

MINE SAFETY APPLIANCES CO
Form 10-Q
August 07, 2007

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarter ended June 30, 2007

Commission File No. 1-15579

MINE SAFETY APPLIANCES COMPANY

(Exact name of registrant as specified in its charter)

Pennsylvania
(State or other jurisdiction of
incorporation or organization)

25-0668780
(IRS Employer
Identification No.)

121 Gamma Drive

RIDC Industrial Park

O Hara Township

Pittsburgh, Pennsylvania
(Address of principal executive offices)

15238
(Zip Code)

Registrant's telephone number, including area code: **(412) 967-3000**

Edgar Filing: MINE SAFETY APPLIANCES CO - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer (as defined in Rule 12b-2 of the Act).

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

There were 35,780,109 shares of common stock, not including 2,612,644 shares held by the Mine Safety Appliances Company Stock Compensation Trust, outstanding as of July 31, 2007.

MINE SAFETY APPLIANCES COMPANY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Unaudited

(1) Basis of Presentation

We have prepared the condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the rules and regulations for reporting on Form 10-Q. Accordingly, they do not include certain information and disclosures required for comprehensive financial statements.

The year-end condensed consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America. The other information in these financial statements is unaudited; however, we believe that all adjustments, consisting of only normal recurring adjustments, necessary for a fair presentation of these interim periods have been included. The results for interim periods are not necessarily indicative of the results to be expected for the full year.

The condensed consolidated financial statements include the accounts of the company and all subsidiaries. Intercompany accounts and transactions have been eliminated.

Certain prior year amounts have been reclassified to conform with the current year presentation.

Management's Discussion and Analysis of Financial Condition and Results of Operations that is included elsewhere in this report contains additional information about our results of operations and financial position and should be read in conjunction with these notes.

(2) Restructuring and Other Charges

During the three and six month periods ended June 30, 2007, we recorded charges of \$2.3 million (\$1.5 million after tax) and \$2.5 million (\$1.6 million after tax), respectively. The charges for the six months ended June 30, 2007 were primarily related to reorganization activities. In Europe, charges of \$1.0 million relate to severance costs associated with the reorganization of our management team. North American charges of \$1.0 million were primarily stay bonuses and severance costs associated with our Project Magellan initiative to move fire helmet manufacturing from Clifton, New Jersey to Jacksonville, North Carolina and to move our Mexican manufacturing operations to a new factory in Queretaro, Mexico. We expect to close the Clifton plant, which currently employs about 60 associates, during the fourth quarter of 2007 and begin to move the Mexican manufacturing operations during the third quarter of 2007. International charges of \$0.5 million relate to severance costs associated with workforce reductions in Brazil and Australia.

During the three and six month periods ended June 30, 2006, we recorded charges of \$0.5 million (\$0.3 million after tax) and \$6.5 million (\$4.0 million after tax), respectively, related to the Project Outlook reorganization plan that was completed in 2006. A significant portion of the 2006 charges related to a focused voluntary retirement incentive program (VRIP). Approximately 60 employees retired under the terms of the VRIP. Restructuring charges for the six months ended June 30, 2006 include \$5.3 million for VRIP retirees, primarily special termination benefits, \$0.7 million in severance costs related to additional staffing reductions that were made at the end of January 2006, and \$0.5 million related to the relocation of various employee workgroups within the new organizational structure.

(3) Comprehensive Income

Components of comprehensive income are as follows:

(In thousands)	Three Months Ended		Six Months Ended	
	June 30 2007	June 30 2006	June 30 2007	June 30 2006
Net income	\$ 17,328	\$ 16,081	\$ 33,396	\$ 31,819
Cumulative translation adjustments	2,364	2,097	3,271	4,291
Pension and other benefit plan adjustments, net of tax	(96)		188	

Edgar Filing: MINE SAFETY APPLIANCES CO - Form 10-Q

Comprehensive income	19,596	18,178	36,855	36,110
----------------------	--------	--------	--------	--------

Edgar Filing: MINE SAFETY APPLIANCES CO - Form 10-Q

Components of accumulated other comprehensive income are as follows:

	June 30	December 31
(In thousands)	2007	2006
Cumulative translation adjustments	\$ 6,294	\$ 3,023
Pension and other benefit plan adjustments	25,255	25,067
Accumulated other comprehensive income	31,549	28,090

(4) Earnings per Share

Basic earnings per share is computed on the weighted average number of common shares outstanding during the period. Diluted earnings per share includes the effect of the weighted average stock options outstanding during the period and the vesting of stock awards, using the treasury stock method. Antidilutive options are not considered in computing diluted earnings per share.

	Three Months Ended		Six Months Ended	
(In thousands)	June 30		June 30	
	2007	2006	2007	2006
Net income	\$ 17,328	\$ 16,081	\$ 33,396	\$ 31,819

Basic earnings per common share	\$.49	\$.44	\$.93	\$.87
Diluted earnings per common share	\$.48	\$.43	\$.92	\$.86
Basic shares outstanding	35,689	36,499	35,777	36,521
Stock options	574	591	572	620
Diluted shares outstanding	36,263	37,090	36,349	37,141
Antidilutive stock options	185	208	185	208

(5) Segment Information

We have three geographic operating segments: North America, Europe and International. Reportable segment information is presented in the following table:

	North			Reconciling	Consolidated
(In thousands)	America	Europe	International	Items	Totals
Three Months Ended June 30, 2007					
Sales to external customers	\$ 131,818	\$ 56,026	\$ 61,255	\$	\$ 249,099
Intercompany sales	11,496	23,075	1,676	(36,247)	
Net income	10,532	1,830	4,405	561	17,328
Six Months Ended June 30, 2007					
Sales to external customers	\$ 254,719	\$ 109,113	\$ 111,206	\$	\$ 475,038

Edgar Filing: MINE SAFETY APPLIANCES CO - Form 10-Q

Intercompany sales	21,644	45,714	3,236	(70,594)	
Net income	21,133	4,444	7,634	185	33,396

Three Months Ended June 30, 2006

Sales to external customers	\$ 121,406	\$ 50,343	\$ 46,874	\$	\$ 218,623
Intercompany sales	9,924	22,505	1,638	(34,067)	
Net income	11,556	2,017	2,995	(487)	16,081

Six Months Ended June 30 2006

Sales to external customers	\$ 257,922	\$ 98,067	\$ 90,984	\$	\$ 446,973
Intercompany sales	19,505	41,988	2,776	(64,269)	
Net income	23,112	3,769	6,092	(1,154)	31,819

Reconciling items consist primarily of intercompany eliminations and items reported at the corporate level.

