UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

Quarterly Report under Section 13 or 15(d) of the Securities Exchange Act of 1934
For the Quarterly Period Ended September 30, 2009

Or

Transition Report Under Section 13 or 15(d) of the Securities Exchange Act of 1934
For the Transition Period From _____ to _____

Commission File Number 0-7406

PrimeEnergy Corporation

(Exact name of registrant as specified in its charter)

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

Delaware
(State or other jurisdiction of

84-0637348
(IRS employer

incorporation or organization)

identification number)

One Landmark Square, Stamford, Connecticut 06901

(Address of principal executive offices)

(203) 358-5700

(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filings required for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer and smaller reporting company in Rule 12-B of the Exchange Act.

Large Accelerated Filer

Accelerated Filer

Non-Accelerated Filer (Do not check if a smaller reporting company)

Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of each class of the Registrant's Common Stock as of November 10, 2009 was: Common Stock, \$0.10 par value, 3,034,697 shares.

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

September 30, 2009

(1) Interim Financial Statements:

The accompanying consolidated financial statements of PrimeEnergy Corporation ("PEC"), with the exception of the consolidated balance sheet at December 31, 2008, have not been audited by independent public accountants. In the opinion of management, the accompanying financial statements reflect all adjustments necessary to present fairly our financial position at September 30, 2009, net income (loss), comprehensive income (loss) and cash flows for the applicable nine and three months ended September 30, 2009 and 2008. All such adjustments are of a normal recurring nature. Certain amounts presented in prior period financial statements have been reclassified for consistency with current period presentation. The results for interim periods are not necessarily indicative of annual results. Subsequent events have been evaluated through November 12, 2009, which is also the date that the financial statements were issued.

Recently Adopted Accounting Standards

In July 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Codification (the Codification), "Generally Accepted Accounting Principles," establishing the accounting standards codification and the hierarchy of generally accepted accounting principles (GAAP) as the sole source of authoritative non-governmental U.S. GAAP. The Codification was not intended to change U.S. GAAP; however, references to various accounting pronouncements and literature will now differ from what was previously being used in practice. Authoritative literature is now referenced by topic rather than by type of standard. As of July 1, 2009, the FASB no longer issues Statements, Interpretations, Staff Positions or EITF Abstracts. The FASB now communicates new accounting standards by issuing an Accounting Standards Update (ASU). All guidance in the codification has an equal level of authority. The Codification is effective for financial statements that cover interim and annual periods ending after September 15, 2009, and supersedes all accounting standards in U.S. GAAP, aside from those issued by the SEC. There was no impact on the Company's financial position, results of operations or cash flows as a result of the Codification.

On January 1, 2009, we adopted the guidance "Non-controlling Interests in Consolidated Financial Statements" to establish accounting and reporting standards for the non-controlling interest in a subsidiary and for the deconsolidation of a subsidiary. This guidance defines a non-controlling interest, previously called a minority interest, as the portion of equity in a subsidiary not attributable, directly or indirectly, to a parent. The guidance requires, among other items, that a non-controlling interest be included in the consolidated statement of financial position within equity separate from the parent's equity; consolidated net income to be reported at amounts inclusive of both the parent's and non-controlling interest's shares and, separately, the amounts of consolidated net income attributable to the parent and non-controlling interest all on the consolidated income statement; and if a subsidiary is deconsolidated, any retained non-controlling equity investment in the former subsidiary be measured at fair value and a gain or loss be recognized in net income based on such fair value. The adoption of the guidance resulted in changes to our presentation for non-controlling interests but did not have a material impact on the Company's results of operations and financial condition. Certain prior period balances have been restated to reflect the changes required by the guidance.

In August 2009, the FASB issued guidance on the measurement of liabilities at fair value. The guidance provides clarification that in circumstances in which a quoted market price in an active market for an identical liability is not available, an entity is required to measure fair value using a valuation technique that uses the quoted price of an identical liability when traded as an asset or, if unavailable, quoted prices for similar liabilities or similar assets when traded as assets. If none of this information is available, an entity should use a valuation technique in accordance with existing fair valuation principles. There was no impact on the Company's financial position, results of operations or cash flows as a result of the adoption of this guidance.

