VERISIGN, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Basis of Presentation

Interim Financial Statements

The accompanying unaudited Condensed Consolidated Financial Statements have been prepared by VeriSign, Inc. and its subsidiaries (collectively, VeriSign or the Company) in accordance with the instructions to Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) and, therefore, do not include all information and notes normally provided in audited financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals and other adjustments) considered necessary for a fair presentation have been included. The results of operations for any interim period are not necessarily indicative, nor comparable to the results of operations for any other interim period or for a full fiscal year. These unaudited Condensed Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and related notes contained in VeriSign's fiscal 2008 Annual Report on Form 10-K (the 2008 Form 10-K) filed with the SEC on March 3, 2009.

Segments

The Company has the following two reportable segments: (1) Internet Infrastructure and Identity Services (3IS) which consists of Naming Services, and Authentication Services comprising of Secure Socket Layer (SSL) Certificate Services and Identity and Authentication Services (IAS); and (2) Other Services which consists of the continuing operations of non-core businesses and legacy products and services from divested businesses. See Note 10, Segment Information, for further information regarding the Company's reportable segments.

Reclassifications

During the three months ended March 31, 2009, the Company disaggregated its Enterprise and Security Services (ESS) disposal group held for sale as of December 31, 2008, into the following three businesses: (i) Global Security Consulting (GSC), (ii) iDefense Security Intelligence Services (iDefense) and (iii) Managed Security Services (MSS). The Company decided to retain its iDefense business and, accordingly, reclassified the assets and liabilities related to iDefense as held and used as of March 31, 2009. The Company also reclassified the historical results of operations of iDefense from discontinued operations to continuing operations as part of Naming Services for all periods presented. See Note 3, Assets Held for Sale and Discontinued Operations, for further information.

The Condensed Consolidated Statements of Operations have been reclassified for all periods presented to reflect current discontinued operations treatment. Unless noted otherwise, discussions in the Notes to Condensed Consolidated Financial Statements pertain to continuing operations.

Adoption of New Accounting Standards

Effective January 1, 2009, the Company adopted Statement of Financial Accounting Standard (SFAS) No. 160 (SFAS 160), *Noncontrolling Interests in Consolidated Financial Statements, an amendment of Accounting Research Bulletin No. 51*, which requires all entities to report minority interests in subsidiaries as equity in the consolidated financial statements, and requires that transactions between entities and noncontrolling interests be treated as equity. The Company reclassified the noncontrolling interest of \$49.2 million as of December 31, 2008 in its consolidated VeriSign Japan subsidiary to Stockholders' equity.

Effective January 1, 2009, the Company retroactively adopted the Financial Accounting Standards Board (FASB) Staff Position (FSP) No. Accounting Principles Board (APB) 14-1 (FSP APB 14-1), *Accounting for*

Table of Contents

Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement). FSP APB 14-1 specifies that issuers of convertible debt instruments should separately account for the liability (debt) and equity (conversion option) components of such instruments in a manner that reflects the borrowing rate for a similar non-convertible debt. The Company's adoption of FSP APB 14-1 affected its 3.25% junior subordinated convertible debentures due 2037 (the Convertible Debentures). The condensed consolidated financial statements have been retroactively adjusted for all periods presented in accordance with FSP APB 14-1. See Note 9, Junior Subordinated Convertible Debentures, for further information regarding the adoption of FSP APB 14-1.

The following table presents the effects of the retroactive adjustments to the Company's Condensed Consolidated Balance Sheet as of December 31, 2008, upon the adoption of SFAS 160 and FSP APB 14-1:

Table of Contents

- (1) As reported in the Company's 2008 Form 10-K, except Noncontrolling interest in subsidiary which has been retroactively presented as a separate component of Stockholders' equity.
- (2) Property and equipment, net, as of December 31, 2008, increased by \$3.3 million due to the retroactive capitalization of interest costs using the Company's non-convertible debt borrowing rate of 8.39% as of the date of issuance. Prior to the adoption of FSP APB 14-1, the Company was capitalizing its interest costs at the stated interest rate on the Convertible Debentures of 3.25%.
- (3) Other assets as of December 31, 2008, decreased by \$209.6 million due to a decrease to long-term deferred tax assets and a retroactive adjustment of debt issuance costs upon the adoption of FSP APB 14-1. Long-term deferred tax assets as of December 31, 2008, decreased by \$195.7 million, and the Company reclassified \$14.5 million of debt issuance costs from Other assets to Additional paid-in capital. The reclassification resulted in a cumulative decrease in amortization of debt issuance costs of \$0.6 million as of December 31, 2008.
- (4) Convertible debentures, including contingent interest derivative, as of December 31, 2008, decreased by \$692.9 million due to the reclassification of the \$700.7 million equity component of the convertible debt to Stockholders' equity offset by \$7.8 million accretion of interest.
- (5) Long-term deferred tax liabilities as of December 31, 2008, increased by \$68.2 million upon adoption of FSP APB 14-1.
- (6) Additional paid-in capital as of December 31, 2008 increased \$419.0 million. The Company determined that the equity component of the Convertible Debentures was \$700.7 million. This amount was reclassified from Convertible debentures, including contingent interest derivative, to Additional paid-in capital. The Company reclassified the equity component related debt issuance costs of \$14.5 million from Other assets to Additional paid-in capital. The Company recorded long-term deferred tax liabilities of \$267.2 million with a corresponding impact to Additional paid-in capital.

The following table presents the effects of the adjustments to the Company's Condensed Consolidated Statement of Operations for the three months ended March 31, 2008:

	Three Months Ended March 31, 2008			As Adjusted

Basic	206,550		206,550
Diluted	210,471		210,471

Table of Contents

- (1) As reported in the Company's 2008 Form 10-K, except per share amounts and Net income attributable to noncontrolling interest in subsidiary. Per share amounts have been adjusted to present the net loss per share attributable to VeriSign, Inc. and subsidiaries. Net income attributable to noncontrolling interest in subsidiary has been presented after consolidated net loss to derive the net loss attributable to VeriSign, Inc. and subsidiaries.
- (2) Reclassification of the results of operations of the Company's iDefense business from discontinued operations to continuing operations.
- (3) Other costs and expenses and Loss from discontinued operations, net of tax, increased during the three months ended March 31, 2008, due to additional depreciation expense recorded retroactively as result of an increase in capitalized interest costs.
- (4) Other loss, net, increased during the three months ended March 31, 2008, primarily due to additional interest expense recorded retroactively.
- (5) Income tax expense decreased during the three months ended March 31, 2008, primarily due to a decrease in income from continuing operations before taxes.

Note 2. Stock-Based Compensation

Stock-based compensation is classified in the Condensed Consolidated Statements of Operations in the same expense line items as cash compensation. The following table presents the classification of stock-based compensation:

	Three Months Ended March 31,	
	2009	2008
	(In thousands)	
Stock-based compensation:		
Cost of revenues	\$ 1,664	\$ 2,409
Sales and marketing	2,405	3,451
Research and development	1,523	2,471
General and administrative	5,277	6,473
Restructuring charges	731	3,424
Stock-based compensation for continuing operations	11,600	18,228
Discontinued operations	2,328	8,567
Total stock-based compensation	\$ 13,928	\$ 26,795

VeriSign currently uses the Black-Scholes option pricing model to determine the fair value of stock options and employee stock purchase plan awards. The determination of the fair value of stock-based payment awards using an option-pricing model is affected by the Company's stock price as well as assumptions regarding a number of complex and subjective variables. The following table sets forth the weighted-average assumptions used to estimate the fair value of the stock options and employee stock purchase plan awards:

	Three Months Ended March 31,	
	2009	2008
Stock options:		
Volatility	47%	37%

Edgar Filing: VERISIGN INC/CA - Form 10-Q

Risk-free interest rate	1.52%	2.46%
Expected term	3.70	3.12
Dividend yield	Zero	Zero
Employee stock purchase plan awards:		
Volatility	54%	31%
Risk-free interest rate	0.47%	2.69%
Expected term	1.25 years	1.25 years
Dividend yield	Zero	Zero

Table of Contents

VeriSign's expected volatility is based on the average of the historical volatility over the period commensurate with the expected term of the options and the mean historical implied volatility of traded options. The risk-free interest rates are derived from the average U.S. Treasury constant maturity rates during the respective periods commensurate with the expected term. The expected terms are based on an analysis of the observed and expected time to post-vesting exercise and/or cancellation of options. The Company does not anticipate paying any cash dividends in the foreseeable future and therefore uses an expected dividend yield of zero. The Company estimates forfeitures at the time of grant and revises those estimates in subsequent periods if actual forfeitures differ from those estimates. The Company uses historical data to estimate pre-vesting option and award forfeitures and records stock-based compensation only for those options and awards that are expected to vest.

The following table presents the nature of the Company's total stock-based compensation, inclusive of amounts for discontinued operations:

	Three Months Ended	
	March 31,	
	2009	2008
	(In thousands)	
Stock-based compensation:		
Stock options	\$ 3,511	\$ 6,623
Employee stock purchase plans	2,721	8,527
Restricted stock units	7,481	7,968
Stock options/awards acceleration	932	4,245
Capitalization (1)	(717)	(568)
Total stock-based compensation	\$ 13,928	\$ 26,795

(1) The capitalized amount is included in Property and equipment, net.

During the three months ended March 31, 2009, the Company modified certain stock-based awards to accelerate the vesting of twenty-five percent (25%) of unvested in-the-money stock options outstanding and 25% of unvested restricted stock units outstanding on the termination dates of employees affected by divestitures and workforce reductions. The Company remeasured the fair value of these modified awards and recorded the charges over the future service periods, if any. The modification charges are included in restructuring for continuing operations as well as for discontinued operations.

Note 3. Assets Held for Sale and Discontinued Operations

In 2007, VeriSign announced a change to its business strategy to allow management to focus its attention on its core competencies and to make additional resources available to invest in its core businesses. The strategy calls for the divestiture or winding down of the following remaining non-core businesses in the Company's portfolio: Communications Services, Content Portal Services (CPS), International Clearing, GSC, Messaging and Mobile Media Services, MSS, Pre-pay billing and payment services (Pre-Pay), and Real-Time Publisher (RTP) Services. These businesses, except for the Pre-pay business, which the Company is currently in the process of winding down, are classified as disposal groups held for sale as of March 31, 2009, and their results of operations have been classified as discontinued operations for all periods presented.

During the three months ended March 31, 2009, the Company disaggregated its ESS disposal group held for sale as of December 31, 2008, into the following three businesses: (i) GSC, (ii) iDefense and (iii) MSS. The Company decided to retain its iDefense business and, accordingly, reclassified the assets and liabilities related to iDefense as held and used as of March 31, 2009. The Company also reclassified the historical results of operations of iDefense from discontinued operations to continuing operations as part of Naming Services for all periods presented.

Table of Contents*Assets Held for Sale*

The following table presents the carrying amounts of major classes of assets and liabilities related to assets held for sale as of March 31, 2009 and December 31, 2008:

	March 31, 2009	December 31, 2008
	(In thousands)	
Assets:		
Accounts receivable	\$ 51,556	\$ 58,588
Other current assets	87,053	63,516
Goodwill	234,677	237,177
Other long-lived assets	132,574	124,559
 Total assets held for sale	 \$ 505,860	 \$ 483,840
Liabilities:		
Accounts payable and accrued liabilities	\$ 51,115	\$ 35,853
Deferred revenues	9,426	13,307
 Total liabilities related to assets held for sale	 \$ 60,541	 \$ 49,160

As of March 31, 2009, businesses classified as held for sale and presented as discontinued operations are the following:

Communications Services

The Company's Communications Services business provides communications services, such as Billing and Commerce Services, Connectivity and Interoperability Services and Intelligent Database Services. The Company's Billing and Commerce Services primarily include its Billing Services, Global Consulting Services for Billing, Real-Time Rating and Payment Services, Real-Time Roaming Services, and Settlement and Exchange Services. The Company's Connectivity and Interoperability Services primarily include its Signaling System 7 (SS7) Connectivity, Voice and Data Roaming services, and Voice Over Internet Protocol Services. The Company's intelligent database services primarily include its Number Portability Services, Calling Name Database Services, Line Information Database Services and Toll-free Database Services.

On March 2, 2009, the Company entered into a binding agreement to sell its Communications Services business to Transaction Network Services, Inc. for \$230.0 million subject to certain adjustments to reflect normal fluctuations in working capital. On May 1, 2009, the divestiture transaction was completed for cash proceeds of \$226.2 million, after certain initial adjustments to reflect the parties' current estimate of working capital associated with the Communications Services business as of the closing date. The divestiture transaction will be subject to a final adjustment to reflect the actual working capital balances as of the closing date.

Content Portal Services

The Company's CPS business enables a seamless end-to-end solutions business focused on providing best-in-class digital content storefront services. CPS can be used as a content delivery platform for games, ringtones, and other content services. CPS provides its services to mobile carriers and media companies primarily located in Canada.

International Clearing

The Company's International Clearing business enables financial settlement and call data settlement for wireless and wireline carriers. On April 10, 2009, the Company sold its International Clearing business.

Table of Contents

Global Security Consulting

The Company's GSC business helps companies understand corporate security requirements, comply with all applicable regulations, identify security vulnerabilities, reduce risk, and meet the security compliance requirements applicable to the particular business and industry.

Managed Security Services

The Company's MSS business enables enterprises to effectively monitor and manage their network security infrastructure 24 hours per day, every day of the year while reducing the associated time, expense, and personnel commitments by relying on VeriSign's security platform and experienced security staff.

Messaging and Mobile Media Services

The Company's Messaging and Mobile Media (MMM) Services business is an industry-leading global provider of short-messaging, multimedia messaging, and mobile content application services. MMM Services enables messages and multimedia content to be sent globally across any wireless operator and mobile device. MMM Services offers the global connectivity, network reliability, and scalability necessary to capitalize on the fast growing global messaging and media content markets.

Real-Time Publisher Services

The Company's RTP Services allow organizations to obtain access to and organize large amounts of constantly updated content, and distribute it, in real time, to enterprises, Web-portal developers, application developers and consumers. RTP Services also make it easier for publishers of all sizes to distribute and track their content feeds, which may improve the reliability and quality of their real-time content. On May 5, 2009, the Company sold its RTP Services business.

The current and historical operations, gains and losses upon disposition, including estimated losses upon disposition, of these disposal groups are presented as discontinued operations for all periods presented in the Company's Condensed Consolidated Statements of Operations. The amounts presented represent direct operating costs of the disposal groups. The Company has determined direct costs consistent with the manner in which the disposal groups were structured and managed during the respective periods. Allocations of indirect costs such as corporate overhead and goodwill impairments that are not directly attributable to a disposal group have not been made.

For a period of time, the Company will continue to generate cash flows and will report income statement activity in continuing operations that are associated with these disposal groups and certain of the completed divestitures. The activities that will give rise to these impacts are transitional in nature and generally result from agreements that ensure and facilitate the orderly transfer of business operations. The nature, magnitude and duration of the agreements will vary depending on the specific circumstances of the service, location and/or business need. The agreements can include the following: logistics, customer service, support of financial processes, procurement, human resources, facilities management, data collection and information services. Existing agreements generally extend for periods less than 12 months.

During the three months ended March 31, 2009, the Company recorded gains on disposals including net reversals of estimated losses on disposal, of \$4.0 million which is included in discontinued operations. During the three months ended March 31, 2008, the Company recorded losses on disposals, including estimated losses on disposal, of \$26.0 million which is included in discontinued operations. Gains on disposal are recorded on the date the sale of the disposal group is consummated. Full or partial reversals of previously reported estimated losses on disposals are recorded upon changes in the fair values and/or carrying values of the disposal groups.

