A Summary From Your Fund's Portfolio Managers (unaudited)

We are pleased to provide you with this shareholder report for MLP & Strategic Equity Fund Inc. The Fund is advised by IQ Investment Advisors LLC and sub-advised by Fiduciary Asset Management.

The investment objective of MLP & Strategic Equity Fund Inc. (the Fund) is to provide a high level of after-tax total return by investing substantially all of its net assets in a portfolio of publicly traded master limited partnerships (MLPs) operating in the energy infrastructure sector of the market. To enhance its returns, when market conditions are favorable, the Fund may enter into variable prepaid forward contracts (Forward Contracts), with terms of approximately one year, to sell particular equity securities that the Fund will strategically purchase with the proceeds of the Forward Contracts. The Fund did not participate in Variable Prepaid Forward Contracts during this reporting period. There is no assurance that the Fund will achieve its investment objective.

MLP Commentary

For the year ended October 31, 2009, according to the most commonly referenced index of publicly traded master limited partnership securities, Master Limited Partnerships (MLPs) have returned 24.22%, compared to the S&P 500 return of 9.80% for the same period. Capital markets were driven by fear and uncertainty during November and December of 2008 and a policy reaction to economic and financial weakness. MLPs were not immune to this negative environment and traded in sympathy with the broader market during that period. MLPs generally own and operate energy infrastructure assets, which we believe are strategically important to the economy as a whole and for that reason demand for the services they provide is somewhat inelastic. This fundamental demand produces stable and recurring cash flows, an important characteristic of MLPs, which provided strength to the asset class during the tough economic times of the last two years. Despite the sell-off in commodities and the capital markets, MLPs have broadly delivered strong distributions to unitholders and as a result have enjoyed a broad recovery in their unit prices throughout the year.

We continue to view MLPs as attractive long-term total return investments with a high level of tax-deferred, growing income that demonstrates low correlation to other asset classes. The Fund provides access to this asset class without the inherent tax complications of owning MLPs directly. The focus of the Fund's MLP portfolio is to provide investors with diverse and high quality exposure to the MLP universe. Through our proprietary quality screening we seek to identify those MLPs with strategically important assets, strong management

teams, and sound balance sheets. We believe that MLPs that fit this description will be well positioned to deliver growth and have access to the capital needed to fund that growth. We continue to believe that the main driver of MLP returns over the long-term will be distribution growth.

Current Portfolio

The Fund's portfolio construction is based on a series of rules regarding market capitalization and underlying business sectors and is then subjected to our proprietary quality screening. The result of this process is a portfolio that broadly represents the diverse business risks of the MLP asset class with a bias towards higher quality and smaller capitalized MLPs than the publicly available indices. From a sector weight standpoint, the portfolio is tilted towards natural gas infrastructure and away from oil and refined product infrastructure. We believe this allocation is well suited to the changing fundamentals of the natural gas market, and MLPs focused on natural gas infrastructure may be well positioned for growth over the long-term.

Attribution

The Fund's MLP portfolio performed well during the year ended October 31, 2009 returning 26.74%. The MLP asset class demonstrated its resilience during the year, with all sectors delivering positive performance despite weakening economic conditions.

Strong performance in the portfolio was reflected by NAV returns of 25.04% for the year ended October 31, 2009. Market price performance drove returns for the shares of the Fund up 20.47% during the same period. Unlike the majority of the MLP closed-end fund peer group, the Fund does not utilize leverage. This was a positive during the fourth quarter of 2008 when most of the capital markets were selling off. However, leverage has aided competing funds during the sharp bounce MLPs demonstrated during 2009. We believe the net effect of this leverage decision has been positive for the Fund, and offers investors a lower risk alternative for accessing the MLP asset class.

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. MLP & STRATEGIC EQUITY FUND INC.

OCTOBER 31, 2009

Notes to Financial Statements

1. Significant Accounting Policies:

MLP & Strategic Equity Fund Inc. (the Fund) is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as a diversified, closed-end management investment company. The Fund pursues its investment objective by investing substantially all of its net assets in publicly traded master limited partnerships (MLPs). To enhance its returns, the Fund may enter into variable prepaid forward contracts (Forward Contracts) with terms of approximately one year, to sell particular equity securities that the Fund will strategically purchase with the proceeds of the Forward Contracts. Due to the market conditions, the Fund did not utilize this strategy during the year ended October 31, 2009. The Fund's financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. All cash balances are invested on a daily basis in a money market fund. The Fund determines and makes available for publication the net asset value of its Common Stock on a daily basis. The Fund's Common Stock shares are listed on the New York Stock Exchange (NYSE) under the symbol MTP.