In April 2009, the FASB amended guidance regarding determining fair value when the volume and level of activity for an asset or liability has significantly decreased and identifying transactions that are not orderly. If an entity determines that either the volume or level of activity for an asset or liability has significantly decreased from normal conditions, or that price quotations or observable inputs are not associated with orderly transactions, increased analysis and management judgment will

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

September 30, 2009

be required to estimate fair value. The objective in fair value measurement remains unchanged from what is prescribed in the guidance and should be reflective of the current exit price. Disclosures in interim and annual periods must include inputs and valuation techniques used to measure fair value, along with any changes in valuation techniques and related inputs during the period. In addition, disclosures for debt and equity securities must be provided on a more disaggregated basis. These amendments became effective for interim and annual reporting periods ending after June 15, 2009 and did not have a material impact on the Company's financial position, results of operations or cash flows.

In April 2009, the FASB amended *Financial Instruments* to require disclosures about fair value of financial instruments for publicly traded companies for both interim and annual periods. Historically, these disclosures were only required annually. The interim disclosures are intended to provide financial statement users with more timely and transparent information about the effects of current market conditions on an entity's financial instruments that are not otherwise reported at fair value. These amendments became effective for interim reporting periods ending after June 15, 2009. Comparative disclosures are only required for periods ending after the initial adoption. There was no material impact on the Company's financial position, results of operations or cash flows as a result of the adoption.

In April 2009, the FASB amended the other-than-temporary impairment guidance for debt securities in *Investments-Debt and Equity Securities* to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. There were no amendments made to the recognition and measurement guidance for equity securities, but a new method of recognizing and reporting for debt securities was established. Disclosure requirements for impaired debt and equity securities have been expanded significantly and are now required quarterly, as well as annually. These amendments became effective for interim and annual reporting periods ending after June 15, 2009 and did not have a material impact on the Company's financial position, results of operations or cash flows. Comparative disclosures are only required for periods ending after the initial adoption.

In June 2009, the FASB amended *Subsequent Events* to require entities to disclose the date through which they have evaluated subsequent events and whether the date corresponds with the release of their financial statements. In addition, a new concept of financial statements being available to be issued was introduced. These amendments became effective for interim and annual periods ending after June 15, 2009 and did not have any impact on the Company's financial position, results of operations or cash flows.

Recently Issued Accounting Pronouncements

In June 2009, the FASB issued changes to *Transfers and Servicing* which will require entities to provide more information about sales of securitized financial assets and similar transactions, particularly if the seller retains some risk to the assets. These changes will be effective at the beginning of the first fiscal year beginning after November 15, 2009. As the Company does not anticipate having any of these types of transactions in the near future, these changes are not expected to have any impact on its financial position, results of operations or cash flows.

In December 2008, the SEC issued Release No. 33-8995, *Modernization of Oil and Gas Reporting*, which amends the oil and gas disclosures for oil and gas producers contained in Regulations S-K and S-X, as well as adding a section to Regulation S-K (Subpart 1200) to codify the revised disclosure requirements in Securities Act Industry Guide 2, which is being phased out. The goal of Release No. 33-8995 is to provide investors with a more meaningful and comprehensive understanding of oil and gas reserves. Energy companies affected by Release No. 33-8995 will be required to price proved oil and gas reserves using the un-weighted arithmetic average of the price on the first day of each month within the 12-month period prior to the end of the reporting period, unless prices are defined by contractual arrangements, excluding escalations based on future conditions. SEC Release No. 33-8995 is effective beginning January 1, 2010. The Company is currently evaluating what impact Release No. 33-8995 may have on its financial position, results of operations or cash flows.

(2) Significant Acquisitions, Dispositions and Property Activity

The Company makes an annual offer to repurchase the interests of the partners and trust unit holders in certain of the Partnerships and Trusts. The Company purchased such interests in an amount totaling \$149,000 for the nine months ended September 30, 2009 and \$481,000 for the year ended December 31, 2008.

(3) Restricted Cash and Cash Equivalents:

Restricted cash and cash equivalents include \$5,111,000 and \$8,027,000 at September 30, 2009 and December 31, 2008, respectively, of cash primarily pertaining to undistributed revenue payments. There were corresponding accounts payable recorded at September 30, 2009 and December 31, 2008 for these liabilities.

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

September 30, 2009

(6) Long-Term Bank Debt:

The Company has credit facilities totaling \$360 million, consisting of a \$200 million credit facility through Guaranty Bank (the offshore facility) and a \$160 million credit facility through a syndicate of banks led by Guaranty Bank (the onshore facility). The offshore facility's maturity date is 2010 and onshore credit facility matures in 2011. On August 21, 2009, Guaranty Bank was closed by the Office of Thrift Suspension. Subsequently, the Federal Deposit Insurance Corporation (FDIC) was named Receiver. All deposit accounts have been transferred to BBVA Compass.

