--------	--	--	---	--

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Con Edison	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
CECONY	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>

The aggregate market value of the common equity of Con Edison held by non-affiliates of Con Edison, as of June 30, 2009, was approximately \$10.3 billion.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

As of January 31, 2010, Con Edison had outstanding 281,351,375 Common Shares (\$.10 par value).

All of the outstanding common equity of CECONY is held by Con Edison.

Documents Incorporated By Reference

Portions of Con Edison's definitive proxy statement and CECONY's definitive information statement, for their respective Annual Meetings of Stockholders to be held on May 17, 2010, to be filed with the Commission pursuant to Regulation 14A and Regulation 14C, respectively, not later than 120 days after December 31, 2009, are incorporated in Part III of this report.

Filing Format

This Annual Report on Form 10-K is a combined report being filed separately by two different registrants: Consolidated Edison, Inc. (Con Edison) and Consolidated Edison Company of New York, Inc. (CECONY). CECONY is a subsidiary of Con Edison and, as such, the information in this report about CECONY also applies to Con Edison. As used in this report, the term the "Companies" refers to Con Edison and CECONY. However, CECONY makes no representation as to the information contained in this report relating to Con Edison or the subsidiaries of Con Edison other than itself.

Table of Contents**Introduction**

This introduction contains certain information about Con Edison and its subsidiaries, including, CECONY, and is qualified in its entirety by reference to the more detailed information appearing elsewhere or incorporated by reference in this report.

Con Edison's mission is to provide energy services to our customers safely, reliably, efficiently, and in an environmentally sound manner; to provide a workplace that allows employees to realize their full potential; to provide a fair return to our investors; and to improve the quality of life in the communities we serve.

Con Edison is a holding company that owns:

CECONY, which delivers electricity, natural gas and steam to customers in New York City and Westchester County;

O&R (together with CECONY referred to as the Utilities), which delivers electricity and natural gas to customers primarily located in southeastern New York, and northern New Jersey and northeastern Pennsylvania; and

Competitive energy businesses, which provide retail and wholesale electricity supply and energy services.

Con Edison anticipates that the Utilities, which are subject to extensive regulation, will continue to provide substantially all of its earnings over the next few years. The Utilities have approved rate plans that are generally designed to cover each company's cost of service, including the capital and other costs of the company's energy delivery systems. The Utilities recover from their full-service customers (generally, on a current basis) the cost the Utilities pay for the energy and charge all of their customers the cost of delivery service.

* Reflects a \$1,076 million decrease in 2009 and a \$3,392 million increase in 2008 in regulatory assets for unrecognized pension and other retirement costs. See Notes E and F to the financial statements in Item 8.

Significant 2009 Developments

CECONY delivered 56,667 millions of kWhrs of electricity (2.8% decrease from prior year), 124,890 thousands of dth of gas (1.2% increase from prior year) and 23,017 millions of pounds of steam to its customers (4.0% decrease from prior year). The company's electric and gas rate plans include revenue decoupling mechanisms pursuant to which delivery revenues are not generally affected by changes in delivery volumes from levels assumed in the rate plans. See Results of Operations in Item 7.

CECONY invested \$2,100 million to upgrade and reinforce its energy delivery systems. O&R invested \$132 million in its delivery systems. See Capital Requirements and Resources in Item 1.

CECONY's electric, gas and steam rates increased (on an annual basis) \$523 million (April 2009), \$67.5 million (October 2009) and \$43.7 million (October 2009), respectively. O&R's electric and gas rates increased (on an annual basis) \$15.6 million and \$9 million, respectively (July and November 2009). See Note B to the financial statements in Item 8.

CECONY entered into a Joint Proposal, subject to New York State Public Service Commission (NYSPSC) approval, which, among others things, provides for electric base rate increases (on an annual basis) of \$420 million (April 2010), \$420 million (April 2011) and \$287 million (April 2012), with an additional \$133 million to be collected through a surcharge in the rate year ending March 2013. See Note B to the financial statements in Item 8.

Con Edison issued \$213 million of common stock, in addition to stock issued under its dividend reinvestment and employee stock plans. CECONY issued \$1,350 million of debentures, including \$180 million used to refund debentures in advance of maturity. O&R issued \$120 million of debentures, including \$45 million used to refund debentures in advance of maturity. See Liquidity and Capital Resources Cash Flows from Financing Activities in Item 7.

CECONY and the NYSPSC staff entered into a Joint Proposal, which is subject to NYSPSC approval, relating to the NYSPSC's review of the company's 2005-2008 capital expenditures as to which the company established a \$24 million regulatory liability for a refund and recognized a \$14 million (after-tax) charge in its 2009 consolidated financial statements. See Rate Agreements CECONY Electric in Note B to the financial statements in Item 8.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

The United States Court of Federal Claims issued a decision, which may be appealed, in favor of Con Edison with respect to the company's 1997 lease in/lease out transaction. See Note J to the financial statements in Item 8.

Table of Contents

Available Information

Con Edison and CECONY file annual, quarterly and current reports, proxy or information statements and other information with the Securities and Exchange Commission (SEC). The public may read and copy any materials that the Companies file with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Room 1580 Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers (including Con Edison and CECONY) that file electronically with the SEC. The address of that site is <http://www.sec.gov>.

This information the Companies file with the SEC is also available free of charge on or through the Investor Information section of their websites as soon as reasonably practicable after the reports are electronically filed with, or furnished to, the SEC. Con Edison's internet website is at: <http://www.conedison.com>; and CECONY's is at: <http://www.coned.com>.

The Investor Information section of Con Edison's website also includes the company's code of ethics (and amendments or waivers of the code for executive officers or directors), corporate governance guidelines and the charters of the following committees of the company's Board of Directors: Audit Committee, Management Development and Compensation Committee, and Corporate Governance and Nominating Committee. This information is available in print to any shareholder who requests it. Requests should be directed to: Corporate Secretary, Consolidated Edison, Inc., 4 Irving Place, New York, NY 10003.

Information on the Companies' websites is not incorporated herein.

Forward-Looking Statements

This report includes forward-looking statements intended to qualify for the safe-harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements are statements of future expectation and not facts. Words such as expects, estimates, anticipates, intends, believes, plans, will and similar expressions identify forward-looking statements. Forward-looking statements are based on information available at the time the statements are made, and accordingly speak only as of that time. Actual results or developments might differ materially from those included in the forward-looking statements because of various factors including, but not limited to, those discussed under Risk Factors, in Item 1A.

Information in any item of this report as to which reference is made in this Item 1 is hereby incorporated by reference in this Item 1. The use of terms such as "see" or "refer to" shall be deemed to incorporate into Item 1 at the place such term is used the information to which such reference is made.

Table of Contents

Part I

Item 1: Business

Overview

Consolidated Edison, Inc. (Con Edison), incorporated in New York State in 1997, is a holding company which owns all of the outstanding common stock of Consolidated Edison Company of New York, Inc. (CECONY), Orange and Rockland Utilities, Inc. (O&R) and the competitive energy businesses. As used in this report, the term the Companies refers to Con Edison and CECONY.

CECONY's principal business operations are its regulated electric, gas and steam delivery businesses. O&R's principal business operations are its regulated electric and gas delivery businesses. The competitive energy businesses sell electricity to wholesale and retail customers, provide certain energy-related services, and participate in energy infrastructure projects. Con Edison is evaluating additional opportunities to invest in electric and gas-related businesses.

Con Edison's strategy is to provide reliable energy services, maintain public and employee safety, promote energy efficiency, and develop cost-effective ways of performing its business. Con Edison seeks to be a responsible steward of the environment and enhance its relationships with customers, regulators and members of the communities it serves.

CECONY

Electric

CECONY provides electric service to approximately 3.3 million customers in all of New York City (except part of Queens) and most of Westchester County, an approximately 660 square mile service area with a population of more than nine million.

Gas

CECONY delivers gas to approximately 1.1 million customers in Manhattan, the Bronx and parts of Queens and Westchester County.

Steam

CECONY operates the largest steam distribution system in the United States by producing and delivering more than 23,000 MMlbs of steam annually to approximately 1,760 customers in parts of Manhattan.

Table of Contents

Orange and Rockland

Electric

O&R and its utility subsidiaries, Rockland Electric Company (RECO) and Pike County Power & Light Company (Pike) (together referred to herein as O&R) provide electric service to approximately 0.3 million customers in southeastern New York and in adjacent areas of northern New Jersey and northeastern Pennsylvania, an approximately 1,350 square mile service area.

Gas

O&R delivers gas to over 0.1 million customers in southeastern New York and adjacent areas of north eastern Pennsylvania.

Competitive Energy Businesses

Con Edison pursues competitive energy opportunities through three wholly-owned subsidiaries: Con Edison Solutions, Con Edison Energy and Con Edison Development. These businesses include the sales and related hedging of electricity to wholesale and retail customers, sales of certain energy-related products and services, and participation in energy infrastructure projects. At December 31, 2009, Con Edison's equity investment in its competitive energy businesses was \$279 million and their assets amounted to \$751 million.

In 2008, Con Edison Development and its subsidiary, CED/SCS Newington, LLC, completed the sale of their ownership interests in electricity generating plants with an aggregate capacity of approximately 1,706 MW. See Note U to the financial statements in Item 8.

Utility Regulation

State Utility Regulation

Regulators

The Utilities are subject to regulation by the New York State Public Service Commission (NYSPSC), which under the New York Public Service Law, is authorized to set the terms of service and the rates the Utilities charge for providing service in New York. It also approves the issuance of the Utilities' securities. It exercises jurisdiction over the siting of the Utilities' electric transmission lines and approves mergers or other business combinations involving New York utilities. O&R's New Jersey subsidiary, RECO, is subject to similar regulation by the New Jersey Board of Public Utilities (NJBPU). O&R's Pennsylvania subsidiary, Pike, is subject to similar regulation by the Pennsylvania Public Utility Commission (PAPUC). The NYSPSC, together with the NJBPU and the PAPUC, are referred to herein as state utility regulators.

Utility Industry Restructuring In New York

In the 1990s, the NYSPSC restructured the electric utility industry in the state. In accordance with NYSPSC orders, the Utilities sold all of their electric generating facilities other than those that also produce steam for CECONY's steam business (see Electric Operations' Electric Facilities below) and provided all of their customers the choice to buy electricity or gas from the Utilities or other suppliers (see Electric Operations' Electric Sales and Deliveries and Gas Operations' Gas Sales and Deliveries below).

Following adoption of NYSPSC industry restructuring, there were several utility mergers as a result of which substantially all of the electric and gas delivery service in New York State is now provided by one of three investor-owned utility companies' Con Edison, National Grid plc and Iberdrola, S.A. or one of two state authorities' New York Power Authority (NYPA) or Long Island Power Authority.

Rate Plans

Investor-owned utilities in the United States provide service to customers according to the terms of tariffs approved by the appropriate state utility regulator. The tariffs include schedules of rates for service that are designed to permit the utilities to recover from their customers the approved anticipated costs, including capital costs, of providing service to customers as defined by the tariff. The tariffs implement rate plans, that result from rate orders, settlements, or joint proposals developed during rate proceedings. The utilities' earnings depend on the rate levels authorized in the rate plans and their ability to operate their businesses in a manner consistent with their rate plans.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

The utilities rate plans each cover specified periods, but rates determined pursuant to a plan generally continue in effect until a new rate plan is approved by

12

Table of Contents

the state utility regulator. In New York, either the utility or the NYSPSC can commence a proceeding for

a new rate plan, and a new rate plan filed by the utility will take effect automatically in 11 months unless prior to such time the NYSPSC approves a rate plan.

In each rate proceeding, rates are determined by the state utility regulator following the submission by the utility of testimony and supporting information, which are subject to review by the staff of the regulator. Other parties with an interest in the proceeding can also review the utilities proposal and become involved in the rate case. The review process is overseen by an Administrative Law Judge. After an Administrative Law Judge issues a decision, that generally considers the interests of the utility, the regulatory staff, other parties, and legal requisites, the regulator will issue a rate order. The utility and the regulator's staff and interested parties may enter into a settlement agreement or joint proposal prior to the completion of this administrative process, in which case the agreement would be subject to approval of the regulator.

For each rate plan, the revenues needed to provide the utility a return on invested capital is determined by multiplying the utilities' forecasted rate base by the utility's pre-tax weighted average cost of capital. In general, rate base is the amount of the utility's net plant, deferred taxes and working capital. The NYSPSC uses a forecast of rate base for the rate year. The weighted average cost of capital is determined based on the forecasted amounts and costs of long-term debt and preferred equity, the forecasted amount of common equity and an allowed return on common equity determined by the state utility regulator. The NYSPSC's current methodology for determining the allowed return on common equity assigns a one-third weight to an estimate determined from a capital asset pricing model applied to a peer group of utility companies and a two-thirds weight to an estimate determined from a dividend discount model using stock prices and dividend forecasts for a peer group of utility companies.

Pursuant to the Utilities' rate plans, there generally can be no change to the charges to customers during the respective terms of the rate plans other than for recovery of the costs incurred for energy supply and specified adjustments provided for in the rate plans.

Common provisions of the Utilities' rate plans may include:

Recoverable energy cost clauses that allow the Utilities to recover on a current basis the costs for the energy they supply with no mark-up to their full-service customers.

Other cost reconciliations that reconcile pension and other post-retirement costs, environmental remediation costs, and certain other costs to amounts reflected in delivery rates for such costs. Utilities generally retain the right to petition for recovery or accounting deferral of extraordinary and material cost increases and provision is sometimes made for the utility to retain a share of costs reductions, for example, property tax refunds.

Revenue decoupling mechanisms under which actual energy delivery revenues will be compared, on a periodic basis, with the authorized delivery revenues. The difference is accrued with interest for refund to, or recovery from customers, as applicable.

Earnings sharing provisions require the Utilities to defer for customer benefit earnings over specified rates of return on common equity. There is no symmetric mechanism for earnings below specified rates of return on common equity.

Negative earnings adjustments for failure to meet certain performance standards relating to service reliability, safety and other matters.

Table of Contents

The following table should be read in conjunction with, and is subject to, the more detailed discussion of the Utilities rate plans in Note B to the financial statements in Item 8 (which information is incorporated by reference herein).

Effective Period	Rate Increases (Millions of Dollars, except percentages)	Rate Base	Amortization To Income of Net Regulatory (Assets) and Liabilities	Authorized Return on Equity (ROE)	ROE Sharing Threshold Earnings Sharing Terms (a) (Shareholders / Customers)
CECONY Electric(b) April 2009 - March 2010	\$523	\$14,100	\$45	10.0%	No sharing by customers
CECONY Gas (c) October 2007 - September 2010	Yr. 1 - \$67.5 Yr. 2 - \$67.5 Yr. 3 - \$67.5	Yr. 1 - \$2,300 Yr. 2 - \$2,500 Yr. 3 - \$2,700	\$18 over 3 yrs.	9.7%	10.70% 50/50
CECONY Steam(c) October 2008 - September 2010	Yr. 1 - \$43.7 Yr. 2 - \$43.7	Yr. 1 - \$1,334 Yr. 2 - \$1,437	Yr. 1 - \$10.2 Yr. 2 - \$10.2	9.3%	10.10% 50/50
O&R Electric (NY) July 2008 - June 2011	Yr. 1 - \$15.6 Yr. 2 - \$15.6 Yr. 3 - \$5.7(d)	Yr. 1 - \$504 Yr. 2 - \$567 Yr. 3 - \$597		9.4%	10.20% - 11.20% - 50/50 >11.20% - 25/75
O&R Gas (NY) November 2009 - October 2012	Yr. 1 - \$9.0 Yr. 2 - \$9.0 Yr. 3 - \$4.6(e)	Yr. 1 - \$280 Yr. 2 - \$296 Yr. 3 - \$309	\$2 over 3 yrs.	10.4%	11% - 12% - 50/50 12% - 14% - 35/65 >14% - 10/90

(a) Subject to limitation for cost reconciliations described in Note B to the financial statements in Item 8.

(b) In November 2009, the company, the NYSPSC staff and other parties entered into a Joint Proposal, subject to NYSPSC approval, for a rate plan covering April 2010 through March 2013.

(c) In November 2009, CECONY filed for new gas and steam rate plans.

(d) The rate plan provides for a one-time surcharge of \$9.9 million in Year 3.

(e) The rate plan provides for a one-time surcharge of \$4.3 million in Year 3.

Liability for Service Interruptions and Other Non-rate Conditions of Service

The tariff provisions under which CECONY provides electric service limits the company's liability to pay for damages resulting from service interruptions to circumstances in which the company was grossly negligent. In addition, the tariff provides for reimbursement to electric customers for spoilage losses resulting from service interruptions in certain circumstances. In general, the company is obligated to reimburse affected residential and commercial customers for food spoilage of up to \$450 and \$9,000, respectively, and reimburse affected residential customers for prescription medicine spoilage losses without limitation on amount per claim. The company's maximum aggregate liability for such reimbursement for an incident is \$15 million. The company is not required to provide reimbursement to electric customers for outages attributable to generation or transmission system facilities or events beyond its control, such as storms, provided the company makes reasonable efforts to restore service as soon as practicable.

Generic Proceedings

The NYSPSC from time to time conducts generic proceedings to consider issues relating to all electric and gas utilities operating in New York State. Pending proceedings have included those relating to utilities exiting the service of selling electric energy and gas at retail (including an examination of utilities provider of last resort responsibility, the implementation of energy efficiency and renewable energy programs and consumer protections) and addressing any rate disincentives to the promotion of energy efficiency and distributed generation. The Utilities are typically active

14

Table of Contents

participants in such proceedings. The Utilities do not expect that the pending generic proceedings will have a material adverse effect on their financial positions, results of operation or liquidity.

Federal Utility Regulation

The Federal Energy Regulatory Commission (FERC), among other things, regulates the transmission and wholesale sales of electricity in interstate commerce and the transmission and sale of natural gas for resale in interstate commerce. In addition, the FERC has the authority to impose penalties, which could be substantial, including penalties for the violation of reliability rules. Certain activities of the Utilities and the competitive energy businesses are subject to the jurisdiction of FERC. The Utilities are subject to regulation by the FERC with respect to electric transmission rates and to regulation by the NYSPSC with respect to electric and gas retail commodity sales and local delivery service. As a matter of practice, the NYSPSC has approved delivery service rates that include both distribution and transmission costs.

New York Independent System Operator (NYISO)

The NYISO is a not-for-profit organization that controls and operates most of the electric transmission facilities in New York State, including those of CECONY, as an integrated system and administers wholesale markets for electricity in New York State. In addition to operating the state's high voltage grid, the NYISO administers the energy, ancillary services and capacity markets. The New York State Reliability Council promulgates reliability standards subject to FERC oversight. Pursuant to a requirement that is set annually by the NYSRC, the NYISO requires that entities supplying electricity to customers in New York State have generating capacity (either owned or contracted for) in an amount equal to the peak demand of their customers plus the applicable reserve margin. In addition, the NYISO has determined that entities that serve customers in New York City must have enough capacity that is electrically located in New York City to cover a substantial percentage (currently 80 percent) of the peak demands of their New York City customers. These requirements apply both to regulated utilities such as CECONY and O&R for the customers they supply under regulated tariffs and to companies such as Con Edison Solutions that supply customers on market terms. RECO, O&R's New Jersey subsidiary, provides electric service in an area that has a different independent system operator - PJM Interconnection LLC (PJM).

Competition

Competition from suppliers of oil and other sources of energy, including distributed generation (such as solar panels, fuel cells and micro-turbines), may provide alternatives for the Utilities' delivery customers. See Rate Agreements in Note B and Recoverable Energy Costs in Note A to the financial statements in Item 8.

The Utilities do not consider it reasonably likely that another company would be authorized to provide utility delivery service of electricity, natural gas or steam where the company already provides service. Any such other company would need to obtain NYSPSC consent, satisfy applicable local requirements, install facilities to provide the service, meet applicable services standards, and charge customers comparable taxes and other fees and costs imposed on the service. A new delivery company would also be subject to extensive ongoing regulation by the NYSPSC.

The competitive energy businesses participate in competitive energy supply and services businesses that are subject to different risks than those found in the businesses of the Utilities.

The Utilities

CECONY

CECONY, incorporated in New York State in 1884, is a subsidiary of Con Edison and has no significant subsidiaries of its own. Its principal business segments are its regulated electric, gas and steam businesses.

For a discussion of the company's operating revenues and operating income for each segment, see Results of Operations in Item 7. For additional information about the segments, see Note N to the financial statements in Item 8.

Table of Contents

Electric Operations

Electric Facilities

CECONY's capitalized costs for utility plant, net of accumulated depreciation, for distribution facilities were \$11,824 million and \$10,998 million at December 31, 2009 and 2008, respectively. For its transmission facilities, the costs for utility plant, net of accumulated depreciation, were \$1,953 million and \$1,901 million at December 31, 2009 and 2008, respectively, and for its generation facilities, the costs for utility plant, net of accumulated depreciation, were \$392 million and \$384 million, at December 31, 2009 and 2008, respectively.

Distribution Facilities. CECONY owns 61 area distribution substations and various distribution facilities located throughout New York City and Westchester County. At December 31, 2009, the company's distribution system has a transformer capacity of 28,960 MVA, with 36,769 miles of overhead distribution lines and 95,627 miles of underground distribution lines. The underground distribution lines represent the single longest underground electric delivery system in the United States. To continue its commitment to upgrade and reinforce its energy delivery infrastructure so that it can continue to safely and reliably meet electric demand, the company added one new substation, Astor, in Manhattan in 2009. In 2010, it plans to add another substation, Newtown, in Queens.

Transmission Facilities. The company's transmission facilities are located in New York City and Westchester, Orange, Rockland, Putnam and Dutchess counties in New York State. At December 31, 2009, CECONY owns or jointly owns 438 miles of overhead circuits operating at 138, 230, 345 and 500 kV and 727 miles of underground circuits operating at 69, 138 and 345 kV. The company's 38 transmission substations and 61 area stations are supplied by circuits operated at 69 kV and above. In 2011, the company expects to complete a 9 1/2 mile transmission line connecting its Sprainbrook substation in Westchester County with the new Academy transmission substation being constructed in upper Manhattan.

CECONY's transmission facilities interconnect with those of National Grid, Central Hudson Gas & Electric Corporation, O&R, Iberdrola USA, Connecticut Light and Power Company, Long Island Power Authority, NYPA and Public Service Electric and Gas Company.

Generating Facilities. CECONY's electric generating facilities consist of plants located in Manhattan with an aggregate capacity of 706 MW. The company expects to have sufficient amounts of gas and fuel oil available in 2010 for use in these facilities. The largest and newest of the company's electric generating facilities is the East River Repowering Project. The facility commenced commercial operations in April 2005 and currently supplies electric capacity of 297 MW based on a summer rating.

Electric Sales and Deliveries

CECONY delivers electricity to its full service customers who purchase electricity from the company. The company also delivers electricity to its customers who purchase electricity from other suppliers through the company's retail access plan. In addition, the company delivers electricity to state and municipal customers of NYPA and economic development customers of municipal electric agencies.

Table of Contents

The company charges all customers in its service area for the delivery of electricity. The company generally recovers, on a current basis, the cost of the electricity that it buys and then sells to its full-service customers. It does not make any margin or profit on the electricity it sells. Effective April 2008, CECONY's electric revenues became subject to a revenue decoupling mechanism. As a result, its electric delivery revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. CECONY's electric sales and deliveries, excluding off-system sales, for the last five years were:

<i>(millions of kWhs)</i>	Year Ended December 31,				
	2005	2006	2007	2008	2009
CECONY full service customers	29,344	26,101	25,314	24,640	23,483

Commercial and Industrial	\$ 18.6	\$ 18.3	\$ 19.2	\$ 19.2	\$ 19.6

(a) Includes Municipal Agency Sales

For further discussion of the company's electric operating revenues and its electric results, see "Results of Operations" in Item 7. For additional segment information, see Note N to the financial statements in Item 8.

Electric Peak Demand

The electric peak demand in CECONY's service area occurs during the summer air conditioning season. The 2009 service area peak demand, which occurred on August 21, 2009, was 12,242 MW. The 2009 peak demand included an estimated 5,562 MW for CECONY's full-service customers, 4,776 MW for customers participating in its electric retail access program and 1,904 MW for NYPA's customers and municipal electric agency customers. The NYISO did not invoke demand reduction programs on August 21, 2009, as it had on peak demand days in some previous years (most recently 2006). "Design weather" for the electric system is a standard to which the actual peak demand is adjusted for evaluation and planning purposes. Since the majority of demand reduction programs are invoked only in specific circumstances, design conditions do not include these programs' potential impact. However, the CECONY forecasted peak demand at design conditions does include the impact of permanent demand reduction programs. The company estimates that, under design weather conditions, the 2010 service area peak demand will be 13,500 MW, including an estimated 5,950 MW for its full-service customers, 5,475 MW for its electric retail access customers and 2,075 MW for NYPA's customers and municipal electric agency customers. The company forecasts average annual growth of the peak electric demand in the company's service area over the next five years at design conditions to be approximately 0.3 percent per year. The company continues to monitor the potential impact on customer demand from the continuing difficult economic conditions.

Electric Supply

Most of the electricity sold by CECONY to its customers in 2009 was purchased under firm power contracts or through the wholesale electricity market administered by the NYISO. Con Edison expects that these resources will again be adequate to meet the

Table of Contents

requirements of its customers in 2010. The company plans to meet its continuing obligation to supply electricity to its customers through a combination of electricity purchased under contracts, purchased through the NYISO's wholesale electricity market, or generated from its electricity generating facilities. For information about the company's contracts for approximately 3,469 MW of electric generating capacity, see Notes I and O to the financial statements in Item 8. To reduce the volatility of its customers' electric energy costs, the company has contracts to purchase electric energy and enters into derivative transactions to hedge the costs of a portion of its expected purchases under these contracts and through the NYISO's wholesale electricity market.

CECONY owns generating stations in New York City associated primarily with its steam system. As of December 31, 2009, the generating stations had a combined electric capacity of approximately 706 MW, based on 2009 summer test ratings. For information about electric generating capacity owned by the company (706 MW), see [Electric Operations](#), [Electric Facilities](#), [Generating Facilities](#), above.

In general, the Utilities recover their purchased power costs, including the cost of hedging purchase prices, pursuant to rate provisions approved by the state public utility regulatory authority having jurisdiction. See [Financial and Commodity Market Risks](#), [Commodity Price Risk](#), in Item 7 and [Recoverable Energy Costs](#) in Note A to the financial statements in Item 8. From time to time, certain parties have petitioned the NYSPSC to review these provisions, the elimination of which could have a material adverse effect on the Companies' financial position, results of operations or liquidity.

In a July 1998 order, the NYSPSC indicated that it agree(s) generally that CECONY need not plan on constructing new generation as the competitive market develops, but considers overly broad and did not adopt CECONY's request for a declaration that, solely with respect to providing generating capacity, it will no longer be required to engage in long-range planning to meet potential demand and, in particular, that it will no longer have the obligation to construct new generating facilities, regardless of the market price of capacity. CECONY monitors the adequacy of the electric capacity resources and related developments in its service area, and works with other parties on long-term resource adequacy issues within the framework of the NYISO. In addition, the NYISO has adopted reliability rules that include obligations on transmission owners (such as CECONY) to construct facilities that may be needed for system reliability if the market does not solve a reliability need identified by the NYISO.

In 2009, the Governor of New York announced a new goal of meeting 45 percent of the State's electricity needs with energy efficiency or renewable resources by 2015. The goal is to be achieved by reducing electricity consumption by 15 percent, and having 30 percent of the electricity used in New York provided by renewable resources. Establishment of the renewable resources target began in September 2004, when the NYSPSC issued an order establishing a renewable portfolio standard (RPS) which provides that by 2013, 24 percent of the State's energy needs would come from large renewable facilities (such as wind, hydro, and biomass) and smaller customer-sited renewable generation (limited to solar, fuel cells, and wind farm less than 300 kW in size), and 1 percent would come from green marketing efforts. The NYSPSC agreed with the Utilities that the responsibility for procuring the new renewable resources would rest with the NYSERDA, and not the Utilities. In implementing the RPS for large renewable resources, NYSERDA enters into long-term agreements with developers, and pays the developers renewable premiums based on the facilities' energy output. For customer-sited resources, NYSERDA provides rebates when customers install eligible renewable technologies. The renewable premiums, rebates, and NYSERDA's administrative fee are financed through a volumetric charge imposed on the delivery customers of each of the state's investor-owned utilities. Pursuant to the 2004 NYSPSC order, CECONY billed customers RPS surcharges of \$32 million in 2009 and \$28 million in 2008. These surcharges will increase as NYSERDA increases its renewables energy target. The NYSPSC issued an order in January 2010 formally increasing the RPS target to 30 percent by 2015 and requiring NYSPSC

Table of Contents

staff to develop a program to address the geographic balance of the RPS, setting-aside up to \$30 million per year to be spent in the downstate region (including in the Utilities service territories) until 2015 for this purpose. Large renewable resources are grid-connected and sell their energy output in the wholesale energy market administered by the NYISO. As a result of the Utilities participation in the NYISO wholesale markets, a portion of the Utilities NYISO energy purchases are sourced from renewable resources. The energy produced by customer-sited renewables offsets the energy which the Utilities would otherwise have procured, thereby reducing the overall level of non-renewable energy consumed. In 2008, the NYSPSC issued an order authorizing the Utilities to begin implementing energy efficiency programs. Costs of the programs will be recovered primarily through a separate non-bypassable charge.

Gas Operations

Gas Facilities

CECONY's capitalized costs for utility plant, net of accumulated depreciation, for gas facilities, which are primarily distribution facilities, were \$2,892 million and \$2,665 million at December 31, 2009 and 2008, respectively.

Natural gas is delivered by pipeline to CECONY at various points in its service territory and is distributed to customers by the company through an estimated 4,333 miles of mains and 385,223 service lines. The company owns a natural gas liquefaction facility and storage tank at its Astoria property in Queens, New York. The plant can store approximately 1,000 mdths of which a maximum of about 250 mdths can be withdrawn per day. The company has about 1,226 mdths of additional natural gas storage capacity at a field in upstate New York, owned and operated by Honeoye Storage Corporation, a corporation 28.8 percent owned by CECONY and 19.1 percent owned by Con Edison.

Gas Sales and Deliveries

The company generally recovers the cost of the gas that it buys and then sells to its firm sales customers. It does not make any margin or profit on the gas it sells. CECONY's gas revenues are subject to a weather normalization clause and, effective October 2007, a revenue decoupling mechanism. As a result, its gas delivery revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved.

Table of Contents

CECONY's gas sales and deliveries for the last five years were:

	Year Ended December 31,				
	2005	2006	2007	2008	2009
Gas Delivered (Mdth)					
Firm Sales					
Full service	84,975	71,858	73,734	68,943	67,994
Firm transportation	19,088	23,688	39,017	43,245	48,671
Total Firm Sales and Transportation	104,063	95,546	112,751	112,188	116,665
Interruptible Sales	13,128	11,995	10,577	11,220	8,225
Total Gas Sold to Con Edison of New York Customers	117,191	107,541	123,328	123,408	124,890
Transportation of customer-owned gas					
NYPA	22,305	41,057	42,085	44,694	37,764
Other (mainly generating plants)	66,667	83,688	95,260	94,086	86,454
Off-System Sales	128	691	2,325	154	1
Total Sales and Transportation	206,291	232,977	262,998	262,342	249,109
Gas Delivered (\$ in millions)					
Firm Sales					
Full service	\$ 1,309	\$ 1,252	\$ 1,341	\$ 1,332	\$ 1,229
Firm transportation	69	105	168	202	266
Total Firm Sales and Transportation	1,378	1,357	1,509	1,534	1,495
Interruptible Sales	149	121	88	138	75
Total Gas Sold to Con Edison of New York Customers	1,527	1,478	1,597	1,672	1,570
Transportation of customer-owned gas					
NYPA	4	4	4	4	4
Other (mainly generating plants)	75	76	76	85	73
Off-System Sales	2	5	17	1	
Other operating revenues (mainly regulatory amortizations)	22	50	65	77	54
Total Sales and Transportation	\$ 1,630	\$ 1,613	\$ 1,759	\$ 1,839	\$ 1,701
Average Revenue per DTH Sold					
Residential	\$ 16.94	\$ 19.24	\$ 19.78	\$ 21.15	\$ 20.33
General	\$ 13.41	\$ 15.07	\$ 16.01	\$ 16.77	\$ 14.91

For further discussion of the company's gas operating revenues and its gas results, see Results of Operations in Item 7. For additional segment information, see Note N to the financial statements in Item 8.

Gas Peak Demand

The gas peak demand for firm service customers in CECONY's service area occurs during the winter heating season. The daily peak day demand during the winter 2009/2010 (through January 31, 2010) occurred on January 3, 2010 when the demand reached 872 mdths. The 2009/2010 winter demand included an estimated 502 mdths for CECONY's full-service customers and 370 mdths for customers participating in its gas retail access program. Design weather for the gas system is a standard to which the actual peak demand is adjusted for evaluation and planning purposes. The company estimates that under design weather conditions the 2010/2011 service area peak demand will be 1,146 mdths, including an estimated 661 mdths for its full-service customers and 485 mdths for its retail access customers. The company forecasts average annual growth of the peak gas demand over the next five years at design conditions to be approximately 1.0 percent in its service area. The forecasted peak demand at design conditions does not include gas used by interruptible gas customers or in generating stations (electricity and steam). The company continues to monitor the potential impact on customer demand from the continuing difficult economic conditions.

Gas Supply

CECONY and O&R have combined their gas requirements, and contracts to meet those requirements, into a single portfolio. The combined

Table of Contents

portfolio is administered by, and related management services are provided by, CECONY (for itself and as agent for O&R) and costs are allocated between the Utilities in accordance with provisions approved by the NYSPSC. See Note S to the financial statements in Item 8.

Charges from suppliers for the firm purchase of gas, which are based on formulas or indexes or are subject to negotiation, are generally designed to approximate market prices. The gas supply contracts are for various terms extending to 2012. The Utilities have contracts with interstate pipeline companies for the purchase of firm transportation from upstream points where gas has been purchased to the Utilities' distribution systems, and for upstream storage services. Charges under these transportation and storage contracts are approved by the FERC. Such contracts are for various terms extending to 2023. The Utilities are required to pay certain fixed charges under the supply, transportation and storage contracts whether or not the contracted capacity is actually used. These fixed charges amounted to approximately \$277 million in 2009, including \$272 million for CECONY. See *Contractual Obligations* below. In addition, the Utilities purchase gas on the spot market and contract for interruptible gas transportation. See *Recoverable Energy Costs* in Note A to the financial statements in Item 8.

Steam Operations**Steam Facilities**

CECONY's capitalized costs for utility plant, net of accumulated depreciation for steam facilities were \$1,555 million and \$1,512 million at December 31, 2009 and 2008, respectively.

CECONY generates steam at one steam-electric generating station and five steam-only generating stations and distributes steam to its customers through approximately 105 miles of transmission, distribution, and service piping.

Steam Sales and Deliveries

CECONY's steam sales and deliveries for the last five years were:

	Year Ended December 31,				
	2005	2006	2007	2008	2009
Steam Sold (MMlbs)					
General	655	515	589	785	786
Apartment house	7,748	6,774	7,519	6,614	5,962
Annual power	18,474	15,961	17,696	16,577	16,269
Total Steam Delivered to CECONY Customers	26,877	23,250	25,804	23,976	23,017
Steam Sold (\$ in millions)					
General	\$ 22	\$ 21	\$ 23	\$ 23	\$ 28
Apartment house	173	174	188	186	165
Annual power	417	405	443	468	446
Other operating revenues	37	23	32	30	22
Total Steam Delivered to CECONY Customers	\$ 649	\$ 623	\$ 686	\$ 707	\$ 661
Average Revenue per Mlb Sold	\$ 22.77	\$ 25.81	\$ 25.34	\$ 28.24	\$ 27.76

For further discussion of the company's steam operating revenues and its steam results, see *Results of Operations* in Item 7. For additional segment information, see Note N to the financial statements in Item 8.

