow in the debt capital markets or if our cash balances decline significantly, we will need to liquidate our assets or take other actions in order to meet our maturing liabilities. In volatile or uncertain market environments, overall market liquidity may decline. In a time of reduced market liquidity, we may be unable to sell some of our assets, which could adversely affect our liquidity, or we may have to sell assets at depressed prices, which could adversely affect our results of operations and financial conditions. Our ability to sell our assets may be impaired by other market participants seeking to sell similar assets into the market at the same time. For example, after the Russian economic crisis in 1998, the liquidity of some of our assets, including Russian bonds and other assets, such as commercial mortgage-backed securities, was significantly reduced by simultaneous attempts by us and other market participants to sell similar assets.

## **Table of Contents**

### *Lowering of our credit ratings could increase our borrowing costs*

Our borrowing costs and our access to the debt capital markets depend significantly on our credit ratings. Rating agencies may reduce or withdraw their ratings or place us on credit watch with negative implications. A reduction in our credit ratings, or being placed on credit watch with negative implications, could increase our borrowing costs and limit our access to the capital markets. This, in turn, could reduce our earnings and adversely affect our liquidity. For example, in 1998, after a series of credit rating downgrades, we experienced an increase in borrowing costs and reduced access to short-term funding sources particularly in connection with our operations in Europe and the United States.

### **Event risk may cause losses in our trading and investment assets as well as market and liquidity risk**

Event risk refers to potential losses in value we may suffer through unpredictable events that cause large unexpected market price moves. These include not only the events such as the terrorist attack on September 11, 2001 and the Russian economic crisis in 1998 that resulted in losses to our business but also the following types of events that could cause losses on our trading and investment assets:

sudden and significant changes in credit ratings with regard to our trading and investment assets by rating agencies that have significant presence and influence on the market,

sudden changes in trading, tax, accounting and other related rules which may make our trading strategy obsolete or less competitive, or

the failure of corporate actions such as M&A with respect to our trading and investment assets.

### **Losses caused by financial or other problems of third parties may expose us to credit risk**

Our counterparties are from time to time indebted to us as a result of transactions or contracts, including loans, commitments to lend, other contingent liabilities, and derivatives transactions such as swaps and options.

We may incur material losses when our counterparties default on their obligations to us due to bankruptcy, deterioration in their creditworthiness, lack of liquidity, operational failure, an economic or political event, or other reasons. This risk may arise from:

holding securities of third parties,

entering into swap or other derivative contracts under which counterparties have obligations to make payments to us,

executing securities, futures, currency or derivative trades that fail to settle at the required time due to non-delivery by the counterparty or systems failure by clearing agents, exchanges, clearing houses or other financial intermediaries, or

extending credit to our clients through bridge or margin loans or other arrangements.

Problems related to third party credit risk may include the following:

*Defaults by a large financial institution could adversely affect the financial markets generally and us specifically*

The commercial soundness of many financial institutions is closely interrelated as a result of credit, trading, clearing or other relationships among the institutions. As a result, concern about, or a default by, one institution could lead to significant liquidity problems or losses in, or defaults by, other institutions. This may adversely affect financial intermediaries, such as clearing agencies, clearing houses, banks, securities firms and exchanges, with which we interact on a daily basis. Actual defaults, increases in perceived default risk and other similar events could arise in the future and could have an adverse effect on the financial markets and on us. We may suffer financially if major Japanese financial institutions fail or experience severe liquidity or solvency problems.

*There can be no assurance as to the accuracy of the information about, or the sufficiency of the collateral we use in managing, our credit risk*

We regularly review our credit exposure to specific customers or counterparties and to specific countries and regions that we believe may present credit concerns. Default risk, however, may arise from events or circumstances that are difficult to detect, such as fraud. We may also fail to receive full information with respect to the risks of a counterparty. In addition, in cases where we have extended credit against collateral, we may find that we have insufficient value in the collateral. For example, if sudden declines in market values reduce the value of our collateral, we may become undersecured.

*Our customers and counterparties may be unable to perform their obligations to us as a result of economic or political conditions*

Country, regional and political risks are components of credit risk, as well as market risk. Economic or political pressures in a country or region, including those arising from local market disruptions or currency crises, may adversely affect the ability of clients or counterparties located in that country or region to obtain credit or foreign exchange, and therefore to perform their obligations owed to us.