Availability under the credit facilities is based on the loan value assigned to PEC's oil and gas properties. The determination of the Borrowing Base is made by the lenders taking into consideration the estimated value of PEC's oil and gas properties in accordance with the lenders' customary practices for oil and gas loans. This process involves reviewing PEC's estimated proved reserves and their valuation. The Borrowing Base is re-determined semi-annually, and the available borrowing amount could be increased or decreased as a result of such redetermination. In addition, PEC and the lenders each have discretion at any time to have the Borrowing Base re-determined. A revision to PEC's reserves may prompt such a request on the part of the lenders, which could possibly result in a reduction in the Borrowing Base and availability under the credit facilities. If outstanding borrowings under either of the credit facilities exceed the applicable portion of the Borrowing Base, PEC would be required to repay the excess amount within a prescribed period. If the Company is unable to pay the excess amount, it would cause an event of default.

The credit facilities include terms and covenants that require the Company to maintain, as defined, a minimum current ratio, tangible net worth, debt coverage ratio and interest coverage ratio, and restrictions are placed on the payment of dividends and the amount of treasury stock the Company may purchase. The credit facilities are collateralized by substantially all of the Company's assets. The Company is required to mortgage, and grant a security interest in, consolidated proved oil and gas properties. PEC also pledged the stock of several subsidiaries to the lenders to secure the credit facilities.

During June 2009 the Borrowing Base of the credit facility was amended. The onshore facility Borrowing Base was reduced to \$100 million with a subsequent monthly Borrowing Base reduction of \$2 million which is scheduled to begin December 1, 2009. The offshore facility Borrowing Base was reduced to \$10 million with a principal payment of \$3.37 million paid on July 1, 2009 followed by monthly payments and Borrowing Base reduction of \$500,000 which began in August 2009. The Company's borrowing rates, in both facilities, have a floor of 2% plus applicable margin rates that vary between 3% to 5%, depending on which facility, the value of current borrowing and the actual available Borrowing Base.

At September 30, 2009, the borrowing base was \$100 million and the outstanding balance of the Company's bank debt was \$85.6 million under the onshore credit facility at a weighted average interest rate of 5.21%. Under the offshore credit facility, the outstanding balance was \$8.5 million, with no further availability, at a weighted average interest rate of 5.22%. Total outstanding bank debt was \$94.1 million at September 30, 2009. The combined average interest rates paid on outstanding bank borrowings subject to interest at the bank's base rate and on outstanding bank borrowings bearing interest based upon the LIBO rate were 5.21% during 2009 as compared to 5.72% during 2008.

The Company entered into interest rate hedge agreements to help manage interest rate exposure. These contracts include interest rate swaps. Interest rate swap transactions generally involve the exchange of fixed and floating rate interest payment obligations without the exchange of the underlying principal amounts. The Company entered into interest swap agreements for a period of two years, beginning in April 2008, related to \$60 million of Company bank debt resulting in a fixed rate of 2.375% plus the Company's current applicable margin. The underlying debt contracts above are re-priced quarterly based upon the three-month LIBO rates, the Company's floor of 2% and the applicable margin per the onshore credit facility.

Indebtedness to related parties - non-current:

During the second quarter 2008, the Company's offshore subsidiary entered into a subordinated credit facility with a private lender with an availability of \$50 million. The private lender had specific collateral pledged under a separate credit agreement. The private lender is a member

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

of the Company's Board of Directors. Effective June 30, 2009, the private lender agreed to release the pledged collateral under this credit facility in favor of the offshore credit facility in exchange for a second lien position on all of the assets of the offshore subsidiary and a pledge from PEC to pay the outstanding balance under the facility in full after PEC's current bank debt is paid off and not take on any additional debt on its existing asset base. This amended facility will mature in January 2012, which will be accelerated if there is a change in control or management of PrimeEnergy Corporation, and bears interest at a rate of 10% per annum. As of September 30, 2009 advances from this facility amounted to \$20 million.

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

September 30, 2009

(7) Other Long-Term Obligations and Commitments:

Operating Leases:

The Company has several non-cancelable operating leases, primarily for rental of office space, that have a term of more than one year.