(6) Pensions and Other Postretirement Benefits

Components of net periodic benefit (credit) cost consisted of the following:

(In thousands)	Pension Benefits		Other Benefits	
	2007	2006	2007	2006
Three months ended June 30				
Service cost	\$ 2,686	\$ 2,354	\$ 175	\$ 163
Interest cost	4,286	3,972	381	394
Expected return on plan assets	(8,333)	(7,879)		
Amortization of transition amounts	11	11		
Amortization of prior service cost	43	51	(90)	(57)
Recognized net actuarial losses	237	312	211	200
Net periodic benefit (credit) cost	(1,070)	(1,179)	677	700
Six months ended June 30				
Service cost	\$ 5,264	\$ 4,647	\$ 318	\$ 327
Interest cost	8,758	7,836	742	788
Expected return on plan assets	(16,886)	(15,641)		
Amortization of transition amounts	22	22		
Amortization of prior service cost	85	100	(180)	(114)
Recognized net actuarial losses	525	566	390	400
Termination benefits		4,843		99
Net periodic benefit (credit) cost	(2,232)	2,373	1,270	1,500

We made contributions of \$1.0 million to our pension plans during the six months ended June 30, 2007. We expect to make contributions of approximately \$2.0 million to our pension plans in 2007.

(7) Goodwill and Intangible Assets

Changes in goodwill and intangible assets during the six months ended June 30, 2007 were as follows:

(In thousands)	Goodwill	Intangibles
Net balances at January 1, 2007	\$ 79,360	\$ 17,096
Goodwill and intangible assets acquired	813	5,700
Amortization expense		(1,762)
Currency translation and other	200	61
Net balances at June 30, 2007	80,373	21,095

At June 30, 2007, goodwill of approximately \$59.5 million, \$17.2 million, and \$3.7 million related to the North American, European, and International operating segments, respectively.

(8) Inventories

	June 30	December 31
(In thousands)	2007	2006
Finished products	\$ 63,523	\$ 55,764
Work in process	27,044	24,203
Raw materials and supplies	56,120	57,263
Total inventories	146,687	137,230

(9) Stock-Based Compensation

The 1998 Management Share Incentive Plan, as amended March 10, 1999, provides for grants of restricted stock awards and stock options to eligible key employees through March 2008. The 1990 Non-Employee Directors' Stock Option Plan, as amended May 15, 2007, provides for annual grants of stock options and restricted stock awards to eligible directors. Restricted stock awards are granted without payment to the company and generally vest three years after the grant date. Certain restricted stock awards for retention vest in three equal tranches four, five, and six years after the grant date. Stock options are granted at market value exercise prices and expire after ten years (limited instances of exercise prices in excess of market value and expiration after five years). Stock options granted in 2006 and 2007 are exercisable beginning three years after the grant date. Stock options granted in 2005 and earlier years were fully vested as of December 31, 2005. As of June 30, 2007, there were 642,553 shares and 89,599 shares reserved for future grants under the management and directors' plans, respectively.

Stock-based compensation expense was as follows:

	Three Months Ended		Six Months Ended	
(In thousands)	June 30		June 30	
	2007	2006	2007	2006
Restricted stock awards	\$ 701	\$ 414	\$ 1,730	\$ 1,397
Stock option grants	233	181	1,581	1,404
Total compensation expense before income taxes	934	595	3,311	2,801
Income tax benefit	325	217	1,159	1,023
Total compensation expense, net of income tax benefit	609	378	2,152	1,778

A summary of stock option activity for the six months ended June 30, 2007 follows:

	Shares	Weighted Average Exercise Price
Outstanding at January 1, 2007	1,531,359	\$ 20.95
Granted	199,292	40.32
Exercised	(41,436)	20.71
Forfeited	(44,372)	42.00
Outstanding at June 30, 2007	1,644,843	22.73

Edgar Filing: MINE SAFETY APPLIANCES CO - Form 10-Q

Exercisable at June 30, 2007	1,293,184	17.96
------------------------------	-----------	-------

A summary of restricted stock award activity for the six months ended June 30, 2007 follows:

		Weighted
		Average
		Grant Date
	Shares	Fair Value
Unvested at January 1, 2007	138,470	\$ 37.26
Granted	96,300	41.62
Vested	(50,583)	28.29
Unvested at June 30, 2007	184,187	41.97

(10) Derivative Financial Instruments

In 2004, we entered into an eight year interest rate swap agreement. Under the terms of the agreement, we receive a fixed interest rate of 8.39% and pay a floating interest rate based on LIBOR. The notional amount of the swap was initially \$20.0 million and declines \$4.0 million per year beginning in 2008. The interest rate swap has been designated as a fair value hedge of a portion of our fixed rate 8.39% Senior Notes.

In order to account for these derivatives as hedges, the interest rate swap must be highly effective at offsetting changes in the fair value of the hedged debt. We have assumed that there is no ineffectiveness in the hedge, since all of the critical terms of the hedge match the underlying terms of the hedged debt.

The fair value of the interest rate swap at June 30, 2007 and December 31, 2006 has been recorded as a liability of \$1.0 million and \$0.9 million, respectively, that is included in other noncurrent liabilities, with an offsetting reduction in the carrying value of long-term debt.

As a result of entering into the interest rate swap, we have increased our exposure to interest rate fluctuations. Differences between the fixed rate amounts received and the variable rate amounts paid are recognized in interest expense on an ongoing basis. This rate difference resulted in an increase in interest expense of \$0.2 million and \$0.1 million during the six month periods ended June 30, 2007 and 2006, respectively.

(11) Acquisitions

In March 2007, we acquired the assets and intellectual properties of Acceleron Technologies, LLC (Acceleron), a San Francisco-based developer of advanced technology suitable for personal locator devices. We believe that the acquisition of this technology significantly expedites the development of reliable systems for first responder and soldier location applications. We are currently estimating the fair value of Acceleron's assets. Preliminarily, we have allocated the \$5.7 million purchase price to intangible assets. The acquisition agreement provides for additional consideration of up to \$4.9 million to be paid to the former owners of Acceleron based on the achievement of specific technology development milestones by September 28, 2008.

In March 2007, we acquired the outstanding shares of MSA (India) Limited that were previously held by our joint venture partner. As a wholly-owned subsidiary under MSA management, we believe that we are better positioned to take advantage of opportunities in the large and growing Indian market. Preliminarily, we have allocated \$0.6 million of the \$1.1 million purchase price to goodwill.

In September 2006, we acquired Paraclete Armor and Equipment, Inc. (Paraclete) of St. Pauls, North Carolina. Paraclete is a rapidly growing innovator and developer of advanced ballistic body armor used by military personnel. We believe that the acquisition of Paraclete positions us to provide a broad range of ballistic protective equipment to both the military and law enforcement markets. We are currently estimating the fair value of Paraclete's assets. Our preliminary allocation of the \$30.9 million purchase price includes intangible assets of \$6.7 million and goodwill of \$18.6 million. Under the terms of the asset purchase agreement, we issued a \$10.0 million note to satisfy a portion of the purchase price. The note is non-interest bearing and is payable in five annual installments of \$2.0 million beginning September 1, 2007. We recorded the note at a fair value of \$8.5 million at the time of issuance. The note discount is being recognized as interest expense over its term.

