NOTE 1: BASIS OF PRESENTATION OF THE FINANCIAL STATEMENTS

As a consequence of the application of the Technical Resolution No. 21 of the Federación Argentina de Consejos Profesionales de Ciencias Económicas (FACPCE), the Balance Sheet as of December 31, 2009 and 2008 and the Statements of Income and the Statements of Cash Flows for the periods ended on those dates were consolidated on a line by line basis with the financial statements of such companies in which it holds a majority of the voting shares.

(ex Agropecuaria Cervera S.A.) (ANTA), FyO Trading S.A. (FyO Trading), Agrology S.A. and IRSA have been used in order to determine line by line consolidation.

NOTE 3: (Continued)

IRSA uses the percentage-of-completion method of accounting with respect to sales of development properties under construction. Under this method, revenue is recognized based on the ratio of costs incurred to total estimated costs according to budgeted costs. IRSA does not commence revenue and cost recognition until such time as the decision to proceed with the project is made and construction activities have begun. The percentage-of-completion method of accounting requires the IRSA's Management to prepare budgeted costs in connection with sales of properties/units. All changes to estimated costs of completion are incorporated into revised estimates during the contract period.

Revenues from leases

Revenues from leases are recognized on a straight line basis over the life of the related lease contracts.

2) Revenue recognition of Alto Palermo S.A. (APSA)

Revenues for admission rights and rental of stores and stands

Leases with tenants are accounted for as operating leases. Tenants are generally charged a rent, which consists of the higher of (i) a monthly base rent (the Base Rent) and (ii) a specified percentage of the tenant's monthly revenues (the Percentage Rent) (which generally ranges between 4% and 10% of tenant's gross revenues).

Furthermore, pursuant to the rent escalation clause in most leases, the tenant's Base Rent generally increases between 7% and 12% each year during the term of the lease. Minimum rental income is recognized following on the accrued criteria.

Certain lease agreements contain provisions, which provide for rents based on a percentage of revenues or based on a percentage of revenues volume above a specified threshold. APSA determines the compliance with specific targets and calculates the additional rent on a monthly basis as provided in the contracts. Thus, these contingent rents are not recognized until the required thresholds are exceeded.

Generally, APSA's lease agreements vary from 36 to 120 months. Law No. 24,808 provides that tenants may rescind commercial lease agreements after the initial six months, upon not less than 60 days

written notice, subject to penalties which vary from one to one and a half months rent if the tenant rescinds during the first year of its lease, and one month of rent if the tenant rescinds after the first year of its lease.

Additionally, APSA charges its tenants monthly administration fees related to the administration and maintenance of the common area and the administration of contributions made by tenants to finance promotional efforts for the overall shopping centers operations. The administration fees are prorated among the tenants according to their leases which vary from shopping center to shopping center. Administration fees are recognized monthly when earned.

In addition to rent, tenants are generally charged admission rights, a non refundable admission fee, that tenants may be required to pay upon entering into a lease or upon lease renewal. Admission right is normally paid in one lump sum or in a small number of monthly installments. Admission rights are recognized in earnings using the straight-line method over the life of the respective lease agreements.

Credit card operations Consumer Financing

Revenues derived from credit card transactions consist of commissions and financing income, charges to clients for life and disability insurance and for statements of account, among other. b. Investments in subsidiaries and equity investments:

Long term investments in subsidiaries and equity investments, have been valued by using the equity method of accounting based on the financial statements at December 31, 2009 issued by them. The accounting standards used by the subsidiaries to prepare their financial statements are the same as those used by IRSA. The accounting standards used by the related companies to prepare their financial statements are those currently in effect.

d. Tyrus S.A.:

Uruguay-based Tyrus S.A. has been classified as not integrated into the IRSA's operations in relation to its subsidiaries whose operations are carried out fully abroad. IRSA does not control foreign operations, which are conducted with a significant degree of autonomy respect to the IRSA's own operations. Besides, such operations are mainly financed with funds originating in its own transactions or with local loans.

The Tyrus's assets and liabilities were converted into Pesos at the exchange rate in force at the close of the period. The Statement of Income accounts have been converted into Pesos at the exchange rates in force at the time of each transaction. Foreign exchange gains/losses arising from the conversion have been charged to the Shareholders' equity caption in the line "Cumulative Translation Adjustment" and they amounted to Ps. 12,805 as of December 31, 2009.

e. Undeveloped parcels of lands:

IRSA acquires undeveloped land in order to provide an adequate and well-located supply for its residential and office building operations. IRSA's strategy for land acquisition and development is dictated by specific market conditions where IRSA conducts its operations.

Land held for development and sale and improvements are stated at cost restated as mentioned in Note 1.b. to the basic financial statements or market value, whichever is lower.

Land and land improvements are transferred to inventories or fixed assets when construction commences or their trade is decided.

e) Business combinations

Real Estate Business

Significant entities on net asset acquired by the Company were recorded in line with the "purchased method" set forth in Technical Resolution No. 18. and Technical Resolution No. 21. All assets and liabilities acquired to third independent parties were adjusted to show their fair value. IRSA identified the assets and liabilities acquired including intangible assets such as: lease agreements acquired for prices and terms that are either higher or lower than in the market; costs of executing and delivering the lease agreements in force (costs that IRSA avoids incurring as a result of acquiring effective lease agreements); the value of acquired brands, the value of any deposits associated to the investment and the intangible value inherent in customer relations.

NOTE 3: (Continued)

The process of identification and the determination of the purchased price paid is a matter that requires complex judgments and significant estimates.

IRSA uses the information contained in valuations estimated by independent appraisers as primary base for assigning the price paid for the land, the building and the shopping centers. The amounts assigned to all the other assets and liabilities are based on independent valuations or on the IRSA's own analysis on comparable assets and liabilities. The current value of tangible assets acquired considers the property value as if it was empty.

In accordance with the terms of Technical Resolution No. 21, if the value of identified tangible and intangible assets and liabilities exceeds the price paid, the intangible assets acquired are not recognized as they would cause an increase of the negative goodwill generated by these acquisitions at the time of the purchase. Furthermore, as regards the negative goodwill generated, the portion concerning the investees' expectations of future expenses or losses will be recognized in the statements of income for the same periods in which such expenses or losses are accrued and expensed. The portion that is not concerned with the investees' expectations of future expenses or losses will be treated as follows: (i) the amount that does not exceed the investor's interest over the current values of the investees' identifiable non-monetary assets will be consistently recognized in the statement of income throughout a period equivalent to a weighted average of the remaining useful lives of the investees' identifiable assets subject to depreciation; (ii) the amount that exceeds the current values of the investees' identifiable non-monetary assets will be recognized in the statement of income at the time of the acquisition.

If the price paid is larger than the value of tangible and intangible assets and liabilities as identified, the excess is considered to be goodwill.

depreciation and allowance for impairment at the end of the period/year. IRSA capitalizes the financial accrued costs associated with long-term construction projects. During the year ended June 30, 2009, financial costs were capitalized in the building known as **DIQUE IV** for Ps. 7,561.

h) Goodwill

Real Estate Business

- i. **Negative goodwill:** Negative goodwill represents the excess of the fair value of net assets of the subsidiaries at the percentage of participation acquired over the acquisition cost. If the value of the identified tangible and intangible assets exceeds the purchase price paid: (i) the acquired intangible assets are not recognized because they would entail an increase in the negative goodwill arising from these acquisitions at the time of the purchase and (ii) the excess will be treated as negative goodwill as follows: (a) the portion related to the expectations of future losses will be recognized in the Statements of Income for the same periods in which such losses are incurred; (b) the amount not in excess of the equity interest over the non-monetary assets of the issue will be recognized as negative goodwill and (c) the amount that exceeds the non-monetary assets will be recognized in the statement of income at the time of the purchase.

Goodwill has been restated following the guidelines mentioned in Note 1.b. to the basic financial statements and amortization has been calculated by the straight-line method based on estimated useful life, considering the weighted-average of the remaining useful life of identifiable assets acquired subject to depreciation.

- ii. **Positive Goodwill:** the goodwill represents the excess of the acquisition cost over the net assets current value of the business acquired to the share percentage.

Amortizations were calculated through the straight line method on the basis of an estimated useful life considering the weight average of the remaining useful life of the assets acquired.

The residual value of goodwill arising from acquisition of net assets and shares in companies has been shown in the Goodwill caption. Amortizations were classified in the Amortization of goodwill caption of the statement of income. Goodwills related to the acquisition of interests in subsidiaries is included in non-current investments.