### **The financial services industry is intensely competitive and rapidly consolidating**

The businesses we are in are intensely competitive, and we expect them to remain so. We compete on the basis of a number of factors, including transaction execution, our products and services, innovation, reputation and price. In recent years, we have experienced intense price competition in brokerage, underwriting and other businesses. There has also been increased competition in terms of delivery of value-added services to customers, such as corporate advisory services.

## **Table of Contents**

### *Competition with on-line securities companies in Japan is intensifying*

Since the late 1990s, the financial services sector in Japan has been deregulated. Banks and other types of financial institutions can compete with us to a greater degree than they could before deregulation in the areas of financing and investment trusts. Moreover, since the full deregulation of stock brokerage commission rates in October 1999, competition in the domestic brokerage market has intensified. A number of securities companies in Japan, especially small and medium-sized firms, including those that specialize in on-line securities brokerage, are offering securities brokerage services at low commission rates. In response to commission deregulation, we also restructured our stock brokerage commissions to offer lower commissions depending on the trading amount and the type of customer account. Additionally, some on-line securities companies have recently tried to offer underwriting services for initial public offerings at dramatically reduced commission rates in order to gain market share. Should this strategy become more prevalent and prove successful, we would have to respond by offering lower commissions in order to retain our market share. We may continue to experience pricing pressures in the future.

### *Competition with securities companies affiliated with Japanese commercial banks is increasing*

In recent years, securities companies affiliated with Japanese commercial banks have been increasing their market shares in the underwriting business, especially with respect to corporate bonds issued by Japanese companies, thereby undercutting our share. Some of these securities companies have been successful in capturing the lead underwriter's position in major corporate bond offerings.

### *Competition with non-Japanese firms in the Japanese market is increasing*

Competition from non-Japanese firms has also increased through their presence in Japan, especially in the areas of securities underwriting and corporate advisory services, particularly M&A advisory services.

### *Increased domestic and global consolidation in the financial services industry means increased competition for us*

In recent years, there has been substantial consolidation and convergence among companies in the financial services industry. In particular, a number of large commercial banks, insurance companies and other broad-based financial services firms have established or acquired broker-dealers or have merged with other financial institutions in Japan and overseas. Particularly in Japan, other major securities companies have recently been seeking to form business alliances with major commercial banks, reportedly with a view to an eventual consolidation of those financial institutions, in order to be able to increase their competitiveness and market share by combining banking and other financial services. Through such business alliances and consolidations, these other securities companies and commercial banks have, or would have, the ability to offer a wide range of products, including loans, deposit-taking, insurance, brokerage, asset management and investment banking services. This diversity of services offered are enhancing, or would enhance, their competitive position compared with us. They also have the ability to supplement their investment banking and securities business with commercial banking, insurance and other financial services revenues in an effort to gain market share. We may lose our market share as these large, consolidated firms expand their business.

### *Our ability to expand internationally will depend on our ability to compete successfully with financial institutions in international markets*

## Edgar Filing: NOMURA HOLDINGS INC - Form 6-K

We believe that significant challenges and opportunities will arise for us outside of Japan. In order to take advantage of these opportunities, we will have to compete successfully with financial institutions based in important non-Japanese markets, including the United States, Europe and Asia. Some of these financial institutions are larger, better capitalized and have a stronger local presence and a longer operating history in these markets.

### **Operational risk may disrupt our businesses, result in regulatory action against us or limit our growth**

We face the following types of operational risk, and if such risk materializes, we could suffer financial losses, disruption in our business, litigation from relevant parties, regulatory intervention or reputational damage:

suffering damages due to failure to settle securities transactions,

suffering damages due to failure by officers or employees to perform proper administrative activities prescribed in regular procedures,

suffering damages due to suspension or malfunction of systems, most of which are developed and maintained by our affiliate, Nomura Research Institute, Ltd.,

suffering damages as a result of the destruction of our facilities or systems due to large-scale disasters or criminal actions, or

suffering damages as a result of the restriction of our business operation or investment activities due to social confusion from political reasons.

### **Our business is subject to substantial legal and regulatory risk, to regulatory changes and reputation risk**

Substantial legal liability or a significant regulatory action against us could have a material financial effect or cause reputational harm to us, which in turn could seriously damage our business prospects. Also, material changes in regulations applicable to us or to our market could adversely affect our business.