In January 2006, we took steps to ensure our compliance with South African Black Economic Empowerment (BEE) requirements by forming a new South African holding company in which Mineworkers Investment Company (MIC) of Johannesburg, South Africa holds a 25.1% ownership interest. Compliance with BEE, a South African government program similar to Affirmative Action in the United States, is key to achieving meaningful growth in South Africa, particularly in the mining industry. At the same time, we acquired Select Personal Protective Equipment (Select PPE) of South Africa, an established supplier of multi-brand safety equipment and solutions to the South African mining industry. We believe that our new South African operating structure significantly improves our market presence and expertise in serving the mining industry and provides significant growth opportunities in the region. The purchase price of \$7.9 million included intangible assets of \$1.6 million and goodwill of \$3.0 million.

The operating results of all acquisitions have been included in our consolidated financial statements from their respective acquisition dates. Pro forma consolidated results, as if the acquisitions had occurred at the beginning of 2006, would not be materially different from the results reported.

(12) Uncertain Income Tax Positions

On January 1, 2007, we adopted FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48). The application of income tax law is inherently complex. Tax statutes and regulations are often ambiguous and subject to various interpretations. As a result, we are required to evaluate all relevant facts and make subjective judgments regarding our income tax positions.

As a result of the adoption of FIN 48, we recognized a gross increase in the liability for unrecognized tax benefits of \$5.7 million. This gross increase in the tax liability created additional tax benefits of \$1.8 million, resulting in a net increase in the liability for unrecognized tax benefits of \$3.9 million, which was accounted for as a reduction in retained earnings at January 1, 2007. These adjustments, if recognized, would have increased our effective income tax rate. Prior to the adoption of FIN 48, we had recognized approximately \$1.5 million in unrecognized tax benefits. We did not make any significant adjustments to these amounts during the six months ended June 30, 2007.

We recognize interest related to unrecognized tax benefits in interest expense and penalties in operating expenses. As a result of the implementation of FIN 48, we recognized a \$0.9 million increase in the liability for accrued interest and penalties related to uncertain tax positions, which was also accounted for as a reduction to the January 1, 2007 retained earnings. We did not make any significant adjustments to these amounts during the six months ended June 30, 2007.

We will begin to voluntarily file income tax returns in certain taxing jurisdictions where we previously believed none were due. As a result of these voluntary filings, we expect that our gross liability for unrecognized tax benefits and accrued penalties associated with this liability will be reduced by approximately \$2.0 million and \$0.6 million, respectively, by the end of 2007. We do not expect that the resolution of these matters will have a significant effect on our results of operations.

We file a U.S. federal income tax return along with various state and foreign income tax returns. Examinations of our federal return have been completed through 2002. We also file in various state and foreign jurisdictions that may be subject to tax audits after 2001.

(13) Contingencies

Various lawsuits and claims arising in the normal course of business are pending against us. These lawsuits are primarily product liability claims. We are presently named as a defendant in approximately 2,500 lawsuits primarily involving respiratory protection products allegedly manufactured and sold by us. Collectively, these lawsuits represent a total of approximately 16,500 plaintiffs. Approximately 90% of these lawsuits involve plaintiffs alleging they suffer from silicosis, with the remainder alleging they suffer from other or combined injuries, including asbestosis. These lawsuits typically allege that these conditions resulted in part from respirators that were negligently designed or manufactured by us. Consistent with the experience of other companies involved in silica and asbestos-related litigation, in recent years there has been an increase in the number of asserted claims that could potentially involve us. We cannot determine our potential maximum liability for such claims, in part because the defendants in these lawsuits are often numerous, and the claims generally do not specify the amount of damages sought.

With some limited exceptions, we maintain insurance against product liability claims. We also maintain a reserve for uninsured product liability based on expected settlement charges for pending claims and an estimate of unreported claims derived from experience, sales volumes, and other relevant information. We evaluate our exposures on an ongoing basis and make adjustments to the reserve as appropriate. Based on information currently available, we believe that the disposition of matters that are pending will not have a materially adverse effect on our financial condition.

In the normal course of business, we make payments to settle product liability claims and related legal fees that are covered by insurance. We record receivables for the portion of these payments that we believe to be probable of recovery from insurance carriers. The net balance of receivables from insurance carriers was \$29.4 million and \$18.4 million at June 30, 2007 and December 31, 2006, respectively. We evaluate the collectibility of these receivables on an ongoing basis and make adjustments as appropriate.

(14) Recently Issued Accounting Standards

In September 2006, the FASB issued FAS No. 157, Fair Value Measurements. FAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The provisions of this standard apply to other accounting pronouncements that require or permit fair value measurements. FAS No. 157 becomes effective on January 1, 2008. Upon adoption, the provisions of FAS No. 157 are to be applied prospectively with limited exceptions. We do not expect that the adoption of this statement will have a material effect on our consolidated results of operations or financial condition.

In February 2007, the FASB issued FAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115. This statement permits companies to choose to measure many financial instruments and certain other items at fair value and report unrealized gains and losses on these instruments in earnings. FAS No. 159 is effective as of January 1, 2008. We do not expect that the adoption of this statement will have a material effect on our consolidated results of operations or financial condition.

(15) Subsequent Event

On August 1, 2007, we sold 83 acres of land in our Cranberry Woods office park to Wells Real Estate Investment Trust II Cranberry Woods Development, Inc. for \$14.6 million. This sale is expected to result in a pre-tax gain of approximately \$10.0 million.

After this transaction, approximately 80 acres remain available for sale in the Cranberry Woods development.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with the historical financial statements and other financial information included elsewhere in this report on Form 10-Q. This discussion may contain forward-looking statements that involve risks and uncertainties. The forward-looking statements are not historical facts, but rather are based on current expectations, estimates, assumptions and projections about our industry, business and future financial results. Our actual results could differ materially from the results contemplated by these forward-looking statements due to a number of factors. These factors include, but are not limited to, spending patterns of government agencies, competitive pressures, product liability claims, the success of new product introductions, currency exchange rate fluctuations, the identification and successful integration of acquisitions, and the risks of doing business in foreign countries. For discussion of risk factors affecting our business, see Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2006.

BUSINESS OVERVIEW

We are a global leader in the development, manufacture and supply of sophisticated products that protect people's health and safety. Sophisticated safety products typically integrate any combination of electronics, mechanical systems and advanced materials to protect users against hazardous or life threatening situations. Our comprehensive line of safety products is used by workers around the world in the fire service, homeland security, construction and other industries, as well as the military.

In recent years, we have concentrated on specific initiatives intended to help improve our competitive position and profitability, including:

identifying and developing promising new markets;

focusing on innovation and new product introductions;

further strengthening relationships with major distributors;

optimizing factory performance and driving operational excellence;

positioning international business to capture significant growth opportunities; and

pursuing strategic acquisitions.

We tailor our product offerings and distribution strategy to satisfy distinct customer preferences that vary across geographic regions. We believe that we best serve these customer preferences by organizing our business into three geographic segments: North America, Europe, and International. Each segment includes a number of operating companies. In 2006, approximately 55%, 24%, and 21% of our net sales were made by our North American, European, and International segments, respectively.

North America. Our largest manufacturing and research and development facilities are located in the United States. We serve our North American markets with sales and distribution functions in the U.S., Canada, and Mexico.

