Explanatory Information

Adjusted EBITDA is calculated as net income before interest expense, taxes, depreciation and amortization, gain on disposal or early retirement of debt. Adjusted EBITDA is included in this presentation because our management considers it an important measure of our performance and believes that it is frequently used by securities analysts, investors and other interested parties in the evaluation of our industry, some of which present EBITDA and Adjusted EBITDA when reporting their results. We regularly evaluate our performance and other companies in our industry that have different financing and capital structures and/or tax rates by using Adjusted EBITDA in evaluating acquisition targets. Management also believes that Adjusted EBITDA is a useful tool for measuring our future debt service, capital expenditures and working capital requirements, and Adjusted EBITDA is commonly used by us to measure our ability to service indebtedness. Adjusted EBITDA is not a substitute for the GAAP measures of earnings or of cash flow and does not necessarily

a  
measure  
of  
our  
ability  
to

fund  
our  
cash  
needs.

addition,  
it  
should

differently and, therefore, Adjusted EBITDA as presented for us may not be comparable to EBITDA and Adjusted EBITDA re  
Adjusted EBITDA has material limitations as a performance measure because it excludes interest expense, taxes, depreciation  
on disposal of assets and loss on early retirement of debt. The following tables reconcile Adjusted EBITDA with net income.

Risk Factors

Risks with respect to the combination of Hercules Offshore and TODCO, as well as other recent and future acquisitions, include the risk that we will not be able to close the transaction, as well as difficulties in the integration of the operations and personnel of the acquired company, diversion of management's attention away from other business concerns, and the assumption of any undisclosed or other liabilities of the acquired company. We expect to incur substantial transaction and merger related costs associated with completing the merger with TODCO, obtaining regulatory approvals, combining the operations of the two companies and achieving desired synergies. Additional unanticipated costs may be incurred in the integration of the businesses of Hercules Offshore and TODCO. Expected benefits of the merger may not be achieved in the near term, or at all. Hercules Offshore will have a significant amount of additional debt as a result of the merger. This debt will require us to use cash flow to repay indebtedness, may have a material adverse effect on our financial health, and may limit our future operations and ability to borrow additional funds. For additional information regarding the risks associated with the TODCO acquisition, please read the risk factors section in the joint proxy statement/prospectus included in Hercules registration statement in Form S-4 (No. 333-142314).
