Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)****Note 1. General**

The accompanying unaudited consolidated financial statements of Old Point Financial Corporation (the Company) and its subsidiaries have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information. All significant intercompany balances and transactions have been eliminated. In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments and reclassifications consisting of a normal and recurring nature considered necessary to present fairly the financial positions at September 30, 2008 and December 31, 2007, the results of operations for the three months and nine months ended September 30, 2008 and 2007, and statements of cash flows and changes in stockholders' equity for the nine months ended September 30, 2008 and 2007. The results of operations for the interim periods are not necessarily indicative of the results that may be expected for the full year.

These financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's 2007 annual report on Form 10-K. Certain previously reported amounts have been reclassified to conform to current period presentation.

The Company maintains a website on the Internet at www.oldpoint.com. The Company makes available free of charge, on or through its website, its proxy statements, annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports as soon as reasonably practicable after such material is electronically filed with the Securities and Exchange Commission (SEC). The information available at the Company's Internet address is not part of this Form 10-Q or any other report filed by the Company with the SEC. The public may read and copy any documents the Company files at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The Company's SEC filings can also be obtained on the SEC's website on the Internet at www.sec.gov.

Total	\$	\$	\$ 325	\$ 56,388	\$ 325	\$ 56,388

The Company has the ability and intent to hold these securities until maturity. None of the securities are impaired due to credit issues. Therefore, securities with a loss are considered temporarily impaired.

Table of Contents**Note 3. Loans**

Loans at September 30, 2008 and December 31, 2007 are summarized as follows:

	September 30, 2008	December 31, 2007
	(in thousands)	
Commercial and other loans	\$ 75,736	\$ 70,741
Real estate loans:		
Construction	62,360	56,007
Farmland		44
Equity lines of credit	32,487	30,383
1-4 family residential	134,558	123,006
Multifamily residential	4,289	7,031
Nonfarm nonresidential	285,171	254,790
Installment loans to individuals	42,562	51,912
Tax-exempt loans	2,863	2,992
Total loans	640,026	596,906
Less: Allowance for loan losses	(5,581)	(5,130)
Net deferred loan costs	275	238
Loans, net	\$ 634,720	\$ 592,014

At September 30, 2008 and December 31, 2007, impaired loans amounted to \$17.89 million and \$9.30 million. Included in the allowance for loan losses was \$756 thousand related to \$17.89 million of impaired loans at September 30, 2008 and \$655 thousand related to \$9.30 million of impaired loans at December 31, 2007.

Note 4. Allowance for Loan Losses

The following summarizes activity in the allowance for loan losses for the nine months ended September 30, 2008 and the year ended December 31, 2007:

	September 30, 2008	December 31, 2007
	(in thousands)	
Balance, beginning of year	\$ 5,130	\$ 4,784
Recoveries	336	381
Provision for loan losses	1,400	1,000
Loans charged off	(1,285)	(1,035)
Balance, end of period	\$ 5,581	\$ 5,130

Note 5. Share-Based Compensation

Share-based compensation arrangements include stock options, restricted stock awards, performance-based awards, stock appreciation rights and employee stock purchase plans. Statement of Financial Accounting Standards (SFAS) No. 123(R), Share-Based Payment (SFAS 123(R)) requires all share-based payments to employees to be valued using a fair value method on the date of grant and to be expensed based on that fair value over the applicable vesting period. SFAS 123(R) was adopted by the Company as of January 1, 2006.

Edgar Filing: OLD POINT FINANCIAL CORP - Form 10-Q

Since its adoption of SFAS 123(R), the Company issued options once in October 2007. The fair value of the options granted in 2007 was estimated using the Black Scholes option pricing model with the following assumptions: dividend yield of 2.46%, expected volatility of 27.398%, risk-free interest rate of 4.47% and an expected option life of six and one-half years. The grant-date fair value of options granted during 2007 was \$5.48 per share.