Table of Contents

The following table presents the revenues and the components of Income (loss) from discontinued operations, net of tax:

	Three Months Ended March 31,	
	2009	2008
	(In thousands)	
Revenues	\$ 102,654	\$ 158,211
Income (loss) before income taxes	\$ 22,892	\$ (5,421)
Income tax (expense) benefit	(7,976)	5,301
Income (loss) from discontinued operations	14,916	(120)
Gain (loss) on sale of discontinued operations and estimated (losses) reversals on assets held for sale, before income taxes	3,984	(25,981)
Income tax (expense) benefit	(274)	2,412
Gain (loss) on sale of discontinued operations	3,710	(23,569)
Total income (loss) from discontinued operations, net of tax	\$ 18,626	\$ (23,689)

Note 4. Restructuring Charges

A comparison of restructuring charges is presented below:

	Three Months Ended March 31,	
	2009	2008
	(In thousands)	
Restructuring charges for continuing operations	\$ 4,775	\$ 16,261
Restructuring (reversals) charges for discontinued operations	(404)	10,204
Total restructuring charges	\$ 4,371	\$ 26,465

As part of its divestiture strategy, VeriSign initiated a restructuring plan in the first quarter of 2008 (the 2008 Restructuring Plan) which includes workforce reductions, abandonment of excess facilities and other exit costs. The restructuring charges in the table above are substantially related to the 2008 Restructuring Plan. Through March 31, 2009, VeriSign recorded a total of \$74.0 million in restructuring charges, inclusive of amounts for discontinued operations, under its 2008 Restructuring Plan.

The following table presents the consolidated restructuring charges, inclusive of amounts for discontinued operations:

	Three Months Ended March 31,	
	2009	2008
	(In thousands)	
Workforce reduction	\$ 3,209	\$ 25,637
Excess facilities	1,162	13
Other exit costs		815

Edgar Filing: VERISIGN INC/CA - Form 10-Q

Total restructuring charges	\$ 4,371	\$ 26,465
-----------------------------	----------	-----------

Under the 2008 Restructuring Plan, the Company notified certain employees of their termination and recognized total consolidated expense relating to severance and benefits costs of \$3.2 million and \$25.6 million during the three months ended March 31, 2009 and 2008, respectively, inclusive of amounts for discontinued operations.

Table of Contents

Of the consolidated restructuring charges, a reversal of \$0.3 million and a charge of \$10.2 million relate to workforce reduction for discontinued operations during the three months ended March 31, 2009 and 2008, respectively.

Of the consolidated workforce reduction charges, \$0.9 million and \$3.8 million relate to stock-based compensation for certain terminated employees during the three months ended March 31, 2009 and 2008, respectively, of which \$0.2 million and \$0.4 million, respectively, are recorded in discontinued operations.

As of March 31, 2009, the consolidated accrued restructuring costs are \$15.0 million and consist of the following:

	Accrued Restructuring Costs at December 31, 2008	Restructuring Charges	Cash Payments (In thousands)	Non-cash	Accrued Restructuring Costs at March 31, 2009
Workforce reduction	\$ 25,374	\$ 3,209	\$ (19,573)	\$ (932)	\$ 8,078
Excess facilities	6,583	1,162	(867)		6,878
Total accrued restructuring costs	\$ 31,957	\$ 4,371	\$ (20,440)	\$ (932)	\$ 14,956
Included in current portion of accrued restructuring costs					\$ 11,190
Included in long-term portion of accrued restructuring costs					\$ 3,766

Cash payments totaling \$10.9 million related to the abandonment of excess facilities will be paid over the respective lease terms, the longest of which extends through 2016. The present value of future cash payments related to lease terminations due to the abandonment of excess facilities is expected to be as follows:

	Contractual Lease Payments	Anticipated Sublease Income (In thousands)	Net
2009 (remaining 9 months)	\$ 3,132	\$ (782)	\$ 2,350
2010	2,917	(651)	2,266
2011	2,311	(859)	1,452
2012	589	(223)	366
2013	421	(279)	142
Thereafter	942	(640)	302
	\$ 10,312	\$ (3,434)	\$ 6,878

As part of the 2008 Restructuring Plan, the Company anticipates recording additional charges related to its workforce reduction, excess facilities and other exit costs through 2009. The estimate of these charges is not yet finalized and the total amount and timing of these charges will depend upon the nature, timing, and extent of these future actions.

Table of Contents**Note 5. Goodwill**

The following table summarizes the changes in the carrying amount of goodwill allocated to the Company's 3IS segment during the three months ended March 31, 2009. There is no goodwill allocated to the Company's Other Services segment as of March 31, 2009.

	3IS (In thousands)
Balance at December 31, 2008	\$ 283,109
Reclassification from assets held for sale	7,000
Other adjustments (1)	(661)
Balance at March 31, 2009	\$ 289,448

(1) Other adjustments consist of foreign exchange fluctuations.

During the three months ended March 31, 2009, the Company disaggregated its ESS disposal group held for sale as of December 31, 2008, into the following three businesses: (i) GSC, (ii) iDefense, and (iii) MSS. The Company decided to retain its iDefense business and, accordingly, reclassified goodwill of \$7.0 million allocated to iDefense as held and used as of March 31, 2009.

Note 6. Other Balance Sheet Items*Prepaid Expenses and Other Current Assets*

Prepaid expenses and other current assets consist of the following:

	March 31, 2009	December 31, 2008
	(In thousands)	
Prepaid expenses	\$ 23,419	\$ 22,775
Deferred tax assets	66,065	64,482
Non-trade receivables	11,600	13,054
Receivables from buyers	12,822	14,899
Funds held by the Reserve	56,330	150,346
Other	2,571	2,622
Total prepaid expenses and other current assets	\$ 172,807	\$ 268,178

As of March 31, 2009, the Company had an aggregate of \$56.3 million held by The Reserve's Primary Fund (the Primary Fund) and The Reserve International Liquidity Fund, Ltd. (the International Fund), classified as Prepaid expenses and other current assets due to the lack of an active market. During the three months ended March 31, 2009, the Company received distributions of \$8.3 million and \$85.8 million from the Primary Fund and the International Fund, respectively.

Table of Contents*Property and Equipment, Net*

The following table presents the detail of Property and equipment, net:

	March 31, 2009	December 31, 2008

Capital work in progress	16,564	16,595
Office equipment, furniture and fixtures	14,765	15,491
Leasehold improvements	52,382	52,690
Total cost	654,592	696,234
Less: accumulated depreciation	(281,869)	(310,736)
Total property and equipment, net	\$ 372,723	\$ 385,498

Other Assets

Other assets consist of the following:

	March 31, 2009	December 31, 2008
	(In thousands)	
Long-term deferred tax assets	\$ 2,284	\$ 2,562
Long-term investments	6,745	5,996
Debt issuance costs	13,004	13,233
Long-term restricted cash	1,859	1,858
Security deposits and other	10,442	14,469
Total other assets	\$ 34,334	\$ 38,118

Accounts Payable and Accrued Liabilities

Accounts payable and accrued liabilities consist of the following:

	March 31, 2009	December 31, 2008
	(In thousands)	
Accounts payable	\$ 11,252	\$ 30,690
Accrued employee compensation	63,279	109,958
Customer deposits, net	25,605	30,432
Taxes payable and other tax liabilities	25,402	18,173
Other accrued liabilities	69,820	74,282
Total accounts payable and accrued liabilities	\$ 195,358	\$ 263,535

Table of Contents**Note 7. Comprehensive Income (Loss)**

Comprehensive income (loss) consists of Net income (loss) adjusted for unrealized gains and losses on marketable securities classified as available-for-sale and foreign currency translation adjustments. The following table presents the components of comprehensive income (loss):

	Three Months Ended March 31,	
	2009	2008
	(In thousands)	
Net income (loss)	\$ 65,515	\$ (7,155)
Change in unrealized gain on investments, net of tax	158	197
Foreign currency translation adjustments	(9,954)	16,482
Comprehensive income	55,719	9,524
Less: Comprehensive (loss) income attributable to noncontrolling interest in subsidiary	(4,114)	8,527
Comprehensive income attributable to VeriSign	\$ 59,833	\$ 997

Note 8. Calculation of Net Income (Loss) Per Share Attributable to VeriSign

The Company computes basic net income (loss) per share attributable to VeriSign by dividing net income (loss) attributable to VeriSign by the weighted-average number of common shares outstanding during the period. Diluted net income per share attributable to VeriSign gives effect to dilutive potential common equivalent shares, including unvested stock options, unvested restricted stock units, employee stock purchases, warrants and the conversion spread relating to the Convertible Debentures using the treasury stock method. The following table presents the computation of basic and diluted net income (loss) per share attributable to VeriSign:

	Three Months Ended March 31,	
	2009	2008
	(In thousands, except per share data)	
Income (loss) attributable to VeriSign:		
Income from continuing operations, net of tax	\$ 46,394	\$ 15,628
Income (loss) from discontinued operations, net of tax	18,626	(23,689)
Net income (loss) attributable to VeriSign	\$ 65,020	\$ (8,061)
Weighted-average shares:		
Weighted-average shares of common stock outstanding	192,311	206,550
Weighted-average potential shares of common stock outstanding:		
Stock options	236	2,191
Unvested restricted stock awards	257	1,133
Conversion spread related to Convertible Debentures		256
Employee stock purchase plans		341
Shares used to compute diluted net income (loss) per share attributable to VeriSign	192,804	210,471
Income (loss) per share attributable to VeriSign:		
Basic:		
Continuing operations	\$ 0.24	\$ 0.08
Discontinued operations	0.10	(0.12)
Net income (loss)	\$ 0.34	\$ (0.04)

Edgar Filing: VERISIGN INC/CA - Form 10-Q

Diluted:

Continuing operations	\$	0.24	\$	0.07
Discontinued operations		0.10		(0.11)
Net income (loss)	\$	0.34	\$	(0.04)

Table of Contents

Weighted-average potential shares of common stock do not include stock options with an exercise price that exceeded the average fair market value of VeriSign's common stock for the periods presented. The following table sets forth the weighted-average potential shares of common stock that were excluded from the above calculation because their effect was anti-dilutive, and the respective weighted-average exercise prices of such weighted-average stock options outstanding:

	Three Months Ended March 31,	
	2009	2008
	(In thousands, except per share data)	
Weighted-average stock options outstanding	8,289	4,141
Weighted-average exercise price	\$ 28.13	\$ 32.43
Weighted-average restricted stock awards outstanding	2,355	68
Employee stock purchase plans	569	

Note 9. Junior Subordinated Convertible Debentures

In 2007, the Company issued \$1.25 billion principal amount of 3.25% convertible debentures due August 15, 2037, to an initial purchaser in a private offering. The Convertible Debentures are subordinated in right of payment to the Company's existing and future senior debt and to the other liabilities of the Company's subsidiaries. The Convertible Debentures are initially convertible, subject to certain conditions, into shares of the Company common stock at a conversion rate of 29.0968 shares of common stock per \$1,000 principal amount of Convertible Debentures, representing an initial effective conversion price of approximately \$34.37 per share of common stock. The conversion rate will be subject to adjustment for certain events as outlined in the Indenture governing the Convertible Debentures but will not be adjusted for accrued interest. As of March 31, 2009, the if-converted value of the Convertible Debentures does not exceed its principal amount.

Effective January 1, 2009, the Company retroactively adopted FSP APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)*. FSP APB 14-1 specifies that issuers of convertible debt instruments should separately account for the liability (debt) and equity (conversion option) components of such instruments in a manner that reflects the borrowing rate for a similar non-convertible debt.

The Company calculated the carrying value of the liability component at issuance as the present value of its cash flows using a discount rate of 8.5% (borrowing rate for similar non-convertible debt with no contingent payment options) adjusted for the fair value of the contingent interest feature. The carrying value of the liability component was determined to be \$550.5 million. The excess of the principal amount of the debt over the carrying value of the liability component is also called "debt discount" or "equity component" of the Convertible Debentures. The equity component of the Convertible Debentures on the date of issuance was \$700.7 million. The debt discount will be amortized using the Company's effective interest rate of 8.39% over the term of the Convertible Debentures as a non-cash charge to interest expense included in Other loss, net. As of March 31, 2009, the remaining term of the Convertible Debentures is 28.4 years.

The table below presents the carrying amounts of the liability and equity components:

	March 31,	December 31,
	2009	2008
	(In thousands)	
Carrying amount of equity component (net of issuance costs of \$14,449)	\$ 686,221	\$ 686,221
Principal amount of Convertible Debentures	\$ 1,250,000	\$ 1,250,000
Unamortized discount of liability component	(690,331)	(691,837)
Carrying amount of liability component	559,669	558,163
Contingent interest derivative	9,375	10,549
Convertible debentures, including contingent interest derivative	\$ 569,044	\$ 568,712

Table of Contents

The table below presents the interest expense for the contractual interest and the amortization of debt discount:

	Three Months Ended March 31,	
	2009	2008
	(Dollars in thousands)	
Effective interest rate	8.39%	8.39%
Interest expense contractual interest	\$ 10,156	\$ 10,156
Interest expense amortization of discount on the liability component	\$ 1,513	\$ 1,376

The embedded features related to the contingent interest payments, over-allotment option, and the Company making specific types of distributions (e.g., extraordinary dividends) qualify as derivatives to be accounted for separately. The fair value of the derivatives at the date of issuance of the Convertible Debentures was \$11.4 million including \$7.8 million for the contingent interest payment features and \$3.6 million for the over-allotment option feature, which is accounted for as a discount on the Convertible Debentures. The over-allotment feature was revalued at \$12.6 million on the date of exercise at August 28, 2007, which is currently accounted for as a premium on the Convertible Debentures. The debt discount and the debt premium are being accreted to the face value of the Convertible Debentures as net interest expense over 30 years. The balances of the debt discount and debt premium are included in the carrying amount of the liability component.

Note 10. Segment Information*Description of segments*

The Company has the following two reportable segments: (1) 3IS, which consists of Naming Services, and Authentication Services comprising of SSL Certificate Services and IAS; and (2) Other Services which consists of the continuing operations of non-core businesses and legacy products and services from divested businesses.

Naming Services are the authoritative directory provider of all .com, .net, .cc, .tv, .name and .jobs domain names. SSL Certificate Services enable enterprises and Internet merchants to implement and operate secure networks and websites that utilize SSL protocol, and are often referred to as business authentication. These services provide customers the means to authenticate themselves to their end users and website visitors and to encrypt communications between client browsers and Web servers. IAS includes identity protection services, fraud detection services, managed public key infrastructure (PKI) services, and unified authentication services, and is often referred to as user authentication. These services are intended to help enterprises secure intranets, extranets and other applications and devices, and provide authentication credentials.

The Other Services segment consists of the continuing operations of the Company's non-core Pre-pay billing and payment services (Pre-pay) business, as well as legacy products and services from the divested Content Delivery Network business. The Company is in the process of winding down the operations of the Pre-pay business.

The segments were determined based on how the chief operating decision maker (CODM) views and evaluates VeriSign's operations. VeriSign's Chief Executive Officer on an interim basis has been identified as the CODM. Other factors, including customer base, homogeneity of products, technology and delivery channels, were also considered in determining the reportable segments.

Table of Contents

The following table presents the results of VeriSign's reportable segments:

	3IS	Other Services (In thousands)	Total Segments
Three months ended March 31, 2009:			
Revenues	\$ 252,212	\$ 2,783	\$ 254,995
Cost of revenues	47,186	1,292	48,478
	\$ 205,026	\$ 1,491	\$ 206,517
Three months ended March 31, 2008:			
Revenues	\$ 223,846	\$ 11,419	\$ 235,265
Cost of revenues	39,225	4,176	43,401
	\$ 184,621	\$ 7,243	\$ 191,864

A reconciliation of the totals reported for the reportable segments to the applicable line items in the Condensed Consolidated Statements of Operations is as follows:

	Three Months Ended March 31, 2009 2008 (In thousands)	
Total revenues from reportable segments	\$ 254,995	\$ 235,265
Total cost of revenues from reportable segments	48,478	43,401
Unallocated operating expenses (1)	131,803	163,281
Operating income	74,714	28,583
Other loss, net	(4,293)	(3,639)
Income from continuing operations before income taxes and loss from unconsolidated entities	\$ 70,421	\$ 24,944

- (1) Unallocated operating expenses include unallocated cost of revenues, sales and marketing, research and development, general and administrative, restructuring charges, and amortization of other intangible assets.

Geographic Information

The Company operates in the United States; Australia, Japan and Asia Pacific (APAC); Europe, the Middle East and Africa (EMEA); and certain other countries.

The following table presents a comparison of the Company's geographic revenues:

Edgar Filing: VERISIGN INC/CA - Form 10-Q

	Three Months Ended March 31,	
	2009	2008
	(In thousands)	
United States	\$ 149,365	\$ 138,278
EMEA	53,006	49,024
APAC	35,685	31,838
Other	16,939	16,125
Total revenues	\$ 254,995	\$ 235,265

Table of Contents

Revenues are generally attributed to the country of domicile and the respective regions in which the Company's customers are located.