Steam Peak Demand and Capacity

Demand for steam in CECONY's service area peaks during the winter heating season. The one-hour peak demand during the winter of 2009/2010 (through January 31, 2010) occurred on January 4, 2010 when the demand reached 8.0 MMlbs per hour. The company's estimate for the winter of 2010/2011 peak demand of its steam customers is 9.6 MMlbs per hour under design criteria, which assumes severe weather.

Table of Contents

On December 31, 2009, the steam system had the capability of delivering approximately 13.2 MMlbs of steam per hour and CECONY estimates that the system will have the capability to deliver this capacity in the 2010/2011 winter.

Steam Supply

Fifty-two percent of the steam produced by CECONY in 2009 was supplied by the company's steam-only generating assets; 31 percent was produced by the company's steam-electric generating assets, where steam and electricity are primarily cogenerated; and 17 percent was purchased under an agreement with Brooklyn Navy Yard Cogeneration Partners L.P.

O&R**Electric Operations****Electric Facilities**

O&R's capitalized costs for utility plant, net of accumulated depreciation, for distribution facilities were \$618 million and \$588 million at December 31, 2009 and 2008, respectively. For its transmission facilities, the costs for utility plant, net of accumulated depreciation, were \$137 million and \$136 million at December 31, 2009 and 2008, respectively.

O&R, RECO and Pike, own, in whole or in part, transmission and distribution facilities which include 554 circuit miles of transmission lines, 13 transmission substations, 63 distribution substations, 84,585 in-service line transformers, 3,764 pole miles of overhead distribution lines and 1,696 miles of underground distribution lines. O&R's transmission system is part of the NYISO system except that portions of RECO's system are located within the transmission area controlled by the PJM.

Electric Sales and Deliveries

O&R generally recovers, on a current basis, the cost of the electricity that it buys and then sells to its full-service customers. It does not make any margin or profit on the electricity it sells. Effective July 2008, O&R's New York electric revenues (which accounted for 68 percent of O&R's electric revenues in 2009) became subject to a revenue decoupling mechanism. As a result, O&R's New York electric delivery revenues are generally not affected by charges in delivery volumes from levels assumed when rates were approved. O&R's electric sales in New Jersey and Pennsylvania are not subject to a decoupling mechanism. O&R's electric sales and deliveries, excluding off-system sales for the last five years were:

<i>(millions of kWhs)</i>	Year Ended December 31,				
	2005	2006	2007	2008	2009
Total deliveries to O&R full service customers	4,295	4,010	4,224	4,093	3,673
Delivery service for retail access customers	1,836	1,766	1,688	1,814	1,901

<i>Average Revenue per kWh Sold (Cents)</i>					
Residential	\$ 13.34	\$ 13.98	\$ 15.56	\$ 17.44	\$ 17.19
Commercial and Industrial	\$ 10.90	\$ 11.34	\$ 12.90	\$ 14.58	\$ 13.33

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

For further discussion of the company's electric operating revenues and its electric results, see Results of Operations in Item 7. For additional segment information, see Note N to the financial statements in Item 8.

Electric Peak Demand

The electric peak demand in O&R's service area occurs during the summer air conditioning season. The 2009 service area peak demand, which occurred on August 17, 2009, was 1,375 MW. The 2009 peak demand included an estimated 999 MW for O&R's

22

Table of Contents

full-service customers and 376 MW for customers participating in its electric retail access program. The NYISO did not invoke demand reduction programs. Design weather for the electric system is a standard to which the actual peak demand is adjusted for evaluation and planning purposes. Since the majority of demand reduction programs are invoked only in specific circumstances, design conditions do not include these programs' potential impact. However, the O&R forecasted peak demand at design conditions does include the impact of permanent demand reduction programs. The company estimates that, under design weather conditions, the 2010 service area peak demand will be 1,595 MW, including an estimated 1,192 MW for its full-service customers and 403 MW for its electric retail access customers. The company forecasts average annual growth of the peak electric demand in the company's service area over the next five years at design conditions to be approximately 0.9 percent per year. The company continues to monitor the potential impact on customer demand from the continuing difficult economic conditions.

Electric Supply

The electricity O&R sold to its customers in 2009 was purchased under firm power contracts or through the wholesale electricity markets administered by the NYISO and PJM. The company expects that these resources will again be adequate to meet the requirements of its customers in 2010.

O&R does not own any electric generating capacity.

Gas Operations

Gas Facilities

O&R's capitalized costs for utility plant, net of accumulated depreciation for gas facilities, which are primarily distribution facilities, were \$334 million and \$317 million at December 31, 2009 and 2008, respectively. O&R and Pike own their gas distribution systems, which include 1,732 miles of mains. In addition, O&R owns a gas transmission system, which includes 77 miles of mains.

Table of Contents**Gas Sales and Deliveries**

O&R generally recovers the cost of the gas that it buys and then sells to its firm sales customers. It does not make any margin or profit on the gas it sells. O&R's gas revenues are subject to a weather normalization clause. Effective November 2009, O&R's New York gas revenues (which accounted for substantially all of O&R's gas revenues in 2009) became subject to a revenue decoupling mechanism. As a result, its gas delivery revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. O&R's gas deliveries and sales for the last five years were:

	Year Ended December 31,				
	2005	2006	2007	2008	2009

For further discussion of the company's gas operating revenues and its gas results, see Results of Operations in Item 7. For additional segment information, see Note N to the financial statements in Item 8.

Gas Peak Demand

The gas peak demand for firm service customers in O&R's service area occurs during the winter heating season. The daily peak day demand during the winter 2009/2010 (through January 31, 2010) occurred on January 3, 2010 when the demand reached 169 mdths. The 2009/2010 winter demand included an estimated 81 mdths for O&R's full-service customers and 88 mdths for customers participating in its gas retail access program. Design weather for the gas system is a standard to which the actual peak demand is adjusted for evaluation and planning purposes. The company estimates that under design weather conditions the 2010/2011 service area peak demand will be 216 mdths, including an estimated 101 mdths for its full-service customers and 115 mdths for its retail access customers. The company forecasts average annual growth of the peak gas demand over the next five years at design conditions to be approximately 0.6 percent in the company's service area. The forecasted peak demand at design conditions does not include gas used by interruptible gas customers or in generating stations. The company continues to monitor the potential

Table of Contents

impact on customer demand from the continuing difficult economic conditions.

Gas Supply

O&R and CECONY have combined their gas requirements and purchase contracts to meet those requirements into a single portfolio. See CECONY Gas Operations Gas Supply above.

Competitive Energy Businesses

Con Edison pursues competitive energy opportunities through three wholly-owned subsidiaries: Con Edison Solutions, Con Edison Energy and Con Edison Development. These businesses include the sales and related hedging of electricity to wholesale and retail customers, sales of certain energy-related products and services, and participation in energy infrastructure projects. At December 31, 2009, Con Edison's equity investment in its competitive energy businesses was \$279 million and their assets amounted to \$751 million.

The competitive energy businesses are evaluating opportunities to invest in renewable generation and energy-related infrastructure projects.

Con Edison Solutions

Con Edison Solutions primarily sells electricity to industrial and large commercial customers in the northeastern United States. It also sells electricity to residential customers in the northeastern United States. Con Edison Solutions does not sell electricity to the Utilities. Con Edison Solutions sells electricity to customers who are provided delivery service by the Utilities. It also provides energy efficiency services, procurement and management services to companies and governmental entities throughout most of the United States.

Con Edison Solutions was reported by KEMA, Inc. in September 2009 to be the 9th largest non-residential retail electricity provider in the United States. Most of the company's electricity sales volumes are to industrial, large commercial and government customers. The company also sells to two retail aggregation entities in Massachusetts and to individual residential customers in the northeastern United States. At December 31, 2009, it served approximately 75,000 customers, not including approximately 165,000 served under the two aggregation agreements. Con Edison Solutions sold 12.7 million MWHs of electricity in 2009, an 18 percent increase from 2008 volumes.

	2005	2006	2007	2008	2009
Retail electric volumes sold (MWH)	9,970,252	10,633,151	12,209,233	10,749,361	12,723,403
Number of retail customers accounts:					
Industrial and large commercial	5,775*	10,957*	14,335*	14,491*	26,009*
Mass market	24,989	31,725	33,979	39,976	49,094

* Excludes aggregation agreement customers

Con Edison Solutions seeks to serve customers in utility service territories that encourage retail competition through transparent pricing, purchase of receivables programs or utility-sponsored customer acquisition programs. The company currently sells electricity in the service territories of 40 utilities in the states of New York, Massachusetts, Connecticut, New Hampshire, Maine, New Jersey, Delaware, Maryland, Illinois, Pennsylvania and Texas, as well as the District of Columbia.

Total peak load at the end of 2009 was 4,500 MWs. Approximately 42 percent of the sales volumes were in New York, 25 percent in New England, 28 percent in PJM and the remainder in Texas.

Con Edison Solutions offers the choice of green power to customers. In 2009, it sold approximately 175,000 MWHs of green power, ending the year with almost 20,300 customers. Green power is a term used by electricity suppliers to describe electricity produced from renewable energy sources, including wind, hydro and solar.

Through its second business line, Con Edison Solutions provides energy-efficiency services to government and commercial customers. The services include the design

Table of Contents

and installation of lighting retrofits, high-efficiency heating, ventilating and air conditioning equipment and other energy saving technologies. The company is compensated for their services based primarily on the increased energy efficiency of the installed equipment over a multi-year period. Con Edison Solutions has won competitive solicitations for energy savings contracts with the Department of Energy and the Department of Defense, and a shared energy savings contract with the United States Postal Service.

Con Edison Energy

Con Edison Energy manages the output and fuel requirements for over 8,000 MW of third-party generating plants in the northeastern United States. The company also provides wholesale hedging and risk management services to Con Edison Solutions. In addition, the company sells electricity to utilities in the northeastern United States, primarily under fixed price contracts, which they use to supply their full-service customers. It does not currently sell electricity to the Utilities, though it has in the past and may do so in the future.

	2005	2006	2007	2008	2009
Wholesale electricity sales (MWH)*	1,288,696	6,548,658	8,046,474	7,798,463	5,472,083

* Prior to 2008, wholesale electricity sales were reported as part of Con Edison Development.

Con Edison Development

Con Edison Development participates in energy infrastructure projects. The company's investments include a minority interest in an oil-fired plant in Guatemala, an investment in an affordable housing partnership and leasehold interests in a gas-fired plant and a gas distribution network in the Netherlands (see Note J to the financial statements in Item 8). Con Edison Development and its subsidiary, CSD/SCS Newington, LLC, completed the sale of their ownership interests in electricity generating plants with an aggregate capacity of approximately 1,706 MW in the second quarter of 2008. See Note U to the financial statements in Item 8.

	2005	2006	2007	2008	2009
Generating capacity (MW)	1,668	1,668	1,739	21	21
Generation sold (MWH)	3,602,727	3,154,988	3,558,302	1,422,491	

Capital Requirements and Resources**Capital Requirements**

The following table contains the Companies' capital requirements for the years 2007 through 2009 and their current estimate of amounts for 2010 through 2012.

(Millions of Dollars)	2007	Actual 2008	2009	2010	Estimate 2011	2012

Total	\$ 2,696	\$ 2,813	\$ 2,856	\$ 3,034	\$ 2,271	\$ 2,609

* Estimates for 2010-2012 include an aggregate \$129 million for one-half of the costs of certain smart electric grid projects for which the company has been selected by the U.S. Department of Energy for negotiations to receive grants for the other half of the projects' costs under the American Recovery and Reinvestment Act of 2009.

** CECONY's capital expenditures for environmental protection facilities and related studies were \$148 million in 2009 and are estimated to be \$143 million in 2010.

*** For 2007, 2008, 2009 and 2010, includes long-term securities redeemed in advance of maturity.

26

Table of Contents

The Utilities have an ongoing need for substantial capital investment in order to meet the growth in demand for electricity, and electric, gas and steam reliability needs. The Utilities estimated construction expenditures for 2010, 2011 and 2012 are subject to change depending on the outcome of certain regulatory proceedings. See Note B to the financial statements in Item 8.

The estimated capital expenditure for the competitive energy businesses reflects potential investments in renewable generation and energy infrastructure projects and could significantly increase or decrease from the amounts estimated depending on market conditions and opportunities.

Contractual Obligations

The following table summarizes the Companies' material obligations at December 31, 2009 to make payments pursuant to contracts. Long-term debt, capital lease obligations and other long-term liabilities are included on their balance sheets. Operating leases and electricity purchase agreements (for which undiscounted future annual payments are shown) are described in the notes to the financial statements.

- (a) Includes interest on variable rate debt calculated at rates in effect at December 31, 2009.
- (b) Included in these amounts is the cost of minimum quantities of energy that the company is obligated to purchase at both fixed and variable prices.
- (c) Included in these amounts is the cost of minimum quantities of natural gas supply, transportation and storage that the Utilities are obligated to purchase at both fixed and variable prices.
- (d) Amounts shown for other purchase obligations, which reflect capital and operations and maintenance costs incurred by the Utilities in running their day-to-day operations, were derived from the Utilities' purchasing systems as the difference between the amounts authorized and the amounts paid (or vouchered to be paid) for each obligation. For many of these obligations, the Utilities are committed to purchase less than the amount authorized. Payments for the Other Purchase Obligations are generally assumed to be made ratably over the term of the obligations. The Utilities believe that unreasonable effort and expense would be involved to modify their purchasing systems to enable them to report their Other Purchase Obligations in a different manner.
- (e) Amounts represent commitments to purchase minimum quantities of electric energy and capacity, natural gas, natural gas pipeline capacity and generating plant services entered into by Con Edison's competitive energy businesses.

The Companies' commitments to make payments in addition to these contractual commitments include their other liabilities reflected in their balance sheets, any funding obligations for their pension and other postretirement benefit plans, financial hedging activities, their collective bargaining agreements and Con Edison's guarantees of certain obligations of its businesses. See Notes E, F, O and Guarantees in Note H to the financial statements in Item 8.

Capital Resources

Con Edison is a holding company that operates only through its subsidiaries and has no material assets other than its interests in its subsidiaries. Con Edison expects to finance its capital requirements primarily through the sale of securities, including the issuance in 2010 of between \$300 million and \$500 million of Con Edison common shares (in addition to stock issuances under its dividend reinvestment and employee stock plans) and from dividends it receives from its subsidiaries. Con Edison's ability to make payments on its external borrowings and dividends on its common shares is also dependent on its receipt of dividends from its subsidiaries or proceeds from the sale of its securities or its interests in its subsidiaries.

For information about restrictions on the payment of dividends by the Utilities and significant debt covenants, see Note C to the financial statements in Item 8.

For information on the Companies' commercial paper program and revolving credit agreements with banks, see Note D to the financial statements in Item 8.

The Utilities expect to finance their operations, capital requirements and payment of dividends to Con Edison from internally-generated funds, contributions of equity capital from Con Edison and external borrowings, including the issuance in 2010 of long-term debt of between \$600 million and \$900 million in addition to debt issuances for \$680 million of maturing securities.

The Companies require access to the capital markets to fund capital requirements that are substantially in excess of available internally-generated funds. See Capital Requirements, above. Each of the Companies believes that it will continue to be able to access capital, although capital market conditions may affect the timing of the Companies' financing activities. The Companies monitor the availability and costs of various forms of capital, and will seek to issue Con Edison common stock and other securities when it is necessary or advantageous to do so. For information about the Companies' long-term debt and short-term borrowing, see Notes C and D to the financial statements in Item 8.

Table of Contents

In 2009, the NYSPSC authorized CECONY and O&R to issue up to \$4,800 million and \$500 million of securities, respectively (of which up to \$550 million and \$100 million, respectively, may be preferred stock and up to the entire amount authorized may be debt securities). At December 31, 2009, CECONY and O&R had issued \$770 million and \$75 million, respectively, of debt securities pursuant to such authorization. In addition, the NYSPSC has authorized the Utilities to refund outstanding debt securities and preferred stock should the Utilities determine that it is economic to do so.

Con Edison's competitive energy businesses have financed their operations and capital requirements primarily with capital contributions and borrowings from Con Edison, internally-generated funds and external borrowings. See Note Q to the financial statements in Item 8.

For each of the Companies, the ratio of earnings to fixed charges (SEC basis) for the last five years was:

	Earnings to Fixed Charges (Times)				
	2005	2006	2007	2008	2009
Con Edison	3.3	3.0	3.4	3.4	3.0
CECONY	3.6	3.2	3.6	3.3	3.1

For each of the Companies, the common equity ratio for the last five years was:

	Common Equity Ratio				
	(Percent of total capitalization)				
	2005	2006	2007	2008	2009
Con Edison	49.0	48.5	53.7	50.7	50.5
CECONY	50.7	50.0	52.3	50.8	50.3

The commercial paper of the Companies is rated P-2, A-2 and F2, respectively, by Moody's, S&P and Fitch. Con Edison's long-term credit rating is Baa1, BBB+ and BBB+, respectively, by Moody's, S&P and Fitch. The unsecured debt of CECONY is rated A3, A- and A-, respectively, by Moody's, S&P and Fitch. The unsecured debt of O&R is rated Baa1, A- and A, respectively, by Moody's, S&P and Fitch. Securities ratings assigned by rating organizations are expressions of opinion and are not recommendations to buy, sell or hold securities. A securities rating is subject to revision or withdrawal at any time by the assigning rating organization. Each rating should be evaluated independently of any other rating.

CECONY has \$636 million of tax-exempt debt for which the interest rates are to be determined pursuant to periodic auctions. Of this amount, \$391 million is insured by Ambac Assurance Corporation and \$245 million is insured by Syncora Guarantee Inc. (formerly XL Capital Assurance Inc.). Credit rating agencies have downgraded the ratings of these insurers from AAA to lower levels. Subsequently, there have not been sufficient bids to determine the interest rates pursuant to auctions, and interest rates have been determined by reference to a variable rate index. The weighted average annual interest rate on this tax-exempt debt was 0.44 percent on December 31, 2009. The weighted average interest rate was 0.80 percent, 3.94 percent and 3.77 percent for the years 2009, 2008 and 2007, respectively. Under CECONY's current electric and steam rate orders, variations in auction rate debt interest expense are reconciled to the levels set in rates.

CECONY has \$225 million of uninsured tax-exempt debt and O&R has \$99 million of insured tax-exempt debt that currently bears interest at rates determined weekly and is subject to tender by bondholders for purchase by the company. Of the \$99 million of O&R debt, \$55 million is insured by Financial Guaranty Insurance Company and \$44 million is insured by Ambac Assurance Corporation (see Note C to the financial statements in Item 8). Downgrades in the credit ratings of these insurers have resulted in interest rates on this O&R debt that at times have been significantly higher than the interest rates borne by CECONY's \$225 million of uninsured weekly rate tender bonds. As of December 31, 2009, the weighted average annual interest rate on the O&R insured weekly rate tender bonds, excluding the effects of an interest rate swap agreement (see Interest Rate Swaps in Note O to the financial statements in Item 8), was 0.27 percent and the rate on the CECONY weekly rate tender bonds was 0.23 percent. Under O&R's current New York electric and gas rate orders, variations in variable rate tax-exempt debt interest expense are reconciled to the level set in rates. O&R is evaluating alternatives with respect to its weekly rate tender bonds and termination of its interest rate swap agreement.

Table of Contents**Environmental Matters****Climate Change**

As indicated in 2007 by the Intergovernmental Panel on Climate Change, emissions of greenhouse gases, including carbon dioxide, are very likely changing the world's climate.

Climate change could affect customer demand for the Companies' energy services. The effects of climate change might also include physical damage to the Companies' facilities and disruption of their operations due to the impact of more extreme weather-related events.

Based on the most recent data (2006) published by the federal Department of Energy, Con Edison estimates that its greenhouse gas emissions constitute less than 0.1 percent of the nation's greenhouse gas emissions.

Con Edison's emissions of greenhouse gases during the past five years (expressed in terms of millions of tons of carbon dioxide equivalent) were:

	2005	2006	2007	2008	2009
CO ₂ equivalent emissions	6.6	5.4	5.3	4.6	4.2

The 36 percent decrease in greenhouse gas emissions during the past five years reflects equipment and repair projects, including projects to reduce sulfur hexafluoride emissions, and increased use of natural gas at CECONY's steam production facilities. Emissions from electric generation at the Con Edison Development electric generating plants (which were sold in 2008 - see Note U to the financial statements in Item 8) have been removed from the above data for 2008 and prior years.

The Companies are working to further reduce greenhouse gas emissions. CECONY has participated for several years in voluntary initiatives with the Environmental Protection Agency to reduce its methane and sulfur hexafluoride emissions. The Utilities reduce methane emissions from the operation of their gas distribution systems through pipe maintenance and replacement programs, by operating system components at lower pressure, and by introducing new technologies. The Utilities reduce emissions of sulfur hexafluoride, which is used for arc suppression in substation circuit breakers and switches, by using improved technologies to locate and repair leaks, and by replacing older equipment. The Utilities also promote energy efficiency programs for customers that help them reduce their greenhouse gas emissions.

Beginning in 2009, CECONY is subject to carbon dioxide emissions regulations established by New York State under the Regional Greenhouse Gas Initiative. The initiative, a cooperative effort by Northeastern and Mid-Atlantic states, will first cap and then reduce carbon dioxide emissions resulting from the generation of electricity to a level ten percent below current emissions by 2018. Under the initiative, affected electric generators are required to obtain emission allowances to cover their carbon dioxide emissions, available primarily through auctions administered by participating states or a secondary market. The participating states initiated auctions in 2008 for portions of the 2009 and 2010 allowances.

Congress and New York State are considering legislation, and the EPA has indicated it will propose regulations, that will limit greenhouse gas emissions. Also, New York State has announced a goal to reduce greenhouse gas emissions 80 percent below 1990 levels by 2050, and New York City plans to reduce its greenhouse gas emissions 30 percent below 2005 levels by 2030. The cost to comply with legislation, regulations or initiatives limiting the Companies' greenhouse gas emissions could be substantial.

Environmental Sustainability

Con Edison seeks to improve the environmental sustainability of its businesses. CECONY has a recycling agreement with a company that re-refines at least 450,000 gallons of used transformer mineral oil each year. Recycling, instead of burning the used oil, avoids nearly 5,000 tons of carbon dioxide a year. Further, CECONY is in the process of replacing transformer mineral oil with vegetable-based natural ester oil, a renewable resource that is nontoxic and biodegradable. CECONY installed energy-efficient lighting in the tower of its corporate headquarters. At night, the tower uses 63 percent less energy than conventional lighting, lowering carbon emissions by approximately 19 tons a year. In 2008, O&R made

Table of Contents

energy efficiency improvements to its 90,000-square-foot facility in Spring Valley. O&R improved the efficiency of its lighting, windows, insulation, air conditioning and heating. As a result of these improvements, O&R will reduce its carbon dioxide emissions by nearly 1,400 tons annually.

CECONY

Superfund

The Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 and similar state statutes (Superfund) impose joint and several liability, regardless of fault, upon generators of hazardous substances for investigation costs, remediation costs and environmental damages. The sites as to which CECONY has been asserted to have liability under Superfund include its and its predecessor companies' former manufactured gas sites, its multi-purpose Astoria site, its former Arthur Kill electric generation plant site, its former Flushing Service Center site, the Gowanus Canal site, and other Superfund sites discussed below. There may be additional sites as to which assertions will be made that the Company has liability. For a further discussion of claims and possible claims against the Company under Superfund, estimated liability accrued for Superfund claims and recovery from customers of site investigation and remediation costs, see Note H to the financial statements in Item 8 (which information is incorporated herein by reference).

Manufactured Gas Sites

CECONY and its predecessors formerly manufactured gas and maintained storage holders for gas manufactured at sites in New York City and Westchester County (MGP Sites). Many of these sites are now owned by parties other than CECONY and have been redeveloped by them for other uses, including schools, residential and commercial developments and hospitals. The New York State Department of Environmental Conservation (NYSDEC) requires the company to investigate, and if necessary, develop and implement remediation programs for the sites, which include 34 manufactured gas plant sites and 17 storage holder sites and any neighboring areas to which contamination may have migrated.

The information available to CECONY for many of the MGP Sites is incomplete as to the extent of contamination and scope of the remediation likely to be required. Through the end of 2009, investigations have been started for all or portions of 46 MGP Sites, and have been completed at 18 of the sites. Coal tar and/or other manufactured gas production/storage-related environmental contaminants have been detected at 33 MGP Sites, including locations within Manhattan and other parts of New York City, and in Westchester County. Remediation has been completed at five sites and portions of six other sites.

Astoria Site

CECONY is permitted by the NYSDEC to operate a hazardous waste storage facility on property the company owns in the Astoria section of Queens, New York. Portions of the property were formerly the location of a manufactured gas plant and also have been used or are being used for, among other things, electric generation operations, electric substation operations, the storage of fuel oil and liquefied natural gas, and the maintenance and storage of electric equipment. As a condition of its NYSDEC permit, the company is required to investigate the property and, where environmental contamination is found and action is necessary, to conduct corrective action to remediate the contamination. The company has investigated various sections of the property and is performing additional investigations. The company has submitted to the NYSDEC and the New York State Department of Health a report identifying the known areas of contamination. The company estimates that its undiscounted potential liability for the completion of the site investigation and cleanup of the known contamination on the property will be at least \$17 million. See also Permit Non-Compliance and Pollution Discharges in Note H to the financial statements in Item 8.

Arthur Kill Site

Following a September 1998 transformer fire at CECONY's former Arthur Kill Generating Station, it was determined that oil containing high levels of PCBs was released to the environment during the incident. The company has completed NYSDEC-approved

Table of Contents

cleanup programs for the station's facilities and various soil and pavement areas of the site affected by the PCB release. Pursuant to a July 1999 NYSDEC consent order, the company completed a NYSDEC-approved assessment of the nature and extent of the contamination in the waterfront area of the station. The NYSDEC selected a remediation program for the waterfront area, and the company has implemented it pursuant to an additional consent order entered into during 2005. Field work associated with the waterfront remediation program has been completed and a final engineering report has been submitted to the NYSDEC. The company estimates that its undiscounted potential future liability for site monitoring, maintenance, and reporting to the NYSDEC will be approximately \$0.3 million.

Flushing Service Center Site

The owner of a former CECONY service center facility in Flushing, New York, informed the company that PCB contamination had been detected on a substantial portion of the property, which the owner remediated pursuant to the New York State Brownfield Cleanup Program administered by the NYSDEC and is redeveloping for residential and commercial use. The property owner's claim against the company for the cost of its environmental response costs for the site has been resolved. In September 2007, the NYSDEC demanded that the company investigate and remediate PCB contamination that may have migrated into the adjacent Flushing River from the site. In April 2008, the company and NYSDEC entered into a consent order under which the company has agreed to implement a NYSDEC-approved investigation program for the Flushing River and, if deemed necessary by the NYSDEC to protect human health and the environment from such contamination, to implement a NYSDEC-approved remediation program for any PCB contamination in the river attributable to the site. At this time, the company cannot estimate its liability for the investigation and cleanup of any PCB contamination that may have migrated to the Flushing River from the site, but such liability may be substantial.

Gowanus Canal

In August 2009, CECONY received a notice of potential liability and request for information from the EPA about the operations of the company and its predecessors at sites adjacent or near the 1.8 mile Gowanus Canal in Brooklyn, New York. The company understands that the EPA also has provided or will provide notices of potential liability and information requests to other parties. The EPA has proposed adding the Gowanus Canal to its National Priorities List of Superfund sites. The canal's adjacent waterfront is primarily commercial and industrial, currently consisting of concrete plants, warehouses, and parking lots, and the canal is near several residential neighborhoods. The company expects that the cost of assessment and remediation of hazardous substances in and around the Gowanus Canal will be substantial. CECONY is unable to predict its exposure to liability with respect to the Gowanus Canal site.

Other Superfund Sites

CECONY is a potentially responsible party (PRP) with respect to other Superfund sites where there are other PRPs and where it is generally not responsible for managing the site investigation and remediation. Work at these sites is in various stages, with the company participating in PRP groups at some of the sites. Investigation, remediation and monitoring at some of these sites have been, and are expected to continue to be, conducted over extended periods of time. The company does not believe that it is reasonably likely that monetary sanctions, such as penalties, will be imposed upon it by any governmental authority with respect to these sites.

The following table lists each of CECONY's other Superfund sites for which the company anticipates it may have a liability. The table also shows for each such site, its location, the year in which the company was designated or alleged to be a PRP or to otherwise have responsibilities with respect to the site (shown in the table under "Start"), the name of the court or agency in which proceedings with respect to the site are pending and its estimated percentage of total liability for each site. The company currently estimates that its potential liability for investigation, remediation,

Table of Contents

monitoring and environmental damages at each site is less than \$200,000, with the exception of the Cortese Landfill site, for which the estimate is \$1.2 million. Superfund liability is joint and several. The company's estimate of its liability for each site was determined pursuant to consent decrees, settlement agreements or otherwise and in light of the financial condition of other PRPs. The company's actual liability could differ substantially from amounts estimated.

Site	Location	Start	Court or Agency	% of Total Liability
Maxey Flats Nuclear	Morehead, KY	1986	EPA	0.8%
Curcio Scrap Metal	Saddle Brook, NJ	1987	EPA	100%
Metal Bank of America	Philadelphia, PA	1987	EPA	0.97%
Cortese Landfill	Narrowsburg, NY	1987	EPA	6.0%
Global Landfill	Old Bridge, NJ	1988	EPA	0.3%
Borne Chemical	Elizabeth, NJ	1997	NJDEP	0.7%

O&R**Superfund**

The sites at which O&R has been asserted to have liability under Superfund include its manufactured gas sites, its West Nyack site, the Newark Bay site, and other Superfund sites discussed below. There may be additional sites as to which assertions will be made that O&R has liability. For a further discussion of claims and possible claims against O&R under Superfund, see Note G to the financial statements in Item 8 (which information is incorporated herein by reference).

Manufactured Gas Sites

O&R and its predecessors formerly owned and operated manufactured gas plants at seven sites (O&R MGP Sites) in Orange County and Rockland County, New York. Three of these sites are now owned by parties other than O&R, and have been redeveloped by them for residential, commercial or industrial uses. The NYSDEC is requiring O&R to develop and implement remediation programs for the O&R MGP Sites including any neighboring areas to which contamination may have migrated.

Through the end of 2009, O&R has conducted remedial investigations at all seven O&R MGP Sites and completed investigation of six of these sites. Supplemental investigation activities are ongoing at one of the former MGP sites. O&R has completed the remediation at one of its sites; has completed the NYSDEC-approved remediation program for the land portion of its Nyack site; and has received NYSDEC's decision regarding the remedial work to be done at two other sites. Remedial design will begin in 2010 for two of the sites. Feasibility studies will be completed in 2010 for the two remaining sites and the shoreline/sediment portion of the Nyack site.

West Nyack Site

In 1994 and 1997, O&R entered into consent orders with the NYSDEC pursuant to which O&R agreed to conduct a remedial investigation and remediate certain property it owns in West Nyack, New York at which PCBs were discovered. Petroleum contamination related to a leaking underground storage tank was found as well. O&R has completed all remediation at the site that the NYSDEC has required to date. O&R is continuing a supplemental groundwater investigation and on-site vapor intrusion monitoring as required by the NYSDEC.

Newark Bay

Approximately 300 parties, including O&R (which was served with a third-party complaint in June 2009), were sued as third-party defendants by Tierra Solutions, Inc. (Tierra) and Maxus Energy Corporation (Maxus), successors to the Occidental Chemical Corporation and Diamond Shamrock Chemical Company. Tierra and Maxus were themselves sued in 2005 by the New Jersey Department of Environmental Protection and others for removal and cleanup costs, punitive damages, penalties, and economic losses

allegedly arising from the dioxin contamination their predecessors' pesticide/herbicide plant allegedly released to the Newark Bay Complex, a system of waterways including Newark Bay, the Arthur Kill, the Kill Van Kull, and lower portions of the Passaic and Hackensack Rivers. Tierra and Maxus are seeking equitable contribution from the third-party defendants for such costs, damages, penalties and losses, which are likely to be substantial. As to O&R, Tierra and Maxus allege that 1975 and 1976 shipments of waste oil by O&R from an electricity generating plant in Haverstraw, New York to the Borne Chemical

Table of Contents

Company in Elizabeth, New Jersey was a source of petroleum discharges to the Arthur Kill. Con Edison is unable to predict O&R's exposure to liability with respect to the Newark Bay Complex.

Other Superfund Sites

O&R is a PRP with respect to other Superfund sites where there are other PRPs and it is not managing the site investigation and remediation. Work at these sites is in various stages, with the company participating in PRP groups at some of the sites. Investigation, remediation and monitoring at some of these sites have been, and are expected to continue to be, conducted over extended periods of time. The company does not believe that it is reasonably likely that monetary sanctions, such as penalties, will be imposed upon it by any governmental authority with respect to these sites.

The following table lists each of O&R's other Superfund sites for which the Company anticipates it may have liability. The table also shows for each such site, its location, the year in which the Company was designated or alleged to be a PRP or to otherwise have responsibilities with respect to the site (shown in the table under "Start"), the name of the court or agency in which proceedings with respect to the site are pending and its estimated percentage of total liability for each site. The company currently estimates that its potential liability for investigation, remediation, monitoring and environmental damages at each site is less than \$500,000, Superfund liability is joint and several. The company's estimate of its anticipated share of the total liability for each site was determined pursuant to consent decrees, settlement agreements or otherwise and in light of the financial condition of other PRPs. The company's actual liability could differ substantially from amounts estimated.

Site	Location	Start	Court or Agency	% of Total Liability
Borne Chemical	Elizabeth, NJ	1997	NJDEP	1.7%
Clarkstown Landfill	Clarkstown, NY	2003	NYAG	(a)
Metal Bank of America	Philadelphia, PA	1993	EPA	4.58%

(a) Not ascertainable.

Other Federal, State and Local Environmental Provisions**Toxic Substances Control Act**

Virtually all electric utilities, including CECONY, own equipment containing PCBs. PCBs are regulated under the Federal Toxic Substances Control Act of 1976.

Water Quality

Certain governmental authorities are investigating contamination in the Hudson River and the New York Harbor. These waters run through portions of CECONY's service area. Governmental authorities could require entities that released hazardous substances that contaminated these waters to bear the cost of investigation and remediation, which could be substantial.

New Source Review Regulations

In March 2009, New York State regulations implementing the new source review provisions of the Clean Air Act became effective. Under new source review regulations, an owner of a large generating facility, including CECONY's steam and steam-electric generating facilities, is required to obtain a permit before making modifications to the facility, other than routine maintenance, repair, or replacement, that increase emissions of pollutants from the facility above specified thresholds. To obtain a permit, the facility owner could be required to install additional pollution controls or otherwise limit emissions from the facility. The New York State new source review regulations exceed in some respects the requirements of federal guidelines. The company reviews on an on-going basis its planned modifications to its generating facilities to determine the potential applicability of new source review and similar regulations. For information about the company's generating facilities, see "CECONY Electric Operations - Electric Facilities" above in this Item 1. The company is unable to predict the impact of these regulations on its operations or the additional costs, which could be substantial, it could incur to comply with the regulations.

Table of Contents

State Anti-Takeover Law

New York State law provides that a domestic corporation, such as Con Edison, may not consummate a merger, consolidation or similar transaction with the beneficial owner of a 20 percent or greater voting stock interest in the corporation, or with an affiliate of the owner, for five years after the acquisition of the voting stock interest, unless the transaction or the acquisition of the voting stock interest was approved by the corporation's board of directors prior to the acquisition of the voting stock interest. After the expiration of the five-year period, the transaction may be consummated only pursuant to a stringent fair price formula or with the approval of a majority of the disinterested stockholders.

