**Portfolio and Investment Activity**

After two active investment quarters, we entered our third fiscal quarter well positioned with a high quality portfolio and significant debt capital available for investment. Due to our robust deal sourcing network and our consistent and credible capital, we are pleased to report that we found significant opportunities to invest in larger middle market companies with strong management teams generating high free cash flow. Accordingly, and during the quarter ended December 31, 2005, we invested \$257 million across five new and two existing portfolio companies. All investments were in our targeted asset classes with \$161 million invested in subordinated debt, \$87 million invested in second lien bank debt and \$9 million invested in private equity. For the fiscal year-to-date period April 1, 2005 through December 31, 2005, we invested \$841 million across 20 new and 9 existing portfolio companies.

Also during the quarter we were able to further rationalize our portfolio by selectively exiting \$27 million of our positions in lower-yielding senior bank debt and corporate notes. We also saw well-performing portfolio companies pre-pay \$76 million of their debt. For the quarter and nine months ended December 31, 2005, we had proceeds from

exits and prepayments totaling \$103 million and \$361 million, respectively. Of the \$361 million of total fiscal year exits and prepayments, \$217 million were planned exits of senior loans and lower yielding corporate notes. The remaining \$145 million were pre-payments by eight successful companies.

We continued utilizing our \$900 million credit facility this quarter and had \$413 million drawn and outstanding at December 31 with \$487 million available. Our net portfolio reached \$1.35 billion and was invested 59.9% in subordinated debt, 6.3% in private equity and 33.8% in senior secured loans. A year earlier at December 31, 2004, our net portfolio of \$887 million was invested 46.9% in subordinated debt, 32.6% in senior secured loans, 2.3% in private equity and 18.2% in cash equivalents.

At December 31, 2005, the weighted average yield on our debt portfolio was up to 12.6% versus 12.2% at September 30, 2005 and 10.9% at December 31, 2004. The weighted average yield on our subordinated debt was 13.4% at December 31, 2005 versus 13.4% at September 30, 2005 and 13.8% at December 31, 2004. Our total bank debt/senior secured loan portfolio yielded 11.3% at December 31, 2005 versus 10.4% at September 30, 2005 and 7.6% at December 31, 2004. Yields are computed using interest rates as of the balance sheet date and include amortization of loan origination and commitment fees, original issue discount and market premium or discount, weighted by their respective costs when averaged.

Our reputable client service franchise continues to attract new clients and repeat business, said Chairman and CEO, Michael S. Gross. These relationships are strategic and are with well-respected firms. During the quarter, we selectively and opportunistically added liquidity by successfully expanding our credit facility to \$900 million in total commitments. This increase will give us the flexibility of added capital as we progress into 2006. We also continue to be pleased with the performance and quality of our overall investment portfolio. Through December 31, all debt investments continue to perform. Furthermore, and with greater than 45% of all our debt investments in senior bank debt, we have generated an IRR in excess of 15% on our debt portfolio since the IPO. When combined with the performance of our equity investments which represented less than 5% of our \$1.7 billion of invested capital, our portfolio's IRR exceeded 20%. These strong returns to date have allowed us to distribute a steady and growing dividend stream and give us confidence in our future dividend stream to shareholders.