## **Table of Contents**

### *Our exposure to legal liability is significant*

We face significant legal risks in our businesses. These risks include liability under securities or other laws for materially false or misleading statements made in connection with securities underwriting and offering transactions, potential liability for advice we provide in corporate transactions, disputes over the terms and conditions of complex trading arrangements or the validity of contracts for transactions with us and legal claims concerning our merchant banking business. During a prolonged market downturn, we would expect claims against us to increase. We may also face significant litigation. The cost of defending such litigation may be substantial and our involvement in litigation may damage our reputation. In addition, even legal transactions might be subject to social criticism according to the particulars or situations of such transactions. These risks may be difficult to assess or quantify and their existence and magnitude may remain unknown for substantial periods of time.

### *Extensive regulation of our businesses limits our activities and may subject us to significant penalties*

The financial services industry is subject to extensive regulation. We are subject to regulation by governmental and self-regulatory organizations in Japan and in virtually all other jurisdictions in which we operate. These regulations are designed to ensure the integrity of the financial markets and to protect customers and other third parties who deal with us. These regulations are not designed to protect our shareholders and often limit our activities, through net capital, customer protection and market conduct requirements. We face the risk that regulatory authorities may intervene in our businesses through extended investigation and surveillance activity, adoption of costly or restrictive new regulations or judicial or administrative proceedings that may result in substantial penalties. We could be fined, prohibited from engaging in some of our business activities, or be subject to the temporary or long-term suspension or revocation of our legal authorization to conduct business. Our reputation could also suffer from the adverse publicity that any administrative or judicial sanction against us may create. As a result of such sanction, we may lose business opportunities for a period of time, even after the sanction is lifted, if and to the extent that our customers, especially public institutions, decide not to engage us for their financial transactions.

### *Material changes in regulations applicable to us or to our market could adversely affect our business*

If regulations that apply to our businesses are introduced, modified or removed, we could be adversely affected directly or through resulting changes in market conditions. For example, in September 2002, the Financial Services Agency of Japan abolished restrictions on sharing common office space between banks and their affiliated securities companies. Also, in accordance with the amendments to the Securities and Exchange Law effective from December 1, 2004, banks and certain other financial institutions became able to act as agents of securities companies in the securities brokerage business and therefore increasing competition. Furthermore, we may face additional regulations on trading or other activities that may lead to a reduction of the market liquidity, trading volume or market participants. Such regulatory action may damage the Japanese markets as our main revenue source.

### **Misconduct by an employee, Director or Executive Officer could harm us and is difficult to detect and deter**

We face the risk that misconduct by an employee, Director or Executive Officer could occur. Misconduct by an employee, Director or Executive Officer could bind us to transactions that exceed authorized limits or present unacceptable risks, or hide from us unauthorized or unsuccessful activities, which, in either case, may result in unknown and unmanaged risks or losses. Misconduct by an employee, Director or Executive Officer could also involve the improper use or disclosure of confidential information, which could result in regulatory sanctions, legal liability and serious reputational or financial damage to us. We may not always be able to deter misconduct by an employee, Director or Executive Officer and the precautions we take to prevent and detect misconduct may not be effective in all cases.

**Unauthorized disclosure of personal information held by us may adversely affect our business**

We keep and manage personal information obtained from customers in relation to our business. In recent years, there have been many cases of personal information and records in the possession of corporations and institutions being improperly accessed or disclosed. The standards relating to protection of personal information that apply to us have become more stringent under the Law Concerning Protection of Personal Information and rules, regulations and guidelines relating thereto. As an institution in possession of personal information, we may have to provide compensation for economic loss and emotional distress arising out of a failure to protect such information in accordance with this law. The provisions of this law applicable to us became effective on April 1, 2005.

Although we exercise care in protecting the confidentiality of personal information and take steps to ensure security of such information, if any material unauthorized disclosure of personal information does occur, our business could be adversely affected in a number of ways. For example, we could be subject to complaints and lawsuits for damages from customers if they are adversely affected as a result of the release of their personal information. In addition, we could incur additional expenses associated with changing our security systems, either voluntarily or in response to administrative guidance or other regulatory initiatives, or in connection with public relations campaigns designed to prevent or mitigate damage to our corporate or brand image or reputation. Any such damage to us or our reputation could lead to a decline in new customers and/or a loss of existing customers, as well as to increased costs and expenses in dealing with any such problems.