	<i>Operating Leases</i>
2009 (October 1 through December 31,)	\$ 170,000
2010	743,000
2011	384,000
2012	121,000
Thereafter	
Total minimum payments	\$ 1,418,000

Asset Retirement Obligation:

A reconciliation of the liability for plugging and abandonment costs for the nine months ended September 30, 2009 and the year ended December 31, 2008 is as follows:

	September 30, 2009	December 31, 2008
Asset retirement obligation beginning of period	\$ 19,541,000	\$ 17,361,000
Liabilities incurred		627,000
Liabilities settled	(1,617,000)	(1,292,000)
Accretion expense	1,278,000	1,395,000
Revisions in estimated liabilities		1,450,000
Asset retirement obligation end of period	\$ 19,202,000	\$ 19,541,000

The Company's liability is determined using significant assumptions, including current estimates of plugging and abandonment costs, annual inflation of these costs, the productive life of wells and the risk-adjusted interest rate. Changes in any of these assumptions can result in significant revisions to the estimated asset retirement obligation. Revisions to the asset retirement obligation are recorded with an offsetting charge to producing properties, resulting in prospective changes to depreciation, depletion and amortization expense and accretion of discount. Because of the subjectivity of assumptions and the relatively long life of most of the wells, the costs to ultimately retire the wells may vary significantly from previous estimates.

(8) Contingent Liabilities:

PrimeEnergy Management Corporation, a wholly-owned subsidiary, acts as the managing general partner for 18 limited partnerships and 2 trusts (collectively, the Partnerships). The Company, as managing general partner of the affiliated Partnerships, is responsible for all Partnership activities, including the drilling of development wells and the production and sale of oil and gas from productive wells. The Company also provides the administration, accounting and tax preparation work for the Partnerships, and is liable for all debts and liabilities of the affiliated

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

Partnerships, to the extent that the assets of a given limited Partnership are not sufficient to satisfy its obligations. As of September 30, 2009, the affiliated Partnerships have established cash reserves in excess of their debts and liabilities and the Company believes these reserves will be sufficient to satisfy Partnership obligations.

The Company is subject to environmental laws and regulations. Management believes that future expenses, before recoveries from third parties, if any, will not have a material effect on the Company's financial condition. This opinion is based on expenses incurred to date for remediation and compliance with laws and regulations which have not been material to the Company's results of operations.

From time to time, the Company is party to certain legal actions and claims arising in the ordinary course of business. While the outcome of these events cannot be predicted with certainty, management does not expect these matters to have a materially adverse effect on the financial position or results of operations of the Company.

(9) Stock Options and Other Compensation:

In May 1989, non-statutory stock options were granted by the Company to four key executive officers for the purchase of shares of common stock. At September 30, 2009 and December 31, 2008, options on 767,500 were outstanding and exercisable at prices ranging from \$1.00 to \$1.25, and having no expiration date.

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

September 30, 2009

(10) Related Party Transactions:

The Company makes an annual offer to repurchase the interests of the partners and trust unit holders in certain of the Partnerships and Trusts. The Company purchased such interests in an amount totaling \$149,000 for the nine months ending September 30, 2009 and \$481,000 for the year ending December 31, 2008.

Treasury stock purchases in any reported period may include shares acquired from a related party. There were no related party treasury stock purchases during the nine month period ending September 30, 2009. Purchases from related parties in 2008 included 70,000 shares purchased for a total consideration of \$3,500,000.

Receivables from related parties consist of reimbursable general and administrative costs, lease operating expenses and reimbursement for property development and related costs. These receivables are due from joint venture partners, which may include members of the Company's Board of Directors.

Payables owed to related parties primarily represent receipts collected by the Company as agent for the joint venture partners, which may include members of the Company's Board of Directors, for oil and gas sales net of expenses. Also included in due to related parties is the amount of accrued interest owed to the related party, a member of the Company's Board of Directors, with whom the Company's offshore subsidiary entered into a credit agreement. The agreement provides for a loan of \$20 million at a rate of 10% annum and is secured by a second lien position of all of the assets of the offshore subsidiary. Included at September 30, 2009 was \$164,000 of accrued interest on the related party loan.

(11) Financial Instruments

Fair Value Measurements:

The FASB Codification established a formal framework for measuring fair values of assets and liabilities in financial statements that are already required by GAAP to be measured at fair value. As defined in the Codification, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). The transaction is based on a hypothetical transaction in the principal or most advantageous market considered from the perspective of the market participant that holds the asset or owes the liability.

The Company utilizes market data or assumptions that market participants who are independent, knowledgeable and willing and able to transact would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated or generally unobservable. The Company attempts to utilize valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The Company is able to classify fair value balances based on the observability of those inputs. The Codification establishes a formal fair value hierarchy based on the inputs used to measure fair value. The hierarchy gives the highest priority to level 1 measurements and the lowest priority to level 3 measurements, and accordingly, level 1 measurement should be used whenever possible. For further information regarding the fair value hierarchy, refer to Note 11 of the Notes to the Consolidated Financial Statements in the Company's Form 10-K for the year ended December 31, 2008.