- 8 -

Table of Contents

On March 9, 2008, the Company's 1998 stock option plan expired. Options for the purchase of 294,086 shares of common stock are outstanding at September 30, 2008. The exercise price of each option equals the market price of the Company's common stock on the date of the grant and each option's maximum term is ten years. All share data have been adjusted to reflect the 5 for 4 stock split in the form of a dividend declared on August 16, 2007 and paid on October 1, 2007.

Stock option plan activity for the nine months ended September 30, 2008 is summarized below:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value
Options outstanding, January 1	363,041	\$ 18.99		
Granted				
Exercised	(250)	9.81		
Canceled or expired	(68,705)	22.25		
Options outstanding, September 30	294,086	18.24	5.92	\$ 933,830
Options exercisable, September 30	182,251	17.13	4.01	\$ 883,504

The aggregate intrinsic value of a stock option in the table above represents the total pre-tax intrinsic value (the amount by which the current market value of the underlying stock exceeds the exercise price of the option) that would have been received by the option holders had all option holders exercised their options on September 30, 2008. This amount changes based on changes in the market value of the Company's stock.

As of September 30, 2008, there was \$491 thousand unrecognized compensation which relates to unvested options.

SFAS 123(R) requires the benefits of tax deductions in excess of grant-date fair value to be reported as a financing cash flow. The Company did not have any tax benefit deductions from the exercise of stock options in the third quarter of 2008.

Note 6. Pension Plan

The Company provides pension benefits for eligible participants through a non-contributory defined benefits pension plan. The plan was frozen effective September 30, 2006; therefore no additional participants will be added to the plan. The Company implemented the requirement of the Financial Accounting Standards Board's (FASB) SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)—to measure plan assets and obligations as of the balance sheet date. This increased the Company's stockholders' equity by \$22 thousand. The components of net periodic pension cost are as follows:

Quarter ended September 30,	2008	2007
	Pension Benefits	
Interest cost	\$ 76,095	\$ 71,948
Expected return on plan assets	(109,883)	(102,902)
Amortization of net loss		8,606
Net periodic pension plan (benefit)	\$ (33,788)	\$ (22,348)
	2008	2007
Nine months ended September 30,	Pension Benefits	
Interest cost	228,285	215,843
Expected return on plan assets	(329,648)	(308,705)
Amortization of net loss		25,817

Edgar Filing: OLD POINT FINANCIAL CORP - Form 10-Q

Net periodic pension plan (benefit)	\$ (101,363)	\$ (67,045)
-------------------------------------	--------------	-------------

The Company has not made, and does not expect to make, any contributions to the plan in 2008.

Table of Contents

Note 7. Earnings per Share

Basic earnings per share is computed by dividing net income by the weighted average number of shares outstanding during the period. Diluted earnings per share is computed using the weighted average number of common shares outstanding during the period, including the effect of dilutive potential common shares attributable to outstanding stock options.

The Company did not include 193 thousand potential common shares attributable to outstanding stock options in the diluted earnings per share calculation because they were antidilutive.

Note 8. Recent Accounting Pronouncements

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations* (SFAS 141(R)). The Statement will significantly change the financial accounting and reporting of business combination transactions. SFAS 141(R) establishes the criteria for how an acquiring entity in a business combination recognizes the assets acquired and liabilities assumed in the transaction; establishes the acquisition date fair value as the measurement objective for all assets acquired and liabilities assumed; and requires the acquirer to disclose to investors and other users all of the information they need to evaluate and understand the nature and financial effect of the business combination. Acquisition related costs including finder's fees, advisory, legal, accounting valuation and other professional and consulting fees are required to be expensed as incurred. SFAS 141(R) is effective for fiscal years beginning after December 15, 2008 and early implementation is not permitted. The Company does not expect the implementation of SFAS 141(R) to have a material impact on its consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* (SFAS 160). SFAS 160 requires the Company to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. This Statement is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Earlier adoption is prohibited. The Company does not expect the implementation of SFAS 160 to have a material impact on its consolidated financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment of FASB Statement No. 133 (SFAS 161). SFAS 161 changes the disclosure requirements for derivative instruments and hedging activities. Entities are required to provide enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under Statement 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. SFAS 161 is effective for fiscal years and interim periods beginning after November 15, 2008, with early application permitted. The Company does not expect the implementation of SFAS 161 to have a material impact on its consolidated financial statements.