The following table presents a comparison of property and equipment, net, by geographic region:

	March 31, 2009	December 31, 2008
	(In thousands)	
United States	\$ 347,528	\$ 357,607
APAC	16,211	19,176
EMEA	8,920	8,686
Other	64	29
Total property and equipment, net	\$ 372,723	\$ 385,498

Assets are not tracked by segment and the CODM does not evaluate segment performance based on asset utilization.

Major Customers

One customer accounted for approximately 14% and 12% of the Company's revenues from continuing operations during the three months ended March 31, 2009 and 2008 respectively. No customer accounted for 10% or more of accounts receivable at March 31, 2009, and December 31, 2008.

Note 11. Other Loss, Net

The following table presents the components of Other loss, net:

	Three Months Ended March 31, 2009 2008	
	(In thousands)	
Interest income	\$ 1,443	\$ 8,295
Interest expense	(11,805)	(10,921)
Net (loss) gain on sale and impairment of investments	(45)	55
Net gain (loss) on divestiture of businesses	909	(1,173)
Unrealized gain on contingent interest derivative on convertible debentures	1,174	1,838
Income from transition services agreements	782	
Other, net	3,249	(1,733)
Total other loss, net	\$ (4,293)	\$ (3,639)

Interest income is earned principally from the investment of VeriSign's surplus cash balances. Interest expense is derived principally from interest on VeriSign's Convertible Debentures. During the three months ended March 31, 2009, Other, net, primarily consists of \$3.3 million received from Certicom Corporation due to the termination of the acquisition agreement entered into with Certicom during the three months ended March 31, 2009 and foreign exchange rate gains and losses. During the three months ended March 31, 2008, Other, net, primarily consists of net foreign exchange rate losses.

Note 12. Income Taxes

During the three months ended March 31, 2009, and March 31, 2008, the Company recorded income tax expense for continuing operations of \$23.5 million and \$6.6 million, respectively. On February 20, 2009, the State of California enacted changes in tax laws that are expected to have a beneficial impact on the Company's effective tax rate beginning in 2011. As a result, the Company revalued certain state deferred tax assets and

Table of Contents

liabilities that are expected to reverse after the effective date of the change, and recognized a discrete income tax benefit adjustment of \$4.1 million during the three months ended March 31, 2009.

The Company applies a valuation allowance to certain deferred tax assets when management does not believe that it is more likely than not that they will be realized. These deferred tax assets consist primarily of investments with differing book and tax bases and net operating losses related to certain foreign operations.

As of March 31, 2009, and December 31, 2008, the Company had gross unrecognized tax benefits for income taxes associated with uncertain tax positions of \$32.9 million and \$31.9 million, respectively. As of March 31, 2009, and December 31, 2008, \$32.8 million and \$31.7 million, respectively, of unrecognized tax benefit, including penalties and interest, could affect the Company's tax provision and effective tax rate. During the three months ended March 31, 2009, the Company recorded a net increase in unrecognized tax benefits associated with uncertain tax positions of \$0.2 million.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits as a component of Income tax expense. During the three months ended March 31, 2009, and March 31, 2008, the Company expensed \$0.3 million and \$0.4 million, respectively, for interest and penalties related to income tax liabilities through Income tax expense.

The Company is currently under examination by the California Franchise Tax Board for the years ended December 31, 2004 and December 31, 2005. Because the Company uses historic net operating loss carryforwards and other tax attributes to offset its taxable income in current and future years, such attributes can be adjusted by the IRS and other taxing authorities until the statute closes on the year in which such attribute was utilized. The Company is not currently under examination by significant international taxing jurisdictions. The balance of the gross unrecognized tax benefits is not expected to materially change in the next 12 months.

Note 13. Fair Value of Financial Instruments*Assets and Liabilities Measured at Fair Value on a Recurring Basis*

The following table summarizes the Company's financial assets and liabilities measured at fair value on a recurring basis as of March 31, 2009:

	Total Fair Value as of March 31, 2009	Fair Value Measurement Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(In thousands)				
Assets:				
Investments in money market funds	\$ 661,562	\$ 661,562	\$	\$
Equity investments	230	230		
Total	\$ 661,792	\$ 661,792	\$	\$
Liabilities:				
Foreign currency forward contracts	\$ 2,028	\$	\$ 2,028	\$
Contingent interest derivative on Convertible Debentures	9,375			9,375
Total	\$ 11,403	\$	\$ 2,028	\$ 9,375

The fair value of the Company's investments in certain money market funds approximates their face value. Such instruments are classified as Level 1 and are included in Cash and cash equivalents.

Table of Contents

The fair value of the Company's foreign currency forward contracts is based on foreign currency rates quoted by banks or foreign currency dealers and other public data sources. The Company recorded unrealized gains and losses related to changes in the fair value of its foreign currency forward contracts in Other loss, net. The Company recorded an unrealized loss of \$0.9 million and an unrealized gain of \$0.1 million during the three months ended March 31, 2009 and March 31, 2008, respectively, related to changes in the fair value of its foreign currency forward contracts.

Equity investments relate to the Company's investments in the securities of other public companies. The fair value of these investments is based on the quoted market prices of the underlying shares. Such investments are included in Prepaid expenses and other current assets.

The Company's Convertible Debentures have contingent interest payments that are considered to be an embedded derivative. The Company accounts for the embedded derivative separately from the Convertible Debentures at fair value, with gains and losses reported in Other loss, net. The Company has utilized a valuation model based on simulations of stock prices, interest rates, credit ratings and bond prices to estimate the value of the embedded derivative. The inputs to the model include risk adjusted interest rates, volatility and average yield curve observations and stock price. As several significant inputs are not observable, the overall fair value measurement of the embedded derivative is classified as Level 3.

The following table summarizes the change in the fair value of the Company's Level 3 contingent interest derivative on Convertible Debentures during the three months ended March 31, 2009 (in thousands):

Fair value at December 31, 2008	\$ 10,549
Unrealized gain on contingent interest derivative on Convertible Debentures (1)	(1,174)
Fair value at March 31, 2009	\$ 9,375

(1) Included in Other loss, net.

Assets and Liabilities Measured at Fair Value on a Non-recurring Basis

The Company measures its disposal groups held for sale at the lower of their carrying amount or fair value less cost to sell. The following table summarizes the Company's net assets of those disposal groups held for sale which are measured at fair value as of March 31, 2009:

	Fair Value Measurement Using Significant Unobservable Inputs (Level 3)	Total loss for the three months ended March 31, 2009
(In thousands)		
Net assets of disposal groups held for sale	\$ 378,606	\$ 6,550

The Company has classified the net assets of its disposal groups held for sale as Level 3 due to the lack of observable inputs to determine the fair values of such net assets. The fair value of net assets of disposal groups held for sale is determined considering active bids from potential buyers and also using the income or the market valuation approaches or a combination thereof. Significant unobservable inputs used in the income or market valuation approaches primarily include internal cash flow projections, discount rates and control premium. Discount rates are calculated using mathematical models that utilize observable inputs such as risk-free interest rates and beta, adjusted for company specific characteristics. Control premium is determined based on industry studies.

During the three months ended March 31, 2009, net assets of those disposal groups held for sale which are measured at fair value, with a carrying amount of \$379.1 million, were written down to their fair value of \$378.6

Table of Contents

million less costs to sell of \$6.1 million (or \$372.5 million), resulting in a loss of \$6.6 million which is included in Income (loss) from discontinued operations, net of tax.

Note 14. Contingencies*Legal Proceedings*

On September 7, 2001, NetMoneyIN, an Arizona corporation, filed a complaint alleging patent infringement against VeriSign and several other previously-named defendants in the U.S. District Court for the District of Arizona asserting infringement of certain patents. The complaint alleged that VeriSign's Payflow payment products and services directly infringe certain claims of NetMoneyIN's three patents and requested the Court to enter judgment in favor of NetMoneyIN, a permanent injunction against the defendants' alleged infringing activities, an order requiring defendants to provide an accounting for NetMoneyIN's damages, to pay NetMoneyIN such damages and three times that amount for any willful infringers, and an order awarding NetMoneyIN attorney fees and costs. NetMoneyIN has withdrawn its allegations of infringement of one of the patents and the Court has dismissed with prejudice all claims of infringement of such patent. In its ruling on the claim construction issues, the Court found some of the claims asserted against VeriSign to be valid. NetMoneyIN may file an appeal after a final judgment seeking to overturn this ruling. Only one claim remains in the case. On July 13, 2007, the Court issued an order granting summary judgment in favor of VeriSign based on the Court's finding that such claim is invalid, and denying all other pending dispositive motions. On August 29, 2007, plaintiff filed a Notice of Appeal. On September 19, 2007, the U.S. Court of Appeals for the Federal Circuit docketed the appeal. On October 20, 2008, the appellate court issued a decision that affirmed in part and reversed in part the summary judgment order and remanded the case for further proceedings in the trial court. While the Company cannot predict the outcome of this lawsuit, it believes that the allegations are without merit.

On July 6, 2006, a stockholder derivative complaint (Parnes v. Bidzos, et al., and VeriSign) was filed against VeriSign in the U.S. District Court for the Northern District of California, as a nominal defendant, and certain of its current and former directors and executive officers related to certain historical stock option grants. The complaint seeks unspecified damages on behalf of VeriSign, constructive trust and other equitable relief. Two other derivative actions were filed, one in the U.S. District Court for the Northern District of California (Port Authority v. Bidzos, et al., and VeriSign), and one in the Superior Court of the State of California, Santa Clara County (Port Authority v. Bidzos, et al., and VeriSign) on August 14, 2006. The state court derivative action is stayed pending resolution of the federal actions. The current directors and officers named in this state action are D. James Bidzos, William L. Chenevich, Roger H. Moore and Louis A. Simpson. The Company is named as a nominal defendant in these actions. The federal actions have been consolidated and plaintiffs filed a consolidated complaint on November 20, 2006. The current directors and officers named in this consolidated federal action are D. James Bidzos, William L. Chenevich, Roger H. Moore, Louis A. Simpson and Timothy Tomlinson. Motions to dismiss the consolidated federal court complaint were heard on May 23, 2007. Those motions were granted on September 14, 2007. On November 16, 2007, a second amended shareholder derivative complaint was filed in the federal action wherein the Company was again named as a nominal defendant. By stipulation and Court order, defendants' obligation to respond to the second amended shareholder derivative complaint has been continued pending informal efforts by the parties to resolve the action.

On May 15, 2007, a putative class action (Mykityshyn v. Bidzos, et al., and VeriSign) was filed in Superior Court for the State of California, Santa Clara County, naming the Company and certain current and former officers and directors, alleging false representations and disclosure failures regarding certain historical stock option grants. The plaintiff purports to represent all individuals who owned the Company's common stock between April 3, 2002, and August 9, 2006. The complaint seeks rescission of amendments to the 1998 and 2006 Option Plans and the cancellation of shares added to the 1998 Option Plan. The complaint also seeks to enjoin the Company from granting any stock options and from allowing the exercise of any currently outstanding options granted under the 1998 and 2006 Option Plans. The complaint seeks an unspecified amount of compensatory damages, costs and attorneys fees. The identical case was filed in the Superior Court for the State of California, Santa Clara County under a separate name (Pace. v. Bidzos, et al., and VeriSign) on June 19, 2007,

Table of Contents

and on October 3, 2007 (Mehdian v. Bidzos, et al.). On December 3, 2007, a consolidated complaint was filed in Superior Court for the State of California, Santa Clara County. The current directors and officers named in this consolidated class action are D. James Bidzos, William L. Chenevich, Roger H. Moore, Louis A. Simpson and Timothy Tomlinson. VeriSign and the individual defendants dispute all of these claims. Defendants' collective pleading challenges to the putative consolidated class action complaint were granted with leave to amend in August 2008. By stipulation and Court order, plaintiff's obligation to file an amended consolidated class action complaint has been continued pending informal efforts by the parties to resolve the action.

On November 7, 2006, a judgment was entered against us by a trial court in Terni, Italy, in the matter of Penco v. VeriSign, Inc. in the amount of Euro 5.8 million plus fees arising from a lawsuit brought by a former consultant who claimed to be owed commissions. The Company was granted a stay on execution of the judgment and the Company filed an appeal. On July 9, 2008, the appellate court rejected all of plaintiff's claims. On or about April 2, 2009, plaintiff filed an appeal in the Supreme Court of Cassation, Rome, Italy.

On May 31, 2007, plaintiffs Karen Herbert, et al., on behalf of themselves and a nationwide class of consumers (*Herbert*), filed a complaint against VeriSign, m-Qube, Inc., and other defendants alleging that defendants collectively operate an illegal lottery under the laws of multiple states by allowing viewers of the NBC television show *Deal or No Deal* to incur premium text message charges in order to participate in an interactive television promotion called *Lucky Case Game*. The lawsuit is pending in the U.S. District Court for the Central District of California, Western Division. On June 5, 2007, plaintiffs Cheryl Bentley, et al., on behalf of themselves and a nationwide class of consumers (*Bentley*), filed a complaint against VeriSign, m-Qube, Inc., and other defendants alleging that defendants collectively operate an illegal lottery under the laws of multiple states by allowing viewers of the NBC television show *The Apprentice* to incur premium text message charges in order to participate in an interactive television promotion called *Get Rich With Trump*. The Bentley matter is currently stayed. A motion to dismiss ruling in Herbert is on appeal in the U.S. Court of Appeals for the Ninth Circuit. While the Company cannot predict the outcome of any of these matters, it believes that the allegations in each of them are without merit and intends to vigorously defend against them.

On September 12, 2008, Leon Stambler filed a declaratory judgment complaint against VeriSign in the U.S. District Court for the Eastern District of Texas. The complaint seeks an order permitting Stambler to proceed with patent infringement actions against VeriSign SSL certificate customers in actions in which VeriSign is not a party in view of Stambler's prior unsuccessful action in 2003 against VeriSign on the same patents in which a verdict was returned against Stambler and a judgment was entered thereon. VeriSign has received requests to indemnify certain SSL certificate customers in the patent infringement actions brought by Stambler. While the Company cannot predict the outcome of these proceedings, it believes the allegations against it are without merit and intends to vigorously defend against them.

VeriSign is involved in various other investigations, claims and lawsuits arising in the normal conduct of its business, none of which, in its opinion will have a material effect on its business. The Company cannot assure you that it will prevail in any litigation. Regardless of the outcome, any litigation may require the Company to incur significant litigation expense and may result in significant diversion of management attention.

Note 15. Subsequent Events

On April 10, 2009, the Company sold its International Clearing business.

On May 1, 2009, the Company completed the divestiture transaction of its Communications Services business for cash proceeds of \$226.2 million, after certain initial adjustments to reflect the parties' current estimate of working capital associated with the Communications Services business as of the closing date. The divestiture transaction will be subject to a final adjustment to reflect the actual working capital balances as of the closing date.

On May 5, 2009, the Company sold its RTP Services business.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

You should read the following discussion in conjunction with the interim unaudited Condensed Consolidated Financial Statements and related notes.

Except for historical information, this Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). These forward-looking statements involve risks and uncertainties, including, among other things, statements regarding our anticipated costs and expenses and revenue mix. Forward-looking statements include, among others, those statements including the words expects, anticipates, intends, believes and similar language. Our actual results may differ significantly from those projected in the forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in the section titled Risk Factors in Part II, Item 1A of this Quarterly Report on Form 10-Q. You should carefully review the risks described in other documents we file from time to time with the Securities and Exchange Commission, including the Quarterly Reports on Form 10-Q or Current Reports on Form 8-K that we file in 2009 and our 2008 Form 10-K, which was filed on March 3, 2009, which discuss our business in greater detail. You are cautioned not to place undue reliance on the forward-looking statements, which speak only as of the date of this Quarterly Report on Form 10-Q. We undertake no obligation to publicly release any revisions to the forward-looking statements or reflect events or circumstances after the date of this document.

Overview

We are the trusted provider of Internet infrastructure services for the networked world. We offer a comprehensive spectrum of products and services that help a growing number of organizations and individuals to communicate and conduct commerce with confidence.

We have the following two reportable segments: Internet Infrastructure and Identity Services (3IS) which consists of Naming Services, and Authentication Services comprising of Secure Socket Layer (SSL) Certificate Services and Identity and Authentication Services (IAS); and (2) Other Services which consists of the continuing operations of non-core businesses and legacy products and services from divested businesses. See Note 10, Segment Information, of our Notes to Condensed Consolidated Financial Statements for further information regarding our reportable segments. In our 2008 Form 10-K, we presented VeriSign Japan as a separate component of our 3IS segment. Beginning in fiscal 2009, we have reclassified the results of operations of VeriSign Japan into the results of operations of our Authentication Services which is also a component of our 3IS segment, as VeriSign Japan is a majority-owned subsidiary whose operations primarily consist of SSL Certificate Services and IAS.