In July 2009, the FASB's Accounting Standards Codification (Codification) became the single official source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. Rules and interpretive releases of the SEC under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. These changes and the Codification itself do not change GAAP. Other than the manner in which new accounting guidance is referenced, the adoption of these changes had no impact on the Fund's financial statements.

The following is a summary of significant accounting policies followed by the Fund:

(a) Valuation of investments Portfolio securities that are held by the Fund that are traded on stock exchanges or the NASDAQ Global Market are valued at the last sale price or official close price on the exchange, as of the close of business on the day the securities are being valued or, lacking any sales, at the last available bid price for long positions, and at the last available asked price for short positions. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated as the primary market by or under the authority of the Board of Directors of the Fund. Investments in money market funds are valued daily at their NAV. Long positions traded in the over-the-counter (OTC) market, NASDAQ Capital Market or Bulletin Board are valued at the last available bid price or

yield equivalent obtained from one or more dealers or pricing services approved by the Board of Directors of the Fund. Short positions traded in the OTC market are valued at the last available asked price. Portfolio securities that are traded both in the OTC market and on an exchange are valued according to the broadest and most representative market. Other investments are valued at market value.

Swap agreements and variable prepaid forward contracts are valued based upon quoted fair valuations received daily by the Fund from a pricing service or counterparty. Valuation of short-term investment vehicles is generally based on the net asset value of the underlying investment vehicle or amortized cost. The Fund may employ pricing services to provide certain securities prices for the Fund. Securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors of the Fund, including valuations furnished by the pricing services retained by the Fund, which may use a matrix system for valuations. The procedures of a pricing service and its valuations are reviewed by the officers of the Fund under the general supervision of the Fund's Board of Directors. Such valuations and procedures will be reviewed periodically by the Board of Directors of the Fund. Generally, trading in foreign securities, U.S. government securities, money market instruments and certain fixed-income securities is substantially completed each day at various times prior to the close of business on the NYSE. The values of such securities used in computing the net asset value of the Fund's shares are determined as of such times.

(b) Master Limited Partnerships The Fund may purchase both domestic and international MLPs. The Fund's investment in MLPs may include ownership of MLP common units and MLP subordinated units. The Fund also may purchase MLP I-Shares (together with the MLPs, the MLP Entities). MLP I-Shares are pay-in-kind securities created as a means to facilitate institutional ownership of MLPs by simplifying the tax and administrative implications of the MLP structure. Generally, when an MLP pays its quarterly cash distribution to unitholders, holders of I-Shares do not receive a cash distribution; rather, they receive a dividend of additional I-Shares from the MLP of comparable value to the cash distribution paid to each unitholder. The Fund may purchase interests in MLP Entities on an exchange or may utilize non-public market transactions to obtain its holdings, including but not limited to privately negotiated purchases of securities from the issuers themselves, broker-dealers, or other qualified institutional buyers.

(c) Derivative financial instruments For the year ended October 31, 2009, the Fund did not engage in any derivative financial instrument transactions. The Fund may engage in various portfolio investment strategies, including derivative

Notes to Financial Statements (continued)

financial instruments, to increase the return of the Fund. Losses may arise due to changes in the value of the contract due to an unfavorable change in the price of the underlying security, or index, or if the counterparty does not perform under the contract. The counter-party for certain instruments may pledge cash or securities as collateral.

Variable Prepaid Forward Contracts The Fund did not participate in Variable Prepaid Forward Contracts during this reporting period. The Fund may enter into Forward Contracts with terms of approximately one year to sell particular equity securities that the Fund will strategically purchase with the proceeds of the Forward Contracts. The strategic equity securities that are the subject of the Forward Contracts (the Contract Securities) may be the subject of a Forward Contract individually, or grouped together as a basket of multiple Contract Securities. In a Forward Contract, the amount of shares (or their cash equivalent) that the seller is required to deliver at maturity varies as a function of the performance of the Contract Security. The Forward Contracts will be prepaid by the counterparties to these transactions and as a result, the Fund will not be exposed to any risk that counterparties to these transactions will be unable to meet their obligations under the arrangements. The equity securities may serve as collateral for the Fund's obligation under the Forward Contracts. The proceeds of the Forward Contracts are reflected as a liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the Forward Contracts.