Table of Contents

In May 2008, the FASB issued Statement of Financial Accounting Standards No. 162, The Hierarchy of Generally Accepted Accounting Principles (SFAS 162). This Statement identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles in the United States. SFAS 162 becomes effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board amendments to AU Section 411. The Company does not expect the implementation of SFAS 162 to have a material impact on its consolidated financial statements.

In February 2008, the FASB issued FASB Staff Position (FSP) No. 157-2, Effective Date of FASB Statement No. 157 (FSP 157-2). FSP 157-2 delays the effective date of SFAS 157, Fair Value Measurements, for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The delay is intended to allow the FASB and constituents additional time to consider the effect of various implementation issues that have arisen, or that may arise, from the application of Statement 157. FSP 157-2 defers the effective date of Statement 157 to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years, for items within the scope of this FSP. Examples of items to which the deferral would and would not apply are listed in the FSP. The Company does not expect the implementation of FSP 157-2 to have a material impact on its consolidated financial statements.

In October 2008, the FASB issued FSP 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active (FSP 157-3). FSP 157-3 clarifies the application of SFAS 157, Fair Value Measurements, in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. This FSP was effective upon issuance, including prior periods for which financial statements have not been issued.

Note 9. Fair Value Measurements

SFAS No. 157, Fair Value Measurements (SFAS 157), defines fair value, establishes a framework for measuring fair value, establishes a three-level valuation hierarchy for disclosure of fair value measurement and enhances disclosure requirements for fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows:

- Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets
- Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument
- Level 3 - inputs to the valuation methodology are unobservable and significant to the fair value measurement

Following is a description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy:

Securities

Where quoted prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. Level 1 securities would include highly liquid government bonds, mortgage products and exchange traded equities. If quoted market prices are not available, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics, or discounted cash flow. Level 2 securities would include U.S. agency securities, mortgage-backed agency securities, obligations of states and political subdivisions and certain corporate, asset-backed and other securities. In certain cases where there is limited activity or less transparency around inputs to the valuation, securities are classified within Level 3 of the valuation hierarchy. Currently, all of the Company's securities are considered to be Level 2 securities.

Table of Contents

Impaired loans

SFAS 157 applies to loans measured for impairment using the practical expedients permitted by SFAS No. 114, Accounting by Creditors for Impairment of a Loan, including impaired loans measured at an observable market price (if available), or at the fair value of the loan's collateral (if the loan is collateral dependent). Fair value of the loan's collateral, when the loan is dependent on collateral, is determined by appraisal or independent valuation which is then adjusted for the cost related to liquidation of the collateral.

Other real estate owned

Certain assets such as other real estate owned (OREO) are measured at fair value less cost to sell. The Company believes that the fair value component in its valuation follows the provisions of SFAS 157.

Note 10. Split-Dollar Post Retirement Benefits

The FASB ratified Emerging Issues Task Force (EITF) Issue 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements which was effective January 1, 2008 for calendar-year entities. The EITF concluded that an employer should recognize a liability for future benefits based on the substantive agreement with the employee. As a result of the change in accounting principle, the Company recorded a reduction to retained earnings of \$425 thousand in the first quarter of 2008. In the third quarter of 2008 the Company replaced some of the split-dollar policies. As a result, the net decrease to retained earnings was \$334 thousand as of September 30, 2008.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion is intended to assist readers in understanding and evaluating the financial condition, changes in financial condition and the results of operations of the Company. The Company consists of the parent company and its wholly-owned subsidiaries, The Old Point National Bank of Phoebus (the Bank) and Old Point Trust & Financial Services, N. A. (Trust), collectively referred to as the Company. This discussion should be read in conjunction with the consolidated financial statements and other financial information contained elsewhere in this report.