Naming Services are the authoritative directory provider of all .com, .net, .cc, .tv, .name and .jobs domain names. SSL Certificate Services enable enterprises and Internet merchants to implement and operate secure networks and websites that utilize SSL protocol, and are often referred to as business authentication. These services provide customers the means to authenticate themselves to their end users and website visitors and to encrypt communications between client browsers and Web servers. IAS includes identity protection services, fraud detection services, managed public key infrastructure (PKI) services, and unified authentication services, and is often referred to as user authentication. These services are intended to help enterprises secure intranets, extranets and other applications and devices, and provide authentication credentials. The Other Services segment consists of the continuing operations of our non-core Pre-pay billing and payment services (Pre-pay) business, as well as legacy products and services from the divested Content Delivery Network (CDN) business. We are in the process of winding down the operations of the Pre-pay business.

During the fourth quarter of 2007, we announced a change to our business strategy to allow management to focus its attention on our core competencies and to make additional resources available to invest in our core

Table of Contents

businesses. The strategy calls for a divestiture or winding down of all the non-core businesses. These businesses are classified as disposal groups held for sale as of March 31, 2009, and their results of operations have been classified as discontinued operations for all periods presented. The continued execution of our divestiture plan is subject to the availability of financing, identification of buyers, and general market conditions, including further developments in the current global economic environment and potential continued deterioration of the credit markets. While we are executing our divestiture plan, we will experience additional risks, including, but not limited to the disruption of our business and the potential loss of key employees; difficulties separating operations, services, products and personnel; the potential damage to relationships with our existing customers; and the delay in completion of transition services. For example, our divestiture plan requires a substantial amount of management, administrative and operational resources. Once our divestiture plan is completed, the scale and scope of our operations will decrease in absolute terms, which we expect will allow our remaining core services to benefit from a more efficient and streamlined operational structure. However, we cannot assure you that we will be able to achieve the full strategic and financial benefits we expect from the divestiture of our non-core businesses and there is no guarantee that the planned divestitures will occur or will not be significantly delayed, all of which may result in future variability in our results of operations. By divesting our non-core businesses, additional resources should be available to invest in our core services that will remain: Naming Services and Authentication Services.

Our Core Services

Our core services consist of our Naming Services and Authentication Services.

Naming Services

As of March 31, 2009, we had approximately 92.4 million domain names registered under the *.com* and *.net* registries, which are our principal registries. The number of domain names registered is largely driven by Internet usage and broadband penetration rates. Although growth in absolute number of registrations remains greatest in mature markets such as the U.S. and Western Europe, growth on an annual percentage basis is expected to be greatest in markets outside of the U.S. and Europe where Internet penetration has demonstrated the greatest potential for growth. We are largely insulated from the risk posed by fluctuations in exchange rates due to the fact that all revenues paid to us for *.com* and *.net* registrations are in U.S. dollars.

Authentication Services

As of March 31, 2009, we had an installed base of SSL certificates of approximately 1.2 million. We currently offer the following SSL Certificate Services: VeriSign[®], GeoTrust[®], and thawte[®] branded certificates. The major factors impacting the growth and performance of our SSL Certificate Services are the penetration and adoption of the Internet, especially through broadband services, the spread of e-commerce, the utilization of electronic means for executing financial transactions (such as credit card payments), and the extent to which advertising through search engines encourages consumers to engage in e-commerce. As a result of the growing impact of the Internet on global commercial transactions, we expect continued revenue growth in our business, primarily in markets outside of the U.S. where e-commerce has the largest growth potential.

As with our SSL Certificate Services, the major factors impacting the growth and performance of our IAS are the penetration and adoption of the Internet, especially through broadband services, the spread of e-commerce, the utilization of electronic means for executing financial transactions (such as credit card payments), and the extent to which advertising through search engines encourages consumers to engage in e-commerce.

From time to time we engage in promotional activities in both our Naming Services and Authentication Services.

Table of Contents

Business Highlights and Trends Three months ended March 31, 2009

We recorded revenues of \$255.0 million in the three months ended March 31, 2009, an increase of 8% compared to the same period last year, resulting from an increase in revenues from both our Naming Services as well as Authentication Services.

We recorded income from continuing operations of \$46.4 million in the three months ended March 31, 2009, compared to income from continuing operations of \$15.6 million in the three months ended March 31, 2008. The increase is primarily due to an increase in revenues, a decrease in operating costs and expenses due to the implementation of strategic cost-saving initiatives and a decrease in restructuring charges.

On January 30, 2009, we received \$85.8 million from The Reserve International Liquidity Fund, Ltd. (the International Fund) and on February 20, 2009, we received \$8.3 million from The Reserve's Primary Fund. (the Primary Fund). As of March 31, 2009, we have an aggregate of \$56.3 million outstanding in the Primary Fund and the International Fund.

On March 2, 2009, we entered into a binding agreement to sell our Communications Services business to Transaction Network Services, Inc. (TNS) for \$230.0 million. On May 1, 2009, the divestiture transaction was completed for cash proceeds of \$226.2 million, after certain initial adjustments to reflect the parties' current estimate of working capital associated with the Communications Services business as of the closing date. The divestiture transaction will be subject to a final adjustment to reflect the actual working capital balances as of the closing date.

Assets Held for Sale and Discontinued Operations

During the three months ended March 31, 2009, we disaggregated our Enterprise and Security Services (ESS) disposal group held for sale as of December 31, 2008, into the following three businesses: (i) Global Security Consulting (GSC), (ii) iDefense Security Intelligence Services (iDefense) and (iii) Managed Security Services (MSS). We decided to retain our iDefense business and, accordingly, reclassified the assets and liabilities related to iDefense as held and used as of March 31, 2009. We also reclassified the historical results of operations of iDefense from discontinued operations to continuing operations as part of Naming Services for all periods presented. See Note 3, Assets Held for Sale and Discontinued Operations, of our Notes to Condensed Consolidated Financial Statements for further information.

As of March 31, 2009, businesses classified as held for sale and presented as discontinued operations are the following:

Communications Services

Our Communications Services business provides communications services, such as Billing and Commerce Services, Connectivity and Interoperability Services and Intelligent Database Services. Our Billing and Commerce Services primarily include our Billing Services, Global Consulting Services for Billing, Real-Time Rating and Payment Services, Real-Time Roaming Services, and Settlement and Exchange Services. Our Connectivity and Interoperability Services primarily include our Signaling System 7 (SS7) Connectivity, Voice and Data Roaming services, and Voice Over Internet Protocol Services. Our Intelligent Database Services primarily include our Number Portability Services, Calling Name Database Services, Line Information Database Services and Toll-free Database Services.

On March 2, 2009, we entered into a binding agreement to sell our Communications Services business to TNS for \$230.0 million. On May 1, 2009, the divestiture transaction was completed for cash proceeds of \$226.2 million, after certain initial adjustments to reflect the parties' current estimate of working capital associated with the Communications Services business as of the closing date. The divestiture transaction will be subject to a final adjustment to reflect the actual working capital balances as of the closing date.

Table of Contents

Content Portal Services

Our CPS business enables a seamless end-to-end solutions business focused on providing best-in-class digital content storefront services. CPS can be used as a content delivery platform for games, ringtones, and other content services. Our CPS business provides services to mobile carriers and media companies primarily located in Canada.

International Clearing

Our International Clearing business enables financial settlement and call data settlement for wireless and wireline carriers. On April 10, 2009, we sold our International Clearing business.

Global Security Consulting

Our GSC business, part of our former ESS disposal group, helps companies understand corporate security requirements, comply with all applicable regulations, identify security vulnerabilities, reduce risk, and meet the security compliance requirements applicable to the particular business and industry.

Managed Security Services

Our MSS business, part of our former ESS disposal group, enables enterprises to effectively monitor and manage their network security infrastructure 24 hours per day, every day of the year while reducing the associated time, expense, and personnel commitments by relying on VeriSign's security platform and experienced security staff.

Messaging and Mobile Media Services

Our Messaging and Mobile Media (MMM) Services business is an industry-leading global provider of short-messaging, multimedia messaging, and mobile content application services. MMM Services enable messages and multimedia content to be sent globally across any wireless operator and mobile device. MMM Services offer the global connectivity, network reliability, and scalability necessary to capitalize on the fast growing global messaging and media content markets.

Real-Time Publisher Services

Our Real-Time Publisher (RTP) Services allows organizations to obtain access to and organize large amounts of constantly updated content, and distribute it, in real time, to enterprises, Web-portal developers, application developers and consumers. RTP Services also make it easier for publishers of all sizes to distribute and track their content feeds, which may improve the reliability and quality of their real-time content. On May 5, 2009, we sold our RTP Services business.

Subsequent Events

On April 10, 2009, we sold our International Clearing business.

On May 1, 2009, we completed the divestiture transaction of our Communications Services business for cash proceeds of \$226.2 million, after certain initial adjustments to reflect the parties' current estimate of working capital associated with the Communications Services business as of the closing date. The divestiture transaction will be subject to a final adjustment to reflect the actual working capital balances as of the closing date.

On May 5, 2009, we sold our RTP Services business.

Table of Contents**Results of Operations**

The following table presents information regarding our results of operations as a percentage of revenues:

	Three Months Ended March 31,	
	2009	2008
Revenues	100%	100%
Costs and expenses		
Cost of revenues	24	25
Sales and marketing	15	21
Research and development	10	11
General and administrative	19	23
Restructuring, impairments and other charges, net	2	7
Amortization of other intangible assets	1	1
Total costs and expenses	71	88
Operating income	29	12
Other loss, net	(1)	(1)
Income from continuing operations before income taxes and loss from unconsolidated entities	28	11
Income tax expense	(9)	(3)
Loss from unconsolidated entities, net of tax		(1)
Income from continuing operations, net of tax	19	7
Income (loss) from discontinued operations, net of tax	7	(10)
Net income (loss)	26	(3)
Less: Net income attributable to noncontrolling interests in subsidiary		
Net income (loss) attributable to VeriSign	26%	(3)%

Revenues

We have two reportable segments: 3IS and Other Services. A comparison of revenues is presented below:

	Three Months Ended March 31,		% Change
	2009	2008	
(Dollars in thousands)			
3IS:			
Naming Services	\$ 148,308	\$ 127,217	17%
Authentication Services	103,904	96,629	8%
Total 3IS	252,212	223,846	13%
Other Services	2,783	11,419	(76)%

Edgar Filing: VERISIGN INC/CA - Form 10-Q

Total revenues	\$ 254,995	\$ 235,265	8%
----------------	------------	------------	----

Table of Contents

The changes in revenues during the three months ended March 31, 2009, are described in the segment discussions that follow.

3IS:*Naming Services*

Revenues related to our Naming Services are derived from registrations for domain names in the *.com*, *.net*, *.cc*, *.tv*, *.name* and *.jobs* domain name registries. Revenues from *.cc*, *.tv*, *.name* and *.jobs* are not significant. For domain names registered with the *.com* and *.net* registries, we receive a fee per annual registration that is fixed pursuant to our agreements with the Internet Corporation for Assigned Names and Numbers (ICANN). Individual customers contract directly with third-party registrars or their resellers, and the third-party registrars in turn register the *.com*, *.net*, *.cc*, *.tv*, *.name* and *.jobs* domain names with VeriSign. Changes in revenues are driven largely by increases in the number of new domain name registrations and the renewal rate for existing registrations, as well as fee increases as permitted under our agreements with ICANN. As of March 31, 2009, we have the contractual right to increase the fees for *.com* domain name registrations up to 7% each year during any two years over the remaining four years of our agreement with ICANN through November 30, 2012. As of March 31, 2009, we have the contractual right to increase the fees for *.net* domain name registrations up to 10% each year during the remaining three years of our agreement with ICANN through September 30, 2011. From time to time, we offer promotional marketing programs for our registrars based upon market conditions and the business environment in which the registrars operate.

The following table compares active domain names ending in *.com* and *.net* managed as part of our Naming Services as of March 31, 2009 and 2008:

	March 31,		%
	2009	2008	Change
Active domain names ending in <i>.com</i> and <i>.net</i>	92.4 million	84.4 million	9%

During the three months ended March 31, 2009, the growth in the number of domain names registered was primarily driven by continued Internet growth and adoption primarily within international markets, new domain name promotion programs, and some domain names being registered for the purpose of on-line advertising in advance of the final implementation of the ICANN consensus policy on use of the Add Grace Period (AGP) for registration deletions. A grace period is a specified number of calendar days following a generic top-level domain registry operation in which the operation may be reversed and a credit may be issued to a Registrar. AGP is typically the five-day period following the initial registration of a domain name. We expect that new name registrations and renewals from customers engaged in the business of registering domain names for the purpose of on-line advertising networks will continue to have a diminishing impact on our domain name base through 2009. During 2008, we started seeing signs of the slowing of growth in some areas of new traditional name registrations due to the current macro-economic environment. We expect that the weakening economic environment may contribute to a continued slowing of growth rates in 2009 for the total worldwide domain name zone as well as for the *.com* and *.net* domain name zones under our management, even as we continue to add to the net names in our domain name zones in absolute terms. We continue to experience growth in targeted international markets where we have focused efforts to develop regions of growth with potential in both our *.com* and *.net* domain name zones over time.

Our Naming Services revenues increased \$21.1 million during the three months ended March 31, 2009, as compared to the same period last year, primarily due to a 9% year-over-year increase in the number of active domain names ending in *.com* and *.net* and increases in our *.com* and *.net* registry fees in October 2008 of 7% and 10%, respectively, to \$6.86 and \$4.23, respectively as per our agreements with ICANN.

Authentication Services

Revenues related to our SSL Certificate Services are derived from licensing and service fees charged to our customers for the issuance of SSL certificates that authenticate their identity to the third parties with whom they

Table of Contents

carry out secured transactions. Revenues in the SSL Certificate Services are related to fees charged per certificate, which are based upon a number of factors, including: (i) the brand name under which the certificate is issued, which determines the level of encryption and rigor of authentication; (ii) the number of servers authenticated, and (iii) the duration of the certification. We generally issue SSL certificates for one, two and three years; however, the majority of our customers tend to commit to shorter certifications. We have historically experienced healthy renewal rates, and have not increased prices for our SSL certificates either during the three months ended March 31, 2009, or during fiscal 2008.

The following table compares the approximate installed base of SSL certificates in our SSL Certificate Services as of March 31, 2009 and 2008:

	March 31,		%
	2009	2008	Change
Installed base of SSL certificates	1,153,000	1,024,000	13%

During the three months ended March 31, 2009, our installed base of SSL certificates from our GeoTrust® and thawte® brands increased at a higher rate than our higher-priced VeriSign® brand and as a result of this shift to lower-priced brands, our average-unit-revenue decreased compared to prior periods. We expect that the number of our SSL certificates issued will continue to increase at a higher rate than the revenues recognized from our SSL Certificate Services due to the continued shift to lower-priced brands. As we have a market share leadership at the high end of the SSL certificates market, our unit growth rate for the high end is limited by the overall segment growth. In the mid and low segments, where our market share is not as strong, we expect to see good growth opportunities for market share gains as these markets are growing faster than the high end market. Our Extended Validation (EV) SSL certificate sales, while still a small portion of our SSL Certificate Services, continue to increase year-over-year. Due to the effect of the economic slowdown, however, EV SSL certificates adoption has slowed as large-scale customers delay their orders. We expect the mainstream adoption of EV SSL certificates will be deferred until we see improvements in the macro-economic environment. The weakening economy is affecting our SSL Certificate Services and, while we expect to experience growth, we expect those growth rates to decline in 2009 compared to 2008.

Revenues related to our IAS are derived from one-time credential sales to customers seeking network services and one-time set-up fees. We also charge an annual service fee based upon the number of individual users authorized by the customer to access its network and a customer support fee. Our managed PKI services are characterized by lower growth rates than other product lines within IAS, reflecting the greater maturity of our managed PKI services. We expect IAS revenues to continue to grow in 2009 primarily from growth in our VeriSign Identity Protection (VIP) services and fraud detection services, but at a lower growth rate than in 2008.