Values thus obtained do not exceed the respective estimated recoverable values at the end of the period/year.

i) Customer advances

Real Estate Business

Customer advances represent payments received in advance in connection with the sale and rent of properties and has been valued according to the amount of money received.

j) Allowances

Real Estate Business

Allowance for doubtful accounts: IRSA allows for losses relating to trade receivables, leases and other accounts receivable. The allowance for losses is recognized when, based on current information and events, it is probable that IRSA will be unable to collect all amounts due according to the terms of the agreements. The allowance is determined on a one-by-one basis considering the present value of expected future cash flows. While Management uses the information available to make assessments, future adjustments to the allowance may be necessary if future economic conditions differ substantially from the assumptions used in making the assessments. Management has considered all events and/or transactions that are subject to reasonable and normal methods of estimations, and the financial statements reflect that consideration.

For impairment of assets: IRSA regularly assesses its non-current assets for recoverability at the end of every year.

IRSA has estimated the recoverable value of rental properties based on their economic use value, which is determined based on estimated future cash flows discounted. For the rest of the assets (inventories and undeveloped parcels of land) IRSA makes a comparison with market values based on values of comparable properties. If the recoverable value of assets, which had been impaired in prior years, increases, IRSA records the corresponding reversals of impairment loss as required by accounting standards.

For lawsuits: IRSA has certain contingent liabilities with respect to existing or potential claims, lawsuits and other proceedings, including those involving labor issues. IRSA accrues liabilities when it is probable that future costs will be incurred and such costs can be reasonably estimated. Such accruals are based on developments to date, IRSA's estimates of the outcomes of these matters and IRSA's lawyers' experience in contesting, litigating and settling other matters.

NOTE 3: (Continued)

As the scope of the liabilities becomes better defined, there may be changes in the estimates of future costs, which could have an effect on IRSA's future results of operations and financial condition or liquidity.

At the date of issuance of these financial statements, IRSA's Management understands that there are no elements to foresee other potential contingencies having a negative impact on these financial statements.

k) Liabilities in kind related to barter transactions*Real Estate Business*

Liabilities in kind corresponding to obligations to deliver units to be built are valued considering the cost of the assets received. IRSA estimate that this value does exceed the cost of construction of the units to deliver plus additional costs to transfer the assets to the creditor. Liabilities in kind have been shown in the Trade account payables .

l) Deferred financing cost*Real Estate Business*

Expenses incurred in connection with the issuance of debt are amortized over the life of the related issuances. In the case of redemption or conversion of these notes, the related expenses are amortized using the accelerated depreciation method.

Amortization has been recorded under Financial results, net in the Statements of Income as a greater financing expense.

NOTE 7: LAWSUITS AND CLAIMS IN COURSE

A. Agricultural Business

1. Ongoing litigation with the city of Villa Mercedes.

The Misdemeanours Court Judge to the city of Villa Mercedes issued resolution No. 2980/08 about the situation of Cactus in such city, determining that the Company had a 36-month term to stop operating and transferring the establishment located on the Provincial Route 2B.

In such 36-month period, the Company shall not host over 18,500 head of cattle.

Such brief was appealed by Cactus before the Municipality, which was negatively answered on April 7, 2009, by means of Decree No. 0662/09, thus ratifying the Misdemeanour Court Judge's ruling. Under the administrative justice of the city of Villa Mercedes, Cactus would have until April 7, 2012 to conclude its operations and transfer the establishment.

Cactus has filed appeals with the High Court of Justice of the Province of San Luis, objecting the lawfulness of the rulings entered by the Misdemeanours Court Judge of Villa Mercedes. The appeals are pending and the High Court has not ruled on them.

The Company's legal advisors are optimistic about the possibilities of reversing the Misdemeanours Court Judge's ruling.

B. Real Estate Business

1. Provision for unexpired claims against Llao Llao Holding S.A.

The Llao Llao Holding S.A. (LLH) Company (in liquidation process following the merger with and into the Company), predecessor of Llao Llao Resorts S.A. (LLR) as operator of the Llao Llao Hotel, was sued in 1997 by the National Parks Administration seeking collection of the unpaid balance of the additional sale price, in Argentine External Debt Bond (EDB) amounting to US\$ 2.9 million. A ruling of the court of original jurisdiction sustained the claim. That ruling was appealed and the Court of Appeals confirmed the judgment of the court of original jurisdiction, demanding payment from the company of US\$ 3.8 million, plus interest accrued through payment, punitive interest and attorney's fees. In March 2004, LLH paid Ps. 9,156 in cash and EDB.

NOTE 7: (Continued)

The plaintiff requested the court of original jurisdiction to initiate an incidental procedure for execution of sentence by performing a settlement through the Ministry of Economy, the procedure has been questioned by LLR. In view of the fact that the information provided was not sufficient to evaluate the amount settled by the Ministry of Economy, it was requested that the execution be suspended until there is a sentence on the complaint recourse filed to the National Supreme Court for the denial of the extraordinary recourse soliciting that the debt be converted to pesos (pesification).

In July 2008, the Court of Appeals notified LLR that by means of a resolution dated June 18, 2008 it had confirmed the settlement approved by the court of original jurisdiction.

On March 17, 2009, the National Supreme Court admitted the appeal against and decided to suspend the enforcement of the judgment in so far as the extraordinary appeal lodged by LLR is not resolved.

In accordance with the information provided by the attorneys, the amount to be recorded to Ps. 10,173 as of December 31, 2009 such amount being recorded in Other current liabilities payables to National Parks Administration.

B. Real Estate Business

1. IRSA

a. Puerto Retiro S.A.

On April 18, 2000, Puerto Retiro S.A (indirect subsidiary of IRSA) was notified of a filing made by the National Government, through the Ministry of Defense, to extend the petition in bankruptcy of Inversora Dársena Norte S.A. (Indarsa) to Puerto Retiro S.A. At the request of plaintiff, the bankruptcy court granted an order restraining the ability of Puerto Retiro S.A. to sell or dispose in any manner the acquired real estate property from Tandanor S.A. in June 1993.

Indarsa had acquired 90% of the capital stock of Tandanor S.A. to a formerly estate owned company privatized in 1991, engaged in the shipyard industry.

Indarsa did not comply with the payment of the outstanding price for the acquisition of the stock of Tandanor, and therefore the Ministry of Defense requested the bankruptcy of Indarsa, pursuing to extend the bankruptcy to Puerto Retiro S.A.

The evidence steps of the legal procedures have been completed. Puerto Retiro S.A. appealed the precautionary measure, being the same confirmed by the Court on December 14, 2000. The parties have submitted their claims in due time. The file was passed for the judge to issue a pronouncement, the judge issued a decree adjourning the summoning of decisions to pronouncement in the understanding that there exists pre-judgment in respect of the penal cause filed against ex-officers of the Ministry of Defense and ex-directors of the Company. Consequently, the matter will not be solved until there is final judgment in penal jurisdiction.

The Management and legal advisors of Puerto Retiro S.A. estimate that there are legal and technical issues sufficient to consider that the request for bankruptcy will be denied by the court. However, taking the circumstances into account and the progress of the legal action, this position cannot be considered final.

b. Mortgage guaranteed loan Hoteles Argentinos S.A.

In March 2005, Credit Suisse First Boston (CSFB) acquired the debt for US\$ 11.1 million of Hoteles Argentinos S.A. (HASA), which had been in

In addition, two credit default swaps were subscribed. One between IRSA and CSFB for 80% of the restructured debt value, and the other one was between Starwood Hotels and Resorts Worldwide Inc. (Starwood) and CSFB for the remaining 20%. Under these contracts, both companies are able to protect CSFB in case of non-compliance with HASA's obligations. To support the obligations assumed, the Company deposited as guarantee the amount of US\$ 1.2 million.

Exposure to the non-financial public sector

Banco Hipotecario S.A. keeps recorded in its financial statements assets with the Non-Financial Public Sector amounting to Ps. 2,256,668 as of December 31, 2009.

As from January 1st, 2006, the dispositions of point 12 of Communication A 3911 (Communication A 4455) became effective, as regards that the assistance to the Public Sector (average measured) cannot exceed 40% of total Assets of the last day of the previous month. Through Communication A 4546 of July 9, 2006, it was established that as from July 1st, 2007, such limit was modified to 35%.

The exposure of Banco Hipotecario S.A. to the Public Sector originated in compensations granted by the National Government as a result of year 2002 crisis, principally related to the asymmetric pesification of assets and liabilities.

To such extent and considering that assets to the Public Sector exceeded the mentioned limit. On January 19, 2006, Banco Hipotecario S.A. reported to the Central Bank of Argentina that it will gradually decrease the proportion of assets subject to the exposure to the Public Sector, in line with the amortization and cancellation made by the Government of the bonds received for asymmetric compensation in the currency of issuance. To date, no objections to this issue have been received.

As of December 31, 2009 and 2008 the assistance to the Public Sector arises 19.8% and 22.6% from total Assets, respectively.