Caution About Forward-Looking Statements

In addition to historical information, this report may contain forward-looking statements. For this purpose, any statement that is not a statement of historical fact may be deemed to be a forward-looking statement. These forward-looking statements may include statements regarding profitability, liquidity, allowance for loan losses, interest rate sensitivity, market risk, growth strategy and financial and other goals. Forward-looking statements often use words such as believes, expects, plans, may, will, should, projects, contemplates, and forecasts, intends or other words of similar meaning. Forward-looking statements can also be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements are subject to numerous assumptions, risks and uncertainties, and actual results could differ materially from historical results or those anticipated by such statements.

There are many factors that could have a material adverse effect on the operations and future prospects of the Company including, but not limited to, changes in interest rates, general economic conditions, the quality or composition of the loan or investment portfolios, the level of nonperforming assets and charge-offs, the local real estate market, volatility and disruption in national and international financial markets, government intervention in the U.S. financial system, demand for loan products, deposit flows, competition, and accounting principles, policies and guidelines. Monetary and fiscal policies of the U.S. Government could also adversely effect the Company; such policies include the impact of any regulations or programs implemented pursuant to the Emergency Economic Stabilization Act of 2008 (EESA) and other policies of the Office of the Comptroller of the Currency, U.S. Treasury and the Federal Reserve Board.

While the Company has not experienced significant losses during the current economic climate, a continuation of the recent turbulence in significant portions of the global financial markets, particularly if it worsens, could impact the Company's performance, both directly by affecting revenues and the value of the Company's assets and liabilities, and indirectly by affecting the Company's counterparties and the economy generally. Dramatic declines in the housing market in the past year have resulted in significant

Table of Contents

write-downs of asset values by financial institutions in the United States. Concerns about the stability of the U.S. financial markets generally have reduced the availability of funding to certain financial institutions, leading to a tightening of credit, reduction of business activity, and increased market volatility. It is not clear at this time what impact the EESA or other liquidity and funding initiatives of the Treasury and other bank regulatory agencies that have been announced or any additional programs that may be initiated in the future will have on the financial markets and the financial services industry. The extreme levels of volatility and limited credit availability currently being experienced could continue to affect the U.S. banking industry and the broader U.S. and global economies, which would have an effect on all financial institutions, including the Company.

These risks and uncertainties should be considered in evaluating the forward-looking statements contained herein, and readers are cautioned not to place undue reliance on such statements. Any forward-looking statement speaks only as of the date on which it is made, and the Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which it is made. In addition, past results of operations are not necessarily indicative of future results.

General

The Company is the parent company of the Bank and Trust. The Bank is a locally managed community bank serving the Hampton Roads localities of Hampton, Newport News, Norfolk, Virginia Beach, Chesapeake, Williamsburg/James City County, York County and Isle of Wight County. The Bank currently has 20 branch offices. Trust is a wealth management services provider.

Critical Accounting Policies and Estimates

As of September 30, 2008, there have been no significant changes with regard to the critical accounting policies and estimates disclosed in the Company's 2007 annual report on Form 10-K. That disclosure included a discussion of the accounting policy that requires management's most difficult, subjective or complex judgments: the allowance for loan losses.

Earnings Summary

Net income for the third quarter of 2008 was relatively unchanged at \$1.98 million as compared to the third quarter of 2007 even though the provision for loan losses for the quarter increased by 300% or \$600 thousand compared to the three months ended September 2007. Basic and diluted earnings per share for the third quarter 2008 and the third quarter 2007 were \$0.40. Return on average assets (ROA) for the third quarter of 2008 was 0.92% and 0.97% for the comparable period in 2007. Return on equity (ROE) was 9.56% for the third quarter of 2008 compared with 10.20% for the same period in 2007.

Net income for the nine months ended September 30, 2008 was \$5.88 million as compared to \$5.92 million for the nine months ended September 30, 2007, a decrease of only 0.70% or \$41 thousand even though the provision for loan losses was increased by 100% to \$1.40 million compared to the nine months ended September 30, 2007. Basic and diluted earnings per share for the nine months ended September 30, 2008 were \$1.20 and \$1.19 as compared to \$1.19 and \$1.18 for the nine months ended September 30, 2007.