Our Authentication Services revenues increased \$7.3 million in revenues during the three months ended March 31, 2009, as compared to the same period last year, primarily due to a 13% year-over-year increase in the installed base of SSL certificates and increased demand for our unified authentication and identity protection services.

Other Services

Other services revenues are derived from our non-core Pre-pay billing and payment services (Pre-pay) business as well as legacy products and services from divested businesses. We are in the process of winding down the operations of our Pre-pay business.

Other services revenues decreased \$8.6 million during the three months ended March 31, 2009, as compared to the same period last year, primarily due to a decrease in revenues from our Pre-pay business resulting from management's decision to wind down the business, the divestiture of our CDN business in 2008 and termination of revenues from a service agreement with our former Jamba joint ventures.

Table of Contents

Our expectations and trends for our segments are based on what we are observing and can project about the current macro-economic environment. Our outlook is subject to broader changes in the market and could alter significantly over time.

Geographic Revenues

We operate in the United States; Australia, Japan and Asia Pacific (APAC); Europe, the Middle East and Africa (EMEA); and certain other countries.

A comparison of our geographic revenues is presented below:

	Three Months Ended March 31,		% Change
	2009	2008	
	(Dollars in thousands)		
United States	\$ 149,365	\$ 138,278	8%
EMEA	53,006	49,024	8%
APAC	35,685	31,838	12%
Other	16,939	16,125	5%
Total revenues	\$ 254,995	\$ 235,265	8%

Revenues are generally attributed to the country of domicile and the respective regions in which our customers are located.

Revenues from the United States increased \$11.1 million primarily due to increase in revenues from our Naming Services and Authentication Services. Revenues from the EMEA region increased \$4.0 million primarily due to increase in revenues from our Naming Services. Revenues from the APAC region increased \$3.8 million primarily due to increase in revenues from our Authentication Services. Revenues from Other regions increased \$0.8 million primarily due to increase in revenues from our Naming Services and Authentication Services.

Mature markets, such as the U.S. and Western Europe, where broadband and e-commerce have seen strong market penetration, may be expected to see consistent incremental growth reflecting the maturity of these markets. We expect to see larger increases in revenues from other EMEA and APAC countries driven by greater growth in international regions, resulting from greater broadband and Internet penetration and expanding e-commerce as electronic means of payment are increasingly adopted.

Cost of revenues

Cost of revenues consist primarily of costs related to providing digital certificate enrollment and issuance services, billing services, operational costs associated with the delivery of our services, customer support and training, consulting and development services, labor costs to provide security, costs of facilities and computer equipment used in these activities and allocations of indirect costs such as corporate overhead. All allocations of indirect costs are included in continuing operations.

A comparison of cost of revenues is presented below:

	Three Months Ended March 31,		% Change
	2009	2008	
	(Dollars in thousands)		
Cost of revenues	\$ 60,308	\$ 59,485	1%

Table of Contents

Cost of revenues increased \$0.8 million primarily due to increases in registry fees paid to ICANN to maintain domain name registrations and outside consulting costs associated with our Naming Services and telecommunication expenses, partially offset by a decrease in salary and employee benefits expenses. Registry fees paid to ICANN increased \$1.4 million due to an increase in the number of .com and .net domain names registered coupled with an increase in the cost of registry fees effected in the latter half of fiscal 2008 per the ICANN agreement. Outside consulting costs associated with our Naming Services increased \$1.4 million primarily resulting from an increase in revenues from our Naming Services. Telecommunication expenses increased \$1.7 million primarily due to increased spending on capacity for global constellation sites that support our .com and .net registries and an increase in expenses to support our new data centers that became operational in the second half of 2008. Salary and employee benefits expenses, which include stock-based compensation expenses, decreased \$3.4 million primarily due to a reduction in average headcount resulting from the 2008 restructuring plan.

Sales and marketing

Sales and marketing expenses consist primarily of salaries, sales commissions, sales operations and other personnel-related expenses, travel and related expenses, trade shows, costs of lead generation, costs of computer and communications equipment and support services, facilities costs, consulting fees, costs of marketing programs, such as the Internet, television, radio, print and direct mail advertising costs and allocations of indirect costs such as corporate overhead. All allocations of indirect costs are included in continuing operations.

A comparison of sales and marketing expenses is presented below:

	Three Months Ended March 31,		%
	2009	2008	Change
	(Dollars in thousands)		
Sales and marketing	\$ 38,027	\$ 48,583	(22)%
Sales and marketing expenses decreased \$10.6 million primarily due to decreases in salary and employee benefits expenses, contract and professional services expenses, travel expenses and advertising and marketing expenses. Salary and employee benefits expenses, which include stock-based compensation expenses, decreased \$7.5 million primarily due to lower average headcount resulting from the 2008 restructuring plan and the divestiture of our CDN business in April 2008. Advertising and marketing expenses decreased \$1.7 million primarily due to a reduction in corporate sponsored marketing events and trade shows. Travel expenses decreased \$1.6 million primarily due to lower headcount and management's cost-saving initiatives.			

Research and development

Research and development expenses consist primarily of costs related to research and development personnel, including salaries and other personnel-related expenses, consulting fees and the costs of facilities, computer and communications equipment, support services used in service and technology development and allocations of indirect costs such as corporate overhead. All allocations of indirect costs are included in continuing operations.

A comparison of research and development expenses is presented below:

	Three Months Ended March 31,		%
	2009	2008	Change
	(Dollars in thousands)		
Research and development	\$ 24,802	\$ 25,224	(2)%
Research and development expenses decreased \$0.4 million primarily due to a decrease in salary and employee benefits expenses partially offset by an increase in depreciation expenses. Salary and employee			

Table of Contents

benefits expenses, which include stock-based compensation expenses, decreased \$3.3 million primarily due to a reduction in average headcount resulting from the 2008 restructuring plan, the divestiture of our CDN business and the ongoing wind down of our Pre-pay business. Depreciation expenses increased \$1.6 million primarily due to an increase in capitalized projects placed into service during the latter half of 2008.

General and administrative

General and administrative expenses consist primarily of salaries and other personnel-related expenses for our executive, administrative, legal, finance, information technology and human resources personnel, facilities, computer and communications equipment, management information systems, support services, professional services fees, certain tax and license fees, bad debt expense and allocations of indirect costs such as corporate overhead. All allocations of indirect costs are included in continuing operations.

A comparison of general and administrative expenses is presented below:

	Three Months Ended March 31,		% Change
	2009	2008	
General and administrative	\$ 49,148	\$ 54,491	(10)%

General and administrative expenses decreased \$5.3 million primarily due to decreases in salary and employee benefits expenses, and legal expenses, partially offset by an increase in contractual professional services. Salary and employee benefits expenses, which include stock-based compensation expenses, decreased \$5.8 million primarily due to a reduction in average headcount resulting from the 2008 restructuring plan. Legal expenses decreased \$2.0 million primarily due to a reduction in litigation expenses. Contract and professional services expenses increased \$3.2 million primarily due to an increase in external consulting services related to accounting, income taxes and internal audit.

Restructuring charges

A comparison of restructuring charges is presented below:

	Three Months Ended March 31,	
	2009	2008
Restructuring charges for continuing operations	\$ 4,775	\$ 16,261
Restructuring (reversals) charges for discontinued operations	(404)	10,204
Total restructuring charges	\$ 4,371	\$ 26,465

As part of our divestiture strategy, we initiated a restructuring plan in the first quarter of 2008 (2008 Restructuring Plan) which includes workforce reductions, abandonment of excess facilities and other exit costs. The restructuring charges in the table above are substantially related to the 2008 Restructuring Plan. Through March 31, 2009, we recorded \$74.0 million in restructuring charges, inclusive of amounts for discontinued operations, under our 2008 Restructuring Plan.

Under our 2008 Restructuring Plan, we notified certain employees of their termination and recognized total consolidated expense relating to severance and benefits costs of \$3.2 million and \$25.6 million during the three months ended March 31, 2009 and 2008, respectively, inclusive of amounts for discontinued operations.

As part of the 2008 Restructuring Plan, we anticipate recording additional charges related to our workforce reduction, excess facilities and other exit costs through 2009. While the estimate of these charges is not yet finalized, the total amount and timing of these charges will depend upon the nature, timing, and extent of these future actions.

Table of Contents***Amortization of other intangible assets***

A comparison of amortization of other intangible assets is presented below:

	Three Months Ended March 31,	
	2009	2008
	(In thousands)	
Amortization of other intangible assets	\$ 3,221	\$ 2,638

Amortization of other intangible assets for continuing operations increased \$0.6 million primarily due to additional amortization as a result of the reclassification of other intangible assets related to iDefense as held and used during the three months ended March 31, 2009.

Other loss, net

Other loss, net, consists primarily of interest earned on our cash, cash equivalents, and investments, interest expense related to our borrowings, net gains or losses on the sale and impairment of investments, net gains or losses on the divestiture of businesses, realized and unrealized gains and losses on the contingent interest derivative on the Convertible Debentures, income from transition services agreements, and the net effect of foreign currency gains and losses. The net effect of foreign currency gains and losses is included in Other, net, in the table below.

A comparison of other loss, net, is presented below:

	Three Months Ended March 31,	
	2009	2008
	(In thousands)	
Interest income	\$ 1,443	\$ 8,295
Interest expense	(11,805)	(10,921)
Net loss (gain) on sale and impairment of investments	(45)	55
Net gain (loss) on divestiture of businesses	909	(1,173)
Unrealized gain on contingent interest derivative on convertible debentures	1,174	1,838
Income from transition services agreements	782	
Other, net	3,249	(1,733)
Total other loss, net	\$ (4,293)	\$ (3,639)

Other loss, net, increased \$0.7 million primarily due to a decrease in interest income that resulted from lower average invested balances during the three months ended March 31, 2009, partially offset by \$3.3 million received from Certicom Corporation (Certicom) due to the termination of the acquisition agreement entered into with Certicom during the three months ended March 31, 2009.

Income taxes

During the three months ended March 31, 2009, and March 31, 2008, we recorded income tax expense for continuing operations of \$23.5 million and \$6.6 million, respectively. The primary increase in income tax expense for continuing operations during the three months ended March 31, 2009, compared to the three months ended March 31, 2008, was related to the geographic mix of income offset by a discrete tax benefit related to a change in California law. On February 20, 2009, the State of California enacted changes in tax laws that are expected to have a beneficial impact on our effective tax rate beginning in 2011. As a result, we revalued certain state deferred tax assets and liabilities that are expected to reverse after the effective date of the change, and recognized a discrete income tax benefit adjustment of \$4.1 million during the three months ended March 31, 2009.

Table of Contents***Loss from unconsolidated entities, net of tax***

Loss from unconsolidated entities, net of tax, represents the net loss recognized from the Jamba joint ventures entered into with Fox Entertainment (Fox), a subsidiary of News Corporation. On October 6, 2008, we sold our remaining 49% ownership interest in the Jamba joint ventures to Fox.

	Three Months Ended March 31, 2009 2008 (In thousands)	
Loss from unconsolidated entities, net of tax	\$	\$ (1,761)
<i>Income (loss) from discontinued operations, net of tax</i>		

As of March 31, 2009, businesses classified as held for sale and presented as discontinued operations included the following: Communications Services, CPS, GSC, International Clearing, Messaging and Mobile Media Services, MSS and RTP Services. Businesses that have been divested in 2008, and whose results of operations are reflected as discontinued operations, include the following: Digital Brand Management Services, Post-pay, Communications Consulting, EMEA Mobile Media, and Self-Care and Analytics.

The following table presents the revenues and the components of Income (loss) from discontinued operations, net of tax:

	Three Months Ended March 31, 2009 2008 (In thousands)	
Revenues	\$ 102,654	\$ 158,211
Income (loss) before income taxes	\$ 22,892	\$ (5,421)
Income tax (expense) benefit	(7,976)	5,301
Income (loss) from discontinued operations	14,916	(120)
Gain (loss) on sale of discontinued operations and estimated (losses) reversals on assets held for sale, before income taxes	3,984	(25,981)
Income tax (expense) benefit	(274)	2,412
Gain (loss) on sale of discontinued operations	3,710	(23,569)
Total income (loss) from discontinued operations, net of tax	\$ 18,626	\$ (23,689)

We recorded income from discontinued operations, net of tax, during the three months ended March 31, 2009, primarily due to a decrease in operating costs and expenses related to the disposal groups held for sale. We recorded gains on disposal including net reversals of estimated losses on disposal, of \$4.0 million during the three months ended March 31, 2009, upon changes in the carrying values of certain disposal groups. We incurred losses from discontinued operations, net of tax, during the three months ended March 31, 2008, primarily due to \$26.0 million in estimated losses on assets held for sale recorded during that period. See Note 3, Assets Held for Sale and Discontinued Operations, of our Notes to Condensed Consolidated Financial Statements for further information on our discontinued operations.

The continued execution of our divestiture plan is subject to the availability of financing, identification of buyers, and general market conditions, including further developments in the current economic environment and potential continued deterioration of the credit markets.

Table of Contents***Noncontrolling interest in subsidiary***

Noncontrolling interest in subsidiary represents the portion of net income belonging to minority shareholders of our consolidated subsidiary, VeriSign Japan.

A comparison of Noncontrolling interest in subsidiary is presented below:

	Three Months Ended March 31,	
	2009	2008
	(In thousands)	
Noncontrolling interest in subsidiary	\$ (495)	\$ (906)

Liquidity and Capital Resources

	March 31, 2009	December 31, 2008
	(In thousands)	
Cash and cash equivalents	\$ 942,386	\$ 789,068
Restricted cash	1,859	1,858
Total	\$ 944,245	\$ 790,926

As of March 31, 2009, our principal source of liquidity was \$944.2 million of cash and cash equivalents and restricted cash.

In summary, our cash flows were as follows:

	Three Months Ended March 31,	
	2009	2008
	(In thousands)	
Net cash provided by operating activities	\$ 38,438	\$ 69,510
Net cash provided by (used in) investing activities	78,129	(10,889)
Net cash provided by (used in) financing activities	43,065	(960,594)
Effect of exchange rate changes on cash and cash equivalents	(6,314)	8,276
Net increase (decrease) in cash and cash equivalents	\$ 153,318	\$ (893,697)

Cash flows from operating activities

Our largest source of operating cash flows is cash collections from our customers. Our primary uses of cash from operating activities are for personnel related expenditures, and other general operating expenses, as well as payments related to taxes and facilities.

Net cash provided by operations decreased during the three months ended March 31, 2009, compared to the same period last year, primarily due to a decrease in cash received from customers resulting from a decrease in consolidated revenues, inclusive of revenues from discontinued operations, coupled with the timing of receipts from customers. The decrease in cash receipts was partially offset by a decrease in cash payments to suppliers and employees primarily resulting from lower headcount during the three months ended March 31, 2009.

Cash flows from investing activities

Edgar Filing: VERISIGN INC/CA - Form 10-Q

The changes in cash flows from investing activities primarily relate to the divestiture of businesses, timing of purchases, maturities and sales of investments, and purchases of property and equipment.

Table of Contents

Net cash provided by investing activities increased during the three months ended March 31, 2009, compared to the same period last year, primarily due to distributions from the Primary Fund and the International Fund, proceeds received from acquisition termination fees, and a decrease in purchases of property and equipment. The increase in cash receipts was partially offset by a decrease in proceeds received from divestiture of businesses.

Cash flows from financing activities

The changes in cash flows from financing activities primarily relate to borrowings and payments under debt obligations as well as stock repurchase and stock option exercise activities.

Net cash provided by financing activities increased during the three months ended March 31, 2009, compared to the same period last year. The increase is primarily due to decreased stock repurchases, partially offset by a decrease in proceeds received from issuance of common stock from stock option exercises and employee stock purchase plans.

Other Liquidity and Capital Resources Information

Our credit facility is available for cash borrowings up to a maximum of \$500.0 million and for the issuance of letters of credit up to a maximum limit of \$50.0 million. As of March 31, 2009, we had no outstanding borrowings under our credit facility and we had utilized \$1.4 million for outstanding letters of credit.

Future operating lease payments include payments related to leases on excess facilities included in restructuring. If sublease rates decrease in these markets, or if it takes longer than expected to sublease these facilities, the actual lease expense relating to our excess facilities under our restructuring plans could exceed this estimate by an additional \$3.7 million over the next eight years. Cash payments totaling \$10.9 million related to the abandonment of excess facilities under our restructuring plans will be paid over the next eight years. See Note 4, Restructuring Charges, of our Notes to Condensed Consolidated Financial Statements.