Europe. Our European segment includes well-established companies in most Western European countries, and more recently established operations in a number of Eastern European locations. Our largest European companies, based in Germany and France, develop, manufacture, and sell a wide variety of products. Operations in other European countries focus primarily on sales and distribution in their respective home country markets. While some of these companies may perform limited production, most of their sales are of products that are manufactured in our plants in Germany, France, and the U.S., or are purchased from third party vendors.

International. Our International segment includes companies in Abu Dhabi, Argentina, Australia, Brazil, Chile, China, Hong Kong, India, Indonesia, Japan, Malaysia, Peru, Singapore, South Africa, and Zimbabwe, some of which are in developing regions of the world. Principal manufacturing operations are located in Australia, Brazil, South Africa, and China. These companies develop and manufacture products that are sold primarily in each company's home country and regional markets. The other companies in the International segment focus primarily on sales and distribution in their respective home country markets. While some of these companies may perform limited production, most of their sales are of products that are manufactured in our plants in the U.S., Germany, and France, or are purchased from third party vendors.

We believe that our financial performance in recent years is the result of initiatives that have allowed us to anticipate and respond quickly to market requirements, particularly in the fire service, homeland security, construction and general industries, as well as the military, and reflects our ability to quickly bring to market products that comply with changing industry standards and to create new market demand with innovative products.

PROJECT MAGELLAN

In January 2007, we announced Project Magellan, a multi-year strategic plan to improve the efficiency of our North American manufacturing operations by more effectively using available factory space. Project Magellan is expected to result in the relocation of certain manufacturing activities and the closure of certain facilities. We expect that Project Magellan will reduce operating expenses by as much as \$10 million a year once completed.

In the first stage of Project Magellan, we will move fire helmet manufacturing from our Clifton, New Jersey plant to our Jacksonville, North Carolina plant. Many Clifton associates are being offered an opportunity to relocate to Jacksonville or another MSA location. The Clifton plant, which currently employs about 60 associates, is expected to be closed during the fourth quarter of 2007.

In addition, we will move our manufacturing operations in Mexico from Mexico City and Torreon to a new factory in Queretaro, a city approximately 130 miles northwest of Mexico City. The plant consolidation in Mexico is expected to begin in the third quarter of 2007 and be completed in 2008. We currently employ about 100 associates at our Mexico City and Torreon facilities. Many MSA Mexico manufacturing personnel are being provided with an opportunity to relocate to the new Queretaro plant.

Finally, we expect to vacate our plant in Evans City, Pennsylvania by August 2009, when our lease on the property expires. Beginning in late 2007 and continuing into 2008, we expect to transfer certain production activities from our Evans City plant to other MSA plants in the United States. We intend to maintain employment for as many affected associates as possible by offering opportunities at other MSA locations. The Evans City facility currently employs approximately 115 associates.

ACQUISITIONS

In March 2007, we acquired the assets and intellectual properties of Acceleron Technologies, LLC (Acceleron), a San Francisco-based developer of advanced technology suitable for personal locator devices. Acceleron has key patents and know-how in the area of compensated inertial navigation sensing as applied to personnel tracking. We believe that this technology is particularly well-suited for personal locator applications inside buildings where GPS is denied. The patented technology and know-how significantly increases data accuracy and minimizes the drift that can occur in conventional systems. We believe that the acquisition of this technology expedites the development of much needed and more reliable systems for use in first responder and soldier location applications.

In March 2007, we acquired the outstanding shares of MSA (India) Limited that were previously held by our joint venture partner. As a wholly-owned subsidiary under MSA management, we believe that we are better positioned to take advantage of opportunities in the large and growing Indian market.

In September 2006, we acquired Paraclete Armor and Equipment, Inc. (Paraclete) of St. Pauls, North Carolina. Paraclete is a rapidly growing innovator and developer of advanced ballistic body armor used by military personnel, including Special Forces units of the U.S. military. We believe that the acquisition of Paraclete enhances our existing line of ballistic body armor and strategically positions us to provide a broad range of ballistic protective equipment to both the military and law enforcement markets.

In January 2006, we took steps to ensure our compliance with South African Black Economic Empowerment (BEE) requirements by forming a new South African holding company in which Mineworkers Investment Company (MIC) of Johannesburg, South Africa holds a 25.1% ownership interest. Compliance with BEE, a South African government program similar to Affirmative Action in the United States, is key to achieving meaningful growth in South Africa, particularly in the mining industry. At the same time, we acquired Select Personal Protective Equipment (Select PPE) of South Africa, an established supplier of multi-brand safety equipment and solutions to the South African mining industry. We believe that our new South African operating structure significantly improves our market presence and expertise in serving the mining industry and provides significant growth opportunities in the region.

RESULTS OF OPERATIONS

Three Months Ended June 30, 2007 Compared to Three Months Ended June 30, 2006

Net sales. Net sales for the three months ended June 30, 2007 were \$249.1 million, an increase of \$30.5 million, or 14%, compared with \$218.6 million for the three months ended June 30, 2006.

(In millions)	Three Months Ended June 30		Dollar	Percent
	2007	2006	Increase	Increase
North America	\$ 131.8	\$ 121.4	\$ 10.4	9%
Europe	56.0	50.3	5.7	11
International	61.3	46.9	14.4	31

Net sales by the North American segment were \$131.8 million for the second quarter of 2007, an increase of \$10.4 million, or 9%, compared to \$121.4 million for the second quarter of 2006. The sales improvement reflects higher shipments in most product groups. During the second quarter of 2007, our sales of self-contained breathing apparatus and thermal imaging cameras improved \$0.9 million and \$1.7 million, respectively. Our shipments of Advanced Combat Helmets to the military were \$3.6 million higher in the current quarter. Sales of ballistic protection products, including those made by Paraclete Armor and Equipment, were up \$2.5 million. Continued strength in North American construction and industrial markets was reflected in our sales of fall protection and head protection products, which improved \$3.6 million in the current quarter. These sales improvements were partially offset by a \$1.7 million decrease in sales of instrument products, due primarily to reduced demand for both portable and permanent instrumentation from specific segments of the Homeland Security market.

In Europe, net sales for the second quarter of 2007 were \$56.0 million, an increase of \$5.7 million, or 11%, compared to \$50.3 million for the second quarter of 2006. The increase in European segment sales, when stated in U.S. dollars, was primarily due to favorable currency translation effects of \$5.3 million.

Net sales for the International segment were \$61.3 million in the second quarter of 2007, an increase of \$14.4 million, or 31%, compared to \$46.9 million for the second quarter of 2006. The sales increase includes a \$4.8 million shipment of ballistic vests to the Iraq Joint Contracting Command. The remainder of the sales increase was primarily in South Africa and China, where local currency sales were up \$2.1 million and \$1.8 million, respectively. The improvement in South Africa reflects strong growth in sales to the mining industry. Sales growth in China was largely due to continued strength in breathing apparatus and instrument shipments. Currency translation effects increased International segment sales, when stated in U.S. dollars, by \$0.9 million.