In accordance with the Codification, the Company has classified its assets and liabilities into these levels depending upon the data relied on to determine the fair values. The fair values of the Company's interest rate swaps, natural gas and crude oil price collars and swaps are designated as Level 3. The following fair value hierarchy table presents information about the Company's assets and liabilities measured at fair value on a recurring basis as of September 30, 2009:

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

	Quoted Prices in Active Markets For Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of September 30, 2009
Assets:				
Commodity derivative contracts			\$ 472,000	\$ 472,000
Total assets			\$ 472,000	\$ 472,000
Liabilities:				
Commodity derivative contracts			\$ (515,000)	\$ (515,000)
Interest rate derivative contracts			(394,000)	(394,000)
Total liabilities			\$ (909,000)	\$ (909,000)

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

September 30, 2009

The following table sets forth a reconciliation of changes in the fair value of financial assets and liabilities classified as level 3 in the fair value hierarchy.

Net assets as of January 1, 2009	\$ 1,578,000
Total realized and unrealized losses:	
Included in earnings (a)	611,000
Included in other comprehensive income	(2,805,000)
Purchases, sales, issuances and settlements, net	179,000
Net liabilities as of September 30, 2009	\$ (437,000)

- (a) Amounts reported in net income are classified as oil and gas sales for commodity derivative instruments reported as cash flow hedges prior to July 1, 2009 and as a reduction to interest expense for interest rate swap instruments. Derivative instruments for periods after July 1, 2009 will be reported in oil and gas sales as realized gain/loss and on a separately reported line item captioned unrealized gain/loss on derivative instruments.

Assuming no change in interest prices, after September 30, 2009, the Company would expect to reclassify to the Statement of Operations, over the next 12 months, \$394,000 in after-tax loss associated with interest rate swaps. This reclassification represents the net short-term payable associated with open swaps currently not reflected in earnings at September 30, 2009 related to anticipate interest expense.

Derivative Instruments:

In March 2008, the FASB issued guidance and amended the disclosure requirements of Derivatives and Hedging. Entities are now required to provide greater transparency about how and why the entity uses derivative instruments, how the instruments and related hedged items are accounted for under the Codification and how the instruments and related hedged items affect the financial position, results of operations and cash flows of the entity.

The Company is exposed to commodity price and interest rate risk, and management considers periodically the Company's exposure to cash flow variability resulting from the commodity price changes and interest rate fluctuations. Futures, swaps and options are used to manage the Company's exposure to commodity price risk inherent in the Company's oil and gas production operations. The Company does not apply hedge accounting to any of its commodity based derivatives. The application of hedge accounting for commodities was discontinued for periods after July 1, 2009. As a result, both realized and unrealized gains and losses associated with derivative instruments are recognized in earnings. If the derivatives previously reported as cash flow hedges had losses or gains not yet settled, these items would be reported in accumulated other comprehensive income until settlement occurs and reclassified appropriately from accumulated other comprehensive income into the statement of operations.

Interest rate swaps derivatives continue to be treated as cash-flow hedges and are used to fix or float interest rates on existing debt. The value of these interest rate swaps at September 30, 2009 is located in accumulated other comprehensive income and settlement of the swaps is recorded within interest expense.

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

September 30, 2009

Effect of derivative instruments on the Consolidated Balance Sheet:

	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
<i>Derivatives designated as cash-flow hedges</i>				
Interest Rate Swap Derivatives		\$	Derivative liability short term	\$ (616,000)
<i>Derivatives not designated as cash-flow hedge instruments</i>				
Natural Gas Commodity Contracts	Current derivative contracts	37,000		
Natural Gas Commodity Contracts	Other assets	13,000		
Natural Gas Commodity Contracts			Derivative liability short term	(136,000)
Natural Gas Commodity Contracts			Derivative liability long term	(45,000)
Crude Oil Commodity Contracts	Current derivative contracts	115,000		
Crude Oil Commodity Contracts	Other assets	64,000		
Crude Oil Commodity Contracts	Current derivative contracts	243,000		
Crude Oil Commodity Contracts			Derivative liability long term	(112,000)
		\$ 472,000		\$ (909,000)

Effect of derivative instruments on the Consolidated Statement of Operations:

