Business Overview

We are one of the largest providers of telecommunications services in rural communities in the United States, and are a customer-focused telecommunications company that provides phone, high-speed Internet and digital television services. We also offer a wide range of IP-based voice and data services and advanced phone systems and equipment to businesses and government agencies. As of June 30, 2010, we served approximately 3.3 million access lines and 1.3 million high-speed Internet customers located primarily in rural areas in 23 states.

Our telecommunications services are offered in the following 23 states: Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Minnesota, Mississippi, Missouri, Nebraska, New Mexico, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, and Texas.

As of June 30, 2010, we had approximately 3.3 million access lines, approximately 1.3 million high-speed Internet customers and approximately 420,000 digital satellite television customers. For the twelve months ended June 30, 2010, we generated revenues of approximately \$3,253.9 million, operating income of approximately \$960.9 million and net income of approximately \$308.6 million.

For a further discussion of our business, we urge you to read our Form 10-K, incorporated by reference herein. See [Where You Can Find More Information](#).

Recent Developments

7.75% Senior Notes Due 2020

On October 6, 2010, we announced the completion of a private placement of \$500 million in aggregate principal amount of 7.75% senior, unsecured notes due October 15, 2020. We expect to use the net proceeds of the offering, together with cash on hand, to finance our acquisition of Q-Comm (as described below), including payment of the cash portion of the purchase price, the repayment of outstanding indebtedness of Q-Comm and payment of transaction fees and expenses related to the acquisition.

Rural Broadband Stimulus Grant

As of September 17, 2010, we have received notification of approval from the Rural Utilities Service (RUS) for eighteen of our thirty three grant applications for the expansion of broadband service in unserved and underserved areas under the American Recovery and Reinvestment Act of 2009. The total cost of approved projects is approximately \$240 million, of which approximately \$181 million will be funded by the grant. In accordance with the grant agreement, the assets constructed under the agreement are pledged to the RUS against the Company's obligation to use the assets as intended.

Table of Contents

Amendment to Senior Secured Credit Facilities

On September 17, 2010, we received consent from the requisite lenders to an amendment of our senior secured credit facilities, which will permit us to sign the rural broadband stimulus grant agreements previously discussed. The amendment also, among other things, provides for an increase in the aggregate amount of the incremental loans and *pari passu* secured debt permitted under the senior secured credit facilities from \$800 million to \$1.6 billion and permits the extension of Windstream's Tranche B-1 term loans to the extent not previously extended.

Merger with Q-Comm Corporation

On August 17, 2010, we entered into an agreement and plan of merger with Q-Comm Corporation (Q-Comm), a privately held regional fiber transport and competitive local exchange carrier based in Overland Park, Kansas. Under the terms of the merger agreement, we will pay approximately \$279 million in cash consideration and issue approximately 20.6 million shares of our common stock valued at approximately \$237 million, based on the closing price of our common stock on August 17, 2010, to acquire all of the issued and outstanding shares of Q-Comm common stock. We will also repay estimated net indebtedness of Q-Comm of approximately \$270 million. We expect that the net proceeds of this offering, together with cash on hand, will be sufficient to finance the cash portion of the purchase price and repayment of indebtedness. The transaction includes Q-Comm's wholly owned subsidiaries Kentucky Data Link, Inc., a fiber services provider in 22 states, and Norlight, Inc., a competitive local exchange carrier serving approximately 5,500 access lines. The transaction is expected to close in the fourth quarter of 2010, subject to certain conditions, including necessary approvals from federal and state regulators.

Merger with Iowa Telecommunications Services, Inc.