Cost of products sold. Cost of products sold was \$155.3 million in the second quarter of 2007, compared to \$131.3 million in the second quarter of 2006. Cost of products sold, selling, general and administrative expenses, and research and development expenses include net periodic pension credits during the second quarters of 2007 and 2006 of \$1.1 million and \$1.2 million, respectively.

Gross profit. Gross profit for the second quarter of 2007 was \$93.8 million, which was \$6.5 million, or 7%, higher than gross profit of \$87.3 million in the second quarter of 2006. The ratio of gross profit to net sales was 37.7% in the second quarter of 2007 compared to 39.9% in the same quarter last year. The decrease in the gross profit ratio in the first half of 2007, reflects proportionately higher sales of Advanced Combat Helmets and ballistic protection products to the military at gross margins that are generally lower than our margins on commercial sales, as well as higher inventory management related costs.

Selling, general and administrative expenses. Selling, general and administrative expenses were \$58.8 million during the second quarter of 2007, an increase of \$4.9 million, or 9%, compared to \$53.9 million in the second quarter of 2006. Selling, general and administrative expenses were 23.6% of net sales in the second quarter of 2007 compared to 24.6% of net sales in the second quarter of 2006. Local currency selling, general and administrative expenses in the European and International segments were up \$3.7 million, primarily reflecting our continued expansion in Eastern Europe, China, Southeast Asia, and South Africa. North American segment selling, general and administrative expenses were flat quarter-to-quarter. Currency exchange effects increased second quarter 2007 selling, general and administrative expenses, when stated in U.S. dollars, by \$1.4 million, primarily related to a stronger euro.

Depreciation and amortization expense. Depreciation and amortization expense, which is reported in cost of sales, selling, general and administrative expenses, and research and development expenses, was \$6.1 million for the second quarter of 2007, an increase of \$0.9 million, or 17%, compared to \$5.2 million for the second quarter of 2006. The increase relates primarily to higher amortization on intangible assets.

Restructuring and other charges. During the second quarter of 2007, we recorded charges of \$2.3 million, primarily related to reorganization activities. In Europe, charges of \$1.0 million related to severance costs associated with the reorganization of our management team. North American charges of \$0.8 million were primarily stay bonuses and severance costs associated with our Project Magellan plan to move fire helmet manufacturing from Clifton, New Jersey to Jacksonville, North Carolina and to move our Mexican manufacturing operations to a new factory in Queretaro, Mexico. We expect to close the Clifton plant, which currently employs about 60 associates, during the fourth quarter of 2007 and to begin the Mexican manufacturing operations move during the third quarter of 2007. International charges of \$0.5 million relate to severance costs associated with workforce reductions in Brazil and Australia.

During the second quarter of 2006, we recorded charges of \$0.5 million, primarily related to the relocation of various employee workgroups as part of our Project Outlook reorganization effort in North America.

Interest expense. Interest expense was \$2.2 million during the second quarter of 2007, an increase of \$1.0 million, or 84%, compared to \$1.2 million in the same quarter last year. The increase in interest expense was primarily due to higher long-term debt.

Currency exchange (gains) losses. Currency exchange gains were \$1.5 million in the second quarter of 2007, compared to losses of \$0.9 million in the second quarter of 2006. Currency exchange gains during the current quarter related primarily to the strengthening of the Canadian dollar and the Australian dollar. Currency exchange losses during the second quarter of 2006 were primarily related to a weakening of the South African rand.

Income taxes. The effective tax rate for the second quarter of 2007 was 34.0% compared to 36.5% for the same quarter last year. The lower rate in the current quarter is primarily related to the reinstatement of the research and development credit and more favorable state and non-U.S. tax profiles.

We file a U.S. federal income tax return along with various state and foreign income tax returns. Examinations of our federal return have been completed through 2002. We also file in various state and foreign jurisdictions that may be subject to tax audits after 2001.

Net income. Net income for the second quarter of 2007 was \$17.3 million, or \$0.49 per basic share, compared to \$16.1 million, or \$0.44 per basic share, for the same quarter last year.

North American segment net income for the second quarter of 2007 was \$10.5 million, a decrease of \$1.1 million, or 9%, compared to \$11.6 million in the second quarter of 2006. Lower net income in North America was primarily related to the previously-discussed decrease in gross margins.

European segment net income during the second quarter of 2007 was \$1.8 million, a decrease of \$0.2 million, or 9%, from \$2.0 million during the second quarter of 2006.

International segment net income for the second quarter of 2007 was \$4.4 million, an increase of \$1.4 million, or 47%, compared to \$3.0 million in the same quarter last year. The increase reflects higher sales, partially offset by an increase in selling expenses.

Six Months Ended June 30, 2007 Compared to Six Months Ended June 30, 2006

Net sales. Net sales for the six months ended June 30, 2007 were \$475.0 million, an increase of \$28.0 million, or 6%, compared with \$447.0 million in the same period in 2006.

(In millions)	Six Months Ended June 30		Dollar	Percent
	2007	2006	Increase	Increase
North America	\$ 254.7	\$ 257.9	\$ (3.2)	(1)%
Europe	109.1	98.1	11.0	11
International	111.2	91.0	20.2	22

Net sales of the North America segment were \$254.7 million for the six months ended June 30, 2007, a decrease of \$3.2 million, or 1%, compared to \$257.9 million for the same period in 2006. The sales decrease during the six months ended June 30, 2007 reflects a \$15.2 million decrease in SCBA shipments to the fire service industry, which was substantially offset by improved sales of most other products. North American sales of ballistic vests, including those made by Paraclete, improved \$5.5 million in the first half of 2007. Shipments of Advanced Combat Helmets to the military were up \$2.3 million. Our sales of fall protection and head protection improved approximately \$3.1 million and \$1.9 million, respectively, on increased demand in construction and industrial markets.

In Europe, net sales for the six months ended June 30, 2007 were \$109.1 million, an increase of \$11.0 million, or 11%, compared to \$98.1 million in the same period in 2006. The increase in European sales, when stated in U.S. dollars, includes favorable currency translation effects of \$12.2 million, primarily due to a stronger euro in the current period. Local currency sales in Europe for the six months ended June 30, 2007 were \$1.2 million lower than in the same period last year. Lower local currency sales in Europe were largely due to a \$5.3 million decrease in disposable respirator shipments in Germany and France, both of which benefited from unusually strong shipments of these products during the prior year. These decreases were partially offset by higher sales in Eastern Europe and most other Western European markets.

Net sales for the International segment were \$111.2 million for the six months ended June 30, 2007, an increase of \$20.2 million, or 22%, compared to \$91.0 million in the same period in 2006. The sales increase includes a \$4.8 million shipment of ballistic vests to the Iraq Joint Contracting Command. In South Africa, local currency sales were up \$6.0 million, primarily due to growth in Select PPE's business with the mining industry. Local currency sales in China were up \$3.9 million, including a large shipment of breathing apparatus to the Beijing Fire Bureau. Local currency sales in Latin America improved \$3.4 million, with strong growth in all markets. Currency translation differences did not have a significant impact on International segment sales when stated in U.S. dollars.