(d) Income Taxation During the year ended October 31, 2008 the Fund did not qualify as a regulated investment company pursuant to Subchapter M of the Internal Revenue Code and was taxed as a corporation. The Fund continues to be taxed as a corporation for the year ended October 31, 2009. The Fund has no taxable income subject to statutory income tax rates. The Federal statutory tax rate of a corporation is 35% of taxable income. The estimated effective state income tax rate is 3.5%. The Fund may be subject to a 20 percent federal alternative minimum tax on its federal alternative minimum taxable income to the extent that its alternative minimum tax exceeds its regular federal income tax. For the year ended October 31, 2009, the Fund had no income tax liability.

The Fund invests its assets primarily in MLPs, which generally are treated as partnerships for Federal income tax purposes. As a limited partner in the MLPs, the Fund reports its allocable share of the MLP's taxable income in computing its own taxable income. The Fund's tax expense or benefit is included in the Statement of Operations based on the component of income or gains (losses) to which such expense or benefit relates. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets

and liabilities for financial reporting purposes and the amounts used for income tax purposes. Deferred tax assets and liabilities are measured using effective tax rates expected to apply to taxable income in the years such temporary differences are realized or otherwise settled. A valuation allowance is recognized if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred income tax asset will not be realized.

Deferred Income Taxes reflect the net tax effect of temporary differences between the carrying amount of assets and liabilities for financial reporting and tax purposes. Components of the Fund's deferred tax assets as of October 31, 2009 are as follows:

Description	Amount	Rate	Deferred
			Benefit (Liability)

For the current year, consistent with prior year determinations, management has offset all potential deferred tax benefits pursuant to valuation allowance principles. Management of the Fund concluded a 100% valuation allowance is appropriate as the Fund has a limited operating history and management cannot conclude it is more likely than not the Fund will generate taxable income with any certainty as to time. Management has performed an analysis of tax positions taken or to be taken on a tax return and whether such positions are more likely than not to be sustained upon examination based on their technical merit. To the extent they would not be sustained, tax expense (and related interest and penalties) would be recognized for financial statement reporting purposes.

The Fund files U.S. and various state tax returns. No income tax returns are currently under examination. All tax years of the Fund are open at this time.

(e) Security transactions and investment income Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost

basis. Dividend income is recorded on the ex-dividend dates. Interest income is recognized on the accrual basis. Initially a significant portion of any distributions the Fund receives from the MLP entities will be deferred from taxation until the Fund sells its interest in such MLP entities. Distributions received from the Fund's investments in MLP are not recorded as dividends.

For financial statement purposes, the Fund only records income from MLPs when it receives an estimate of allocable income from the MLP. These estimates may subsequently be revised based on information received from MLPs after their tax reporting periods are concluded, as the actual character of these distributions is not known until after the fiscal year end of the Fund. Dividends, as reflected in the Statement of Operations, are net of any tax deferred distributions from the MLP entities. For the year ended October 31, 2009, 100% of the MLP distributions, were tax deferred.

(f) Distributions Distributions paid by the Fund will be paid on a monthly basis. The Fund expects that its distributions primarily will consist of a return of capital.

(g) Reclassification Accounting principles generally accepted in the United States of America require that certain components of net assets be adjusted to reflect permanent differences between financial and tax reporting. Accordingly, during the current year, \$5,968,633 has been reclassified between accumulated distributions in excess of net investment income and accumulated net realized capital losses as a result of permanent differences attributable to accounting for partnerships. This reclassification has no effect on net assets or net asset value per share.

2. Investment Advisory and Management Agreement and Transactions with Affiliates:

The Fund has entered into an Investment Advisory and Management Agreement with IQ Investment Advisors LLC (IQ Advisors), an indirect, wholly owned subsidiary of Merrill Lynch & Co., Inc. (ML & Co.), which is a wholly owned subsidiary of Bank of America Corporation (Bank of America). IQ Advisors is responsible for the investment advisory, management and administrative services to the Fund. In addition, IQ Advisors provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Fund. For such services, the Fund pays a monthly fee at an annual rate equal to 1.12% of the average daily value of the Fund's net assets.

IQ Advisors has entered into a Subadvisory Agreement with Fiduciary Asset Management, LLC (FAMCO). Pursuant to the agreement, FAMCO provides certain investment advisory services to IQ Advisors with respect to the Fund. For such services, IQ Advisors pays FAMCO a monthly fee at an annual rate equal to .50% of the average daily value of the Fund's

net assets. There is no increase in aggregate fees paid by the Fund for these services.