NOTE 14: (Continued)

Aspects pending of resolution

As mentioned in the notes to the financial statements of Banco Hipotecario S.A. (Banco Hipotecario), there are certain aspects that had been objected to by the Financial Institutions Oversight Department of the Central Bank of Argentina (BCRA). These matters are related mainly to:

- a) the accounting records entered for certain transactions involving derivative financial instruments, which, according to the requirements of BCRA, are to be booked in accordance with the criteria laid down by the professional accounting standards, would entail a reduction in shareholders' equity as of December 31, 2009.
- b) regulatory treatment and prudential relations resulting from the negotiation and consummation of certain transactions involving derivative financial instruments. It is to be noted that, in response to certain objections raised by the Central Bank of Argentina, the Entity decided to compute the counterparty and fractioning risk associated to its exposure to the Non-financial Public Sector as well as the ensuing impact on the minimum capital requirements for thousand Ps. 2,047,289 for a five-month period and maturing on November 30, 2009. At the date of the financial statements the above mentioned situation had been regularized.

For purposes of recording its investment in Banco Hipotecario, the Company applies this entity's shareholder's equity determined according to the professional accounting standards. Therefore, the aspects referred to in a) above; do not have a significant impact on the Company's financial statements because they have already been contemplated in the values considered by the Company.

NOTE 14: (Continued)

According to the agreement of occupation related to the loan contract, the amounts due are set off against payments generated by the occupation held by NAI INTERNATIONAL II, INC. of the building and the area known as cinema. The agreement provides that if after October 2027, there still is an unpaid balance of the loan plus respective interest thereon, the agreement will be extended for a final term established as the shorter of the term required to fully repay the unpaid loan amount, or ten years.

On July 1st, 2002 a new amendment to the agreement was established, whose most important resolutions are as follows:

The outstanding debt was de-dollarized (Ps. 1 = US\$ 1)

b) Neuquén Project

The main asset of Shopping Neuquén S.A., controlled by APSA, is a plot of land of 50,000 square meters approximately, in which a mixed use center would be built. The project includes the building of a shopping center, cinemas, a hypermarket, apartments, private hospital and other compatible purposes.

On December 13, 2006, Shopping Neuquén S.A. entered into an agreement with the Municipality and with the Province of Neuquén by which, mainly, the terms to carry out the commercial and residential venture were rescheduled and authorized Shopping Neuquén S.A. to transfer to third parties the title to the plots of land into which the property is divided, provided that it is not that one on which the shopping center will be built. Such agreement was subject to two conditions, both already complied with, consisting in the ratification of the agreement by means of an ordinance of the legislative body of the Municipality of Neuquén, and that the new architectonic project and the extension of the environmental impact research submitted were approved by such Municipality.

Such agreement concluded the case styled Shopping Neuquén S.A. vs. Municipality of Neuquén in re.: administrative procedural action pending before the High Court of Neuquén where only Municipality lawyers fees are pending payment, which will be borne by Shopping Neuquén S.A. Such fees are booked in the provisions account.

After having obtained the approval, the Company had a 150 days term to submit the drafts of the architectonic project, such term maturing on February 17, 2008. However, such drafts presentation took place prior to the referred date. As regards filing thereof, the Municipality of Neuquén made some comments as to feasible solution to the project. Considering this comment an additional term was formally requested to file the new project.

On June 12, 2009, Shopping Neuquén S.A. and the Municipality of Neuquén executed a new agreement by which Shopping Neuquén S.A. committed itself to presenting a new road project and to making those amendments that may be necessary to the general project. On October 19, 2009, the respective amendments to the previously mentioned projects were filed. Subsequently, the Municipality of Neuquén made some remarks to them, which were duly replied. Finally, on January 18, 2010, the Municipality of Neuquén requested changes to the plans filed, granting a 30-day term to be filed. Once these are filed and approved by the Municipality, the term established to commence the works starts to run. Such term will be of 90 running days as from such approval.

NOTE 14: (Continued)

The first work stage (that contemplates the construction of a shopping mall and a hypermarket) should be completed at a maximum 22 month terms starting upon beginning construction. In the case of mailing to comply the conditions established in the agreement, the Municipality of Neuquén is entitled to terminate the agreement and press those charges considered to be required in such sense, among them, to request the return of the premises where the shopping mall and/or hypermarket will be built, based on the condition of the real estate development in which the noncompliance has taken place.

On June 18, 2009, Shopping Neuquén S.A. received from the company G&D Developers US\$ 119 for the sale price of a plot of land of about 4,332 square meters located in the whereabouts but is not a part of the plot of land where the shopping center will be built, under the negotiations held with the Municipality of Neuquén.

c) Tarshop S.A. credit card receivables securitization program

Tarshop S.A. has ongoing securitization programs through which Tarshop S.A., transfers a portion of its customer credit card receivable balances to master trusts that issues certificates to public and private investors.

Under the securitization programs, Trusts may issue two types of certificates representing undivided interests in the Trusts Títulos de Deuda Fiduciaria (TDF) and Certificates of Participation (CP), which represent debt and equity certificates, respectively. Interest and principal services are paid periodically to the TDF holders throughout the life of the security. CPs are subordinated securities which entitle the CP holders to share pro rata in the cash flows of the securitized credit card receivables, after principal and interest on the TDFs and other fees and expenses have been paid. During the revolving period no payments are made to TDF and CP holders. Principal collections of the underlying financial assets are used by the Trust to acquire additional credit card receivables throughout the revolving period. Once the revolving period ends, a period of liquidation occurs during which: (i) no further assets are purchased, (ii) all cash collections are used to fulfill the TDF service requirements and (iii) the remaining proceeds are used to fulfill the CPs service requirements.

NOTE 14: (Continued)

In consideration of the credits transferred to the Trusts, which have been eliminated from Tarshop's balance sheet, Tarshop S.A. receives cash (arising from the placement of the debt securities by the Trusts) and CPs issued by the Trusts. The latter are recorded at their values calculated by the equity method of accounting at the closing of the period/year, net of the corresponding allowances for impairment, if applicable, on the basis of the financial statements issued by the Trusts.

Under this Securitization Program Tarshop S.A. transferred to The Financial Trusts the total amount of Ps. 262,078 during the period ended December 31, 2009 of credits receivable originated in the use of its clients' credits cards and personal loans carrying promissory notes. Consequently, TDF coupon zero for Ps. 13,500, TDF Series A for Ps. 203,606 and CP Series C for Ps. 44,972 were issued.

Tarshop S.A. acquired all the CP Series C in an amount equal to its nominal value, and all the remaining TDF and CP were placed to investors through a public offering in Argentina, with exception of TDF Series B corresponding to Financial Trust Series XXXIX, XL, XLVII, XLIX and L, and TDF Series C of the Series XLVII, part of which Tarshop S.A. maintained in its portfolio. Cash reserves for losses in the amount of Ps. 4,392 have been made as credit protection for investors.

d) Contributed leasehold improvements- Other liabilities

In March 1996 Village Cinema S.A. inaugurated ten multiplex system cinema theatres, with an approximate surface of 4,100 square meters. This improvement of the building of Mendoza Plaza Shopping S.A. was capitalized with a balancing entry as a fixed asset, recognizing the depreciation charges and the profits over a 50-year period. At the end the amount of Ps. 9,836 was pending of accrual. The lease is for a time limit of 10 years to be renewed every four equivalent and consecutive periods, at the option of Village Cinema S.A..

NOTE 15: FINANCIAL AND CAPITAL MARKET SITUACION

As from the last months of 2008, the world's principal financial markets have suffered the impact of volatility conditions as well as lack of liquidity and credit. Consequently, stock-market rates showed a significant fall worldwide together with an evident economic deceleration.

As soon as the largest economies in the world started to intervene by injecting liquidity into the markets, interest rates responded with a downward trend which favored, in 2009, the recovery of stock and debt market indices. As regards the real economy at the global level, it remains to be seen whether the measures implemented by the different governments have had lasting positive effects.

As regards Argentina in 2008, the quotation of Government and corporate securities in the stock markets sustained dramatic drops whereas interest rates, the country risk rate and the exchange rates went upwards. In 2009, securities started to recover, particularly the instruments issued by the Argentine Government, with the ensuing impact on the valuation at fair value of the financial assets holdings maintained by Banco Hipotecario in its portfolio.

As regards the quotation of Banco Hipotecario's shares, which had declined in recent quarters due to the overall market situation, it has significantly appreciated in the past months which corroborate our estimate that the decrease in the value of Banco Hipotecario's shares had been temporary.

The management of the Company is evaluating and monitoring the effects derived from the situations referred to above on the Company and subsidiaries in order to adopt the necessary measures to soften the effects of the global situation to protect the assets of the company.