Cost of products sold. Cost of products sold was \$292.1 million for the six months ended June 30, 2007 compared to \$267.1 million in the same period in 2006.

Cost of products sold, selling, general and administrative expenses, and research and development expenses include net periodic pension benefit costs and credits. Pension credits, combined with pension costs, resulted in net pension credits during the six month periods ended June 30, 2007 and 2006 of \$2.2 million and \$2.5 million, respectively.

Gross profit. Gross profit for the six months ended June 30, 2007 was \$183.0 million, which was \$3.1 million, or 2%, higher than gross profit of \$179.9 million in the same period in 2006. The ratio of gross profit to net sales was 38.5% in the six months ended June 30, 2007 compared to 40.2% in the same period last year. The decrease in the gross profit ratio in the first half of 2007, reflects proportionately higher sales of Advanced Combat Helmets and ballistic protection products to the military at gross margins that are generally lower than our margins on commercial sales, as well as higher inventory management related costs.

Selling, general and administrative expenses. Selling, general and administrative expenses were \$115.3 million during the six months ended June 30, 2007, an increase of \$7.9 million, or 7%, compared to \$107.4 million in the same period in 2006. Selling, general and administrative expenses were 24.3% of net sales in the six months ended June 30, 2007 compared to 24.0% of net sales in the first half of 2006. Local currency selling, general and administrative expenses in the European and International segments were up \$5.5 million, primarily reflecting our continued expansion in Eastern Europe, China, Southeast Asia, and South Africa. North American segment selling, general and administrative expenses were flat year-to-year. Currency exchange effects increased selling, general and administrative expenses, when stated in U.S. dollars, by \$2.6 million, primarily due to a stronger euro.

Depreciation and amortization expense. Depreciation and amortization expense, which is reported in cost of sales, selling, general and administrative expenses, and research and development expenses, was \$12.1 million for the six months ended June 30, 2007, an increase of \$1.6 million, or 16%, compared to \$10.5 million for the same period in 2006. The increase was primarily related to higher amortization of intangible assets.

Restructuring and other charges. During the six months ended June 30, 2007, we recorded charges of \$2.5 million, primarily related to reorganization activities. In Europe, charges of \$1.0 million related to severance costs associated with the reorganization of our management team. North American charges of \$1.0 million were primarily stay bonuses and severance costs associated with our Project Magellan initiative to move fire helmet manufacturing from Clifton, New Jersey to Jacksonville, North Carolina and to move our Mexican manufacturing operations to a new factory in Queretaro, Mexico. We expect to close the Clifton plant, which currently employs about 60 associates, during the fourth quarter of 2007 and begin to move the Mexican manufacturing operations during the third quarter of 2007. International charges of \$0.5 million relate to severance costs associated with workforce reductions in Brazil and Australia.

During the first six months ended June 30, 2006, we recorded charges of \$6.5 million related to our Project Outlook reorganization effort in North America. The 2006 charges included \$5.3 million for a focused voluntary retirement incentive program (VRIP) that was accepted by approximately 60 employees, \$0.7 million in severance costs related to additional staffing reductions, and \$0.5 million to relocate various employee workgroups.

Interest expense. Interest expense was \$4.2 million during the six months ended June 30, 2007, an increase of \$1.8 million, or 76%, compared to \$2.4 million in the same period last year. The increase in interest expense was primarily due to higher long-term debt.

Currency exchange (gains) losses. Currency exchange gains were \$1.2 million during the six months ended June 30, 2007, compared to currency exchange losses of \$2.0 million during the same period last year. The currency exchange gains during the current period were primarily related to the strengthening of the Canadian dollar and Australian dollar. The currency exchange losses during the first half of 2006 were primarily due to a weakening of the South African rand.

Income taxes. The effective tax rate for the six months ended June 30, 2007 was 34.4% compared to 37.4% for the same period last year. The lower rate in the current quarter is primarily related to the reinstatement of the research and development credit and more favorable state and non-U.S. tax profiles.

On January 1, 2007, we adopted FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48). As a result of the adoption of FIN 48, we recognized a gross increase in the liability for unrecognized tax benefits of \$5.7 million. This gross increase in the tax liability created additional tax benefits of \$1.8 million, resulting in a net increase in the liability for unrecognized tax benefits of \$3.9 million, which was accounted for as a reduction in retained earnings at January 1, 2007. These adjustments, if recognized, would have increased our effective income tax rate.

We recognize interest related to unrecognized tax benefits in interest expense and penalties in operating expenses. As a result of the implementation of FIN 48, we recognized a \$0.9 million increase in the liability for accrued interest and penalties related to uncertain tax positions which was also accounted for as a reduction to the January 1, 2007 retained earnings.

We file a U.S. federal income tax return along with various state and foreign income tax returns. Examinations of our federal return have been completed through 2002. We also file in various state and foreign jurisdictions that may be subject to tax audits after 2001.

Net income. Net income for the six months ended June 30, 2007 was \$33.4 million, or \$0.93 per basic share, compared to \$31.8 million, or \$0.87 per basic share, for the same period last year.

North American segment net income for the six months ended June 30, 2007 was \$21.1 million, a decrease of \$2.0 million, or 9%, compared to \$23.1 million in the same period last year. The reduction in North American net income was primarily due to the previously-discussed reduction in gross margins during the current year.

European segment net income for the six months ended June 30, 2007 was \$4.4 million, an increase of \$0.6 million, or 18%, compared to \$3.8 million for the first half of 2006. The increase was primarily due to the previously-discussed increase in sales.

International segment net income for the six months ended June 30, 2007 was \$7.6 million, an increase of \$1.5 million, or 25%, compared to \$6.1 million in the same period last year. The increase was primarily due to the previously-discussed increase in sales.

LIQUIDITY AND CAPITAL RESOURCES

Our main sources of liquidity are cash generated from operations and borrowing capacity. Our principal liquidity requirements are for working capital, capital expenditures, acquisitions, and principal and interest payments on outstanding indebtedness.

Cash and cash equivalents increased \$0.4 million during the six months ended June 30, 2007, compared to a decrease of \$4.8 million during the six months ended June 30, 2006.

Operating activities provided cash of \$17.5 million during the six months ended June 30, 2007, compared to providing cash of \$23.1 million in the six months ended June 30, 2006. Cash flow from operations during the six months ended June 30, 2006 included \$4.8 million in non-cash restructuring and other charges related to special termination benefit costs that were paid by our pension plan. Excluding this item, cash flow from operations was flat year-to-year. Trade receivables were \$191.6 million at June 30, 2007 and \$174.6 million at December 31, 2006. LIFO inventories were \$146.7 million at June 30, 2007 and \$137.2 million at December 31, 2006.

Investing activities used cash of \$19.6 million during the six months ended June 30, 2007, compared to using \$18.2 million in the same quarter last year. During the six months ended June 30, 2007 and 2006, we used cash of \$13.5 million and \$9.4 million, respectively, for property additions. The increase in property additions related primarily to higher purchases of production equipment and software in the U.S. During the six months ended June 30, 2007, we used cash of \$5.7 million to acquire Acceleron. During the same period in 2006, we used cash of \$7.9 million to acquire Select PPE.