On June 1, 2010, we completed our previously announced acquisition of Iowa Telecommunications Services, Inc. (Iowa Telecom), based in Newton, Iowa. This acquisition provides Windstream with a sizable operating presence in the upper Midwest. As of June 1, 2010, Iowa Telecom provided service to approximately 208,000 incumbent local exchange carrier access lines, 39,000 competitive local exchange carrier (CLEC) access lines, 96,000 high-speed Internet customers and 25,000 digital television customers in Iowa and Minnesota. Pursuant to the merger agreement, each share of Iowa Telecom common stock was converted into the right to receive 0.804 shares of our common stock and \$7.90 in cash. We paid \$253.6 million in cash, net of cash acquired, and issued approximately 26.7 million shares of our common stock valued at approximately \$281.0 million on the date of issuance. In addition, we repaid outstanding indebtedness, including related interest rate swap liabilities, of Iowa Telecom of approximately \$628.9 million. The cash portion of the purchase price and debt repayment were funded through cash on hand, principally unspent funds from the \$1,100.0 million debt offering completed in 2009, and through a draw down of approximately \$375.0 million against our revolving line of credit. On July 19, 2010, we completed the private placement of \$400 million in aggregate principal amount of 8.125% senior notes due 2018 (the 2018 Notes Issuance). The net proceeds of the 2018 Notes Issuance were used to repay amounts outstanding under our revolving line of credit and for general corporate purposes. Effective upon the closing of the merger, Mr. Alan L. Wells, formerly the Chief Executive Officer and Chairman of the board of directors of Iowa Telecom, was appointed to Windstream's board of directors.

As part of our business strategy, we expect to pursue additional acquisitions from time to time with other companies as opportunities may arise. We continue to evaluate, and engage in discussions concerning, other potential acquisition targets, some of which could be material. Except as described herein, we do not currently have definitive agreements for any such transactions, and we cannot assure you that we will enter into any such transactions. If we do enter into such transactions, we may not be able to achieve the benefits anticipated.

FCC National Broadband Plan

On March 16, 2010, the Federal Communications Commission (FCC) released the National Broadband Plan (NBP). Implementation of the NBP will entail many rulemakings, since the NBP itself is not self-effectuating. The FCC has issued a Broadband Action Agenda (the Agenda) and has initiated rulemakings to begin its implementation. Among other issues, the Agenda proposes a review of universal service, intercarrier compensation, special access, wholesale competition policy, and safeguards intended to protect against cyberattacks to determine changes required, if any, to ensure the nation s communications infrastructure is robust.

On June 17, 2010, the Federal Communications Commission voted to open a proceeding that seeks comment on three options for redefining the FCC s role in regulating broadband. The three options include leaving broadband as a so-called Title I service, which limits the FCC s power to regulate access and price, reclassifying broadband to be a Title II service, fully subject to requirements as to sharing of infrastructure and regulated pricing (which could adversely affect our operations, especially if our competitors are not subject to the same reclassification) or a third way proposal that would reclassify broadband as a Title II service but exempt from some of the more onerous provisions of the Title II, including infrastructure sharing and regulated pricing (which could also adversely impact our operations, especially if our competitors are not subject to the same reclassification). On September 1, 2010, the FCC issued a Public Notice seeking further comment on how to address managed services and mobile services in this proceeding. Any change in reclassification ultimately proposed by the FCC is likely to be subject to litigation within the industry which would be both extensive and lengthy. We cannot predict the ultimate outcome of these action items or the impact on our revenues and expenses.

Accrued Interest

The exchange notes will bear interest from the most recent date to which interest has been paid on the original notes or, if no such interest has been paid, from July 19, 2010. If your original notes are accepted for exchange, you will receive interest on the exchange notes and not on the original notes. Any original notes not tendered will remain outstanding and continue to accrue interest according to their terms.

RATIO OF EARNINGS TO FIXED CHARGES

Table of Contents

RISK FACTORS

You should carefully consider the following risk factors in addition to the other information included in this prospectus before tendering your original notes in the exchange offer. In addition, you should carefully consider the matters discussed under Risk Factors in our Form 10-K and our Quarterly Report on Form 10-Q for the quarter ended June 30, 2010 and in other documents that are subsequently filed with the SEC, which are incorporated by reference into this prospectus. If any of the following risks actually occur, our business, financial condition, prospects, results of operations or cash flow could be materially and adversely affected. Additional risks or uncertainties not currently known to us, or that we currently deem immaterial, may also impair our business operations. We cannot assure you that any of the events discussed in the risk factors below will not occur and if such events do occur, you may lose all or part of your original investment in the notes. The risks discussed below also include forward-looking statements and our actual results may differ substantially from those discussed in these forward-looking statements. See Forward Looking Statements.

Risks Related to the Exchange Offer

You may have difficulty selling the original notes that you do not exchange.

