Samuel Yang, JA Solar's Chief Executive Officer, said, "We are excited about our results for the first quarter, as we achieved continued revenue growth and a strong increase in income from operations. We are experiencing strong market demand this year, and

We anticipate continued high customer demand for 2009. To strengthen our supply position, we recently added GCL as another supply partner during the quarter, which gives us further confidence in meeting increased customer demand as we ramp up our production capacity.

We have made significant progress with our key operational and R&D initiatives. Installation of our new cell lines is on track. We are confident that we will achieve our target of 500MW of annual production capacity by year-end 2008. Our R&D programs are moving forward and have started delivering results.

JA Solar's CFO, Mr. Daniel Lui said, "Our Q1 results once again demonstrated that our operational execution and disciplined financial management enabled us to achieve impressive revenue growth, increase profitability, and maintain our margin target. As we rapidly increase our size and scale with a continued emphasis on operational and cost efficiencies, we are confident that we will meet our growth targets, maintain profit margins, and grow profitably."

2008 Outlook

Based on current customer demand and market forecasts, we reiterate our expectations for revenue for the full year 2008 in the range of RMB 7.22 billion (US\$ 1.03 billion) to RMB 8.02 billion (US\$ 1.14 billion). Our revenue guidance in RMB remains unchanged. The higher amount in USD is due to a lower USD/RMB exchange rate used in the first quarter 2008 than the fourth quarter 2007. Gross margin for 2008 is expected to remain above 20%.

We reiterate our target for total production output of no less than 340 MW for 2008, with a total annual production capacity of no less than 500 MW by year-end 2008. Currently, we are building ten new solar cell manufacturing lines in Ningjin, Hebei Province. Between June to October 2008, we will add two 25 MW lines per month, totaling 250 MW of new capacity by the end of October. In our new production base in Yangzhou, we will add three 25 MW lines by the end of the fourth quarter 2007, totaling 75 MW of new capacity. The capital expenditures are expected to be RMB 966.8 million (US\$ 137.9 million), primarily for capacity expansion. R&D expense is expected to be RMB 35.1 million (US\$ 5.0 million).