Financing activities provided cash of \$1.5 million during the six months ended June 30, 2007, compared to using \$11.0 million in the same period last year. During the first six months of 2007, we used \$14.4 million of cash to pay dividends compared to paying dividends of \$11.7 million in the same period last year. During the six months ended June 30, 2007 and 2006, we used cash of \$15.6 million and \$16.5 million, respectively, to purchase treasury shares. During the six months ended June 30, 2007 and 2006, our short-term borrowings, increased \$30.0 million and \$12.8 million, respectively. Proceeds from short-term borrowings were used primarily to finance acquisitions and treasury share purchases.

CUMULATIVE TRANSLATION ADJUSTMENTS

The position of the U.S. dollar relative to international currencies at June 30, 2007 resulted in a translation gain of \$3.3 million being credited to the cumulative translation adjustments shareholders' equity account in the six months ended June 30, 2007, compared to a gain of \$4.3 million in the six months ended June 30, 2006. Translation gains during the six months ended June 30, 2007 were primarily related to the strengthening of euro and the Brazilian real. Translation gains during the same period in 2006 were primarily due to the strengthening of the euro and the Brazilian real, partially offset by a weakening of the South African rand.

COMMITMENTS AND CONTINGENCIES

We have purchase commitments for materials, supplies, services, and property, plant and equipment as part of our ordinary conduct of business.

In September 2006, we acquired Paraclete. Under the terms of the asset purchase agreement, we issued a \$10.0 million note payable to the former owners of Paraclete. The note is non-interest bearing and is payable in five annual installments of \$2.0 million beginning September 1, 2007. We recorded the note at a fair value of \$8.5 million at the time of issuance. The discount of \$1.5 million is being recognized as interest expense over the term of the note.

During 2003, we sold our real property in Berlin, Germany for \$25.7 million, resulting in a gain of \$13.6 million. At the same time, we entered into an eight year agreement to lease back the portion of the property that we occupy. Under sale-leaseback accounting, \$12.1 million of the gain was deferred and is being amortized over the term of the lease.

In 2003, we entered into a lease agreement with BASF pertaining to that portion of the Callery Chemical site that is occupied by our Evans City, Pennsylvania manufacturing operations. The initial term of the lease was one year, with a renewal option for five successive one year periods. In September 2006, we exercised our third one year renewal option.

Various lawsuits and claims arising in the normal course of business are pending against us. These lawsuits are primarily product liability claims. We are presently named as a defendant in approximately 2,500 lawsuits primarily involving respiratory protection products allegedly manufactured and sold by us. Collectively, these lawsuits represent a total of approximately 16,500 plaintiffs. Approximately 90% of these lawsuits involve plaintiffs alleging they suffer from silicosis, with the remainder alleging they suffer from other or combined injuries, including asbestosis. These lawsuits typically allege that these conditions resulted in part from respirators that were negligently designed or manufactured by us. Consistent with the experience of other companies involved in silica and asbestos-related litigation, in recent years there has been an increase in the number of asserted claims that could potentially involve us. We cannot determine our potential maximum liability for such claims, in part because the defendants in these lawsuits are often numerous, and the claims generally do not specify the amount of damages sought.

With some limited exceptions, we maintain insurance against product liability claims. We also maintain a reserve for uninsured product liability based on expected settlement charges for pending claims and an estimate of unreported claims derived from experience, sales volumes and other relevant information. We evaluate our exposures on an ongoing basis and make adjustments to the reserve as appropriate. Based on information currently available, we believe that the disposition of matters that are pending will not have a materially adverse effect on our financial condition.

In the normal course of business, we make payments to settle product liability claims and related legal fees that are covered by insurance. We record receivables for the portion of these payments that we believe to be probable of recovery from insurance carriers. The net balance of receivables from insurance carriers was \$29.4 million and \$18.4 million at June 30, 2007 and December 31, 2006, respectively. We evaluate the collectibility of these receivables on an ongoing basis and make adjustments as appropriate.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

We prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and the related disclosures. We evaluate these estimates and judgments on an on-going basis based on historical experience and various assumptions that we believe to be reasonable under the circumstances. However, different amounts could be reported if we had used different assumptions and in light of different facts and circumstances. Actual amounts could differ from the estimates and judgments reflected in our financial statements.

We believe that the following are the more critical judgments and estimates used in the preparation of our financial statements.

Accounting for contingencies. We accrue for contingencies in accordance with FAS No. 5, Accounting for Contingencies, when we believe that it is probable that a liability or loss has been incurred and the amount can be reasonably estimated. Contingencies relate to uncertainties that require our judgment both in assessing whether or not a liability or loss has been incurred and in estimating the amount of the probable loss. Significant contingencies affecting our financial statements include pending or threatened litigation, including product liability claims, and product warranties.

Product liability. We face an inherent business risk of exposure to product liability claims arising from the alleged failure of our products to prevent the types of personal injury or death against which they are designed to protect. We accrue for our estimates of the probable costs to be incurred in the resolution of product liability claims. These estimates are based on actuarial valuations, past experience, and our judgments regarding the probable outcome of pending and threatened claims. Due to uncertainty as to the ultimate outcome of pending and threatened claims, as well as the incidence of future claims, it is possible that future results could be materially affected by changes in our assumptions and estimates related to product liability matters. Our product liability expense averaged less than 1% of net sales during the three years ended December 31, 2006.

Product warranties. We accrue for the estimated probable cost of product warranties at the time that sales are recognized. Our estimates are principally based on historical experience. We also accrue for our estimates of the probable costs of corrective action when significant product quality issues are identified. These estimates are principally based on our assumptions regarding the cost of corrective action and the probable number of units to be repaired or replaced. Our product warranty obligation is affected by product failure rates, material usage, and service delivery costs incurred in correcting a product failure. Due to the uncertainty and potential volatility of these factors, it is possible that future results could be materially affected by changes in our assumptions or the effectiveness of our strategies related to these matters. Our product warranty expense averaged less than 2% of net sales during the three years ended December 31, 2006.

Income taxes. We account for income taxes in accordance with FAS No. 109, Accounting for Income Taxes, which requires that deferred tax assets and liabilities be recognized using enacted tax rates for the effect of temporary differences between the book and tax basis of recorded assets and liabilities. FAS No. 109 also requires that deferred tax assets be reduced by valuation allowances if it is more likely than not that some portion of the deferred tax asset will not be realized.

Effective January 1, 2007, we began accounting for uncertain tax positions in accordance with FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48). As a result of the adoption of FIN 48, we recognized a gross increase in the liability for unrecognized tax benefits which was accounted for as a reduction in retained earnings at January 1, 2007. We record an estimated income tax liability based on our best judgment of the amounts likely to be paid in the various tax jurisdictions in which we operate. The tax liabilities ultimately paid are dependent on a number of factors, including the resolution of tax audits, and may differ from the amounts recorded. Tax liabilities are adjusted through income when it becomes probable that the actual liability differs from the amount recorded. Because income tax laws are inherently complex and subject to various interpretations, it is possible that future results could be materially affected by changes in our assumptions and estimates related to uncertain tax positions.