IQ Advisors has entered into an Administration Agreement with Princeton Administrators, LLC (the Administrator). The Administration Agreement provides that IQ Advisors pays the Administrator a fee from its investment advisory fee at an annual rate equal to .12% of the average daily value of the Fund's net assets for the performance of administrative and other services necessary for the operation of the Fund. There is no increase in the aggregate fees paid by the Fund for these services. The Administrator is an indirect, wholly owned subsidiary of BlackRock, Inc. (BlackRock). ML & Co. has a substantial financial interest in BlackRock.

In addition, Merrill Lynch, Pierce, Fenner & Smith Incorporated, an affiliate of IQ Advisors, received \$4,804 in commissions for the execution of portfolio security transactions on an agency basis for the Fund for the year ended October 31, 2009.

Certain officers of the Fund are officers and/or directors of IQ Advisors, Bank of America and/or ML & Co. or their affiliates.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of MLP & Strategic Equity Fund Inc.:

In our opinion, the accompanying statement of assets, liabilities and capital, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of MLP & Strategic Equity Fund Inc. (the Fund) at October 31, 2009, and the results of its operations, the changes in its net assets and the financial highlights for the year ended October 31, 2009, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as financial statements) are the responsibility of the Fund s management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about

whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit, which included confirmation of securities at October 31, 2009 by correspondence with the custodian and brokers, provides a reasonable basis for our opinion. The statement of changes in net assets for the year ended October 31, 2008 and the financial highlights for the year ended October 31, 2008 and the period ended October 31, 2007 were audited by other independent auditors whose report, dated December 26, 2008, expressed an unqualified opinion on those statements.

Automatic Dividend Reinvestment Plan

How the Plan Works The Fund offers a Dividend Reinvestment Plan (the Plan) under which distributions paid by the Fund are automatically reinvested in additional shares of Common Stock of the Fund. The Plan is administered on behalf of the stockholders by BNY Mellon Share-owner Services (the Plan Agent). Under the Plan, whenever the Fund declares a distribution, participants in the Plan will receive the equivalent in shares of Common Stock of the Fund. The Plan Agent will acquire the shares for the participant's account either (i) through receipt of additional unissued but authorized shares of the Fund (newly issued shares) or (ii) by purchase of outstanding shares of Common Stock on the open market on the New York Stock Exchange or elsewhere. If, on the distribution payment date, the Fund's net asset value per share is equal to or less than the market price per share plus estimated brokerage commissions (a condition often referred to as a market premium), the Plan Agent will invest the distribution amount in newly issued shares. If the Fund's net asset value per share is greater than the market price per share (a condition often referred to as a market discount), the Plan Agent will invest the distribution amount by purchasing on the open market additional shares. If the Plan Agent is unable to invest the full distribution amount in open market purchases, or if the market discount shifts to a market premium during the purchase period, the Plan Agent will invest any uninvested portion in newly issued shares. The shares acquired are credited to each stockholder's account. The amount credited is determined by dividing the dollar amount of the distribution by either (i) when the shares are newly issued, the net asset value per share on the date the shares are issued or (ii) when shares are purchased in the open market, the average purchase price per share.

Participation in the Plan Participation in the Plan is automatic, that is, a stockholder is automatically enrolled in the Plan when he or she purchases shares of Common Stock of the Fund unless the stockholder specifically elects not to participate in the Plan. Stockholders who elect not to participate will receive all distributions in cash. Stockholders who do not wish to participate in the Plan, must advise the Plan Agent in writing (at the address set forth below) that they elect not to participate in the Plan. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by writing to the Plan Agent.

Benefits of the Plan The Plan provides an easy, convenient way for stockholders to make additional, regular investments in the Fund. The Plan promotes a long-term strategy of investing at a lower cost. All shares acquired pursuant to the Plan

receive voting rights. In addition, if the market price plus commissions of the Fund's shares is above the net asset value, participants in the Plan will receive shares of the Fund for less than they could otherwise purchase them and with a cash value greater than the value of any cash distribution they would have received. However, there may not be enough shares available in the market to make distributions in shares at prices below the net asset value. Also, since the Fund does not redeem shares, the price on resale may be more or less than the net asset value.

Plan Fees There are no enrollment fees or brokerage fees for participating in the Plan. The Plan Agent's service fees for handling the reinvestment of distributions are paid for by the Fund. However, brokerage commissions may be incurred when the Fund purchases shares on the open market and stockholders will pay a pro rata share of any such commissions.