Employees

Con Edison has no employees other than those of CECONY, O&R and Con Edison's competitive energy businesses (which at December 31, 2009 had 14,207, 1,055 and 279, employees, respectively). Of the 14,207 CECONY employees and 1,055 O&R employees, 9,067 and 627 were represented by a collective bargaining unit, respectively. The collective bargaining agreements covering these employees expire in June 2012 and June 2014, respectively.

Available Information

For the sources of information about the Companies, see Available Information in the Introduction appearing before this Item 1.

Item 1A: Risk Factors

Information in any item of this report as to which reference is made in this Item 1A is incorporated by reference herein. The use of such terms as see or refer to shall be deemed to incorporate at the place such term is used the information to which such reference is made.

The Companies' businesses are influenced by many factors that are difficult to predict, and that involve uncertainties that may materially affect actual operating results, cash flows and financial condition.

The Companies have established an enterprise risk management program to identify, assess, and manage its major operations and administrative risks based on established criteria for the severity of an event, the likelihood of its occurrence, and the programs in place to control the event or reduce the impact. The Companies also have financial and commodity market risks. See Financial and Commodity Market Risks in Item 7.

The Companies' major risks include:

The Failure to Operate Energy Facilities Safely and Reliably Could Adversely Affect The Companies. The Utilities provide electricity, gas and steam service using energy facilities, many of which are located either in, or close to, densely populated public places. See the description of the Utilities' facilities in Item 1. A failure of, or damage to, these facilities, or an error in the operation or maintenance of these facilities, could result in bodily injury or death, property damage, the release of hazardous substances or extended service interruptions. In such event, the Utilities could be required to pay substantial amounts, which may not be covered by the Utilities' insurance policies, to repair or replace their facilities, compensate others for injury or death or other damage, and settle any proceedings initiated by state utility regulators or other regulatory agencies. See Manhattan Steam Main Rupture in Note H to the financial statements in Item 8. The occurrence of such an event could also adversely affect the cost and availability of insurance. Changes to judicial doctrines could further expand the Utilities' liability for service interruptions. See Utility Regulation State Utility Regulation, Liability for Service Interruptions in Item 1).

The Failure To Properly Complete Construction Projects Could Adversely Affect The Companies. The Utilities' ongoing construction program includes large energy transmission, substation and distribution system projects. The failure to properly complete these projects timely and effectively could adversely affect the Utilities' ability to meet their customers' growing energy needs with the high level of safety and reliability that they currently provide, which would adversely affect the Companies.

Table of Contents

The Failure of Processes and Systems and the Performance of Employees and Contractors Could Adversely Affect the Companies. The Companies have developed business processes for operations, customer service, legal compliance, personnel, accounting, planning and other matters. Some of the Companies' information systems and communications systems have been operating for many years, and may become obsolete. The failure of the Companies' business processes or information or communication systems could adversely affect the Companies' operations and liquidity and result in substantial liability, higher costs and increased regulatory requirements. The failure by the Companies' employees or contractors to follow procedures, or their unsafe actions, errors or intentional misconduct, could also adversely affect the Companies. See **Investigation of Contractor Payments** in Note H to the financial statements in Item 8.

The Companies Are Extensively Regulated And Are Subject To Penalties. The Companies' operations require numerous permits, approvals and certificates from various federal, state and local governmental agencies. State utility regulators may seek to impose substantial penalties on the Utilities for violations of state utility laws, regulations or orders. In addition, the Utilities rate plans usually include penalties for failing to meet certain operating standards. FERC has the authority to impose penalties on the Utilities and the competitive energy businesses, which could be substantial, for violations of the Federal Power Act, the Natural Gas Act or related rules, including reliability rules. Environmental agencies may seek penalties for failure to comply with laws, regulations or permits. See **Permit Non-Compliance and Pollution Discharges** in Note H to the financial statements in Item 8. The Companies may also be subject to penalties from other regulatory agencies. The Companies may be subject to new laws, regulations, accounting standards or other requirements or the revision or reinterpretation of such requirements, which could adversely affect the Companies. See **Utility Regulation and Environmental Matters** **Climate Change and Other Federal State and Local Environmental Provisions** in Item 1 and **Application of Critical Accounting Policies** in Item 7.

The Utilities' Rate Plans May Not Provide A Reasonable Return The Utilities have rate plans approved by state utility regulators that limit the rates they can charge their customers. The rates are generally designed for, but do not guarantee, the recovery of the Utilities' cost of service (including a return on equity). The Utilities' rate plans can involve complex accounting and other calculations, a mistake in which could have a substantial adverse affect on the Utilities. See **Utility Regulation** **State Utility Regulation, Rate Plans** in Item 1 and **Rate Agreements** in Note B to the financial statements in Item 8. Rates usually may not be changed during the specified terms of the rate plans other than to recover energy costs and limited other exceptions. The Utilities' actual costs may exceed levels provided for such costs in the rate plans. The Utilities' rate plans usually include penalties for failing to meet certain operating standards. State utility regulators can initiate proceedings to prohibit the Utilities from recovering from their customers the cost of service (including energy costs) that the regulators determine to have been imprudently incurred (see **Other Regulatory Matters** in Note B to the financial statements in Item 8). The Utilities have from time to time entered into settlement agreements to resolve various prudence proceedings.

The Companies May Be Adversely Affected By Changes To The Utilities' Rate Plans. The Utilities' rate plans typically require action by regulators at their expiration dates, which may include approval of new plans with different provisions. The need to recover from customers increasing costs, taxes or state-mandated assessments or surcharges could adversely affect the Utilities' opportunity to obtain new rate plans that provide a reasonable rate of return and continue important provisions of current rate plans. The Utilities' current New York electric and gas rate plans include revenue decoupling mechanisms and their New York electric, gas and steam rate plans include provisions for the recovery of energy costs and reconciliation of the actual amount of pension and other postretirement, environmental and certain other costs to amounts reflected in rates. See **Rate Agreements** in Note B to the financial statements in Item 8.

Table of Contents

The Companies Are Exposed to Risks From The Environmental Consequences Of Their Operations. The Companies are exposed to risks relating to climate change and related matters. See **Environmental Matters – Climate Change** in Item 1. CECONY may also be impacted by regulations implementing the new source review provisions of the Clean Air Act. See **Environmental Matters – Local Environmental Provisions, New Source Review Regulations** in Item 1. In addition, the Utilities are responsible for hazardous substances, such as asbestos, PCBs and coal tar, that have been used or produced in the course of the Utilities' operations and are present on properties or in facilities and equipment currently or previously owned by them. See **Environmental Matters** in Item 1 and Note G to the financial statements in Item 8. Electric and magnetic fields are found wherever electricity is used. The Companies could be adversely affected if a causal relationship between these fields and adverse health effects were to be established. Negative perceptions about electric and magnetic fields can make it more difficult to construct facilities needed for the Companies' operations.

A Disruption In The Wholesale Energy Markets Or Failure By An Energy Supplier Could Adversely Affect The Companies. Almost all the electricity and gas the Utilities sell to their full-service customers is purchased through the wholesale energy markets or pursuant to contracts with energy suppliers. See the description of the Utilities' energy supply in Item 1. Con Edison Energy and Con Edison Solutions also depend on wholesale energy markets to supply electricity to their customers. See **Competitive Energy Businesses** in Item 1. A disruption in the wholesale energy markets or a failure on the part of the Companies' energy suppliers or operators of energy delivery systems that connect to the Utilities' energy facilities could adversely affect the Companies' ability to meet their customers' energy needs and adversely affect the Companies.

The Companies Have Substantial Unfunded Pension And Other Postretirement Benefit Liabilities. The Utilities have substantial unfunded pension and other postretirement benefit liabilities. The Utilities expect to make substantial contributions to their pension and other postretirement benefit plans. Significant declines in the market values of the investments held to fund the pension and other postretirement benefits could trigger substantial funding requirements under governmental regulations. See **Application of Critical Accounting Policies – Accounting for Pensions and Other Postretirement Benefits** and **Financial and Commodity Market Risks**, in Item 7 and Notes E and F to the financial statements in Item 8.

Con Edison's Ability To Pay Dividends Or Interest Depends On Dividends From Its Subsidiaries. Con Edison's ability to pay dividends on its common stock or interest on its external borrowings depends primarily on the dividends and other distributions it receives from its subsidiaries. The dividends that the Utilities may pay to Con Edison are limited by the NYSPSC to not more than 100 percent of their respective income available for dividends calculated on a two-year rolling average basis, with certain exceptions. See **Dividends** in Note C to the financial statements in Item 8.

The Companies Require Access To Capital Markets To Satisfy Funding Requirements. The Utilities estimate that their construction expenditures will exceed \$6 billion over the next three years. The Utilities expect to use internally-generated funds, equity contributions from Con Edison and external borrowings to fund the construction expenditures. The competitive energy businesses are evaluating opportunities to invest in renewable generation and energy-related infrastructure projects that would require funds in excess of those produced in the businesses. Con Edison expects to finance its capital requirements through the sale of its securities. Changes in financial market conditions or in the Companies' credit ratings could adversely affect their ability to raise new capital and the cost thereof. See **Capital Requirements and Resources** in Item 1.

The Internal Revenue Service Has Disallowed Substantial Tax Deductions Taken By The Company. The Companies' federal income tax returns reflect certain tax positions with which the Internal Revenue Service does not or may not agree,

Table of Contents

particularly its tax positions for Con Edison's lease in/lease out transactions (see Note J to the financial statements in Item 8) and the deduction of certain construction-related costs for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility (see Note L to the financial statements in Item 8).

The Companies Also Face Other Risks That Are Beyond Their Control. The Companies' results of operations can be affected by circumstances or events that are beyond their control. Weather directly influences the demand for electricity, gas and steam service, and can affect the price of energy commodities. Natural disasters, such as a major storm, heat wave or hurricane (see Environmental Matters Climate Change in Item 1) or terrorist attacks or related acts of war could damage Company facilities. As a provider of essential utility services, the Utilities may experience more severe consequences from attempting to operate during and after such events. In addition, pandemic illness could potentially disrupt the Utilities' employees and contractors from providing essential utility services. Economic conditions can affect customers demand and ability to pay for service, which could adversely affect the Companies.

Item 1B: Unresolved Staff Comments

Con Edison

Con Edison has no unresolved comments from the SEC staff.

CECONY

CECONY has no unresolved comments from the SEC staff.

Item 2: Properties

Con Edison

Con Edison has no significant properties other than those of the Utilities and its competitive energy businesses.

For information about the capitalized cost of the Companies' utility plant, net of accumulated depreciation, see Plant and Depreciation in Note A to the financial statements in Item 8 (which information is incorporated herein by reference).

CECONY

For a discussion of CECONY's electric, gas and steam facilities, see CECONY- Electric Operations Electric Facilities, CECONY- Gas Operations Gas Facilities, and CECONY Steam Operations Steam Facilities in, Item 1 (which information is incorporated herein by reference).

O&R

For a discussion of O&R's electric and gas facilities, see O&R Electric Operations Transmission and Distribution Facilities and O&R Gas Operations Gas Facilities in Item 1 (which information is incorporated herein by reference).

Competitive Energy Businesses

For a discussion of the competitive energy businesses' facilities, see Competitive Energy Businesses in, Item 1 (which information is incorporated herein by reference).

Item 3: Legal Proceedings

Con Edison

Lease In/Lease Out Transactions

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

For information about legal proceedings with the IRS with respect to certain tax losses recognized in connection with the company's lease in/lease out transactions, see Note J to the financial statements in Item 8 (which information is incorporated herein by reference).

CECONY

Manhattan Steam Main Rupture

For information about proceedings relating to the July 2007 rupture of a steam main located in midtown Manhattan, see **Manhattan Steam Main Rupture** in Note H to the financial statements in Item 8 (which information is incorporated herein by reference).

Investigation of Contractor Payments

For information about alleged unlawful conduct in connection with contractor payments, see **Investigation of Contractor Payments** in Note H to the financial statements in Item 8 (which is incorporated herein by reference).

Superfund

For information about O&R Superfund sites, see Environmental Matters O&R Superfund in Item 1 (which information is incorporated herein by reference).

Item 4: Submission of Matters to a Vote of Security Holders

None

Table of Contents**Executive Officers of the Registrant**

The following table sets forth certain information about the executive officers of Con Edison and CECONY as of February 18, 2010. As indicated, certain of the executive officers are executive officers of each of Con Edison and CECONY and others are executive officers of Con Edison or CECONY. The term of office of each officer, is until the next election of directors (trustees) of their company and until his or her successor is chosen and qualifies. Officers are subject to removal at any time by the board of directors (trustees) of their company. Mr. Burke has an employment agreement with Con Edison, which provides for him to serve in his present position through December 31, 2010. The employment agreement provides for automatic one-year extensions of its term, unless notice to the contrary is received six months prior to the end of the term.

Name	Age	Offices and Positions During Past Five Years
Executive Officers of Con Edison and CECONY		
Kevin Burke	59	3/06 to present Chairman of the Board, President and Chief Executive Officer and Director of Con Edison and Chairman, Chief Executive Officer and Trustee of CECONY 9/05 to 2/06 President, Chief Executive Officer and Director of Con Edison and Chief Executive Officer and Trustee of CECONY 9/00 to 8/05 President of CECONY
Craig S. Ivey	47	12/09 to present President of CECONY 08/07 to 09/09 Senior Vice President Transmission & Distribution, Dominion Resources, Inc. 04/06 08/07 Senior Vice President Electric Distribution, Dominion Resources, Inc. 09/04 04/06 Vice President Electric Operations, Dominion Resources, Inc.
John D. McMahon	58	2/09 to present Executive Vice President of CECONY 1/03 to 1/09 President and Chief Executive Officer of O&R
Robert Hoglund	48	9/05 to present Senior Vice President and Chief Financial Officer of Con Edison and CECONY 4/04 to 8/05 Senior Vice President of Finance of Con Edison and CECONY 6/04 to 10/09 Chief Financial Officer and Controller of O&R
Elizabeth D. Moore	55	05/09 to Present General Counsel of Con Edison and CECONY 01/95 to 04/09 Partner, Nixon Peabody LLP
Frances A. Resheske	49	2/02 to present Senior Vice President Public Affairs of CECONY
JoAnn Ryan	52	7/06 to present Senior Vice President Business Shared Services of CECONY 3/01 to 6/06 President and CEO, Con Edison Solutions
Luther Tai	61	7/06 to present Senior Vice President Enterprise Shared Services of CECONY 9/01 to 6/06 Senior Vice President Central Services of CECONY
Gurudatta Nadkarni	44	1/08 to present Vice President of Strategic Planning 8/06 to 12/07 Managing Director of Growth Initiatives, Duke Energy Corporation 1/05 to 7/06 Director of Growth Initiatives, Strategy and Integration, Duke Energy Corporation

Table of Contents**Part II****Item 5: Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities****Con Edison**

Con Edison's Common Shares (\$.10 par value), the only class of common equity of Con Edison, are traded on the New York Stock Exchange. As of January 31, 2010, there were 68,186 holders of record of Con Edison's Common Shares.

The market price range for Con Edison's Common Shares during 2009 and 2008, as reported in the consolidated reporting system, and the dividends paid by Con Edison in 2009 and 2008 were as follows:

	2009			2008		
	High	Low	Dividends Paid	High	Low	Dividends Paid
1 st Quarter	\$ 41.79	\$ 32.56	\$ 0.59	\$ 49.30	\$ 39.30	\$ 0.585
2 nd Quarter	\$ 40.00	\$ 34.36	\$ 0.59	\$ 42.73	\$ 38.36	\$ 0.585
3 rd Quarter	\$ 41.77	\$ 36.46	\$ 0.59	\$ 46.39	\$ 37.38	\$ 0.585
4 th Quarter	\$ 46.35	\$ 40.15	\$ 0.59	\$ 44.86	\$ 34.11	\$ 0.585

On January 21, 2010, Con Edison's Board of Directors declared a quarterly dividend of 59 1/2 cents per Common Share. The first quarter 2010 dividend will be paid on March 15, 2010.

Con Edison expects to pay dividends to its shareholders primarily from dividends and other distributions it receives from its subsidiaries. The payment of future dividends, which is subject to approval and declaration by Con Edison's Board of Directors, will depend on a variety of factors, including business, financial and regulatory considerations. For additional information see "Dividends" in Note C to the financial statements in Item 8 (which information is incorporated herein by reference).

During 2009, the market price of Con Edison's Common Shares increased by 16.70 percent (from \$38.93 at year-end 2008 to \$45.43 at year-end 2009). By comparison, the S&P 500 Index and the S&P Utilities Index increased 23.45 percent and 6.80 percent, respectively. The total return to Con Edison's common shareholders during 2009, including both price appreciation and reinvestment of dividends, was 24.02 percent. By comparison, the total returns for the S&P 500 Index and the S&P Utilities Index were 26.47 percent and 11.94 percent, respectively. For the five-year period 2005 through 2009, Con Edison's shareholders' total average annual return was 6.25 percent, compared with total average annual returns for the S&P 500 Index and the S&P Utilities Index of 0.42 percent and 6.03 percent, respectively.

Table of Contents

Company / Index	Years Ending					
	2004	2005	2006	2007	2008	2009
Consolidated Edison, Inc.	100.00	111.32	121.50	129.57	109.16	135.23
S&P 500 Index	100.00	104.91	121.48	128.16	80.74	102.11
S&P Utilities	100.00	116.84	141.36	168.76	119.85	134.12

Based on \$100 invested at December 31, 2004, reinvestment of all dividends in equivalent shares of stock and market price changes on all such shares.

CECONY

The outstanding shares of CECONY's Common Stock (\$2.50 par value), the only class of common equity of CECONY, are held by Con Edison and are not traded.

The dividends declared by CECONY in 2009 and 2008 are shown in its Consolidated Statement of Common Shareholder's Equity included in Item 8 (which information is incorporated herein by reference). For additional information about the payment of dividends by CECONY, and restrictions thereon, see Dividends in Note C to the financial statements in Item 8 (which information is incorporated herein by reference).

Item 6: Selected Financial Data

For selected financial data of Con Edison and CECONY, see Introduction appearing before Item 1 (which selected financial data is incorporated herein by reference).

44

Table of Contents**Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations**

This combined management's discussion and analysis of financial condition and results of operations relates to the consolidated financial statements included in this report of two separate registrants: Con Edison and CECONY and should be read in conjunction with the financial statements and the notes thereto. As used in this report, the term the Companies refers to Con Edison and CECONY. CECONY is a subsidiary of Con Edison and, as such, information in this management's discussion and analysis about CECONY applies to Con Edison.

Information in any item of this report referred to in this discussion and analysis is incorporated by reference herein. The use of terms such as see or refer to shall be deemed to incorporate by reference into this discussion and analysis the information to which reference is made.

Corporate Overview

Con Edison's principal business operations are those of the Utilities. Con Edison also has competitive energy businesses. See The Utilities and Competitive Energy Businesses in Item 1. Certain financial data of Con Edison's businesses is presented below:

	Twelve months ended December 31, 2009				At December 31, 2009	
	Operating Revenues		Net Income		Assets	
<i>(Millions of Dollars, except percentages)</i>						
CECONY	\$ 10,036	77%	\$ 781	90%	\$ 30,461	90%
O&R	890	7%	43	5%	2,216	7%
Total Utilities	10,926	84%	824	95%	32,677	97%
Con Edison Development(a)		%	3	%	429	1%
Con Edison Energy(a)	717	5%	(15)	(2)%	136	%
Con Edison Solutions(a)	1,430	11%	71	8%	237	1%
Other(b)	(41)	%	(15)	(1)%	394	1%
Total Con Edison	\$ 13,032	100%	\$ 868	100%	\$ 33,873	100%

(a) Net income from the competitive energy businesses for the twelve months ended December 31, 2009 includes \$19 million of net after-tax mark-to-market gains/(losses) (Con Edison Development, \$2 million, Con Edison Energy, \$(9) million and Con Edison Solutions, \$26 million).

(b) Represents inter-company and parent company accounting. See Results of Operations, below.

Con Edison's net income for common stock in 2009 was \$868 million or \$3.16 a share (\$3.14 on a diluted basis). Net income for common stock in 2008 and 2007 was \$1,196 million or \$4.38 a share (\$4.37 on a diluted basis) and \$929 million or \$3.49 a share (\$3.47 on a diluted basis), respectively. See Results of Operations Summary, below. For segment financial information, see Note N to the financial statements in Item 8 and Results of Operations, below.

Results of Operations Summary

Net income for the years ended December 31, 2009, 2008 and 2007 was as follows:

<i>(Millions of Dollars)</i>	2009	2008	2007
CECONY	\$ 781	\$ 783	\$ 844

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

O&R	43	44	46
Competitive energy businesses(a)	59	73	58
Other(b)	(15)	22	(23)
Total continuing operations	868	922	925
Discontinued operations(c)		274	4
Con Edison	\$ 868	\$ 1,196	\$ 929

- (a) Includes \$19 million, \$(59) million and \$(5) million of net after-tax mark-to-market gains/(losses) in 2009, 2008 and 2007, respectively. In 2008, also includes \$131 million after-tax from the gain on sale of Con Edison Development's ownership interests in electricity generating plants. See Note U to the financial statements in Item 8.
- (b) Consists of inter-company and parent company accounting. In 2008, also includes \$30 million of after-tax net income related to the resolution of Con Edison's legal proceeding with Northeast Utilities. See Results of Operations, below.
- (c) Represents the discontinued operations of certain of Con Edison Development's ownership interests in electricity generating plants. See Note U to the financial statements in Item 8.

45

Table of Contents

The Companies' results of operations for 2009, as compared with 2008, reflect changes in the Utilities' rate plans (including additional revenues designed to recover increases in certain operations and maintenance expenses, depreciation and property taxes, interest charges and the impact of revenue decoupling mechanisms), a regulatory reserve in December 2009 relating to the NYSPSC's review of capital spent during the period April 2005 through March 2008, and the operating results of the competitive energy businesses (including net mark-to-market effects). The results of operations for 2009 as compared with 2008 include a higher allowed return for the second, third and fourth quarters of 2009, offset in part by a lower allowed electric return on common equity for CECONY for the first quarter of 2009. Operations and maintenance expenses were higher in 2009 compared with 2008 reflecting primarily higher costs, which are generally reflected in rates, such as pension and other postretirement benefits and uncollectible accounts that were offset in part by austerity initiatives reflecting the general economic downturn. Depreciation and property taxes were higher in 2009 compared with 2008 reflecting primarily the impact from increased capital expenditures and higher property tax rates. Results of operations for 2008 include the gain on the sale of ownership interests in electricity generating plants, the impact of discontinued operations and resolution of litigation with Northeast Utilities.

The following table presents the estimated effect on earnings per share and net income for common stock for 2009 as compared with 2008 and 2008 as compared with 2007, resulting from these and other major factors:

	2009 vs. 2008		2008 vs. 2007	
	Earnings per Share	Net Income (Millions of Dollars)	Earnings per Share	Net Income (Millions of Dollars)
CECONY				
Rate plans, primarily to recover increases in certain costs	\$ 1.28	\$ 351	\$ 0.63	\$ 169
Resolution of deferred tax amortization petition in 2007 and other tax matters			(0.08)	(22)
Operations and maintenance expense	(0.62)	(169)	(0.44)	(117)
Long Island City power outage reserve in 2008	0.05	14	0.04	10
2005 - 2008 capital expenditure reserve	(0.05)	(14)		
Depreciation and property taxes	(0.55)	(151)	(0.22)	(59)
Net interest expense	(0.14)	(38)	(0.07)	(19)
Other (includes dilutive effect of new stock issuances)		5	(0.16)	(23)
Total CECONY	(0.03)	(2)	(0.30)	(61)
Orange and Rockland Utilities		(1)	(0.01)	(2)
Competitive energy businesses				
Earnings excluding net mark-to-market effects, gain on the sale of ownership interests in electricity generating plants and discontinued operations	0.15	39	(0.24)	(62)
Net mark-to-market effects	0.29	78	(0.20)	(54)
Gain on the sale of ownership interests in electricity generating plants and discontinued operations	(1.49)	(405)	1.48	401
Total competitive energy businesses	(1.05)	(288)	1.04	285
Northeast Utilities litigation settlement	(0.11)	(30)	0.11	30
Other, including parent company expenses	(0.03)	(7)	0.05	15
Total variations	\$ (1.22)	\$ (328)	\$ 0.89	\$ 267

See Results of Operations below for further discussion and analysis of results of operations.

Risk Factors

The Companies' businesses are influenced by many factors that are difficult to predict, and that involve uncertainties that may materially affect actual operating results, cash flows and financial condition. See Risk Factors in Item 1A.

Table of Contents

Application of Critical Accounting Policies

The Companies' financial statements reflect the application of their accounting policies, which conform to accounting principles generally accepted in the United States of America. The Companies' critical accounting policies include industry-specific accounting applicable to regulated public utilities and accounting for pensions and other postretirement benefits, contingencies, long-lived assets, derivative instruments, goodwill and leases.

Accounting for Regulated Public Utilities

The Utilities are subject to the accounting rules for regulated operations and the accounting requirements of the FERC and state public utility regulatory authorities having jurisdiction.

The accounting rules for regulated operations specify the economic effects that result from the causal relationship of costs and revenues in the rate-regulated environment and how these effects are to be accounted for by a regulated enterprise. Revenues intended to cover some costs may be recorded either before or after the costs are incurred. If regulation provides assurance that incurred costs will be recovered in the future, these costs would be recorded as deferred charges or regulatory assets under the accounting rules. If revenues are recorded for costs that are expected to be incurred in the future, these revenues would be recorded as deferred credits or regulatory liabilities under the accounting rules.

The Utilities' principal regulatory assets and liabilities are listed in Note B to the financial statements in Item 8. The Utilities are each receiving or being credited with a return on all regulatory assets for which a cash outflow has been made. The Utilities are each paying or being charged with a return on all regulatory liabilities for which a cash inflow has been received. The regulatory assets and liabilities will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

In the event that regulatory assets of the Utilities were no longer probable of recovery (as required by the accounting rules), these regulatory assets would be charged to earnings. At December 31, 2009, the regulatory assets for Con Edison and CECONY were \$7,304 million and \$6,694 million, respectively.

Accounting for Pensions and Other Postretirement Benefits

The Utilities provide pensions and other postretirement benefits to substantially all of their employees and retirees. Con Edison's competitive energy businesses also provide such benefits to certain of their employees. The Companies account for these benefits in accordance with the accounting rules for retirement benefits. In addition, the Utilities apply the accounting rules for regulated operations to account for the regulatory treatment of these obligations (which, as described in Note B to the financial statements in Item 8, reconciles the amounts reflected in rates for the costs of the benefit to the costs actually incurred). In applying these accounting policies, the Companies have made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, discount rates, health care cost trends and future compensation. See Notes A, E and F to the financial statements in Item 8 for information about the Companies' pension and other postretirement benefits, the actuarial assumptions, actual performance, amortization of investment and other actuarial gains and losses and calculated plan costs for 2009, 2008 and 2007.

The cost of pension and other postretirement benefits in future periods will depend on actual returns on plan assets, assumptions for future periods, contributions and benefit experience. Con Edison's and CECONY's current estimates for 2010 are increases, compared with 2009, in their pension and other postretirement benefits cost of \$181 million and \$178 million, respectively. The discount rates used to determine 2010 pension and other postretirement benefit accounting costs are 6.05 percent and 5.95 percent, respectively, and the expected return on plan assets (tax-exempt assets for postretirement benefit accounting costs) is 8.50 percent.

Table of Contents

The discount rate for determining the present value of future period benefit payments is determined using a model to match the durations of highly-rated (Aa and Aaa, by Moody's) corporate bonds with the projected stream of benefit payments.

In determining the health care cost trend rate, the Companies review actual recent cost trends and projected future trends.

The following table illustrates the effect on 2010 pension and other postretirement costs of changing the critical actuarial assumptions discussed above, while holding all other actuarial assumptions constant:

(Millions of Dollars)

Actuarial Assumption	Change in Assumption	Other Postretirement		
		Pension	Benefits	Total
Increase in accounting cost:				
Discount rate				
Con Edison	(0.25)%	\$ 30	\$ 5	\$ 35
CECONY	(0.25)%	\$ 28	\$ 4	\$ 32
Expected return on plan assets				
Con Edison	(0.25)%	\$ 19	\$ 3	\$ 22
CECONY	(0.25)%	\$ 18	\$ 2	\$ 20
Health care trend rate				
Con Edison	1.00%		\$ 3	\$ 3
CECONY	1.00%		\$ (2)	\$ (2)
Increase in projected benefit obligation:				
Discount rate				
Con Edison	(0.25)%	\$ 297	\$ 47	\$ 344
CECONY	(0.25)%	\$ 279	\$ 41	\$ 320
Health care trend rate				
Con Edison	1.00%		\$ 15	\$ 15
CECONY	1.00%		\$ (7)	\$ (7)

A 5.0 percentage point variation in the actual annual return in 2010, as compared with the expected annual asset return of 8.50 percent, would change pension and other postretirement benefit costs for both Con Edison and CECONY by approximately \$17 million and \$16 million, respectively, in 2011.

Pension benefits are provided through a pension plan maintained by Con Edison to which CECONY, O&R and the competitive energy businesses make contributions for their participating employees. Pension accounting by the Utilities includes an allocation of plan assets.

The Companies' policy is to fund their pension and other postretirement benefit accounting costs to the extent tax deductible, and for the Utilities, to the extent these costs are recovered under their rate agreements. The Companies were not required to make cash contributions to the pension plan in 2009 under funding regulations and tax laws. However, CECONY, O&R and Con Edison's competitive energy businesses made discretionary contributions to the plan in 2009 of \$257 million, \$40 million and \$1 million, respectively, and expect to make discretionary contributions in 2010 for CECONY and O&R of \$391 million and \$36 million, respectively. See Expected Contributions in Notes E and F to the financial statements in Item 8.

Accounting for Contingencies

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

The accounting rules for contingencies apply to an existing condition, situation or set of circumstances involving uncertainty as to possible loss that will ultimately be resolved when one or more future events occur or fail to occur. Known material contingencies, which are described in the notes to the financial statements, include the Utilities' responsibility for hazardous substances, such as asbestos, PCBs and coal.

48

Table of Contents

tar that have been used or generated in the course of operations (Note G); certain tax matters (Notes J and L); and other contingencies (Note H). In accordance with the accounting rules, the Companies have accrued estimates of losses relating to the contingencies as to which loss is probable and can be reasonably estimated and no liability has been accrued for contingencies as to which loss is not probable or cannot be reasonably estimated.

The Utilities generally recover costs for asbestos lawsuits, workers' compensation and environmental remediation pursuant to their current rate plans. Changes during the terms of the rate plans to the amounts accrued for these contingencies would not impact earnings.

Accounting for Long-Lived Assets

The accounting rules for property, plant and equipment require that certain long-lived assets must be tested for recoverability whenever events or changes in circumstances indicate their carrying amounts may not be recoverable. The carrying amount of a long-lived asset is deemed not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. Under the accounting rules an impairment loss is recognized if the carrying amount is not recoverable from such cash flows, and exceeds its fair value, which approximates market value.

Accounting for Goodwill

In accordance with the accounting rules for goodwill and other intangibles, Con Edison is required to test goodwill for impairment annually. See Note K to the financial statements in Item 8. Goodwill is tested for impairment using a two-step approach. The first step of the goodwill impairment test compares the estimated fair value of a reporting unit with its carrying value, including goodwill. If the estimated fair value of a reporting unit exceeds its carrying value, goodwill of the reporting unit is considered not impaired. If the carrying value exceeds the estimated fair value of the reporting unit, the second step is performed to measure the amount of impairment loss, if any. The second step requires a calculation of the implied fair value of goodwill.

Goodwill was \$416 million at December 31, 2009. The most recent test, which was performed during the first quarter of 2009, did not require any second-step assessment and did not result in any impairment. The company's most significant assumptions surrounding the goodwill impairment test relate to the estimates of reporting unit fair values. The company estimated fair values based primarily on discounted cash flows and on market values for a proxy group of companies.

Accounting for Derivative Instruments

The Companies apply the accounting rules for derivatives and hedging to their derivative financial instruments. The Companies use derivative financial instruments to hedge market price fluctuations in related underlying transactions for the physical purchase and sale of electricity and gas and interest rate risk on certain debt securities. The Utilities are permitted by their respective regulators to reflect in rates all reasonably incurred gains and losses on these instruments. See Financial and Commodity Market Risks, below and Note O to the financial statements in Item 8.

Where the Companies are required to make mark-to-market estimates pursuant to the accounting rules, the estimates of gains and losses at a particular period end do not reflect the end results of particular transactions, and will most likely not reflect the actual gain or loss at the conclusion of a transaction. Substantially all of the estimated gains or losses are based on prices supplied by external sources such as the fair value of exchange traded futures and options and the fair value of positions for which price quotations are available through or derived from brokers or other market sources.

Accounting for Leases

The Companies apply the accounting rules for leases and other related pronouncements to their leasing transactions. See Note J to the financial statements in Item 8 for information about Con Edison Development's Lease In/Lease Out or LILO transactions, a disallowance of tax losses by the IRS and a favorable court decision in the company's litigation with the IRS. In accordance with the accounting rules,

Table of Contents

Con Edison accounted for the two LILO transactions as leveraged leases. Accordingly, the company's investment in these leases, net of non-recourse debt, is carried as a single amount in Con Edison's consolidated balance sheet and income is recognized pursuant to a method that incorporates a level rate of return for those years when net investment in the lease is positive, based upon the after-tax cash flows projected at the inception of the leveraged leases.

Liquidity and Capital Resources

The Companies' liquidity reflects cash flows from operating, investing and financing activities, as shown on their respective consolidated statement of cash flows and as discussed below.

The principal factors affecting Con Edison's liquidity are its investments in the Utilities, the dividends it pays to its shareholders and the dividends it receives from the Utilities and cash flows from financing activities discussed below.

The principal factors affecting CECONY's liquidity are its cash flows from operating activities, cash used in investing activities (including construction expenditures), the dividends it pays to Con Edison and cash flows from financing activities discussed below.

The Companies generally maintain minimal cash balances and use short-term borrowings to meet their working capital needs and other cash requirements. The Companies repay their short-term borrowings using funds from long-term financings and operating activities. The Utilities cost of capital, including working capital, is reflected in the rates they charge to their customers.

Each of the Companies believes that it will be able to meet its reasonably likely short-term and long-term cash requirements. See "The Companies Require Access to Capital Market to Satisfy Funding Requirements" and "The Companies Also Face Other Risks That Are Beyond Their Control" in Item 1A, "Application of Critical Accounting Policies" Accounting for Contingencies, above, and "Utility Regulation" in Item 1.

Changes in the Companies' cash and temporary cash investments resulting from operating, investing and financing activities for the years ended December 31, 2009, 2008 and 2007 are summarized as follows:

Con Edison

			Variance		Variance
<i>(Millions of Dollars)</i>	2009	2008	2009 vs. 2008	2007	2008 vs. 2007

50

Table of Contents**Cash Flows from Operating Activities**

The Utilities' cash flows from operating activities reflect principally their energy sales and deliveries and cost of operations. The volume of energy sales and deliveries is dependent primarily on factors external to the Utilities, such as growth of customer demand, weather, market prices for energy, economic conditions and measures that promote energy efficiency. Under the revenue decoupling mechanisms in CECONY's electric and gas rate plans and O&R's New York electric and gas rate plans, changes in delivery volumes from levels assumed when rates were approved may affect the timing of cash flows but not net income. See Note B to the financial statements in Item 8. The prices at which the Utilities provide energy to their customers are determined in accordance with their rate agreements. In general, changes in the Utilities' cost of purchased power, fuel and gas may affect the timing of cash flows but not net income because the costs are recovered in accordance with rate agreements. See Recoverable Energy Costs in Note A to the financial statements in Item 8.