Net Interest Income

The principal source of earnings for the Company is net interest income. Net interest income is the difference between interest and fees generated by earning assets and interest expense paid to fund them. Changes in the volume and mix of interest-earning assets and interest-bearing liabilities, as well as their respective yields and rates, have a significant impact on the level of net interest income. The net interest margin is calculated by dividing tax equivalent net interest income by average earning assets. Net interest income, on a fully tax equivalent basis, was \$7.30 million in the third quarter of 2008, an increase of \$593 thousand from the third quarter of 2007. The net interest margin was 3.78% in the third quarter of 2008 and 3.50% in the third quarter of 2007. The net interest margin has improved 32 basis points from the first quarter's margin of 3.46%. Although loan yields have declined since the first quarter, the Company has been able to reduce its interest-bearing liability costs by more than the decline in the loan yields.

Tax equivalent interest income decreased \$746 thousand, or 5.92%, in the third quarter of 2008 compared to the same period of 2007. Average earning assets grew \$5.09 million, or 0.66% compared to the third quarter of 2007. The average yield on earning assets decreased in the third quarter of 2008 by 43 basis points as compared to the third quarter of 2007. Interest expense decreased \$1.34 million, or 22.73%, and average interest-bearing liabilities decreased by \$1.47 million, or 0.23% in the third quarter of 2008 compared to the same period of 2007. The cost of funding interest-bearing liabilities decreased 83 basis points in the third quarter of 2008 compared to the third quarter of 2007.

Table of Contents

For the nine months ended September 30, 2008, net interest income, on a fully tax equivalent basis, increased \$1.13 million, or 5.73%, over the comparable period in 2007. Comparing the first nine months of 2008 to 2007, average loans increased \$32.61 million, or 5.57%, while investment securities decreased \$31.61 million, or 18.47%. Average earning assets increased 0.37% and interest income yield decreased from 6.42% in 2007 to 6.13% in 2008, a decrease of 29 basis points. For the nine months ended September 30, 2008, interest expense decreased \$2.67 million, or 15.28%, over the same period in 2007. For the nine months ended September 30, 2008, the yield on interest-bearing liabilities decreased 53 basis points as compared to the same period in 2007.

The following table shows an analysis of average earning assets, interest-bearing liabilities and rates and yields. Nonaccrual loans are included in loans outstanding.

Provision for Loan Losses

The provision for loan losses is a charge against earnings necessary to maintain the allowance for loan losses at a level consistent with management's evaluation of the portfolio.

The provision for loan losses was \$1.40 million for the first nine months of 2008, and \$700 thousand in the comparable period in 2007. Loans charged off (net of recoveries) in the first nine months of 2008 were \$949 thousand as compared to \$351 thousand in the first nine months of 2007. On an annualized basis, net loan charge-offs were 0.20% of total loans for the first nine months of 2008 compared with 0.08% for the same period in 2007.

On September 30, 2008, nonperforming assets totaled \$5.40 million compared with \$2.50 million on September 30, 2007. The September 2008 total consisted of \$2.07 million in loans still accruing interest but past due 90 days or more, \$387 thousand in nonaccrual loans, \$165 thousand in a former branch site listed for sale and \$2.78 million in foreclosed property. The September 2007 total consisted of \$1.32 million in restructured debt, \$735 thousand in loans still accruing interest but past due 90 days or more, \$282 thousand in nonaccrual loans and \$165 thousand in a former branch site listed for sale. The increase of \$2.78 million in foreclosed property includes two completed constructed houses, two 1-to-4 family residential properties, one residential lot and two commercial properties.

The allowance for loan losses on September 30, 2008 was \$5.58 million, compared with \$5.13 million on September 30, 2007. As of September 30, 2008, the allowance for loan losses represented a multiple of 2.27 times nonperforming loans. Nonperforming loans includes nonaccrual loans, loans still accruing interest but past due 90 days or more and restructured debt. The allowance for loan losses was 0.87% of total loans on September 30, 2008 and 2007.