NOTE 16: SALES OF BUILDINGS

During the period of six months ended December 31, 2009 and the year ended June 30, 2009, IRSA conducted several transactions for the sale of some office rental properties that made up its portfolio, representative of a gross leasable area of 12,057 and 20,315 square meters, respectively, in exchange for a total of Ps. 133.1 million and Ps. 201.3 million, respectively. The gross income generated by these transactions amounted to Ps. 93.7 million and Ps. 119.4 million, respectively.

NOTE 17: CAPITALIZATION PROGRAM FOR EXECUTIVE MANAGEMENT

The Company together with its related Company IRSA is currently developing a capitalization program for executive management staff through contributions made by employees and by the Company (the Plan).

The Plan is addressed to employees selected by those Companies with the purpose of keeping them in the company and increasing their total compensation through an extraordinary reward, provided that certain specific conditions are complied with.

Participation and contributions to the Plan are on a voluntary basis. Once the beneficiary (the Participant) has accepted, he will be able to make two types of contributions: a monthly one (based on the salary) and an extraordinary one (based on the annual bonus). The suggested contribution is up to 2.5% of the salary and up to 15% of the annual bonus. On the other hand, the Company contribution will be 200% of the monthly contributions and 300% of the employee s extraordinary contributions.

Funds collected from participants contributions will initially be sent to an independent financial means especially created for such purpose and placed in Argentina as a Common Investment Fund, which will be approved by the C.N.V. Such funds will be freely redeemed under the requirement of the participants.

The funds arising from the Company contributions will flow to other independent financial means separated from the previous one.

The participants or their successors will have access to 100% of the Program (that is, including Company contributions made in favor of the financial means especially created) under the circumstances that follow:

ordinary retirement in line with the applicable working regulations

total or permanent disability or inability

death.

In case of resignation or discharge without legal justification, the participant will obtain the amounts contributed by Cresud and IRSA only if he has participated in the plan during a minimum term of 5 (five) years, provided certain conditions were complied with.

As of December 31, 2009 Cresud and IRSA had made contributions to the Plan that amount Ps. 3,067.

c) **Option to acquire an interest in APSA**

On January 13, 2010, IRSA submitted a bid, which Parque Arauco S.A. The acceptance of the bid grants IRSA the right to exercise the purchase option mentioned above until August 31, 2010, which term may be extended until November 30, 2010 subject to compliance with certain conditions. The strike price has been fixed at the total and final amount of US\$ 126.0 million.

So as to comply with the first of these conditions, IRSA has transferred US\$ 6.0 million to PASA as payment in exchange for the option, to be computed towards cancellation of the final price. If IRSA did not exercise the option within the above-mentioned period, this amount would be kept by PASA.

NOTE 1: ACCOUNTING STANDARDS

Below is a description of the most relevant accounting standards used by the Company in the preparation of these Financial Statements, which have been applied on a consistent basis from the previous period.

a. Presentation standards

These financial statements are stated in Argentine Pesos (Ps.) and have been prepared in accordance with the disclosure and valuation accounting standards contained in the Technical Resolutions issued by the Federación Argentina de Consejos Profesionales de Ciencias Económicas (FACPCE), as approved, with resolutions issued by the Consejo Profesional de Ciencias Económicas de la Ciudad Autónoma de Buenos Aires (CPCECABA) and the Comisión Nacional de Valores (CNV).

b. The effects of inflation

The financial statements have been prepared in constant currency units recognizing the effects of inflation up to August 31, 1995. As from this date and up to December 31, 2001 the restatement of the financial statements has been discontinued due to that period of monetary stability. As from January 1st, 2002 and up to March 2003 the effects of inflation were recognized as it was an inflationary period. As from such date, in accordance with Resolution 441 issued on April 8, 2003 by the CNV, the Company discontinued the restatement of its financial statements. This criterion does not agree with the terms of Resolution MD 041/2003 of the CPCECABA, by which the restatement of financial statements was discontinued as from October 1st, 2003. This change has not generated any significant effect on the Company's financial statements taken as a whole.

c. Comparative Information

For comparison purposes, certain reclassifications have been made as of June 30, 2009 and December 31, 2008.

These financial statements have been prepared giving effect to the spin-off - merger mentioned in Note 13; consequently, the stand-alone financial statements as of December 31, 2009 are not comparable with those issued as of June 30, 2009 and with the six-month period ended December 31, 2008.

2. Acquisitions of equity interests in companies

The significant acquisitions of companies are booked according to the acquisition method as established by Technical Resolution No. 18 and Technical Resolution No. 21. All assets and liabilities acquired from independent third parties are adjusted to reflect their fair value.

Considering the participation in Cactus acquired during the previous fiscal year, according to mentioned in Note 2.k.3, the Company is now analyzing the fair values of acquired assets and liabilities identifiable according to the provisions of Technical Resolution No. 21 caption 1.3.1.

3. Goodwill

-Negative goodwill

As provided by Technical Resolution No. 21, the negative goodwills have been valued at cost restated as of February 28, 2003 as the case may be, which was calculated as the difference between the value paid and the fair value of the equity interest acquired, the latter being determined as established in note 2.k.2.

The amortization of the negative goodwill is recognized over a period equal to the weighted average of the remaining useful life of identifiable assets that are subject to depreciation, which ranges from 20 to 30 years for the IRSA interest and of 5 years for BrasilAgro interest or in an accelerated manner, the party proportional to the negative goodwill so long as IRSA and BrasilAgro disposes its identifiable assets.

NOTE 2: (Continued)

Amortizations have been classified in the account Gain (loss) on equity investees in the Statements of Income.

-Goodwill

As provided by Technical Resolution No. 21, the goodwill related to the equity interest in IRSA and BrasilAgro has been valued at cost, which was calculated as the difference between the value paid for such investments and the fair value of the equity interests acquired, the latter being determined as established in note 2.k.2.

The goodwill related to acquiring an additional interest in Cactus, during the previous fiscal year, has been valued at cost, which was calculated as the difference between the value paid and the book value of the interest acquired. As to this goodwill, the Company is currently analyzing the fair value of assets and liabilities acquired identified as provided by Technical Resolution No. 21, caption 1.3.1.

Upon defining the useful life, the following factors have been considered: (i) nature and expected life of acquired businesses; (ii) stability and expected life of the respective industry branch; (iii) effects that the obsolescence of products, changes in demand and other economic factors may have on the acquired business; (iv) feasibility of maintaining the required disbursement value to obtain future economic benefits from the acquired business and (v) the control period over the acquired business and legal or contractual provisions that may affect its useful life.

Based on these factors, the Company has estimated that it is not possible to estimate the specific useful life for the goodwill related to equity interests in IRSA and BrasilAgro generated by applying the acquisition method provided by Technical Resolution No. 18, and it has therefore determined that they shall have an undefined useful life.

As provided by Technical Resolution No. 18, if the Company determines that the goodwill has an undefined useful life, its amortization will not be computed and its recoverable value should be compared at each year-end to verify whether its value has decreased, allocating losses for impairment in value to income for the year in which such losses were determined, if applicable.

NOTE 15: (Continued)

Funds obtained from increasing capital, net of issuance expenses, amounted to Ps. 881.1 million, while the tax effect of issuance expenses amounted to Ps. 9.9 million. As stated in the section Allocation of funds in the capital increase issuance prospectus, the funds brought into the Company were mainly used to organize companies and acquire plots of land for agricultural production in Bolivia and Paraguay, the purchase of shares of our subsidiaries IRSA and BrasilAgro, the acquisition of notes of our subsidiaries IRSA and APSA, the repurchase of proprietary shares, the settlement of payables and working capital. It should be considered that the allocation of net funds obtained from the offer has been and may continue occasionally to be influenced by current market conditions and, consequently, in the section Allocation of funds in the capital increase issuance prospectus, we have reserved the right to reallocate the whole or a portion of such anticipated uses to other uses that we consider consistent with our strategy.

Funds obtained were assigned to shares and options issued based on the current value estimated upon subscription.

During fiscal year 2008, 2,271,290 options were exercised; consequently, 757,093 shares of common stock were issued for Ps. 3,986.

During fiscal year 2009, 20,237 options were exercised; consequently, 6,745 shares of common stock were issued for Ps. 37.

During the current fiscal year, 1,123 shares entitled with the right to be converted into 3,369 warrants. Such transaction yielded US\$ 1,887. As of December 31, 2009, there were 177,705,104 uncalled options. The terms and conditions of outstanding options (warrants) to subscribe the Company's shares of common stock have been amended due to attributing proprietary shares on a prorate basis among its shareholders, made by the Company on November 23, 2009. Below are detailed the terms that have been modified:

The number of shares to be issued for warrants is, as a ratio previous to assignment 0.33333333 and as ratio resolved after assignment (current) 0.35100598.