We believe existing cash and cash equivalents, together with funds generated from operations should be sufficient to meet our working capital, capital expenditure requirements and to service our debt for the next 12 months. We regularly assess our cash management approach and activities in view of our current and potential future needs.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no significant changes in our market risk exposures during the three months ended March 31, 2009.

ITEM 4. CONTROLS AND PROCEDURES

Based on our management's evaluation, with the participation of our Chief Executive Officer, on an interim basis (our principal executive officer) and our acting Chief Financial Officer (our principal financial officer), as of the end of the period covered by this Quarterly Report on Form 10-Q, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Table of Contents

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the three months ended March 31, 2009, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Inherent Limitations of Disclosure Controls and Internal Control over Financial Reporting

Because of its inherent limitations, our internal control over financial reporting may not prevent material errors or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. The continued effectiveness of our internal control over financial reporting is subject to risks, including that the control may become inadequate because of changes in conditions or that the degree of compliance with our policies or procedures may deteriorate.

Table of Contents

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The information set forth under Legal Proceedings in Note 14, Contingencies, of our Notes to Condensed Consolidated Financial Statements in Part I, Item 1, of this Quarterly Report on Form 10-Q is incorporated herein by reference.

ITEM 1A. RISK FACTORS

In addition to other information in this Quarterly Report on Form 10-Q, the following risk factors should be carefully considered in evaluating us and our business because these factors currently have a significant impact or may have a significant impact on our business, operating results or financial condition. Actual results could differ materially from those projected in the forward-looking statements contained in this Quarterly Report on Form 10-Q as a result of the risk factors discussed below and elsewhere in this Quarterly Report on Form 10-Q and in other filings we make with the SEC.

Risks relating to our business

Our operating results may fluctuate and our future revenues and profitability are uncertain.

Our operating results have varied in the past and may fluctuate significantly in the future as a result of a variety of factors, many of which are outside our control. These factors include the following:

the uncertainties, costs and risks related to our proposed divestiture plan, including any income statement charges we incur in connection therewith and any further delays we may encounter;

the current global economic environment as well as its impact on e-commerce, financial services, and the telecommunications and Internet industries;

the long sales and implementation cycles for, and potentially large order sizes of, some of our security services and the timing and execution of individual customer contracts;

volume of new domain name registrations and customer renewals in our Naming Services business;

changes in the payment structures of on-line advertising network providers and compensation levels, as well as policies proposed and implemented by ICANN, which could impact the number of domain name registrations;

the mix of all our services sold during a period;

our success in marketing and market acceptance of our services by our existing customers and by new customers;

changes in marketing expenses related to promoting and distributing our services;

Edgar Filing: VERISIGN INC/CA - Form 10-Q

customer renewal rates and turnover of customers of our services;

potential attacks by hackers, which could threaten the perceived reliability of our products and services;

continued development of our direct and indirect distribution channels for our products and services, both in the U.S. and abroad;

changes in the level of spending for information technology-related products and services by enterprise customers;

the impact of price changes in our products and services or our competitors' products and services; and

the impact of decisions by channel partners and resellers to offer competing products or modify their marketing practices.

Table of Contents

Our operating expenses may increase. If an increase in our expenses is not accompanied by a corresponding increase in our revenues, our operating results will suffer, particularly as revenues from some of our services are recognized ratably over the term of the service, rather than immediately when the customer pays for them, unlike our sales and marketing expenditures, which are expensed in full when incurred.

Due to all of the above factors, our revenues and operating results are difficult to forecast. Therefore, we believe that period-to-period comparisons of our operating results will not necessarily be meaningful, and you should not rely upon them as an indication of future performance. Also, operating results may fall below our expectations and the expectations of securities analysts or investors in one or more future periods. If this were to occur, the market price of our common stock would likely decline.

Our operating results have been adversely affected by the current economic downturn, unfavorable market and economic conditions.

The current global economic downturn may have a significant negative impact on demand for our services and our ability to conduct our business. As the economic downturn continues to deepen and spread overseas, these conditions have also negatively impacted our foreign operations. The economic downturn has or may negatively impact, among other things:

current and future demand for our services, including decreases as a result of reduced spending on information technology and communications by our customers;

our liquidity;

our ability to service our debt, to obtain financing or assume new debt obligations;

our ability to execute on any stock repurchase plans;

the price of our common stock;

the ability of our suppliers to continue to fill our orders;

our customers' continued growth and development of their businesses;

our ability to obtain payment for outstanding debts owed to us by our customers or other parties with whom we do business; and

price competition for our products and services.

In addition, to the extent that the economic downturn impacts specific industry sectors in which many of our customers are concentrated, that may further negatively impact our business. If the economic and market conditions in the U.S. and globally do not improve, or if they further deteriorate, we may experience material adverse impacts on our business, operating results and financial position as a consequence of the above factors or otherwise.

Our diversified business structure may result in significant fluctuations of our financial results.

The successful operation of our business depends on numerous factors, many of which are not entirely under our control, including, but not limited to, the following:

the use of the Internet and other IP networks for e-commerce and communications;

the extent to which digital certificates and domain names are used for e-commerce or telecommunications;

growth in demand for our services;

the competition for any of our services;

the perceived security of e-commerce and telecommunications over the Internet and other IP networks;

Table of Contents

the perceived security of our services, technology, infrastructure and practices;

the loss of customers through industry consolidation or customer decisions to deploy in-house or competitor technology and services;

our continued ability to maintain our current, and enter into additional, strategic relationships;

our ability to successfully market our services to new and existing customers;

our success in attracting, integrating, training, retaining and motivating qualified personnel;

our response to competitive developments;

the successful introduction of new products and services;

seasonal fluctuations in business activity; and

the successful introduction of enhancements to our services to address new technologies and standards and changing market conditions.

Our international operations subject our business to additional economic risks that could have an adverse impact on our revenues and business.

As of March 31, 2009, we had 942 or 29% of our employees outside the U.S. Expansion into international markets has required and will continue to require significant management attention and resources. We may also need to tailor some of our services for a particular market and to enter into international distribution and operating relationships. We have limited experience in localizing our services and in developing international distribution or operating relationships. We may not succeed in expanding our services into international markets. Failure to do so could harm our business. Moreover, local laws and customs in many countries differ significantly from those in the U.S. In many foreign countries, particularly in those with developing economies, it is common for others to engage in business practices that are prohibited by our internal policies and procedures or U.S. regulations applicable to us. There can be no assurance that all of our employees, contractors and agents will not take actions in violation of them. Violations of laws or key control policies by our employees, contractors or agents could result in financial reporting problems, fines, penalties, or prohibition on the importation or exportation of our products and could have a material adverse effect on our business. In addition, we face risks inherent in doing business on an international basis, including, among others:

competition with foreign companies or other domestic companies entering the foreign markets in which we operate;

differing and uncertain regulatory requirements;

legal uncertainty regarding liability, enforcing our contracts and compliance with foreign laws;

export and import restrictions on cryptographic technology and products incorporating that technology;

tariffs and other trade barriers and restrictions;

difficulties in staffing and managing foreign operations;

longer sales and payment cycles;

problems in collecting accounts receivable;

currency fluctuations, as our international revenues are not always denominated in U.S. dollars;

difficulty in repatriating profits to the U.S.;

potential problems associated with adapting our services to technical conditions existing in different countries;

the necessity of developing foreign language portals and products for our services;

Table of Contents

difficulty of authenticating customer information for digital certificates and other purposes;

political instability;

failure of foreign laws to protect our U.S. proprietary rights adequately;

more stringent privacy policies in some foreign countries;

additional vulnerability from terrorist groups targeting U.S. interests abroad;

seasonal reductions in business activity; and

potentially adverse tax consequences.

We are exposed to risks faced by financial institutions.

We have entered into hedging transactions with counterparties in the financial services industry which have been adversely impacted by the current economic environment. Defaults by, and even rumors or questions about the solvency of, certain financial institutions and the financial services industry generally have led to market-wide liquidity problems and could lead to losses or defaults by other institutions. The hedging transactions we have entered into expose us to credit risk in the event of default by one of our counterparties. Despite the risk control measures we have in place, a default by one of our counterparties, or liquidity problems in the financial services industry in general, could have a material adverse effect on our business, financial condition and results of operations.

Governmental regulation and the application of existing laws may slow business growth, increase our costs of doing business and create potential liability.

Application of new and existing laws and regulations to the Internet and wireless communications industry can be unclear. The costs of complying or failing to comply with these laws and regulations could limit our ability to operate in our current markets, expose us to compliance costs and substantial liability and result in costly and time-consuming litigation.

Foreign, federal or state laws could have an adverse impact on our business. For example, laws designed to restrict the on-line distribution of certain materials deemed harmful to children, on-line gambling, cybersecurity and cyber squatting may impose significant additional costs on our business or subject us to additional liabilities.

Due to the nature of the Internet, it is possible that the governments of other states and foreign countries might attempt to regulate Internet transmissions or prosecute us for violations of their laws. We might unintentionally violate such laws, such laws may be modified and new laws may be enacted in the future. Any such developments could increase the costs of regulatory compliance for us, force us to change our business practices or otherwise materially harm our business.

While we believe we currently have effective internal control over financial reporting, we may identify a material weakness in our internal controls over financial reporting that could cause investors to lose confidence in the reliability of our financial statements and result in a decrease in the value of our securities.

We will continue to evaluate, upgrade and enhance our internal controls. Because of inherent limitations, our internal control over financial reporting may not prevent or detect misstatements, errors or omissions, including those caused by human error, the circumvention of overriding controls, the violation of company policies or practices (whether negligent or willful) or fraud, and any projections of any evaluation of effectiveness of internal controls to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with our policies or procedures may deteriorate. We cannot be certain in future periods that other control deficiencies that may constitute one or more

Table of Contents

significant deficiencies or material weaknesses in our internal control over financial reporting will not be identified. If we fail to maintain the adequacy of our internal controls, including any failure to implement or difficulty in implementing required new or improved controls, our business and results of operations could be harmed, the results of operations we report could be subject to adjustments, we could fail to be able to provide reasonable assurance as to our financial results or the effectiveness of our internal controls or meet our reporting obligations and there could be a material adverse effect on our business.

We have expended significant resources in connection with our efforts to comply with the requirements of the Sarbanes-Oxley Act. In future periods, we will likely continue to expend substantial amounts in connection with these compliance efforts and with ongoing evaluation of, and improvements and enhancements to, our internal control over financial reporting. These expenditures may make it difficult for us to control or reduce the growth of our general and administrative and other expenses, which could adversely affect our results of operations.

Issues arising from our agreements with ICANN and the DOC could harm our registry business.

The U.S. Department of Commerce (DOC) has adopted a plan for the phased transition of its responsibilities for the domain name system (DNS) to ICANN. As part of this transition, we have entered into agreements with ICANN and the DOC as the exclusive registry of domain names within the .com and .net generic top-level domains (gTLDs) and with ICANN with respect to being the exclusive registry for the .name gTLD.

We face risks arising from our agreements with ICANN and the DOC and from the planned transition of the DOC s responsibilities for the DNS to ICANN, including the following:

ICANN could adopt or promote policies, procedures or programs that are unfavorable to us as the registry operator of the .com, .net and .name gTLDs, that are inconsistent with our current or future plans, or that affect our competitive position;

the DOC could not renew its agreement with ICANN, in which case there would no longer be DOC oversight;

ICANN s relationship with the DOC could terminate and another entity could exercise oversight of ICANN;

the U.S. Government could refuse to transfer certain responsibilities for DNS administration to ICANN due to security, stability or other reasons, resulting in fragmentation or other instability in DNS administration;

under certain circumstances, ICANN could terminate one or more of our agreements to be the registry for the .com, .net or .name gTLDs and the DOC could terminate the .com Registry Agreement, in which case terminations of the .com or .net Registry Agreements could have a material adverse impact on our business;

one or more of the Registry Agreements may not renew when they expire in 2011 (.net) and 2012 (.com and .name), in which case it could have a material adverse effect on our business;

the DOC s or ICANN s interpretation of provisions of our agreements with either of them could differ from ours;

the DOC could revoke its recognition of ICANN, as a result of which the DOC could take the place of ICANN for purposes of our agreements with ICANN, and could take actions that are harmful to us and could disrupt current or future business plans; and

our registry business could face legal or other challenges resulting from our activities or the activities of registrars and registrants.

Table of Contents

Challenges to ongoing privatization of Internet administration could harm our Naming Services business.

Risks we face from challenges by third parties, including governmental authorities in the U.S. and other countries, to our role in the ongoing privatization of the Internet include:

legal, regulatory or other challenges could be brought, including challenges to the agreements governing our relationship with the DOC or ICANN, or to the legal authority underlying the roles and actions of the DOC, ICANN or us;

the U.S. Congress could take action that is unfavorable to us;

ICANN could fail to maintain its role, potentially resulting in instability in DNS administration; and

some governments and governmental authorities outside the U.S. have in the past disagreed, and may in the future disagree, with the actions, policies or programs of ICANN, the U.S. Government and us relating to the DNS. These foreign governments or governmental authorities may take actions or adopt policies or programs that are harmful to our business.

As a result of these and other risks, it may be difficult for us to introduce new services in our domain name registry business and we could also be subject to additional restrictions on how this business is conducted.

We may encounter difficulties renewing irrevocable letters of credit provided by customers of our Naming Services business as security for payment of registration fees if we are forced to draw down on such letters of credit to collect payment.

With respect to our Naming Services business, some registrars who register domain names on behalf of their customers utilize irrevocable letters of credit to secure payment for the registration of domain names. In the event that we are unable to obtain payment for the registration of these domain names, we may draw down on the letter of credit. In some cases, withdrawals may be made until we utilize the full amount of the letter of credit, at which point the registrar's ability to process new billable transactions and their agreement may be terminated. If registrars are unwilling or unable to provide new letters of credit once we have drawn down the full amount, we may need to reevaluate our approach for security for payment of registration fees.

We rely on third parties who maintain and control root zone servers and route Internet communications.

We currently administer and operate only two of the thirteen root zone servers. The others are administered and operated by independent operators on a non-regulated basis. Root zone servers are name servers that contain authoritative data for the very top of the DNS hierarchy. These servers have the software and data needed to locate name servers that contain authoritative data for the top-level domains. Because of the importance to the functioning of the Internet of these root zone servers, our Naming Services business could be harmed if these independent operators fail to maintain these servers properly or abandon these servers, which would place additional capacity demands on the two root zone servers we operate.

Further, our Naming Services business could be harmed if any of these volunteer operators fails to include or provide accessibility to the data that it maintains in the root zone servers that it controls. In the event and to the extent that ICANN is authorized to set policy with regard to an authoritative root zone server system, as provided in our registry agreement with ICANN, it is required to ensure that the authoritative root will point to the top-level domain zone servers designated by us. If ICANN does not do this, our business could be harmed.

Changes in customer behavior, either as a result of evolving technologies or user practices, may impact the demand for domain names.

Currently, Internet users navigate to a website either by directly typing in its domain name or through the use of a search engine. If browser or search technologies were to change significantly or if user behavior were to shift away from direct navigation, the demand for domain names could decrease.

Table of Contents

Changes in the level of spending on on-line advertising and/or the way that on-line and pay-per-click advertisers compensate owners of websites could impact the demand for domain names.

Some domain name registrars and registrants seek to generate revenue through advertising on their websites; changes in the way these registrars and registrants are compensated (including changes in methodologies and metrics) by advertisers and advertisement placement networks, such as Google and Yahoo!, could adversely affect the market for those domain names favored by such registrars and registrants resulting in a decrease in demand and/or the renewal rate for those domain names. As a result of the general economic downturn, spending on on-line advertising and marketing may not increase or may be reduced, which in turn may result in a further decline in the demand for those domain names.

Services offered by our 3IS segment rely on the continued integrity of public key cryptography technology that may be compromised or proven obsolete over time.