If you do not exchange your original notes for exchange notes pursuant to the exchange offer, the original notes you hold will continue to be subject to the existing transfer restrictions. The original notes may not be offered, sold or otherwise transferred, except in compliance with the registration requirements of the Securities Act, pursuant to an exemption from registration under the Securities Act or in a transaction not subject to the registration requirements of the Securities Act, and in compliance with applicable state securities laws. We do not anticipate that we will register the original notes under the Securities Act. After the exchange offer is consummated, the trading market for the remaining untendered original notes may be small and inactive. Consequently, you may find it difficult to sell any original notes you continue to hold because there will be fewer original notes of such series outstanding.

If you do not exchange your original notes in the exchange offer, you will no longer be entitled to an increase in interest payments on original notes that the indenture provides for if we fail to complete the exchange offer.

Once the exchange offer has been completed, holders of outstanding original notes will not be entitled to any increase in the interest rate on their original notes that the indenture governing the notes provides for if we fail to complete the exchange offer. Holders of original notes will not have any further rights to have their original notes registered, except in limited circumstances, once the exchange offer is completed.

Some holders of the exchange notes may be required to comply with the registration and prospectus delivery requirements of the Securities Act.

If you exchange your original notes in the exchange offer for the purpose of participating in a distribution of the exchange notes, you may be deemed to have received restricted securities and, if so, you will be required to comply with the registration and prospectus delivery requirements of the Securities Act in connection with any resale transaction.

In addition, a broker-dealer that purchased original notes for its own account as part of market-making or trading activities must deliver a prospectus when it sells the exchange notes it received in the exchange offer. Our obligation to make this prospectus available to broker-dealers is limited. We cannot assure you that a proper prospectus will be available to broker-dealers wishing to resell their exchange notes.

Failure to comply with the exchange offer procedures could prevent a holder from exchanging its original notes.

Holders of the original notes are responsible for complying with all exchange offer procedures. The issuance of exchange notes in exchange for original notes will only occur upon completion of the procedures described in

Table of Contents

this prospectus under The Exchange Offer. Therefore, holders of original notes who wish to exchange them for exchange notes should allow sufficient time for timely completion of the exchange procedure. Neither Windstream nor the exchange agent are obligated to extend the offer or notify you of any failure to follow the proper procedure.

Risks Related to the Exchange Notes

Our substantial debt could adversely affect our cash flow and prevent us from fulfilling our obligations under the notes.

After giving pro forma effect to both the 2018 Notes issuance and the use of the proceeds therefrom and the 2020 Notes and the use of the proceeds therefrom, we would have had approximately \$7.2 billion of consolidated debt as of June 30, 2010.

Our substantial amount of debt could have important consequences to you. For example, it could:

make it more difficult for us to satisfy our obligations under the notes;

increase our vulnerability to general adverse economic and industry conditions;

require us to dedicate a substantial portion of our cash flow from operations to make interest and principal payments on our debt, thereby limiting the availability of our cash flow to fund future capital expenditures, working capital and other general corporate requirements;

limit our flexibility in planning for, or reacting to, changes in our business and the telecommunications industry;

place us at a competitive disadvantage compared with competitors that have less debt; and

limit our ability to borrow additional funds, even when necessary to maintain adequate liquidity.

Further, a substantial portion of our debt, including borrowings under our senior secured credit facilities, bears interest at variable rates. If market interest rates increase, variable-rate debt will create higher debt service requirements, which could adversely affect our cash flow. While we may enter into agreements limiting our exposure to higher interest rates, any such agreements may not offer complete protection from this risk.

In addition to our debt, we have significant contractual obligations, as discussed in Management's Discussion and Analysis of Results of Operations and Financial Condition incorporated by reference herein.

Despite our substantial debt, we or our subsidiaries may still be able to incur significantly more debt. This could further exacerbate the risks associated with our substantial debt.

We or our subsidiaries may be able to incur additional debt in the future. The terms of our senior secured credit facilities, the indenture governing the notes and the agreements governing our other debt will allow us to incur substantial amounts of additional debt, subject to certain limitations. If additional debt is added to our current debt levels, the related risks we could face would be magnified.

The agreements governing our debt, including the notes and our senior secured credit facilities, contain various covenants that impose restrictions on us that may affect our ability to operate our business and to make payments on the notes.