## **Table of Contents**

### **We may not be able to realize gains we expect on our private equity investments**

As discussed in Private Equity Business under item 5.A. of this annual report, we restructured our European private equity business in 2002. Following the restructuring, the investments that comprised the old Principal Finance Group (PFG) are now managed by Terra Firma Capital Partners Ltd. (TFCPL), an independent private equity firm, which was founded by a number of ex-Nomura employees. Under the legal agreements between the two parties, TFCPL has been appointed as sole, discretionary manager of the investments and has full autonomy over all decisions regarding how these investments are run and managed, including appointing management, setting and agreeing strategic direction and determining how and when the investments are eventually exited. Nomura as a passive investor in respect of the Terra Firma investments, cannot take any action in respect of TFCPL or any of the underlying investments and has no Board of Director representation in any of the underlying investee companies. The legal arrangements entered into with Terra Firma are designed to ensure an alignment of interest between Nomura as the investor and TFCPL as the discretionary manager, but Nomura does not have the ability to terminate these arrangements other than for cause.

The performance of the Terra Firma investments could have a material impact on our future financial statements. This performance in turn will be dependent on the ability of TFCPL to maximize value from the investments and also on general market conditions. The Terra Firma investments are in the residential real estate, consumer finance, retail and business process outsourcing sectors, thus any deterioration in the market conditions of these sectors in Europe could have a material impact on our future financial statements. This is especially the case if market conditions deteriorate in the residential real estate sectors in the UK and Germany, given the overall risk weighting to these sectors. Furthermore, given the large and illiquid nature of the Terra Firma investments, TFCPL, who manage these investments, may not be able to realize the value of the individual investments at a level, at the time or in a way they would wish. Inability to dispose of the underlying investments could have a material impact on our future financial statements.

Also, we have a growing private equity business in Japan as discussed in Private Equity Investments under item 5.A. of this annual report. The investments of this business are mainly in the retail, manufacturing and theme park sectors in Japan. As the size of this business increases, any deterioration in the market conditions of these sectors and/or our inability to dispose of our private equity investments at a level, at the time or in a way we may wish, could have a material impact on our future financial statements.

### **We may not be able to dispose of our operating investments at the time or with the speed we would like**

We hold substantial operating investments, which refer to investments in equity securities of companies not affiliated with us which we hold on a long-term basis in order to promote existing and potential business relationships. A substantial portion of these investments consists of equity securities of public companies in Japan. Under U.S. GAAP, depending on market conditions, we may record significant unrealized gains or losses on our operating investments, which would have a substantial impact on our income statement. Depending on the conditions of the Japanese equity markets, we may not be able to dispose of these equity securities when we would like to do so or as quickly as we may wish.

### **Our investments in publicly-traded shares of affiliates accounted for under the equity method in our consolidated financial statements may decline significantly over a period of time and result in our incurring an impairment loss**

We have equity investments in affiliates accounted for under the equity method in our consolidated financial statements whose shares are publicly traded. Under U.S. GAAP, if there is a decline in the fair value, i.e., the market price, of the shares we hold in such affiliates over a period of time, and we determine, based on the guidance of Accounting Principles Board Opinion No. 18, The Equity Method of Accounting for Investments in Common Stock, that the decline is other than temporary, then we must record an impairment loss for the applicable fiscal period.

**We may face an outflow of customers' assets due to losses of cash reserve funds or bonds we offered**

We offer many types of product to meet various needs of our customers with different risk profiles. Cash reserve funds, such as money management funds and money reserve funds, and Long-term Bond Investment Trusts ( Nomura Bond Fund ) are categorized as low-risk products. Such cash reserve funds may fall below par value as a result of defaults on bonds contained in the portfolio. In addition, bonds that we offer may default or experience delays in their obligation to pay interest and/or principal. Such losses in the products we offer may result in the loss of customer confidence and lead to an outflow of customer assets from our custody.

Note: Reclassifications -

Certain reclassifications of amounts on private equity entities accounted for as consolidated subsidiaries have been made.

Changes in the fair value of derivatives that are economically used to hedge non-trading assets and liabilities, but that do not meet the criteria in SFAS No. 133 to qualify as an accounting hedge, are reported as either net gain on trading, interest revenue, or interest expenses, depending on the nature of the transaction. Changes in the fair value of both the embedded derivative and related economic hedges are netted.

## **Table of Contents**

### **Notes to Financial Statements**

The financial information for the six months ended September 30, 2005 were prepared under Japanese GAAP in accordance with Regulations Concerning the Terminology, Forms and Preparation Methods of Semi-Annual Financial Statements (Ministry of Finance Ordinance No. 38, 1977).

### **Significant Accounting Policies**

#### 1. Basis and Methods of Valuation for Financial Instruments

##### (1) Other securities

###### a. Securities with market value

Recorded at market value.