Services offered by our 3IS segment depend on public key cryptography technology. With public key cryptography technology, a user is given a public key and a private key, both of which are required to perform encryption and decryption operations. The security afforded by this technology depends on the integrity of a user's private key and ensuring that it is not lost, stolen or otherwise compromised. The integrity of private keys also depends in part on the application of specific mathematical principles known as factoring. This integrity is predicated on the assumption that the factoring of large numbers into their prime number components is difficult. Should an easy factoring method or other method be developed, the security of encryption products utilizing public key cryptography technology may require significant modifications or would be reduced or eliminated. Furthermore, any significant advance in techniques for attacking cryptographic systems could also render some or all of our existing PKI services obsolete or unmarketable. If improved techniques for attacking cryptographic systems were ever developed, we would likely have to reissue digital certificates to some or all of our customers, which could damage our reputation and brand or otherwise harm our business. In the past there have been public announcements of the successful attack upon cryptographic keys of certain kinds and lengths and of the potential misappropriation of private keys and other activation data. This type of publicity could also hurt the public perception as to the safety of the public key cryptography technology included in our digital certificates. This negative public perception could harm our business.

Undetected or unknown defects in our services could harm our business and future operating results.

Services as complex as those we offer or develop frequently contain undetected defects or errors. Despite testing, defects or errors may occur in our existing or new services, which could result in loss of or delay in revenues, loss of market share, failure to achieve market acceptance, diversion of development resources, injury to our reputation, tort or warranty claims, increased insurance costs or increased service and warranty costs, any of which could harm our business. The performance of our services could have unforeseen or unknown adverse effects on the networks over which they are delivered as well as on third-party applications and services that utilize our services, which could result in legal claims against us, harming our business. Furthermore, we often provide implementation, customization, consulting and other technical services in connection with the implementation and ongoing maintenance of our services, which typically involves working with sophisticated software, computing and communications systems. Our failure or inability to meet customer expectations in a timely manner could also result in loss of or delay in revenues, loss of market share, failure to achieve market acceptance, injury to our reputation and increased costs.

If we encounter system interruptions, we could be exposed to liability and our reputation and business could suffer.

We depend on the uninterrupted operation of our various systems, secure data centers and other computer and communication networks. Our systems and operations are vulnerable to damage or interruption from:

power loss, transmission cable cuts and other telecommunications failures;

Table of Contents

damage or interruption caused by fire, earthquake, and other natural disasters;

attack by hackers;

computer viruses or software defects; and

physical or electronic break-ins, sabotage, intentional acts of vandalism, terrorist attacks and other events beyond our control.

Most of our systems are located at, and most of our customer information is stored in, our facilities in Mountain View, California and Kawasaki, Japan (both of which are susceptible to earthquakes); Providence, Rhode Island; Dulles, Virginia; Lacey, Washington; Overland Park, Kansas; Melbourne, Australia; London, England; Berlin, Germany; and Fribourg, Switzerland. Any damage or failure that causes interruptions in any of these facilities or our other computer and communications systems could materially harm our business. Although we carry insurance for property damage and business interruption, we do not carry insurance or financial reserves for interruptions or potential losses arising from earthquakes or terrorism.

In addition, our ability to issue SSL certificates, our domain name registry services and certain of our services depend on the efficient operation of the Internet connections from customers to our secure data centers and from our customers to the shared registration system. These connections depend upon the efficient operation of Internet service providers and Internet backbone service providers, all of which have had periodic operational problems or experienced outages in the past.

A failure in the operation of our domain name zone servers, the domain name root zone servers, or other events could result in the deletion of one or more domain names for the Internet for a period of time. A failure in the operation of our shared registration system could result in the inability of one or more other registrars to register and maintain domain names for a period of time. A failure in the operation or update of the master database that we maintain could result in the deletion of one or more top-level domains from the Internet and the discontinuation of second-level domain names in those top-level domains for a period of time. Any of these problems or outages could decrease customer satisfaction, harming our business or resulting in adverse publicity that could adversely affect the market's perception of the security of e-commerce and communications over IP networks as well as of the security or reliability of our services.

If we experience security breaches, we could be exposed to liability and our reputation and business could suffer.

We retain certain confidential customer information in our secure data centers and various registration systems. It is critical to our business strategy that our facilities and infrastructure remain secure and are perceived by the marketplace to be secure. Our domain name registry operations also depend on our ability to maintain our computer and telecommunications equipment in effective working order and to reasonably protect our systems against interruption, and potentially depend on protection by other registrars in the shared registration system. The root zone servers and top-level domain name zone servers that we operate are critical hardware to our registry services operations. Therefore, we may have to expend significant time and money to maintain or increase the security of our facilities and infrastructure. Despite our security measures, our infrastructure may be vulnerable to physical break-ins, computer viruses, attacks by hackers or similar disruptive problems. It is possible that we may have to expend additional financial and other resources to address such problems. Any physical or electronic break-in or other security breach or compromise of the information stored at our secure data centers and domain name registration systems may jeopardize the security of information stored on our premises or in the computer systems and networks of our customers. In such an event, we could face significant liability, customers could be reluctant to use our services and we could be at risk for loss of various security and standards based compliance certifications needed for certain of our businesses. Such an occurrence could also result in adverse publicity and therefore adversely affect the market's perception of the security of e-commerce and communications over IP networks as well as of the security or reliability of our services.

Table of Contents

The reliance of our Messaging and Mobile Media Services on third-party communications infrastructure, hardware and software exposes us to a variety of risks we cannot control.

The success of our Messaging and Mobile Media Services depends on our network infrastructure, including the capacity leased from telecommunications suppliers. In particular, we rely on AT&T, Sprint Nextel Corporation and other telecommunications providers for leased long-haul and local loop transmission capacity. These companies provide the dedicated links that connect our network components to each other and to our customers.

We have no control over the operation, quality or maintenance of a significant portion of that infrastructure or whether or not those third parties will upgrade or improve their equipment. We depend on these companies to maintain the operational integrity of our connections. If one or more of these companies is unable or unwilling to supply or expand its levels of service to us in the future, our operations could be severely interrupted. In addition, rapid changes in the telecommunications industry have led to the merging of many companies. These mergers may cause the availability, pricing and quality of the services we use to vary and could cause the length of time it takes to deliver the services that we use to increase significantly.

We rely on our intellectual property, and any failure by us to protect, or any misappropriation of, our intellectual property could harm our business.

Our success depends in part on our internally developed technologies and intellectual property. Despite our precautions, it may be possible for a third party to copy or otherwise obtain and use our trade secrets or other forms of our intellectual property without authorization. Furthermore, the laws of foreign countries may not protect our proprietary rights in those countries to the same extent U.S. law protects these rights in the U.S. In addition, it is possible that others may independently develop substantially equivalent intellectual property. If we do not effectively protect our intellectual property, our business could suffer. Additionally, we have filed patent applications with respect to certain of our technology in the U.S. Patent and Trademark Office and patent offices outside the U.S. Patents may not be awarded with respect to these applications and even if such patents are awarded, such patents may not provide us with sufficient protection of our intellectual property. In the future, we may have to resort to litigation to enforce our intellectual property rights, to protect our trade secrets or to determine the validity and scope of the proprietary rights of others. This type of litigation, regardless of its outcome, could result in substantial costs and diversion of management attention and technical resources.

We also license third-party technology that is used in our products and services to perform key functions. These third-party technology licenses may not continue to be available to us on commercially reasonable terms or at all. Our business would suffer if we lost the rights to use certain of these technologies. Additionally, another party could claim that the licensed software infringes a patent or other proprietary right. Litigation between the licensor and a third-party or between us and a third-party could lead to royalty obligations for which we are not indemnified or for which indemnification is insufficient, or we may not be able to obtain any additional license on commercially reasonable terms or at all. The loss of or our inability to obtain or maintain, any of these technology licenses could harm our business.

We rely on the strength of our VeriSign brand to differentiate ourselves in the marketing of our products, particularly with respect to our SSL certificates. Dilution of our brand could harm our business.

We could become subject to claims of infringement of intellectual property of others, which could be costly to defend and could harm our business.

Claims relating to infringement of intellectual property of others or other similar claims have been made against us in the past and could be made against us in the future. It is possible that we could become subject to additional claims for infringement of the intellectual property of third parties. Any claims, with or without merit, could be time consuming, result in costly litigation and diversion of technical and management personnel

Table of Contents

attention, cause delays or require us to develop non-infringing technology or enter into royalty or licensing agreements. Royalty or licensing agreements, if required, may not be available on acceptable terms or at all. If a successful claim of infringement were made against us, we could be required to pay damages or have portions of our business enjoined. If we could not develop non-infringing technology or license the infringed or similar technology on a timely and cost-effective basis, our business could be harmed.

In addition, legal standards relating to the validity, enforceability, and scope of protection of intellectual property rights in Internet-related businesses are uncertain and still evolving. Because of the growth of the Internet and Internet-related businesses, patent applications are continuously being filed in connection with Internet-related technology. There is a significant number of U.S. and foreign patents and patent applications in our areas of interest, and we believe that there has been, and is likely to continue to be, significant litigation in the industry regarding patent and other intellectual property rights.

We must establish and maintain strategic, channel and other relationships.

One of our significant business strategies has been to enter into strategic or other similar collaborative relationships in order to reach a larger customer base than we could reach through our direct sales and marketing efforts. We may need to enter into additional relationships to execute our business plan. We may not be able to enter into additional, or maintain our existing, strategic relationships on commercially reasonable terms, and, in addition, our ability to enter into or maintain strategic relationships may be impacted by our divestiture plan. If we fail to enter into additional relationships, we would have to devote substantially more resources to the distribution, sale and marketing of our information and security services than we would otherwise.

Our success in obtaining results from these relationships will depend both on the ultimate success of the other parties to these relationships and on the ability of these parties to market our services successfully.

Furthermore, our ability to achieve future growth also depends on our ability to continue to establish direct seller channels and to develop multiple distribution channels. In addition, any changes by our channel partners to their existing marketing strategies could have a material adverse effect on our business. Failure of one or more of our strategic or channel relationships to result in the development and maintenance of a market for our services could harm our business. If we are unable to maintain our relationships or to enter into additional relationships, this could harm our business.

Failure of VeriSign Affiliates to follow our security and trust practices or to maintain the privacy or security of confidential customer information could have an adverse impact on our revenues and business.

We have licensed to VeriSign Affiliates our Processing Center platform, which is designed to replicate our own secure data centers and allows the VeriSign Affiliate to offer back-end processing of PKI services for enterprises in the regions in which the Affiliate operates. The VeriSign Processing Center platform provides a VeriSign Affiliate with the knowledge and technology to offer PKI services similar to those offered by us. It is critical to our business strategy that the facilities and infrastructure used in issuing and marketing digital certificates remain secure and we are perceived by the marketplace to be secure. Although we provide the VeriSign Affiliate with training in security and trust practices, network management and customer service and support, these practices are performed by the VeriSign Affiliate and are outside of our control. Any failure of a VeriSign Affiliate to maintain the privacy or security of confidential customer information could result in negative publicity and therefore adversely affect the market's perception of the security of our services as well as the security of e-commerce and telecommunication over IP networks generally.

Our VeriSign Identity Protection services depend in part on the acceptance of our services.

The future growth of our VeriSign Identity Protection (VIP) services, which form a part of IAS, depends in part on the commercial success and acceptance, and reliability of our VIP services. Our VIP services will

Table of Contents

suffer if our target customers do not use our VIP services. Our future financial performance will also depend on the successful development, introduction and customer acceptance of new and enhanced VIP services. We are not certain that our target customers will choose our VIP services or continue to use our VIP services once adopted.

Many of our target markets are evolving, and if these markets fail to develop or if our products and services are not widely accepted in these markets, our business could suffer.

We target our 3IS segment at the market for trusted and secure e-commerce and communications over IP and other networks. Our Naming Services business is developing managed services in emerging markets that involve naming and directory services other than registry and related infrastructure services. These emerging markets are rapidly evolving, may never gain wide acceptance and may not grow. Even if these markets grow, our services may not be widely accepted. Accordingly, the demand for our services in these markets is very uncertain. The factors that may affect market acceptance of our services in these markets include the following:

market acceptance of products and services based upon technologies other than those we use;

public perception of the security of our technologies and of IP and other networks;

the introduction and consumer acceptance of new generations of mobile handsets;

demand for supply chain information services, including acceptance of the EPCglobal Network;

the ability of the Internet infrastructure to accommodate increased levels of usage; and

government regulations affecting e-commerce and telecommunications over IP networks.

If the market for e-commerce and telecommunications over IP and other networks does not grow or these services are not widely accepted in the market, our business would be materially harmed.

We depend on key personnel to manage our business effectively and may not be successful in attracting and retaining such personnel.

We depend on the performance of our senior management team and other key employees, including key employees in the businesses we intend to divest. Our success also depends on our ability to attract, integrate, train, retain (particularly with respect to key employees in the businesses we intend to divest) and motivate these individuals and additional highly skilled technical and sales and marketing personnel, both in the U.S. and abroad.

All of the members of our senior management team and other key employees are at-will employees and we do not maintain key person life insurance for any of our senior management team members or key employees. The loss of the services of any of our senior management team or other key employees, including key employees in the businesses we intend to divest, or failure to attract, integrate, train, retain and motivate additional key employees could harm our business.

We have experienced changes in our senior management team, and we may face difficulty in attracting and retaining permanent, qualified leadership personnel.

During the second quarter of 2008, we appointed D. James Bidzos, our Chairman of the Board, as President, Chief Executive Officer and Executive Chairman, on an interim basis, and Brian G. Robins, our Senior Vice President, Finance, to acting Chief Financial Officer. In the first quarter of 2009, we appointed Mark D. McLaughlin as our President and Chief Operating Officer. The search for permanent replacements to fill remaining positions may be a distraction to our interim executives, senior management, business partners, and customers, and, although we believe we have taken appropriate measures to address the impact of these changes, there is a risk that such changes may impair our ability to

meet our business objectives. During the period of

Table of Contents

transition following the appointment of an executive, there may be operational inefficiencies as our new management team becomes familiar with our business and operations. We cannot provide you with any assurance that the search for any permanent replacements will be successful, and if we cannot recruit (or experience delays in recruiting) qualified permanent replacements for any such positions, our business may suffer.

Compliance with rules and regulations concerning corporate governance is costly and could harm our business.

Ongoing compliance with the corporate governance requirements of the Sarbanes-Oxley Act and the NASDAQ Stock Market has increased the scope, complexity and cost of our corporate governance, reporting and disclosure practices, and our compliance efforts have required significant management attention. It is more difficult and more expensive for us to obtain director and officer liability insurance, and we have been required to accept reduced coverage and incur substantially higher costs to obtain the reduced level of coverage. Further, our board members, chief executive officer and chief financial officer face an increased risk of personal liability in connection with the performance of their duties. As a result, we may have difficulty attracting and retaining qualified board members and executive officers, which could harm our business.

We have anti-takeover protections that may discourage, delay or prevent a change in control that could benefit our stockholders.

Our amended and restated Certificate of Incorporation and Bylaws contain provisions that could make it more difficult for a third party to acquire us without the consent of our Board of Directors. These provisions include:

our stockholders may take action only at a duly called meeting and not by written consent;

special meetings of our stockholders may be called only by the chief executive officer, the president or our Board of Directors, and cannot be called by our stockholders;

our board must be given advance notice regarding stockholder-sponsored proposals for consideration at annual meetings and for stockholder nominations for the election of directors;

vacancies on our Board of Directors can be filled until the next annual meeting of stockholders by majority vote of the members of the Corporate Governance and Nominating Committee or a majority of directors then in office if no such committee exists or a sole remaining director; and

our Board of Directors has the ability to designate the terms of and issue new series of preferred stock without stockholder approval. VeriSign has also adopted a stockholder rights plan that may discourage, delay or prevent a change of control or the acquisition of a substantial bloc of our common stock and may make any future unsolicited acquisition attempt more difficult. Under the rights plan:

The rights will generally become exercisable if a person or group acquires 20% or more of VeriSign's outstanding common stock (unless such transaction is approved by our Board of Directors) and thus becomes an acquiring person.

Each right, when exercisable, will entitle the holder, other than the acquiring person, to acquire shares of VeriSign's common stock at a 50% discount to the then-prevailing market price.

As a result, the rights plan will cause substantial dilution to a person or group that becomes an acquiring person on terms that our Board of Directors does not believe are in our best interests and those of our stockholders and may discourage, delay or prevent a merger or acquisition that stockholders may consider favorable, including transactions in which stockholders might otherwise receive a premium for their shares.

Table of Contents

In addition, Section 203 of the General Corporation Law of Delaware prohibits a publicly held Delaware corporation from engaging in a business combination with an interested stockholder, generally a person which together with its affiliates owns or within the last three years has owned 15% or more of our voting stock, for a period of three years after the date of the transaction in which the person became an interested stockholder, unless in the same transaction the interested stockholder acquired 85% ownership of our voting stock (excluding certain shares) or the business combination is approved in a prescribed manner. Section 203 therefore may impact the ability of an acquirer to complete an acquisition of us after a successful tender offer and accordingly could discourage, delay or prevent an acquirer from making an unsolicited offer without the approval of our Board of Directors.