The agreements governing our senior secured credit facilities, the indenture governing the notes and the agreements governing our other debt each impose operating and financial restrictions on our activities. These restrictions include compliance with or maintenance of certain financial tests and ratios, including minimum interest coverage ratio and maximum leverage ratio, and limit or prohibit our ability to, among other things:

incur additional debt and issue preferred stock;

create liens;

Table of Contents

redeem and/or prepay certain debt;

pay dividends on our stock or repurchase stock;

make certain investments;

engage in specified sales of assets;

enter into transactions with affiliates;

enter new lines of business;

engage in consolidation, mergers and acquisitions;

make certain capital expenditures; and

pay dividends and make other distributions.

These restrictions on our ability to operate our business could seriously harm our business by, among other things, limiting our ability to take advantage of financing, merger and acquisition and other corporate opportunities.

Various risks, uncertainties and events beyond our control could affect our ability to comply with these covenants and maintain these financial tests and ratios. Failure to comply with any of the covenants in our existing or future financing agreements would result in a default under those agreements and under other agreements containing cross-default provisions. A default would permit debt holders to accelerate the maturity for the debt under these agreements and to foreclose upon any collateral securing the debt and to terminate any commitments to lend. Under these circumstances, we might have insufficient funds or other resources to satisfy all our obligations, including our obligations under the notes. In addition, the limitations imposed by financing agreements on our ability to incur additional debt and to take other actions might significantly impair our ability to obtain other financing.

The notes are effectively subordinated to our secured debt and that of the guarantors.

The notes, and each guarantee of the notes, are unsecured and therefore are effectively subordinated to any of our secured debt and that of the guarantors to the extent of the assets securing such debt. In the event of a bankruptcy or similar proceeding, the assets which serve as collateral for any secured debt will be available to satisfy the obligations under the secured debt before any payments are made on the notes. We had approximately \$2.4 billion of secured debt outstanding, \$191.5 million of additional availability under our revolving line of credit and can request up to an additional \$800.0 million of commitments, loans or other extensions of credit under the optional incremental facility of our credit agreement. In addition, as of June 30, 2010, after giving effect to the 2018 Notes issuance and the use of the proceeds therefrom and our recent credit facility amendment, we had approximately \$491.5 million of availability under our revolving line of credit and can request up to an additional \$1.6 billion of commitments, loans other extensions of credit under the optional incremental facility under our credit agreement. See

Description of Other Indebtedness Indebtedness Issued Directly by Windstream Senior Credit Facilities. The notes are effectively subordinated to any borrowings under our senior secured credit facilities and certain of our existing notes. The indenture governing the notes and the terms of our senior secured credit facilities allow us to incur a substantial amount of additional secured debt in certain circumstances.

Not all of our subsidiaries are required to guarantee the notes, and the assets of any non-guarantor subsidiaries may not be available to make payments on the notes as your claims in respect of the notes will be effectively subordinated to all of the liabilities of any of our subsidiaries that is not a guarantor.

Edgar Filing: NUVOX INC - Form 424B3

Subsidiaries of the company that currently guarantee our senior secured credit facilities also guarantee the notes. However, most of our regulated subsidiaries do not guarantee the senior secured credit facilities and those subsidiaries do not guarantee the notes. As of June 30, 2010, the non-guarantor subsidiaries held approximately 80% of our total assets. In addition, for the six months ended June 30, 2010, the non-guarantors contributed

approximately 76% of our total revenue and approximately 73% of our operating income. All of our future unrestricted subsidiaries, and any of our future restricted subsidiaries that do not guarantee our senior secured credit facilities, will not be required to guarantee the notes.

In the event that any of our non-guarantor subsidiaries becomes insolvent, liquidates, reorganizes, dissolves or otherwise winds up, holders of the debt and trade creditors of such non-guarantor subsidiaries will be entitled to payment on their claims from the assets of that subsidiary before any of those assets are made available to us or any guarantors. Consequently, your claims in respect of the notes will be structurally subordinated to all of the liabilities of any of our subsidiaries that is not a guarantor, including trade payables. In addition, the indenture, subject to certain limitations, permits our subsidiaries to incur additional indebtedness and does not contain any limitation on the amount of other liabilities, such as trade payables, that our subsidiaries may incur.

To service our debt and meet our other cash needs, we will require a significant amount of cash, which may not be available.