Noninterest Income

For the third quarter of 2008, noninterest income increased \$331 thousand, or 10.92%, over the same period in 2007. The \$143 thousand increase in service charges on deposits is attributed to higher income from commercial analysis service charges, higher income from non-sufficient funds and overdraft fees and lower write-offs of demand deposit fees. The gain on disposal of premises and equipment is attributed to a \$230 thousand gain on the sale of a Bank building that was no longer needed. The reduction in other operating income is attributed to the closing of the Company's in-house brokered mortgage department at the Bank in the fall of 2007.

For the nine months ended September 30, 2008, noninterest income increased \$517 thousand or 5.59% over the same period in 2007. In addition to the items discussed in the paragraph above, the increase in other service charges, commissions and fees for the nine months ended September 30, 2008, as compared to the nine months ended September 30, 2007, was also attributed to increases in debit card and ATM interchange fees and from income received in connection with Visa Inc.'s initial public offering.

Noninterest Expense

For the third quarter of 2008, noninterest expense increased \$348 thousand, or 5.29%, over the third quarter of 2007. The majority of the third quarter 2008 increase is attributed to salaries and employee benefits, which increased by \$223 thousand, or 5.60%, over the third quarter of 2007 as a result of customary yearly salary increases and an increase of sixteen in the Company's full time equivalent positions.

Occupancy and equipment expenses increased \$69 thousand, or 7.42%, over the third quarter of 2007. The increase is related to the new branch that was opened in January 2008.

For the nine months ended September 30, 2008, noninterest expense increased \$1.07 million or 5.48%, over the nine months ended September 30, 2007. Salaries and employee benefits contributed \$570 thousand of this increase and occupancy and equipment expenses contributed \$154 thousand. The reasons for these increases are described in the above two paragraphs.

The remaining increase in noninterest expense for the nine months ended September 30, 2008 as compared to the nine months ended September 30, 2007 is attributed to data processing, marketing, customer development and other costs. The majority of the data processing increase is related to increased debit card and ATM interchange costs and providing key employees with data processing devices that allow them

Table of Contents

access to their email when they are not in the office. Most of the increase in marketing and customer development costs can be attributed to the grand opening of the Company's new Virginia Beach office in 2008, initiation of a contract related to ATMs in a chain of drug stores throughout Hampton Roads and higher contributions to non-profit organizations. Other noninterest expense increased \$134 thousand for the nine months ended September 30, 2008 as compared to the nine months ended September 30, 2007. Increases in foreclosed property and repossessed asset expense, FDIC insurance costs, courier expense, Federal Reserve costs and director fees account for the majority of the increase.

Balance Sheet Review

At September 30, 2008, the Company had total assets of \$831.90 million, an increase of 1.14% from \$822.56 million at December 31, 2007. Net loans as of September 30, 2008 were \$634.72 million, an increase of 7.21% from \$592.01 million at December 31, 2007.

Average assets for the first nine months of 2008 were \$830.89 million compared to \$824.08 million for the first nine months of 2007. The growth in average assets in 2008 was due primarily to the growth in average loans, which increased 5.57% as compared to the same period in 2007.

Total investment securities at September 30, 2008 were \$96.67 million, a decrease of 26.74% from \$131.96 million at December 31, 2007. The Company's goal is to provide maximum return on the investment portfolio within the framework of its asset/liability objectives. The objectives include managing interest sensitivity, liquidity and pledging requirements.

At September 30, 2008, the Company had \$39.48 million in cash and due from banks as compared to \$16.37 million at December 31, 2007. During the second quarter of 2008, the Bank began investing excess funds in the Certificate of Deposit Account Registry Service (CDARS) program. As of September 30, 2008, the Company had \$23.50 million invested in CDARS. During the second and third quarters of 2008, the Company was able to obtain higher yields in the CDARS program than the yields being paid in federal funds sold or like term investment securities.

At September 30, 2008, total deposits increased \$12.55 million, up 2.10% from \$596.16 million at December 31, 2007. The majority of this growth occurred in the noninterest-bearing and time deposits.

Federal funds purchased, repurchase agreements and other borrowings decreased to \$57.28 million at September 30, 2008, a decrease of 10.81% from \$64.23 million at December 31, 2007.