Net income is the result of cash and non-cash (or accrual) transactions. Only cash transactions affect the Companies' cash flows from operating activities. Principal non-cash charges include depreciation and deferred income tax expense. Principal non-cash credits include amortizations of certain net regulatory liabilities, net derivative losses and the 2008 pre-tax gain on the sale of Con Edison Development's ownership interests in electricity generating plants. Non-cash charges or credits may also be accrued under the revenue decoupling mechanisms in CECONY's current electric and gas rate plans and O&R's New York electric and gas rate plans. See Rate Agreements CECONY Electric and O&R Electric in Note B to the financial statements in Item 8.

In March 2009, CECONY adopted unbilled revenue accounting which had the non-cash effect of increasing an accrued unbilled revenue receivable, within other current assets on the consolidated balance sheet, and regulatory liabilities. See Note A to the financial statements in Item 8. In September 2009, the Companies applied \$109 million of a \$160 million deposit paid to the IRS in 2007 to pay tax liabilities, and related interest, with respect to the timing of deductions of certain construction related costs. See Note L to the financial statements in Item 8.

Net cash flows from operating activities in 2009 for Con Edison and CECONY were \$1,826 million and \$1,186 million higher, respectively, than in the 2008 period. The increases in net cash flows reflect the January 2008 semi-annual payment and July 2008 annual payment of CECONY's New York City property taxes, compared with a semi-annual payment in July 2009. The Company achieved a 1.5 percent reduction in its New York City property taxes for the fiscal year ending June 30, 2009 by prepaying the annual tax amount in July 2008. The increase is offset by the effect of changes in commodity prices on cash collateral requirements under the Companies' derivative instruments. For Con Edison, the increase also reflects the 2008 payment of income taxes on the gain on the sale of Con Edison Development's ownership interests in electricity generating plants.

Net cash flows from operating activities in 2008 for Con Edison and CECONY were \$926 million and \$215 million lower, respectively, than in the 2007 period. The decreases reflect primarily the July 2008 prepayment, by CECONY, of its annual New York City property taxes in the amount of \$915 million. By prepaying this annual amount as opposed to paying in semi-annual installments, CECONY received a 1.5 percent reduction in its New York City property taxes. Con Edison's decrease also reflects the 2008 payment of income taxes, which includes the taxes on the gain on the sale of Con Edison Development's ownership interests in electricity generating plants. The decreases also reflect higher cash collateral paid due to lower commodity prices associated with the Companies' derivative transactions. Con Edison and CECONY's decrease is offset by lower rate case amortizations and the reconciliation of Net T&D in 2008 when compared with 2007.

The change in net cash flows also reflects the timing of payments for and recovery of energy costs. This timing issue is reflected within changes to accounts receivable customers, recoverable energy costs and accounts payable balances.

Table of Contents

The changes in regulatory assets principally reflects changes in deferred pension costs in accordance with the accounting rules for retirement benefits and changes in future federal income taxes associated with increased removal costs. See Notes A, B and E to the financial statements in Item 8.

Cash Flows Used in Investing Activities

Net cash flows used in investing activities for Con Edison were \$1,289 million higher in 2009 compared with the 2008 period. The increase reflects primarily the absence of, in 2009, proceeds from the sale of Con Edison Development's ownership interests in electricity generating plants in 2008, offset in part by decreased construction expenditures in 2009. Net cash flows used in investing activities for CECONY were \$340 million lower in 2009 compared with the 2008 period reflecting primarily decreased construction expenditures and the repayment of loans by O&R. See Note S to the financial statements in Item 8.

Net cash flows used in investing activities in 2008 for Con Edison were \$1,015 million lower than in 2007. The decrease reflects primarily the proceeds from the sale of Con Edison Development's ownership interests in electricity generating plants in 2008, offset in part by increased utility construction expenditures. Net cash flows used in investing activities for CECONY was \$427 million higher in 2008 than in 2007, reflecting primarily increased utility construction expenditures in 2008.

From time to time, CECONY lends funds to O&R for periods of not more than 12 months. CECONY's outstanding loans to O&R amounted to \$113 million at December 31, 2008. There were no outstanding loans to O&R at December 31, 2009. See Note S to the financial statements in Item 8.

Cash Flows from Financing Activities

Net cash flows from financing activities in 2009 for Con Edison and CECONY were \$215 million and \$1,348 million lower, respectively, than in 2008. In 2008, cash flows from financing activities for Con Edison were \$341 million lower than in 2007 and for CECONY were \$484 million higher in 2008 than in 2007.

Con Edison's cash flows from financing activities for the years ended December 31, 2009 and 2007, reflect the issuance through public offerings of 5 million and 11 million Con Edison common shares resulting in net proceeds of \$213 million and \$558 million, respectively. Most of the 2009 proceeds were invested by Con Edison in CECONY. The 2007 proceeds were invested by Con Edison in CECONY (\$518 million) and O&R (and \$40 million), respectively. For CECONY, cash flows from financing activities in 2008 also reflect a \$752 million capital contribution from Con Edison.

Cash flows from financing activities for 2009, 2008 and 2007 also reflect the issuance of Con Edison common shares through its dividend reinvestment and employee stock plans (2009: 2.4 million shares for \$68 million, 2008: 1.7 million shares for \$42 million, 2007: 3.6 million shares for \$121 million). In addition, as a result of the stock plan issuances, cash used to pay common stock dividends was reduced by \$48 million in 2009, \$21 million in 2008 and \$38 million in 2007.

Net cash flows from financing activities during the years ended December 31, 2009, 2008 and 2007 also reflect the following CECONY transactions:

2009

Issued \$275 million 5.55% 5-year debentures, \$475 million 6.65% 10-year debentures and \$600 million 5.50% 30-year debentures, the proceeds of which were used to redeem in advance of maturity \$105 million 7.10% debentures and \$75 million 6.90% debentures due 2028, to repay short-term borrowings and for other general corporate purposes; and

Redeemed at maturity \$275 million 4.70% 5-year debentures and \$200 million 7.15% 10-year debentures.

2008

Issued \$600 million 5.85% 10-year debentures, \$600 million 6.75% 30-year debentures and \$600 million 7.125% 10-year debentures, the proceeds of which were used to repay short-term borrowings and for other general corporate purposes; and

52

Table of Contents

Redeemed at maturity \$180 million 6.25% 10-year debentures and \$100 million 6.15% 10-year debentures.
2007

Issued \$525 million 6.30% 30-year debentures, the proceeds of which were used for general corporate purposes; and

Redeemed at maturity \$330 million 6.45% 10-year debentures.
In 2008, Con Edison issued \$326 million of unsecured notes in exchange for a like amount of secured project debt (see Note Q to the financial statements in Item 8) and redeemed at maturity \$200 million 3.625% 5-year debentures. In 2007, Con Edison issued commercial paper and used available cash balances to redeem in advance of maturity \$325 million 7.25% 40-year Public Income NotES.

Con Edison's net cash flows from financing activities also include O&R's financings. In 2009, O&R issued \$60 million 4.96% 10-year debentures and \$60 million 6.00% 30-year debentures, the proceeds of which were used to redeem (in January 2010) \$45 million 7.00% debentures due 2029, to repay short-term debt and for other general corporate purposes. In 2008, O&R issued \$50 million 6.15% 10-year debentures. The net proceeds received from the issuance in 2008 were used for general corporate purposes, including repayment of short-term debt. In 2007, O&R's New Jersey subsidiary redeemed at maturity \$20 million 7.125% First Mortgage Bonds.

Cash flows from financing activities of the Companies also reflect commercial paper issuance (included on the consolidated balance sheets as Notes payable). The commercial paper amounts outstanding at December 31, 2009, 2008 and 2007 and the average daily balances for 2009, 2008 and 2007 for Con Edison and CECONY were as follows:

<i>(Millions of Dollars, except Weighted Average Yield)</i>	2009		2008		2007	
	Outstanding at December 31	Daily average	Outstanding at December 31	Daily average	Outstanding at December 31	Daily average
Con Edison	\$ 277	\$ 277	\$ 363	\$ 517	\$ 840	\$ 340
CECONY	\$ 169	\$ 169	\$ 253	\$ 380	\$ 555	\$ 151
Weighted average yield	%	0.4%	2.4%	3.4%	5.5%	5.3%

Common stock issuances and external borrowings are sources of liquidity that could be affected by changes in credit ratings, financial performance and capital market conditions. For information about the Companies' credit ratings and certain financial ratios, see Capital Requirements and Resources in Item 1.

Other Changes in Assets and Liabilities

The following table shows changes in certain assets and liabilities at December 31, 2009, compared with December 31, 2008.

<i>(Millions of Dollars)</i>	Con Edison 2009 vs. 2008 Variance	CECONY 2009 vs. 2008 Variance
Assets		
Accrued unbilled revenue	\$ 448	\$ 413

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Other current assets	162	47
Deferred derivative losses - current	(147)	(143)
Regulatory asset - Unrecognized pension and other postretirement costs	(1,130)	(1,076)
Liabilities		
Regulatory liability - Net unbilled revenue deferrals	91	91
Regulatory liability - Refundable energy costs-unbilled	44	39
Pension and retiree benefits	(1,148)	(1,081)
		53

Table of Contents

Accrued Unbilled Revenue Asset and Regulatory Liabilities

In March 2009, CECONY began recording unbilled electric, gas and steam revenues in accordance with a NYSPSC order. See Note A to the financial statements in Item 8.

Other Current Assets

Other current assets increased \$162 million and \$47 million for Con Edison and CECONY, respectively, at December 31, 2009 compared with December 31, 2008. The increases reflect the Company's reclassification from noncurrent assets of the deposit with the IRS. See Note L to the financial statements in Item 8.

Deferred Derivative Losses

Deferred derivative losses decreased \$147 million and \$143 million for Con Edison and CECONY, respectively, at December 31, 2009 compared with December 31, 2008. Although forward short-term electric and gas commodity prices are lower at December 31, 2009 compared with December 31, 2008, the change is due primarily to the impact of the maturity of certain contract positions, which were outstanding at December 31, 2008 and the timing of entering into new positions in 2009.

Regulatory Asset Unrecognized Pension and Other Postretirement Costs and Pension and Retiree Benefits

The decrease in regulatory assets and pension and retiree benefits liability reflects primarily an increase in the fair value of the companies' retirement plan and other postretirement benefit plan assets including the funding of the plan. See Notes B, E and F to the financial statements in Item 8.

Capital Requirements and Resources

For information about capital requirements, contractual obligations and capital resources, see "Capital Requirements and Resources" in Item 1.

Regulatory Matters

For information about the Utilities' rate plans and other regulatory matters affecting the Companies, see "Utility Regulation" in Item 1 and Note B to the financial statements in Item 8.

Financial and Commodity Market Risks

The Companies are subject to various risks and uncertainties associated with financial and commodity markets. The most significant market risks include interest rate risk, commodity price risk, credit risk and investment risk.

Interest Rate Risk

The interest rate risk relates primarily to variable rate debt and to new debt financing needed to fund capital requirements, including the construction expenditures of the Utilities and maturing debt securities. Con Edison and its businesses manage interest rate risk through the issuance of mostly fixed-rate debt with varying maturities and through opportunistic refinancing of debt. Con Edison and CECONY estimate that at December 31, 2009, a 10 percent variation in interest rates applicable to its variable rate debt would not result in a material change in annual interest expense. Under CECONY's current electric rate plan and O&R's current New York gas rate plan, variations to long-term debt costs are reconciled to levels reflected in rates. Under CECONY's current steam rate plan and O&R's current New York electric rate plan, variations in variable tax-exempt debt interest expense are reconciled to the level set in rates.

In addition, from time to time, Con Edison and its businesses enter into derivative financial instruments to hedge interest rate risk on certain debt securities. See "Interest Rate Swaps" in Note O to the financial statements in Item 8.

Commodity Price Risk

Con Edison's commodity price risk relates primarily to the purchase and sale of electricity, gas and related derivative instruments. The Utilities and Con Edison's competitive energy businesses have risk management strategies to mitigate their related exposures. See Note O to the financial statements in Item 8.

Con Edison estimates that, as of December 31, 2009, a 10 percent decline in market prices would result in a decline in fair value of \$129 million for the derivative instruments used by the Utilities to hedge purchases of electricity and gas, of which \$104 million is for CECONY and \$25 million is for O&R. Con Edison expects that any such change in fair value would be

54

Table of Contents

largely offset by directionally opposite changes in the cost of the electricity and gas purchased. In accordance with provisions approved by state regulators, the Utilities generally recover from customers the costs they incur for energy purchased for their customers, including gains and losses on certain derivative instruments used to hedge energy purchased and related costs. See Recoverable Energy Costs in Note A to the financial statements in Item 8.

Con Edison's competitive energy businesses use a value-at-risk (VaR) model to assess the market risk of their electricity and gas commodity fixed-price purchase and sales commitments, physical forward contracts and commodity derivative instruments. VaR represents the potential change in fair value of instruments or the portfolio due to changes in market factors, for a specified time period and confidence level. These businesses estimate VaR across their electricity and natural gas commodity businesses using a delta-normal variance/covariance model with a 95 percent confidence level. Since the VaR calculation involves complex methodologies and estimates and assumptions that are based on past experience, it is not necessarily indicative of future results. VaR for transactions associated with hedges on generating assets and commodity contracts, assuming a one-day holding period, for the years ended December 31, 2009, and 2008, respectively, was as follows:

<i>(Millions of Dollars)</i>	2009	2008
95% Confidence Level, One-Day Holding Period		
Average for the period	\$ 1	\$ 2
High	2	3
Low		

Credit Risk

The Companies are exposed to credit risk related to transactions entered into primarily for the various energy supply and hedging activities by the Utilities and the competitive energy businesses. Credit risk relates to the loss that may result from a counterparty's nonperformance. The Companies use credit policies to manage this risk, including an established credit approval process, monitoring of counterparty limits, netting provisions within agreements and collateral or prepayment arrangements, credit insurance and credit default swaps. The Companies measure credit risk exposure as the replacement cost for open energy commodity and derivative positions plus amounts owed from counterparties for settled transactions. The replacement cost of open positions represents unrealized gains, net of any unrealized losses where the company has a legally enforceable right of setoff.

The Utilities had \$26 million of credit exposure in connection with energy supply and hedging activities, net of collateral, at December 31, 2009, of which \$4 million was with investment grade counterparties and \$22 million was with commodity exchange brokers.

Con Edison's competitive energy businesses had \$150 million of credit exposure in connection with energy supply and hedging activities, net of collateral, at December 31, 2009, of which \$118 million was with investment grade counterparties and \$32 million was with commodity exchange brokers or independent system operators.

Investment Risk

The Companies' investment risk relates to the investment of plan assets for their pension and other postretirement benefit plans. See Application of Critical Accounting Policies Accounting for Pensions and Other Postretirement Benefits, above. The Companies' current investment policy for pension plan assets includes investment targets of 65 percent equities and 35 percent fixed income and other securities. At December 31, 2009, the pension plan investments consisted of 67 percent equity and 33 percent fixed income and other securities.

Environmental Matters

For information concerning climate change, environmental sustainability, potential liabilities arising from laws and regulations protecting the environment and other environmental matters, see Environmental Matters in Item 1 and Note G to the financial statements in Item 8.

Table of Contents

Impact of Inflation

The Companies are affected by the decline in the purchasing power of the dollar caused by inflation. Regulation permits the Utilities to recover through depreciation only the historical cost of their plant assets even though in an inflationary economy the cost to replace the assets upon their retirement will substantially exceed historical costs. The impact is, however, partially offset by the repayment of the Companies' long-term debt in dollars of lesser value than the dollars originally borrowed.

Material Contingencies

For information concerning potential liabilities arising from the Companies' material contingencies, see "Application of Critical Accounting Policies - Accounting for Contingencies," above, and Notes B, G, H, J and L to the financial statements in Item 8.

Results of Operations

Results of operations reflect, among other things, the Companies' accounting policies (see "Application of Critical Accounting Policies," above) and rate plans that limit the rates the Utilities can charge their customers (see "Utility Regulation" in Item 1). Under the revenue decoupling mechanisms currently applicable to CECONY's electric and gas businesses and O&R's electric and gas businesses in New York, the Utilities' delivery revenues generally will not be affected by changes in delivery volumes from levels assumed when rates were approved. Revenues for CECONY's steam business and O&R's businesses in New Jersey and Pennsylvania are affected by changes in delivery volumes resulting from weather, economic conditions and other factors. See Note B to the financial statements in Item 8.

The Companies' results of operations for 2009, as compared with 2008, reflect changes in the Utilities' rate plans (including additional revenues designed to recover increases in certain operations and maintenance expenses, depreciation and property taxes, interest charges and the impact of revenue decoupling mechanisms), a regulatory reserve in December 2009 relating to the NYSPSC's review of capital spent during the period April 2005 through March 2008, and the operating results of the competitive energy businesses (including net mark-to-market effects). The results of operations for 2009 as compared with 2008 include a higher allowed return for the second, third and fourth quarters of 2009, offset in part by a lower allowed electric return on common equity for CECONY for the first quarter of 2009. Operations and maintenance expenses were higher in 2009 compared with 2008 reflecting primarily higher costs, which are generally reflected in rates, such as pension and other postretirement benefits and uncollectible accounts that were offset in part by austerity initiatives reflecting the general economic downturn. Depreciation and property taxes were higher in 2009 compared with 2008 reflecting primarily the impact from increased capital expenditures and higher property tax rates. Results of operations for 2008 include the gain on the sale of ownership interests in electricity generating plants, the impact of discontinued operations and resolution of litigation with Northeast Utilities. For additional information about major factors affecting earnings, see "Results of Operations - Summary," above.

In general, the Utilities recover on a current basis the fuel, gas purchased for resale and purchased power costs they incur in supplying energy to their full-service customers (see "Recoverable Energy Costs" in Note A and "Regulatory Matters" in Note B to the financial statements in Item 8). Accordingly, such costs do not generally affect the Companies' results of operations. Management uses the term "net revenues" (operating revenues less such costs) to identify changes in operating revenues that may affect the Companies' results of operations. Management believes that, although "net revenues" may not be a measure determined in accordance with accounting principles generally accepted in the United States of America, the measure facilitates the analysis by management and investors of the Companies' results of operations.

A discussion of the results of operations by principal business segment for the years ended December 31, 2009, 2008 and 2007 follows. For additional business segment financial information, see Note N to the financial statements in Item 8.

Table of Contents

Year Ended December 31, 2009 Compared with Year Ended December 31, 2008

The Companies' results of operations (which were discussed above under "Results of Operations - Summary") in 2009 compared with 2008 were:

<i>(Millions of Dollars)</i>	CECONY		O&R		Competitive Energy Businesses and Other(a)		Con Edison(b)

Table of Contents**Electric**

CECONY's results of electric operations for the year ended December 31, 2009 compared with the year ended December 31, 2008 is as follows:

<i>(Millions of Dollars)</i>	Twelve Months Ended		Variation
	December 31, 2009	December 31, 2008	
Operating revenues	\$ 7,674	\$ 7,878	\$ (204)
Purchased power	2,529	3,092	(563)
Fuel	247	376	(129)
Net revenues	4,898	4,410	488
Operations and maintenance	1,734	1,518	216
Depreciation and amortization	587	521	66
Taxes, other than income taxes	1,209	1,038	171
Electric operating income	\$ 1,368	\$ 1,333	\$ 35

CECONY's electric sales and deliveries, excluding off-system sales, in 2009 compared with 2008 were:

Description	Millions of kWhs Delivered				Revenues in Millions			
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation
	December 31, 2009	December 31, 2008			December 31, 2009	December 31, 2008		
Residential/Religious(a)	10,952	11,720	(768)	(6.6)%	\$ 2,583	\$ 2,834	\$ (251)	(8.9)%
Commercial/Industrial	12,457	12,852	(395)	(3.1)	2,444	2,720	(276)	(10.1)
Retail access customers	21,859	22,047	(188)	(0.9)	1,855	1,507	348	23.1
NYPA, Municipal Agency and other sales	11,399	11,704	(305)	(2.6)	457	413	44	10.7
Other operating revenues					335	404	(69)	(17.1)
Total	56,667	58,323	(1,656)	(2.8)%	\$ 7,674	\$ 7,878	\$ (204)	(2.6)%

(a) Residential/Religious generally includes single-family dwellings, individual apartments in multi-family dwellings, religious organizations and certain other not-for-profit organizations.

CECONY's electric operating revenues decreased \$204 million in 2009 compared with 2008 due primarily to lower purchased power (\$563 million) and fuel costs (\$129 million), offset in part by the 2009 electric rate plan (\$368 million, which among other things, reflected a 10.0 percent return on common equity, effective April 2009, as compared with the 9.1 percent return previously reflected in rates) and an accrual for the revenue decoupling mechanism (\$124 million). Effective April 2008, CECONY's revenues from electric sales are subject to a revenue decoupling mechanism, as a result of which delivery revenues generally are not affected by changes in delivery volumes from levels assumed when rates were approved. Other electric operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the revenue decoupling mechanism and other provisions of the company's rate plans. See Note B to the financial statements in Item 8.

Electric delivery volumes in CECONY's service area decreased 2.8 percent in 2009 compared with 2008. After adjusting for variations, principally weather and billing days, electric delivery volumes in CECONY's service area decreased 1.7 percent in 2009 compared with 2008, reflecting the impact of lower average normalized use per customer.

CECONY's electric purchased power costs decreased \$563 million in 2009 compared with 2008 due to a decrease in unit costs (\$480 million) and purchased volumes (\$83 million). Electric fuel costs decreased \$129 million in 2009 compared with 2008 due to lower unit costs (\$88

million) and sendout volumes from the company's electric generating facilities (\$41 million).

Table of Contents

CECONY's electric operating income increased \$35 million in 2009 compared with 2008. The increase reflects primarily higher net revenues (\$488 million, due primarily to the electric rate plan, including the collection of a surcharge for a New York State assessment and the recovery of higher pension expense), offset by higher operations and maintenance costs (\$216 million, due primarily to the surcharge for a New York State assessment (\$108 million), higher pension expense (\$80 million) and higher write-offs of uncollectible accounts (\$11 million)), taxes other than income taxes (\$171 million, principally property taxes) and depreciation (\$66 million).

Gas

CECONY's results of gas operations for the year ended December 31, 2009 compared with the year ended December 31, 2008 is as follows:

<i>(Millions of Dollars)</i>	Twelve Months Ended		Variation
	December 31, 2009	December 31, 2008	
Operating revenues	\$ 1,701	\$ 1,839	\$ (138)
Gas purchased for resale	818	999	(181)
Net revenues	883	840	43
Operations and maintenance	281	261	20
Depreciation and amortization	98	90	8
Taxes, other than income taxes	195	186	9
Gas operating income	\$ 309	\$ 303	\$ 6

CECONY's gas sales and deliveries, excluding off-system sales, in 2009 compared with 2008 were:

Description	Thousands of dths Delivered				Revenues in Millions			
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation
	December 31, 2009	December 31, 2008			December 31, 2009	December 31, 2008		
Residential	39,749	40,195	(446)	(1.1)%	\$ 808	\$ 850	\$ (42)	(4.9)%
General	28,245	28,748	(503)	(1.7)	421	482	(61)	(12.7)
Firm transportation	48,671	43,245	5,426	12.5	266	202	64	31.7
Total firm sales and transportation	116,665	112,188	4,477	4.0	1,495	1,534	(39)	(2.5)
Interruptible sales	8,225	11,220	(2,995)	(26.7)	75	138	(63)	(45.7)
NYPA	37,764	44,694	(6,930)	(15.5)	4	4	-	-
Generation plants	68,157	74,082	(5,925)	(8.0)	34	55	(21)	(38.2)
Other	18,297	20,004	(1,707)	(8.5)	39	30	9	30.0
Other operating revenues	-	-	-	-	54	78	(24)	(30.8)
Total	249,108	262,188	(13,080)	(5.0)%	\$ 1,701	\$ 1,839	\$ (138)	(7.5)%

CECONY's gas operating revenues decreased \$138 million in 2009 compared with 2008 due primarily to a decrease in gas purchased for resale costs (\$181 million), offset in part by the 2008 gas rate plan (\$59 million). CECONY's revenues from gas sales are subject to a weather normalization clause and a revenue decoupling mechanism as a result of which delivery revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. Other gas operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the company's rate plans. See Note B to the financial statements in Item 8.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

CECONY's sales and transportation volumes for firm customers increased 4.0 percent in 2009 compared with 2008. After adjusting for variations, principally weather and billing days, firm gas sales and transportation volumes in the company's service area increased 2.4 percent in 2009, reflecting primarily new business and transfers of interruptible customers to firm service, offset in part by lower average normalized use per customer.

Table of Contents

CECONY's purchased gas cost decreased \$181 million in 2009 compared with 2008 due to lower unit costs (\$152 million) and sendout volumes (\$29 million).

CECONY's gas operating income increased \$6 million in 2009 compared with 2008. The increase reflects primarily higher net revenues (\$43 million), offset by higher operations and maintenance expense (\$20 million, due primarily to a surcharge for a New York State assessment (\$15 million)), taxes other than income taxes (\$9 million, principally property taxes) and depreciation (\$8 million).

Steam

CECONY's results of steam operations for the year ended December 31, 2009 compared with the year ended December 31, 2008 is as follows:

<i>(Millions of Dollars)</i>	Twelve Months Ended		Variation
	December 31, 2009	December 31, 2008	
Operating revenues	\$ 661	\$ 707	\$ (46)
Purchased power	54	93	(39)
Fuel	256	284	(28)
Net revenues	351	330	21
Operations and maintenance	171	158	13
Depreciation and amortization	59	61	(2)
Taxes, other than income taxes	82	80	2
Steam operating income	\$ 39	\$ 31	\$ 8

CECONY's steam sales and deliveries in 2009 compared with 2008 were:

Description	Millions of Pounds Delivered				Revenues in Millions			
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation
	December 31, 2009	December 31, 2008			December 31, 2009	December 31, 2008		
General	786	785	1	0.1%	\$ 28	\$ 23	\$ 5	21.7%
Apartment house	5,962	6,614	(652)	(9.9)	165	186	(21)	(11.3)
Annual power	16,269	16,577	(308)	(1.9)	446	468	(22)	(4.7)
Other operating revenues					22	30	(8)	(26.7)
Total	23,017	23,976	(959)	(4.0)%	\$ 661	\$ 707	\$ (46)	(6.5)%

CECONY's steam operating revenues decreased \$46 million in 2009 compared with 2008 due primarily to lower purchased power (\$39 million) and fuel costs (\$28 million), offset in part by the net change in rates under the steam rate plan (\$27 million). Other steam operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the company's rate plans. See Note B to the financial statements in Item 8.

Steam sales and delivery volumes decreased 4.0 percent in 2009 compared with 2008. After adjusting for variations, principally weather and billing days, steam sales and deliveries decreased 4.1 percent in 2009, reflecting the impact of lower average normalized use per customer.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

CECONY's steam purchased power costs decreased \$39 million in 2009 compared with 2008 due to a decrease in unit costs (\$44 million), offset by an increase in purchased volumes (\$5 million). Steam fuel costs decreased \$28 million in 2009 compared with 2008 due to lower sendout volumes (\$18 million) and unit costs (\$10 million).

Steam operating income increased \$8 million in 2009 compared with 2008. The increase reflects primarily higher net revenues (\$21 million) and lower depreciation (\$2 million), offset by higher operations and maintenance expense (\$13 million, due primarily to a surcharge for a New York State assessment (\$5 million) and higher production expense (\$6 million)) and taxes other than income taxes (\$2 million, principally property taxes).

60

Table of Contents**Taxes Other Than Income Taxes**

At over \$1 billion, taxes other than income taxes remain one of CECONY's largest operating expenses. The principal components of, and variations in, taxes other than income taxes were:

<i>(Millions of Dollars)</i>	2009	2008	Increase/ (Decrease)
Property taxes	\$ 1,135	\$ 955	\$ 180(a)
State and local taxes related to revenue receipts	282	283	(1)
Payroll taxes	59	57	2
Other taxes	10	9	1
Total	\$ 1,486(b)	\$ 1,304(b)	\$ 182

(a) Property taxes increased \$180 million reflecting primarily higher capital investments and New York City property tax rates.

(b) Including sales tax on customers' bills, total taxes other than income taxes, billed to customers in 2009 and 2008 were \$1,866 million and \$1,684 million, respectively.

Income Taxes

Income taxes increased \$7 million in 2009 compared with 2008 due primarily to higher taxable income in the 2009 period.

Other Income (Deductions)

Other income (deductions) increased \$17 million in 2009 compared with 2008 due primarily to higher income from the Deferred Income Plan returns in 2009. The Deferred Income Plan returns are also reflected in higher operations and maintenance expense.

Net Interest Expense

Net interest expense increased \$61 million in 2009 compared with 2008 due primarily to new debt issuances in 2009 and late in 2008, offset in part by lower principal amounts of and rates on commercial paper outstanding in 2009.

O&R

Taxes, other than income taxes	33	32	1
Electric operating income	\$ 64	\$ 68	\$ (4)

61

Table of Contents

O&R's electric sales and deliveries, excluding off-system sales, in 2009 compared with 2008 were:

Description	Millions of kWhs Delivered				Revenues in Millions			
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation
	December 31, 2009	December 31, 2008			December 31, 2009	December 31, 2008		
Residential/Religious(a)	1,799	1,892	(93)	(4.9)%	\$ 309	\$ 330	\$ (21)	(6.4)%
Commercial/Industrial	1,763	2,082	(319)	(15.3)	231	303	(72)	(23.8)
Retail access customers	1,901	1,814	87	4.8	95	80	15	18.8
Public authorities	111	119	(8)	(6.7)	11	17	(6)	(35.3)
Other operating revenues					2	3	(1)	(33.3)
Total	5,574	5,907	(333)	(5.6)%	\$ 648	\$ 733	\$ (85)	(11.6)%

(a) Residential/Religious generally includes single-family dwellings, individual apartments in multi-family dwellings, religious organizations and certain other not-for-profit organizations.

O&R's electric operating revenues decreased \$85 million in 2009 compared with 2008 due primarily to decreased recoverable purchased power costs (\$105 million). Effective July 2008, O&R's New York electric delivery revenues are subject to a revenue decoupling mechanism, as a result of which, delivery revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. O&R's electric sales in New Jersey and Pennsylvania are not part of a decoupling mechanism, and as a result, they do impact revenues. Other electric operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the company's electric rate plan. See Note B to the financial statements in Item 8.

Electric delivery volumes in O&R's service area decreased 5.6 percent in 2009 compared with 2008. After adjusting for weather variations and unbilled volumes, electric delivery volumes in O&R's service area decreased 3.9 percent in 2009 compared with 2008, reflecting the impact of lower average normalized use per customer.

Electric operating income decreased \$4 million in 2009 compared with 2008. The decrease reflects primarily higher operations and maintenance expense (\$22 million), due primarily to higher demand management program expenses (\$7 million), a surcharge for a New York State assessment (\$5 million) and higher pension expense (\$4 million), taxes other than income taxes (\$1 million, principally property taxes) and depreciation (\$1 million), offset by higher net revenues (\$20 million).

Gas

O&R's results of gas operations for the year ended December 31, 2009 compared with the year ended December 31, 2008 is as follows:

(Millions of Dollars)	Twelve Months Ended		
	December 31, 2009	December 31, 2008	Variation
Operating revenues	\$ 242	\$ 258	\$ (16)
Gas purchased for resale	136	159	(23)
Net revenues	106	99	7
Operations and maintenance	54	51	3
Depreciation and amortization	12	11	1
Taxes, other than income taxes	12	12	
Gas operating income	\$ 28	\$ 25	\$ 3

62

Table of Contents

O&R's gas sales and deliveries, excluding off-system sales, in 2009 compared with 2008 were:

Description	Thousands of cdfs Delivered				Revenues in Millions			
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation
	December 31, 2009	December 31, 2008			December 31, 2009	December 31, 2008		
Residential	7,811	8,068	(257)	(3.2)%	\$ 132	\$ 142	\$(10)	(7.0)%
General	1,750	1,816	(66)	(3.6)	27	30	(3)	(10.0)
Firm transportation	10,905	10,471	434	4.1	51	45	6	13.3
Total firm sales and transportation	20,466	20,355	111	0.5	210	217	(7)	(3.2)
Interruptible sales	4,502	5,409	(907)	(16.8)	21	27	(6)	(22.2)
Generation plants	1,346	2,327	(981)	(42.2)	2	4	(2)	(50.0)
Other	953	1,007	(54)	(5.4)				
Other gas revenues					9	10	(1)	(10.0)
Total	27,267	29,098	(1,831)	(6.3)%	\$ 242	\$ 258	\$(16)	(6.2)%

O&R's gas operating revenues decreased \$16 million in 2009 compared with 2008 due primarily to the decrease in gas purchased for resale in 2009 (\$23 million). Effective November 2009, O&R's New York gas delivery revenues became subject to a revenue decoupling mechanism.

Sales and transportation volumes for firm customers increased 0.5 percent in 2009 compared with 2008. After adjusting for weather and other variations, total firm sales and transportation volumes increased 0.2 percent in 2009 compared with 2008. O&R's New York revenues from gas sales are subject to a weather normalization clause that moderates, but does not eliminate, the effect of weather-related changes on net income.

Gas operating income increased \$3 million in 2009 compared with 2008. The increase reflects primarily higher net revenues (\$7 million), offset by higher operations and maintenance costs (\$3 million) and depreciation (\$1 million).

Taxes Other Than Income Taxes

Taxes, other than income taxes, increased \$1 million in 2009 compared with 2008. The principal components of taxes, other than income taxes, were:

(Millions of Dollars)	2009	2008	Increase/ (Decrease)
Property taxes	\$ 28	\$ 27	\$ 1
State and local taxes related to revenue receipts	12	12	
Payroll taxes	5	5	
Total	\$ 45(a)	\$ 44(a)	\$ 1

(a) Including sales tax on customers' bills, total taxes other than income taxes, billed to customers in 2009 and 2008 were \$77 million and \$78 million, respectively.

Income Taxes

Income taxes increased \$2 million in 2009 compared with 2008.

Other Income (Deductions)

Other income (deductions) decreased \$1 million in 2009 compared with 2008 due primarily to lower interest income in 2009.

Net Interest Expense

Net interest expense was the same in 2009 compared with 2008.

Competitive Energy Businesses

The competitive energy businesses' earnings from continuing operations decreased \$14 million in 2009 compared with 2008 due primarily to the after-tax gain on the sale of Con Edison Development's ownership interests in electricity generating plants in 2008 (\$131 million), offset in part by after-tax mark-to-market gains in 2009 versus mark-to-market losses in 2008 (\$78 million) and higher retail electricity margins in 2009.

Operating revenues decreased \$48 million in 2009 compared with 2008, due primarily to lower electric wholesale and retail revenues and the sale of Con Edison Development's ownership interests in electricity generating plants in 2008. Electric wholesale revenues decreased \$312 million in 2009 as compared with 2008, due to lower sales volumes (\$261 million) and

Table of Contents

unit prices (\$51 million). Electric retail revenues decreased \$26 million, due to lower per unit prices (\$187 million), offset by higher sales volume (\$161 million). Electric retail revenues decreased 2 percent in 2009 as compared with 2008, due to lower electricity prices, while gross margins increased significantly due primarily to the sale of higher margin contracts, lower costs and higher volumes. Net mark-to-market gains increased \$131 million in 2009 as compared with 2008 due primarily to higher prices on electric and natural gas contracts, of which \$296 million in gains are reflected in revenues and \$165 million in losses are reflected in purchased power costs. The competitive energy businesses no longer have revenues from the sale of electricity from owned generation projects due to the sale of ownership interests in electricity generating plants in the second quarter of 2008. These revenues were \$21 million in 2008 (see Note U to the financial statements in Item 8). Other revenues increased \$15 million in 2009 as compared with 2008 due primarily to higher sales of energy efficiency services.