Our ability to make payments on, or repay or refinance, our debt, including the notes, and to fund planned capital expenditures, dividends and other cash needs will depend largely upon our future operating performance. Our future performance, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. In addition, our ability to borrow funds in the future to make payments on our debt will depend on the satisfaction of the covenants in our senior secured credit facilities and our agreements governing our other debt, including the indenture governing the notes, and other agreements we may enter into in the future. Specifically, we will need to maintain specified financial ratios and satisfy financial condition tests. It is our current practice to pay dividends of \$1.00 per share per annum. Based on the number of shares of our common stock outstanding as of June 30, 2010, this dividend practice would result in the payment of an aggregate of approximately \$483.2 million per year to holders of our common stock. We cannot assure you that our business will generate sufficient cash flow from operations, that future borrowings will be available to us under our senior secured credit facilities or from other sources in an amount sufficient to enable us to pay our debt, including the notes, or to fund our dividends and other liquidity needs.

We are dependent upon dividends from our subsidiaries to meet our debt service obligations.

We are a holding company and conduct all of our operations through our subsidiaries. Our ability to meet our debt service obligations will be dependent on receipt of dividends from our direct and indirect subsidiaries. Subject to the restrictions contained in the indentures, future borrowings by our subsidiaries may contain restrictions or prohibitions on the payment of dividends by our subsidiaries to us. See Description of the Exchange Notes Certain Covenants. In addition, federal and state regulations governing our regulated subsidiaries and applicable state corporate law may limit the ability of our subsidiaries to pay dividends to us. We cannot assure you that the agreements governing the current and future indebtedness of our subsidiaries, applicable laws or state regulation will permit our subsidiaries to provide us with sufficient dividends, distributions or loans to fund payments on these notes when due.

Fraudulent conveyance laws may void guarantees or subordinate the guarantees.

The issuance of the guarantees may be subject to review under federal bankruptcy law or relevant state fraudulent conveyance laws if a bankruptcy lawsuit is commenced by or on behalf of the guarantors' creditors. Under these laws, if in such a lawsuit a court were to find that, at the time the notes were issued, we:

incurred the guarantees with the intent of hindering, delaying or defrauding current or future creditors; or

received less than reasonably equivalent value or fair consideration for incurring this debt, and the applicable guarantor:

- (1) was insolvent or was rendered insolvent by reason of the related financing transactions;

Table of Contents

(2) was engaged, or about to engage, in a business or transaction for which our remaining assets constituted unreasonably small capital to carry on its business; or

(3) intended to incur, or believed that it would incur, debts beyond our ability to pay these debts as they mature, as all of the foregoing terms are defined in or interpreted under the relevant fraudulent transfer or conveyance statutes;

then the court could void the guarantee or subordinate the guarantee to our presently existing or future debt or take other actions detrimental to you.

The measure of insolvency for purposes of the foregoing considerations will vary depending upon the law of the jurisdiction that is being applied in any such proceeding. Generally, an entity would be considered insolvent if, at the time it incurred the debt:

it could not pay its debts or contingent liabilities as they become due;

the sum of its debts, including contingent liabilities, is greater than its assets, at fair valuation; or

the present fair saleable value of its assets is less than the amount required to pay the probable liability on its total existing debts and liabilities, including contingent liabilities, as they become absolute and mature.

We cannot assure you as to what standard a court would apply in order to determine whether the Company or a guarantor was insolvent as of the date the notes were issued, and we cannot assure you that, regardless of the method of valuation, a court would not determine that the Company or a guarantor was insolvent on that date. Nor can we assure you that a court would not determine, regardless of whether the Company or a guarantor was insolvent on the date the notes were issued, that the payments constituted fraudulent transfers on another ground.

Our obligations under the notes are guaranteed by all of our existing subsidiaries that are currently guarantors under our senior secured credit facilities, and the guarantees may also be subject to review under various laws for the protection of creditors. The analysis set forth above would generally apply, except that the guarantees could also be subject to the claim that, since the guarantees were incurred for our benefit, and only indirectly for the benefit of the guarantors, the obligations of the guarantors thereunder were incurred for less than reasonably equivalent value or fair consideration. A court could void a guarantor's obligation under its guarantee, subordinate the guarantee to the other indebtedness of a guarantor, direct that holders of the notes return any amounts paid under a guarantee to the relevant guarantor or to a fund for the benefit of its creditors, or take other action detrimental to the holders of the notes. In addition, the liability of each guarantor under the indenture will be limited to the amount that will result in its guarantee not constituting a fraudulent conveyance, and there can be no assurance as to what standard a court would apply in making a determination as to what would be the maximum liability of each guarantor or whether a court would give effect to such limitation. In the event that a court declares the guarantees to be void, or in the event that the guarantees must be limited or voided in accordance with their terms, any claim you may make against us for amounts payable on the notes would be effectively subordinated to the obligations of our subsidiaries, including trade payables and other liabilities that constitute indebtedness.