	Location of gain/loss reclassified from OCI into income	Amount of gain/loss reclassified from accumulated OCI into income	
<i>Derivatives designated as cash-flow hedges</i>			
Interest Rate Swap Derivatives	Interest expense	\$	(564,000)
Crude Oil Commodity Contracts	Oil and gas sales		1,519,000
		\$	955,000
<i>Derivatives not designated as cash-flow hedge instruments</i>			
Natural Gas Commodity Contracts	Gain on derivative instruments	\$	(131,000)
Crude Oil Commodity Contracts	Gain on derivative instruments	\$	310,000
		\$	179,000

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

September 30, 2009

(12) Earnings (Loss) Per Share:

Basic earnings (loss) per share are computed by dividing earnings available or loss attributable to common stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflect earnings per share amounts that would have resulted if dilutive potential common stock had been converted to common stock. The following reconciles amounts reported in the financial statements:

	Nine Months Ended September 30, 2009			Nine Months Ended September 30, 2008		
	Net Income/(loss)	Number of Shares	Per Share Amount	Net Income	Number of Shares	Per Share Amount
Net income (loss) per common share	\$ (9,967,000)	3,040,675	\$ (3.28)	\$ 8,822,000	3,066,684	\$ 2.88
Effect of dilutive securities:						
Options					754,030	
Diluted net income (loss) per common share	\$ (9,967,000)	3,040,675	\$ (3.28)	\$ 8,822,000	3,820,714	\$ 2.31

	Three Months Ended September 30, 2009			Three Months Ended September 30, 2008		
	Net Income/(loss)	Number of Shares	Per Share Amount	Net Income	Number of Shares	Per Share Amount
Net income (loss) per common share	\$ (2,315,000)	3,036,446	\$ (.76)	\$ 2,072,000	3,050,331	\$ 0.68
Effect of dilutive securities:						
Options					755,496	
Diluted net income (loss) per common share	\$ (2,315,000)	3,036,446	\$ (.76)	\$ 2,072,000	3,805,827	\$ 0.54

- (a) The dilutive effect of 767,500 outstanding stock purchase options is not considered for the nine and three month periods ended September 30, 2009, due to the losses incurred for such periods.

(13) Shareholder's Equity:

The Company has in place a stock repurchase program whereby it may purchase outstanding shares of its common stock from time-to-time, in open market transactions or negotiated sales. The Company uses the cost method to account for its treasury share purchases. Effective July 1, 2009, pursuant to a vote of the shareholders amending the Articles of Incorporation, the authorized shares of common stock were reduced from 10,000,000 to 4,000,000, and the class of Preferred Stock of the Company, no shares of which have been issued, was eliminated. The amendment was filed with the Secretary of State in Delaware. The cost of the cancelled shares was determined by use of the first-in, first-out valuation method. The cost of the reacquired shares was \$11,936,000. The cost was allocated between the par value (\$0.10) of the shares cancelled; the excess of cost over the par value to paid in capital based upon the average per share amount of paid in capital (\$1.43) for all shares from the original issuance; and the excess was charged to retained earnings.

Table of Contents**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

This discussion should be read in conjunction with the financial statements of the Company and notes thereto.

LIQUIDITY AND CAPITAL RESOURCES

Cash flow provided by operations for the nine month period ended September 30, 2009 was \$27,078,000. Excluding the effects of significant unforeseen expenses or other income, our cash flow from operations fluctuates primarily because of variations in oil and gas production and prices or changes in working capital accounts. Our oil and gas production will vary based on actual well performance but may be curtailed due to factors beyond our control. Hurricanes in the Gulf of Mexico may shut down our production for the duration of the storm's presence in the Gulf or damage production facilities so that we cannot produce from a particular property for an extended amount of time. In addition, downstream activities on major pipelines in the Gulf of Mexico can also cause us to shut-in production for various lengths of time.

Our realized oil and gas prices vary due to world political events, supply and demand of products, product storage levels, and weather patterns. We sell the vast majority of our production at spot market prices. Accordingly, product price volatility will affect our cash flow from operations. To mitigate price volatility we sometimes lock in prices for some portion of our production through the use of financial instruments. The Company is a participant in nine oil and three gas commodity derivative financial instruments which were effective prior to September 30, 2009.

	Derivative	Contract	Total	Contract
Commodity	Type	Price	Volumes	Period
Crude Oil	Collar	\$60.00 / 77.40	57,000 bbls	2009
Crude Oil	Collar	\$65.00 / 86.50	12,000 bbls	2009
Crude Oil	Collar	\$65.00 / 80.90	204,000 bbls	2010
Crude Oil	Collar	\$65.00 / 84.14	36,000 bbls	2010
Crude Oil	Collar	\$65.00 / 84.00	45,000 bbls	2011
Crude Oil	Collar	\$70.00 / 81.80	120,000 bbls	2010
Crude Oil	Collar	\$70.00 / 86.30	30,999 bbls	2011
Crude Oil	Collar	\$70.00 / 89.30	227,997 bbls	2011
Crude Oil	Collar	\$70.00 / 92.85	168,000 bbls	2012
Natural Gas	Swap	\$6.04	1,200,000 mmbtu	2010
Natural Gas	Swap	\$6.13	600,000 mmbtu	2010

Subsequent to the quarter end, the Company entered into two gas and one oil commodity derivative financial instruments listed in the table set forth below.