Operating expenses excluding income taxes decreased \$240 million in 2009 compared with 2008, due primarily to decreased purchased power (\$253 million), net of a \$165 million increase in purchased power costs for mark-to-market losses, gas purchased for resale (\$5 million) and fuel costs (\$3 million) and taxes other than income taxes (\$3 million), offset in part by higher operations and maintenance costs (\$23 million).

Income taxes decreased \$62 million in 2009 as compared with 2008, due primarily to income taxes related to the sale of Con Edison Development's ownership interests in electricity generating plants in 2008 (\$130 million), offset in part by higher income due to mark-to-market gains and higher earnings from electric retail sales.

Discontinued Operations

Net income from discontinued operations was \$274 million lower in 2009 compared with 2008, reflecting the 2008 sale of Con Edison Development's ownership interests in electricity generating plants. See Note U to the financial statements in Item 8.

Other

For Con Edison, Other also includes the receipt of \$30 million after-tax for a litigation settlement with Northeast Utilities in 2008 and inter-company eliminations relating to operating revenues and operating expenses.

Table of Contents

NYPA, Municipal Agency and other sales	11,704	11,499	205	1.8	413	342	71	20.8
Other operating revenues					404	621	(217)	(34.9)
Total	58,323	58,261	62	0.1%	\$ 7,878	\$ 7,440	\$ 438	5.9%

(a) Residential/Religious generally includes single-family dwellings, individual apartments in multi-family dwellings, religious organizations and certain other not-for-profit organizations.

CECONY's electric operating revenues increased \$438 million in 2008 compared with 2007 due primarily to the electric rate plans (\$201 million), increased recoverable fuel costs (\$52 million) and an increase in recoverable purchased power costs (\$163 million). Effective April 2008, CECONY's revenues from electric sales are subject to a revenue decoupling mechanism, as a result of which revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. Other electric operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the company's rate plans. See Note B to the financial statements in Item 8.

Electric delivery volumes in CECONY's service area increased 0.1 percent in 2008 compared with 2007. After adjusting for variations, principally weather and billing days, electric delivery volumes in CECONY's service area increased 0.5 percent in 2008 compared with 2007.

CECONY's electric fuel costs increased \$52 million in 2008 compared with 2007 due primarily to an increase in unit costs (\$56 million), offset by lower sendout volumes from the company's generating facilities (\$4 million). Electric purchased power costs increased \$163 million in 2008 compared with 2007 reflecting an increase in unit costs (\$265 million), offset by a decrease in purchased volumes (\$102 million).

Table of Contents

CECONY's electric operating income increased \$29 million in 2008 compared with 2007. The increase reflects primarily higher net revenues (\$223 million, due primarily to the electric rate plan), offset by higher operations and maintenance costs (\$102 million, due primarily to a reserve associated with the Long Island City power outage (\$23 million) and increased pension expenses (\$67 million)), depreciation (\$73 million) and taxes other than income taxes (\$19 million, principally state and local taxes on revenue).

Gas

CECONY's results of gas operations for the year ended December 31, 2008 compared with the year ended December 31, 2007 is as follows:

<i>(Millions of Dollars)</i>	Twelve Months Ended		Variation
	December 31, 2008	December 31, 2007	
Operating revenues	\$ 1,839	\$ 1,759	\$ 80
Gas purchased for resale	999	978	21
Net revenues	840	781	59
Operations and maintenance	261	221	40
Depreciation and amortization	90	85	5
Taxes, other than income taxes	186	166	20
Gas operating income	\$ 303	\$ 309	\$ (6)

CECONY's gas sales and deliveries, excluding off-system sales, in 2008 compared with 2007 were:

Description	Thousands of dths Delivered				Revenues in Millions			
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation
December 31, 2008	December 31, 2007	December 31, 2008			December 31, 2007			
Residential	40,195	42,573	(2,378)	(5.6)%	\$ 850	\$ 842	\$ 8	1.0%
General	28,748	31,162	(2,414)	(7.7)	482	499	(17)	(3.4)
Firm transportation	43,245	39,016	4,229	10.8	202	168	34	20.2
Total firm sales and transportation	112,188	112,751	(563)	(0.5)	1,534	1,509	25	1.7
Interruptible sales	11,220	10,577	643	6.1	138	88	50	56.8
NYPA	44,694	42,085	2,609	6.2	4	4		
Generation plants	74,082	79,942	(5,860)	(7.3)	55	52	3	5.8
Other	20,004	15,318	4,686	30.6	30	24	6	25.0
Other operating revenues					78	82	(4)	(4.9)
Total	262,188	260,673	1,515	0.6%	\$ 1,839	\$ 1,759	\$ 80	4.5%

CECONY's gas operating revenues increased \$80 million in 2008 compared with 2007 due primarily to an increase in recoverable purchased gas costs (\$21 million), the gas rate plans (\$58 million) and sales growth (\$2 million). CECONY's revenues from gas sales are subject to a weather normalization clause and, effective October 2007, a revenue decoupling mechanism as a result of which revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. Other gas operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the company's rate plans. See Note B to the financial statements in Item 8.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

CECONY's sales and transportation volumes for firm customers decreased 0.5 percent in 2008 compared with 2007, reflecting primarily the impact of the milder winter weather in 2008 compared with 2007. After adjusting for variations, principally weather and billing days firm gas sales and transportation volumes in the company's service area increased 0.6 percent in 2008.

CECONY's purchased gas cost increased \$21 million in 2008 compared with 2007 due to higher unit costs (\$159 million), offset by lower sendout volumes (\$138 million).

67

Table of Contents

CECONY's gas operating income decreased \$6 million in 2008 compared with 2007. The decrease reflects primarily higher operations and maintenance expense (\$40 million, due primarily to higher transmission and distribution expenses (\$22 million) and higher pension expense (\$9 million)), taxes other than income taxes (\$20 million, principally property taxes) and depreciation (\$5 million), offset by higher net revenues (\$59 million).

Steam

CECONY's results of steam operations for the year ended December 31, 2008 compared with the year ended December 31, 2007 is as follows:

<i>(Millions of Dollars)</i>	Twelve Months Ended		Variation
	December 31, 2008	December 31, 2007	
Operating revenues	\$ 707	\$ 686	\$ 21
Purchased power	93	85	8
Fuel	284	264	20
Net revenues	330	337	(7)
Operations and maintenance	158	143	15
Depreciation and amortization	61	60	1
Taxes, other than income taxes	80	78	2
Steam operating income	\$ 31	\$ 56	\$ (25)

CECONY's steam sales and deliveries in 2008 compared with 2007 were:

Description	Millions of Pounds Delivered				Revenues in Millions				
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation	
	December 31, 2008	December 31, 2007			December 31, 2008	December 31, 2007			
General	785	589	196	33.3%	\$ 23	\$ 23	\$	%	
Apartment house	6,614	7,519	(905)	(12.0)	186	188	(2)	(1.1)	
Annual power	16,577	17,696	(1,119)	(6.3)	468	443	25	5.6	
Other operating revenues					30	32	(2)	(6.3)	
Total	23,976	25,804	(1,828)	(7.1)%	\$ 707	\$ 686	\$ 21	3.1%	

CECONY's steam operating revenues increased \$21 million in 2008 compared with 2007 due primarily to the net change in rates under the steam rate plan (\$25 million). Other steam operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the company's rate plans. See Note B to the financial statements in Item 8.

Steam sales and delivery volumes decreased 7.1 percent in 2008 compared with 2007, reflecting primarily the impact of weather. After adjusting for variations, principally weather and billing days, steam sales and deliveries decreased 3.0 percent in 2008, reflecting primarily lower customer usage.

CECONY's steam fuel costs increased \$20 million in 2008 compared with 2007 due primarily to higher unit costs (\$43 million), offset by lower sendout volumes (\$23 million). Steam purchased power costs increased \$8 million in 2008 compared with 2007 due primarily to higher unit costs (\$17 million), offset by a decrease in purchased volumes (\$9 million).

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Steam operating income decreased \$25 million in 2008 compared with 2007. The decrease reflects primarily higher operations and maintenance expense (\$15 million, due primarily to higher distribution expense (\$12 million)), taxes other than income taxes (\$2 million, principally property taxes), depreciation (\$1 million) and lower net revenues (\$7 million).

68

Table of Contents**Taxes Other Than Income Taxes**

At over \$1 billion, taxes other than income taxes remain one of CECONY's largest operating expenses. The principal components of, and variations in, taxes other than income taxes were:

<i>(Millions of Dollars)</i>	2008	2007	Increase/ (Decrease)
Property taxes	\$ 955	\$ 936	\$ 19
State and local taxes related to revenue receipts	283	262	21
Payroll taxes	57	55	2
Other taxes	9	10	(1)
Total	\$ 1,304(a)	\$ 1,263(a)	\$ 41

(a) Including sales tax on customers' bills, total taxes other than income taxes, billed to customers in 2008 and 2007 were \$1.7 billion and \$1.6 billion, respectively.

Income Taxes

Income taxes increased \$5 million in 2008 compared with 2007 due primarily to higher taxable income in the 2008 period.

Other Income (Deductions)

Other income (deductions) decreased \$20 million in 2008 compared with 2007 due primarily to lower interest income in 2008.

Net Interest Expense

Net interest expense increased \$34 million in 2008 compared with 2007 due primarily to new debt issuances, higher interest rates on floating-rate debt and lower principal amounts of commercial paper outstanding in 2008.

O&R

<i>(Millions of Dollars)</i>	Twelve Months Ended December 31, 2008			Twelve Months Ended December 31, 2007			2008-2007 Variation
	Electric	Gas	2008 Total	Electric	Gas	2007 Total	
Operating revenues	\$ 733	\$ 258	\$ 991	\$ 671	\$ 265	\$ 936	\$ 55
Purchased power	433		433	384		384	49
Gas purchased for resale		159	159		166	166	(7)
Net revenues	300	99	399	287	99	386	13
Operations and maintenance	171	51	222	152	51	203	19
Depreciation and amortization	29	11	40	28	10	38	2
Taxes, other than income taxes	32	12	44	31	11	42	2
Operating income	\$ 68	\$ 25	\$ 93	\$ 76	\$ 27	\$ 103	\$ (10)

Electric

O&R's results of electric operations for the year ended December 31, 2008 compared with the year ended December 31, 2007 is as follows:

<i>(Millions of Dollars)</i>	Twelve Months Ended		Variation
	December 31, 2008	December 31, 2007	
Operating revenues	\$ 733	\$ 671	\$ 62
Purchased power	433	384	49
Net revenues	300	287	13
Operations and maintenance	171	152	19
Depreciation and amortization	29	28	1
Taxes, other than income taxes	32	31	1
Electric operating income	\$ 68	\$ 76	\$ (8)
			69

Table of Contents

O&R's electric sales and deliveries, excluding off-system sales, in 2008 compared with 2007 were:

Description	Millions of kWhs Delivered				Revenues in Millions			
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation
	December 31, 2008	December 31, 2007			December 31, 2008	December 31, 2007		
Residential/Religious(a)	1,892	1,913	(21)	(1.1)%	\$ 330	\$ 298	\$ 32	10.7%
Commercial/Industrial	2,082	2,191	(109)	(5.0)	303	283	20	7.1
Retail access customers	1,814	1,687	127	7.5	80	73	7	9.6
Public authorities	119	120	(1)	(0.8)	17	15	2	13.3
Other operating revenues					3	2	1	50.0
Total	5,907	5,911	(4)	(0.1)%	\$ 733	\$ 671	\$ 62	9.2%

(a) Residential/Religious generally includes single-family dwellings, individual apartments in multi-family dwellings, religious organizations and certain other not-for-profit organizations.

O&R's electric operating revenues increased \$62 million in 2008 compared with 2007 due primarily to increased recoverable purchased power costs (\$49 million) and the impact of the electric rate plan that went into effect July 1, 2008 (\$8 million). Effective July 2008, O&R's revenues from electric sales are subject to a revenue decoupling mechanism, as a result of which, revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. Other electric operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the company's electric rate plan. See Note B to the financial statements in Item 8.

Electric delivery volumes in O&R's service area decreased 0.1 percent in 2008 compared with 2007. After adjusting for weather variations and unbilled volumes, electric delivery volumes in O&R's service area decreased 1.0 percent in 2008 compared with 2007.

Electric operating income decreased by \$8 million in 2008 compared with 2007. The decrease reflects primarily higher operations and maintenance expense (\$19 million, due primarily to higher maintenance costs (\$6 million), pension expense (\$4 million) and demand management program expenses (\$3 million)), depreciation (\$1 million) and taxes other than income taxes (\$1 million, principally property taxes), offset by higher net revenues (\$13 million).

Gas

O&R's results of gas operations for the year ended December 31, 2008 compared with the year ended December 31, 2007 is as follows:

(Millions of Dollars)	Twelve Months Ended		Variation
	December 31, 2008	December 31, 2007	
Operating revenues	\$ 258	\$ 265	\$ (7)
Gas purchased for resale	159	166	(7)
Net revenues	99	99	
Operations and maintenance	51	51	
Depreciation and amortization	11	10	1
Taxes, other than income taxes	12	11	1
Gas operating income	\$ 25	\$ 27	\$ (2)

70

Table of Contents

O&R's gas sales and deliveries, excluding off-system sales, in 2008 compared with 2007 were:

Description	Thousands of dths Delivered				Revenues in Millions			
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation
	December 31, 2008	December 31, 2007			December 31, 2008	December 31, 2007		
Residential	8,068	8,768	(700)	(8.0)%	\$ 142	\$ 152	\$ (10)	(6.6)%
General	1,816	2,066	(250)	(12.1)	30	34	(4)	(11.8)
Firm transportation	10,471	10,248	223	2.2	45	39	6	15.4
Total firm sales and transportation	20,355	21,082	(727)	(3.4)	217	225	(8)	(3.6)
Interruptible sales	5,409	5,983	(574)	(9.6)	27	25	2	8.0
Generation plants	2,327	4,552	(2,225)	(48.9)	4	3	1	33.3
Other	1,007	1,044	(37)	(3.5)				
Other gas revenues					10	12	(2)	(16.7)
Total	29,098	32,661	(3,563)	(10.9)%	\$ 258	\$ 265	\$ (7)	(2.6)%

O&R's gas operating revenues decreased \$7 million in 2008 compared with 2007 due primarily to the decrease in gas purchased for resale in 2008 (\$7 million).

Sales and transportation volumes for firm customers decreased 3.4 percent in 2008 compared with 2007, reflecting the impact of the weather in 2008. After adjusting for weather and other variations, total firm sales and transportation volumes were the same in 2008 compared with 2007. O&R's revenues from gas sales are subject to a weather normalization clause that moderates, but does not eliminate, the effect of weather-related changes on net income.

Gas operating income decreased by \$2 million in 2008 compared with 2007. The decrease reflects primarily higher depreciation (\$1 million) and taxes other than income taxes (\$1 million, principally state and local taxes).

Taxes Other Than Income Taxes

Taxes, other than income taxes, increased \$2 million in 2008 compared with 2007. The principal components of taxes, other than income taxes, were:

(Millions of Dollars)	2008	2007	Increase/ (Decrease)
Property taxes	\$ 27	\$ 25	\$ 2
State and local taxes related to revenue receipts	12	13	(1)
Payroll taxes	5	4	1
Total	\$ 44(a)	\$ 42(a)	\$ 2

(a) Including sales tax on customers' bills, total taxes other than income taxes, billed to customers in 2008 and 2007 were \$78 million and \$71 million, respectively.

Income Taxes

Income taxes increased \$1 million in 2008 compared with 2007.

Other Income (Deductions)

Other income (deductions) increased \$3 million in 2008 compared with 2007 due primarily to higher interest income in 2008.

Net Interest Expense

Net interest expense decreased \$6 million in 2008 compared with 2007 due primarily to interest accrued for the potential repayment of tax benefits from the timing of tax deductions of certain construction related costs in 2007 (see Note L to the financial statements in Item 8).

Competitive Energy Businesses

The competitive energy businesses' earnings from continuing operations increased \$15 million in 2008 compared with 2007 due primarily to a \$131 million gain on the sale of Con Edison Development's ownership interests in electricity generating plants, offset by lower net income from generation projects, lower gross margins from electric wholesale and retail sales and mark-to-market losses. Income from continuing operations reflects a pre-tax gain of \$261 million and income taxes of \$130 million, related to the sale of Con Edison Development's ownership interests in generating plants.

Table of Contents

Operating revenues decreased \$108 million in 2008 compared with 2007, due primarily to decreased electric generation and retail revenues. Revenue from the sale of electricity from the competitive energy businesses' generation facilities decreased \$87 million in 2008 as compared with 2007 due to the sale of Con Edison Development's ownership interests in generating plants during the second quarter of 2008. Electric retail revenues decreased \$54 million in 2008 as compared with 2007, due primarily to lower sales volumes (\$181 million), offset by higher unit prices (\$127 million). Electric retail revenues decreased 4 percent from 2007 to 2008 and gross margins decreased primarily due to lower volumes and lower per unit margins. Electric wholesale revenues increased \$76 million, due primarily to higher per unit prices (\$104 million), offset by lower sales volume (\$28 million). Electric wholesale revenues increased by 9 percent from 2007 to 2008 and gross margin decreased primarily due to lower volumes and lower per unit margins. Net mark-to-market losses increased \$91 million in 2008 as compared with 2007 due primarily to lower prices on electric and natural gas contracts, which were economic hedges for retail obligations (but were not accounted for as cash flow hedges). Other revenues increased \$47 million in 2008 as compared with 2007 due primarily to energy services revenue.

Operating expenses excluding income taxes increased \$69 million in 2008 compared with 2007, reflecting increased purchased power costs (\$125 million) and other operations and maintenance costs (\$3 million), offset in part by lower depreciation (\$9 million), fuel costs (\$33 million), gas purchased for resale costs (\$14 million) and taxes other than income taxes (\$3 million).

Other income decreased \$12 million in 2008 as compared with 2007 due primarily to an impairment charge on investments in electric generating plants (\$4 million) in 2008 and a gain from the sale of Con Edison Development's interest in Everpower Wind LLC in 2007 (\$6 million).

Income taxes increased \$56 million in 2008 as compared with 2007, due primarily to the sale of Con Edison Development's ownership interests in generating plants.

Discontinued Operations

Net income from discontinued operations was the same in 2008 compared with 2007. See Note U to the financial statements in Item 8.

Other

For Con Edison, Other also includes the receipt of \$30 million after-tax for a litigation settlement with Northeast Utilities in the nine months ended September 30, 2008 and inter-company eliminations relating to operating revenues and operating expenses.

Net income for common stock	219	121	250	193

In the opinion of Con Edison of New York, these quarterly amounts include all adjustments, consisting only of normal recurring accruals, necessary for a fair presentation.

Table of Contents

Report of Management on Internal Control Over Financial Reporting

Management of Consolidated Edison, Inc. and its subsidiaries (the Company) is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable, but not absolute, assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of the effectiveness of controls to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

Management of the Company assessed the effectiveness of internal control over financial reporting as of December 31, 2009, using the criteria established by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control - Integrated Framework*. Based on that assessment, management has concluded that the Company had effective internal control over financial reporting as of December 31, 2009.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2009, has been audited by PricewaterhouseCoopers LLP, the Company's independent registered public accounting firm, as stated in their report which appears on the following page of this Annual Report on Form 10-K.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors of Consolidated Edison, Inc.:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Consolidated Edison, Inc. and its subsidiaries (the Company) at December 31, 2009 and 2008, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2009 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedules listed in the accompanying index present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company’s management is responsible for these financial statements and financial statement schedules, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report of Management on Internal Control Over Financial Reporting. Our responsibility is to express opinions on these financial statements, on the financial statement schedules, and on the Company’s internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Report of Management on Internal Control Over Financial Reporting

Management of Consolidated Edison Company of New York, Inc. and its subsidiaries (the Company) is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable, but not absolute, assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of the effectiveness of controls to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

Management of the Company assessed the effectiveness of internal control over financial reporting as of December 31, 2009, using the criteria established by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control - Integrated Framework*. Based on that assessment, management has concluded that the Company had effective internal control over financial reporting as of December 31, 2009.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2009, has been audited by PricewaterhouseCoopers LLP, the Company's independent registered public accounting firm, as stated in their report which appears on the following page of this Annual Report on Form 10-K.

Report of Independent Registered Public Accounting Firm

To the Stockholder and Board of Trustees of Consolidated Edison Company of New York, Inc.:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Consolidated Edison Company of New York, Inc. and its subsidiaries (the Company) at December 31, 2009 and 2008, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2009 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report of Management on Internal Control Over Financial Reporting. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Table of Contents

Notes to the Financial Statements

General

These combined notes accompany and form an integral part of the separate consolidated financial statements of each of the two separate registrants: Consolidated Edison, Inc. and its subsidiaries (Con Edison) and Consolidated Edison Company of New York, Inc. and its subsidiaries (CECONY). CECONY is a subsidiary of Con Edison and as such its financial condition and results of operations and cash flows, which are presented separately in the CECONY consolidated financial statements, are also consolidated, along with those of Con Edison's other utility subsidiary, Orange and Rockland Utilities, Inc. (O&R), and Con Edison's competitive energy businesses (discussed below) in Con Edison's consolidated financial statements. The term "Utilities" is used in these notes to refer to CECONY and O&R.

As used in these notes, the term "Companies" refers to Con Edison and CECONY and, except as otherwise noted, the information in these combined notes relates to each of the Companies. However, CECONY makes no representation as to information relating to Con Edison or the subsidiaries of Con Edison other than itself.

The Companies have, pursuant to the accounting rules for subsequent events, evaluated events or transactions that occurred after December 31, 2009 through the filing with the Securities and Exchange Commission of this Annual Report on Form 10-K for potential recognition or disclosure in the consolidated financial statements.

Con Edison has two regulated utility subsidiaries: CECONY and O&R. CECONY provides electric service and gas service in New York City and Westchester County. The company also provides steam service in parts of Manhattan. O&R, along with its regulated utility subsidiaries, provides electric service in southeastern New York and adjacent areas of northern New Jersey and eastern Pennsylvania and gas service in southeastern New York and adjacent areas of eastern Pennsylvania. Con Edison has the following competitive energy businesses: Consolidated Edison Solutions, Inc. (Con Edison Solutions), a retail energy services company that sells electricity and also offers energy-related services; Consolidated Edison Energy, Inc. (Con Edison Energy), a wholesale energy supply and services company; and Consolidated Edison Development, Inc. (Con Edison Development), a company that develops and participates in infrastructure projects. During the second quarter of 2008, Con Edison Development and its subsidiary, CED/SCS Newington, LLC, completed the sale of their ownership interests in electricity generating plants with an aggregate capacity of approximately 1,706 megawatts. See Note U to the financial statements.

Note A Summary of Significant Accounting Policies

Principles of Consolidation

The Companies' consolidated financial statements include the accounts of their respective majority-owned subsidiaries, and variable interest entities (see Note Q), as required. All intercompany balances and transactions have been eliminated.

Accounting Policies

The accounting policies of Con Edison and its subsidiaries conform to accounting principles generally accepted in the United States of America. For the Utilities, these accounting principles include the accounting rules for regulated operations and the accounting requirements of the Federal Energy Regulatory Commission (FERC) and the state public utility regulatory commissions having jurisdiction.

The accounting rules for regulated operations specify the economic effects that result from the causal relationship of costs and revenues in the rate-regulated environment and how these effects are to be accounted for by a regulated enterprise. Revenues intended to cover some costs may be recorded either before or after the costs are incurred. If regulation provides assurance that incurred costs will be recovered in the future, these costs would be recorded as deferred charges or "regulatory assets" under the accounting rules for regulated operations. If revenues are recorded for costs that are expected to be incurred in the future, these revenues would be recorded as deferred credits or "regulatory liabilities" under the accounting rules for regulated operations.

Table of Contents

The Utilities' principal regulatory assets and liabilities are detailed in Note B. The Utilities are receiving or being credited with a return on all of their regulatory assets for which a cash outflow has been made, and are paying or being charged with a return on all of their regulatory liabilities for which a cash inflow has been received. The Utilities' regulatory assets and liabilities will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

Other significant accounting policies of the Companies are referenced below in this Note A and in the notes that follow.

Plant and Depreciation**Utility Plant**

Utility plant is stated at original cost. The cost of repairs and maintenance is charged to expense and the cost of betterments is capitalized. The capitalized cost of additions to utility plant includes indirect costs such as engineering, supervision, payroll taxes, pensions, other benefits and an allowance for funds used during construction (AFDC). The original cost of property is charged to expense over the estimated useful lives of the assets. Upon retirement, the original cost of property is charged to accumulated depreciation. See Note R.

Rates used for AFDC include the cost of borrowed funds and a reasonable rate of return on the Utilities' own funds when so used, determined in accordance with regulations of the FERC or the state public utility regulatory authority having jurisdiction. The rate is compounded semiannually, and the amounts applicable to borrowed funds are treated as a reduction of interest charges, while the amounts applicable to the Utilities' own funds are credited to other income (deductions). The AFDC rates for CECONY were 6.9 percent, 6.0 percent and 7.3 percent for 2009, 2008 and 2007, respectively. The AFDC rates for O&R were 4.2 percent, 3.5 percent and 5.2 percent for 2009, 2008 and 2007, respectively.

The Utilities generally compute annual charges for depreciation using the straight-line method for financial statement purposes, with rates based on average service lives and net salvage factors. The average depreciation rate for CECONY was 3.1 percent for 2009 and 2008 and 2.9 percent for 2007. The average depreciation rate for O&R was 2.8 percent for 2009, 2008 and 2007.

The estimated lives for utility plant for CECONY range from 5 to 80 years for electric, 5 to 85 years for gas, 5 to 70 years for steam and 5 to 50 years for general plant. For O&R, the estimated lives for utility plant range from 5 to 65 years for electric, 5 to 75 years for gas and 5 to 55 years for general plant.

At December 31, 2009 and 2008, the capitalized cost of the Companies' utility plant, net of accumulated depreciation, was as follows:

<i>(Millions of Dollars)</i>	Con Edison		CECONY

* Primarily distribution.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Under the Utilities' current rate plans, the aggregate annual depreciation allowance in effect at December 31, 2009 was \$784 million, including \$742 million under CECONY's electric, gas and steam rate plans that have been approved by the New York State Public Service Commission (NYSPPSC).

98

Table of Contents

Non-Utility Plant

Non-utility plant is stated at original cost and consists primarily of land and telecommunication facilities that are currently not used within electric, gas or steam utility operations. Depreciation on these assets is computed using the straight-line method for financial statement purposes over their estimated useful lives, which range from 3 to 10 years.

Goodwill

In accordance with the accounting rules for goodwill and intangible assets, Con Edison is required to test goodwill for impairment annually. Goodwill is tested for impairment using a two-step approach. The first step of the goodwill impairment test compares the estimated fair value of a reporting unit with its carrying value, including goodwill. If the estimated fair value of a reporting unit exceeds its carrying value, goodwill of the reporting unit is considered not impaired. If the carrying value exceeds the estimated fair value of the reporting unit, the second step is performed to measure the amount of impairment loss, if any. The second step requires a calculation of the implied fair value of goodwill. See Note K.

Impairments

In accordance with the accounting rules for impairment or disposal of long-lived assets, the Companies evaluate the impairment of long-lived assets, based on projections of undiscounted future cash flows, whenever events or changes in circumstances indicate that the carrying amounts of such assets may not be recoverable. In the event an evaluation indicates that such cash flows cannot be expected to be sufficient to fully recover the assets, the assets are written down to their estimated fair value.

In accordance with the accounting rules for equity method and joint ventures, Con Edison Development recognized pre-tax impairment charges of \$2 million in 2008, related to its equity investment in a 29 MW electric generating plant in Michigan (which was sold in 2008), and \$5 million and \$2 million in 2009 and 2008, respectively, related to its equity investment in an electric generating plant in Guatemala.

Revenues

The Utilities and Con Edison Solutions recognize revenues for energy service on a monthly billing cycle basis. The Utilities defer over a 12-month period net interruptible gas revenues, other than those authorized by the NYSPSC to be retained by the Utilities, for refund to firm gas sales and transportation customers. The Utilities and Con Edison Solutions accrue revenues at the end of each month for estimated energy service not yet billed to customers. Prior to March 31, 2009, CECONY did not accrue revenues for energy service provided but not yet billed to customers except for certain unbilled gas revenues accrued in 1989. This change in accounting for unbilled revenues had no effect on net income. See *Regulatory Assets and Liabilities* in Note B. Unbilled revenues included in Con Edison's balance sheet at December 31, 2009 and 2008 were \$579 million (including \$413 million for CECONY) and \$131 million, respectively.

CECONY's electric and gas rate plans and O&R's New York electric and gas rate plans each contain a revenue decoupling mechanism under which the company's actual energy delivery revenues is compared on a periodic basis, with the authorized delivery revenues and the difference accrued, with interest, for refund to, or recovery from, customers, as applicable. See *Rate Agreements* in Note B.

The NYSPSC requires utilities to record gross receipts tax revenues and expenses on a gross income statement presentation basis (i.e., included in both revenue and expense). The recovery of these taxes is generally provided for in the revenue requirement within each of the respective NYSPSC approved rate plans.

Recoverable Energy Costs

The Utilities generally recover all of their prudently incurred fuel, purchased power and gas costs, including hedging gains and losses, in accordance with rate provisions approved by the applicable state public utility commissions. If the actual energy supply costs for a given month are more or less than the amounts billed to customers for that month, the difference in most cases is recoverable from or refundable to customers. Differences between actual and billed

Table of Contents

electric and steam supply costs are generally deferred for charge or refund to customers during the next billing cycle (normally within one or two months). In addition, CECONY recovers the costs of its electric demand management program, in excess of the costs reflected in rates, as part of recoverable energy costs. For the Utilities' gas costs, differences between actual and billed gas costs during the 12-month period ending each August are charged or refunded to customers during a subsequent 12-month period.

New York Independent System Operator (NYISO)

The Utilities purchase electricity through the wholesale electricity market administered by the NYISO. The difference between purchased power and related costs initially billed to the Utilities by the NYISO and the actual cost of power subsequently calculated by the NYISO is refunded by the NYISO to the Utilities, or paid to the NYISO by the Utilities. The reconciliation payments or receipts are recoverable from or refundable to the Utilities' customers. See Regulatory Assets and Liabilities in Note B.

Certain other payments to or receipts from the NYISO are also subject to reconciliation, with shortfalls or amounts in excess of specified rate allowances recoverable from or refundable to customers. These include proceeds from the sale through the NYISO of transmission rights on CECONY's transmission system (transmission congestion contracts or TCCs). See Regulatory Assets and Liabilities in Note B.

Sulfur Dioxide (SO₂) Allowances

In accordance with the federal Clean Air Act, CECONY has been allocated SO₂ emission allowances which the company may sell, trade or hold for future use. Generally, CECONY defers its proceeds from the sale of SO₂ allowances as regulatory liabilities to be applied for customer benefit. See Regulatory Assets and Liabilities in Note B. The proceeds received from the sale of SO₂ allowances are included in net cash flows from operating activities in the Companies' consolidated statements of cash flows.

Temporary Cash Investments

Temporary cash investments are short-term, highly-liquid investments that generally have maturities of three months or less at the date of purchase. They are stated at cost, which approximates market. The Companies consider temporary cash investments to be cash equivalents.

Investments

Investments consist primarily of the investments of Con Edison's competitive energy businesses, which are accounted for under the equity method (depending on the subsidiaries' percentage ownership) or accounted for as leveraged leases in accordance with the accounting rules for leases. See Note J for a discussion of investments in Lease In/Lease Out transactions. Utilities' investments are recorded at either cost or fair value and include the deferred income plan and supplemental retirement income plan trust owned life insurance assets.

Pension and Other Postretirement Benefits

The accounting rules for retirement benefits require an employer to recognize an asset or liability for the overfunded or underfunded status of its pension and other postretirement benefit plans. For a pension plan, the asset or liability is the difference between the fair value of the plan's assets and the projected benefit obligation. For any other postretirement benefit plan, the asset or liability is the difference between the fair value of the plan's assets and the accumulated postretirement benefit obligation. The accounting rules generally require employers to recognize all unrecognized prior service costs and credits and unrecognized actuarial gains and losses in accumulated other comprehensive income (OCI), net of tax. Such amounts will be adjusted as they are subsequently recognized as components of net periodic benefit cost or income pursuant to the current recognition and amortization provisions.

For the Utilities' pension and other postretirement benefit plans, regulatory accounting treatment is generally applied in accordance with the accounting rules for regulated operations. Unrecognized prior service costs or credits and unrecognized actuarial gains and losses are recorded to regulatory assets or liabilities, rather than OCI. See Notes E and F.

Table of Contents

The net periodic benefit costs are recognized in accordance with the accounting rules for retirement benefits. Investment gains and losses are recognized in expense over a 15-year period and other actuarial gains and losses are recognized in expense over a 10-year period, subject to the deferral provisions in the rate plans.

In accordance with the Statement of Policy issued by the NYSPSC and its current electric, gas and steam rate agreements, CECONY defers for payment to or recovery from customers the difference between such expenses and the amounts for such expenses reflected in rates. Generally, O&R also defers such difference pursuant to its rate plans. See Note B Regulatory Matters.

The Companies calculate the expected return on pension and other retirement benefit plan assets by multiplying the expected rate of return on plan assets by the market-related value (MRV) of plan assets at the beginning of the year, taking into consideration anticipated contributions and benefit payments that are to be made during the year. The accounting rules allow the MRV of plan assets to be either fair value or a calculated value that recognizes changes in fair value in a systematic and rational manner over not more than five years. The Companies use a calculated value when determining the MRV of the plan assets that adjusts for 20 percent of the difference between fair value and expected MRV of plan assets. This calculated value has the effect of stabilizing variability in assets to which the Companies apply the expected return.

Federal Income Tax

In accordance with the accounting rules for income taxes, the Companies have recorded an accumulated deferred federal income tax liability for temporary differences between the book and tax basis of assets and liabilities at current tax rates. In accordance with rate agreements, the Utilities have recovered amounts from customers for a portion of the tax liability they will pay in the future as a result of the reversal or turn-around of these temporary differences. As to the remaining tax liability, in accordance with the accounting rules for regulated operations, the Utilities have established regulatory assets for the net revenue requirements to be recovered from customers for the related future tax expense. See Notes B and L. In 1993, the NYSPSC issued a Policy Statement approving accounting procedures consistent with the accounting rules for income taxes and providing assurances that these future increases in taxes will be recoverable in rates. See Note L.

Accumulated deferred investment tax credits are amortized ratably over the lives of the related properties and applied as a reduction to future federal income tax expense.

The Companies' federal income tax returns reflect certain tax positions with which the Internal Revenue Service (IRS) does not or may not agree. See Lease In/Lease Out Transactions in Note J and Uncertain Tax Positions in Note L.

Con Edison and its subsidiaries file a consolidated federal income tax return. The consolidated income tax liability is allocated to each member of the consolidated group using the separate return method. Each member pays or receives an amount based on its own taxable income or loss in accordance with tax sharing agreements between the members of the consolidated group.

State Income Tax

Con Edison and its subsidiaries file a combined New York State Corporation Business Franchise Tax Return. Similar to a federal consolidated income tax return, the income of all entities in the combined group is subject to New York State taxation, after adjustments for differences between federal and New York law and apportionment of income among the states in which the company does business. Each member of the group pays or receives an amount based on its own New York State taxable income or loss.