The prices to call shares to be issued are: price previous to assignment US\$ 1.68, while the current price after assignment US\$ 1.5954. The rest of terms and conditions of warrants remain unchanged.

NOTE 16: (Continued)

The estimated amount of the legal action is Ps. 2,915 at the date the claim was filed.

In turn, the Company has filed an extraordinary appeal to the High Court of the Province of Catamarca, requesting for a remainder term to answer the lawsuit as, at the time of revoking the first instance judge decision that postponed the terms to answer until a new notice was dispatched, such period had not yet expired. The management of the Company is awaiting the decision of the High Court of the Province of Catamarca.

Additionally, in March 2007 -under the request of Exagrind S.A.- the court in charge of the case seized an inhibition of assets. This decision was lifted in June 2007 and a real estate on attachment has been accepted in replacement.

NOTE 17: RESTRICTED ASSETS

In accordance with Note 16 to the financial statements, on June 4, 2007 a pre-judgment attachment was seized on the Tali Sumaj land owned by the Company in substitution for a more burdensome measure that had been previously ordered.

NOTE 18: REPURCHASE OF TREASURY STOCK

On August 26, 2008, the Company's board of directors decided to acquire treasury stock under section 68, Law No. 17,811 and CNV regulations for a maximum amount of Ps. 30,000 and 10,000,000 shares of common book-entry shares of face value of Ps. 1 per share and entitled to 1 vote. Acquisitions were carried out in a term of 70 days running as from the date of publication of the information in the *Boletín de la Bolsa de Comercio de Buenos Aires* (Buenos Aires stock exchange bulletin) and a minimum of Ps. 3 and a maximum Ps. 3.5 per share were paid.

This decision was taken to contribute to the decrease in the draw down and reduction of fluctuations in the listed price of the Company's shares aiming at contributing to strengthening the shares on the market, minimizing possible temporary imbalances that there may be between the supply and demand on the market, considering the excessive cost of capital that the current listed prices show.

NOTE 18: (Continued)

On October 10, 2008, the Company's Board of Directors decided to change the minimum price of the plan to repurchase treasury stock made public on August 26, 2008. Taking into account the atypical market behavior, it was decided to a floor of Ps. 2.13 subject to an Ps./US\$ exchange rate Ps. 3.2235

per share, which implies that changes in the exchange rate will in turn adjust the limit automatically.

Afterwards, on October 23, 2008 and due to a steep downtrend undergone by the market and worsened in turn by the general context of world markets, it was decided to set a Ps. 1 floor to a US\$/Ps. exchange rate of Ps. 3.24 per share.

Finally, on October 24, 2008, the Board of Directors has decided in defense of economic interests of the shareholders and consequently, to preserve the company, to change the maximum amount of shares subject to acquisition to up to 30,000,000 shares of common stock, face value of Ps. 1 per share and entitled to 1 vote per share, in shares or American Depositary Shares (ADR's) representing 10 shares each as provided by applicable regulations. As provided by Argentine Business Associations Law, the Board of Directors should divest the shares acquired within one year, unless extended by the shareholders' meeting.

As of June 30, 2009, purchases of proprietary shares amounted to 2,935,641 ADRs and 643,590 shares of common stock paying an amount of US\$ 21 million and Ps. 1,745, respectively (Note 21).

On November 13, 2009, the Board of Directors seeking to comply with the mandate granted by the Meeting of Shareholders on October 29, 2009, resolved to start attributing and assigning on a prorata basis 25,000,000 proprietary treasury shares with a face value of Ps. 1 entitled to 1 vote each.

Such assignment was made as from November 23, 2009, at 0.05301792784 shares per share with a face value of Ps. 1 each and 0.05301792784 shares per ADR. As upon making the attribution calculation, it yielded the need to distribute fractions of shares, they were settled in cash under the Buenos Aires Stock Exchange Regulations. Therefore, 754 shares have not been attributed and they remain in the Company's treasury together with previously existing 5,000,000 shares.

NOTE 19: PRESENTATION OF THE GLOBAL PROGRAM FOR THE ISSUANCE OF NON-CONVERTIBLE NOTES FOR A FACE VALUE OF UP TO US\$ 50,000,000

Buenos Aires, February 11, 2010 - Cresud S.A.C.I.F. y A. (Nasdaq: CRESY BASE: CRES), one of the leading agricultural companies in Argentina, announces today its results for the first six months of Fiscal Year 2010 ended December 31, 2009.

Effective as from the second quarter of fiscal year 2009, Cresud presents its financial statements in consolidated form with those of IRSA Inversiones y Representaciones Sociedad Anónima, in which we held an equity interest of 57.12% as of December 31, 2009.

Cresud's consolidated income statement for the period beginning July 1, 2009 and ended December 31, 2009 includes the results of IRSA Inversiones y Representaciones Sociedad Anónima for that same period. Cresud's consolidated financial statements as of December 31, 2008, disclosed in the comparative tables include IRSA's consolidated data only for the period beginning October 1, 2008 and ended December 31, 2008, thus affecting the comparability of the income statement.

Results for the first half of fiscal year 2010 showed a net income of Ps. 141.8 million compared to a net income of 12.3 million posted in the same period of the previous fiscal year. The increase in net income is mainly due to the higher income from our subsidiary IRSA.

Consolidated agribusiness sales for the period amounted to Ps. 119.3 million, 8.9% higher than those posted for the same period of the previous fiscal year. This raise was caused mainly by the 20.4% increase in sales of beef cattle and the 31.8% increase in sales in the Others segment compared to the same period of the previous fiscal year.

Agribusiness production revenues amounted to Ps. 42.4 million in the period ended December 31, 2009, 36.6% higher than those recorded in the same period of the previous year. The rise is explained mainly by an increase of 75.0% in the crops segment and 9.3% in the beef cattle segment.

Consolidated sales in the real estate business for the period were Ps. 664.6 million for the six-month period ended December 31, 2009, whereas gross profit from the real estate segment stood at Ps. 419.2 million.

Gross profit during the first six months of fiscal year 2010 amounted to Ps. 426.4 million compared to Ps. 190.0 million during the same period of the previous year. This increase mainly reflects the effect of considering the gross profit mentioned in the previous paragraph due to the consolidation of the results of the real estate business of our controlled company IRSA.

Operating results for the period ended December 31, 2009 showed a Ps. 280.5 million profit, composed of operating income of Ps. 285.6 million in IRSA's segments for the first six months of fiscal year 2010 and a Ps. 5.1 million loss from Cresud's agribusiness activities for the first six months of fiscal year 2010, compared to the Ps. 17.8 million operating loss posted by Cresud in the same period of the previous fiscal year. This increase in the results from the agribusiness activities is explained mainly by the higher results from agribusiness production, mainly due to the better weather conditions recorded in the 2009/10 season and an improvement in the relationship between the prices of commodities and their related input costs. As harvesting of our various crops progresses, we expect to recognize higher production revenues and results than those recorded in the previous season.

I. Macroeconomic Context

According to most recently released official data available at the date of issuance of this report as of November 2009, the Economic Activity Monthly Estimator (EMAE) showed a 2.2% increase (without seasonal adjustment) compared to the values recorded in the same month of the previous year, which would imply a recovery in the economic activity levels similar to the ones recorded last year.

Regarding macroeconomic indicators, in the third quarter of calendar 2009 (latest available data) Argentina recorded a primary surplus and current account surplus, and its capital account was also positive. Consequently, the Central Bank increased its international reserves by US\$ 1,811 million, to US\$ 45,193 million. However, the Argentine government's financial result is still negative as a result of the debt service payments made during the period.

In relation with the sectors of the economy, the main indicators show a rebound in activity levels. In connection with the construction industry, according to the data shown by the Indicator of Construction Activities (ISAC, in Spanish), construction activities have increased by 0.38% from November 2008 to November 2009. Sales in supermarkets and shopping centers have continued to grow: as concerns supermarket sales, according to the INDEC their year-on-year variation at constant prices was 4.76% as of November 2009, though this growth rate is lower than the one recorded in 2008.

As regards the demand for homes in the real estate market throughout calendar 2009, there was a deceleration in supply and demand, accompanied by a slight decline in prices. Yet, as compared to other countries, no sub-prime mortgage crisis is to be expected in IRSA's market affecting the value of homes as it occurred in other economies because home loans here still stand for less than 2% of this country's GDP.

Concerning the office rental market in Buenos Aires, since the end of 2008 a slow contraction in rental prices has been observed, along with higher vacancy levels. The reason for this has been a slight decrease in demand on the one hand, motivated by the changes occurred in the economic scenario, and the larger supply and availability of surface area on the other, mainly due to the addition of footage to the market.