Capital Resources

Under applicable banking regulations, Total Capital is comprised of core capital (Tier 1) and supplemental capital (Tier 2). Tier 1 capital consists of common stockholders' equity and retained earnings less goodwill. Tier 2 capital consists of certain qualifying debt and a qualifying portion of the allowance for loan losses. The following is a summary of the Company's capital ratios at September 30, 2008. As shown below, these ratios were all well above the regulatory minimum levels.

	2008 Regulatory Minimums	September 30, 2008
Tier 1	4.00%	12.41%
Total Capital	8.00%	13.25%
Tier 1 Leverage	3.00%	10.02%

Third quarter-end book value per share was \$16.90 in 2008 and \$15.91 in 2007. Cash dividends were \$2.40 million or \$0.49 per share in the nine months ended September 30, 2008 and \$2.23 million or \$0.45 per share for the nine months ended September 30, 2007. The common stock of the Company has not been extensively traded. The 2007 per share data have been adjusted to reflect a 5 for 4 stock split in the form of a dividend declared on August 16, 2007 and paid October 1, 2007.

Table of Contents

Liquidity

Liquidity is the ability of the Company to meet present and future financial obligations through either the sale or maturity of existing assets or the acquisition of additional funds through liability management. Liquid assets include cash, interest-bearing deposits with banks, federal funds sold, investments in securities and loans maturing within one year.

In addition, secondary sources are available through the use of borrowed funds if the need should arise. The Company's sources of funds include a large stable deposit base and secured advances from the Federal Home Loan Bank of Atlanta (FHLB). As of the end of the third quarter of 2008, the Company had \$168.05 million in FHLB borrowing availability. The Company has available short-term unsecured borrowed funds in the form of federal funds with correspondent banks. As of the end of the third quarter of 2008, the Company had \$40.00 million available in federal funds to handle any short-term borrowing needs.

Management is aware of the current market and institutional trends, events and uncertainties. However, management does not expect the trends, events and uncertainties to have a material effect on the liquidity, capital resources or operations of the Company. Management is not aware of any current recommendations by regulatory authorities that would have a material effect on liquidity, capital resources or operations. The Company's internal sources of such liquidity are deposits, loan and investment repayments and securities available for sale. The Company's primary external source of liquidity is advances from the FHLB.

As a result of the Company's management of liquid assets, the availability of borrowed funds and the ability to generate liquidity through liability funding, management believes that the Company maintains overall liquidity sufficient to satisfy its depositors' requirements and to meet its customers' future borrowing needs.

Contractual Obligations

In the normal course of business there are various outstanding contractual obligations of the Company that will require future cash outflows. In addition, there are commitments and contingent liabilities, such as commitments to extend credit, that may or may not require cash outflows.

The Company purchased property for a future branch site in 2006. This property was purchased outright, not financed. The Company intends to open the branch in 2009.

As of September 30, 2008, there have been no material changes outside the ordinary course of business in the Company's contractual obligations disclosed in the Company's 2007 annual report on Form 10-K.

Off-Balance Sheet Arrangements

As of September 30, 2008, there were no material changes in the Company's off-balance sheet arrangements disclosed in the Company's 2007 annual report on Form 10-K.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

An important element of earnings performance and the maintenance of sufficient liquidity is proper management of the interest sensitivity gap and liquidity gap. The interest sensitivity gap is the difference between interest sensitive assets and interest sensitive liabilities in a specific time interval. This gap can be managed by repricing assets or liabilities, which are variable rate instruments, by replacing an asset or liability at maturity or by adjusting the interest rate during the life of the asset or liability. Matching the amounts of assets and liabilities maturing in the same time interval helps to hedge interest rate risk and to minimize the impact of rising or falling interest rates on net interest income.

The Company determines the overall magnitude of interest sensitivity risk and then formulates policies governing asset generating and pricing, funding sources and pricing, and off-balance sheet commitments. These decisions are based on management's expectations regarding future interest rate movements, the state of the national and regional economy, and other financial and business risk factors. The Company uses computer simulations to measure the effect of various interest rate scenarios on net interest income. This modeling reflects interest rate changes and the related impact on net interest income and net income over specified time horizons.