Table of Contents**Research and Development Costs**

Generally research and development costs are charged to operating expenses as incurred. Research and development costs were as follows:

<i>(Millions of Dollars)</i>	For the Years Ended December 31,		
	2009	2008	2007
Con Edison	\$ 27	\$ 29	\$ 20
CECONY	\$ 25	\$ 28	\$ 20

Reclassification

Certain prior year amounts have been reclassified to conform with the current year presentation. Effective June 2009, the Companies are including receivables purchased from energy supply companies within accounts receivable customers, and to conform to this presentation, have reclassified receivables purchased from energy supply companies that were included in other receivables at December 31, 2008 (\$146 million for Con Edison; \$121 million for CECONY). This reclassification more appropriately reflects the Utilities customer operations practices, policies and procedures. In addition, consistent with current industry practice, the Companies are presenting income tax expense as one item on their consolidated income statements (instead of separate items in the operating income and other income sections of the consolidated income statements) and changing the order of presentation on their consolidated balance sheets of current assets, net utility plant, current liabilities, long-term debt and shareholders equity.

Earnings Per Common Share

In accordance with the accounting rules for earnings per share, Con Edison presents basic and diluted earnings per share on the face of its consolidated income statement. Basic earnings per share (EPS) are calculated by dividing earnings available to common shareholders (Net income for common stock on Con Edison s consolidated income statement) by the weighted average number of Con Edison common shares outstanding during the period. In the calculation of diluted EPS, weighted average shares outstanding are increased for additional shares that would be outstanding if potentially dilutive securities were converted to common stock.

Potentially dilutive securities for Con Edison consist of restricted stock units, deferred stock units and stock options for which the average market price of the common shares for the period was greater than the exercise price. See Note M.

Basic and diluted EPS for Con Edison are calculated as follows:

<i>(Millions of Dollars, except per share amounts/Shares in Millions)</i>	For the Years Ended December 31,		
	2009	2008	2007
Income for common stock from continuing operations	\$ 868	\$ 922	\$ 925
Income for common stock from discontinued operations, net of tax		274	4
Net income for common stock	\$ 868	\$ 1,196	\$ 929
Weighted average common shares outstanding Basic	275.2	272.9	266.3
Add: Incremental shares attributable to effect of potentially dilutive securities	1.1	0.7	1.0
Adjusted weighted average common shares outstanding Diluted	276.3	273.6	267.3
Earnings per Common Share Basic			
Continuing operations	\$ 3.16	\$ 3.37	\$ 3.48
Discontinued operations		1.01	0.01
Net income for common stock	\$ 3.16	\$ 4.38	\$ 3.49
Earnings per Common Share Diluted			
Continuing operations	\$ 3.14	\$ 3.36	\$ 3.46
Discontinued operations		1.01	0.01
Net income for common stock	\$ 3.14	\$ 4.37	\$ 3.47

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

The computation of diluted earnings per share excludes immaterial amounts of incremental Con Edison common shares for the years ended December 31, 2009 and 2008, respectively, because the exercise prices on the options exceeded the average closing market price during these periods. The computation of diluted earnings per share does not exclude any Con Edison common shares for the year ended December 31, 2007

102

Table of Contents

because the average closing market price during this period exceeded the exercise price on the options.

Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Note B Regulatory Matters

Rate Agreements

CECONY Electric

In March 2005, the NYSPSC approved a Joint Proposal by CECONY, the staff of the NYSPSC and other parties with respect to the rates the company can charge its customers for electric delivery service (the 2005 Electric Rate Agreement). The 2005 Electric Rate Agreement covered the three-year period April 2005 through March 2008, pursuant to which CECONY's electric base rates were increased \$104.6 million, effective April 1, 2005, and were increased an additional \$220.4 million (of which \$60 million was accrued over the period beginning April 1, 2006 to March 31, 2007), effective April 1, 2007. In addition, the company retained the first \$60 million of auction proceeds from the sale of transmission rights on the company's transmission system in each of the three years. The rate increases also included the amortization of certain regulatory assets and liabilities. The net effect of this amortization was a non-cash increase in electric revenues of \$128 million, \$173 million and \$249 million in the first, second and third rate years, respectively.

The 2005 Electric Rate Agreement provided for annual reconciliations of the differences between the actual amount of transmission and distribution utility plant, net of depreciation (Net T&D) and the actual amount of certain operating costs experienced over the term of the agreement, as compared in each case to the amounts reflected in electric rates.

Actual Net T&D was greater than the Net T&D reflected in rates, and in accordance with the 2005 Electric Rate Agreement, the company accrued a regulatory asset and increased its revenues by the revenue requirement impact of such difference (i.e., a return on investment, depreciation and income taxes). If the actual Net T&D had been less than the Net T&D reflected in rates, the company would have accrued a regulatory liability and decreased its revenues by the revenue requirement impact of such difference. For the period from April 1, 2005 through March 31, 2008, actual Net T&D exceeded the Net T&D reflected in rates by approximately \$1.5 billion. The company accrued revenues of \$50 million, \$187 million and \$115 million in 2008, 2007 and 2006, respectively, to reflect the revenue requirement impact of the Net T&D difference. In accordance with the 2005 Electric Rate Agreement, the regulatory assets associated with the accrued revenues were offset at the end of each rate year with a like amount of regulatory liabilities.

The NYSPSC's March 2008 and April 2009 orders and the November 2009 Joint Proposal covering CECONY's electric rates, discussed below, provide for the collection of a portion of the company's electric revenues (\$237 million in the rate year ended March 2009, \$254 million for the rate year ending March 2010 and, beginning April 2010, \$249 million on an annual basis) subject to potential refund to customers following NYSPSC review and completion of an investigation by the NYSPSC staff of the company's capital expenditures during the April 2005 through March 2008 period covered by the 2005 Electric Rate Agreement for transmission and distribution utility plant (the 2005-2008 Capital Expenditure Review). In December 2009, the company established a \$24 million regulatory liability for refund to customers with respect to this matter and recognized a \$14 million (after-tax) charge in its 2009 consolidated financial statements. In February 2010, the company and the NYSPSC staff entered into a Joint Proposal, which is subject to NYSPSC approval, relating to this matter pursuant to which the company, among other things, agreed to refund to customers an amount approximating this regulatory liability.

Table of Contents

Under the 2005 Electric Rate Agreement, if the actual amount of pension or other postretirement benefit costs, environmental remediation costs and, if the variation exceeded 2.5 percent, property taxes or the cost of moving facilities to avoid interfering with government projects was greater than the respective amount for each such cost reflected in rates, the company would accrue a regulatory asset for the difference and defer recognition in income of the difference. If the actual amount had been less than the amount reflected in electric rates, the company would have accrued a regulatory liability for the difference and deferred recognition in income of the difference. As a result of the cost reconciliations, in 2008, the company reduced pre-tax net income by \$18 million, and in 2007, the company deferred expenses of \$35 million.

The 2005 Electric Rate Agreement also provided for the continuation of the rate provisions pursuant to which the company recovers its potential straddle costs and its purchased power and fuel costs from customers.

The 2005 Electric Rate Agreement included potential positive earnings adjustments (incentives) if the company met certain standards for its retail access and demand side management programs, and potential negative earnings adjustments (revenue reductions), which could have been substantial, if it did not meet certain standards for (i) frequency and duration of service interruptions; (ii) major outages; (iii) repair, removal or replacement of damaged poles, temporary shunts, street lights, traffic signals and circuit breakers; and (iv) customer service. In 2008 and 2007, the company recorded an incentive for demand side management initiatives of \$5 million and \$11 million, respectively. The company recorded no incentives in 2008. In 2007, the company recorded incentives of \$4 million associated with its efforts to promote retail access in its service territory. There was no revenue reduction in 2008. In 2007, the company recorded revenue reductions of \$9 million for not meeting certain standards for frequency and duration of service interruptions.

In March 2008, the NYSPSC adopted an order, issued and effective March 25, 2008, granting CECONY an electric rate increase, effective April 1, 2008, of \$425 million.

The NYSPSC ruling reflected the following major items:

a return on common equity of 9.1 percent;

an increase to \$150 million from \$60 million in the level of annual revenues that, for purposes of setting rates, it is assumed the company will receive and retain from the sale of transmission rights on the company's transmission system, with the difference between such actual revenues for the rate year and \$150 million to be recoverable from or refundable to customers, as the case may be (the company accrued \$36 million of revenues under this provision in 2008);

collection of \$237 million of the \$425 million rate increase is subject to potential refund to customers following the 2005-2008 Capital Expenditure Review (see discussion above in this Note B of the February 2010 Joint Proposal);

continuation of the rate provisions under which pension and other post-retirement benefit expenses and environmental remediation expenses are reconciled to amounts reflected in rates (the company deferred recognition of \$25 million of expenses under these provisions in 2008);

change to the reconciliation provisions for transmission and distribution expenditures and costs to relocate facilities to accommodate government projects, which under the NYSPSC ruling will be reconciled only to the extent actual expenditures are less than amounts reflected in rates (the company reduced revenues by \$15 million under this provision in 2008);

discontinuation of the provisions under which property taxes were reconciled to amounts reflected in rates;

Table of Contents

potential operations penalties of up to \$152 million annually if certain customer service and system reliability performance targets are not met (the company reduced revenues by \$5 million under these provisions in 2008);

implementation of a revenue decoupling mechanism under which the company's actual energy delivery revenues would be compared, on a periodic basis, with the authorized delivery revenues and the difference accrued, with interest, for refund to, or recovery from, customers, as applicable (the company reduced revenues by \$7 million pursuant to this provision in 2008); and

continuation of the rate provisions pursuant to which the company recovers its purchased power and fuel costs from customers. In April 2009, the NYSPSC adopted an order granting CECONY an electric rate increase, effective April 6, 2009, of \$523 million. The NYSPSC ruling reflects the following major items:

A return on common equity of 10.0 percent, based on certain assumptions, including a common equity ratio of 48 percent and achievement by the company of unspecified austerity measures required by the NYSPSC that would result in avoided revenue requirements of \$60 million (as to which, if not achieved despite the company's best efforts, the company may, after March 31, 2010, petition the NYSPSC for deferral of the costs related to up to \$30 million of revenue requirements);

continuation of the revenue decoupling mechanism (in 2009, the company increased revenues by \$122 million pursuant to this mechanism and the corresponding provision of the March 2008 rate order);

a decrease to \$120 million from \$150 million in the level of annual revenues that, for purposes of setting rates, it is assumed the company will receive and retain from the sale of transmission rights on the company's transmission system, with the difference between such actual revenues for the rate year and \$120 million to be recoverable from or refundable to customers, as the case may be (in 2009, the company accrued \$7 million of revenues under this provision and the corresponding provision of the March 2008 rate order);

reconciliation of the actual amount of pension and other postretirement benefit costs, environmental remediation expenses, property taxes and the cost of long-term debt to amounts reflected in rates (in 2009, the company deferred recognition of \$36.4 million of expenses under these provisions and the corresponding provisions of the March 2008 rate order);

if actual generation, transmission, distribution and shared service plant expenditures (other than removal costs) and capital costs incurred to relocate facilities to accommodate government projects are less than amounts reflected in rates for the respective category of expenditures, the company will accrue a regulatory liability and reduce its revenues by the revenue requirement impact of the difference (i.e., return on investment, depreciation and income taxes) (in 2009, the company did not reduce revenues under these provisions and the corresponding provisions of the March 2008 rate order);

collection of a surcharge (in addition to the electric rate increase) from customers in connection with an increase (estimated at \$198 million), effective April 2009, in a New York State assessment;

continuation of provisions for potential operations penalties of up to \$152 million annually if certain customer service and system reliability performance targets are not met (in 2009, the company did not reduce revenues under these provisions and the corresponding provisions of the March 2008 rate order);

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

continuation of the collection of a portion (increased, to reflect higher capital costs, from \$237 million collected in the rate year ended March 2009 to \$254 million for the rate year ending March 2010) of the April 2008 rate increase subject to potential refund to

105

Table of Contents

customers following the 2005-2008 Capital Expenditure Review (see discussion above in this Note B of the February 2010 Joint Proposal). The portion collected is also subject to refund in the event the NYSPSC determines that some disallowance of costs the company has recovered is warranted to address potential impacts of alleged unlawful conduct by arrested employees and contractors (see Other Regulatory Matters below in this Note B and Investigation of Contractor Payments in Note H).

continuation of the rate provisions pursuant to which the company recovers its purchased power and fuel costs from customers. In May 2009, the company filed with the NYSPSC the company's plan with respect to austerity measures that would reduce the company's revenue requirements during the rate year ending March 31, 2010 by \$60 million. The company's austerity plans include reductions in labor costs, including compensation and other employee benefits, deferral of expenditures for capital projects and operating and maintenance programs and other initiatives. These reductions collectively represent \$47 million of the \$60 million reduction sought by the NYSPSC. In May 2009, the company filed with the NYSPSC a request for rehearing of the NYSPSC's April 2009 order with respect to its austerity provisions and certain other matters. The February 2010 Joint Proposal (discussed above in Note B) provides for the company to withdraw this request.

In November 2009, CECONY, the NYSPSC staff and other parties entered into a Joint Proposal with respect to the company's May 2009 request to the NYSPSC for an increase in the rates the company can charge its customers for electric delivery service. The Joint Proposal, which is subject to NYSPSC approval, covers the three-year period April 2010 through March 2013 and provides for electric base rate increases of \$420 million, effective April 2010 and 2011, and \$287 million, effective April 2012, with an additional \$133 million to be collected through a surcharge in the rate year ending March 2013.

The Joint Proposal reflects the following major items:

A weighted average cost of capital of 7.76 percent, reflecting:

- return on common equity of 10.15 percent, assuming achievement by the company of unspecified austerity measures that would result in reductions in operations and maintenance expenses of \$27 million, \$20 million and \$13 million in the rate years ending March 2011, 2012 and 2013, respectively;
- cost of long-term debt of 5.65 percent;
- common equity ratio of 48 percent; and
- average rate base of \$14,887 million, \$15,987 million and \$16,826 million for the rate years ending March 2011, 2012 and 2013, respectively.

Deferral as a regulatory liability of the revenue requirement impact (i.e., return on investment, depreciation and income taxes) of the amount, if any, by which (A) actual average net plant balances allocable to the company's electric business for (i) transmission and distribution, excluding municipal infrastructure support (T&D), (ii) generation, shared services and, subject to certain adjustments, municipal infrastructure support (Other) and (iii) a finance and supply chain enterprise resource project (ERP) are less than (B) amounts reflected in rates for the respective category for each rate year. The amounts reflected in rates are:

Rate Year Ending March 31,

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

<i>(Millions of Dollars)</i>	2011	2012	2013
T&D	\$ 13,818	\$ 14,742	\$ 15,414
Other	1,487	1,565	1,650
ERP		25	115

- Any deferral for T&D and Other for the rate year ending March 2011 will be based on average net plant balances for the year and for the rate years ending March 2012 and 2013 will be based on average net plant balances over the term of the Joint Proposal.

- Any deferral for ERP would be based on average net plant balances for ERP over the term of the Joint Proposal.

106

Table of Contents

During the term of the Joint Proposal, the company will not accrue any additional revenue for carrying charges on any capital expenditures allocable to its electric business in excess of specified limits (which limits exclude certain expenditures, including expenditures for projects for which the company has been selected to receive grants under the American Recovery and Reinvestment Act of 2009):

- T&D capital expenditures \$1,200 million for the rate year ending March 2011 and an aggregate \$2,300 million for the period from April 2011 through March 2013;
- Other capital expenditures \$220 million for the rate year ending March 2011 and an aggregate \$402 million for the period from April 2011 through March 2013; and
- ERP capital expenditures \$125 million.

The company is not precluded from seeking to recover in rates effective after March 2013 the annual revenue requirement for T&D and Other capital expenditures made during the term of the Joint Proposal in excess of the applicable capital expenditure limit; provided that:

- the company can justify the need for and reasonableness of, and the company's inability to reasonably avoid, such excess capital expenditures; and
- the return on investment for any such excess T&D or Other capital expenditures made during the rate year ending March 2011 will be calculated based on the company's overall cost of debt.

Sharing with electric customers of any actual earnings, excluding the effects of any penalties and certain other items, above specified percentage returns on equity (based on actual average common equity ratio, subject to a 50 percent maximum) as follows:

- for the rate year ending March 2011, the company will allocate to customers the revenue requirement equivalent of 50 percent of earnings above 11.15 percent up to and including 12.149 percent, 75 percent of earnings equal to or in excess of 12.15 percent up to and including 13.149 percent and 90 percent of earnings equal to or in excess of 13.15 percent;
- for the rate years ending March 2012 and 2013, the company will allocate to customers the revenue requirement equivalent of 60 percent of the earnings, calculated on a cumulative basis for such years, in excess of 10.65 percent up to and including 12.149 percent, 75 percent of such cumulative earnings equal to or in excess of 12.15 percent up to and including 13.149 percent and 90 percent of such cumulative earnings equal to or in excess of 13.15 percent;
- the customer's share of any such earnings and 50 percent of the company's share would be applied to reduce regulatory assets for pensions and other post-retirement benefits and other costs; and
- in the event the company does not file for a rate increase to take effect in April 2013, the earnings sharing levels for the rate year ending March 2013 will continue in effect, calculated on an annual basis, until base rates are reset by the NYSPSC.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Deferral as a regulatory asset or liability, as the case may be, of differences between the actual level of certain expenses, including, among others, expenses for pension and other postretirement benefits, environmental remediation, relocation of facilities to accommodate government projects, property taxes and (for the rate years ending March 2012 and 2013) long-term debt, and amounts for those expenses reflected in rates (with deferral for the difference in property taxes limited to 80 percent of the difference, subject to annual maximum for the remaining 20 percent of the difference of not more than a 10 basis point impact on return on common equity and deferral of facility relocation expenses in excess amounts reflected in rates subject to certain limitations).

Continuation of the provisions in the April 2009 order relating to revenues from the sale of transmission rights on the company's transmission system;

Table of Contents

Continuation of the revenue decoupling mechanism under which the company's actual electric delivery revenues would be compared, on a periodic basis, with the delivery revenues reflected in rates, and the difference accrued as a regulatory liability (for refund to electric customers) or a regulatory asset (for recovery from electric customers), as the case may be.

Continuation of the rate provisions pursuant to which the company recovers its purchased power and fuel costs from electric customers.

Continuation of provisions for potential operations penalties of up to \$152 million annually if certain electric customer service and system reliability performance targets are not met.

Collection from electric customers of \$249 million on an annual basis subject to potential refund following the 2005-2008 Capital Expenditure Review (see discussion above in this Note B of the February 2010 Joint Proposal). The amount to be collected would also be subject to refund in the event the NYSPSC determined that some disallowance of costs the company has recovered is warranted to address potential impacts of alleged unlawful conduct by arrested employees and contractors (see Other Regulatory Matters below in this Note B and Investigation of Contractor Payments in Note H).

O&R Electric

In October 2007, the NYSPSC issued an order that continued O&R's rates for electric service rendered in New York at current levels. The order, which was based on an allowed annual rate of return on common equity of 9.1 percent increased, effective July 1, 2007, by \$13.1 million annually the amount recognized for pension and other postretirement benefit costs. Because O&R, in accordance with applicable New York regulatory provisions, defers the difference between the actual amount of such costs and the amounts for such costs reflected in rates, the effect of the increase was to decrease the company's deferrals of such costs and increase other operations and maintenance expense by a like amount. As required by the order, the company also reduced other operating revenues and recorded a regulatory liability of \$3 million for earnings attributable to its New York electric business in excess of a 9.1 percent annual rate of return on common equity applicable to the period March through June 2007. In June 2007, O&R commenced an action in New York State Supreme Court seeking to annul the March 2007 NYSPSC order that initiated the proceeding in which the October 2007 order was issued.

In July 2008, the NYSPSC approved a Joint Proposal among O&R, the NYSPSC staff and other parties for the rates O&R can charge its New York customers for electric service from July 2008 through June 2011. The rate plan approved by the NYSPSC provides for electric rate increases of \$15.6 million, \$15.6 million and \$5.7 million effective July 1, 2008, 2009 and 2010, respectively, and the collection of an additional \$9.9 million during the 12-month period beginning July 1, 2010.

The Joint Proposal reflected the following major items:

an annual return on common equity of 9.4 percent;

most of any actual earnings above a 10.2 percent return on equity (based on actual average common equity ratio, subject to a 50 percent maximum) are to be applied to reduce regulatory assets for pension and other post-retirement benefit expenses (the company did not reduce regulatory assets under this provision in 2009 or 2008);

deferral as a regulatory asset or regulatory liability, as the case may be, of the difference between actual pension and other post-retirement benefit expenses, environmental remediation expenses, property taxes, tax-exempt debt costs and certain other expenses and amounts for those expenses reflected in rates (the company deferred \$16 million and \$21 million of expenses under this provision in 2009 and 2008, respectively);

deferral as a regulatory liability of the revenue requirement impact (i.e., return on investment, depreciation and income taxes) of the amount, if any, by which actual transmission and distribution related

108

Table of Contents

capital expenditures are less than amounts reflected in rates (the company deferred \$8 million and \$1 million of expenses under this provision in 2009 and 2008, respectively);

deferral as a regulatory asset of increases, if any, in certain expenses above a 4 percent annual inflation rate, but only if the actual annual return on common equity is less than 9.4 percent (the company did not defer any expenses under this provision in 2009 or 2008);

potential negative earnings adjustments of up to \$3 million annually if certain customer service and system reliability performance targets are not met (the company reduced revenues by \$0.4 million under these provisions in 2008; the company met the performance targets in 2009);

implementation of a revenue decoupling mechanism under which actual energy delivery revenues would be compared, on a periodic basis, with the authorized delivery revenues with the difference accrued, with interest, for refund to, or recovery from, customers, as applicable (the company accrued \$6.6 million and \$3.3 million of revenues pursuant to this provision in 2009 and 2008, respectively);

continuation of the rate provisions pursuant to which the company recovers its purchased power costs from customers; and

withdrawal of the litigation O&R commenced seeking to annul the NYSPSC's March and October 2007 orders relating to O&R's electric rates. In March 2007, the New Jersey Board of Public Utilities (NJBP) approved a three-year electric base rate plan for Rockland Electric Company (RECO), O&R's New Jersey regulated utility subsidiary that went into effect on April 1, 2007. The plan provides for a \$6.4 million rate increase during the first year, with no further increase during the final two years. The plan reflects a return on common equity of 9.75 percent and a common equity ratio of 46.5 percent of capitalization.

In August 2009, RECO filed a request with the NJBP for a net increase in the rates it charges for electric service, effective May 15, 2010, of \$9.8 million. The filing reflects a return on common equity of 11.0 percent and a common equity ratio of 53.6 percent. The filing proposes the continuation of the current provisions with respect to recovery from customers of the cost of purchased power and proposes a reconciliation of actual expenses to amounts reflected in electric rates for pension and other postretirement benefit costs. In January 2010, RECO increased its requested rate increase to \$13.8 million, primarily to reflect lower estimated sales volumes.

CECONY Gas

In September 2004, the NYSPSC approved a Joint Proposal by CECONY, the staff of the NYSPSC and other parties with respect to the rates the company could charge its customers for gas and steam services. The approved gas rate plan covered the three-year period October 2004 through September 2007, and provided for an increase in gas base rates of \$46.8 million, effective October 1, 2004. The rate increase was net of a \$17.5 million pre-tax charge to gas operating revenues, which the company recognized in 2004, to resolve certain issues raised in the proceeding, relating primarily to the treatment of prior period pension credits. In addition to this rate increase, the company retained the first \$35 million of net revenues from non-firm customer transactions in each year of the plan. The rate increase also included the amortization of certain regulatory assets and liabilities. The net effect of this amortization was a non-cash increase in gas revenues of \$41 million over the period of the three-year rate plan.

Additional provisions of the gas rate plan included: equal sharing with customers of earnings above an 11.75 percent return on common equity (earnings for the rate years ended September 2005, 2006 and 2007 were below this level); reconciliation of pension and other post-employment benefit costs allocable to the gas business to the amounts for such costs reflected in rates, with the difference deferred as a regulatory asset or liability, as the case may be, for future recovery from or refund to customers; opportunities to retain for shareholders a percentage of annual gas net revenues from non-firm customer transactions (20 percent of revenues between \$35 million and \$50 million, 25

Table of Contents

percent between \$50 million and \$70 million and 10 percent over \$70 million), and to earn an incentive of up to \$8.5 million over the period of the rate plan depending upon the number of customers that migrate to retail access; continuation of provisions for the recovery from customers on a current basis of the cost of purchased gas and for the recovery of environmental remediation expenses; continuation of provisions pursuant to which the effects of weather on gas income are moderated; and continuation of the deferral as a regulatory asset or liability, subject to certain limitations, of differences between actual costs and amounts reflected in rates for property taxes and interference costs.

In September 2007, the NYSPSC approved the Joint Proposal that CECONY had entered into in June 2007 with the staff of the NYSPSC and other parties with respect to the rates the company can charge its customers for gas service. The Joint Proposal had provided for rate increases of \$84.6 million, \$32.7 million and \$42.7 million, effective October 1, 2007, 2008 and 2009, respectively, along with annual funding for new energy efficiency programs of \$14 million. The NYSPSC modified the Joint Proposal to provide for levelized annual rate increases of \$67.5 million in each year of the three year rate plan.

The Joint Proposal continues the previous gas rate plan provisions with respect to recovery from customers of the cost of purchased gas and environmental remediation expenses and corresponding provisions pursuant to which the effects of weather on gas income are moderated and for the reconciliation of actual expenses allocable to the gas business to the amounts for such costs reflected in gas rates for pension and other postretirement benefit costs, property taxes and interference costs. Additional provisions of the gas rate plan include: a revenue decoupling mechanism (pursuant to which the company accrued \$25 million, \$17 million and \$8 million of revenues in 2009, 2008 and 2007, respectively) and equal sharing with customers of earnings above a 10.7 percent return on common equity (earnings for the rate years ended September 30, 2009 and 2008 were reduced \$0 and \$9 million, respectively, for earnings above the 10.7 percent threshold).

In November 2009, CECONY filed a request with the NYSPSC for a three-year gas rate plan, with level annual rate increases effective October 2010, 2011 and 2012 of \$115.5 million per year. The filing reflects a return on common equity of 11.3 percent and a common equity ratio of 48.2 percent. In the alternative, the company requested a net increase in the rates it charges for gas service, effective October 2010, of \$160.8 million that would cover the period October 2010 through September 2011. The filing proposes continuation of the current gas rate plan's revenue decoupling mechanism and provisions with respect to recovery from customers of the cost of purchased gas and corresponding provisions for the reconciliation of actual expenses allocable to the gas business to the amounts for such expenses reflected in gas rates for pension and other postretirement benefit costs, environmental remediation expenses, property taxes and municipal infrastructure support.

O&R Gas

In October 2006, the NYSPSC approved the June 2006 settlement agreement among O&R, the staff of the NYSPSC and other parties. The settlement agreement established a rate plan that covered the three-year period November 1, 2006 through October 31, 2009. The rate plan provided for rate increases in base rates of \$12 million in the first year, \$0.7 million in the second year and \$1.1 million in the third year. To phase-in the effect of the increase for customers, the rate plan provided for O&R to accrue revenues for, but defer billing to customers of, \$5.5 million of the first rate year rate increase by establishing a regulatory asset which, together with interest, was billed to customers in the second and third years. As a result, O&R's billings to customers increased \$6.5 million in each of the first two years and \$6.3 million in the third. The first year rate increase included \$2.3 million relating to a change in the way customers are provided the benefit of non-firm revenue from sales of pipeline transportation capacity. Under the prior rate plan, base rates were reduced to reflect the assumption that the company would realize these revenues. Under the 2006 rate plan, such revenues were used to offset the cost of gas to be recovered from customers. The rate plan continued the provisions pursuant to which

Table of Contents

the company recovers its cost of purchasing gas and the provisions pursuant to which the effects of weather on gas income are moderated.

The rate plan provided that if the actual amount of pension or other postretirement benefit costs, environmental remediation costs, property taxes and certain other costs vary from the respective amount for each such cost reflected in gas rates (cost reconciliations), the company would defer recognition of the variation in income and, as the case may be, establish a regulatory asset or liability for recovery from, or refund to, customers of the variation (86 percent of the variation, in the case of property tax differences due to assessment changes).

Earnings attributable to its gas business excluding any revenue reductions (O&R Adjusted Earnings) in excess of an 11 percent annual return on common equity (based upon the actual average common equity ratio, subject to a maximum 50 percent of capitalization) were to be allocated as follows: above an 11 percent return were to be used to offset up to one-half of any regulatory asset to be recorded in that year resulting from the cost reconciliations (discussed in the preceding paragraph). One-half of any remaining O&R Adjusted Earnings between 11 and 12 percent return were to be retained by the company, with the balance deferred for the benefit of customers. Thirty-five percent of any remaining O&R Adjusted Earnings between a 12 and 14 percent return were to be retained by the company, with the balance deferred for the benefit of customers. Any remaining O&R Adjusted Earnings above a 14 percent return were to be deferred for the benefit of customers. For purposes of these earnings sharing provisions, if in any rate year O&R Adjusted Earnings was less than 11 percent, the shortfall was deducted from O&R Adjusted Earnings for the other rate years. The earnings sharing thresholds were to each be reduced by 20 basis points if certain objectives relating to the company's retail choice program are not met. O&R recorded regulatory liabilities of \$0, \$0 and \$1.3 million for earnings in excess of the 11 percent target return on equity for the rate years ended October 31, 2009, 2008 and 2007, respectively.

The rate plan also included up to \$1 million of potential earnings adjustments in the first year of the agreement, increasing up to \$1.2 million, if the company did not comply with certain requirements regarding gas main protection and customer service. O&R recorded regulatory liabilities of \$0.4 million and \$0.2 million for not complying with certain requirements regarding safety and customer service for the rate years ended October 31, 2008 and 2007, respectively. The company met these requirements for the rate year ended October 31, 2009.

In October 2009, the NYSPSC adopted a June 2009 Joint Proposal among O&R, NYSPSC staff and other parties. As approved, the Joint Proposal establishes a gas rate plan that covers the three-year period November 1, 2009 through October 31, 2012 and provides for increases in base rates of \$9 million in each of the first two years and \$4.6 million in the third year, with an additional \$4.3 million to be collected through a surcharge in the third rate year. The rate plan reflects the following major items:

an annual return on common equity of 10.4 percent;

most of any actual earnings above an 11.4 percent annual return on common equity (based upon the actual average common equity ratio, subject to a maximum 50 percent of capitalization) are to be applied to reduce regulatory assets;

deferral as a regulatory asset or liability, as the case may be, of differences between the actual level of certain expenses, including expenses for pension and other postretirement benefits, environmental remediation, property taxes and taxable and tax-exempt long-term debt, and amounts for those expenses reflected in rates;

deferral as a regulatory liability of the revenue requirement impact (i.e., return on investment, depreciation and income taxes) of the amount, if any, by which average gas net plant balances are less than balances reflected in rates;

deferral as a regulatory asset of increases, if any over the course of the rate plan, in certain expenses above

Table of Contents

a 4 percent annual inflation rate, but only if the actual annual return on common equity is less than 10.4 percent;

implementation of a revenue decoupling mechanism;

continuation of the provisions pursuant to which the company recovers its cost of purchasing gas and the provisions pursuant to which the effects of weather on gas income are moderated; and

potential negative earnings adjustments of up to \$1.4 million annually if certain operations and customer service requirements are not met.

CECONY Steam

In September 2006, the NYSPSC approved the June 2006 settlement agreement among CECONY, the staff of the NYSPSC and other parties. The settlement agreement established a rate plan that covered the two-year period October 1, 2006 through September 30, 2008. The rate plan provided for no changes in base rates or in the rate provisions pursuant to which the company recovers its fuel and purchased steam costs (the fuel adjustment clause), except for changes in the manner in which certain costs are recovered.

The rate plan provided that if the actual amount of pension or other postretirement benefit costs, environmental remediation costs, property taxes or interference costs is greater than the respective amount for each such cost reflected in steam rates, the company would recognize a regulatory asset for the difference (90 percent of the difference, in the case of property taxes and interference costs) and defer recognition in expense of the difference. If the actual amount of such costs had been less than the amount reflected in steam rates, the company would recognize a regulatory liability for the difference and decrease its revenues by the amount of such difference (90 percent of the difference, in the case of property taxes and interference costs). The company recognized a regulatory liability and increased expenses by \$1.7 million and \$1.9 million under this provision in 2008 and 2007, respectively.

Earnings attributable to the steam business, excluding the net revenue effect of steam sales related to colder-than-normal weather and certain other items, (Steam Adjusted Earnings) for a rate year in excess of 11 percent return on common equity (based upon the actual average common equity ratio, subject to a maximum of 50 percent of capitalization) were allocated as follows: between 11 and 12 percent were to be used first to offset up to one-half of any regulatory asset recorded in the year resulting from the cost reconciliations (discussed in the preceding paragraph) for the rate year. The company then could retain one-half of any remaining such Steam Adjusted Earnings, with the balance being deferred for the benefit of customers. Any Steam Adjusted Earnings in excess of a 12 percent return on common equity were to be used first to offset any regulatory asset resulting from the cost reconciliations, with the company retaining one-quarter of any remaining Steam Adjusted Earnings and the balance being deferred for the benefit of customers. The earnings sharing thresholds would each be reduced by 20 basis points if certain requirements are not met. Earnings for the rate years ended September 30, 2008 and 2007 were below the 11 percent return on common equity.

The rate plan also included up to approximately \$4 million of potential revenue reductions if the company did not comply with certain requirements regarding steam business development and certain other matters. There were no revenue reductions recorded for the rate years ending September 30, 2008 and 2007.

In September 2008, the NYSPSC approved the June 2008 Joint Proposal among the company, the NYSPSC staff and other parties with respect to the rates the company can charge its customers for steam service. The Joint Proposal covers the period from October 1, 2008 through September 30, 2010. The Joint Proposal provides for steam rate increases of \$43.7 million effective October 1, 2008 and 2009.

The Joint Proposal reflects the following major items:

an annual return on common equity of 9.3 percent;

any actual earnings above a 10.1 percent return on equity (based on actual average common equity ratio,

Table of Contents

subject to a 50 percent maximum) are to be shared as follows: half will be deferred for the benefit of customers and the other half is to be retained by the company (with half of the company's share subject to offset to reduce any regulatory assets for under-collections of property taxes) (earnings for the rate year ended September 30, 2009 did not exceed a 10.1 percent return on equity);

deferral as a regulatory asset or regulatory liability, as the case may be, of the difference between (i) actual costs for pension and other post-retirement benefits, environmental remediation, property taxes, certain tax-exempt debt, municipal infrastructure support and certain other costs and (ii) amounts for those costs reflected in rates (90 percent of the difference in the case of property taxes and interference costs) (the company decreased expenses by \$14.4 million and increased expenses by \$3.1 million under these provisions in 2009 and 2008, respectively);

deferral as a regulatory liability of the revenue requirement impact (i.e., return on investment, depreciation and income taxes) of the amount, if any, by which the actual capital expenditures related to steam production plant are less than amounts reflected in rates (there was no regulatory liability recorded for the rate year ended September 30, 2009);

potential negative earnings adjustments (revenue reductions) of approximately \$0.95 million to \$1 million annually if certain business development, customer service and safety performance targets are not met (the company did not record any such adjustments in 2008) (there were no negative earnings adjustments recorded for the rate year ended September 30, 2009);

amortization of certain regulatory assets and liabilities, the net effect of which will be a non-cash increase in steam revenues of \$20.3 million over the two-year period covered by the Joint Proposal; and

continuation of the rate provisions pursuant to which the company recovers its fuel and purchased steam costs from customers.