The difference between the cost using the moving average method or amortized cost and market value less deferred taxes is recorded as Net unrealized gain on investments in shareholders equity on the balance sheet.

###### b. Securities with no market value

Recorded at cost using the moving average method or amortized cost.

##### (2) Stocks of subsidiaries and affiliates

Recorded at cost using the moving average method.

#### 2. Depreciation and Amortization

##### (1) Depreciation of tangible fixed assets

Tangible fixed assets are depreciated primarily on the declining balance method. However buildings (except leasehold improvements) acquired after March 31, 1998 are depreciated on the straight-line method.

##### (2) Amortization of intangible assets, investments and others

Intangible assets, investments and others are amortized over their estimated useful lives primarily on the straight-line method.

#### 3. Provisions

To provide for bad loans, the Company made provisions for doubtful accounts based on an estimate of the uncollectible amount calculated using historical loss ratios or a reasonable estimate based on financial condition of individual borrowers.

#### 4. Translation of Accounts Denominated in Foreign Currencies

Financial assets and liabilities denominated in foreign currencies are translated into Japanese yen using exchange rates as of the balance sheet date. Gains and losses resulting from translation are reflected in the statement of income.

#### 5. Leasing Transactions

Financing leases other than those for which the ownership of the leased property are deemed as transfers to the lessee are accounted for primarily as ordinary rental transactions.

#### 6. Hedging Activities

Mark-to-market profits and losses on hedging instruments are deferred as assets or liabilities until the profits or losses on the underlying hedged securities are realized. Certain eligible foreign currencies denominated monetary items are translated at forward exchange rates and the difference is depreciated over the remaining period.

#### 7. Accounting for Consumption Taxes

Consumption taxes are accounted for based on the tax exclusion method.

#### 8. Application of Consolidated Tax Return System

The Company applies the consolidated tax return system.

**Table of Contents**

**Notes to Financial Statements**

The financial information for the six months ended September 30, 2005 were prepared in accordance with the Cabinet Office Ordinance Regarding Securities Companies (Prime Minister's Office Ordinance and the Ministry of Finance Ordinance, No. 32, 1998) and the Uniform Accounting Standards of Securities Companies (Japan Securities Dealers Association, September, 2001) based on Regulations Concerning the Terminology, Forms and Preparation Methods of Semi-Annual Financial Statements (Ministry of Finance Ordinance No. 38, 1977), collectively Japanese GAAP.

**Significant Accounting Policies**

1. Basis and Methods of Valuation for Financial Instruments

(1) For trading purposes

Securities, derivative contracts, and other financial instruments classified as trading assets and liabilities are accounted for at fair value based on the mark-to-market method.

(2) For non-trading purposes

Securities with no market value are recorded at cost using the moving average method.

2. Depreciation and Amortization

(1) Depreciation of tangible fixed assets

Tangible fixed assets are depreciated primarily on the declining balance method, except for buildings acquired after March 31, 1998 which are depreciated on the straight-line method.

(2) Amortization of intangible assets

Intangible assets are amortized primarily over their estimated useful lives on the straight-line method.

### 3. Provisions

#### (1) Allowance for doubtful accounts

To provide for loan losses, Nomura Securities Co., Ltd. (Nomura Securities) made provisions for doubtful accounts based on an estimate of the uncollectable amount calculated using historical loss ratios or a reasonable estimate based on financial condition of individual borrowers.

#### (2) Accrued bonuses

To provide for employee bonus payments, an estimated accrual is recorded in accordance with the prescribed calculation method.

#### (3) Reserve for retirement benefits

To provide for the payment of lump-sum retirement benefits and funding the qualified retirement pension plan in the future, the estimated future obligations less the fair value of current pension assets is recorded as a reserve for employee retirement benefits.

### 4. Translation of Accounts Denominated in Foreign Currencies

Financial assets and liabilities denominated in foreign currencies are translated into Japanese yen using exchange rates as of the balance sheet date. Gains and losses resulting from translation are reflected in the statement of income.

**Table of Contents**

5. Leasing Transactions

Lease contracts for which the title of the leased property has not been transferred are accounted for as operating lease transactions.

6. Hedging Activities

Mark-to-market profits and losses on hedging instruments are deferred as assets or liabilities until the profits or losses on the underlying hedged securities are realized.

7. Accounting for Consumption Taxes

Consumption taxes are accounted for based on the tax exclusion method.

8. Application of Consolidated Tax Return System

Nomura Securities applies consolidated tax return system.