As regards the hotel sector, according to the data released by the Tourism Secretariat in its International Tourism Survey (ETI) as of September, 2009 the number of tourists arriving in Argentina (accumulated 12-month data) fell by approximately 31.0% compared to the cumulative figures for the same period a year earlier. That was mainly due to the impact of the worldwide financial crisis and the H1N1 Influenza outbreak. However, although no official data are available yet, there has been a strong reversion in the downward figures of visitors who arrived in Argentina; therefore, a remarkable increase in tourist arrivals is expected to occur in the near future.

Despite an overall less favorable context, the Company's real estate segments continue to show a robust position in the current scenario thanks to the quality of IRSA's assets, perceived as attractive by the market. This in turn translates into high levels of occupancy and cash generation combined with low short-term indebtedness, allowing IRSA to maintain its market leadership.

Business Highlight

The 2008/2009 agricultural season in Argentina's main production areas has sustained one of the worst droughts in the past 70 years which adversely affected the agricultural and livestock industry and also had a negative bearing on the expectations for next season. Apart from this weather phenomenon, and mainly during the month of October, there were late frosts, strong winds and storms with hail, which worsened the referred scenario even more in certain areas. During the 2009/10 season there has been an improvement in rainfall which has favored the development of crops. According to the United States Department of Agriculture (USDA)'s January 2010 estimates, Argentina's crops output (wheat, corn and soybean) for the 2009/2010 season is expected to be higher than in the previous cycle though lower than in the 2007/2008 season, as this was the last period to exhibit normal weather conditions. This decrease is partly due to the reduction in the area sown with wheat and corn. According to the Ministry of Agriculture, Cattle Raising, Fishing and Food, the area sown with soybean will rise by 1.1% compared to the previous cycle, whereas the area sown with corn and wheat will decrease by 9.4% and 32.7%, correspondingly, with respect to the previous cycle. The USDA has estimated that Argentina's wheat output for the 2009/2010 season will be 8.0 million tons; while in the 2008/09 season this output had been 8.4 million tons approximately. As regards corn, output for the previous cycle has been 12.6 million tons, whereas the USDA report for January estimated that in the 2009/2010 cycle Argentina's output will be 15.0 million tons. As regards the USDA projections concerning soybean, Argentina's output will be 53.0 million tons, that is 65.6% and 14.7% higher than the production posted in the 2008/09 and 2007/08 seasons, respectively.

As regards beef cattle, in line with the January report published by the Argentine Beef Promotion Institute (IPCVA), beef-cattle slaughtering activities, accumulated for the year, would have been approximately 14.8 million heads, with production at 3.11 million tons of meat. In addition, during the last quarter of 2009 there has been an increase in the price of beef cattle, due to the contracted supply resulting from the drop in production levels and lower birth rates. As regards external sales, during the year 2009 exports amounted to 550.2 thousand tons considering all meat cuts, which stood for a 54.3% year-on-year improvement. In monetary terms, revenues from exports were US\$ 1,881.3 million, 9.1% higher than in the previous year.

II. Summary of Operations

Crops

Crop sales for the first six months of fiscal year 2010 totaled Ps. 69.7 million, compared to sales for Ps. 68.6 million in the previous period. The volume of crops sold was 103.107 tons at an average price per ton of Ps. 676.5 compared to the 109.013 tons sold at an average price of Ps. 629.4 in the same period of the previous fiscal year. The decrease in the tons sold is mainly due to the decrease in the levels of stock of crops beginning of fiscal year 2010, which were partially offset by a 12.9% increase in production, which rose from 38,274 tons for the first six months of fiscal year 2009 to 43,214 tons for the same period in fiscal year 2010. Production revenues totaled Ps. 25.5 million, 75.0% higher than the revenues obtained from production in the same period of fiscal year 2009. In turn, the result from production for the period ended December 31, 2009 was a Ps. 0.1 million profit, in contrast with the Ps. 8.4 million loss for the same period in the previous fiscal year. The increase in the result from production was mainly a result of better weather conditions and an improvement in the relationship between the prices of commodities

and their related input costs. As harvesting of our various crops progresses, we expect to recognize higher production income and higher results than those recorded in the previous season.

The stock of crops as of the end of the period totaled 17,404 tons; 6,431 of which were corn, 819 were soybean, 111 were sunflower and 8,905 were wheat. The rest of the tons corresponds to sorghum, beans and other minor crops.

Gross results for the period ended December 31, 2009 posted a Ps. 6.0 million profit compared to a Ps. 5.2 million profit recorded in the same period of the previous fiscal year.

For the current season we have allocated 107,620 hectares to agriculture, 43,054 of which are leased from third parties and 11,024 are operated under concession. Compared to the previous fiscal year, we have decreased the number of total hectares allocated to agriculture by 4,243, which stands for a 3.8% drop, mainly due to the 31.8% decrease in the hectares leased from third parties.

As of December 31, 2009, 100% of the hectares devoted to sunflower, 63% of the hectares devoted to corn and 77% of the hectares devoted to soybean had been sown. As of the date of this report, the degree of progress of corn and soybean sowing is above 95% and with good prospects for the development of crops. As regards wheat, as of the date of this report we have harvested 100% of the hectares sown.

Beef Cattle

As of December 31, 2009, the Company's beef cattle stock, including breeding and fattening holdings, was 93,007 heads, with a total of 129,669 hectares allocated to beef cattle activities.

Beef cattle sales rose compared to the previous fiscal year, up from Ps. 8.3 million as of December 31, 2008 to Ps. 10.0 million as of December 31, 2009. During the first six months of fiscal year 2010, sales totaled 3,345 tons, whereas the tons sold in the same period of fiscal year 2009 had been 2,900. The increase in the sales was mainly explained by the sale of the beef cattle stock in the Rucalen farm due to the expiration of the lease agreement. Beef-cattle production was 2,243 tons, meaning a 24.1% decrease compared to the previous fiscal year. The decrease in production volumes was mainly due to scarce rainfall in certain areas, a circumstance that resulted in lower fattening and birth rates and higher death rates.

All these circumstances led to a gross loss of Ps. 4.8 million in the beef cattle segment for the first six months of fiscal year 2010, compared to a Ps. 3.0 million loss in the same period of the previous fiscal year.

Due to the increase in prices during the second quarter of fiscal year 2010, which rose by 30% for our beef cattle mix, we obtained holding results for Ps. 25.0 million.

Milk

Milk production dropped by 0.5% in the period, down from 11.5 million liters as of December 31, 2008 to 11.4 million as of December 31, 2009.

During the first six months, sales totaled Ps. 10.8 million, 0.23% higher than for the first six months of fiscal year 2009. The increase in sales is attributable to the increase in the average price of the liter of milk, which offset the decrease in production. The efficiency in the daily output per cow was slightly higher than the figure posted in the same period of the previous fiscal year.

The gross profit was Ps. 1.1 million, compared to the Ps. 2.0 million profit posted for the first six months of fiscal year 2009.

In the first six months of fiscal year 2010, the stock of dairy cattle amounted to 8,127 head over 4,637 hectares allocated to milk production, whereas for the same period of the previous fiscal year we had 7,925 cattle head over 4,106 hectares. On average, there were 3,311 cows in milking per day, 3.6% lower than in the same period of the previous fiscal year.

At present, the Company has three dairy facilities, two in the La Juanita farm and one in El Tigre, equipped with state-of-the-art technology.

III. Development of marginal lands

During the first six months of fiscal 2010, we continued with the development of our Los Pozos farm located in the Province of Salta. As of December 31, 2009, we had approximately 7,000 hectares for agricultural production and 55,000 hectares of prairies sown with grass (Gatton Panic), of which there were 50,000 hectares fit for beef-cattle production.

Besides, during the six months ended December 31, 2009, we continued with the development of Agropecuaria Anta S.A. (formerly known as Agropecuaria Cervera S.A.), thus reaching the 11,024 hectares devoted to our own production and 5,136 hectares that were leased to third parties.

As regards the development of marginal land in the Republic of Paraguay, we started with the production of approximately 3,000 hectares already developed in the first stage. For this fiscal year, we expect to continue with the development of 3,000 new additional hectares for agricultural production. As of the date of these financial statements, the summer planting had a 72% progress for soybean and a 22% progress for sorghum.

As of December 31, 2009 Cresud held land reserves amounting to 228,686 own hectares. In turn, we have 115,840 hectares under concession reserved for future developments.

IV. IRSA Inversiones y Representaciones S.A.

In the first half of fiscal year 2010, Cresud acquired 8,553,510 shares in IRSA. As a consequence of this acquisition, our equity interest as of December 31, 2009 was 57.12%.