In November 2009, CECONY filed a request with the NYSPSC for a four-year steam rate plan, with level annual rate increases effective October 2010, 2011, 2012 and 2013 of \$66.1 million per year. The filing reflects a return on common equity of 11.4 percent and a common equity ratio of 48.2 percent. In the alternative, the company requested a net increase in the rates it charges for steam service, effective October 2010, of \$128.8 million that would cover the period October 2010 through September 2011. The filing proposes implementation of a revenue decoupling mechanism for steam and the continuation of the current steam rate plan's provisions with respect to recovery from customers of the cost of fuel and purchased steam and corresponding provisions for the reconciliation of actual expenses allocable to the steam business to the amounts for such expenses reflected in steam rates for pension and other postretirement benefit costs, environmental remediation expenses, property taxes and municipal infrastructure support.

Other Regulatory Matters

In February 2009, the NYSPSC commenced a proceeding to examine the prudence of certain CECONY expenditures (see "Investigation of Contractor Payments" in Note H). Pursuant to NYSPSC orders, a portion of the company's revenues (currently, \$254 million, \$32 million and \$6 million on an annual basis for electric, gas and steam service, respectively) is being collected subject to potential refund to customers. At December 31, 2009, the company had collected an estimated \$210 million from customers subject to potential refund in connection with this proceeding. The company is unable to estimate the amount, if any, of any such refund and, accordingly, has not established a regulatory liability for a refund.

In August 2009, the NYSPSC released a report on its management audit of the company. The NYSPSC is required to audit New York utilities every five years. The NYSPSC consultant that performed the audit identified areas for improvement, including with respect to the company's construction program, planning and business processes and regulatory relationships. In October 2009, the company filed with the NYSPSC the company's plan to implement the recommendations contained in the report.

Table of Contents**Regulatory Assets and Liabilities**

Regulatory assets and liabilities at December 31, 2009 and 2008 were comprised of the following items:

<i>(Millions of Dollars)</i>	Con Edison		CECONY	
	2009	2008	2009	2008
Regulatory assets				
Unrecognized pension and other postretirement costs	\$ 4,472	\$ 5,602	\$ 4,259	\$ 5,335
Future federal income tax	1,316	1,186	1,249	1,127
Environmental remediation costs	388	378	329	315
Surcharge for New York State Assessment	138		126	
Revenue taxes	119	101	116	99
Deferred derivative losses long-term	106	94	75	54
Pension and other postretirement benefits deferrals	101	92	49	38
Property tax reconciliation	85	46	85	46
Net electric deferrals	82	27	82	27
O&R transition bond charges	55	59		
World Trade Center restoration costs	41	140	41	140
Workers compensation	37	38	37	38
Gas rate plan deferral	21	30	21	30
Other retirement program costs	12	14	12	14
Asbestos-related costs	10	10	9	9
Unbilled gas revenue		44		44
Recoverable energy costs		42		42
Other	120	152	100	128
Regulatory assets	7,103	8,055	6,590	7,486
Deferred derivative losses current	141	288	104	247
Recoverable energy costs current	60	172		146
Total Regulatory Assets	\$ 7,304	\$ 8,515	\$ 6,694	\$ 7,879
Regulatory liabilities				
Allowance for cost of removal less salvage	\$ 371	\$ 378	\$ 303	\$ 313
Refundable energy costs	147	104	77	47
Net unbilled revenue deferrals	91		91	
2005-2008 capital expenditure reserve	24		24	
Gain on sale of First Avenue properties	23	30	23	30
Rate case amortizations	21	68	21	68
Electric rate case deferral	19		19	
Other	162	157	145	142
Regulatory liabilities	858	737	703	600
Deferred derivative gains current	8	23	8	23
Total Regulatory Liabilities	\$ 866	\$ 760	\$ 711	\$ 623

Unrecognized pension and other postretirement costs represents the net regulatory asset associated with the accounting rules for retirement benefits. See Note A.

World Trade Center restoration costs represents the non-capital costs (net of federal reimbursement and insurance recoveries) incurred by CECONY for emergency response to the September 11, 2001 attack on the World Trade Center, and for restoration of electric, gas and steam transmission and distribution facilities damaged in the attack. Non-capital costs include primarily the costs of moving facilities to avoid interfering with governmental projects (interference costs) and interest on capital and non-capital costs previously deferred. CECONY expects the NYSPSC to permit recovery from customers the prudently incurred costs relating to the World Trade Center attack (net of any federal reimbursement, insurance payments, litigation recoveries and tax savings). The company's current rate agreements provide for recovery from customers of \$25.8 million annually of these World Trade Center restoration costs.

Revenue taxes represents the timing difference between taxes collected and paid by the Utilities to fund mass transportation.

Table of Contents

Net electric deferrals represents the remaining unamortized balance of certain regulatory assets and liabilities of CECONY that were combined effective April 1, 2005 and are being amortized to income over a ten year period, in accordance with CECONY's April 2009 rate plan.

Effective March 31, 2009, the NYPSC authorized CECONY to accrue unbilled electric, gas and steam revenues. At December 31, 2009, CECONY has deferred the net margin on the unbilled revenues for the future benefit of customers by accruing an asset of \$413 million for unbilled revenues, recording refundable energy cost regulatory liabilities of \$187 million for the costs of fuel and purchased power related to services provided but not yet billed, and recording regulatory liabilities of \$91 million for the difference between the unbilled revenues and energy cost liabilities. Also, \$44 million of the regulatory asset established in 1989 for unbilled gas revenues has been offset against the unbilled revenue regulatory liability.

Note C Capitalization

Common Stock

At December 31, 2009 and 2008, Con Edison owned all of the issued and outstanding shares of common stock of the Utilities and the competitive energy businesses. CECONY owns 21,976,200 shares of Con Edison stock, which it purchased prior to 2001 in connection with Con Edison's stock repurchase plan. CECONY presents in the financial statements the cost of the Con Edison stock it owns as a reduction of common shareholder's equity.

Capitalization of Con Edison

The outstanding capitalization for each of the Companies is shown on its Consolidated Statement of Capitalization, and for Con Edison includes the Utilities' outstanding preferred stock and debt.

Preferred Stock of CECONY

As of December 31, 2009, 1,915,319 shares of CECONY's \$5 Cumulative Preferred Stock (the \$5 Preferred) and 375,626 shares of its Cumulative Preferred Stock (\$100 par value) were outstanding.

Dividends on the \$5 Preferred Stock are \$5 per share per annum, payable quarterly, and dividends on the Cumulative Preferred Stock are \$4.65 per share per annum, payable quarterly. The preferred dividends must be declared by CECONY's Board of Trustees to become payable. See Dividends below.

With respect to any corporate action to be taken by a vote of shareholders of CECONY, Con Edison (which owns all of the 235,488,094 shares of CECONY's common stock that are outstanding) and the holders of the \$5 Preferred are each entitled to one vote for each share held. Except as otherwise required by law, holders of the Cumulative Preferred Stock have no right to vote; provided, however, that if the \$5 Preferred is no longer outstanding, the holders of the Cumulative Preferred Stock are entitled to one vote for each share with respect to any corporate action to be taken by a vote of the shareholders of CECONY. In addition, if dividends are in arrears for certain periods, the holders are entitled to certain rights with respect to the election of CECONY's Trustees. Without the consent of the holders of the Cumulative Preferred Stock, CECONY may not create or authorize any kind of stock ranking prior to the Cumulative Preferred Stock or, if such actions would affect the holders of the Cumulative Preferred Stock adversely, be a party to any consolidation or merger, create or amend the terms of the Cumulative Preferred Stock or reclassify the Cumulative Preferred Stock. CECONY may redeem the \$5 Preferred at a redemption price of \$105 per share and the Cumulative Preferred Stock at a redemption price of \$101 per share (in each case, plus accrued and unpaid dividends). In the event of the dissolution, liquidation or winding up of the affairs of CECONY, before any distribution of capital assets could be made to the holders of the company's common stock, the holders of the \$5 Preferred and the Cumulative Preferred Stock would each be entitled to receive \$100 per share, in the case of an involuntary liquidation, or an amount equal to the redemption price per share, in the case of a voluntary liquidation, in each case together with all accrued and unpaid dividends.

Table of Contents

Dividends

In accordance with NYSPSC requirements, the dividends that the Utilities generally pay are limited to not more than 100 percent of their respective income available for dividends calculated on a two-year rolling average basis. Excluded from the calculation of income available for dividends are non-cash charges to income resulting from accounting changes or charges to income resulting from significant unanticipated events. The restriction also does not apply to dividends paid in order to transfer to Con Edison proceeds from major transactions, such as asset sales, or to dividends reducing each utility subsidiary's equity ratio to a level appropriate to its business risk.

In addition, no dividends may be paid, or funds set apart for payment, on CECONY's common stock until all dividends accrued on the \$5 Preferred Stock and Cumulative Preferred Stock have been paid, or declared and set apart for payment.

Long-term Debt

Long-term debt maturing in the period 2010-2014 is as follows:

<i>(Millions of Dollars)</i>	Con Edison	CECONY
2010	\$ 731	\$ 625
2011	5	
2012	305	300
2013	705	700
2014	536	475

The Utilities have issued \$324 million of tax-exempt debt through the New York State Energy Research and Development Authority (NYSERDA) that currently bear interest at a rate determined weekly and is subject to tender by bondholders for purchase by the Utilities. At December 31, 2008, \$16 million of the \$126 million of CECONY's Series 2005A weekly-rate, tax-exempt debt (Series 2005A Debt), \$49 million of the \$55 million of O&R's weekly-rate, tax-exempt debt insured by Financial Guaranty Insurance Company (Series 1994A Debt), and \$16 million of the \$44 million of O&R's weekly-rate, tax exempt debt insured by Ambac Assurance Company (Series 1995A Debt), had been tendered by bondholders. The tendered bonds were purchased with funds drawn under letters of credit maintained as liquidity facilities for the tax-exempt debt. O&R reimbursed the bank in 2008 for the funds used to purchase its tendered bonds, together with interest thereon. At December 31, 2008, CECONY's obligation to reimburse the bank for funds used to purchase the Series 2005A Debt that was tendered is included as long-term debt in the Companies' consolidated balance sheets. In January 2009, the tendered Series 2005A Debt was remarketed and the proceeds from the remarketing were used to reimburse the bank. The tendered Series 1995A Debt and tendered Series 1994A Debt were remarketed in April 2009 and June 2009, respectively. The proceeds from each remarketing were used to pay short-term borrowings that funded the purchased tendered bonds.

Long-term debt is stated at cost, which in total, as of December 31, 2009, approximates fair value (estimated based on year-end market valuations for the debt).

At December 31, 2009 and 2008, long-term debt of Con Edison included \$34 million and \$37 million, respectively, of Transition Bonds issued in 2004 by O&R's New Jersey utility subsidiary through a special purpose entity.

Significant Debt Covenants

The significant debt covenants under the financing arrangements for the notes of Con Edison and the debentures of CECONY are obligations to pay principal and interest when due, covenants not to consolidate with or merge into any other corporation unless certain conditions are met and, for Con Edison's notes, covenants that Con Edison shall continue its utility business in New York City and shall not permit Con Edison's ratio of consolidated debt to consolidated capital to exceed 0.675 to 1. Con Edison's notes are also subject to cross default provisions with respect to other indebtedness of Con Edison or its material subsidiaries having a then outstanding principal balance in excess of \$100 million. CECONY's debentures have no cross default provisions. The tax-exempt financing arrangements of the Utilities are subject to covenants for the CECONY debentures discussed above and the covenants discussed below. The Companies believe that they were in compliance with their significant debt covenants at December 31, 2009.

Table of Contents

The tax-exempt financing arrangements involved the issuance of uncollateralized promissory notes of the Utilities to NYSERDA in exchange for the net proceeds of a like amount of tax-exempt bonds with substantially the same terms sold to the public by NYSERDA. The tax-exempt financing arrangements include covenants with respect to the tax-exempt status of the financing, including covenants with respect to the use of the facilities financed. The arrangements include provisions for the maintenance of liquidity and credit facilities, the failure to comply with which would, except as otherwise provided, constitute an event of default with respect to the debt to which such provisions applied.

The failure to comply with debt covenants would, except as otherwise provided, constitute an event of default with respect to the debt to which such provisions applied. If an event of default were to occur, the principal and accrued interest on the debt to which such event of default applied and, in the case of the Con Edison notes, a make-whole premium might and, in the case of certain events of default would, become due and payable immediately.

The liquidity and credit facilities currently in effect for the tax-exempt financing include covenants that the ratio of debt to total capital of the obligated utility will not at any time exceed 0.65 to 1 and that, subject to certain exceptions, the utility will not mortgage, lien, pledge or otherwise encumber its assets. Certain of the facilities also include as events of default, defaults in payments of other debt obligations in excess of specified levels (\$100 million for CECONY).

Note D Short-Term Borrowing

In June 2006, Con Edison and the Utilities entered into an Amended and Restated Credit Agreement (Credit Agreement) under which banks are committed to provide loans and letters of credit, on a revolving credit basis. In June 2007, the Credit Agreement, which was to expire in June 2011, was extended for an additional year. Under the Credit Agreement, there is a maximum of \$2.25 billion (\$2.2 billion in the additional year) of credit available, with the full amount available to CECONY and \$1 billion available to Con Edison. The Credit Agreement supports the Companies' commercial paper programs. The Companies have not borrowed under the Credit Agreement.

At December 31, 2009, Con Edison and CECONY had no commercial paper outstanding. At December 31, 2008, Con Edison had \$363 million of commercial paper outstanding of which \$253 million was outstanding under CECONY's program. The weighted average interest rate was 2.4 percent and 3.2 percent for Con Edison and CECONY, respectively.

The banks' commitments under the Credit Agreement are subject to certain conditions, including that there be no event of default. The commitments are not subject to maintenance of credit rating levels or the absence of a material adverse change. Upon a change of control of, or upon an event of default by one of the Companies, the banks may terminate their commitments with respect to that company and declare any amounts owed by that company under the Credit Agreement immediately due and payable. Events of default include the exceeding at any time of a ratio of consolidated debt to consolidated total capital of 0.65 to 1 (at December 31, 2009, this ratio was 0.50 to 1 for both Con Edison and CECONY); having liens on its assets in an aggregate amount exceeding 5 percent of its consolidated total capital, subject to certain exceptions; and the failure by the company, following any applicable notice period, to meet certain other customary covenants. The fees charged for the revolving credit facilities and any loans made or letters of credit issued under the Credit Agreement reflect the Companies' respective credit ratings. At December 31, 2009 and 2008, \$193 million (including \$135 million for CECONY) and \$316 million (including \$107 million for CECONY) of letters of credit were outstanding under the Credit Agreement, respectively.

See Note S for information about short-term borrowing between related parties.

Note E Pension Benefits

Con Edison maintains a tax-qualified, non-contributory pension plan that covers substantially all employees of CECONY and O&R and certain

Table of Contents

employees of Con Edison's competitive energy businesses. The plan is designed to comply with the Internal Revenue Code and the Employee Retirement Income Security Act of 1974. In addition, Con Edison maintains additional non-qualified supplemental pension plans.

Net Periodic Benefit Cost

The components of the Companies' net periodic benefit costs for 2009, 2008 and 2007 were as follows:

<i>(Millions of Dollars)</i>	Con Edison			CECONY		
	2009	2008	2007	2009	2008	2007
Service cost including administrative expenses	\$ 159	\$ 139	\$ 131	\$ 149	\$ 129	\$ 122
Interest cost on projected benefit obligation	525	515	491	492	482	459

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

The increase in the value of pension plan assets was a primary driver in the decreased pension liability at Con Edison and CECONY of \$1,016 million and \$972 million, respectively, compared with December 31, 2008. For Con Edison, this decrease in pension liability resulted in a decrease to regulatory assets of \$992 million for unrecognized net losses and unrecognized prior service costs associated with the Utilities consistent with the accounting rules for regulated operations and a credit to OCI of \$20 million (net of

118

Table of Contents

taxes) for the unrecognized net losses and unrecognized prior service costs associated with the competitive energy businesses and O&R's New Jersey and Pennsylvania utility subsidiaries.

For CECONY, the decrease in pension liability resulted in a decrease to regulatory assets of \$960 million for unrecognized net losses and unrecognized prior service costs associated with the Utilities consistent with the accounting rules for regulated operations and a credit to OCI of \$14 million (net of taxes) for unrecognized net losses and unrecognized prior service costs associated with the competitive energy businesses.

A portion of the estimated net loss and prior service cost for the pension plan, equal to \$423 million and \$8 million, respectively, will be amortized from accumulated OCI and the regulatory asset into net periodic benefit cost over the next year for Con Edison. Included in these amounts are \$399 million and \$7 million, respectively, for CECONY.

At December 31, 2009 and 2008, Con Edison's investments include \$85 million and \$58 million, respectively, held in external trust accounts for benefit payments pursuant to the supplemental retirement plans. Included in these amounts for CECONY were \$75 million and \$49 million, respectively. See Note P. The accumulated benefit obligations for the supplemental retirement plans for Con Edison and CECONY were \$175 million and \$142 million as of December 31, 2009 and \$171 million and \$137 million as of December 31, 2008, respectively.

Assumptions

The actuarial assumptions were as follows:

	2009	2008	2007
Weighted-average assumptions used to determine benefit obligations at December 31:			
Discount rate	6.05%	5.75%	6.00%
Rate of compensation increase			
CECONY	4.00%	4.00%	4.00%
O&R	4.00%	4.00%	4.00%
Weighted-average assumptions used to determine net periodic benefit cost for the years ended December 31:			
Discount rate	5.75%	6.00%	6.00%
Expected return on plan assets	8.50%	8.50%	8.50%
Rate of compensation increase			
CECONY	4.00%	4.00%	4.00%
O&R	4.00%	4.00%	4.00%

The expected return assumption reflects anticipated returns on the plan's current and future assets. The Companies' expected return was based on an evaluation of the current environment, market and economic outlook, relationships between the economy and asset class performance patterns, and recent and long-term trends in asset class performance. The projections were based on the plan's target asset allocation and were adjusted for historical and expected experience of active portfolio management results compared to benchmark returns.

Discount Rate Assumption

To determine the assumed discount rate, the Companies use a model that produces a yield curve based on yields on selected highly rated (Aaa or Aa, by Moody's Investors Service) corporate bonds. Bonds with insufficient liquidity, bonds with questionable pricing information and bonds that are not representative of the overall market are excluded from consideration. For example, the bonds used in the model cannot be callable, they must have a price between 50 and 200, the yield must lie between 1 percent and 20 percent, and the amount of the issue must be in excess of \$100 million. The spot rates defined by the yield curve and the plan's projected benefit payments are used to develop a weighted average discount rate.

Table of Contents**Expected Benefit Payments**

Based on current assumptions, the Companies expect to make the following benefit payments over the next ten years:

<i>(Millions of Dollars)</i>	2010	2011	2012	2013	2014	2015-2019
Con Edison	\$ 486	\$ 509	\$ 532	\$ 555	\$ 576	\$ 3,142
CECONY	452	473	495	516	535	2,921

Expected Contributions

Based on estimates as of December 31, 2009, the Companies are not required under funding regulations and laws to make any contributions to the pension plan during 2010. The Companies' policy is to fund their accounting cost to the extent tax deductible, therefore, Con Edison and CECONY expect to make discretionary contributions of \$427 million and \$391 million, respectively, to the pension plan during 2010. The Companies are continuing to monitor changes to funding and tax laws that may impact future pension plan funding requirements.

Plan Assets

The asset allocations for the pension plan at the end of 2009, 2008 and 2007, and the target allocation for 2010 are as follows:

Asset Category	Target	Plan Assets at December 31		
	Allocation Range 2010	2009	2008	2007
Equity Securities	57% - 73%	67%	59%	65%
Debt Securities	21% - 33%	28%	33%	28%
Real Estate	5% - 11%	5%	8%	7%
Total	100%	100%	100%	100%

Con Edison has established a pension trust for the investment of assets to be used for the exclusive purpose of providing retirement benefits to participants and beneficiaries and payment of plan expenses.

Pursuant to resolutions adopted by Con Edison's Board of Directors, the Management Development and Compensation Committee of the Board of Directors (the Committee) has general oversight responsibility for Con Edison's pension and other employee benefit plans. The pension plan's named fiduciaries have been granted the authority to control and manage the operation and administration of the plans, including overall responsibility for the investment of assets in the trust and the power to appoint and terminate investment managers. The named fiduciaries consist of Con Edison's chief executive, financial and accounting officers.

The investment objectives of the Con Edison pension plan are to maintain a level and form of assets adequate to meet benefit obligations to participants, maximize the long-term total return on the trust assets within a prudent level of risk and maintain a level of volatility that is not expected to have a material impact on the Company's expected contribution and expense or the Company's ability to meet plan obligations. The assets of the plan have no significant concentration of risk in one country (other than the United States), industry or entity.

The strategic asset allocation is intended to meet the objectives of the pension plan by diversifying its funds across asset classes, investment styles and fund managers. An asset/liability study typically is conducted every few years to determine whether the current strategic asset allocation continues to represent the appropriate balance of expected risk and reward for the plan to meet expected liabilities. Each study considers the investment risk of the asset allocation and determines the optimal asset allocation for the plan. The target asset allocation for 2009 reflects the results of such a study conducted in 2007.

Individual fund managers operate under written guidelines provided by Con Edison, which cover such areas as investment objectives, performance measurement, permissible investments, investment restrictions, trading and execution, and communication and reporting requirements. Con Edison management regularly monitors, and the named fiduciaries review and report to the Committee regarding, manager performance, total fund performance, and compliance with asset allocation guidelines. Management changes fund managers and rebalances the portfolio as appropriate. At the direction of the named fiduciaries, such changes are reported to the Committee.

Table of Contents

In accordance with the accounting rules for pensions that became effective December 2009, the Company is providing the following disclosures regarding the fair value of the pension trust's investments.

Assets measured at fair value on a recurring basis are summarized below under a three-level hierarchy established by the accounting rules which define the levels within the hierarchy as follows:

Level 1 Consists of fair value measurements whose value is based on quoted prices in active markets for identical assets or liabilities.

Level 2 Consists of fair value measurements whose value is based on significant other observable inputs.

Level 3 Consists of fair value measurements whose value is based on significant unobservable inputs.

The fair values of the pension plan assets at December 31, 2009 by asset category are as follows:

<i>(Millions of Dollars)</i>	Level 1	Level 2	Level 3	Total
U.S. Equity(a)	\$ 3,470	\$	\$	\$ 3,470
International Equity(b)	1,140	196	1	1,337
U.S. Government Issues(c)		1,255		1,255
Corporate Bonds(d)		435	143	578
Structured Assets(e)			91	91
Other Fixed Income(f)		10	46	56
Swaps(g)			(3)	(3)
Real Estate(h)			344	344
Cash and Cash Equivalents(i)	197	141		338
Total investments	\$ 4,807	\$ 2,037	\$ 622	\$ 7,466
Funds for retiree health benefits(j)	(215)	(91)	(28)	(334)
Investments (excluding funds for retiree health benefits)	\$ 4,592	\$ 1,946	\$ 594	\$ 7,132
Pending activities(k)				(255)
Total fair value of plan net assets				\$ 6,877

- (a) U.S. Equity includes both actively- and passively-managed assets with investments in domestic equity index funds, actively-managed small-capitalization equities, rights and warrants.
- (b) International Equity includes international equity index funds, actively-managed international equities, rights and warrants.
- (c) U.S. Government Issues include agency and treasury securities.
- (d) Corporate Bonds held in institutional mutual funds which are measured at Net Asset Value (NAV) are classified as Level 3.
- (e) Structured Assets are measured using broker quotes and investment manager proprietary models and include commercial-mortgage-backed securities, collateralized mortgage obligations and asset-backed securities.
- (f) Other Fixed Income includes emerging market debt valued using broker quotes, municipal bonds, sovereign debt, regional governments and government agencies.
- (g) Swaps include total return swaps, interest rate swaps, credit default swaps and swap collateral. Level 3 Swaps are valued using proprietary investment manager models.
- (h) Real Estate investments include real estate funds based on appraised values that are broadly diversified by geography and property type.
- (i) Cash and Cash Equivalents include short term investments, money markets and foreign currency.
- (j) The Companies set aside funds for retiree health benefits through a separate account within the pension trust, as permitted under Section 401(h) of the Internal Revenue Code of 1986, as amended. In accordance with the Code, the plan's investments in the 401(h) account may not be used for, or diverted to, any purpose other than providing health benefits for retirees. The net assets held in the 401(h) account are calculated based on a pro-rata percentage allocation of the net assets in the pension plan. The related obligations for health benefits are not included in the pension plan's obligations and are included in the Companies' other postretirement benefit obligation. See Note F.
- (k) Pending activities include security purchases and sales that have not settled and interest and dividends that have not been received.

Table of Contents

The table below provides a reconciliation of the beginning and ending net balances for assets at December 31, 2009 classified as Level 3 in the fair value hierarchy.

<i>(Millions of Dollars)</i>	Beginning Balance as of January 1, 2009	Assets Still Held at Reporting Date	Assets Sold During the Period Realized Gains	Purchases Sales and Settlements	Ending Balance as of December 31, 2009
		Unrealized Gains (Losses)			
U.S. Equity	\$ 1	\$ 2	\$ (2)	\$ (1)	\$ 1
International Equity				1	1
Corporate Bonds	172	35	(7)	(57)	143
Structured Assets	194	93	(70)	(126)	91
Other Fixed Income	52	2	1	(9)	46
Swaps	(32)	13	(51)	67	(3)
Options	5	(4)	4	(5)	
Real Estate	515	(177)		6	344
Total investments	\$ 907	\$ (36)	\$ (125)	\$ (124)	\$ 622
Funds for retiree health benefits	(41)	2	6	5	(28)
Investments (excluding funds for retiree health benefits)	\$ 866	\$ (34)	\$ (119)	\$ (119)	\$ 594

The Companies also offer a defined contribution savings plan that covers substantially all employees and made contributions to the plan as follows:

<i>(Millions of Dollars)</i>	For the Years Ended December 31		
	2009	2008	2007
Con Edison	\$ 19	\$ 21	\$ 21
CECONY	17	19	19

Note F Other Postretirement Benefits

The Utilities currently have contributory comprehensive hospital, medical and prescription drug programs for all retirees, their dependents and surviving spouses.

CECONY also has a contributory life insurance program for bargaining unit employees and provides basic life insurance benefits up to a specified maximum at no cost to retired management employees. O&R has a non-contributory life insurance program for retirees. Certain employees of Con Edison's competitive energy businesses are eligible to receive benefits under these programs.

Net Periodic Benefit Cost

The components of the Companies' net periodic postretirement benefit costs for 2009, 2008 and 2007 were as follows:

Con Edison

CECONY

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Unrecognized net loss	646	799	500	601	728	450
Unrecognized prior service costs	(23)	(35)	(47)	(40)	(54)	(68)
Unrecognized net transition liability at January 1, 1993*	11	15	18	11	15	18

* Being amortized over a period of 20 years and reduced by an additional amount in 2002 due to plan amendments.

The increase in the value of other postretirement benefit plan assets was a primary driver in the decreased liability for other postretirement benefits at Con Edison and CECONY of \$134 million and \$109 million, respectively, compared with December 31, 2008. For Con Edison, this decrease in liability resulted in a decrease to regulatory assets of \$137 million for unrecognized net losses and unrecognized prior service costs associated with the Utilities consistent with the accounting rules for regulated operations and a credit to OCI of \$6 million (net of taxes) for the unrecognized net losses and unrecognized prior service costs associated with the competitive energy businesses and O&R's New Jersey and Pennsylvania utility subsidiaries.

For CECONY, the increase in the value of other postretirement benefit plan assets resulted in a decrease to regulatory assets of \$116 million for unrecognized net losses and unrecognized prior service costs associated with the company consistent with the accounting rules for regulated operations and a credit to OCI of \$2 million (net of taxes) for unrecognized net losses and unrecognized prior service costs associated with the competitive energy businesses.

A portion of the estimated net loss, prior service costs and transition obligation for the other postretirement benefits, equal to \$104 million, \$(12) million and \$3 million, respectively, will be amortized from accumulated OCI and the regulatory asset into net periodic benefit cost over the next year for Con Edison. Included in these amounts are \$95 million, \$(14) million and \$3 million, respectively, for CECONY.

Table of Contents

Assumptions

The actuarial assumptions were as follows:

	2009	2008	2007
Weighted-average assumptions used to determine benefit obligations at December 31:			
Discount Rate	5.95%	5.75%	6.00%
Weighted-average assumptions used to determine net periodic benefit cost for the years ended December 31:			
Discount Rate	5.75%	6.00%	6.00%
Expected Return on Plan Assets			
Tax-Exempt	8.50%	8.50%	8.50%
Taxable			
CECONY	7.50%	7.50%	7.50%
O&R	8.00%	8.00%	8.00%

Refer to Note E for descriptions of the basis for determining the expected return on assets, investment policies and strategies, and the assumed discount rate.

The health care cost trend rate used to determine net periodic benefit cost for the year ended December 31, 2009 was 7.0 percent, which is assumed to decrease gradually to 4.5 percent by 2012 and remain at that level thereafter. The health care cost trend rate used to determine benefit obligations as of December 31, 2009 was 6.5 percent, which is assumed to decrease gradually to 4.5 percent by 2014 and remain at that level thereafter.

A one-percentage point change in the assumed health care cost trend rate would have the following effects at December 31, 2009:

<i>(Millions of Dollars)</i>	Con Edison		1-Percentage-Point		CECONY	
	Increase	Decrease	Increase	Decrease	Increase	Decrease
Effect on accumulated other postretirement benefit obligation	\$ 15	\$	\$ (7)	\$	\$ (7)	\$ 19
Effect on service cost and interest cost components for 2009	1		(1)		(1)	2

Expected Benefit Payments

Based on current assumptions, the Companies expect to make the following benefit payments over the next ten years:

<i>(Millions of Dollars)</i>	2010	2011	2012	2013	2014	2015-2019
GROSS BENEFIT PAYMENTS						
Con Edison	\$ 120	\$ 126	\$ 129	\$ 133	\$ 135	\$ 698
CECONY	108	113	116	119	121	618
MEDICARE PRESCRIPTION BENEFIT RECEIPTS						
Con Edison	\$ 11	\$ 12	\$ 13	\$ 14	\$ 15	\$ 88
CECONY	10	11	12	12	13	79

Expected Contributions

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Based on estimates as of December 31, 2009, Con Edison and CECONY expect to make contributions of \$114 million and \$101 million, respectively, to the other postretirement benefit plans in 2010.

Plan Assets

The asset allocations for CECONY's other postretirement benefit plans at the end of 2009, 2008 and 2007, and the target allocation for 2010 are as follows:

Asset Category	Target Allocation Range	2009	Plan Assets at December 31	
	2010		2008	2007
Equity Securities	57% - 73%	66%	56%	65%
Debt Securities	26% - 44%	34%	44%	35%
Total	100%	100%	100%	100%

124

Table of Contents

Con Edison has established postretirement health and life insurance benefit plan trusts for the investment of assets to be used for the exclusive purpose of providing other postretirement benefits to participants and beneficiaries.

Refer to Note E for a discussion of Con Edison's investment policy for its benefit plans.

The fair values of the plan assets at December 31, 2009 by asset category (see description of levels in Note E) are as follows:

<i>(Millions of Dollars)</i>	Level 1	Level 2	Level 3	Total
U.S. Equity(a)	\$ 101	\$ 143	\$	\$ 244
International Equity(b)		92		92
Other Fixed Income(c)			173	173
Insurance Contracts(d)			8	8
Cash and Cash Equivalents(e)		9		9
Total investments	\$ 101	\$ 244	\$ 181	\$ 526
Funds for retiree health benefits(f)	215	91	28	334
Investments (including funds for retiree health benefits)	\$ 316	\$ 335	\$ 209	\$ 860
Pending activities(g)				6
Total fair value of plan net assets				\$ 866

- (a) U.S. Equity includes both actively- and passively-managed assets with investments in domestic equity index funds and commingled funds.
- (b) International Equity includes commingled international equity funds.
- (c) Other Fixed Income includes commingled funds, which are valued at Net Asset Value (NAV).
- (d) Insurance Contracts represent the cash surrender value of life insurance policies. The contracts are measured at NAV, adjusted for fees charged by the insurance company.
- (e) Cash and Cash Equivalents include short term investments and money markets.
- (f) The Companies set aside funds for retiree health benefits through a separate account within the pension trust, as permitted under Section 401(h) of the Internal Revenue Code of 1986, as amended. In accordance with the Code, the plan's investments in the 401(h) account may not be used for, or diverted to, any purpose other than providing health benefits for retirees. The net assets held in the 401(h) account are calculated based on a pro-rata percentage allocation of the net assets in the pension plan. The related obligations for health benefits are not included in the pension plan's obligations and are included in the Companies' other postretirement benefit obligation. See Note E. in
- (g) Pending activities include security purchases and sales that have not settled and interest and dividends that have not been received.

The table below provides a reconciliation of the beginning and ending net balances for assets at December 31, 2009 classified as Level 3 in the fair value hierarchy.

<i>(Millions of Dollars)</i>	Beginning Balance as of January 1, 2009	Assets Still Held at Reporting Date Unrealized Gains (Losses)	Assets Sold During the Period Realized Gains	Purchases Sales and Settlements	Ending Balance as of December 31, 2009
Other Fixed Income	\$ 197	\$ 11	\$ 3	\$ (38)	\$ 173
Insurance Contracts	8				8
Total investments	\$ 205	\$ 11	\$ 3	\$ (38)	\$ 181
Funds for retiree health benefits	41	(2)	(6)	(5)	28
Investments (including funds for retiree health benefits)	\$ 246	\$ 9	\$ (3)	\$ (43)	\$ 209

Effect of Medicare Prescription Benefit

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

The Medicare Prescription Drug, Improvement and Modernization Act of 2003 created a benefit for certain employers who provide postretirement drug programs. The accounting rules for retirement benefits provide accounting and disclosure requirements relating to the Act. The Companies' actuaries have determined that each of their prescription drug plans provides a benefit that is at least actuarially equivalent to the Medicare prescription drug plan and projections indicate that this will be the case for 20 years; therefore, the Companies are eligible to receive the benefit that the Act makes available. When the plans' benefits are no longer actuarially equivalent to the Medicare plan, 25 percent of the retirees in each plan are assumed to begin to decline participation in the Companies' prescription programs.

125

Table of Contents**Note G Environmental Matters****Superfund Sites**

Hazardous substances, such as asbestos, polychlorinated biphenyls (PCBs) and coal tar, have been used or generated in the course of operations of the Utilities and their predecessors and are present at sites and in facilities and equipment they currently or previously owned, including sites at which gas was manufactured or stored.

The Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 and similar state statutes (Superfund) impose joint and several liability, regardless of fault, upon generators of hazardous substances for investigation and remediation costs (which include costs of demolition, removal, disposal, storage, replacement, containment, and monitoring) and natural resource damages. Liability under these laws can be material and may be imposed for contamination from past acts, even though such past acts may have been lawful at the time they occurred. The sites at which the Utilities have been asserted to have liability under these laws, including their manufactured gas plant sites and any neighboring areas to which contamination may have migrated, are referred to herein as Superfund Sites.

For Superfund Sites where there are other potentially responsible parties and the Utilities are not managing the site investigation and remediation, the accrued liability represents an estimate of the amount the Utilities will need to pay to discharge their related obligations. For Superfund Sites (including the manufactured gas plant sites) for which one of the Utilities is managing the investigation and remediation, the accrued liability represents an estimate of the company's share of undiscounted cost to investigate the sites and, for sites that have been investigated in whole or in part, the cost to remediate the sites, if remediation is necessary and if a reasonable estimate of such cost can be made. Remediation costs are estimated in light of the information available, applicable remediation standards, and experience with similar sites.