	Derivative	Contract	Total	Contract
Commodity	Type	Price	Volumes	Period
Crude Oil	Collar	\$70.00 / 111.80	108,000 bbls	2012
Crude Oil	Collar	\$80.00 / 97.50	240,000 bbls	2013
Natural Gas	Swap	\$6.06	600,000 mmbtu	2010
Natural Gas	Swap	\$6.81	480,000 mmbtu	2011

The Company's activities include development and exploratory drilling. The Company's strategy is to develop a balanced portfolio of drilling prospects that includes lower risk wells with a high probability of success and higher risk wells with greater economic potential.

The Company's strategy in 2009 is to continue to reduce its outstanding debt which decreased by \$30,860,000 in 2008 and approximately \$10 million in 2009. This decreased leveraged position will better provide the Company the ability to participate in a significant acquisition, should the opportunity arise this year.

The Company has in place both a stock repurchase program and a limited partnership interest repurchase program. Spending under these programs in 2008 was \$5.03 million. The Company expects to expend substantially less in 2009 because of the drop in energy prices. For the nine months ended September 30, 2009, the Company spent only \$417,000 under these programs.

Table of Contents**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)**

The Company currently maintains two bank credit facilities totaling \$360 million, with a combined current borrowing base of \$110 million. The bank reviews the borrowing base semi-annually and, at their discretion, may decrease or propose an increase to the borrowing base relative to a redetermined estimate of proved oil and gas reserves. Our oil and gas properties are pledged as collateral for the line of credit and we are subject to certain financial covenants defined in the agreement. We are currently in compliance with these financial covenants. If we do not comply with these covenants on a continuing basis, the lenders have the right to refuse to advance additional funds under the facility and/or declare all principal and interest immediately due and payable.

In April 2008, the Company entered into an amended and restated credit agreement related to the offshore credit facility allowing for a subordinated credit facility with a private lender and the release of certain collateral which was then pledged to the new lender under a separate credit agreement.

Effective June 30, 2009, the private lender agreed to release the pledged collateral under this credit facility in favor of the offshore credit facility in exchange for a second lien position on all of the assets of the offshore subsidiary and a pledge from PEC to not take on any additional debt in excess of \$112 million on its existing onshore asset base. This amended facility will mature in January 2012, which will be accelerated if there is a change in control or management of PrimeEnergy Corporation, and bears interest at a rate of 10% per annum.

It is the goal of the Company to increase its oil and gas reserves and production through the acquisition and development of both onshore and offshore oil and gas properties. The Company also continues to explore and consider opportunities to further expand its oilfield servicing revenues through additional investment in field service equipment. However, the majority of the Company's capital spending is discretionary, and the ultimate level of expenditures will be dependent on the Company's assessment of the oil and gas business environment, the number and quality of oil and gas prospects available, the market for oilfield services, and oil and gas business opportunities in general.

RESULTS OF OPERATIONS

Revenues and net income (loss) during the nine month period ended September 30, 2009, as compared to the same periods in 2008 reflect the increased oil and decreased gas sales, presented below, offset by depreciation and depletion of oil and gas properties. The table summarizes production volumes and average sales prices realized (including realized gains and losses from derivatives).

	Nine Months Ended September 30,			Three Months Ended September 30,		
	2009	2008	Increase / (Decrease)	2009	2008	Increase / (Decrease)
Barrels of Oil Produced	495,000	469,000	26,000	154,000	149,000	5,000
Average Price Received	\$ 55.20	\$ 95.05	\$ (39.85)	\$ 65.45	\$ 96.89	\$ (31.44)
Oil Revenue	\$ 27,324,000	\$ 44,577,000	\$ (17,253,000)	\$ 10,080,000	\$ 14,437,000	\$ (4,357,000)
Mcf of Gas Produced	5,425,000	6,838,000	(1,413,000)	1,752,000	2,115,000	(363,000)
Average Price Received	\$ 4.18	\$ 9.36	\$ (5.18)	\$ 4.19	\$ 9.21	\$ (5.02)
Gas Revenue	\$ 22,651,000	\$ 63,997,000	\$ (41,346,000)	\$ 7,346,000	\$ 19,489,000	\$ (12,143,000)
Total Oil & Gas Revenue	\$ 49,975,000	\$ 108,574,000	\$ (58,599,000)	\$ 17,426,000	\$ 33,926,000	\$ (16,500,000)