Stock based compensation. On January 1, 2006, we adopted FAS No. 123R, Share-Based Payment, which requires that we recognize compensation expense for stock-based compensation based on the grant date fair value. Except for retirement-eligible employees, for whom there is no requisite service period, this expense is recognized ratably over the requisite service periods following the date of grant. For retirement-eligible employees, this expense is recognized at the date of grant. We elected the modified prospective application method for adoption of FAS 123R, and prior period financial statements have not been restated. Prior to January 1, 2006, we accounted for stock-based compensation in accordance with the provisions of Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations using the intrinsic value method, which resulted in no compensation expense for stock options granted; and we used the nominal vesting approach related to retirement-eligible employees, in which the compensation expense was recognized over the original vesting period.

Stock-based compensation grants to management and key employees are generally made during the first quarter of each year. Under the terms of our stock-based compensation plans, there is no requisite service period for individuals who are retirement-eligible. Therefore, beginning in 2006, a larger portion of stock-based compensation expense is recognized in the first quarter.

We use the Black-Scholes option pricing model to estimate fair value of stock options at the grant date. Determining the fair value of stock options requires a number of judgments, including estimates of the risk-free interest rate, expected dividend yield, expected volatility, and expected life.

Pensions and other postretirement benefits. We account for our pension and postretirement benefit plans as required under FAS No. 87, Employers Accounting for Pensions, and FAS No. 106, Employers Accounting for Postretirement Benefits Other than Pensions. Accounting for the net periodic benefit costs and credits for these plans requires us to estimate the cost of benefits to be provided well into the future and to attribute these costs over the expected work life of the employees participating in these plans. These estimates require our judgment about discount rates used to determine these obligations, expected returns on plan assets, rates of future compensation increases, rates of increase in future health care costs, participant withdrawal and mortality rates, and participant retirement ages. Differences between our estimates and actual results may significantly affect the cost of our obligations under these plans and could cause net periodic benefit costs and credits to change materially from year-to-year. The discount rate assumptions used in determining projected benefit obligations are based on published long-term bond indices. We increased the assumed discount rates in 2006, reflecting an increase in long-term bond rates.

Goodwill. As required by FAS No. 142, Goodwill and Other Intangible Assets, each year we evaluate for goodwill impairment by comparing the fair value of each of our reporting units with its carrying value. If carrying value exceeds fair value, then a possible impairment of goodwill exists and requires further evaluation. We estimate the fair value of our reporting units using a combination of discounted cash flow analysis and market capitalization based on historical and projected financial information. We apply our best judgment in assessing the reasonableness of the financial projections and other estimates used to determine the fair value of each reporting unit.

RECENTLY ISSUED ACCOUNTING STANDARDS

In September 2006, the FASB issued FAS No. 157, Fair Value Measurements. FAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The provisions of this standard apply to other accounting pronouncements that require or permit fair value measurements. FAS No. 157 becomes effective on January 1, 2008. Upon adoption, the provisions of FAS No. 157 are to be applied prospectively with limited exceptions. We do not expect that the adoption of this statement will have a material effect on our consolidated results of operations or financial condition.

In February 2007, the FASB issued FAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115. This statement permits companies to choose to measure many financial instruments and certain other items at fair value and report unrealized gains and losses on these instruments in earnings. FAS No. 159 is effective as of January 1, 2008. We do not expect that the adoption of this statement will have a material effect on our consolidated results of operations or financial condition.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk represents the risk of adverse changes in the value of a financial instrument caused by changes in currency exchange rates, interest rates, and equity prices. We are exposed to market risks related to currency exchange rates and interest rates.

Currency exchange rate sensitivity. We are subject to the effects of fluctuations in currency exchange rates on various transactions and on the translation of the reported financial position and operating results of our non-U.S. companies from local currencies to U.S. dollars. A hypothetical 10% strengthening or weakening of the U.S. dollar would increase or decrease our reported sales and net income for the six months ended June 30, 2007 by approximately \$22.0 million and \$1.2 million, respectively. When appropriate, we may attempt to limit our transactional exposure to changes in currency exchange rates through contracts or other actions intended to reduce existing exposures by creating offsetting currency exposures. At June 30, 2007, contracts for the purpose of hedging cash flows were not significant.

Interest rate sensitivity. We are exposed to changes in interest rates primarily as a result of borrowing and investing activities used to maintain liquidity and fund business operations. Because of the relatively short maturities of temporary investments and the variable rate nature of industrial development debt, these financial instruments are reported at carrying values which approximate fair values.

We hold one interest rate swap agreement, which is used to hedge the fair market value on a portion of our 8.39% fixed rate long-term debt. At June 30, 2007, the swap agreement had a notional amount of \$20.0 million and a fair market value in favor of the bank of \$1.0 million. The swap will expire in 2012. The notional amount of the swap declines \$4.0 million per year beginning in 2008. A hypothetical increase of 10% in market interest rates would result in a decrease of approximately \$0.3 million in the fair value of the interest rate swap.

We have \$100.0 million of fixed rate debt which matures at various dates through 2021. The incremental increase in the fair value of fixed rate long term debt resulting from a hypothetical 10% decrease in interest rates would be approximately \$2.0 million, excluding the impact of outstanding hedge instruments. However, our sensitivity to interest rate declines and the corresponding increase in the fair value of our debt portfolio would unfavorably affect earnings and cash flows only to the extent that we elected to repurchase or retire all or a portion of our fixed rate debt portfolio at prices above carrying values.

Item 4. CONTROLS AND PROCEDURES

- (a) *Evaluation of disclosure controls and procedures.* Based on their evaluation as of the end of the period covered by this Form 10-Q, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)) are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.
- (b) *Changes in internal control.* There were no changes in the Company's internal control over financial reporting that occurred during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

- (c) Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
April 1 - April 30, 2007				1,566,309
May 1 - May 30, 2007	200,000	\$ 42.76	200,000	1,336,464
June 1 - June 30, 2007				1,313,253

On November 2, 2005, the Board of Directors authorized the purchase of up to \$100 million of common stock from time to time in private transactions and on the open market. The share purchase program has no expiration date. The maximum shares that may yet be purchased is calculated based on the dollars remaining under the program and the respective month-end closing share price.

We do not have any other share repurchase programs.

Item 6. EXHIBITS

- (10)(a)* Executive Insurance Program, as Amended and Restated Effective January 1, 2006
- (10)(b)* 1990 Non-Employee Directors Stock Option Plan, as amended May 15, 2007
- 31.1 Certification of Chief Executive Officer pursuant to Rule 13a-14(a)
- 31.2 Certification of Chief Financial Officer pursuant to Rule 13a-14(a)
- 32 Certification of Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. (S)1350

* The exhibits marked by an asterisk are management contracts or compensatory plans or arrangements.