The accrued liabilities and regulatory assets related to Superfund Sites at December 31, 2009 and 2008 were as follows:

<i>(Millions of Dollars)</i>	Con Edison		CECONY	
	2009	2008	2009	2008
Accrued Liabilities:				
Manufactured gas plant sites	\$ 164	\$ 207	\$ 112	\$ 155
Other Superfund Sites	48	43	47	41
Total	\$ 212	\$ 250	\$ 159	\$ 196
Regulatory assets	\$ 388	\$ 378	\$ 329	\$ 315

Most of the accrued Superfund Site liability relates to sites that have been investigated, in whole or in part. However, for many of the sites, the extent and associated cost of the required remediation has not yet been determined. As investigations progress and information pertaining to the required remediation becomes available, the Utilities expect that additional liability will be accrued, the amount of which is not presently determinable but may be material. Under their current rate agreements, the Utilities are permitted to recover or defer as regulatory assets (for subsequent recovery through rates) certain site investigation and remediation costs.

Environmental remediation costs incurred and insurance recoveries received related to Superfund Sites at December 31, 2009 and 2008, were as follows:

<i>(Millions of Dollars)</i>	Con Edison		CECONY	
	2009	2008	2009	2008
Remediation costs incurred	\$ 77	\$ 103	\$ 75	\$ 100
Insurance recoveries received*	4		4	

* Reduced amount deferred for recovery from customers

In 2006, CECONY estimated that for its manufactured gas plant sites, its aggregate undiscounted potential liability for the investigation and remediation of coal tar and/or other manufactured gas plant-related environmental contaminants could range up to \$1.1 billion. In 2007, O&R estimated that for its manufactured gas plant sites, each of which has been investigated, the aggregate undiscounted potential liability for the

remediation of such contaminants could range up to \$115 million. These estimates were based on the assumption that there is contamination at the

126

Table of Contents

sites that have not yet been investigated and additional assumptions about these and the other sites regarding the extent of contamination and the type and extent of remediation that may be required. Actual experience may be materially different.

Asbestos Proceedings

Suits have been brought in New York State and federal courts against the Utilities and many other defendants, wherein a large number of plaintiffs sought large amounts of compensatory and punitive damages for deaths and injuries allegedly caused by exposure to asbestos at various premises of the Utilities. The suits that have been resolved, which are many, have been resolved without any payment by the Utilities, or for amounts that were not, in the aggregate, material to them. The amounts specified in all the remaining thousands of suits total billions of dollars; however, the Utilities believe that these amounts are greatly exaggerated, based on the disposition of previous claims. In 2008, CECONY estimated that its aggregate undiscounted potential liability for these suits and additional suits that may be brought over the next 15 years is \$9 million. The estimate was based upon a combination of modeling, historical data analysis and risk factor assessment. Actual experience may be materially different. In addition, certain current and former employees have claimed or are claiming workers' compensation benefits based on alleged disability from exposure to asbestos. Under its current rate agreements, CECONY is permitted to defer as regulatory assets (for subsequent recovery through rates) costs incurred for its asbestos lawsuits and workers' compensation claims. The accrued liability for asbestos suits and workers' compensation proceedings (including those related to asbestos exposure) and the amounts deferred as regulatory assets for the Companies at December 31, 2009 and 2008 were as follows:

<i>(Millions of Dollars)</i>	Con Edison		CECONY	
	2009	2008	2009	2008
Accrued liability - asbestos suits	\$ 10	\$ 10	\$ 9	\$ 9
Regulatory assets - asbestos suits	\$ 10	\$ 10	\$ 9	\$ 9
Accrued liability - workers' compensation	\$ 113	\$ 114	\$ 108	\$ 109
Regulatory assets - workers' compensation	\$ 37	\$ 38	\$ 37	\$ 38

Note H Other Material Contingencies**Manhattan Steam Main Rupture**

In July 2007, a CECONY steam main located in midtown Manhattan ruptured. It has been reported that one person died and others were injured as a result of the incident. Several buildings in the area were damaged. Debris from the incident included dirt and mud containing asbestos. The response to the incident required the closing of several buildings and streets for various periods. Approximately 100 suits are pending against the company seeking generally unspecified compensatory and, in some cases, punitive damages, for personal injury, property damage and business interruption. The company has not accrued a liability for the suits. The company has notified its insurers of the incident and believes that the policies in force at the time of the incident will cover most of the company's costs, which the company is unable to estimate, but which could be substantial, to satisfy its liability to others in connection with the incident.

Investigation of Contractor Payments

In January 2009, CECONY commenced an internal investigation relating to the arrests of certain employees and retired employees (most of whom have since been indicted or pleaded guilty) for accepting kickbacks from contractors that performed construction work for the company. The company has retained a law firm, which has retained an accounting firm, to assist in the company's investigation. The company is providing information to governmental authorities, which consider the company to be a victim of unlawful conduct, in connection with their investigation of the arrested employees and contractors. The company has terminated its employment of the arrested employees and its contracts with the contractors. In February 2009, the NYSPSC commenced a proceeding that, among other things, will examine the prudence of certain of the company's expenditures relating to the arrests and consider whether additional expenditures should also be examined (see Other Regulatory Matters in Note B). The company, based upon its evaluation of its internal controls for 2009 and previous years, believes that the controls were effective to provide reasonable assurance that its financial statements have been fairly presented, in all material

Table of Contents

respects, in conformity with generally accepted accounting principles. Because the company's investigation is ongoing, the company is unable to predict the impact of any of the employees' unlawful conduct on the company's internal controls, business, results of operations or financial position.

Permit Non-Compliance and Pollution Discharges

In March 2009, the New York State Department of Environmental Conservation (DEC) issued a proposed administrative Order on Consent to CECONY with respect to non-compliance with certain laws, regulations and permit conditions and discharges of pollutants at the company's steam generating facilities. The proposed order effectively institutes a civil enforcement proceeding against the company. In the proposed order, the DEC is seeking, among other things, the company's agreement to pay a penalty in an amount the DEC has not yet specified, retain an independent consultant to conduct a comprehensive audit of the company's generating facilities to determine compliance with federal and New York State environmental laws and regulations and recommend best practices, remove all equipment containing polychlorinated biphenyls from the company's steam and electric facilities, remediate polychlorinated biphenyl contamination, install certain wastewater treatment facilities, and comply with additional sampling, monitoring, and training requirements.

In January 2010, the DEC issued a proposed administrative Order on Consent to CECONY relating to discharges of pollutants, reported by the company to the DEC from 2002 through 2009, into the storm sewer system at a property the company owns in the Astoria section of New York on which the company is permitted by the DEC to operate a hazardous waste storage facility. In the proposed order, the DEC is seeking the company's agreement to pay a \$1.2 million penalty and undertake a corrective action plan. In February 2010, the company agreed to undertake the corrective action plan for the Astoria discharges and the DEC indicated that a coordinated process and schedule will apply to negotiations of the penalties to be paid by the company in connection with the Astoria and steam generating facilities proceedings.

Also in January 2010, the DEC staff indicated that the DEC intends to issue a proposed consent order relating to the release of oil into the Bronx River resulting from a November 2009 transformer fire at the company's Dunwoodie electric substation.

The company will seek to resolve these matters through negotiations with the DEC. It is unable to predict the impact of these matters on the company's operations or the amount of penalties and the additional costs, which could be substantial, to comply with the requirements resulting from these matters.

Other Contingencies

See Lease In/Lease Out Transactions in Note J.

Guarantees

Con Edison and its subsidiaries enter into various agreements providing financial or performance assurance primarily to third parties on behalf of their subsidiaries. Maximum amounts guaranteed by Con Edison totaled \$929 million and \$1,612 million at December 31, 2009 and 2008, respectively.

A summary, by type and term, of Con Edison's total guarantees at December 31, 2009 is as follows:

Guarantee Type	0 - 3 years	4 - 10 years	> 10 years	Total
	<i>(Millions of Dollars)</i>			
Commodity transactions	\$ 657	\$ 26	\$ 105	\$ 788
Affordable housing program	6			6
Intra-company guarantees	29		1	30
Other guarantees	79	26		105
TOTAL	\$ 771	\$ 52	\$ 106	\$ 929

Commodity Transactions Con Edison guarantees payments on behalf of its competitive energy businesses in order to facilitate physical and financial transactions in gas, pipeline capacity, transportation, oil, electricity and related commodity services. To the extent that liabilities exist

under the contracts subject to these guarantees, such liabilities are included in Con Edison's consolidated balance sheet.

Affordable Housing Program Con Edison Development guarantees the repurchase and remarketing obligations of one of its subsidiaries for debt relating to moderate-income rental apartment

128

Table of Contents

properties eligible for tax credits under Section 42 of the Internal Revenue Code. In accordance with applicable accounting rules, neither the rental apartment properties nor the related indebtedness is included on Con Edison's consolidated balance sheet.

Intra-company Guarantees Con Edison guarantees electricity sales made by Con Edison Energy and Con Edison Solutions to O&R and CECONY.

Other Guarantees Con Edison, Con Edison Development and its subsidiaries also guarantee the following:

\$27 million relates to guarantees issued by Con Edison covering RCN Corporation's lease payment to use CECONY's conduit system in accordance with a tariff approved by the NYSPSC and rent payment obligations under various lease agreements for office buildings. RCN Corporation is obligated to reimburse Con Edison for any payments made under these guarantees. In the case of the guarantee to CECONY, this obligation is partially secured by a letter of credit of \$16 million, and, in the case of the lease guarantees, this reimbursement is fully secured by letters of credit;

\$40 million for guarantees provided by Con Edison and Con Edison Solutions for indemnity agreements for surety bonds;

\$38 million for collateral posted with wholesale counterparties; and

In connection with the sale in 2008 by Con Edison Development and its subsidiary of their ownership interests in their electricity generating plants, Con Edison also issued guarantees, which have no specified limitation on the amount guaranteed, covering certain representations and the obligations of Con Edison Development and its subsidiary to pay taxes relating to periods before the sale. See Note U.

Note I Electricity Purchase Agreements

CECONY has long-term electricity purchase agreements with non-utility generators and others for generating capacity. The company recovers its purchased power costs in accordance with provisions approved by the NYSPSC. See Recoverable Energy Costs in Note A.

At December 31, 2009, the significant terms of the electricity purchase agreements were as follows:

Facility	Equity Owner	Plant Output (MW)	Contracted	Contract	Contract Term (Years)
			Output (MW)	Start Date	
Indian Point	Entergy Nuclear Power Marketing, LLC	1,299	1,000*	August 2001	11
Independence	Sithe/Independence Power Partners, LP	1,254	680	November 1994	20
Linden Cogeneration	Cogen Technologies Linden Venture, LP	1,035	612	May 1992	25
Astoria Energy	Astoria Energy, LLC	640	500	May 2006	10
Selkirk	Selkirk Cogen Partners, LP	358	265	September 1994	20
Brooklyn Navy Yard	Brooklyn Navy Yard Cogeneration Partners, LP	322	281	November 1996	40
Indeck Corinth	Indeck Energy Services of Corinth, Inc.	147	131	July 1995	20

* Contracted output will decrease to 850 MW in 2010 and 350 MW in 2011 and 2012.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Assuming performance by the parties to the electricity purchase agreements, CECONY is obligated over the terms of the agreements to make capacity and other fixed payments.

For the years 2010 through 2014, the capacity and other fixed payments under the contracts are estimated to be as follows:

<i>(Millions of Dollars)</i>	2010	2011	2012	2013	2014
CECONY	\$ 489	\$ 480	\$ 479	\$ 476	\$ 416

129

Table of Contents

For energy delivered under most of the electricity purchase agreements, CECONY is obligated to pay variable prices. The company's payments under the agreements for capacity, energy and other fixed payments in 2009, 2008 and 2007 were as follows:

<i>(Millions of Dollars)</i>	For the Years Ended December 31,		
	2009	2008	2007
Indian Point	\$ 620	\$ 561	\$ 468
Linden Cogeneration	395	629	525
Selkirk	175	236	193
Astoria Energy	192	248	281
Brooklyn Navy Yard	124	154	142
Independence	122	101	105
Indeck Corinth	68	120	87
Wheelabrator	10	35	29
Total	\$ 1,706	\$ 2,084	\$ 1,830

Note J Leases

Con Edison's subsidiaries lease electric generating and gas distribution facilities, other electric transmission and distribution facilities, office buildings and equipment. In accordance with the accounting rules for leases, these leases are classified as either capital leases, operating leases or leveraged leases. Most of the operating leases provide the option to renew at the fair rental value for future periods. Generally, it is expected that leases will be renewed or replaced in the normal course of business.

Capital leases: For ratemaking purposes capital leases are treated as operating leases; therefore, in accordance with the accounting rules for regulated operations, the amortization of the leased asset is based on the rental payments recovered from customers. The following assets under capital leases are included in the Companies' consolidated balance sheets at December 31, 2009 and 2008:

<i>(Millions of Dollars)</i>	Con Edison		CECONY	
	2009	2008	2009	2008
UTILITY PLANT				
Transmission	\$ 3	\$ 5	\$ 3	\$ 5
Common	16	17	16	17
TOTAL	\$ 19	\$ 22	\$ 19	\$ 22

The accumulated amortization of the capital leases for Con Edison and CECONY was \$53 million each at December 31, 2009, and \$48 million each at December 31, 2008.

The future minimum lease commitments for the above assets are as follows:

<i>(Millions of Dollars)</i>	Con Edison	CECONY
2010	\$ 8	\$ 8
2011	8	8
2012	6	6
2013		
2014		
All years thereafter	2	2
Total	24	24
Less: amount representing interest	5	5
Present value of net minimum lease payment	\$ 19	\$ 19

CECONY subleases one of its capital leases. The minimum rental to be received in the future under the non-cancelable sublease is \$14 million.

Operating leases: The future minimum lease commitments under the Companies' non-cancelable operating lease agreements are as follows:

<i>(Millions of Dollars)</i>	Con Edison	CECONY
2010	\$ 42	\$ 41
2011	44	42
2012	45	42
2013	45	43
2014	38	37
All years thereafter	35	26
Total	\$ 249	\$ 231

Lease In/Lease Out Transactions

In each of 1997 and 1999, Con Edison Development entered into a transaction in which it leased property and then immediately subleased it back to the lessor (termed Lease In/Lease Out, or LILO transactions). The transactions respectively involve electric generating and gas distribution facilities in the Netherlands, with a total investment of \$259 million. The transactions were financed with \$93 million of equity and \$166 million of non-recourse, long-term debt secured by the underlying assets. In accordance with the accounting rules for leases, Con Edison is accounting for the two LILO transactions as leveraged leases. Accordingly, the company's investment in these leases, net of non-recourse debt, is carried as a single amount in Con Edison's consolidated balance sheet and income is recognized pursuant to a method that incorporates a level rate of return for those years when

Table of Contents

net investment in the lease is positive, based upon the after-tax cash flows projected at the inception of the leveraged leases. The company's investment in these leveraged leases was \$(24) million at December 31, 2009 and \$(8) million at December 31, 2008 and is comprised of a \$235 million gross investment less \$259 million of deferred tax liabilities at December 31, 2009 and \$235 million gross investment less \$243 million of deferred tax liabilities at December 31, 2008.

On audit of Con Edison's tax return for 1997, the IRS disallowed the tax losses in connection with the 1997 LILLO transaction. In December 2005, Con Edison paid a \$0.3 million income tax deficiency asserted by the IRS for the tax year 1997 with respect to the 1997 LILLO transaction. In April 2006, the company paid interest of \$0.2 million associated with the deficiency and commenced an action in the United States Court of Federal Claims, entitled Consolidated Edison Company of New York, Inc. v. United States, to obtain a refund of this tax payment and interest. A trial was completed in November 2007. In October 2009, the court issued a decision in favor of the company concluding that the 1997 LILLO transaction was, in substance, a true lease that possessed economic substance, the loans relating to the lease constituted bona fide indebtedness, and the deductions for the 1997 LILLO transactions claimed by the company in its 1997 federal income tax return are allowable. The IRS is entitled to appeal the decision but has not indicated whether or not it will.

In connection with its audit of Con Edison's federal income tax returns for 1998 through 2007, the IRS disallowed \$416 million of net tax deductions taken with respect to both of the LILLO transactions for the tax years. Con Edison is pursuing administrative appeals of these audit level disallowances. In connection with its audit of Con Edison's federal income tax return for 2008, the IRS has disallowed \$42 million of net tax deductions taken with respect to both of the LILLO transactions. When this audit level disallowance becomes appealable, Con Edison intends to file an appeal of the disallowance.

Con Edison believes that its LILLO transactions have been correctly reported, and has not recorded any reserve with respect to the disallowance of tax losses, or related interest, in connection with its LILLO transactions. Con Edison's estimated tax savings, reflected in its financial statements, from the two LILLO transactions through December 31, 2009, in the aggregate, was \$205 million. If Con Edison were required to repay all or a portion of these amounts, it would also be required to pay interest of up to \$62 million net of tax at December 31, 2009.

Pursuant to the accounting rules for leveraged lease transactions, the expected timing of income tax cash flows generated by Con Edison's LILLO transactions are required to be reviewed at least annually. If the expected timing of the cash flows is revised, the rate of return and the allocation of income would be recalculated from the inception of the LILLO transactions, and the company would be required to recalculate the accounting effect of the LILLO transactions, which would result in a charge to earnings that could have a material adverse effect on the company's results of operations.

Note K Goodwill

In 2009 and 2008, Con Edison completed impairment tests for its goodwill of \$406 million related to the O&R merger, and determined that it was not impaired. For the impairment test, \$245 million and \$161 million of the goodwill were allocated to CECONY and O&R, respectively. In 2009 and 2008, Con Edison completed impairment tests for the goodwill of \$10 million and \$5 million, respectively, related to two energy services companies acquired by Con Edison Solutions, and determined that it was not impaired.

TOTAL	\$ 440	\$ 524	\$ 437	\$ 404	\$ 397	\$ 392

The tax effect of temporary differences, which gave rise to deferred tax assets and liabilities, is as follows:

<i>(Millions of Dollars)</i>	Con Edison		CECONY	
	2009	2008	2009	2008
Deferred tax liabilities:				
Depreciation	\$ 2,569	\$ 2,363	\$ 2,426	\$ 2,230
Regulatory liability future income tax	1,489	1,374	1,404	1,296
Unrecognized pension and other postretirement costs	1,814	2,284	1,727	2,172
State income tax	645	557	563	482
Capitalized overheads	477	479	419	437
Other	646	539	434	330
Total deferred tax liabilities	7,640	7,596	6,973	6,947
Deferred tax assets:				
Unrecognized pension and other postretirement costs	1,814	2,284	1,727	2,172
Regulatory asset future income tax	172	185	155	168
State income tax	27	49	14	16
Other	96	151	1	49
Total deferred tax assets	2,109	2,669	1,897	2,405
NET LIABILITIES	5,531	4,927	5,076	4,542
INVESTMENT TAX CREDITS	66	72	63	69
DEFERRED INCOME TAXES AND INVESTMENT TAX CREDITS	\$ 5,597	\$ 4,999	\$ 5,139	\$ 4,611
DEFERRED INCOME TAXES RECOVERABLE ENERGY COSTS	24	70		59
TOTAL DEFERRED INCOME TAXES AND INVESTMENT TAX CREDITS	\$ 5,621	\$ 5,069	\$ 5,139	\$ 4,670

CECONY's 2009 deferred taxes for recoverable energy costs reflects the impact of the company's adoption of unbilled revenue accounting in March 2009 which nets refundable energy costs against recoverable energy costs. See Recoverable Energy Costs in Note A.

Table of Contents

Reconciliation of the difference between income tax expense and the amount computed by applying the prevailing statutory income tax rate to income before income taxes is as follows:

(% of Pre-tax income)	2009	Con Edison 2008	2007	2009	CECONY 2008	2007
STATUTORY TAX RATE						
Federal	35%	35%	35%	35%	35%	35%
Changes in computed taxes resulting from:						
State income tax	5	6	5	6	5	4
Depreciation related differences	1	1	1	1	1	1
Cost of removal	(5)	(5)	(6)	(6)	(6)	(6)
Other	(3)	(1)	(3)	(2)	(2)	(3)
Effective Tax Rate	33%	36%	32%	34%	33%	31%

For federal income tax purposes in 2009, the Companies have a net operating loss, primarily as a result of deductions for accelerated depreciation. The Companies intend to file a request for a refund using this net operating loss to offset prior years' federal taxable income. At December 31, 2009, the refund receivable was classified as an other current asset of \$107 million on the Companies' consolidated balance sheet.

Uncertain Tax Positions

Under the accounting rules for income taxes, an enterprise is not allowed to recognize, in its financial statements, the benefit of a tax position unless that position is more likely than not to be sustained upon examination by taxing authorities, including resolution of any related appeals and litigation processes, based solely on the technical merits of the position.

The IRS has essentially completed its field audits of the Companies' federal income tax returns through 2008. The Companies' federal income tax returns for 1998 through 2008, which remain open to examination by the IRS, reflect certain tax positions with which the IRS does not or may not agree. Any adjustments to federal income tax returns will result in the Companies filing the federal audit changes with New York State to incorporate in the applicable state income tax returns. In addition, the Companies' New York State tax returns for years beginning with 2006 remain open to examination by New York State.

The Companies' uncertain tax positions include the simplified service cost method (SSCM) used to determine the extent to which construction-related costs could be deducted in 2002 through 2005. In July 2008, the IRS entered into a closing agreement with Con Edison covering the Companies' use of the SSCM to determine the extent to which construction-related costs could be deducted in 2002 through 2004. The closing agreement does not cover 2005, the last year for which SSCM is an uncertain tax position. The Companies do not expect the required repayment, with interest, to the IRS of their SSCM tax benefits for 2002 through 2005 to exceed the \$160 million (\$147 million of which is attributable to CECONY) the Companies paid to the IRS in June 2007 as a deposit for the repayment. Repayment of the SSCM tax benefits would not affect the Companies' results of operations because deferred taxes have been previously provided for the related temporary differences between the SSCM deductions taken for federal income tax purposes and the corresponding amounts charged to expense for financial reporting purposes. The Companies notified New York State of the closing agreement with the IRS applicable to the years 2002 through 2004 and, in December 2008, made a payment of \$34 million, including interest of \$12 million (\$31 million, including interest of \$10 million, is attributable to CECONY) in settlement of the issue for those years.

In June 2009, Con Edison entered into partial agreements with the IRS to resolve its outstanding issues with the Companies' federal income tax returns for 1998 through 2004, other than the tax treatment of Con Edison Development's LILO transactions (see Lease in/Lease Out Transactions in Note J). The partial agreements incorporate the July 2008 closing agreement between Con Edison and the IRS covering the Companies' use of the SSCM to deduct construction-related costs in 2002, 2003 and 2004. The partial agreements resulted in tax deficiencies of \$78 million for tax years 1998, 2000 and 2002, and tax refunds of \$39 million for 1999, 2001 and 2003. The partial agreement for 2004 resulted in an increased net operating loss deduction of \$19 million.

Table of Contents

In August 2009, the IRS billed the Companies \$109 million (\$78 million for the tax liabilities, as provided in the partial agreements, and \$31 million for related interest) for 1998, 2000 and 2002. In September 2009, the Companies paid the bills by applying \$109 million of a \$160 million deposit the Companies made with the IRS in June 2007.

At December 31, 2009, the Companies' estimated refunds receivable from the IRS for 1999, 2001 and 2003 (\$39 million for Con Edison and CECONY) and the amount of the Companies' remaining funds on deposit with the IRS (\$51 million for Con Edison and \$47 million for CECONY) were classified as current assets on their respective consolidated balance sheets.

At December 31, 2009, the Companies' estimated liabilities for uncertain tax positions (\$86 million for Con Edison and \$92 million for CECONY) were classified as current liabilities on their respective consolidated balance sheets. The Companies reasonably expect to resolve these uncertain tax positions with the IRS in the next 12 months.

The Companies recognize interest accrued related to the liability for uncertain tax positions in interest expense and would recognize penalties, if any, in operating expenses in the Companies' consolidated income statements. In 2009 and 2008, the Companies recognized an immaterial amount of interest expense for uncertain tax positions.

A reconciliation of the beginning and ending amounts of unrecognized tax benefits for Con Edison and CECONY follows:

<i>(Millions of Dollars)</i>	Con Edison			CECONY		
	2009	2008	2007	2009	2008	2007
Balance at the beginning of the year	\$ 118	\$ 155	\$ 151	\$ 108	\$ 142	\$ 139
Additions based on tax positions related to the current year						
Additions based on tax positions of prior years	3		19	1		17
Reductions for tax positions of prior years	(21)	(14)	(15)	(5)	(13)	(14)
Settlements	(14)	(23)		(12)	(21)	
Balance at the end of the year	\$ 86	\$ 118	\$ 155	\$ 92	\$ 108	\$ 142

Note M Stock-Based Compensation

The Companies may compensate employees and directors with, among other things, stock options, restricted stock units and contributions to a discount stock purchase plan. The Stock Option Plan (the 1996 Plan) provided for awards of stock options to officers and employees for up to 10 million shares of Con Edison common stock. The Long Term Incentive Plan (LTIP), among other things, provides for awards of restricted stock units, stock options and, to Con Edison's non-officer directors, deferred stock units for up to 10 million shares of common stock (of which not more than four million shares may be restricted stock or stock units).

Shares of Con Edison common stock used to satisfy the Companies' obligations with respect to stock-based compensation may be new (authorized, but unissued) shares, treasury shares or shares purchased in the open market. The shares used during the periods ended December 31, 2009 and 2008 have been new shares.

Table of Contents

Under the accounting rules for stock compensation, the Companies have recognized the cost of stock-based compensation as an expense using a fair value measurement method. The following table summarizes stock-based compensation expense recognized by the Companies in the period ended December 31, 2009, 2008 and 2007:

<i>(Millions of Dollars)</i>	Con Edison			CECONY		
	2009	2008	2007	2009	2008	2007
Stock options	\$	\$ 1	\$ 1	\$	\$ 1	\$ 1
Restricted stock units	1	1	2	1	1	1
Performance-based restricted stock	20	8	5	19	7	4
Non-officer director deferred stock compensation	1	1	1	1	1	1
Total	\$ 22	\$ 11	\$ 9	\$ 21	\$ 10	\$ 7

Stock Options

The Companies last issued stock options in 2006. The stock options generally vested over a three-year period and have a term of ten years. Options were granted at an exercise price equal to the fair market value of a common share when the option was granted. The Companies generally recognized compensation expense (based on the fair value of stock option awards) over the continuous service period in which the options vested. Awards to employees eligible for retirement were expensed in the month awarded.

The outstanding options are equity awards because shares of Con Edison common stock are delivered upon exercise of the options. As equity awards, the fair value of the options is measured at the grant date. There were no options granted in 2009 and 2008.

A summary of changes in the status of stock options awarded as of December 31, 2009 is as follows:

	Con Edison		CECONY	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Outstanding at 12/31/08	6,200,600	\$ 43.229	5,187,800	\$ 43.335
Exercised	(334,800)	40.016	(287,900)	40.277
Forfeited	(552,500)	47.817	(531,100)	47.850
Outstanding at 12/31/09	5,313,300	\$ 42.955	4,368,800	\$ 42.988

The changes in the fair value of all outstanding options from their grant dates to December 31, 2009 and 2008 (aggregate intrinsic value) for Con Edison were \$13 million and \$(27) million, respectively. The changes in the fair value of all outstanding options from their grant dates to December 31, 2009 and 2008 (aggregate intrinsic value) for CECONY was \$11 million and \$(23) million, respectively. The aggregate intrinsic value of options exercised in 2009 and 2008 was \$1 million for both years, and the cash received by Con Edison for payment of the exercise price was \$13 million and \$11 million, respectively. The weighted average remaining contractual life of options outstanding is four years as of December 31, 2009.

Table of Contents

The following table summarizes stock options outstanding at December 31, 2009 for each plan year for the Companies:

Plan Year	Remaining Contractual Life	Con Edison			CECONY		
		Options Outstanding	Weighted Average Exercise Price	Options Exercisable	Options Outstanding	Weighted Average Exercise Price	Options Exercisable
2006	7	1,583,600	\$ 45.216	1,583,600	1,363,400	\$ 45.233	1,363,400
2005	6	1,171,400	42.782	1,171,400	954,450	42.758	954,450
2004	5	912,700	43.762	912,700	729,850	43.757	729,850
2003	4	613,100	39.810	613,100	456,600	39.756	456,600
2002	3	742,550	42.510	742,550	607,550	42.510	607,550
2001	2	223,800	37.750	223,800	201,300	37.750	201,300
2000	1	66,150	32.500	66,150	55,650	32.500	55,650
Total		5,313,300	\$ 42.955	5,313,300	4,368,800	\$ 42.988	4,368,800

Restricted Stock Units

Restricted stock unit awards under the LTIP have been made as follows: (i) to officers and certain employees, including awards that provide for adjustment of the number of units (performance-restricted stock units or Performance RSUs); and (ii) in connection with the directors' deferred compensation plan. Each restricted stock unit awarded represents the right to receive, upon vesting, one share of Con Edison common stock, or, except for units awarded under the directors' plan, the cash value of a share or a combination thereof.

In accordance with the accounting rules for stock compensation, for outstanding restricted stock awards other than Performance RSUs or awards under the directors' deferred compensation plan, the Companies have accrued a liability based on the market value of a common share on the grant date and are recognizing compensation expense over the vesting period. The weighted average vesting period for outstanding awards is three years and is based on the employee's continuous service to Con Edison. Prior to vesting, the awards are subject to forfeiture in whole or in part under certain circumstances. The awards are liability awards because each restricted stock unit represents the right to receive, upon vesting, one share of Con Edison common stock, the cash value of a share or a combination thereof. As such, prior to vesting, changes in the fair value of the units are reflected in net income. At December 31, 2009 and 2008, there were 135,048 and 113,145 units outstanding, respectively, for Con Edison, of which 96,598 and 76,045 units were outstanding, respectively, for CECONY. The weighted average fair value as of the grant date of the outstanding units other than Performance RSUs or awards under the directors' deferred compensation plan for December 31, 2009 and 2008 was \$40.812 and \$41.080 per unit, respectively, for Con Edison. The weighted average fair value as of the grant date of the outstanding units for December 31, 2009 and 2008 was \$42.895 and \$43.852 per unit, respectively, for CECONY. The total expense to be recognized by the Companies in future periods for unvested awards outstanding as of December 31, 2009 for Con Edison and CECONY was \$1 million.

The number of units in each annual Performance RSU award is subject to adjustment as follows: (i) 50 percent of the units awarded will be multiplied by a factor that may range from 0 to 150 percent based on Con Edison's total shareholder return relative to a specified peer group during a specified performance period (the TSR portion); and (ii) 50 percent of the units awarded will be multiplied by a factor that may range from 0 to 132 percent based on determinations made in connection with CECONY's Executive Incentive Plan, or, for certain officers, the O&R Annual Team Incentive Plan or goals relating to Con Edison's competitive energy businesses (the EIP portion). Units generally vest when the performance period ends.

For the TSR portion of Performance RSU, the Companies use a Monte Carlo simulation model to estimate the fair value of the awards. The fair value is

Table of Contents

recomputed each reporting period as of the earlier of the reporting date and the vesting date. For the EIP portion of Performance RSU, the fair value of the awards is determined using the market price as of the earlier of the reporting date or the vesting date. Performance RSU awards are liability awards because each Performance RSU represents the right to receive, upon vesting, one share of Con Edison common stock, the cash value of a share or a combination thereof. As such, changes in the fair value of the Performance RSUs are reflected in net income. The following table illustrates the assumptions used to calculate the fair value of the awards:

	2009
Risk-free interest rate	0.45% - 5.95%
Expected term	3 years
Expected volatility	22.30%

The risk-free rate is based on the U.S. Treasury zero-coupon yield curve on the date of grant. The expected term of the Performance RSUs is three years, which equals the vesting period. The Companies do not expect significant forfeitures to occur. The expected volatility is calculated using daily closing stock prices over a period of three years, which approximates the expected term of the awards.

A summary of changes in the status of the Performance RSUs TSR portion during the period ended December 31, 2009 is as follows:

	Con Edison		CECONY	
	Units	Weighted Average Fair Value*	Units	Weighted Average Fair Value*
Non-vested at 12/31/08	323,009	\$ 48.847	247,559	\$ 48.840
Granted	243,745	35.877	222,501	33.301
Vested	(101,129)	68.150	(76,392)	68.150
Forfeited	(38,939)		(36,605)	
Non-vested at 12/31/09	426,686	\$ 54.316	357,063	\$ 54.436

* Fair value is determined using the Monte Carlo simulation described above. Weighted average fair value at December 31, 2008 reflects assumption that dividends are accrued or paid on Performance RSUs prior to vesting. Weighted average fair value at December 31, 2009 and weighted average fair value of Performance RSUs granted do not reflect any accrual or payment of dividends prior to vesting.

A summary of changes in the status of the Performance RSUs EIP portion during the period ended December 31, 2009 is as follows:

	Con Edison		CECONY	
	Units	Weighted Average Fair Value	Units	Weighted Average Fair Value
Non-vested at 12/31/08	323,009	\$ 38.930	247,559	\$ 38.930
Granted	243,745	40.933	222,501	37.857
Vested	(101,129)	45.430	(76,392)	45.430
Forfeited	(38,939)		(36,605)	
Non-vested at 12/31/09	426,686	\$ 45.430	357,063	\$ 45.430

* Fair value is determined using the market price of one share of Con Edison common stock on the respective dates indicated or the grant or vesting dates. The market price has not been discounted to reflect that dividends do not accrue and are not payable on Performance RSUs until vesting.

The total expense to be recognized by Con Edison in future periods for unvested Performance RSUs outstanding as of December 31, 2009 is \$21 million, including \$17 million for CECONY.

Con Edison has a deferred stock compensation plan for non-officer directors. Awards under the deferred compensation stock plan are covered by the LTIP. Each director receives 1,500 stock units annually for service as a director. These stock units are deferred until the director's termination of service. Directors may elect to receive dividend equivalents earned on stock units in cash payments. Restricted stock units issued under the directors' deferred compensation plan are considered equity awards, because they may only be settled in shares. Directors immediately vest in units issued to them. The fair value of the units is determined using the closing price of Con Edison's common stock on the business day immediately preceding the date of issue. In the period ended December 31, 2009, approximately 25,165 units were issued.

Stock Purchase Plan

The Stock Purchase Plan provides for the Companies to contribute up to \$1 for each \$9 invested by their directors, officers or employees to purchase Con Edison common stock under the plan. Eligible participants may invest up to \$25,000 during any calendar year (subject to an additional limitation for officers and employees of not more than 20% of their

Table of Contents

pay). Dividends paid on shares held under the plan are reinvested in additional shares unless otherwise directed by the participant.

Participants in the plan immediately vest in shares purchased by them under the plan. The fair value of the shares of Con Edison common stock purchased under the plan was calculated using the average of the high and low composite sale prices at which shares were traded at the New York Stock Exchange on the trading day immediately preceding such purchase dates. During 2009, 2008 and 2007, 868,622, 745,869 and 633,647 shares were purchased under the Stock Purchase Plan at a weighted average price of \$38.15, \$42.47 and \$47.70 per share, respectively.

Note N Financial Information by Business Segment

The business segments of each of the Companies were determined based on management's reporting and decision-making requirements in accordance with the accounting rules for segment reporting.

Con Edison's principal business segments are CECONY's regulated electric, gas and steam utility activities, O&R's regulated electric and gas utility activities and Con Edison's competitive energy businesses. See Note U. CECONY's principal business segments are its regulated electric, gas and steam utility activities.

All revenues of these business segments, excluding revenues earned by Con Edison Development on certain energy infrastructure projects, which are deemed to be immaterial, are from customers located in the United States of America. Also, all assets of the business segments, excluding certain investments in energy infrastructure projects by Con Edison Development (\$238 million at December 31, 2009), are located in the United States of America. The accounting policies of the segments are the same as those described in Note A.

Common services shared by the business segments are assigned directly or allocated based on various cost factors, depending on the nature of the service provided.

Table of Contents