Based on scheduled maturities only, the Company was liability sensitive as of September 30, 2008. It should be noted, however, that non-maturing deposit liabilities totaling \$185.30 million, which consist of interest checking, money market, and savings accounts, are less

interest sensitive than other market driven deposits. In a rising rate environment, changes in these deposit rates have historically

Table of Contents

lagged behind the changes in earning asset rates, thus mitigating the impact from the liability sensitivity position. The asset/liability model allows the Company to reflect the fact that non-maturing deposits are less rate sensitive than other deposits by using a decay rate. The decay rate is a type of artificial maturity that simulates maturities for non-maturing deposits over the number of months that more closely reflects historic data. Using the decay rate, the model reveals that the Company is asset sensitive.

When the Company is asset sensitive, net interest income should improve if interest rates rise since assets will reprice faster than liabilities. Conversely, if interest rates fall, net interest income should decline, depending on the optionality (prepayment speeds) of the assets. When the Company is liability sensitive, net interest income should fall if rates rise and rise if rates fall.

The most likely scenario represents the rate environment as management forecasts it to occur. Management uses a static test to measure the effects of changes in interest rates on net interest income. This test assumes that management takes no steps to adjust the balance sheet to respond to the shock by repricing assets/liabilities, as discussed in the first paragraph of this section.

Under the rate environment forecasted by management, rate shocks in 100 basis point increments are applied to see the impact on the Company's earnings at September 30, 2008. The rate shock model reveals that a 100 basis point decrease in rates would cause an approximately 1.75% decrease in net interest income and a 200 basis point decrease in rates would cause an approximately 4.23% decrease in net interest income. The rate shock model reveals that a 100 basis point increase in rates would cause an approximately 2.24% increase in net interest income and that a 200 basis point increase in rates would cause an approximately 3.44% increase in net interest income.

Item 4. Controls and Procedures.

Management evaluated, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on the evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective as of the end of the period covered by the report to ensure that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

The Company's management is also responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). No changes in the Company's internal control over financial reporting occurred during the fiscal quarter ended September 30, 2008 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

The Company's management, including the Chief Executive Officer and Chief Financial Officer, does not expect that the Company's disclosure controls and procedures or the Company's internal controls will prevent all error and fraud. A control system, no matter how well conceived and operated, provides reasonable, not absolute, assurance that the objectives of the control system are met. The design of a control system reflects resource constraints and the benefits of controls must be considered relative to their costs. Because there are inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been or will be detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events. There can be no

Table of Contents

assurance that any design will succeed in achieving its stated goals under all future conditions; over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with the policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II OTHER INFORMATION**Item 1. Legal Proceedings.**

There are no pending or threatened legal proceedings to which the Company, or any of its subsidiaries, is a party or to which the property of the Company or any of its subsidiaries is subject that, in the opinion of management, may materially impact the financial condition of the Company.

Item 1A. Risk Factors.

This Item 1A requires disclosure of any material changes from risk factors previously disclosed in the Company's most recent annual report on Form 10-K for the year ended December 31, 2007, where such factors are discussed on pages 6 through 8. In addition to those factors, certain additional risks and uncertainties should also be considered as discussed below.

U.S. and international credit markets and economic conditions could adversely affect our liquidity and financial condition. As described in Management's Discussion and Analysis of Financial Condition and Results of Operations - Caution About Forward-Looking Statements, global market and economic conditions continue to be disrupted and volatile and the disruption has been particularly acute in the financial sector. Although the Company remains well capitalized and has not suffered any liquidity issues as a result of these recent events, the cost and availability of funds may be adversely affected by illiquid credit markets. Continued turbulence in the U.S. and international markets and economy may adversely affect our liquidity, financial condition and profitability.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

The Company did not repurchase any shares of the Company's common stock during the quarter ended September 30, 2008.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Submission of Matters to a Vote of Security Holders.

There were no matters submitted to a vote of security holders during the quarter ended September 30, 2008.

Item 5. Other Information.

The Company has made no changes to the procedures by which security holders may recommend nominees to its board of directors.

Item 6. Exhibits.