In the event that a court declares the guarantees to be void, or in the event that the guarantees must be limited or voided in accordance with their terms, any claim you may make against us for amounts payable on the notes would be effectively subordinated to the obligations of our subsidiaries, including trade payables and other liabilities that constitute indebtedness. In addition, even if the guarantees of the notes remain in force, under most circumstances, while you share equally and ratably with the other senior secured parties in all proceeds from any realization on the collateral, you will not control the rights and remedies with respect to the collateral and the exercise of any such rights and remedies will be made by the collateral agent, acting at the direction of parties other than us.

We may be unable to make a change of control offer required by the indenture governing the notes which would cause defaults under the indenture governing the notes, our senior secured credit facilities and our other financing arrangements.

The terms of the indenture governing the notes require us to make an offer to repurchase the notes upon the occurrence of a change of control at a purchase price equal to 101% of the principal amount of the notes, plus accrued interest to the date of the purchase. The terms of our senior secured credit facilities will require, and other financing arrangements may require, repayment of amounts outstanding in the event of a change of control and limit our ability to fund the repurchase of your notes in certain circumstances. It is possible that we will not have sufficient funds at the time of the change of control to make the required repurchase of notes or that restrictions in our senior secured credit facilities and other financing arrangements will not allow the repurchases. See Description of the Exchange Notes Repurchase at the Option of Holders Change of Control.

An active, public market may not develop for the notes, which may hinder your ability to liquidate your investment.

There has not been an established trading market for the notes and we do not intend to list them on any securities exchange. In addition, the liquidity of the trading market in the notes, and the market price quoted for the notes, may be adversely affected by changes in the overall market for fixed income securities and by changes in our financial performance or prospects or in the prospects for companies in our industry in general. As a result, we cannot assure you that an active trading market will develop for the notes. If no active trading market develops, you may not be able to resell your notes at their fair market value or at all.

Risk Related to Our Recent Acquisitions

If we are unable to successfully integrate the operations of the companies we have recently acquired, our business and earnings may be negatively affected.

The acquisitions of NuVox, Inc. (NuVox) and Iowa Telecom will involve the integration of companies that have previously operated independently. Successful integration of the operations of each acquired company will depend primarily on our ability to consolidate operations, systems procedures, properties and personnel and to eliminate redundancies and costs. The acquisitions also pose other risks commonly associated with similar transactions, including unanticipated liabilities, unexpected costs and the diversion of management's attention to the integration of the operations of the acquired companies. We cannot assure you that we will be able to integrate the operations of the acquired companies without encountering difficulties, including, but not limited to, the loss of key employees, the disruption of our respective ongoing businesses or possible inconsistencies in standards, controls, procedures and policies. If we have difficulties with any of these integrations, we might not achieve the economic benefits, including cost savings, that we expect to result from such acquisitions within the expected time frame, or at all, and this may adversely affect our business and results of operations.

Windstream is dependent upon other ILECs for facilities and service in operating territories in which it is not the incumbent.

As a result of the merger with NuVox, Windstream has a significant operating presence in territories where it will depend upon the ILEC to install and maintain the vast majority of the facilities used to serve its customers, or the CLEC territories. These facilities include certain digital transmission lines, unbundled network elements, or UNEs, and other network components. The prices for these network components are negotiated with the ILEC or purchased pursuant to the ILEC's special access tariff terms and conditions. The terms, conditions and prices included in these tariffs may be changed but must be approved by the appropriate regulatory agency before they go into effect. In addition, interconnection agreements with the ILEC must be negotiated whenever we enter a new CLEC market or an existing agreement expires. If interconnection agreements with the ILECs cannot be negotiated on favorable terms, or at all, the company ma