Starting in the second quarter of fiscal 2009, Cresud presents its financial statements consolidated with those of IRSA Inversiones y Representaciones S.A. The following information has been taken from the financial statements of our controlled company IRSA Inversiones y Representaciones S.A. as of December 31, 2009:

IV a. Offices and Other Rental Properties

During the first six months of fiscal year 2010, income from rental properties totaled Ps. 79.0 million, a 11.5% higher than the Ps. 70.9 million recorded in the same period of fiscal year 2009.

This result is explained by IRSA's offices' higher rental prices, which translated into a 33.8% increase in the revenues per leased square meter. This positive result was offset by a slight decline of around 3 percentage points in occupancy levels, reaching values close to 90%, and by a 11.5% reduction in leasable square meters as of December 31, 2009 compared to December 31, 2008.

This reduction in IRSA's portfolio was caused by the sale of an office building in the past quarter in addition to other properties sold, all non strategic, during the calendar year. All these transactions were agreed upon for amounts close to US\$ 3,000 per square meter. These amounts are similar to those IRSA paid before the current world financial crisis in order to acquire premium office buildings in Argentina, such as Edificio República and Torre BankBoston.

This sales value per square meter reflects the strength of the local real estate market, which is perceived by investors as a high quality alternative to preserve their wealth in the current volatile global market scenario.

The following table provides details about IRSA's offices as of December 31, 2009.

Business Highlight***IV b. Alto Palermo S.A. (APSA): Shopping Centers and Consumer Finance***

The following information relates to data extracted from the financial statements of our subsidiary Alto Palermo S.A. (APSA), the company that operates our shopping center business, in which IRSA had a 63.35% interest as of December 31, 2009.

During the six-month period ended on December 31, 2009 tenants' sales in APSA's Shopping Centers amounted to Ps. 2,813.2 million. In nominal terms, this amount points to a 27.7% increase compared to the same period of the previous fiscal year. APSA's tenants' same shopping centers sales rose by 11.1% compared to the same period of the previous fiscal year. This increase reflects mainly the strong upsurge in sales during the months of October and November, which went up by 20.8% and 20.3%, respectively, compared to the previous year.

The business success of APSA's tenants allowed it to maintain the occupancy rates at its Shopping Centers at 98.0% as of December 31, 2009. This level is reflected by a strong increase in its revenues, which totaled a cumulative amount of Ps. 252.2 million as of December 31, 2009, 29.2% higher than those recorded in the same period of the previous year.

In addition, the strong generation of results from this segment, underpinned by the high quality of its assets and its unparalleled market position, is reflected by the 35.7% increase in operating income for the period, which totaled 139.2 million, compared to the same period of the previous year.

Consumer Finance Tarshop S.A. Subsidiary

During fiscal year 2009, and as a result of the international financial context then prevailing, Alto Palermo S.A. adopted the decision to strengthen Tarshop's business. This was performed mainly by means of capital contributions for a total of Ps. 165 million, which increased APSA's equity interest in Tarshop from 80% to 98.59% as of December 31, 2009. Other actions were taken to improve the company's management, including the following:

- (i) Streamlining of the operating structure to gear with the new business context.
- (ii) Revision of cash lending plans and financing of purchases at retail stores.
- (iii) Changes in the Loan Origination Policies.
- (iv) Strengthening of Collection Management scheme.
- (v) Analysis and implementation of new funding tools.

Thanks to the increased stringency in the origination requirements and the measures aimed at controlling portfolio delinquency, the loan portfolio including securitized coupons as of December 31, 2009 amounted to Ps. 543.8 million, 27.4% less than the Ps. 749.0 million portfolio posted in the same period of the previous fiscal year. Delinquent loans past 90 to 180 days represented 3.89% of the portfolio, which shows an improvement since December 2008 in the performance measured by this indicator.

The following chart illustrates the changes in the monthly volume of loan origination:

Thus, net revenues decreased 11.2% from Ps. 123.6 million for the six-month period ended December 31, 2008, to Ps. 111.7 million for the same period of the current fiscal year. Gross profit stood at Ps. 63.9 million and the operating result recorded an income of Ps. 18.3 million, which reflects an improvement when compared to the Ps. 113.8 million loss obtained in the six-month period ended on December 31, 2008. Net income for the six-month period ended on December 31, 2009 finally amounted to Ps. 11.2 million, continuing the positive trend of the previous quarter. This reflects a recovery in Tarshop S.A.'s results of operations, owing to the measures adopted and the improvement in capitalization combined with a relative stabilization in local financial markets, a decline in the write-off of bad debts and a decrease in operating expenses, confirming the diagnosis APSA had previously made.

Notwithstanding this recovery, APSA continues to work toward optimizing Tarshop S.A.'s performance and prepare it to address the current market conditions.

Finally, on December 29, 2009, Alto Palermo S.A. executed a stock purchase agreement with Banco Hipotecario S.A whereby Banco Hipotecario agreed the acquisition of 80% of Tarshop S.A.'s stock capital held by APSA. The transaction is subject to the occurrence of certain events, including the grant of the Argentine Central Bank's consent, in compliance with the applicable laws.

The transaction price was fixed at US\$ 26.8 million, payable as follows: US\$ 5.4 million as of the date of execution of the referred agreement, whereas the remaining balance of US\$ 21.4 million will be payable within 5 business days after the date the Argentine Central Bank gives notice of its consent to the transaction. Banco Hipotecario is in an unmatched position to endow Tarshop with an operating and financial performance capacity commensurate with its future business needs.

IV c. Sales and Developments

In the six-month period ended December 31, 2009, revenues in the Sales and Developments segment amounted to Ps. 137.4 million, compared to Ps. 63.7 million for the same period of the previous fiscal year. This was mainly due to the disposition of offices in non-strategic buildings, including the sale of the Edificios Costeros building, located at Olga Cossettini 1553, Dock II, closed during the past quarter. The building was sold for US\$ 18.0 million. These transactions were executed for amounts close to US\$ 3,000 per square meter, comparable to the sums paid by IRSA to acquire to-quality assets such as Edificio República and Torre BankBoston before the current world financial crisis.

In addition, the results from the residential projects under development have started to be recognized.

Below the Company's principal developments are described:

Caballito Nuevo, City of Buenos Aires. This property, with a surface of 8,404 square meters, is situated in the northern area of Caballito's residential neighborhood in the City of Buenos Aires. On May 4, 2006, IRSA and Koad S.A. (Koad), an Argentine developer, entered into an asset barter agreement valued at US\$7.5 million pursuant to which IRSA sold to Koad plot number 36 of Terrenos de Caballito in exchange for Koad's agreement to construct, at its sole expense, a residential complex to be named Caballito Nuevo, planned to span over a total area estimated at 28,000 sqm that will accommodate a residential complex consisting of two 34-story towers containing 220 apartments each, consisting of one, two and three room residential units with surface areas ranging from 40 to 85 square meters. The proposed apartment complex is currently expected to offer a wide variety of amenities and services. IRSA estimates that KOAD S.A. will deliver to IRSA the title deed and possession over 118 apartments and 55 parking spaces in Tower 1 in the first half of calendar 2010, roughly equivalent to 25% of IRSA's own square meters in compliance with the above-mentioned agreement. The degree of completion for Tower 1 is presently 95%. During 2009 IRSA executed preliminary sales agreements for 53 apartments and 22 parking lots representing 48.95% of the square meters to be received as barter. These transactions were executed for a sales value of about US\$ 4.5 million.

Vicente López, Olivos, Province of Buenos Aires. In January 2007, IRSA acquired a company whose main asset is a plot of land located in Vicente Lopez, Province of Buenos Aires, for US\$ 21.2 million.

At the same time, a plot of land adjacent to said property was acquired for a purchase price of US\$ 15.0 million.

In April 2007, IRSA created CYRSA S.A. in order to have a corporate vehicle to facilitate the development of a specific project together with one or more investors having in-depth knowledge and vast experience in the industry. Also at that time, IRSA and Cyrela (a Brazilian developer company) made contributions to CYRSA which include the plots of land and the debt related to the acquisition of the plot of land mentioned for CYRSA to develop its first project.

CYRSA's first project, which has been developed in a plot made up by two adjacent blocks in the Vicente López neighborhood, was launched in March 2008 under the name Horizons. It is one of the most significant developments in Greater Buenos Aires and it will entail a new concept in residential complexes given its emphasis on the use of common spaces. This project

includes two complexes with a total of six buildings; one of them facing the river with three 14-floor buildings (the *River* complex) and the other on Avenida del Libertador with three 17-floor buildings (the *Park* complex), totaling 59,000 square meters built for sale distributed in 467 units (including the units to be delivered in exchange for the acquisition of land). With its unique and innovating style in residential complexes, Horizons has 32 amenities, including a meeting room, a work zone, indoor swimming pools, club house and spa, sauna, gym, children room, teen room; theme-park areas; and aerobic trail, to name a few. The showroom was opened to the public in March 2008 with immediate success. As of the date of these financial statements, preliminary sales agreements had been executed for 99% of CYRSA's units on sale.