Oil and gas prices received excluding the impact of derivatives were:

	Nine Months Ended September 30,		Three Months Ended September 30,	
	2009	2008	2009	2008

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

			Increase / (Decrease)			Increase / (Decrease)
Oil Price	\$ 52.13	\$ 111.46	\$ (59.33)	\$ 65.44	\$ 116.19	\$ (50.75)
Gas Price	\$ 4.18	\$ 9.95	\$ (5.77)	\$ 4.19	\$ 10.22	\$ (6.03)

The increase in oil production is due to properties added during 2008 from our 2008 West Texas drilling program offset by the natural decline of existing properties. The decrease in gas production is primarily due to the natural decline of the offshore properties.

Lease operating expense for the nine months of 2009 decreased by \$7,259,000, or 22%, compared to 2008 due to overall price decreases in oil field services combined with reduced production taxes related to reduced commodity prices.

General and administrative expenses decreased \$2,686,000, or 24%, in the first nine months of 2009 as compared to 2008 due to reductions in personnel costs.

Table of Contents

Field Service income and expense for the nine months of 2009 decreased \$5,837,000 and \$3,120,000, or 31% and 21%, respectively, compared to 2008. These decreases reflect lower rates, utilization and labor costs during 2009.

Depreciation, depletion and amortization expense for the first nine months of 2009 decreased to \$31,584,000 in 2009 from \$50,840,000 in 2008. This decrease is primarily related to the decrease in offshore production during the first nine months of 2009.

This Report contains forward-looking statements that are based on management's current expectations, estimates and projections. Words such as expects, anticipates, intends, plans, believes, projects and estimates, and variations of such words and similar expressions are intended to identify such forward-looking statements. These statements constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, and are subject to the safe harbors created thereby. These statements are not guarantees of future performance and involve risks and uncertainties and are based on a number of assumptions that could ultimately prove inaccurate and, therefore, there can be no assurance that they will prove to be accurate. Actual results and outcomes may vary materially from what is expressed or forecast in such statements due to various risks and uncertainties. These risks and uncertainties include, among other things, the possibility of drilling cost overruns and technical difficulties, volatility of oil and gas prices, competition, risks inherent in the Company's oil and gas operations, the inexact nature of interpretation of seismic and other geological and geophysical data, imprecision of reserve estimates, and the Company's ability to replace and expand oil and gas reserves. Accordingly, stockholders and potential investors are cautioned that certain events or circumstances could cause actual results to differ materially from those projected.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is a smaller reporting company and no response is required pursuant to this Item.

Item 4. CONTROLS AND PROCEDURES

As of the end of the current reported period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934 (the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective, in all material respects, with respect to the recording, processing, summarizing and reporting, within the time periods specified in the Commission's rules and forms, of information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act.

There were no significant changes in the Company's internal control over financial reporting that occurred during the third quarter of 2009 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS
Not Applicable

Item 1A. RISK FACTORS
The Company is a smaller reporting company and no response is required pursuant to this Item.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS
There were no sales of equity securities by the Company during the period covered by this report.

During the nine months ended September 30, 2009, the Company purchased the following shares of common stock as treasury shares.

Name	Number of Shares	Average Price Paid per share	Maximum Number of Shares that May Yet Be Purchased Under The Plan (1)
January	1,803	\$ 42.82	194,920
February	2,209	\$ 34.18	192,711
March	1,824	\$ 39.38	190,887
April	946	\$ 45.77	189,941
May			189,941
June		\$	189,941
July		\$	189,941
August		\$	189,941
September		\$	189,941
Total/Average	6,782	\$ 39.49	

(1) In December 1993, we announced that our board of directors authorized a stock repurchase program whereby we may purchase outstanding shares of our common stock from time-to-time, in open market transactions or negotiated sales. A total of 2,700,000 shares have been authorized, to date, under this program. Through September 30, 2009 we repurchased a total of 2,510,059 shares under this program for \$33,928,627 at an average price of \$13.52 per share. Additional purchases may occur as market conditions warrant. We expect future purchases will be funded with internally generated cash flow or from working capital.

Item 3. DEFAULTS UPON SENIOR SECURITIES
None

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS
None