Changes in, or interpretations of, tax rules and regulations may adversely affect our effective tax rates.

We are subject to income taxes in both the U.S. and numerous foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. We are subject to audit by various tax authorities. Although we believe our tax estimates are reasonable, the final determination of tax audits and any related litigation could be materially different than that which is reflected in historical income tax provisions and accruals. Should additional taxes be assessed as a result of an audit or litigation, an adverse effect on our income tax provision and net income in the period or periods for which that determination is made could result.

Risks relating to the competitive environment in which we operate***The business environment is highly competitive and, if we do not compete effectively, we may suffer price reductions, reduced gross margins and loss of market share.***

General: Several of our current and potential competitors have longer operating histories and significantly greater financial, technical, marketing and other resources than we do and therefore may be able to respond more quickly than we can to new or changing opportunities, technologies, standards and customer requirements. Many of these competitors also have broader and more established distribution channels that may be used to deliver competing products or services directly to customers through bundling or other means. If such competitors were to bundle competing products or services for their customers, the demand for our products and services might be substantially reduced and the ability to distribute our products successfully and the utilization of our services would be substantially diminished.

New technologies and the expansion of existing technologies may increase competitive pressure. We cannot assure you that competing technologies developed by others or the emergence of new industry standards will not adversely affect our competitive position or render our security services or technologies noncompetitive or obsolete. In addition, our markets are characterized by announcements of collaborative relationships involving our competitors. The existence or announcement of any such relationships could adversely affect our ability to attract and retain customers. As a result of the foregoing and other factors, we may not be able to compete effectively with current or future competitors, and competitive pressures that we face could materially harm our business.

Competition in Naming Services: We face competition in the domain name registry space from other gTLD and ccTLD registries that are competing for the business of entities and individuals that are seeking to establish a Web presence, including registries offering services related to the .info, .org, .mobi, .biz, .pro, .aero, .museum and .coop gTLDs and registries offering services related to ccTLDs. ICANN currently has registry agreements with 14 registries for the operation of 16 gTLDs. In addition, there are over 240 ccTLD registries.

We also face competition from service providers that offer outsourced domain name registration, resolutions and other DNS services to organizations that require a reliable and scalable infrastructure. Among the competitors are UltraDNS, NeuLevel and Afilias.

Table of Contents

In addition, to the extent end-users navigate using search engines as opposed to direct navigation, we may face competition from search engine operators such as Google and Yahoo!.

Additional competition to our business may arise from the upcoming introduction of new Internationalized Domain Name TLDs (IDN TLDs) and new gTLDs by ICANN. These new domain extensions could become available by the fourth quarter of 2009 in the form of translations or transliterated versions of the .com and .net TLD and by the first half of 2010 in the form of new gTLDs. We do not yet know the impact, if any, these new domain extensions may have on our business, but the increase of name availability in the marketplace could introduce new choices for end-users as well as create end-user confusion around brand preference, which could have a material adverse effect on our business. While we may apply for one or more of these new domain extensions, there is no certainty that we will ultimately be successful and even if we are successful in obtaining one or more of these new domain extensions, there is no guarantee that such extensions will be any more successful than the domain name extensions obtained by our competitors.

Competition in Authentication Services: Our SSL Certificate Services and IAS are targeted at the rapidly evolving market for Internet security services, including network security, authentication and validation, which enable secure e-commerce and telecommunications over wireline and wireless IP networks. The market for SSL Certificate Services and IAS is intensely competitive, subject to rapid change and significantly affected by new product and service introductions and other market activities of industry participants.

Principal competitors generally fall within one of the following categories: (1) companies such as RSA, the security division of EMC, and Entrust Technologies, which offer software applications and related digital certificate products that customers operate themselves; (2) companies such as Digital Signature Trust Company (a subsidiary of IdenTrust Inc.) that primarily offer digital certificate and certification authority-related services; (3) companies focused on providing a bundled offering of products and services; and (4) companies offering competing SSL certificate and other security services, including domain name registrars. We also experience competition from a number of smaller companies, and we believe that our primary long-term competitors may not yet have entered the market. Furthermore, AOL and Microsoft have introduced software products that enable the issuance and management of digital certificates, and we believe that other companies could introduce similar products.

In addition, browser companies that embed our interface technologies or otherwise feature them as a provider of digital certificate products and services in their Web browsers or on their websites could also promote products and services of our competitors or charge us substantial fees for promotions in the future.

Competition in Managed Security Services: Security services and product firms, telecommunications companies, and consulting companies or professional services groups of other companies with Internet expertise are current or potential competitors to our managed security services. These companies include large systems integrators and consulting firms, such as Accenture and IBM Global Services, security product companies, such as Symantec, and telecommunications providers, such as Verizon Business and BT Counterpane.

Competition in Messaging and Mobile Media Services: The market for messaging and mobile media services is extremely competitive. Competitors include developers of content and entertainment products and services in a variety of domestic and international markets, such as Infospace, Itouch, Arvato mobile, Monsternob, and Motricity. This business also faces competition from mobile network operators such as Cingular, Verizon Wireless, Sprint Nextel Corporation, T-Mobile, Vodafone, O2, Orange, E-Plus and Telefónica, as well as Internet portal operators such as Yahoo!, AOL, T-Online and Google. Additional competitors are handset manufacturers such as Nokia and software providers such as Microsoft and Apple. As the market for wireless data, including information and entertainment data, matures, new categories of competitors, such as mobile phone companies, broadcasters, music publishers, other content providers or others have begun to develop competing products or services.

Table of Contents

Our inability to react to changes in our industry and successfully introduce new products and services could harm our business.

The Internet and communications network services industries are characterized by rapid technological change and frequent new product and service announcements which require us continually to improve the performance, features and reliability of our services, particularly in response to competitive offerings. In order to remain competitive and retain our market share, we must continually improve our access technology and software, support the latest transmission technologies, and adapt our products and services to changing market conditions and customer preferences. We cannot assure you that we will be able to adapt to these challenges or respond successfully or in a cost effective way to adequately meet them. Our failure to do so would adversely affect our ability to compete and retain customers or market share.

Risks related to our divestiture plan

We may face difficulties and incur costs associated with our divestiture plan and our financial condition, results of operations or cash flows could be adversely affected.

Until the divestitures are complete, we will experience additional risks, including, but not limited to the disruption of our business and the potential loss of key employees; difficulties separating operations, services, products and personnel; and the potential damage to relationships with our existing customers.

For example, our divestiture plan requires a substantial amount of management, administrative and operational resources. These demands may distract our employees from the day-to-day operation of VeriSign's core businesses.

There is also risk that we may incur additional charges associated with an impairment of a portion of goodwill and other intangible assets due to changes in market conditions for acquisitions and dispositions. Under generally accepted accounting principles, we are required to evaluate goodwill for impairment on an annual basis, and to re-evaluate goodwill and to evaluate other intangible assets as events or circumstances indicate that such assets may be impaired. Further, we are likely to incur income statement charges to complete the divestiture plan, which could be material.

If we are unable to successfully address any of these risks for future dispositions, our financial condition, results of operations or cash flows could be adversely affected.

We may be unable to achieve some or all of the benefits we expect from the divestiture plan and such benefits may be delayed or not occur at all.

We may not be able to achieve the full strategic and financial benefits we expect from the divestiture of VeriSign's non-core businesses. For example, we have encountered and may continue to encounter difficulties identifying buyers for certain businesses or be unable to sell businesses identified for divestiture, and there can be no assurance that analysts and investors will place greater value on VeriSign following the divestiture plan than the value placed on us pre-divestiture.

In addition, there is no guarantee that the planned divestitures will occur or will not be further delayed. Completion of the divestiture plan is subject to a number of factors, including:

business, political and economic environment in the U.S. and in other countries in which the Company currently operates;

governmental regulations and policies, actions and approvals of regulatory bodies;

the operating performance of the Company or the businesses or assets offered for sale;

identification of buyers and negotiation of sale agreements;

Table of Contents

the willingness of buyers to assume certain liabilities associated with the businesses or assets offered for sale;

our ability to identify and separate the assets associated with the businesses offered for sale from the core businesses we choose to retain; and

the availability of financing or other sources of funding to buyers under reasonable terms and conditions.

In the third quarter of 2008, management determined that due in large part to the downturn in the economy and the condition of the credit markets, the divestiture plan would take longer than originally expected. Buyers continue to be more conservative, which makes it more difficult to consummate dispositions and has required some modifications to our original approach to individual dispositions. For example, some potential buyers have asked for more detailed financial information than we originally anticipated, which has increased the time and expense required to conduct the sale process. In addition, the condition in the credit markets has limited sources of financing for potential purchasers, which has affected the number of proposals we have received and prospective buyers' ability to borrow the funds necessary to complete the purchase of our businesses being divested which has impacted the number of divestitures we have been successful in completing. These developments are having an adverse effect on the timing and our chances of completing the divestiture plan.

We may be adversely affected under certain covenants in our credit facility.

The Credit Agreement governing our \$500.0 million credit facility (the "Facility") contains a negative covenant that limits our ability to sell assets and freely deploy the proceeds we receive from such sales, subject to exceptions based on the size and timing of the sales. Therefore, depending on the size and timing of any dispositions that we decide to pursue as part of our divestiture plan, we may find it necessary to seek an amendment to our Credit Agreement or to structure the sales in a manner that complies with the covenant but that is potentially less favorable to the Company than would otherwise be the case. There can be no guarantee that we will be successful in obtaining any such amendment on acceptable terms or at all or be able to structure potential dispositions accordingly.

We continue to be responsible for a portion of our contingent and other corporate liabilities following the divestiture of certain businesses.

Under the agreements reached with buyers for certain businesses divested under the divestiture plan, we remain liable for certain contingent and corporate liabilities. In addition, it is possible that we may enter into agreements with similar contingent and corporate liabilities in connection with future businesses we may divest.

There is a possibility that we will incur costs and expenses associated with the management of these contingent and other corporate liabilities. These contingent and other corporate liabilities could potentially relate to consolidated securities litigation, as well as actions brought by third parties as a result of the divestiture plan. Where responsibility for such liabilities is to be shared with the buyer, it is possible that the buyer or another party may be in default for payments for which they are responsible, obligating us to pay amounts in excess of our agreed-upon share of the assumed obligations.

Following the divestiture of certain businesses, our ability to compete in certain market sectors is restricted.

Under the agreements reached with buyers for certain businesses divested under the divestiture plan, we are restricted from competing, either directly or indirectly, with those businesses or from entering certain market sectors for a defined period of time pursuant to negotiated non-compete arrangements. We expect that the Company will be subject to similar restrictions with respect to other businesses as they are divested.

Table of Contents

Risks related to our securities

We have a considerable number of common shares subject to future issuance.

As of March 31, 2009, we had one billion authorized common shares, of which 192.8 million shares were outstanding. In addition, of our authorized common shares, 37.1 million common shares were reserved for issuance pursuant to outstanding employee stock option and employee stock purchase plans (Equity Plans), and 36.4 million shares were reserved for issuance upon conversion of the Convertible Debentures. As a result, we keep substantial amounts of our common stock available for issuance upon exercise or settlement of equity awards outstanding under our Equity Plans and/or the conversion of Convertible Debentures into our common stock. Issuance of all or a large portion of such shares would be dilutive to existing security holders, could adversely affect the prevailing market price of our common stock and could impair our ability to raise additional capital through the sale of equity securities.

Our financial condition and results of operations could be adversely affected if we do not effectively manage our liabilities.

As a result of the sale of the Convertible Debentures, we have a substantial amount of long term debt outstanding. In addition to the Convertible Debentures, we have a Facility with a borrowing capacity of \$500.0 million. As of March 31, 2009, we had no outstanding borrowings under the Facility and we had utilized \$1.4 million of the \$50.0 million limit for outstanding letters of credit. The availability of borrowing capacity under the Facility allows us immediate access to working capital if we identify opportunities for the use of this cash. Our maintenance of substantial levels of debt could adversely affect our flexibility to take advantage of corporate opportunities and could adversely affect our financial condition and results of operations.

We may not have the ability to repurchase the Convertible Debentures in cash upon the occurrence of a fundamental change, or to pay cash upon the conversion of Convertible Debentures, as required by the indenture governing the Convertible Debentures.

Holders of our outstanding Convertible Debentures will have the right to require us to repurchase the Convertible Debentures upon the occurrence of a fundamental change as defined in the Indenture dated as of August 20, 2007 (the Indenture) between the Company and U.S. Bank National Association, as Trustee. Although we currently intend to settle the principal amount of the Convertible Debentures in cash as required under the Indenture, we may not have sufficient funds to repurchase the Convertible Debentures in cash or have the ability to arrange necessary financing on acceptable terms or at all. In addition, upon conversion of the Convertible Debentures, we will be required to make cash payments to the holders of the Convertible Debentures equal to the lesser of the principal amount of the Convertible Debentures being converted and the conversion value (as defined in the Indenture) of those debentures. Such payments could be significant, and we may not have sufficient funds to make them at such time.

A fundamental change may also constitute an event of default or prepayment under, or result in the acceleration of the maturity of, our then-existing indebtedness. Our ability to repurchase the Convertible Debentures in cash or make any other required payments may be limited by law or the terms of other agreements relating to our indebtedness outstanding at the time. Our failure to repurchase the Convertible Debentures or pay cash in respect of conversions when required would result in an event of default with respect to the Convertible Debentures.

While we currently have the intent and ability to settle the principal in cash, if we conclude that we no longer have the ability, in the future, we will be required to change our accounting policy for earnings per share from the treasury stock method to the if-converted method.

Table of Contents

There may be potential new accounting pronouncements or regulatory rulings which may have an impact on our future financial position and results of operations.

For example, in May 2008, the FASB issued FSP APB 14-1, *Accounting for Convertible Debt Instruments that May be Settled in Cash upon Conversion (Including Partial Cash Settlement)*, which has significantly affected the accounting for convertible debt, including our Convertible Debentures. The FSP specifies that issuers of convertible debt instruments should separately account for the liability (debt) and equity (conversion option) components of such instruments in a manner that reflects the issuer's non-convertible debt borrowing rate. In applying this FSP, the FASB emphasized that the FSP will be applied to the terms of the instruments as they existed for the time periods they existed, therefore, the application of the FSP will be applied retroactively to all periods presented. The FSP is effective for fiscal years beginning after December 15, 2008, and has been adopted by us in the first quarter of fiscal 2009. Although FSP APB 14-1 had, and will have, no impact on our actual past or future cash flows, it requires us to record a significant amount of non-cash interest expense for fiscal years 2007 through 2037 as the debt discount is amortized, assuming the Convertible Debentures will be settled upon maturity in 2037, associated with a significant reduction in our Convertible Debentures balance along with a corresponding increase in our stockholders' equity. In addition, if our Convertible Debentures are redeemed or converted prior to maturity, any unamortized debt discount will result in a loss on extinguishment. As a result of adoption, there has been a significant effect to our historical and current net income and earnings per share. Additional new accounting pronouncements could also, when adopted, have a material adverse impact on future or past results of operations, which could in turn materially adversely affect the trading price of our common stock.

Certain other risks

The following risks are primarily related to businesses we expect to divest as part of our divestiture plan. Until our divestiture plan is complete, any one or more of these risks could have a significant impact on our financial condition, results of operations or cash flows. In addition, the materialization of any one or more of these risks could affect the timing of future dispositions, the price at which we dispose our businesses or whether we are able to dispose our businesses at all.

Our Messaging and Mobile Media Services business depends on agreements with many different third parties, including wireless carriers. If these agreements are terminated or not renewed, or are amended to require us to change the way our Messaging and Mobile Media Services are offered to customers, our business could be harmed.

Our Messaging and Mobile Media Services business depends on our ability to enter into and maintain agreements with many different third parties including wireless carriers and other mobile phone service providers, upon which this business is highly dependent for billing its customers.

These agreements are typically for a short term, or are otherwise terminable upon short notice, and in the case of agreements with carriers, other mobile phone service providers and content developers, are nonexclusive. If these third parties reduce their commitment to us, terminate their agreements with us or enter into similar agreements with our competitors, our Messaging and Mobile Media Services business could be materially harmed.