As of December 31, 2009, the degree of progress of the works is above 65.11%, and its conclusion and delivery are expected to occur over the course of fiscal year 2011.

Torres Rosario Project, City of Rosario, Province of Santa Fe. The project, being implemented by Alto Palermo, spans over an entire block, sub-divided into 8 parcels covering approximately 50,000 square meters overall. As of December 31, 2009, a barter was executed over 2 of the 8 parcels with Condominios del Alto S.A. (parcels 2-G and 2-H) with 6 parcels pending sale and amounting to approximately 31,000 square meters of surface area in the aggregate.

The barter of Lot 2-G comprises a total of 7,901 sqm to be applied to the construction of homes in exchange for 15 units to be built with an area of 1,504 sqm and 15 parking lots.

The barter of Lot 2-H comprises 11,687 sqm for sale, 22% of which (3,188 sqm) would be for Alto Palermo as consideration. This area represents 42 units and 47 car spaces.

The degree of progress of the works as of December 31, 2009 is 92% in Parcel 2-G and 23% in Parcel 2-H, and they are estimated to be completed in July 2010 and December 2011, respectively.

El Encuentro. During the second quarter of fiscal year 2010, IRSA received from Desarrolladora El Encuentro S.A., through a subsidiary, 110 functional units located in the residential community known as *El Encuentro* in the District of Tigre, Province of Buenos Aires, under a barter agreement previously executed by us.

Subasta Catalinas. In December 2009, a preliminary purchase agreement was executed in respect of a property located in *Catalinas Norte* in the City of Buenos Aires, adjacent to the office building known as *Torre BankBoston*. The plot extends over an area of 3,649 square meters. The price was fixed in the sum of Ps. 95.0 million, and as of the closing of the second quarter of fiscal year 2010, Ps. 19.0 million had been paid. The remaining balance will be payable at the time of execution of the deed of conveyance of title, scheduled for May 2010.

Hotels

Income from the Hotel segment dropped by 13.3%, down from Ps. 88.0 million for the first six months of fiscal year 2009 to Ps. 76.3 million for the same period of fiscal year 2010.

This result was mainly attributable to the decrease in average occupancy, which stood at 61.5% compared to 75.1% for the same period of the previous fiscal year, partially offset by the performance of the average rate, which in the first six-month period of fiscal year 2010 reached an average Ps. 667 per room rate, compared to Ps. 642 in the previous period. This drop in the occupancy average can be attributed to Hotel Llao-Llao and Hotel Intercontinental, whose average occupancy levels for the six-month period ended December 31, 2009 were 43.7% and 62.4%, respectively.

The main reason for these indicators is that they drag the cumulative negative results recorded during the first quarter of fiscal year 2010, during which the H1N1 influenza outbreak adversely affected the inflow of tourists. During the second quarter of fiscal year 2010 a reversion in this trend has been observed, and cumulative results for the six-month period ended as of December 31, 2009 have improved.

The following is information about IRSA's hotels for the six-month period ended as of December 31, 2009.

BrasilAgro finished sowing activities and has started arrangements for the harvest of 28 thousand soybean hectares (summer harvest) and 3.7 thousand of corn, rice and sorghum hectares. The total planted area as of December 31, 2009 exceeds 41 thousand hectares, in line with the company's objective to reach 48,242 hectares in production during this season.

To date, Brasilagro has invested, including committed and disbursed amounts, 266.8 million Reais in land purchases, compared to an aggregate of 552.6 Reais raised in the initial public offering of shares. As of December 31, 2009, Brasilagro's cash flow position was 224 million Reais.

Brasilagro will remain focused on the agricultural real estate segment, looking for new business opportunities with the aim of consolidating an important portfolio of properties, and on the development of its four main business lines: sugar cane, grains and cotton, forestry and beef cattle.

As of the closing of the first six months of fiscal year 2010, our investment in Brasilagro's common shares was 22.89%.

Paraguay

As regards our farmland in the Republic of Paraguay, we started sowing approximately 3,000 hectares developed in the first stage and we have begun to develop approximately 3,000 hectares in the second stage, which are expected to be concluded this calendar year and which are to start production during the next fiscal year, entailing a further addition to the land devoted to agricultural production. As of the date of these financial statements, the summer planting had a 72% progress for soybean and a 22% progress for sorghum, reaching an aggregate of 1,000 planted hectares.

Bolivia

During the first six months of fiscal year 2010, we continued to carry out production activities over approximately 11,282 hectares. This farmland is fit for double-crop of different crops: it is possible to obtain better results per hectare in the same season. As of December 31, 100% of wheat and sunflower had been harvested and the other winter crops (corn, soybean and sorghum) were about to finish their harvest with acceptable yields. Including double crops, the distribution of crops over the hectares sown will be 73% soybean, 15% corn, 4% sorghum, 4% sunflower and 4% wheat. As of the date of publication of these financial statements, summer planting had been concluded with 1,374 hectares for corn and 5,173 for soybean.

Edgar Filing: CRESUD INC - Form 6-K

Last year's adverse weather conditions have ended, giving way to improved records; therefore, prospects for the development of our agricultural production in this season are favorable. Furthermore, we see an improvement in this fiscal year in the relationship between our input costs and our products' prices, which should favorably impact on results at the time the largest part of our production income starts to be recognized as from the next quarter.

As concerns beef cattle, the decrease in supply in the local industry caused by the drop in beef production figures and lower birth rates combined with a sustained demand has led to an upward trend in price levels, which we expect will remain steady or even increase in the medium term.

Business Highlight

Regarding the development of marginal areas, we will continue to develop further hectares intended for agricultural and beef-cattle production in our Los Pozos farm. Besides, we are planning to add more land for agricultural and beef-cattle activities in our farmlands in Paraguay, where we expect to have 9,000 productive hectares for the 2010/2011 season.

In the next months, the market scenario for the next season will be defined. The prospects for production in South America are very favorable given the good weather conditions expected for this calendar year. As concerns other market factors, Asia's long-term food demand seems sustained as regards quantity and quality, and there are low levels of corn and soybean stock in the United States.

In this sense, we continue to analyze investment alternatives in the region, where the soil, weather and infrastructure conditions are optimum for agricultural development. We consider that there is an appealing opportunity to acquire and develop agricultural farmlands in South America, replicating our business model.

Regarding IRSA, its business performance has remained solid, as it successfully went through a hard 2009 thanks to the quality of its assets, and this has translated into high occupancy levels and cash flow generation capacity.

The shopping centers maintain high occupancy levels and adhesion by tenants. The rhythm of sales in the shopping centers recovered during the second quarter of fiscal year 2010 after the deceleration experienced in the first quarter as a consequence of the H1N1 influenza outbreak. Tenants adhere to APSA's new proposals, as shown by Dot Baires' occupancy levels. APSA will continue working to improve the services offered to APSA's tenants and consumers, seeking to maintain high occupancy levels and traffic in APSA's shopping centers and sales growth rates. We believe that Alto Palermo is a unique vehicle for accessing the Shopping Center business in Argentina, and the reason that prompted us to agree upon the purchase option for the minority stake held by Parque Arauco S.A., that should be exercised during this year.

As concerns the Consumer Finance business, the first half of the fiscal year saw a profit that is the result of the efforts made in the previous year to streamline and stabilize the business in light of the new economic scenario. APSA will continue to work with the aim of improving the operating and financial performance of this segment, and in pursuit of this goal they aspire to complete the sales process of Tarshop S.A.'s majority interest to Banco Hipotecario S.A., that will endow Tarshop with an operating and financial performance capacity commensurate with its future business needs.

As concerns the Office and Rental Properties segment, despite the year-on-year drop in occupancy levels lease revenues have remained firm, both in pesos and dollars. IRSA believes that there is some stagnation in the market in terms of occupancy rates and pricing levels caused by the market conditions and the addition of footage, mainly in the northern area of the City of Buenos Aires and Greater Buenos Aires. To face this, IRSA has a unique premium portfolio in downtown Buenos Aires that awakens interest among top-quality lessees in the market. IRSA will continue working toward maintaining high occupancy levels and optimizing their portfolio mix.

Regarding the Sales and Development segment, IRSA will make progress in the works schedule of the Horizons project through their subsidiary Cyrsa, where IRSA have already started to recognize revenues. As concerns other ventures, IRSA will continue sales in the Caballito Nuevo complex, in which work progress stands at 95% in Tower 1, and IRSA will continue to work aimed at launching the project that involves the construction of tower buildings in the property adjacent to Shopping Abasto.