Tax Implications The automatic reinvestment of dividends and distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such distributions. Therefore, income may still be realized even though stockholders do not receive cash. If, when the Fund's shares are trading at a market premium, the Fund issues shares pursuant to the Plan that have a greater fair market value than the amount of cash reinvested, it is possible that all or a portion of the discount from the market value (which may not exceed 5% of the fair market value of the Fund's shares) could be viewed as a taxable distribution. If the discount is viewed as a taxable distribution, it is also possible that the taxable character of this discount would be allocable to all the stockholders, including stockholders who do not participate in the Plan. Thus, stockholders who do not participate in the Plan might be required to report as ordinary income a portion of their distributions equal to their allocable share of the discount.

Contact Information All correspondence concerning the Plan, including any questions about the Plan, should be directed to the Plan Agent at BNY Mellon Shareowner Services, P.O. Box 358035, Pittsburgh, PA 15252-8035, Telephone: 877-296-3711.

(e)(1) Audit Committee Pre-Approval Policies and Procedures:

The registrant s audit committee (the Committee) has adopted policies and procedures with regard to the pre-approval of services. Audit, audit-related and tax compliance services provided to the registrant on an annual basis require specific pre-approval by the Committee. The Committee also must approve other non-audit services provided to the registrant and those non-audit services provided to the registrant s affiliated service providers that relate directly to the operations and the financial reporting of the registrant. Certain of these non-audit services that the Committee believes are a) consistent with the SEC s auditor independence rules and b) routine and recurring services that will not impair the independence of the independent accountants may be approved by the Committee without consideration on a specific case-by-case basis (general pre-approval). However, such services will only be deemed pre-approved provided that any individual project does not exceed \$5,000 attributable to the registrant or \$50,000 for all of the registrants the Committee oversees. Any proposed services exceeding the pre-approved cost levels will require specific pre-approval by the Committee, as will any other services not subject to general pre-approval (e.g., unanticipated but permissible services). The Committee is informed of each service approved subject to general pre-approval at the next regularly scheduled in-person board meeting.

(a)(2) (iv) Conflicts of Interest.

Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other account. More specifically, portfolio managers who manage multiple funds and/or other accounts may be presented with one or more of the following potential conflicts:

The management of multiple funds and/or other accounts may result in a portfolio manager devoting unequal time and attention to the management of each fund and/or other account. The Subadviser seeks to manage such competing interests for the time and attention of a portfolio manager by having the portfolio manager focus on a particular investment discipline. Most other accounts managed by a portfolio manager are managed using the same investment models that are used in connection with the management of the Fund.

If a portfolio manager identifies a limited investment opportunity which may be suitable for more than one fund or other account, a fund may not be able to take full advantage of that opportunity due to an allocation of filled purchase or sale orders across all eligible funds and other accounts. To deal with these situations, the Subadviser has adopted procedures for allocating portfolio transactions across multiple accounts. With respect to securities transactions for the Fund, the Subadviser determines which broker to use to execute each order, consistent with its duty to seek best execution of the transaction. However, with respect to certain other accounts (such as pooled investment vehicles that are not registered mutual funds, and other accounts managed for organizations and individuals), the Subadviser may be limited by the client with respect to the selection of brokers or may be instructed to direct trades through a particular broker. In these cases, trades for a fund in a particular security may be placed separately from, rather than aggregated with, such other accounts. Having separate transactions with respect to a security may temporarily affect the market price of the security or the execution of the transaction, or both, to the possible detriment of a fund or other account(s) involved.

The Subadviser has adopted certain compliance procedures which are designed to address these types of conflicts. However, there is no guarantee that such procedures will detect each and every situation in which a conflict arises.

(a)(3) *Compensation Structure.* The primary portfolio managers' compensation is as follows for **James J. Cunnane, Jr.** and **Quinn T. Kiley**:

Base Salary. The primary portfolio managers are paid a base salary which is set at a level determined to be appropriate based upon the portfolio managers' experience and responsibilities through the use of independent compensation surveys of the investment management industry.

Annual Bonus. The portfolio manager's annual bonus is determined by the CEO of FAMCO pursuant to a specific company formula. It is not based on the performance of the registrant or other managed accounts. The monies paid are directly derived from a pool created from FAMCO's earnings. The bonus is payable in a combination of cash and restricted Piper Jaffray companies stock.

The portfolio managers also participate in benefit plans and programs generally available to all employees.

(a) (4) *Securities ownership.* The following table discloses the dollar range of equity securities of the Fund beneficially owned by the Portfolio Manager as of October 31, 2009:

	Dollar Range of Equity
Name of Portfolio Manager	Securities in Fund
James J. Cunnane, Jr.	None
